SAFETY PRECAUTIONS

The following check should be performed for the continued protection of the customer and service technician.

LEAKAGE CURRENT CHECK

Measure leakage current to a known earth ground (water pipe, conduit, etc.) by connecting a leakage current tester between the earth ground and all exposed metal parts of the appliance (input/output terminals, screwheads, metal overlays, control shaft, etc.). Plug the AC line cord of the appliance directly into a 120V AC 60Hz outlet and turn the AC power switch on. Any current measured must not exceed 0.5mA.

ANY MEASUREMENTS NOT WITHIN THE LIMITS OUTLINED ABOVE ARE INDICATIVE OF A POTENTIAL SHOCK HAZARD AND MUST BE CORRECTED BEFORE RETURNING THE APPLIANCE TO THE CUSTOMER.

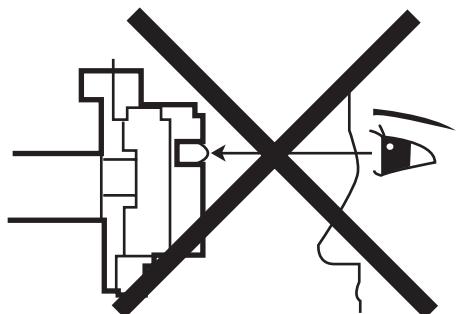

AC Leakage Test

LASER BEAM SAFETY PRECAUTIONS

CLASS 1 LASER PRODUCT

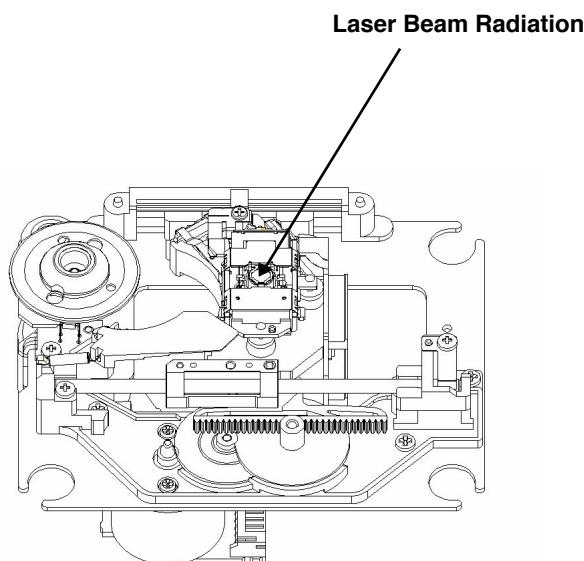

**DANGER
INVISIBLE LASER RADIATION
AVOID DIRECT EXPOSURE TO BEAM**

Do not look directly at the laser beam coming from the pickup or allow it to strike against your skin.

This Receiver uses a pickup that emits a laser beam.

The laser beam is emitted from the location shown in the figure. When checking the laser diode, be sure to keep your eyes at least 1 foot away from the pickup lens when the diode is turned on. Do not look directly at the laser beam.

Caution: Use of controls and adjustments, or doing procedures other than those specified herein, may result in hazardous radiation exposure.

HANDLING LASER PICKUP

The laser diode in the optical system of this receiver can be damaged by electrostatic discharge from clothes, body, etc. Proper electrostatic grounding for service personnel is required during servicing.

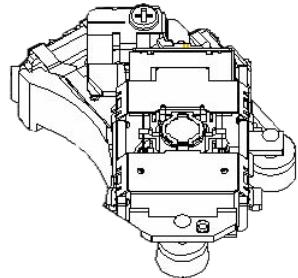

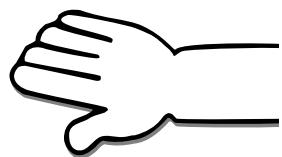

BEFORE REPAIRING THE DVD MECHANISM

a. Human Body Grounding:

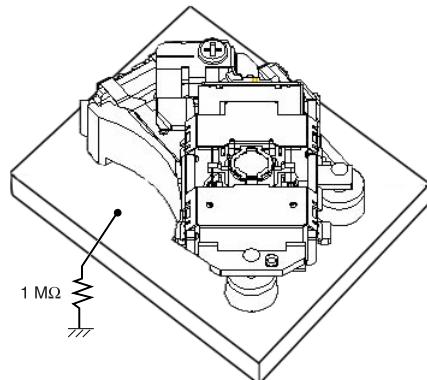

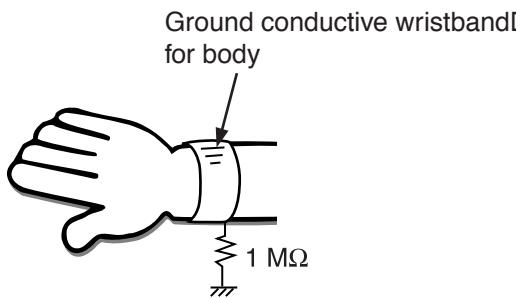

Many of the components used in this compact disc player, including the laser pickup, are sensitive to electrostatic discharge.

Service personnel should be grounded with an electrostatic armband (1M ohm).

INCORRECT

CORRECT

Caution: Static charge on clothing does not escape through a body grounding wristband. Be careful not to contact the pickup or electrical components with your clothing.

b. Workbench and Tool Grounding:

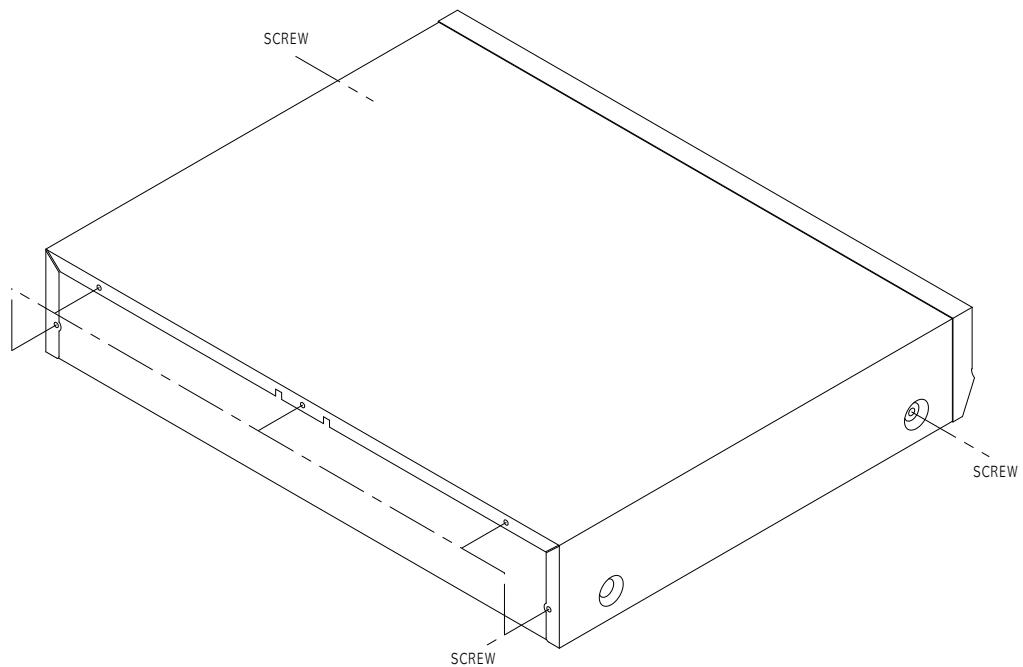

A properly-grounded electroconductive plate (1 M ohm) or metal sheet should be fitted to the workbench surface. Tools and instruments (soldering irons, scopes, etc.) should be grounded to prevent AC leakage.

c. Make two standard ESD solder bridges on the Laser optic PC Board

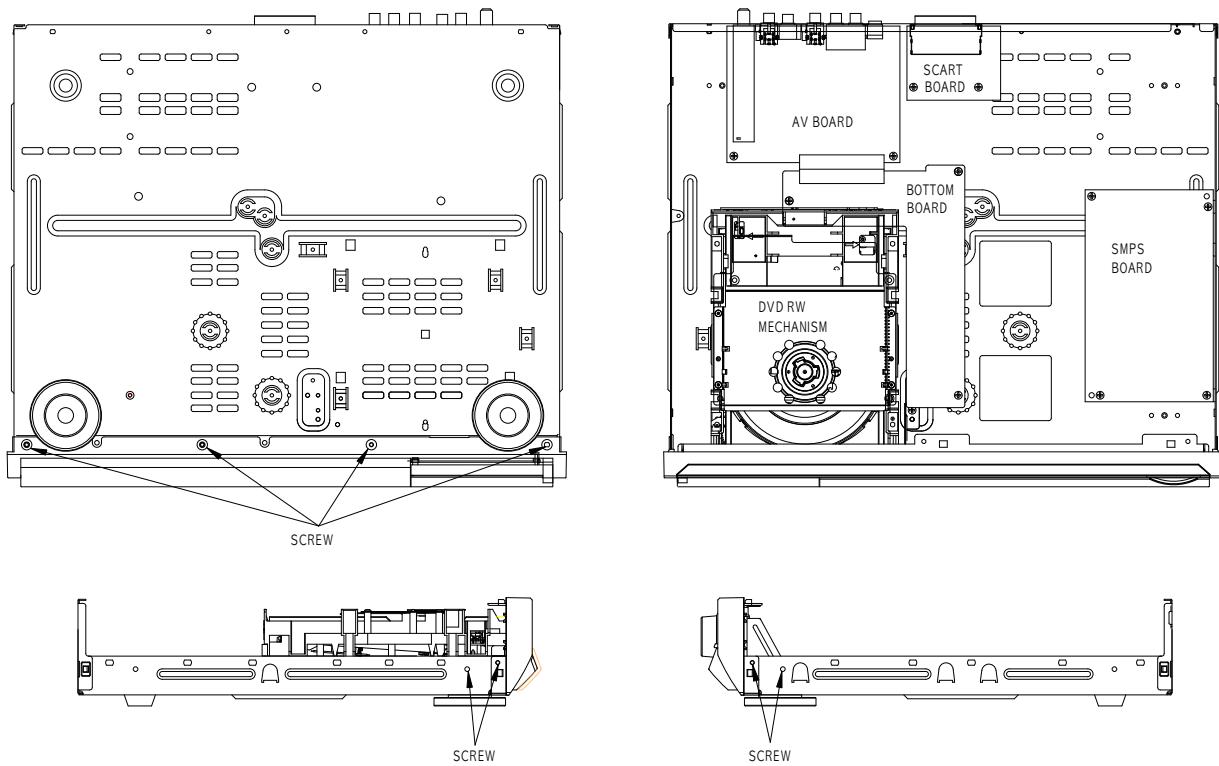

Before disassembly of mechanism or disconnect any cables in it, make two standard ESD solder bridges on the laser optic PC Board.

TROUBLE SHOOTING

Incorrect operation is often mistaken for trouble and malfunctions. If you think that there is something wrong with this component, check the points below. Sometimes the trouble may lie in another component. Investigate the other components and electrical appliances being used.

Symptom	Cause	Remedy
No power.	The power cord is disconnected.	Plug the power cord into the wall outlet securely.
The power is on, but the DVD player does not work.	No disc is inserted.	Insert a disc. (Check that the DVD or audio CD indicator in the DVD display is lit.)
No picture.	The TV is not set to receive DVD signal output.	Select the appropriate video input mode on the TV so the picture from the DVD player appears on the TV screen.
	The video cable is not connected securely.	Connect the video cable into the jacks securely.
	The connected TV power is turned off.	Turn on the TV
	There is ghosting when P.SCAN output is on. This can occur because your TV does not support P.SCAN.	Reset the machine to the default factory settings.
	Those channels were not deleted.	Use "Execution APS" in the menu to AUTO SEARCH.
	The antenna didn't connect with COAXIAL CABLE.	Check the antenna connecting with COAXIAL CABLE.
The playback picture is poor.	The disc is dirty.	Clean the disc.
	Your TV set is not properly adjusted.	Properly adjusted it.
The DVD player does not start playback.	No disc is inserted.	Insert a disc. (Check that the DVD or CD indicator in the display panel is lit.)
	The DVD player cannot read the disc because it is damaged or an incorrect type (for example, a CD-i).	Check the disc type, color system and regional code. Check for any scratches or smudge on the disc. Insert a readable disc.
	The disc is placed upside down.	Place the disc with the playback side down.
	The disc is not placed within the guide.	Placed the disc on the disc tray correctly inside the guide.
	The disc is dirty.	Clean the disc.
	A menu is on the TV screen.	Press SETUP to turn off the menu screen.
	The rating level is set.	Cancel the rating function or change the rating level.
	You have selected the wrong program number of the DVD Recorder on the TV.	On the TV, select the correct program number for the DVD Recorder.
	The cable connecting the TV set and the DVD Recorder has come loose.	Check the cable.
The remote control does not work properly.	The remote control is not pointed at the remote sensor of the unit.	Point the remote control at remote sensor of the unit.
	The remote control is too far from the unit.	Operate the remote control within about 23 feet (7m).
	There is an obstacle in the path of the remote control and the DVD player.	Remove the obstacle.
	The remote's batteries are exhausted.	Replace the batteries with new ones.
	Other function is selected.	Press the function key what you want to operate.

Symptom	Cause	Remedy
Recording does not work properly.	The disc is not writable DVD DISC.	Remove the disc and insert a proper writable DVD DISC.
	The disc is CD-R / RW.	Only DVD+R/+RW/-R/-RW DISC can be recorded. Remove the disc and insert a proper writable DVD DISC.
	The disc is full.	Remove the disc and insert a blank writable DVD DISC.
	The disc is dirty.	Clean the disc and then try again.
	The disc is a suitable Disc to record.	Use the recommended DISC for better operations.
	The disc is finalized.	Unfinalized the DISC and then record in the disc.
	TV channel you want to record is not stored or selected the wrong program number.	Check TV channels stored.
	The disc is write-protected. (recording protected).	Remove write-protection or change the disc.
Scheduled recording does not work.	You have programmed the wrong time or date.	Check time and date.
	You have not set the TIMER properly.	Check the scheduled recordings.
	Locked disc inserted.	Remove disc lock.
Dim picture.	The brightness and contrast of picture are not adjusted properly.	Adjust them properly.
No sound is output when a function is selected.	Improper connections.	Make sure the component is connected correctly.
	Sound is muted.	Press the remote's MUTE (TV).
	The volume is turned down.	Adjust VOLUME (TV).
	The connected component is not operated properly.	Check the operation of the connected component.
	The audio output is not set properly.	Check the audio output setting.
	The sound is muted during pause, slow motion , fast forward / reverse, and stepping playback.	Press the PLAY button to resume normal playback.
No image is output when a function is selected.	Improper connections.	Make sure the component is connected correctly.
	The input source is not properly selected.	Press the correct function button.
Broadcast stations cannot be selected automatically.	The signal are weak.	Connect an outdoor antenna.
The display is dark.	The dimmer or sleep timer are on.	Press DIMMER again.

■ TEST MODE

TEST Mode shows the infomation as follows.

- I. Back End Version (It is to express each Buyer, each model, and version number.)
- II. Front End Version (It is to display the Mecha Firmware version number.)
- III. Back End Build time (It can be used to seperate each B/E firmware version by the day.)
- IV. Region No.(It is only to display region code.)

[operation]

To enter the first state of test mode, first insert a any DVD DISC and load the DISC.

Then press "STOP" key and the front panel displays "STOP".

then, press key on the remote unit as follows.

[CLEAR] - [2] - [5] - [8] -[0] - [CLEAR]

If you press key correctly, you will see the message below.

Loader FW ver: X.CA05 - (I : F/E version)

Client ver: 0911PS-MODEL_NO. - (II : B/E version)

Current Region: < X > - (III : Region Number)

<B/E Firmware update>

The update is done with CD-R. (When the firmware is changed, the updated firmware will be provided by Anam on CD-R)

Put the DISC in TRAY and load the CD-R disc, and Dialogue message to confirm B/E firmware update will be diplayed on the TV screen.
Updating will begin.

You'll see the update progress on the TV screen.

50%

When the TV screen's display goes off, turn the POWER OFF.

Turn the POWER ON and then DO EEPROM CLEAR.

<F/E Firmware update>

The update is done with CD-R. (When the firmware is changed, the updated firmware will be provided by Anam on CD-R)

- Put the disc on TRAY at normal operation mode.
- Load the DISC and Dialogue message to confirm F/E firmware update will be diplayed on the TV screen .
- After about several seconds, DVD door will be open.
- Remove the Disc in the tray and then turn the POWER off.
- Turn the power on
- Remove the disc.

Notes.

* Circuit No's first character indicates kinds of part type.

C : Capacitors

R : Resistors

D : Diode

J : Jumper

L : Coil

Q : Transistors

S : Switch

BK : Bracket

JK : Jack

IC : Integrated Circuit

X : Crystal

BD : Bead

■ IMPORTANT SAFETY NOTICE

* Components identified by ! Mark have special characteristics important for safety.

* When replacing any of these components, use only manufacturer's specified parts.

* The unit of resistance is OHM (Ω)

$K=1000(\Omega)$, $M=1000(K\Omega)$

* The unit of capacitance is MICROFARAD (μF)

$P=10^{-6} \mu F$
