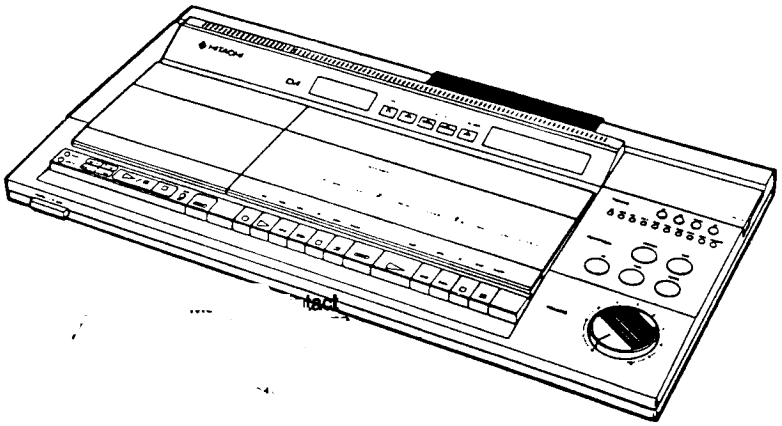
(US,CS,ES,VS,BK,SA,KS,ZS,EW)

TYPE1 : TN-21H-581 PLAY
TYPE2 : TN-21H-582 REC/PLAY



CD Slimline System

CONTENTS

CAUTION
Invisible laser radiation when open interlocks failed or defeated. AVOID DIRECT EXPOSURE TO BEAM.

VARNING
När apparaten öpponats och skyddsanordningen eller satts ur funktion förekommer osynlig laserstrålning. UNDVIK DIREKT BESTRÅLNING.

ADVARSEL
Når apparatet åbnes og beskyttelsesanordningen ikke virker eller sættes un af funktion, forekommer der usynlig laserståling. UNDGÅ DIREKTE BESTRÅLING.

ADVARSEL
Når denne delen er åpen som følge av at låsen er utkoplet eller ikke fungerer, eksisterer det usynlig laserstråling.UNNGÅ Å BLI UTSATT FOR DIREKTE BESTRÅLING!

VAROITUS
Laite lähettää näkymätöntä lasersäteliyä, kun se avataan ja kun sisäiset turvalukot eivät toimi. VARO JOUTUMASTA ALTTIIKSI SÄTEILYLLE.

SAFETY PRECAUTIONS

The following precautions should be observed when servicing.

1. Since many parts in the unit have special safely related characteristics, always use genuine Hitachi's replacement parts. Especially critical parts in the power circuit block should not be replaced with other makers. Critical parts are marked with ⚠ in the circuit diagram and printed wiring board.
2. Before returning a repaired unit to the customer, the service technician must thoroughly test the unit to ascertain that it is completely safe to operate without danger of electrical shock.

SPECIFICATIONS AND PARTS ARE SUBJECT TO CHANGE FOR IMPROVEMENT.

STEREO CASSETTE RECEIVER/COMPACT DISC PLAYER

July 1986 TOYOKAWA WORKS

SPECIFICATIONS

GENERAL

Power supply:	AC 120V, 60 Hz (CS) AC 220V, 50 Hz (ES, VS, KS, ZS) AC 240V, 50 Hz (BK, SA) AC 110 – 120V/200 – 220V /230 – 240V, 50/60 Hz (US, EW)
Power consumption:	150W
Dimensions:	590(W) x 81(H) x 311(D) mm
Weight:	6.0 kg
Supplied accessories:	AM loop antenna . . . . . (1) FM lead antenna . . . . . (1) (except ZS) Auxiliary leg attachment . . . . . (2)

AMPLIFIER SECTION

Power output: **(Both channels driven)**	25 W/ch*, min. RMS, at 8 ohms from 70 Hz to 15 kHz, with less than 0.9%, total harmonic distortion. * Measured pursuant to the Federal Trade commision's Trade Regulation Rule on Power output claims for Amplifiers. 30 W/ch + 30 W/ch (8 ohms, 1 kHz, T. H. D. 0.7% SINUS) 30 W/ch + 30 W/ch (8 ohms, 1 kHz, T. H. D. 0.7%)
Total harmonic distortion:	0.5% (at 1/2 power output)
Input sensitivity/ impedance:	PHONO: 6 mV/50 kohms AUX: 400 mV/25 kohms
Load impedance:	Speaker: 8 ~ 16 ohms Headphones: more than 8 ohms
S/N ratio (IHF A network):	PHONO: 73 dB AUX: 87 dB

TUNER SECTION

Reception frequency:	FM: 87.5 – 108.0 MHz (except US, EW) 87.9 – 107.9 MHz (for US, EW) AM (MW): 522 – 1,611 kHz (9 kHz spacing) 530 – 1,620 kHz (10 kHz spacing) (for US, EW) LW: 146 – 353 kHz (for ES, VS, BK)
Sensitivity:	FM: 1.6 μV (75 ohms, S/N ratio 26 dB, 40 kHz Dev.) AM (MW): 600 μV/m (S/N ratio 20 dB 400 Hz, 30% mod.) LW: 2.5 mV/m (S/N ratio 20 dB, 400 Hz, 30% mod.) (for ES, VS, BK)
S/N ratio:	FM: 70 dB (mono), 68 dB (stereo) AM (MW): 42 dB LW: 40 dB (for ES, VS, BK)
FM selectivity:	28 dB (± 300 kHz)
Stereo separation:	40 dB (1 kHz)
Antennas:	FM: Lead antenna or external antenna (75 ohms, unbalanced) AM (MW/LW): Loop antenna or external antenna

TAPE DECK SECTION

Track system:	4 track 2 channel stereo
Recording system:	AC bias
Tape:	Normal, Chrome/Metal
Frequency response:	Normal 40 to 13,000 Hz CrO_2 40 to 14,000 Hz Metal 40 to 15,000 Hz

CD PLAYER SECTION

Player time:	Approx. 60 minutes/one side
Diameter:	120 mm
Sampling frequency:	44.1 kHz
Quantization number:	16 bit linear/channel
Frequency response:	20 to 20,000 Hz

Specifications are subject to change without notice for performance improvement.

DISASSEMBLY

1. Top case (Fig. 1, 2)

   Remove ten screws ① and seven screw ② of bottom side. (Fig. 1)

   Remove Power button and Volume knob.

   Open CD lid and Cassette lid by pushing CD door open button and C door open button. Then the Top case by lifting it upward. (Fig. 2)

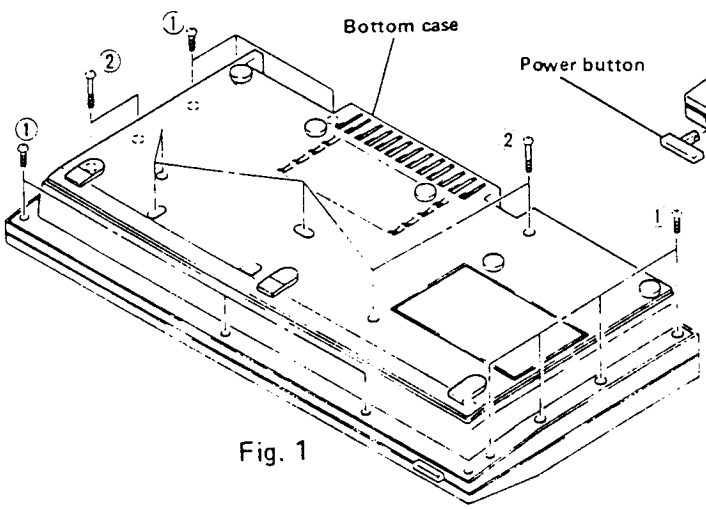


Fig. 1

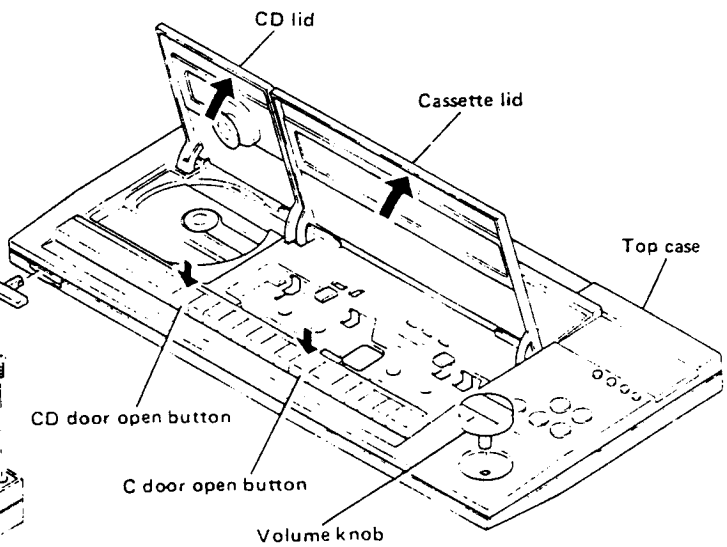

Fig. 2

2. Function switch P.W.B. (Fig. 3)
   Remove one screw (3) and four connectors (A), then pull the P.W.B. to the arrow direction and remove it.
3. FL meter P.W.B. (Fig. 3)
   Remove two screws (4), and eight connectors (B). Remove the P.W.B. together with P.W.B. holder.

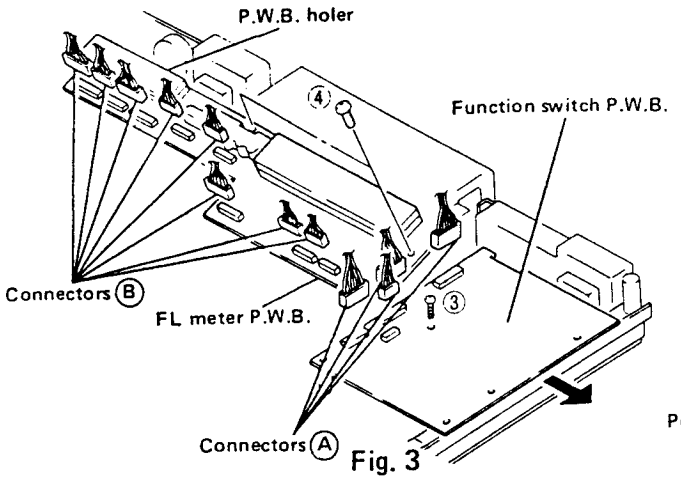

Fig. 3

4. Cassette chassis (Fig. 4)
   Remove eight screws (5) and four connectors.
   Remove the Cassette chassis by lifting them upward. (Isolation sheet is removed together with the Cassette chassis.)

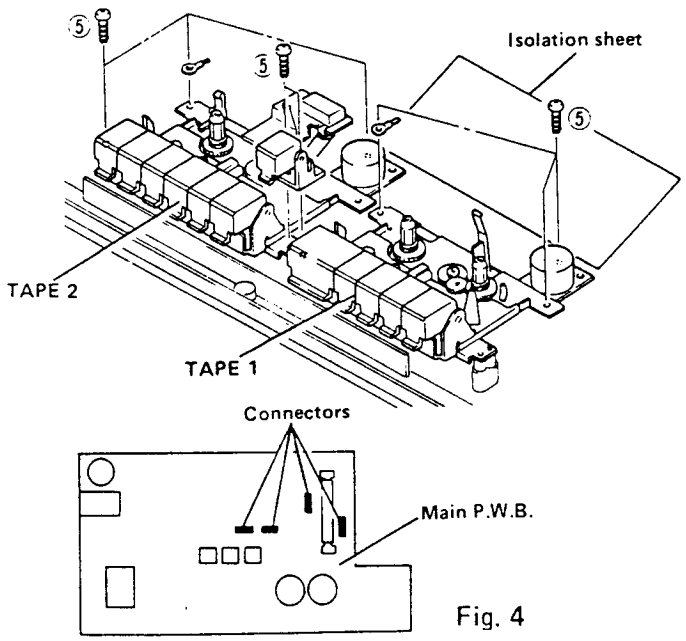

Fig. 4

5. CD Function switch P.W.B. (Fig. 5)
   Remove Operating button panel by removing one screw (6) and then remove three screws (7)

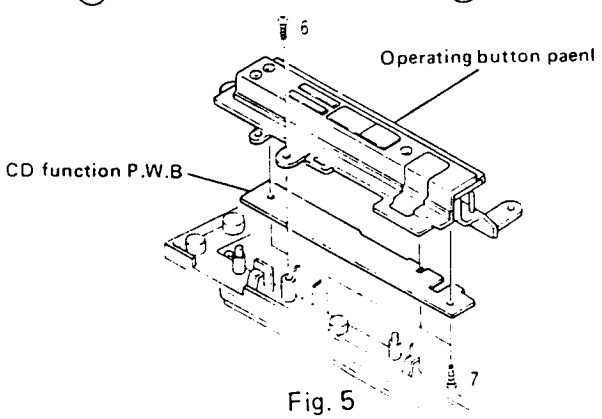

Fig. 5

6. Power switch P.W.B. (Fig. 6)
   Remove one screw (8).
7. CD switch P.W.B. (Fig. 6)
   Remove two screw (9), one screw (10) and one connector (C).
8. Unit mechanism (Fig. 6)
   Remove three screws (11), two connectors (D) and the Flexible P.W.B..

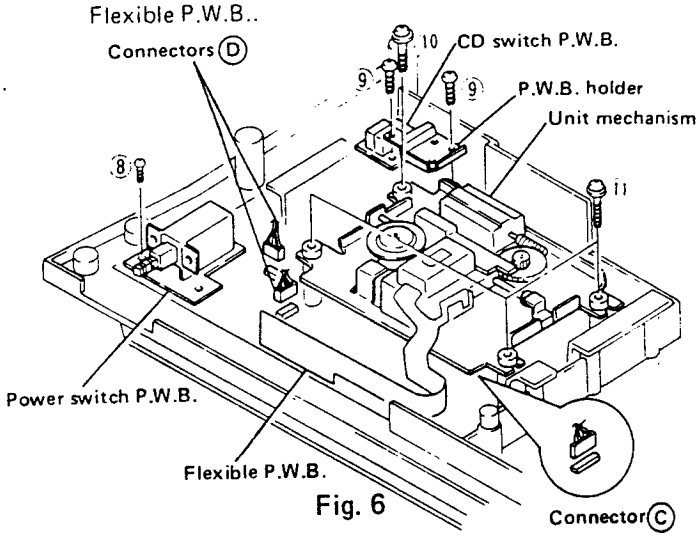

Fig. 6

9. PX P.W.B. (Fig. 7)
   After removing the P.W.B. holder and CD switch P.W.B. remove two screws (12) and remove the P.W.B. by lifting it up to the arrow direction.

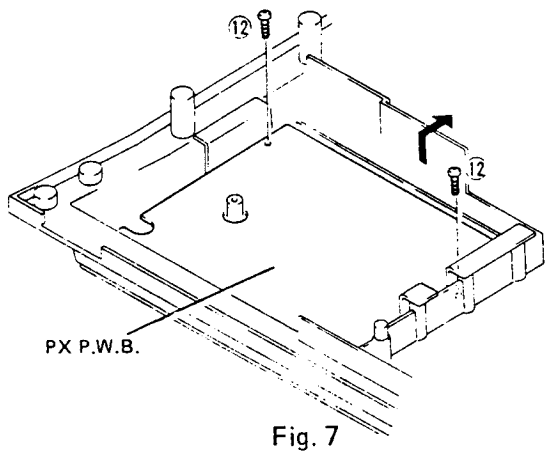

Fig. 7

10. Main P.W.B. (Fig. 8)
    Remove seventeen screws (13) and then remove the P.W.B. by lifting it backward.

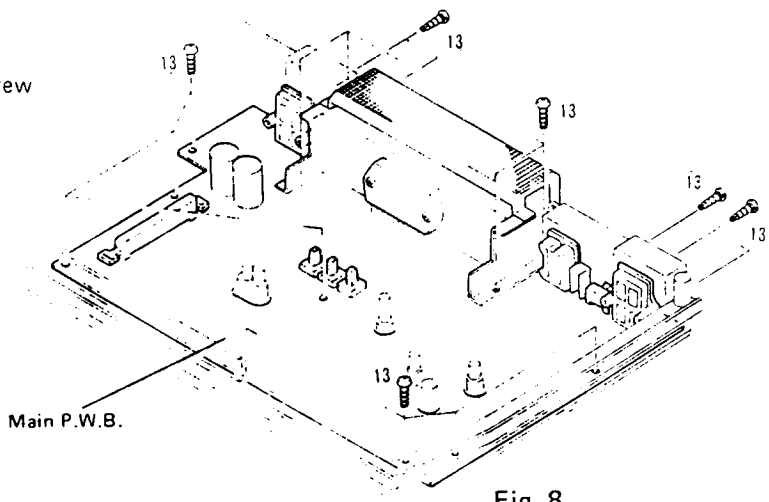

Fig. 8

Note 1: Apply low-input signals from a sweep generator (with a small amount of noise superimposed on IF waveform as in Fig. 10), and adjust the waveform until it becomes maximum and symmetrical.

Note 2: Cause an S curve to appear on the screen by FM IFT as shown in Fig. 11, and adjust it until points A and B are positioned symmetrically, and the A-B line becomes linear.

Note 3: Connect a DC null meter TP. 4 and TP. 5 then make adjustment until it reads 0 ± 30mV.

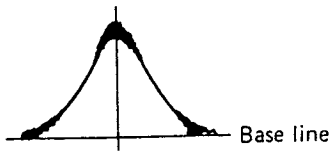

Fig. 10

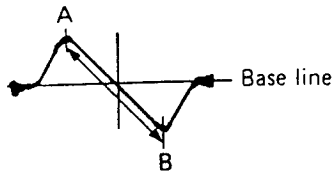

Fig. 11

AM TUNER ADJUSTMENT

FUNCTION : AM
MODULATION : 400Hz 30% Mod.
VOLUME : MIN

Sequence		Connection		Setting		Adjust for	
		Input	Output	Tuning	Signal	Adjust	Indication
1	IF AMP.	TP.7 100k 0.1μ	TP.3 100k 0.1μ	–	450kHz	–	(Note 4)
2	Covering	Loop antenna	TP.8 (MW) TP.9 (LW)	(MW) 530kHz (for US, CS) 522kHz (except US, CS)	–	(MW) T151	1.3V ± 0.1V (for US, CS) 1.2V ± 0.1V (except US, CS) (Note 5)
				(LW) 146kHz	–	(LW) T152	1.2V ± 0.1V (Note 5)
3	Tracking	400Hz 30% Mod.	Audio output	(MW) 603kHz or 600kHz	(MW) 603kHz or 600kHz	L151	V max. (Note 5)
				(LW) 164kHz	(LW) 164kHz	L152	
				(MW) 1404kHz or 1400kHz	(MW) 1404kHz or 1400kHz	CT151	
				(LW) 335kHz	(LW) 335kHz	CT152	

Note 4: Check the waveform shown in Fig. 12 is obtained.

Note 5: At first, set the input level to 75 dB m. As the adjustment advances, reduce the input level to an allowable minimum level (approx. 60 dB), and repeat the adjustment until the maximum output is obtained at the specified frequency.

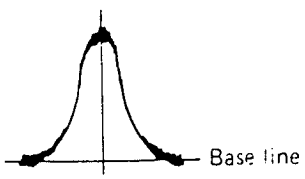

Fig. 12

GENERAL ADJUSTMENT INSTRUCTIONS

• Adjustment points Perform adjustment at least 3 minutes after the power has been switched on.

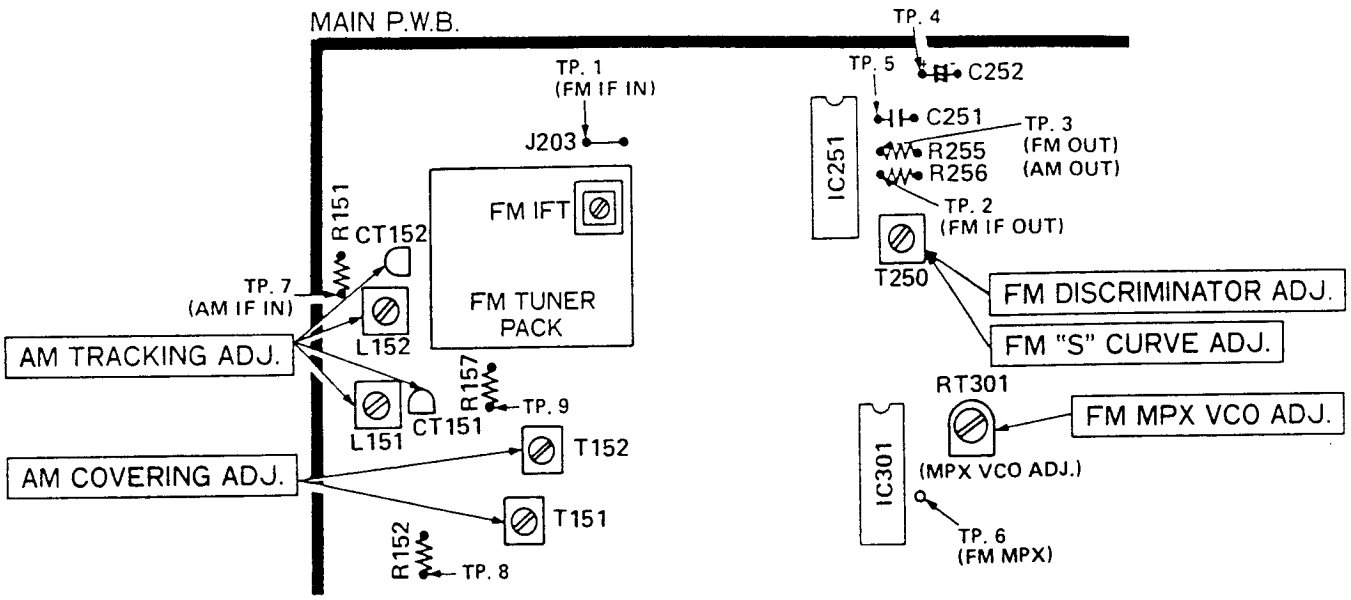

Fig. 9

FM TUNER ADJUSTMENT

FUNCTION : FM VOLUME : MIN FM MODE : MONO

Sweep Generator Signal Generator Oscilloscope DC Null Meter

VTVM Frequency Counter Distortion Meter

Sequence		Connection		Setting		Adjust for	
		Input	Output	Tuning	Signal	Adjust	Indication
1	IF Amp.	TP.1 100k 0.1μ	TP2 100k 0.1μ	–	10.7 MHz	FM IFT	(Note 1)
2	"S" curve		TP.3 100k 0.1μ	–	10.7 MHz	T250	Straight line (Note 2)
3	Discriminator	FM antenna 60dB 400Hz, 22.5kHz Dev.	SPEAKERS terminal	98 MHz	98 MHz	T250	(Note 3)
4	MPX VCO	Antenna terminal (75 ohms) 60dB Non Mod.	TP.6 100k	–	–	RT301	19 kHz ± 100 Hz

TAPE DECK ADJUSTMENT

• Adjustment points

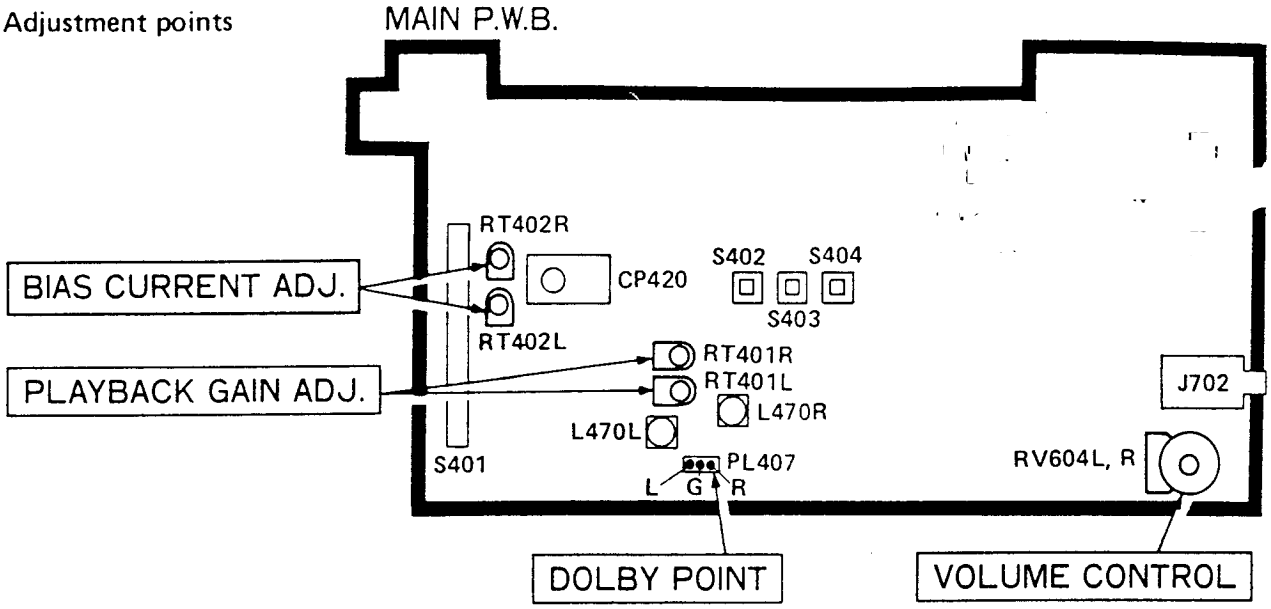

Fig. 13

• **Measuring Instruments**

1. Audio oscillator
2. Electronic Voltmeter
3. Attenuator
4. Frequency counter

• **Jigs, Test and Check Tapes**

1. Head mounting jig
2. 400Hz, Dolby alignment tape
3. 10kHz, azimuth alignment tape
4. 3,000Hz, tape speed alignment tape
5. Mirror tape (for tape running check)
6. NORMAL tape (MAXELL UDI 90)
   METAL tape (MAXELL MX46)

• **Positions of Knobs**

Set the switches and knobs, etc. to the following positions shown in the next table unless otherwise specified.

REC level control (RV604L, R)	MAX
Tape select switch (S402)	(Note 1)
RIF switch (S403)	A
Dolby NR switch (S404)	OFF

Note 1: Change over the tape select switch as shown in the table on the right depending on the tape used.

Tape used	Tape select switches (S402)
No tape used	NOR
Test Tape	NOR
NORMAL tape	NOR
METAL tape	METAL

Peform adjustment by the following procedure after open the cassette lid and cleaning the heads, pressure rollers and capstans with alcohol.

1. Tape Speed Adjustment

Tape	Adjustment value	Adjustment point
Tape speed Alignment tape (3,000 Hz)	3,000 Hz ± 1%	Semi-fixed resistor inside of the motor

Adjustment procedure

Connect the frequency counter to the SPEAKERS terminals apply heat-run for 20 minutes or more. Then play back alignment tape for TAPE 1 and TAPE 2 , and adjust the tape speed to the middle of the tape so that the speed of TAPE 1 and TAPE 2 are equal.

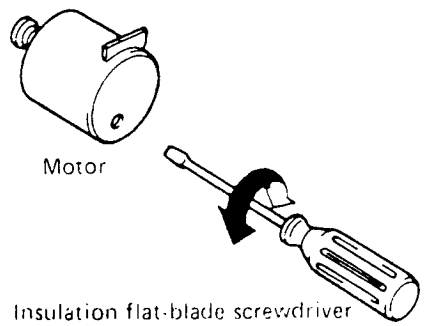

Fig. 14

2. Recording/Playback Head Azimuth Adjustment

Tape	Adjustment value	Adjustment point
Azimuth alignment tape (10 kHz)	Maximum output	Azimuth adjustment screw

Adjustment procedure

Connect the electronic voltmeter to the SPEAKERS terminals, playback the alignment tape to adjust the head azimuth.

When the maximum values differ between both channels, set to the maximum value of the left channel. Check that the difference between the values of both channels is less than 2 dB, and readjust when the difference is greater. After the adjustment, fix the screw with Screw Lock.

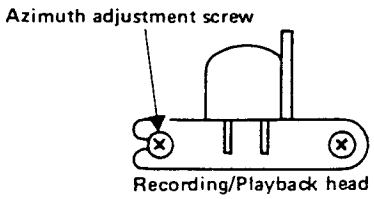

Fig. 15

3. Playback Gain Adjustment

Tape	Adjustment value	Adjustment point
400 Hz Dolby alignment tape	580 mV	RT401L, R

Adjustment procedure

Connect the electronic voltmeter to PL407, then playback the Dolby alignment tape in TAPE 1 and adjust RT401L, R so that the reading of the electronic voltmeter indicates the adjustment value.

Perform the adjustment in the same way for TAPE 2.

(The difference between the values of TAPE 1 and TAPE 2 is less than 2 dB.)

4. Bias current Adjustment and REC/PLAY Output level adjustment

Set RT402L,R in the center position and record at the recording level shown in the table below to adjust for each tape, then check the playback level.

Order	Tape	Tape select switch	Recording level			Playback level		Adjustment procedure
			Frequency (Hz)	Level	Adjustment point	Level	Adjustment point	
1	NORMAL tape	NOR	400/10k	580mV −25dB	ATT	Within ±1.5dB	RT402L, R	(1)
2	NORMAL tape	NOR	400	−10dB	ATT	580mV −10 ± 2dB	To check	(2)
3	NORMAL tape	NOR	400/10k	580mV −25dB	ATT	Within ±1.5dB	To check	(1)
4	METAL tape	METAL	400/10k	580mV −25dB	ATT	Within ±3dB	To check	(1)

Adjustment procedure

(1) Bias Current Adjustment

1) Connect the audio oscillator to the AUX IN terminals via the attenuator and set the unit to the record mode. Adjust the output of the audio oscillator so that the meter indicates 0 dB. Then, adjust the attenuator to set it to 580 mV −25 dB. (Frequency: 400 Hz)

2) Record in this state, and then set the frequency of the audio oscillator to 10 kHz and record it.

3) Playback the recorded section, read the output and check that the output difference between the two frequencies is within ±1.5 dB. In this case, make adjustment so that the output at 10 kHz is sure to be greater than that at 400 Hz.

4) When the output difference is out of within ± 1.5 dB range, adjust RT402L, R properly and repeat recording/playback so that the output difference is within ± 1.5 dB.

*Perform checking only for METAL tape, but when the output is not within the specified ±3 dB, perform adjustment using NORMAL tape again.

(2) REC/PLAY Output Level Adjustment

1) Connect the audio oscillator to the AUX IN terminals to input 400 Hz signal and set the unit to the record mode.
Adjust the output of the audio oscillator so that the reading of the electronic voltmeter connected to the SPEAKERS terminals, is −10 dB, and perform recording.

2) Playback the recorded section and check that the output is 580 mV −10 ±2 dB.

CD PLAYER ADJUSTMENT

1. Checking the object lens (Fig. 17)

Take care not to dirty the object lens of the lens actuator. When the unit is not used for a long time, the lens sometimes becomes dirty. Clean the lens with a cotton swab.

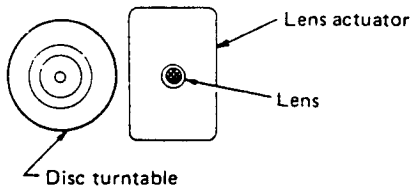

Fig. 17

2. Checking the laser

The laser unit operates on 40 – 80 mA current. If the laser operation current in the circuit exceeds 100 mA, the laser may be defective.

3. Precautions on repair service

(1) Semiconductor laser (Fig. 18)

The semiconductor laser requires more attention to electrostatic breakdown or surge current. Be very careful not to touch the terminals of the semiconductor laser and those of the flexible P.W.B. by hand or with a tool.

The current – light intensity characteristic became sharp abruptly after passing the threshold value as shown in Fig. 18. The threshold current value is a little different in each laser unit. Therefore, when setting the laser beam amount after replacing the unit mechanism, be sure to turn the control variable resistor R905 fully counterclockwise to set it off once, and then increase the level to the specified value.

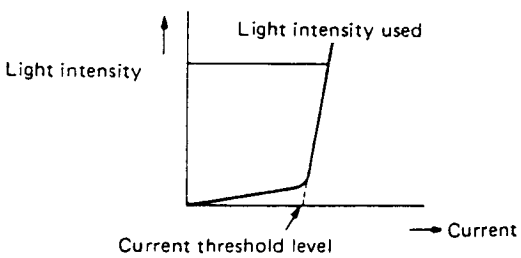

Fig. 18

(2) Notes on handling the unit mechanism (Fig. 19)

When handling the pick-up mechanism or unit mechanism, use the ground ring as shown is Fig. 19.

(The ground ring can be made using normal lead wire.)

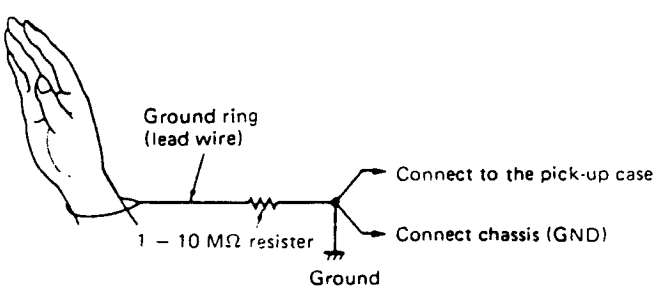

Fig. 19

(3) Precaution in replacing parts.

[1] Protective sheets are stuck to the service parts of the unit mechanism. Never remove these sheets prior to the completion of assembly.

[2] If the lead terminals of the slide motor are overheated due to soldering etc., it may cause a fault in the slide motor. Therfore, be sure to unsolder the leads on the P.W.B. side during replacement.

[3] When installing the unit mechanism, apply one drop of alcohole to the grommets to facilitate unit mechanism installation.

Fully tighten the screws. If the screws are loose, the disc tracking performance may be degraded. (Fig. 20)

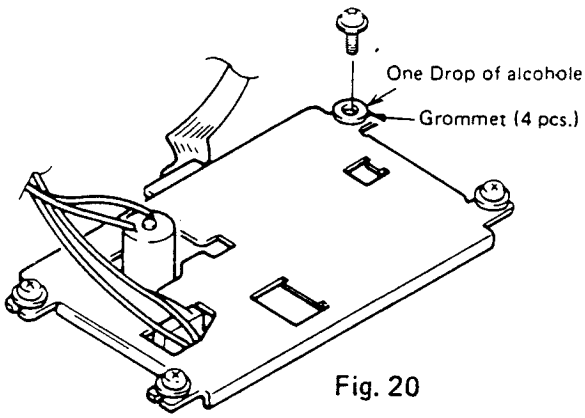

Fig. 20

[4] When installing the DC motor assembly, take care not to damage the worm gear.

After installation, check the play between the worm gear and send gear. If there is no play move the DC motor assembly outward. (Fig. 21)

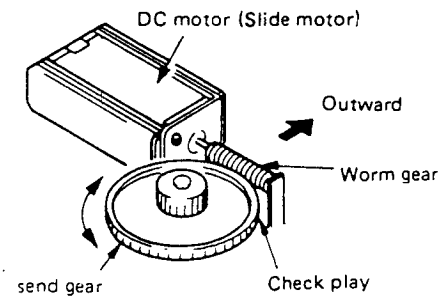

Fig. 21

[5] When replacing the DC motor (disc motor), turntable, or center pin, proceed as follows.

lows.

1) Remove the turntable fixing screw (hex. hole set screw). Apply the soldering iron to the turntable fixing screw hole for about 1 minute and pull out the center pin in the direction of arrow A (vertical to the unit plate).

2) When installing the turntable, adjust its height with the height adjusting jig. At this time, take care not to apply excessive force to the DC motor shaft.

3) When replacing the DC motor, take care not to apply excessive force in the direction of arrow B.

Doing so may deform unit plateC, resulting in deteriorated eye pattern. (Fig. 22)

5. Cassette Chassis Checking and Adjustment

No.	Inspection Item	Reference Value	Remarks
1.	Pressure roller compression strength	300 – 500 g	(Note 1) Tension gage
2.	Playback torque	30 – 60 g	Cassettepack system Torque meter
3.	FF/REW torque	more than 50 g·cm	Cassettepack system Torque meter
4.	Take up back-tension	2.0 – 6.0 g·cm	Cassettepack system Torque meter
5.	Tape drive force	more than 120 g	
6.	Axial play of flywheel	0.05 – 0.5 mm	

Note 1: Pressure roller compression strength

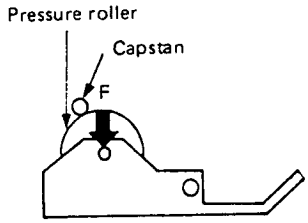

Fig. 16

LUBRICATION

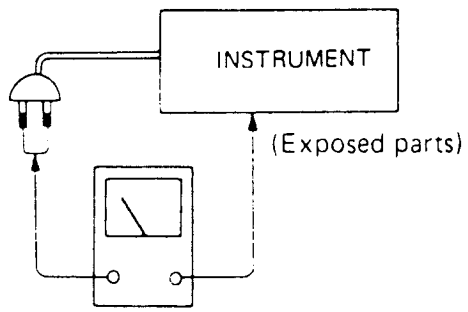
Lubricate 1 or 2 drops of Pan-motor or sonic slider oil to the rotating parts and apply Hitasol or White grease to the rubbing parts.
Lubrication is performed once a year or once for every 1,000 hours under normal usage conditions.
Be careful so that oil does not adhere to the belt or Pressure roller, etc.

Rotating sections	Metal and metal	Pan-motor oil (10W-40)
	Mold and metal	Sonic Slide Oil (#1600)
Rubbing sections	Metal and metal	Hitasol (MO–138)
	Mold and mold, mold and metal	White grease (FL-LUBE-A)

Check that exposed parts are acceptably insulated from the supply circuit before returning the instrument repaired to the customer.

- Checking method

  Power switch is set to ON.
  Next, measure the resistance value between the both poles of attachement cup (Power supply plug) and the AUX IN JACK of rear plate and check that the resistance value is 500 kohms or more.



Insulation tester (DC500V)

4) Press in the center pin into the DC motor shaft so that the shaft tip is aligned with the center pin tip. (Fig. 23)

Note: Once the center pin is removed, do not reuse it.

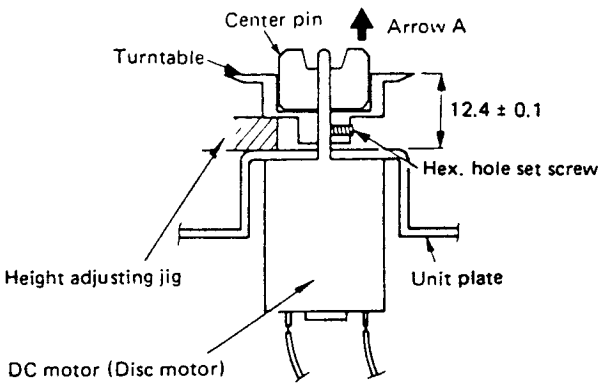


Fig. 22

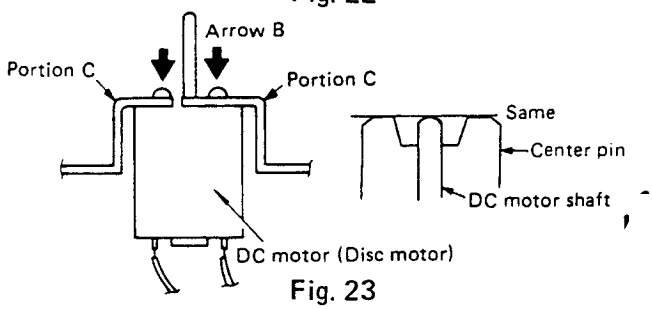

Fig. 23

4. Checking the actuator

Check the resistance values of the actuator coils.

They are normal if the resistance values meet the following values.

Focus coil: 30 ohms

Tracking coil: 10 ohms

If any coil is open or short circuited, the actuator may be defective. Check that the lens moves with 1.5V battery (Fig. 24)

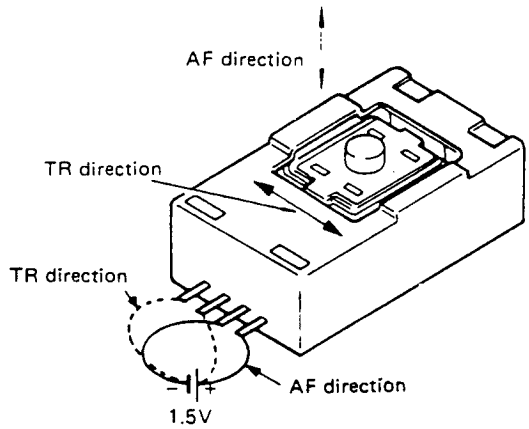

Fig. 24

CD PLAYER CIRCUIT ADJUSTMENT

When you have made the following work (1) or (2), be sure to perform adjustment 1 – 4.

(1) Disassembly of the unit mechanism and replacement of parts.

(2) Replacement of parts of the pickup part.

■ Adjustment of circuit

Preset each control before making adjustment.

● Presetting

Adjustment	Circuit No.	Preset position
Laser diode output	R905	Center
Focus servo offset	R908	Center
Tracking servo offset	R914	Center

Adjustment should be made in the following sequence.

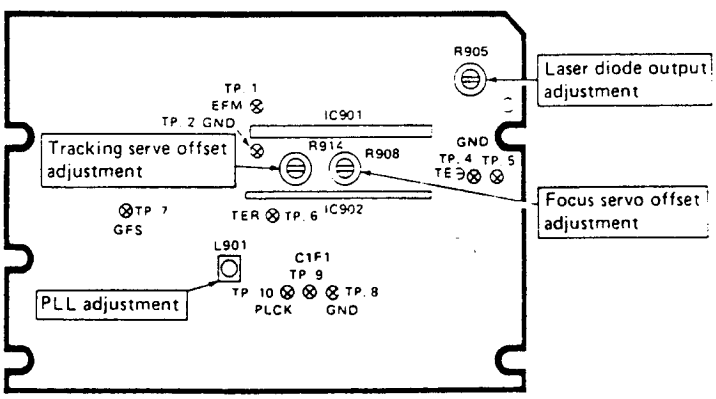

Fig. 25

1. Adjustment of laser diode output

Do not perform this adjustment except when the pickup mechanism or laser circuit is replaced.

(1) Instrument to be used

● Oscilloscope.

(2) Adjusting procedure

[1] Connect the oscilloscope to TP.1 (EFM) and TP.2 (GND). (Fig. 26)

[2] Load a disc in the player, and set the player to play mode.

[3] Adjust R905 so that the EFM signal level becomes 1.3V ± 40mV.

Note: (Fig. 27)

However if the signal level is in range of 1.1V – 1.5V, it is normal and no adjustment is necessary.

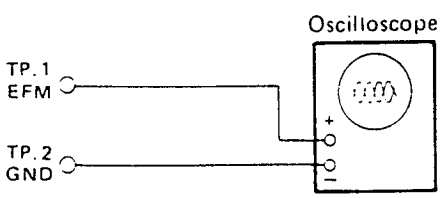

Fig. 26

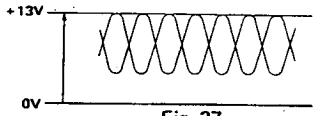

Fig. 27

2. Adjustment of focus servo offset

(1) Instrument to be used

- Oscilloscope
- DC Voltmeter

(2) Adjusting procedure

[1] Set the player to stop mode.

[2] Connect the oscilloscope to TP.1 (EFM) and TP.2 (GND).

[3] Connect the DC voltmeter as shown in Fig.28

[4] Load a disc in the player, and set the player to play mode.

[5] Adjust R908 so that the EFM signal amplitude becomes maximum.

[6] After adjustment, check that the center voltage of the R908 is 2 – 3 V with a DC voltmeter.

[7] If the center voltage is not within the specified value, readjust as follows.

Less than 2V: Set to 2V.

More than 3V: Set to 3V.

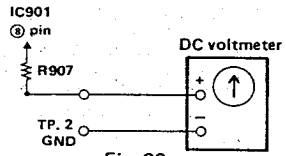

Fig. 28

3. Adjustment of tracking servo offset

(1) Instrument to be used

DC voltmeter

(2) Adjusting procedure

[1] Connect the DC voltmeter to TP.6 (TER). (Fig. 29)

[2] Put the set in stop mode.

[3] Adjust R914 so that the DC voltmeter indicates +10 mV ± 2 mV.

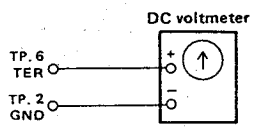

Fig. 29

4. Adjusting PLL

Do not make adjustment except when any parts in the PLL block has been replaced.

(1) Instrument to be used

- Frequency counter
- Oscilloscope

(2) Adjusting preparation

Connect the above instruments as shown in Fig. 31.

(3) Adjusting procedure

[1] Preset L901 so that the frequency at TP.10 (PLCK) is 4,500 ± 50 kHz with the set stopped.

[2] Put the set in play mode. Turn L901 clockwise (in the core entering direction) until the level of TP.7 (GFS) goes low. Then, turn L901 counterclockwise (in the core pulling direction) and find the position where the level goes high.

[3] Put the set in stop mode and read the frequency (f1) of TP.10 (PLCK).

[4] Put the set in play mode. Turn L901 counterclockwise until the level of TP.7 (GFS) goes low. Then, turn L901 clockwise and find the position where the level goes high.

[5] Put the set in stop mode and read the frequency (f2) at TP.10 (PLCK).

[6] Adjust L901 so that the frequency at TP.10 is (f1 + f2) x 1/2.

(4) checking of operation

After making adjustments [1] through [6] above and put the set in play mode. Check that the frequency at TP. 10 (PLCK) is 4,321.8 ± 400 kHz. Ascertain that the waveform at TP. 7 (GFS) exactly as shown in Fig.30. The level at TP. 7 (GFS) may happen to be low.

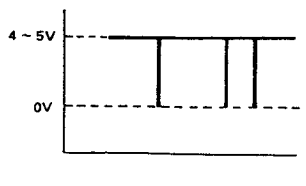

Fig. 30

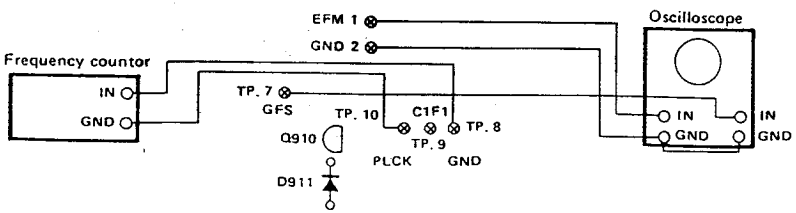

Fig. 31

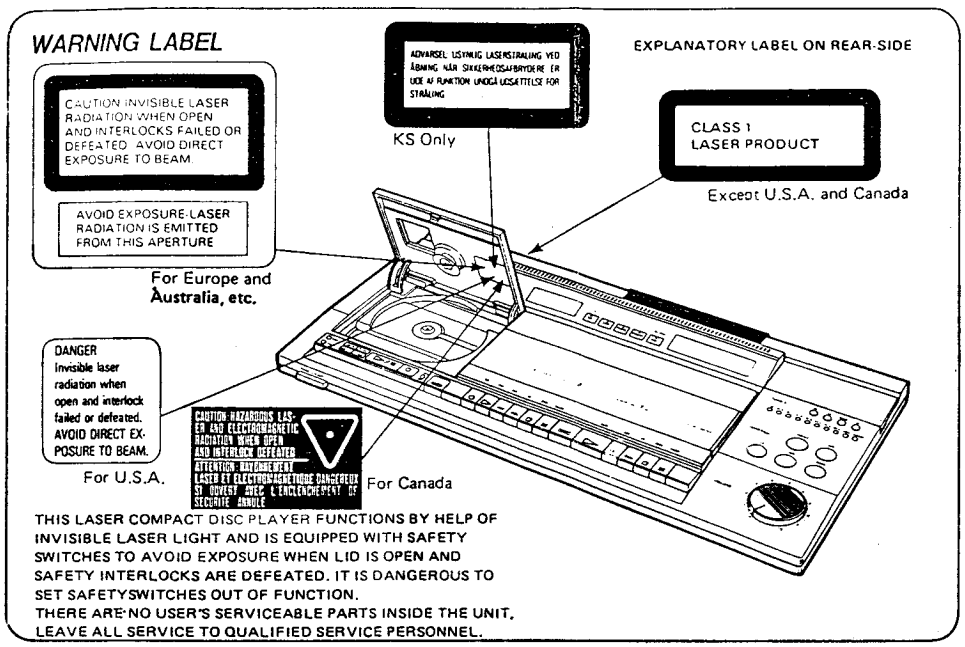
WARNING LABEL



THIS LASER COMPACT DISC PLAYER FUNCTIONS BY HELP OF INVISIBLE LASER LIGHT AND IS EQUIPPED WITH SAFETY SWITCHES TO AVOID EXPOSURE WHEN LID IS OPEN AND SAFETY INTERLOCKS ARE DEFEATED. IT IS DANGEROUS TO SET SAFETYSWITCHES OUT OF FUNCTION.
THERE ARE NO USER'S SERVICEABLE PARTS INSIDE THE UNIT. LEAVE ALL SERVICE TO QUALIFIED SERVICE PERSONNEL.

Inside of the set is a laser component emitting a laser radiation over the limit for laser class 1.

Inuti apparaten finns en laserkomponent som avger laserstrålning över gränsen för laser klass 1.
