Main Adjustment	2-19	Parts List	3-1~27

Safety Precautions

1. This design of this product contains special hardware and many circuits and components specially for safety purposes. For continued protection, no changes should be made to the original design unless authorized in writing by the manufacturer. Replacement parts must be identical to those used in the original circuits. Services should be performed by qualified personnel only.
2. Alterations of the design or circuitry of the product should not be made. Any design alterations of the product should not be made. Any design alterations or additions will void the manufacturer's warranty and will further relieve the manufacture of responsibility for personal injury or property damage resulting therefrom.
3. Many electrical and mechanical parts in the products have special safety-related characteristics. These characteristics are often not evident from visual inspection nor can the protection afforded by them necessarily be obtained by using replacement components rated for higher voltage, wattage, etc. Replacement parts which have these special safety characteristics are identified in the Parts List of Service Manual. Electrical components having such features are identified by shading on the schematics and by (Δ) on the Parts List in the Service Manual. The use of a substitute replacement which does not have the same safety characteristics as the recommended replacement parts shown in the Parts List of Service Manual may create shock, fire, or other hazards.
4. The leads in the products are routed and dressed with ties, clamps, tubings, barriers and the like to be separated from live parts, high temperature parts, moving parts and/or sharp edges for the prevention of electric shock and fire hazard. When service is required, the original lead routing and dress should be observed, and it should be confirmed that they have been returned to normal, after re-assembling.
5. Leakage current check (Electrical shock hazard testing)
After re-assembling the product, always perform an isolation check on the exposed metal parts of the product (antenna terminals, knobs, metal cabinet, screw heads, headphone jack, control shafts, etc.) to be sure the product is safe to operate without danger of electrical shock. Do not use a line isolation transformer during this check.

- Plug the AC line cord directly into the AC outlet. Using a "Leakage Current Tester", measure the leakage current from each exposed metal parts of the cabinet, particularly any exposed metal part having a return path to the chassis, to a known good earth ground. Any leakage current must not exceed 0.5mA AC (r.m.s.)

- Alternate check method

Plug the AC line cord directly into the AC outlet. Use an AC voltmeter having, 1,000 ohms per volt or more sensitivity in the following manner. Connect a 1,500 Ω 10W resistor paralleled by a 0.15 μ F AC-type capacitor between an exposed metal part and a known good earth ground.

Measure the AC voltage across the resistor with the AC voltmeter.

Move the resistor connection to each exposed metal part, particularly any exposed metal part having a return path to the chassis, and measure the AC voltage across the resistor. Now reverse the plug in the AC outlet and repeat each measurement voltage measured any must not exceed 0.75 V AC (r.m.s.). This corresponds to 0.5 mA AC (r.m.s.).

Warning

1. This equipment has been designed and manufactured to meet international safety standards.
2. It is the legal responsibility of the repairer to ensure that these safety standards are maintained.
3. Repairs must be made in accordance with the relevant safety standards.
4. It is essential that safety critical components are replaced by approved parts.
5. If mains voltage selector is provided, check setting for local voltage.

CAUTION Burrs formed during molding may be left over on some parts of the chassis. Therefore, pay attention to such burrs in the case of performing repair of this system.

Safety Precautions (U.K only)

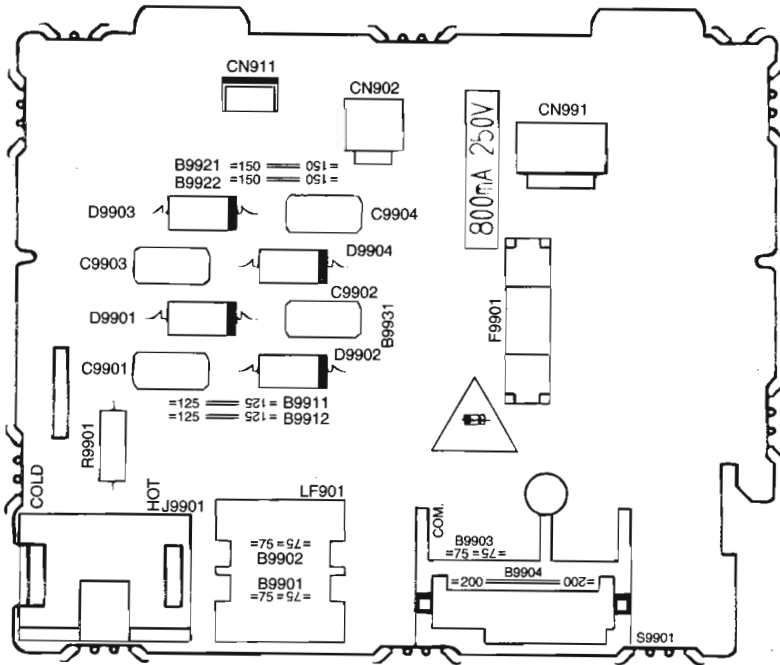

1. This design of this product contains special hardware and many circuits and components specially for safety purposes. For continued protection, no changes should be made to the original design unless authorized in writing by the manufacturer. Replacement parts must be identical to those used in the original circuits.
2. Any unauthorised design alterations or additions will void the manufacturer's guarantee ; furthermore the manufacturer cannot accept responsibility for personal injury or property damage resulting therefrom.
3. Essential safety critical components are identified by (⚠) on the Parts List and by shading on the schematics, and must never be replaced by parts other than those listed in the manual. Please note however that many electrical and mechanical parts in the product have special safety related characteristics. These characteristics are often not evident from visual inspection. Parts other than specified by the manufacturer may not have the same safety characteristics as the recommended replacement parts shown in the Parts List of the Service Manual and may create shock, fire, or other hazards.
4. The leads in the products are routed and dressed with ties, clamps, tubings, barriers and the like to be separated from live parts, high temperature parts, moving parts and/or sharp edges for the prevention of electric shock and fire hazard. When service is required, the original lead routing and dress should be observed, and it should be confirmed that they have been returned to normal, after re-assembling.

Warning

1. Service should be performed by qualified personnel only.
2. This equipment has been designed and manufactured to meet international safety standards.
3. It is the legal responsibility of the repairer to ensure that these safety standards are maintained.
4. Repairs must be made in accordance with the relevant safety standards.
5. It is essential that safety critical components are replaced by approved parts.
6. If mains voltage selector is provided, check setting for local voltage.

⚠ CAUTION Burrs formed during molding may be left over on some parts of the chassis. Therefore, pay attention to such burrs in the case of performing repair of this system.

Important for Laser Products

1.CLASS 1 LASER PRODUCT

2.DANGER : Invisible laser radiation when open and inter lock failed or defeated. Avoid direct exposure to beam.

3.CAUTION : There are no serviceable parts inside the Laser Unit. Do not disassemble the Laser Unit. Replace the complete Laser Unit if it malfunctions.

4.CAUTION : The compact disc player uses invisible laserradiation and is equipped with safety switches which prevent emission of radiation when the drawer is open and the safety interlocks have failed or are defeated. It is dangerous to defeat the safety switches.

5.CAUTION : If safety switches malfunction, the laser is able to function.

6.CAUTION : Use of controls, adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

VARNING : Osynlig laserstrålning är denna del är öppnad och spårren är urkopplad. Betrakta ej strålen.
VARO : Avattaessa ja suojalukitus ohitettaessa olet alltiina näkymättömälle lasersäteilylle.Älä katso säteeseen.

ADVARSEL : Usynlig laserstrålning ved åbning , når sikkerhedsafbrydere er ude af funktion. Undgå udsættelse for stråling.
ADVARSEL : Usynlig laserstrålning ved åbning,når sikkerhetsbryteren er avslott. unngå utsettelse for stråling.

Warnings, Cautions and Others / Warnung, Achtung und sonstige Hinweise / Mises en garde, précautions et indications diverses / Waarschuwingen, voorzorgen en andere mededelingen/Avisos, precauciones y otras notas / Avvertenze e precauzioni da osservare

Per l'Italia:
"Si dichiara che il questo prodotto di marca JVC è conforme alle prescrizioni del Decreto Ministeriale n.548 del 28/09/95 pubblicato nella Gazzetta Ufficiale della Repubblica Italiana n.301 del 28/12/95."

Caution — 0V1 switch!
Disconnect the mains plug to shut the power off completely. The 0V1 switch in any position does not disconnect the mains line. The power can be remote controlled.

Achtung — 0V1 Schalter!
Den Netzstecker aus der Steckdose ziehen, um die Stromversorgung vollständig zu unterbrechen. Der Schalter 0V1 unterbricht in keiner Stellung die Stromversorgung vollkommen. Die Stromversorgung kann mit der Fernbedienung ein- und ausgeschaltet werden.

Attention — Commutateur 0V1!
Déconnecter la fiche de secteur pour couper complètement le courant. Le commutateur 0V1 ne coupe jamais complètement la ligne de secteur, quelle que soit sa position. Le courant peut être télécommandé.

Voorzichtig — 0V1 schakelaar!
Om de stroomtoevoer geheel uit te schakelen, trek u de stekker uit het stopcontact. Anders zal er altijd een geringe hoeveelheid stroom naar het apparaat lopen, ongeacht de stand van de 0V1 schakelaar. U kunt het apparaat ook met de afstandsbediening aan- en uitschakelen.

Precaución — Interruptor 0V1!
Desconectar el cable de alimentación para desactivar la alimentación totalmente. Cualquier que sea la posición de ajuste del interruptor 0V1, la alimentación no se cortará completamente. La alimentación puede ser controlada remotamente.

Attenzione — L'interruttore 0V1!
Disinserire la spina del cavo di alimentazione dalla presa della rete elettrica per staccare completamente l'alimentazione. L'interruttore 0V1 in nessuna posizione stacca la linea di alimentazione elettrica principale. È possibile il controllo remoto dell'alimentazione.

VOORZICHTIG
Ter vermijden van gevaar voor brand, elektrische schokken, enz.:
1. Verwijder het stroomkabel uit het stopcontact.
2. Stel het toestel niet bloot aan regen of vocht.

PRECAUCIÓN
Para reducir riesgos de choques eléctricos, incendio, etc.:
1. No extraiga los tornillos, los cubiertas ni la caja.
2. No exponga este aparato a la lluvia o a la humedad.

ATTENZIONE
Per ridurre il rischio di shock elettrici, incendi, ecc...
1. Non togliete viti, coperti o la scatola.
2. Non esponete l'apparecchio alla pioggia e all'umidità.

CAUTION
To reduce the risk of electrical shocks, fire, etc.:
1. Do not remove screws, covers, cabinet.
2. Do not expose this appliance to rain or moisture.

ACHTUNG
Zur Verhinderung von elektrischen Schlägen, Brandgefahr, usw.:
Keine Schrauben lösen oder Abdeckungen entfernen und das Gehäuse nicht öffnen.
Dieses Gerät weder Regen noch Feuchtigkeit aussetzen.

ATTENTION
Afin d'éviter tout risque d'électrocution, d'incendie, etc.:
1. Ne pas enlever les vis ni les panneaux et ne pas ouvrir le coffret de l'appareil.
2. Ne pas exposer l'appareil à la pluie ni à l'humidité.

Caution: Proper Ventilation
To avoid risk of electric shock and fire, and to prevent damage, locate the apparatus as follows:
1. Front:
2. Sides/ Top/ Back:
3. Bottom:

No obstructions and open spacing.
No obstructions should be placed in the areas shown by the dimensions below.
Place on the level surface. Maintain an adequate air path for ventilation by placing on a stand with a height of 10 cm or more.

Voricht: Ausreichende Belüftung
Zur Vermeidung von elektrischen Schlägen, Feuer und sonstigen Schäden sollte das Gerät unter folgenden Bedingungen aufgestellt werden:
1. Vorderseite:
2. Seiten- und Rückwände:
3. Unterseite:

Hindernisse frei und gut zugänglich.
Hindernisse frei in allen gegebenen Abständen (s. Abbildung).
Die Stellfläche muß absolut eben sein. Sorgen Sie für ausreichende Luftzufuhr durch Aufstellung auf einem Stand mit mindestens 10 cm Höhe.

Attention: Aération correcte
Pour prévenir tout risque de décharge électrique ou d'incendie et éviter tout détérioration, installez l'appareil de la manière suivante:
1. Avant:
2. Côtés/dessus/dessous:
3. Dessous:

Aucun obstacle et espace libre.
Assurez-vous que rien ne bloque les espaces indiqués sur le schéma ci-dessous.
Posez l'appareil sur une surface plane et horizontale. Veillez à ce que sa ventilation correcte puisse se faire en le plaçant sur un support d'au moins dix centimètres de hauteur.

Voorzichtig: Goede ventilatie vereist
Om brand, elektrische schokken en beschadiging te voorkomen, moet u het toestel als volgt opstellen:
1. Voorkant:
2. Zijkanten/boven-/onderkant:
3. Onderkant:

Geen belemmeringen en voldoende ruimte.
Geen belemmeringen plaatsen in de hieronder aangegeven zones.
Op vlakke ondergrond plaatsen. Voldoende ventilatieruimte voorzien door het toestel op een onderstel met een hoogte van 10 cm of meer te plaatsen.

Precaución: ventilación correcta
Para evitar el riesgo de descargas eléctricas e incendio y prevenir posibles daños, instale el equipo en un lugar que cumpla los siguientes requisitos:
1. Parte frontal:
2. Lados/parte superior/parte posterior:
3. Parte inferior:

Sin obstrucciones, espacio abierto.
No debe haber ninguna obstrucción en las áreas mostradas por las dimensiones de la siguiente figura.
Stíe el equipo sobre una superficie nivelada. Mantenga un espacio adecuado para permitir el paso del aire y una correcta ventilación, situando el equipo sobre un soporte de 10 o más cm de altura.

Attenzione: Per una corretta ventilazione
Per prevenire il rischio di scosse elettriche e di incendio ed evitare possibili danni, collocare le apparecchiature nel modo seguente:
1. Parte anteriore:
2. Lati/Parte superiore/Posteriore:
3. Base:

Non deve esserci alcun ostacolo e spazio libero.
Lasciare libera le zone indicate dalle dimensioni di seguito.
Collocare su una superficie piana. Consentire un'adeguata ventilazione dell'impianto appoggiandolo su un tavolino alto almeno 10 cm.

Getting Started

Accessories

Check that you have all of the following items, which are supplied with the System.

- Power Cord (1)
- AM Loop Antenna (1)
- Remote Control (1)
- Batteries (2)
- FM Wire Antenna (1)
- Speaker Cords (2)

If any of these items are missing, contact your dealer immediately.

How To Put Batteries In the Remote Control

Match the polarity (+ and -) on the batteries with the + and - markings in the battery compartment.

CAUTION: Handle batteries properly.

- To avoid battery leakage or explosion:
 - Remove batteries when the Remote Control will not be used for a long time.
 - When you need to replace the batteries, replace both batteries at the same time with new ones.
 - Don't use an old battery with a new one.
 - Don't use different types of batteries together.

Using the Remote Control

The Remote Control makes it easy to use many of the functions of the System from a distance of up to 7m (23 feet) away. You need to point the Remote Control at the remote sensor on the System's front panel.

CAUTION: Make all connections before plugging the System into an AC power outlet.

Connecting the FM Antenna

Using the Supplied Wire Antenna

Using the Coaxial Type Connector (Not Supplied)

A 75-ohm antenna with coaxial type connector (IEC or DIN45 325) should be connected to the FM 75-ohm COAXIAL terminal.

If reception is poor, connect the outside antenna.

Note: Before attaching a 75 ohm coaxial lead (the kind with a round wire going to an outside antenna), disconnect the supplied FM Wire Antenna.

CAUTION: To avoid noise, keep antennas away from the System, the connecting cord and the AC power cord.

Connecting the AM (MW/LW) Antenna

AM loop antenna (Supplied)

Attach the AM loop to its base by snapping the tabs on the loop into the slot in the base.

Turn the loop until you have the best reception.

CAUTION: Make all connections before plugging the System into an AC power outlet.

Connecting Auxiliary Equipment

Connect an (optional) signal cord between the AUX terminals on the System and the output terminals of your auxiliary equipment, (e.g. turntable). You can listen to this source.

Connecting an MD Recorder, etc (Digital Output)

Unplug the cap and connect an (optional) optical digital cord between the System's OPTICAL DIGITAL OUT terminal and the input terminal of the MD recorder, etc.

Connecting a Subwoofer System

Connect an (optional) signal cord between the SUB WOOFER OUT terminal and an external JVC subwoofer system, etc.

Connecting the AC Power Cord

Firmly insert the supplied AC power cord into the AC inlet on the back of the Unit.

CAUTIONS:

- ONLY USE THE JVC POWER CORD PROVIDED WITH THIS SYSTEM TO AVOID MALFUNCTION OR DAMAGE TO THE SYSTEM.
- BE SURE TO UNPLUG THE POWER CORD FROM THE OUTLET WHEN GOING OUT OR WHEN THE SYSTEM IS NOT IN USE FOR AN EXTENDED PERIOD OF TIME.

Now you can plug the AC power cord into the wall outlet, and your System is at your command!

CAUTION: Make all connections before plugging the System into an AC power outlet.

Connecting the Speakers

1. Open the Speaker terminals on the rear of the Unit, and on the Speakers themselves.
2. Connect the speaker cords between the terminals as shown below.

CAUTION: A TV may display irregular colors if located near the speakers. If this happens, set the speakers away from the TV.

Removing the speaker grilles

- The speaker grilles can be removed.
1. Insert your fingers at the top and pull towards you.
 2. Also pull the bottom towards you.

Connecting an MD Recorder/Tape Deck

Connect (optional) signal cords between the System's MD/TAPE IN/OUT terminals and the output/input terminals of the external MD recorder, tape deck, etc.

COMPU PLAY

JVC's COMPU PLAY feature lets you control the most frequently used System functions with a single touch. With One Touch Operation you can play a CD, turn on the radio, or listen to an external equipment with a single press of the play button for that function. One Touch Operation turns the power on for you, then starts the function you have specified. If the System is not ready (no CD in place), the System still powers on so you can insert a CD. How One Touch Operation works in each case is explained in the section dealing with that function. The COMPU PLAY buttons are:

On the Unit

- CD ▶▶ button
- TUNER BAND button
- MD/TAPE button
- AUX button

On the Remote Control

- CD ▶▶ button
- TUNER BAND button
- MD/TAPE button
- AUX button

Common Operations

Turning the System On and Off

Turning the System On

Press the Δ /I button.

The display comes on and the STANDBY indicator goes out. The System comes on ready to continue in the mode it was in when the power was last turned off.

- For example, if the last thing you were doing was listening to a CD, you are now ready to listen to a CD again. If you wish, you can change to another source.
- If you were listening to the Tuner last, the Tuner comes on playing the station it was last set to.

Turning the System Off

Press the Δ /I button again.

The STANDBY indicator lights up and the display is blank, except for the clock display.

Adjusting the Volume

Turn the VOLUME control of the Unit clockwise to increase the volume or counterclockwise to decrease it.

OR

With the System turned on, press the VOLUME + button on the Remote Control to increase the volume or press the VOLUME - button to decrease it.

CAUTION! DO NOT turn on the System and/or start playing any source without first setting the VOLUME control to minimum, as a sudden blast of sound could damage your hearing, speakers and/or headphones.

For private listening

Connect a pair of headphones to the PHONES jack. No sound comes out of the speakers. Be sure to turn down the volume before connecting or putting on headphones.

Reinforcing the Bass Sound (AHB SUPER PRO)

You can reinforce the bass sound to maintain rich, full bass at low volume (you can use this effect only for playback).

To get the effect, press the AHB (Active Hyper Bass) SUPER PRO button on the Remote Control.

The "BASS" indicator lights up on the display.

To cancel the effect, press the button again.

The "BASS" indicator goes out.

Tone Control (BASS/TREBLE)

You can control the tone by changing the bass and treble.

BASS Control

You can adjust the bass level (low frequency range level) between -6 and 6. (0: Flat)

■ Press the BASS button on the Remote Control.

■ Press the UP or DOWN button on the Remote Control to adjust the bass level.

TREBLE Control

You can adjust the treble level (high frequency range level) between -6 and 6. (0: Flat)

■ Press the TREBLE button on the Remote Control.

■ Press the UP or DOWN button on the Remote Control to adjust the treble level.

Volume Gain Selection

This lets you adjust the range covered by the VOLUME control. This is useful if you rarely listen at higher volumes, and want finer control over lower volumes. There are three volume gain settings: Normal volume.

-6 dB: The volume adjustable range is extended for lower level. You can finely adjust the volume level than that for "0 dB".

-12 dB: The volume adjustable range is further extended for lower level. You can finely adjust the volume level than that for "-6 dB".

Example:

A: Volume level range you usually use. Volume adjustable range for "A" is extended.

Press the 0 dB, -6 dB, or -12 dB button on the Unit, or press the VOLUME GAIN SELECT button on the Remote Control to make your selection.

The following appears on the display for 2 seconds:

Volume Gain Selection

When you change the volume gain with the VOLUME GAIN SELECT button, the VOLUME control automatically turns so that the volume level is kept almost the same.

Note:

- If you change the volume gain while listening to a music source, the sound may be muted for a few seconds before the new volume gain selection comes into effect. This happens in the following cases:
 - Changing from the -12 dB selection to the -6 dB or 0 dB selections.
 - Changing from the -6 dB selection to the 0 dB selection.

Showing the Time (DISPLAY)

In addition to a standard digital clock, an analogue clock (which advances every five minutes) can be displayed. The clock display or-der varies according to the System mode:

In Standby mode

Every time you press the DISPLAY button on the Remote Control (or the CLOCK button on the Unit), the clock display changes as shown below.

Digital Clock + Analogue Clock → Analogue Clock → Digital Clock → (back to the beginning)

When the System is turned on

Every time you press the DISPLAY button on the Remote Control (or the CLOCK button on the Unit), the time display changes as follows:

Current Source + Analogue Clock → Analogue Clock → Digital Clock → Current Source → (back to the beginning)

Note: To let work the clock, you need to set the clock beforehand. (See "Setting the Clock" on page 14.)

Receiving FM Stations with RDS

You can use the RDS (Radio Data System) by using the buttons on the Unit or the Remote Control. RDS allows FM stations to send additional signals with their regular programme signals. For example, the stations send their station names, and information about what type of programmes they broadcast, such as sports or music, etc. This unit can receive the following types of RDS signals:

- PS (Programme Service):** shows commonly known station names.
- PTY (Programme Type):** shows types of broadcast programmes.
- RT (Radio Text):** shows text messages the station sends.
- TA (Traffic Announcement):** shows traffic announcements being broadcast.

What information can RDS signals provide?

The display shows RDS signal information that the station sends.

To show the RDS signals on the display

Press the **DISPLAY MODE** button while listening to an FM station. Each time you press the button, the display changes to show information, in the following order:

PS (Programme Service):

While searching, "PS" appears, then station name is displayed. "NO PS" appears if no signal is sent.

PTY (Programme Type):

While searching, "PTY" appears, then broadcast programme type is displayed. "NO PTY" appears if no signal is sent.

RT (Radio Text):

While searching, "RT" appears, then a text message sent by the station is displayed. "NO RT" appears if no signal is sent.

Station Frequency:

Station frequency (non-RDS service)

Notes:

- If searching finishes at once, "PS", "PTY" and "RT" will not appear on the display.
- If you press the **DISPLAY MODE** button while listening to an AM(MW/LW) station, the display only shows station frequency.
- RDS is not available for AM (MW/LW) broadcasts.

On characters displayed (see page 10.)

- When the display shows PS, PTY or RT signals:
- The display shows upper case letters only.
- The display cannot show accented letters; For example, "A" may represent accented "Á," "À," "Â," "Ã," "Ä," "Å," and "À."

Press the UP, DOWN, >, or < button to select the preset number.

- UP button:** Increases the preset number by 1.
- DOWN button:** Decreases the preset number by 1.
- > button:** Increases the tenth digit for preset number.
- < button:** Decreases the tenth digit for preset number.

Press the SET button.

After 1 second, the display returns to the broadcast frequency display.

Repeat above steps 1 to 5 for each station you want to store in memory with a preset number.

To cancel the presetting, press the **CANCEL** button in step 3 or 4. To change the preset stations, repeat the same steps as above.

Auto Presetting

In each band, you can automatically preset FM-30, AM (MW/LW)-15 stations. Preset numbers will be allocated as stations are found, starting from the lowest frequency and moving up the frequency.

- Select a band by pressing the TUNER BAND button.**

Press the AUTO PRESET button on the Remote Control for more than two seconds.

Repeat steps 1-2 for the other band.

- If you want to change the preset stations, carry out the Manual Presetting for the desired preset numbers.

CAUTION: If the System is unplugged or if a power failure occurs, the preset stations will be erased after about 24 hours. If this happens, you will need to preset the stations again.

To Change the FM Reception Mode

When you are tuned into an FM stereo broadcast, the "ST (Stereo)" indicator lights up and you can hear stereo effects. If an FM stereo broadcast is hard to receive or noisy, you can select Monaural mode. Reception improves, but you lose any stereo effect.

Press the **FM MODE** button on the Remote Control so that the "MONO" indicator lights up on the display.

To restore the stereo effect, press the **FM MODE** button on the Remote Control so that the "MONO" indicator goes off.

Using the Tuner

When the System is in use, the display shows other items as well. For simplicity, we show here only the items described in this section.

You can listen to FM and AM (MW/LW) stations. Stations can be tuned in manually, automatically, or from preset memory storage.

- Before listening to the radio:
 - Check that both the FM and AM (MW/LW) antennas are correctly connected. (See page 3).

One Touch Radio

Just press the **TUNER BAND** button to turn on the System and start playing the station you were last tuned to.

- You can switch from any other sound source to the radio by pressing the **TUNER BAND** button.

Tuning in a Station

Press the TUNER BAND button. The Band and Frequency you were last tuned to appear on the display. (If the last station was selected using the preset number, the preset number appears first.) Each time you press the button, the band alternates between FM and AM (MW/LW).

Select a station using one of the following methods.

- Manual Tuning** Press the **<<<** or **>>>** button on the Unit or the Remote Control repeatedly to move from frequency to frequency until you find the station you want.
- OR**
- Auto Tuning** If you press and hold the **<<<** or **>>>** button on the Unit or the Remote Control for one second or more, the frequency changes down, or up, automatically until a station is found.
- OR**
- Preset Tuning using the Remote Control (Possible only after presetting stations)**

Press the **UP** or **DOWN** button on the Remote Control to select the desired preset number. After 1 second the display will show the preset number's band and frequency.

Example: Press the **UP** button until the preset number "12" appears.

Presetting Stations

You can preset up to 30 FM stations and up to 15 AM (MW/LW) stations using the Remote Control.

Note: Preset numbers may have been set to factory test frequencies prior to shipment. This is not a malfunction. You can preset the stations you want into memory by following one of the presetting methods below.

Manual Presetting

Select a band by pressing the TUNER BAND button.

Press the **<<<** or **>>>** button to tune in a station.

Press the **SET** button.

"P-12" is displayed. The lower 2 digits blink.

The Quickest Way To Start a CD is With the One Touch Operation

- Press the CD ► button.
- The power is automatically turned on. If a CD is already inserted, it will start playing from the first track.
- If no CD is inserted, "NO DISC" appears on the display and the CD Player remains in Stop mode.

To Insert a CD

- Press the OPEN/CLOSE ▲ button (or the CD ▲ button on the Remote Control). The CD holder opens.
- Place a CD, with its label side up as shown below.

- Press the ▲ button again to close the CD holder.
- You can place an 8 cm CD without an adaptor.
- If the CD cannot be read correctly (because it is scratched, for example), "00.0000" appears on the display.

CAUTION! DO NOT try to close the CD holder by hand as it will be damaged.

Basics of Using the CD Player - Normal Play

- To Play a CD**
- Insert a CD.
- Press the CD ► button. The Play (▶) indicator lights up on the display and the first track of the CD begins playing. The CD Player automatically stops when the last track of the CD has finished playing.
- To stop playing the CD, press the ■ button on the Unit or the Remote Control. The following information for the CD is displayed.

- To stop playing and remove the CD, press the ▲ button to open the CD holder.
- To pause, press the CD =II button. The Pause (II) indicator will light up on the display.
- To cancel pause, press the same button again. Play continues from the point where it was paused.

To Select a Track or Passage within a Track

During playback, press the ◀ or ▶ button on the Unit or the Remote Control to select the track you want. The selected track starts playing.

- Press the ▶ button once to skip to the beginning of the next track.
- Press the ◀ button to skip to the beginning of the track being played. Press twice quickly to skip to the beginning of the previous track.

Search Play

Holding down the ◀ or ▶ button on the Unit or the Remote Control, during playback, will fast forward/backwards the CD so you can quickly find a particular passage in the track you are listening to.

Programming the Playing Order of the Tracks

You can program the playing order of the tracks using the Remote Control.

- You can program up to 20 tracks in any desired order.
- You can only make a program when the CD Player is stopped.

- Insert a CD.
- Press the CD ► button.
- Press the ■ button to stop the CD.
- Press the PROGRAM button.

The System enters the programming mode and the "PRGM" indicator lights up.

Press the UP, DOWN, >, or < button to select the track to program.

- UP button: Increases the track number by 1.
- DOWN button: Decreases the track number by 1.
- > button: Increases the track number by ten.
- < button: Decreases the track number by ten.
- Example: for track 2, press the UP button twice. For track 12, press the > button, then press the UP button twice (or simply press the UP button 12 times).

Press the SET button.

Repeat steps 5 and 6 to select the other tracks for the program.

You can see the total playback time of programmed tracks on the display.

Press the CD ► button.

The System plays the tracks in the order you have programmed them.

- You can skip to a particular program track by pressing the ◀ or ▶ button during Program Play.

To cancel the programming before playing, press the CANCEL button in above step 4, 5 or 6. To confirm the programmed tracks, press the PROGRAM button; the tracks making up the program will successively be displayed in the programmed order.

To stop playing, press the ■ button once. To delete all the tracks in a program, press the ■ button (or the CANCEL button on the Remote Control) while the CD Player is stopped. The "PRGM" indicator goes out and the program is deleted. Normal Play is resumed.

Note: If the total playback time of the programmed tracks exceeds 99 minutes, 59 seconds, the total playback time will go out on the display.

Random Play

The tracks will play in no special order when you use this mode.

Press the RANDOM button on the Remote Control.

Playback automatically starts and the "RANDOM" indicator lights up on the display.

Listening to External Equipments

Listening to an External MD Recorder/Tape Deck

You can play an external MD recorder, tape deck, etc. through the system.

- First make sure that the external equipment is properly connected to the System. (See page 4.)

Set the VOLUME control to minimum.

Press the MD/TAPE button. When the System is in Standby mode, the System is automatically turned on. "MD/TAPE" appears on the display.

To skip a track during playback, press the ▶ button to jump to the next track in the random sequence. Press the ◀ button to jump back to the start of a track being played. To cancel random play, press the RANDOM button again. The "RANDOM" indicator goes out and Normal Play is resumed.

Repeating Tracks

You can set the program or individual track playing to repeat as many times as you like.

Press the REPEAT button on the Remote Control.

The Repeat indicator changes with each press of the button, as shown below.

- ◀ : Repeats one track.
- ◀ : In Random Play mode, this indicator is skipped.
- ◀ ALL : In Normal Play mode, repeats all the tracks in the Program.
- ◀ : In Program Play mode, repeats all the tracks in random order.
- ◀ : In Random Play mode, repeats all the tracks in random order.

To exit Repeat mode, press the REPEAT button until the Repeat indicator on the display goes out

Start playing the external equipment. Adjust the VOLUME control to the desired listening level.

- Apply sound effects, if you wish. Press the AHB Super PRO button to reinforce the bass sound. Press the BASS/TREBLE button to control the tone. (See "Tone Control" on page 7.)

To exit MD/TAPE mode You will automatically switch out of MD/TAPE mode when you select another source.

Note: You can also record the System's output signal to the external equipment. For operation, refer to the equipment's own instructions.

Listening to Auxiliary Equipment

- You can listen to a turntable or other auxiliary equipment.
- First make sure that the external equipment is properly connected to the System. (See page 5.)
- Set the **VOLUME** to minimum position.
- Press the **AUX** button.

When the System is in Standby mode, the System is automatically turned on.

"AUX" appears on the display.

Using the Timers

When the System is in use, the display shows other items as well. For simplicity, we show here only the items described in this section.

Press the CLOCK button.

The selected time is set and the seconds start counting from 0.

CAUTION: If there is a power failure, the clock loses its setting after about 20 minutes. The display shows "0:00" and blinks, and the clock must be reset.

Note: The clock may gain or lose one or two minutes per month.

Setting the Daily Timer

You can set the Timer whether the System is on or off.

Once you have set the Daily Timer, the timer will be activated at the same time every day. It can be cancelled and re-activated whenever you wish.

The Timer indicator on the display shows when the Daily Timer you have set is in effect.

Note: Perform each setting within 30 seconds. Otherwise, the setting is cleared and the procedure must be repeated from the beginning.

Press the **OFF** button to turn off the System.

- Start playing the auxiliary equipment.
- Adjust the **VOLUME** control to the desired listening level.
- Apply sound effects, if you wish.
 - Press the **AFB** Super PRO button to reinforce the bass sound.
 - Press the **BASS/TREBLE** button to control the tone. (See "Tone Control" on page 7.)

To exit AUX mode
You will automatically switch out of AUX mode when you select other source.

Note: For operation of the auxiliary equipment, refer to its own instructions.

Setting the ON time (Example: 12:15)

- Press the **TIMER/SNOOZE** button on the Unit. The Timer indicator lights up and the current ON time blinks on the display.

- Press the **RIGHT** or **LEFT** button on the Unit to set the time you want the Unit to come on. Pressing the **RIGHT** button moves the time forwards and pressing the **LEFT** button moves the time backwards. Hold down the button to move the time in 10-minute intervals.

Setting the OFF time (Example: 13:15)

- Press the **TIMER/SNOOZE** button on the Unit. The current OFF time blinks on the display.

- Press the **RIGHT** or **LEFT** button on the Unit to set the time you want the Unit to be turned off. Pressing the **RIGHT** button moves the time forwards and pressing the **LEFT** button moves the time backwards. Hold down the button to move the time in 10-minute intervals.

Selecting the music source

- Press the **TIMER/SNOOZE** button on the Unit. "TUNER" blinks on the display.
- Press the **RIGHT** or **LEFT** button to select the music source you want to listen to. The display changes as shown below.

Setting the volume level

- Press the **TIMER/SNOOZE** button on the Unit. The current volume setting blinks on the display.
- Press the **RIGHT** or **LEFT** button to select the volume level.
 - The current volume level will be used.
 - Low (1) to high (5) level. When the timer is turned on, the Volume will be automatically turned to the set position.

VOL 5: Approx. 11 o'clock position
VOL 1: Approx. 8 o'clock position

Note: The volume level for VOL 1 to VOL 5 will vary according to the current volume gain selection (0 dB, -6 dB or -12 dB). So, you should learn the actual volume level beforehand.

Press the TIMER/SNOOZE button on the Unit.

The timer setting is completed and the display returns to the display before you set the timer (The Timer indicator remains lit).

Before turning off the Unit, prepare the music source selected in step 4.

Turner: Tune in to the desired station.
CD: Insert a CD.

Press the OFF button to turn off the System.

To cancel the timer, press the **TIMER/SNOOZE** button. The Timer indicator goes out on the display.

To re-activate the cancelled timer, press the **TIMER/SNOOZE** button to light the Timer indicator. Then, press the **TIMER/SNOOZE** button repeatedly until the display returns to the original display before setting the timer. (Be sure that the Timer indicator is lit)

To confirm the timer settings, cancel the timer once by pressing the **TIMER/SNOOZE** button. Then, press the **TIMER/SNOOZE** button repeatedly, and you can see the current timer settings (ON time, OFF time, source, and volume).
To change the timer setting, repeat the setting procedure from the beginning.

- When the timer turns on, the Timer indicator starts blinking. When the timer turns on, it is possible to fade in the sound from volume level 0 (zero) to the preset volume.

CAUTION: If the System is unplugged, or a power failure occurs, the timer setting will be lost after about 24 hours. You will need to reset the clock first, then the timer.

5-Minute Snoozing

When the timer turns on the music source you can, if you wish, activate the 5-minute snoozing function to temporarily stop playback.

Press the TIMER/SNOOZE button on the Unit.

The "SNZ" indicator lights up on the display and the power is turned off for five minutes for snoozing.

Setting the SLEEP Timer

Use the Sleep Timer to turn the System off after a certain number of minutes when it is playing. By setting the Sleep Timer, you can fall asleep to music and know that your System will turn off by itself rather than play all night.

You can only set the Sleep Timer when the System is on and a source is playing.

Play a CD or tune in to the desired station.

Press the SLEEP button on the Remote Control.

The "SLEEP" indicator lights up.

Set the length of time you want the source to play before shutting off.

Each time you press the **SLEEP** button, it changes the number of minutes shown on the display in this sequence:

→ 30 → 60 → 90 → 120 → Cancelled → (back to the beginning)

After setting the number of minutes for the Sleep Timer, the display will stop blinking after 5 seconds and return to the display as before setting the Sleep Timer.

The System is now set to turn off after the number of minutes you set.

Troubleshooting

- If you are having a problem with your System, check this list for a possible solution before calling for service.
- If you cannot solve the problem from the hints given here, or the System has been physically damaged, call a qualified person, such as your dealer, for service.

Symptom	Possible Cause	Action
No sound is heard.	<ul style="list-style-type: none"> • Connections are incorrect, or loose. • Headphones are connected. 	<ul style="list-style-type: none"> • Check all connections and make corrections. (See pages 4- 5.) • Disconnect the headphones.
Poor radio reception	<ul style="list-style-type: none"> • The antenna is disconnected. • The AM Loop Antenna is too close to the System. • The FM Wire Antenna is not properly extended and positioned. 	<ul style="list-style-type: none"> • Reconnect the antenna securely. • Change the position and direction of the AM Loop Antenna. • Extend FM Wire Antenna to the best reception position.
The CD skips.	The CD is dirty or scratched.	Clean or replace the CD.
The CD does not play.	The CD is upside down.	Put the CD in with the label side up.
Unable to operate the Remote Control.	<ul style="list-style-type: none"> • The path between the Remote Control and the sensor on the Unit is blocked • The batteries have lost their charge. 	<ul style="list-style-type: none"> • Remove the obstruction. • Replace the batteries.
Operations are disabled.	The built-in microprocessor has malfunctioned due to external electrical interference.	Unplug the System then plug it back in

To Confirm the Sleep Time

When the SLEEP button is pressed, the remaining sleep time is displayed. Wait for 5 seconds until the display returns to the original display.

To Cancel the SLEEP Timer Setting

Press the SLEEP button until the "SLEEP" indicator goes off on the display.

Turning off the System also cancels the SLEEP Timer.

- If you are setting the Daily Timer, the System will be turned on at the set time to wake you up.

Care And Maintenance

Handle your CDs carefully, and they will last a long time.

Compact Discs

- Only CDs bearing this mark can be used with this System. However, continued use of irregular shape CDs (heart-shape, octagonal, etc.) can damage the System.

- Remove the CD from its case by holding it at the edges while pressing the case's center hole lightly.
- Do not touch the shiny surface of the CD, or bend the CD.

- Put the CD back in its case after use to prevent warping.
- Be careful not to scratch the surface of the CD when placing it back in the case.
- Avoid exposure to direct sunlight, temperature extremes, and moisture.

- A dirty CD may not play correctly. If a CD does become dirty, wipe it with a soft cloth in a straight line from center to edge.

CAUTION: Do not use any solvent (for example, conventional record cleaner, spray thinner, benzine, etc.) to clean a CD.

Moisture Condensation

Moisture may condense on the lens inside the System in the following cases:

- After turning on heating in the room.
- In a damp room.
- If the System is brought directly from a cold to a warm place.

Should this occur, the System may malfunction. In this case, leave the System turned on for a few hours until the moisture evaporates, unplug the AC power cord, and then plug it in again.

General Notes
In general, you will have the best performance by keeping your CDs and the mechanism clean.

- Store CDs in their cases, and keep them in cabinets or on shelves.
- Keep the system's CD holder closed when not in use.

Cleaning the lens

If the lens in the CD pickup is dirty, dropout, etc., could degrade sound.
Open the CD holder and clean the lens as shown.
Use a blower (available from a camera store) to blow dust off the lens.

- If there are fingerprints, etc. on the lens, gently wipe clean with a cotton swab.

Specifications

Amplifier

Output Power 30 W (15 W + 15 W) at 4 ohms (Max.)
20 W (10 W + 10 W) at 4 ohms (10% THD)

Input Sensitivity/Impedance (1 kHz)

AUX 500 mV/59 kohms
MD/TAPE 500 mV/59 kohms

Output Sensitivity/Impedance (1 kHz)

MD/TAPE 500 mV/4.9 kohms
Optical out -21 dBm - -15 dBm
Subwoofer 0 - 155 mV/10 kohms
Speaker terminals 4 - 16 ohms
Phones 16 ohm - 1 kohms
0 - 15 mW/ohm output into 32 ohms

CD Player

Signal-To-Noise Ratio 90 dB

Wow And Flutter Unmeasurable

Tuner

FM Tuner

Tuning Range 87.5 - 108.0 MHz

AM Tuner

Tuning Range (MW) 522 - 1,629 kHz
(LW) 144 - 288 kHz

Description of Major ICs

■UPD780204GF(IC701):System controller

1.Terminal Layout

2.Pin Function

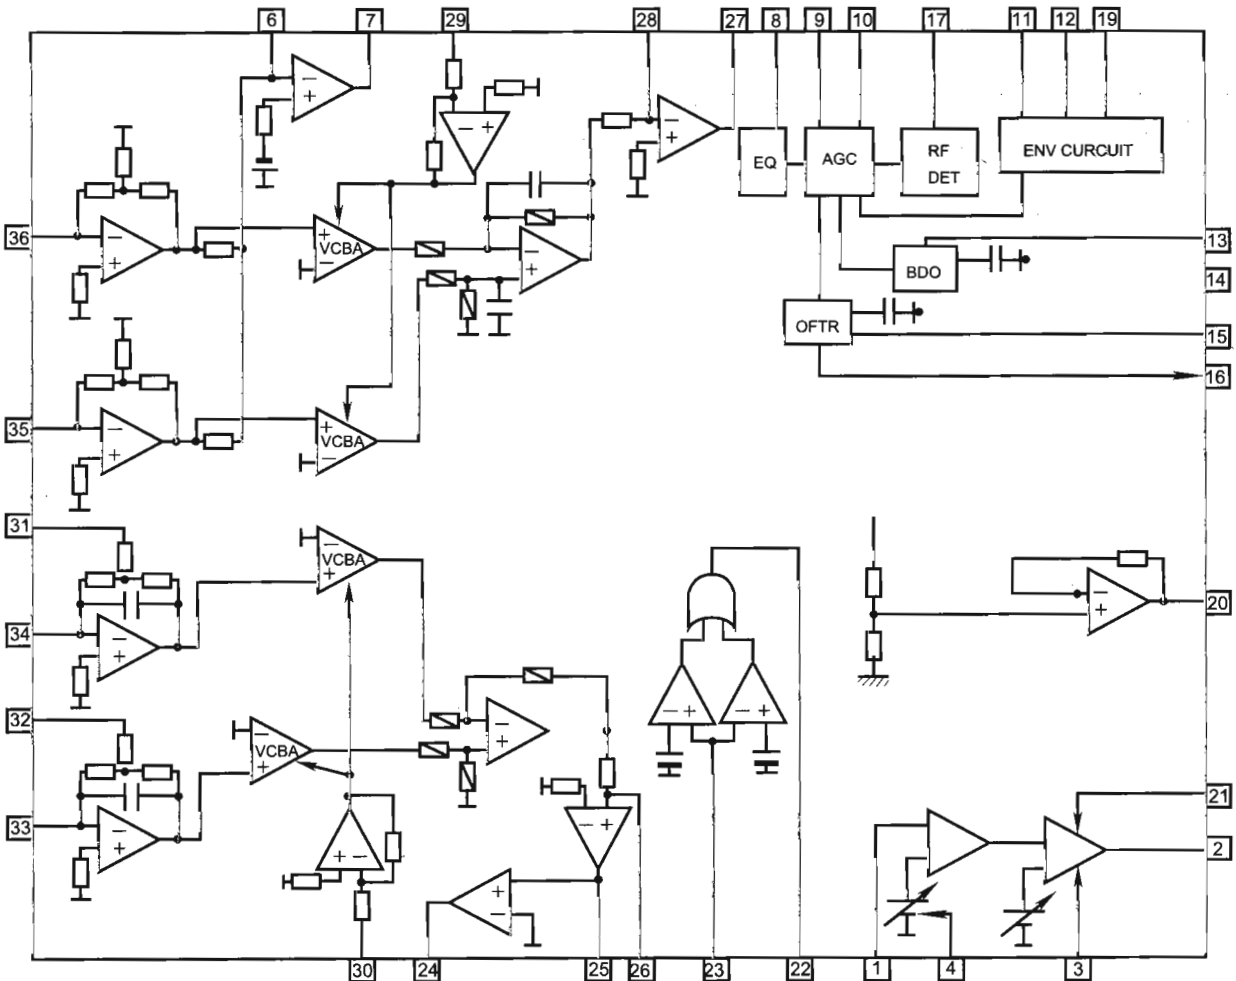

Pin No.	Symbol	I/O	Function	Pin No.	Symbol	I/O	Function
1	VDD	-	Power supply.	29	SAFETY1	I	Detection 1 for abnormal power voltage.
2	STATUS	O	Status signal output to IC603.				
3	XRESET	O	Reset signal output to IC603.	30	SAFETY0	I	
4	MCLK	O	Clock signal output to IC603.				Detection 0 for abnormal power voltage.
5	MDATA	O	Command signal output to IC603.	31	KEY1	I	
6	MLD	O	Load signal output to IC603.	32	KEY0	I	
7	+BCTL	O	Switched 5V control.	33	VOLP	I	Voltage of volume position.
8	BEAT2	O	Main clock selector 2.	34	AVDD	-	Power supply.
9	BEAT1	O	Main clock selector 1.	35	AVREF	-	Power supply.
10	RESET	I	Reset signal input.	36	BASS	O	Bass control signal output.
11	X2	O	Main clock signal.	37	TRE	O	Treble control signal output.
12	X1	I	Main clock signal.	38	RDSCLK	I	Clock signal input from IC4.
13	IC(VPP)	-	Connect to VSS.	39	REM	I	Remote control signal input.
14	XT2	O	Sub clock signal.	40	VSS	-	Connect to GND.
15	XT1	I	Sub clock signal.	41	MT1	O	CD door motor control signal output.
16	VDD	-	Power supply.				
17	SCK	O	Serial clock output to IC317.IC2	42	MT0	O	CD door motor control signal output.
18	SDATA	O	Serial data output to IC317.IC2				
19	STB	O	Strobe signal output to IC317.	43	MTS	O	CD door motor speed (L=normal,H=slow).
20	BUPC	O	Sub clock control				
21	BUP	I	Distinction of backup power source (H=Backup).	44	FAUX1	O	Function AUX 1.
				45	FAUX2	O	Function AUX 2.
22	SQCK	O	Outside clock for sub-code Q resistor output.	46	VDD	-	Power supply.
				47	L.O.MUTE	O	Line out mute signal output.
23	NC	-	Non connect.	48	FTU	O	Function Tuner.
24	SUBQ	I	Sub-code / Q-code input.	49	MPX	I	Detection of FM stereo(L=stereo).
25	AVSS	-	Power supply.	50	SMUTE	O	System mute(mute=L).
26	PERIOD	O	Strobe of Tuner PLL.	51	POUT	O	Power ON/OFF.
27	DOOR	I	Door OPEN/CLOSE & REST SW detection.	52~67	S23~S38	O	FL segment control output.
				68~78	S1~S11	O	FL segment control output.
28	SAFETY2	I	Detection 2 for abnormal power voltage.	79	VLOAD	-	Connect to -28V
				80~90	S12~S22	O	FL segment control output.
				91~100	8G~3G	O	FL grid control signal.

Removal of main parts

■ Removing the rear cover

1. Remove the seven screws A retaining the rear cover from behind the body.
2. Remove the two screws B retaining the rear cover from upper the body.
3. Remove the two screws C retaining the rear cover from bottom the body.
4. After passing the lock pawls at the speaker terminals through the position in Fig 1 remove the rear cover.

■ Removing the side panel and ornament panel

1. Remove the rear cover.
2. Remove the two screws D retaining the side panel from right and left of body.
3. Remove the two screws E retaining the front panel assembly from the bottom. (See Fig 3)
4. The slide is done in the direction of the arrow and side panels is detached.
5. The slide is done in the direction of the arrow and the ornament panels is detached.

* These parts are installed and rear cover is installed at the end assembly.

■ Removing the CD player assembly

1. Remove the rear cover from behind the body.
2. Remove the side panels and ornament panels. (L and R)
3. After removing the four screws F from behind the body, dismount the heat sink.
4. Remove the two screws G retaining the CD mechanism assembly from right and left of body.
5. Remove the one screw H retaining the tuner function amplifier P.C.Board.
6. Disconnect the connector from CN602, CN641 on the tuner function amplifier P.C.Board (See Fig 7).
7. Disconnect the card wire from CN603, CN604 on the CD servo control P.C.Board (See Fig 6).
8. Disconnect the connector from CN311 on the main board (See Fig 6-1).
9. Remove the CD player while pulling it out toward the rear side.

Then the connector CN872 connected to the connector CN781 on the FL display microcomputer P.C.Board of the front assembly will be disconnected at the same time. (See Fig 6-1)

- * To ensure easy assembly of the CD player assembly, temporarily remove the tuner function amplifier P.C.Board, and after mounting the CD player assembly, assemble the tuner function amplifier P.C.Board.

Fig. 5

Fig. 6

Fig. 6-1

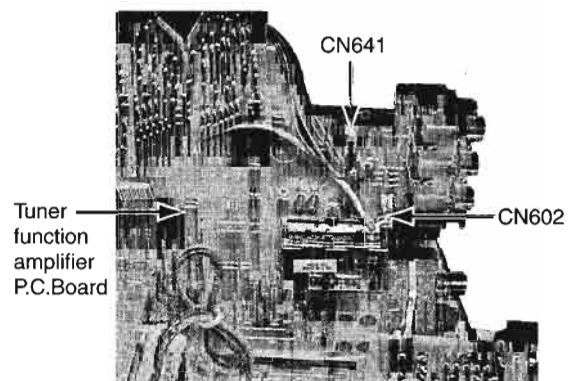

Fig. 7

■ Removing the CD servo control P.C.Board

- 1.Remove the CD mechanism assembly.
- 2.Remove the four screws I on the CD servo control P.C.Board.
- 3.Disconnect the card wire from CN601 on the CD servo control P.C.Board.
- 4.Disconnect the connector from P011 on the Motor P.C.Board.

Fig. 8

Fig. 9 CD Traverse mechanism assembly

■ Removing the CD Traverse mechanism assembly

- 1.Remove the CD mechanism assembly.
- 2.Remove the CD servo control P.C.Board.
- 3.Remove the four screws J retaining the mechanism bracket from CD mechanism assembly.

■ Removing the CD motor drive P.C.Board

- 1.Remove the CD mechanism assembly.
- 2.Remove the CD servo control P.C.Board.
- 3.Remove the CD traverse mechanism assembly.
- 4.Disconnect the loading belt.

*At this time, the grease of the gear must not place to the loading belt.

- 5.Remove two screws K retaining the loading motor from CD mechanism assembly.

Fig. 10

**■ Removing the CD door assembly
(See Fig 11.12)**

Disengage the two engagement section on both the right and left sides of the CD door while expanding the sections outward.

Fig. 11

Fig. 12

**■ Removing the operation switch P.C.Board
(See Fig 13.14)**

- 1.Remove the top panel while expanding the right and left side hooks outward.
- 2.Remove the operation switch P.C.Board upward.

Fig. 13

Fig. 14

■ Removing the tuner function amplifier P.C.Board

1. Lift connection P.C.Board for above and extract from the connector.
2. Pull out backward and detach tuner function amplifier P.C.Board.

■ Removing the main board

1. Lift connection P.C.Board for above and extract from the connector.
2. Disconnect the connector and card wire from CN971.CN301.CN351 on the main board.
3. Disconnect the connector CN911 on the power supply P.C.Board.
4. Disconnect the earth wire CN391 on the main board.
5. Pull out backward and detach main board.

Connection P.C.Board
Fig. 15

■ Removing the Front panel assembly

1. The volume knob is pulled out.
2. The front panel assembly is detached from the chassis base while removing a right and left hooks 'a'.

Tuner function amplifier P.C.Board
Fig. 16

■ Removing the Front P.C.Board

1. Remove the Front panel assembly.
2. The front P.C.Board is detached while expanding the hook 'b' in two places which is the fixation of front P.C.Board outside.

hook 'a'
Fig. 17

hook 'a'
Fig. 18

Main Adjustment

■ Test Instruments required for adjustment

1. Low frequency oscillator
(Frequency range: 50Hz to 20kHz)
(Output: 0dBs across 600Ω terminating resistor)
2. Attenuator (Impedance: 600Ω)
3. Test disc: CTS-1000 (Audio)
: CTS-1000 & CRG-1211S (Optical Control)
4. Extension cord: Reference Next Page
5. Electronic voltmeter
6. Distortion meter
7. Jitter meter: NJM631
8. TE offset meter: LTM9055

■ Measuring conditions (Amplifier section)

Supply voltage

AC230V (50Hz)	Ver. B.E Type
AC110/127/230V (50/60Hz)	Ver. U/UT/US/UB
AC220V (50Hz)	Ver. UF
AC240V (50Hz)	Ver. A
AC120V (60Hz)	Ver. J

Reference output level

Speaker	0dBs (0.775V) / 4Ω
Headphone	-20dBs (0.077V) / 32Ω
Line out	500mV (-3.8dBs) / 47kΩ

Standard test frequency 1kHz

Reference input level AUX -3.8dBs

Output for measuring

At speaker terminal J3003 (Dummy load : 4Ω)

Posture of test Horizontal

■ Standard position of function switches

Function switch	to AUX
Active hyper-bass pro switch	to OFF
Gain selector switch	to 0dB

■ Standard position of volume control

Bass treble	to center
Main volume adjust	to reference output VOL4

■ Remarks of measuring

1. Negative side of the input and output on the measuring system, it ought to be separately to each other.
when using the 2 channels E.V. meter, never connect together on the negative side.
2. This model's amplifier is BTL.
On account of that minus speaker's terminal isn't same potential as earth in BTL (Balanced transformer-less) amplifier.
never connect minus side to the ground or negative.
3. When measuring power output with dummy load.
Connected wire to be used as big as possible.

■ Measuring condition (Tuner section)

Power source to tuner: DC5V

AM modulation 400Hz 30%

FM modulation 400Hz deviation 22.5kHz

■ Operation Confirmation

Do as follows by the method when you do the operation confirmation detaching the CD mechanism part from the main body.

- 1.Remove the CD mechanism assembly.
- 2.Operation Switch P.C.Board is detached from the CD mechanism assembly, and Operation Switch P.C.Board is connected with Front P.C.Board.
- 3.Flat wire A,B,C and D connected with the CD mechanism assembly are made an extension wire.
- 4.Switch S6382 on the substrate is short-circuited.
- 5.The disk is turned on, and the CD door is closed.
- 6.The power supply is turned on, and CD is reproduced.

Connect the Extension Cord

■ Arrangement Checking Test Pont

(CD Servo control board)

■ AMP Section

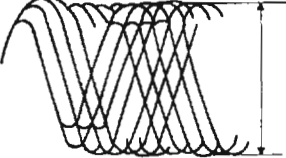

Items	Conditions	Adjustment and Confirmation Procedure	Standard Value
1. Amplifier gain check	*Measuring instrument :Oscilloscope *Measuring point :AUX IN :Speaker terminal	Input the 1kHz to AUX IN. Main volume is maximum. When speaker output becomes 0dB, input is $-16\text{dB} \pm 4\text{dB}$.	$-16\text{dB} \pm 4\text{dB}$
2. Noise level check	*Measuring instrument :Oscilloscope :Voltmeter *Measuring point :AUX IN :Speaker terminal	Switch and volume position Function switch : AUX. Bass treble : flat When main volume becomes maximum, confirm that speaker output is less than 4mV. When main volume becomes minimum, confirm that speaker output is less than 2.5mV	Less than 4mV Less than 2.5mV
3. Sub woofer output check	*Measuring instrument :Oscilloscope :Voltmeter *Measuring point :AUX IN :Sub woofer output terminal *Test disc :CTS-1000	Input the reference frequency 100Hz from AUX IN. By main volume is maximum position, bass and treble is flat position, Confirm the sub woofer output is $-14\text{dBs} \pm 4\text{dB}$.	$-14\text{dBs} \pm 4\text{dB}$
4. Super Bass /AHB effect	*Measuring instrument :Oscilloscope *Measuring point :Speaker terminal	Input the reference frequency 70Hz from AUX IN. Confirm the speaker terminal output is $11\text{dB} \pm 4\text{dB}$.	$11\text{dB} \pm 4\text{dB}$
5. Gain selector effect	*Measuring instrument :Oscilloscope *Measuring point :Speaker terminal By TEST MODE	Input the reference frequency 1kHz to AUX IN confirm whether $-6\text{dB} \pm 3\text{dB}$ is output from the speaker terminal at -6dB switch ON, and $-12\text{dB} \pm 3\text{dB}$ is output from the speaker terminal at -12dB switch ON. (Respectively 0dB difference)	$-6\text{dB} \pm 3\text{dB}$ $-12\text{dB} \pm 3\text{dB}$ Respectively 0dB difference
5. Sub woofer out Gain selector effect	*Measuring instrument :Oscilloscope *Measuring point :Sub woofer output By TEST MODE	Input the reference frequency 100Hz to AUX IN confirm whether $-6\text{dB} \pm 3\text{dB}$ is output from the Sub woofer output terminal at -6dB switch ON, and $-12\text{dB} \pm 3\text{dB}$ is output from the speaker terminal at -12dB switch ON. (Respectively 0dB difference)	$-6\text{dB} \pm 3\text{dB}$ $-12\text{dB} \pm 3\text{dB}$ Respectively 0dB difference

How to set TEST MODE

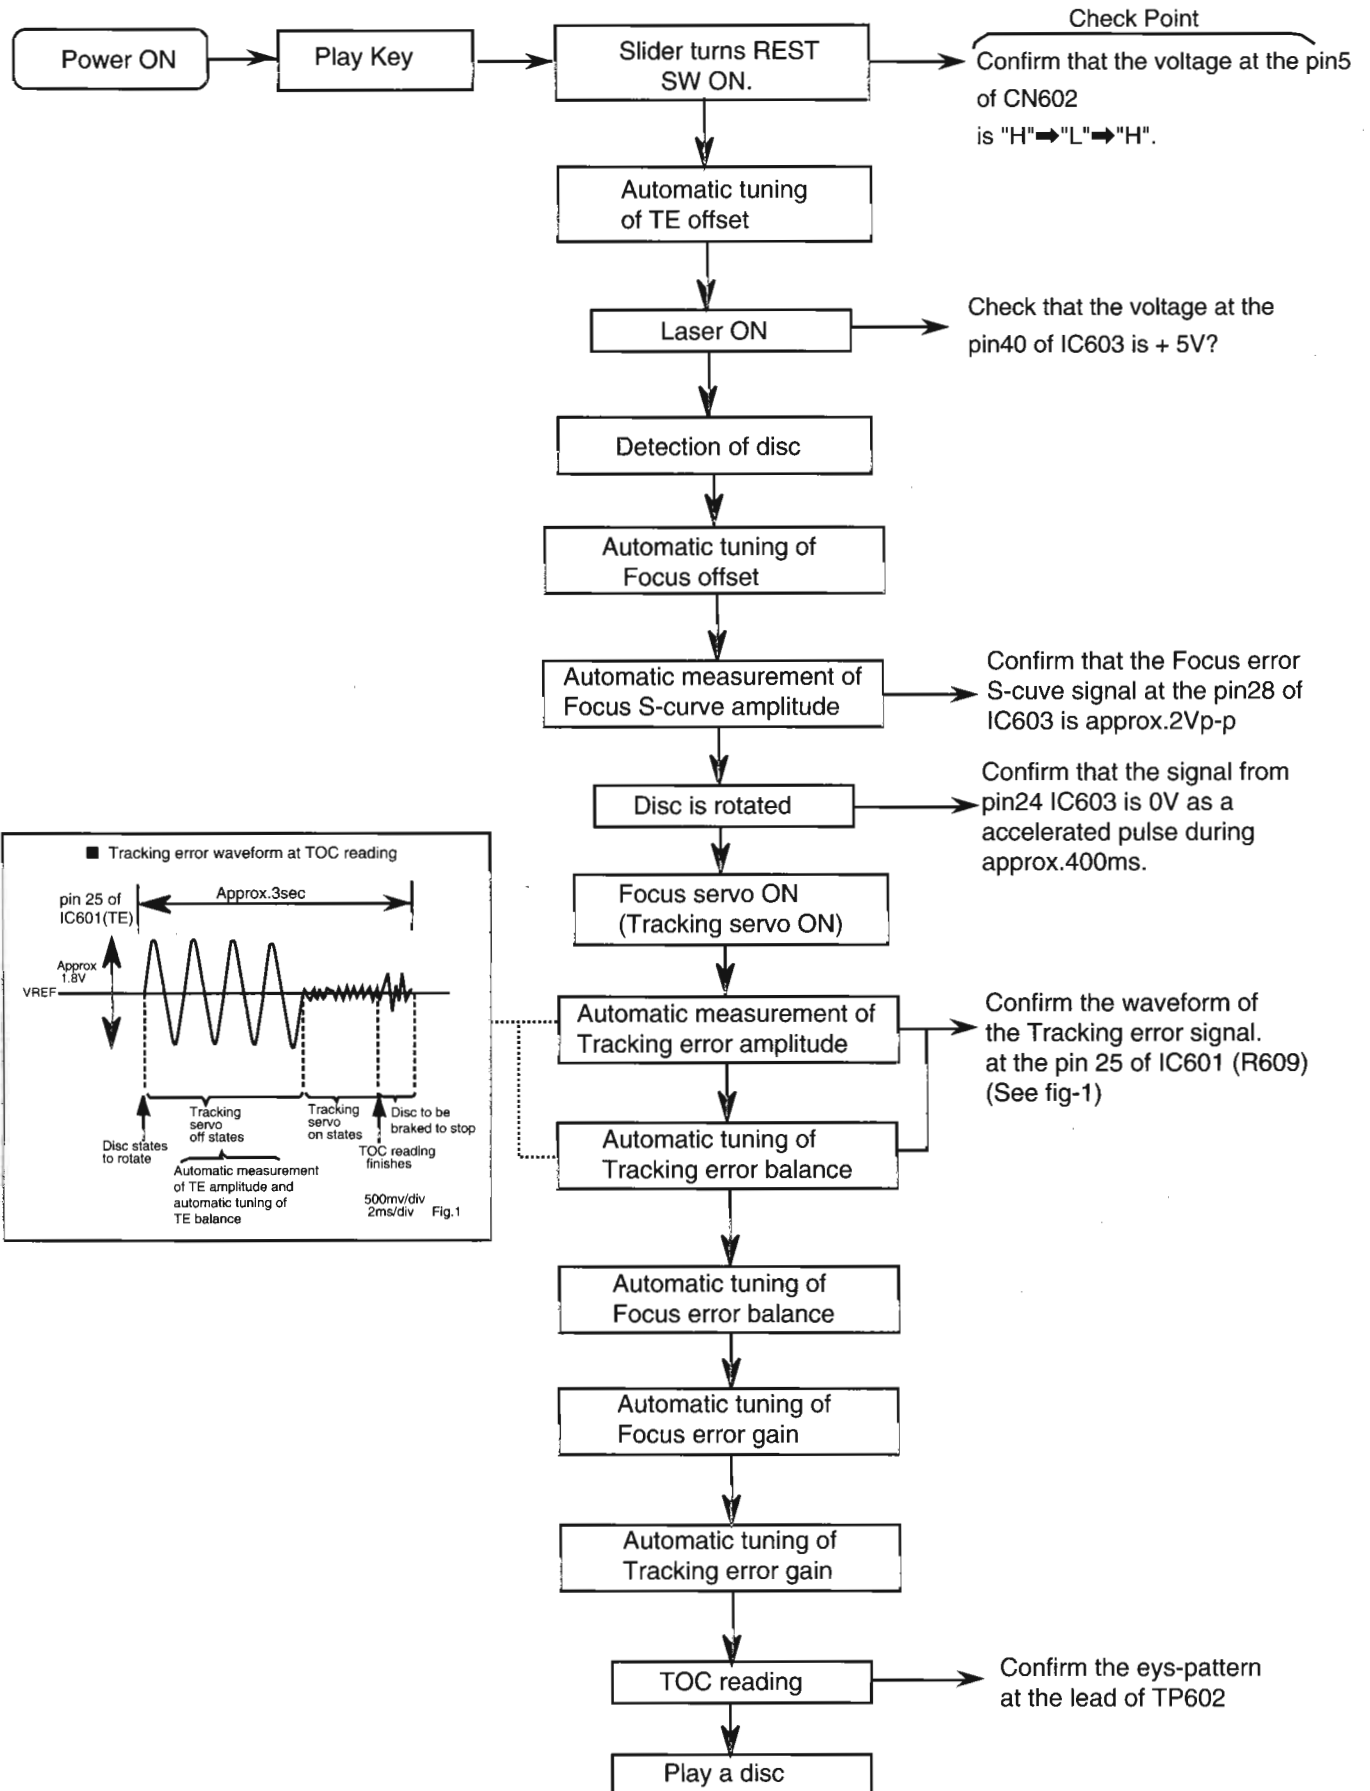

Press **[STOP]** + **[VOLUME-]** + **[POWER]** on the remote control same time.

Confirm that all of the LCDs have been turned on when set to the **[TEST MODE]**.

■CD Section

Items	Conditions	Adjustment and Confirmation Procedure	Standard Value
1. Jitter check	*Measuring instrument : jitter meter *Test point : TP601(GND side) : TP602(ARF side) *Test disc : CTS-1000	Connect the jitter meter between TP601(GND) and TP602(ARF) and when test disc (track 1) is played, confirm that the meter reading is 26n-sec or less.	26n-sec or less
2. RF level (eye pattern)	*Measuring instrument : Oscilloscope *Test point : TP601(GND side) : TP602(ARF side) *Test disc : CTS-1000	Connect the oscilloscope between TP601(GND) and TP602(ARF) and when test disc (track 1) is played, confirm that peak-to-peak value of oscilloscope waveform is within $1.1V \pm 0.2V$. <div style="text-align: center;"> <p>Eye-pattern waveform</p>  <p>The maximum value of this waveform should be in the range of specifications and the waveform should be clear</p> </div>	$1.1V \pm 0.2V$
3. Outer most area check	*Test disc : CTS-1000	Select "Track 26" on the outer area of test disc directly and check that it begins playback smoothly and that there are no abnormal conditions such as a tracking error.	
4. Pickup unit movement check (From the outer area to the inner area)	*Test disc : CTS-1000	Allow the pickup to skip over from the disc's outer most area to "Track 1" and check that it takes within 10 seconds for the player to enter play mode.	within 10 seconds

Flow of Functional Operation Until TOC Read

Maintenance of Laser Pickup

(1) Cleaning the pick up lens

Before you replace the pick up, please try to clean the lens with a alcohol soaked cotton swab.

(2) Life of the laser diode (Fig.1)

When the life of the laser diode has expired, the following symptoms will appear.

- (1) The level of RF output (EFM output: amplitude of eye pattern) will below.

(Fig.1)

Replacement of Laser Pickup

(3) Semi-fixed resistor on the APC PC board

The semi-fixed resistor on the APC printed circuit board which is attached to the pickup is used to adjust the laser power. Since this adjustment should be performed to match the characteristics of the whole optical block, do not touch the semi-fixed resistor.

If the laser power is lower than the specified value, the laser diode is almost worn out, and the laser pickup should be replaced.

If the semi-fixed resistor is adjusted while the pickup is functioning normally, the laser pickup may be damaged due to excessive current.

Self Diagnosis Function of CD

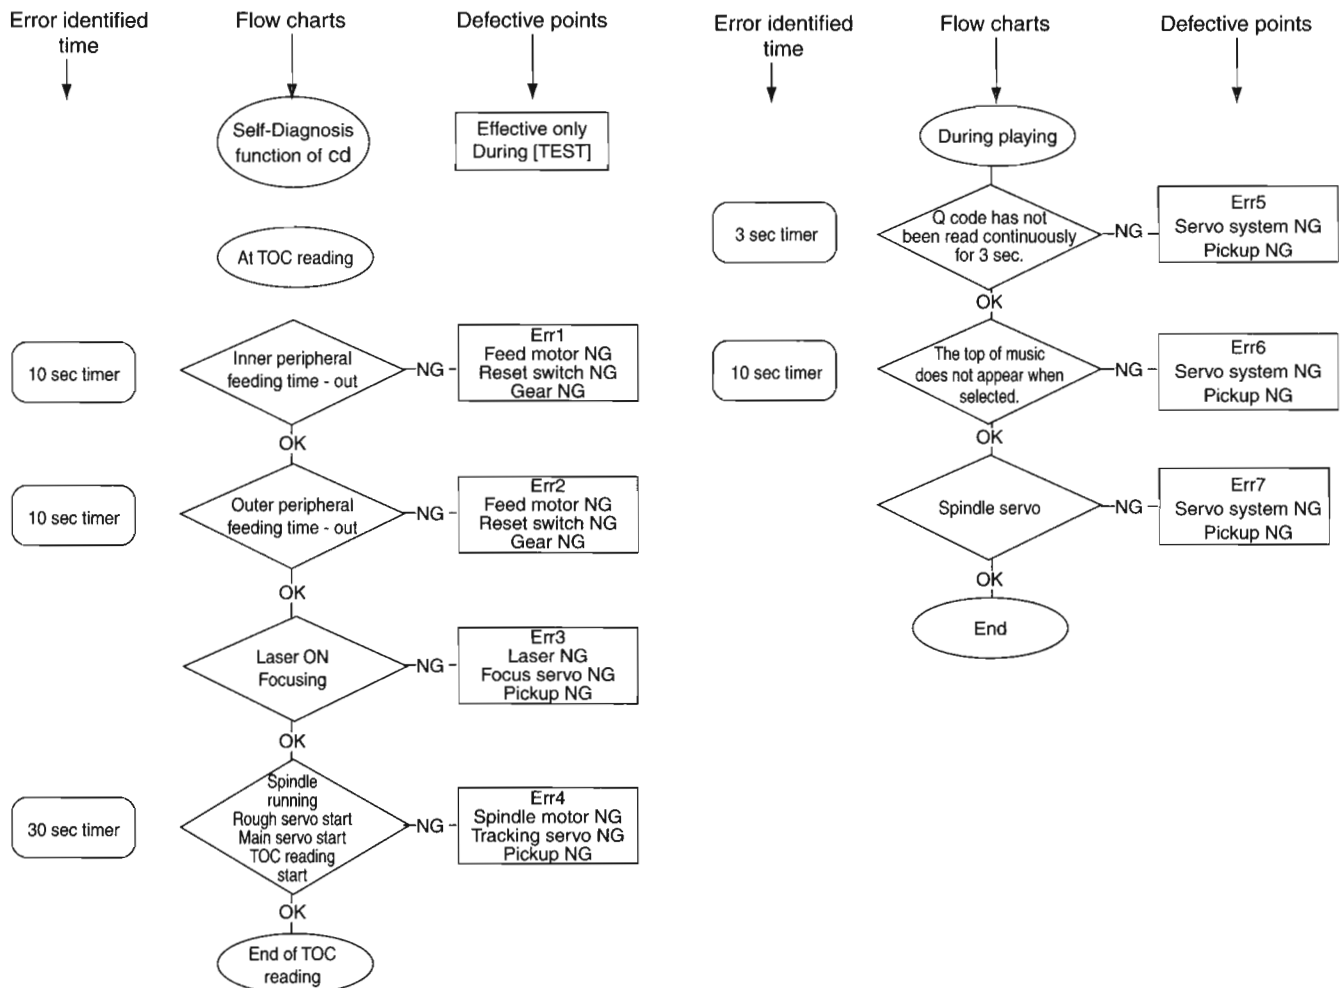

1. Purpose

This function is designed to display an error to readily clarify the cause of such an error should any trouble occur in CD.

2. How to Use the Function

- (1) Turn the microcomputer action of the set to [TEST] mode.
- (2) Press **STOP** + **VOLUME-** + **POWER** on the remote control same time.
Confirm that all of the LCDs have been turned on when set to the [TEST] mode subsequent to the step in item (2).
- (3) When the CD trouble has occurred after starting CD, an error code will be displayed on the display section of LCD, etc.

3. Error code and location in trouble

NOTES

- VOLTAGES ARE DC-MEASURED WITH A DIGITAL VOLT METER OR OSCILLOSCOPE WITHOUT INPUT SIGNAL. CONDITION --- CD STOP MODE
- UNLESS OTHERWISE SPECIFIED
RESISTORS ARE 1/8W ±5% CARBON RESISTOR.
ALL RESISTANCE VALUES ARE IN OHM(+).
ALL CAPACITORS ARE CERAMIC CAPACITOR OR MYLAR CAPACITOR.
ALL CAPACITANCE VALUES ARE IN nF(pF).
ALL INDUCTANCE VALUES ARE IN mH(mH).
ALL ELECTROLYTIC CAPACITORS ARE SHOWN IN THE FORM OF CAPACITANCE (μF)/RATED VOLTAGE (V).
ALL DIODES ARE 1SS254

NOTES

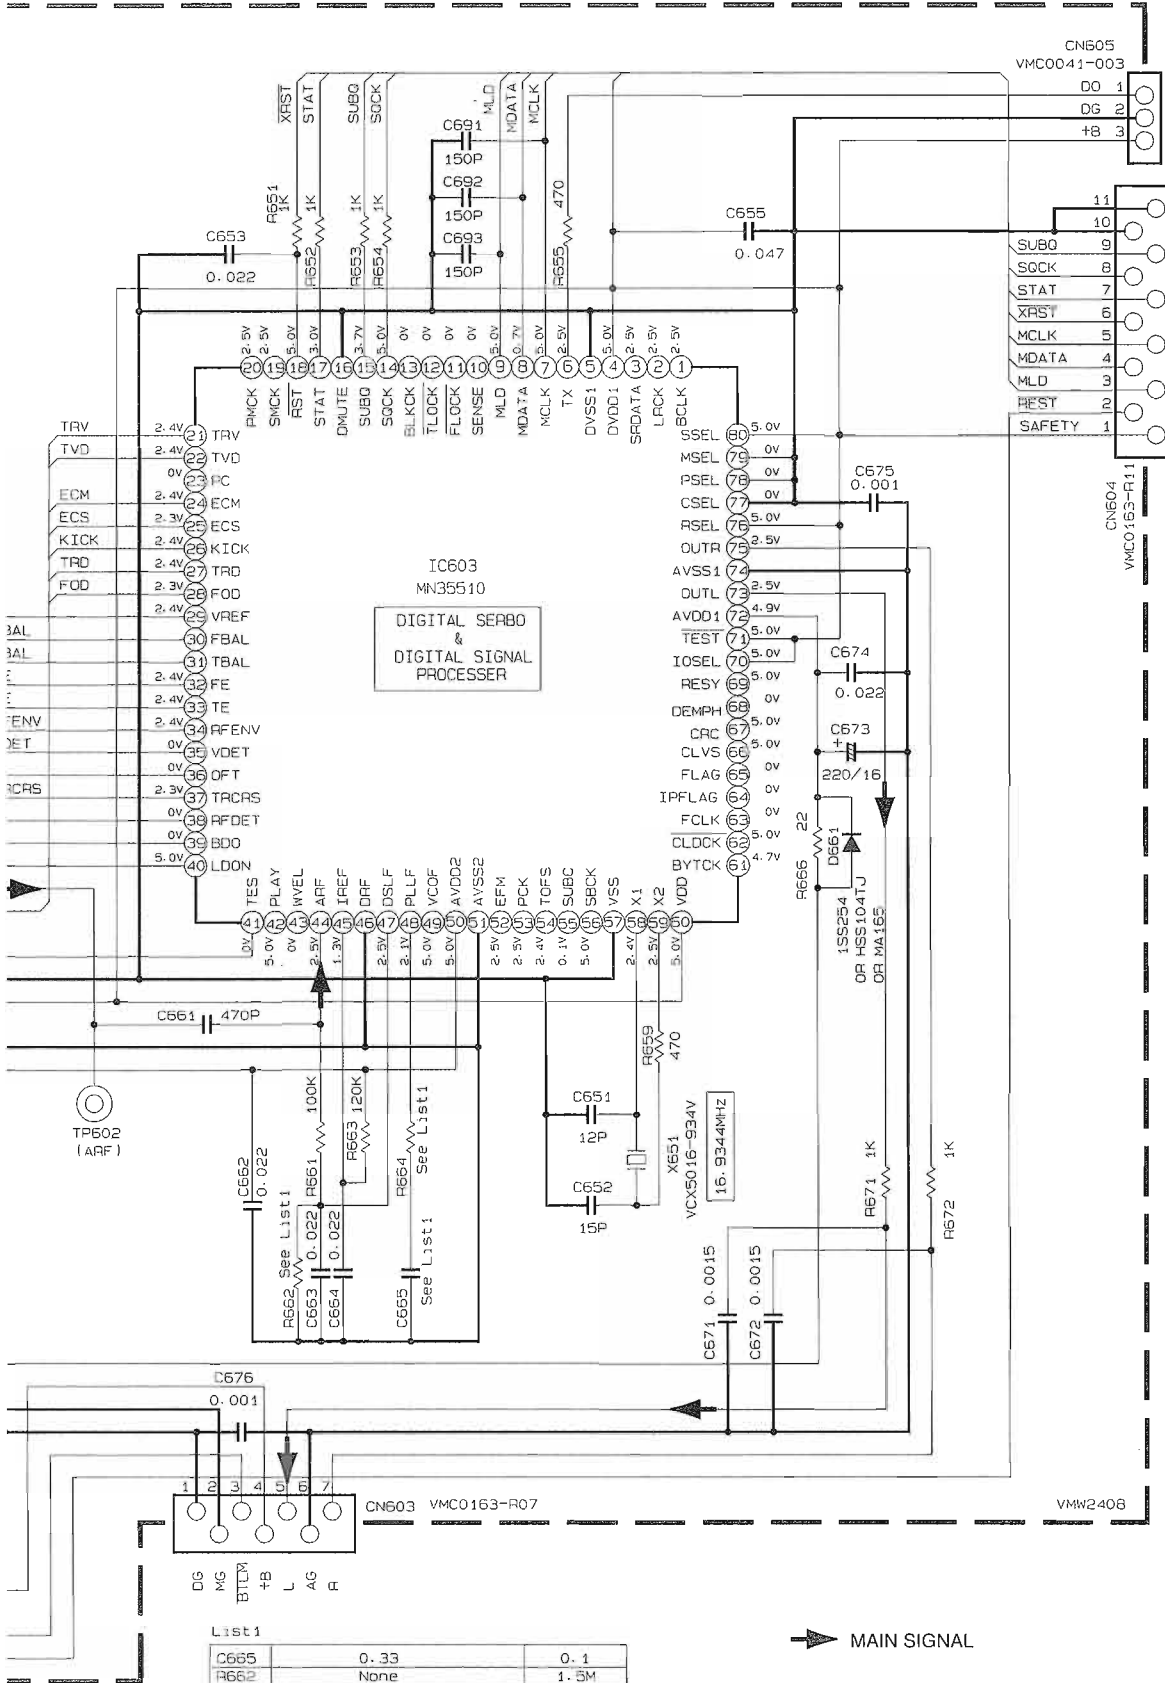

1. VOLTAGES ARE DC-MEASURED WITH A DIGITAL VOLT METER
2. UNLESS OTHERWISE SPECIFIED, RESISTORS ARE 1/6W ±5% CARBON RESISTOR.
 ALL RESISTANCE VALUES ARE IN Ω(M)(K).
 ALL CAPACITORS ARE CERAMIC CAPACITOR OR MYLAR CAPACITOR.
 ALL CAPACITANCE VALUES ARE IN #F(P=pF).
 ALL E-CAPACITORS ARE SHOWN IN THE FORM OF CAPACITANCE I²F/RATED VOLTAGE (V).

CD Mechanism Ass'y and Parts List

Block No. **M 2 M M**

No. EXL-M6

■ Grease Point

G-31KB
(Grease to apply have to be alittle for the exchange)

NOTE
Please order motor after confirming the number of the P.C.Board because the combination of feed motor is different according to the P.C.Board used.

■ CD Mechanism Assembly Parts List

	Item	Parts Number	Parts Name	Q'ty	Description	Area

NOTES

1. VOLTAGES ARE DC-MEASURED WITH A DIGITAL VOLT METER OR OSCILLOSCOPE WITHOUT INPUT SIGNAL.
CONDITION — FUNC. CD STOP MODE

2. UNLESS OTH ALL RES: ALL CAP: ALL IN: ALL E: CAI ALL D100

2. UNLESS OTHERWISE SPECIFIED, RESISTORS ARE 1/4W ±5% CARBON RESISTOR.
 ALL RESISTANCE VALUES ARE IN OHMS (Ω).
 ALL CAPACITORS ARE CERAMIC CAPACITOR OR NYLON CAPACITOR.
 ALL CAPACITANCE VALUES ARE IN μF (PPF).
 ALL INDUCTANCE VALUES ARE IN μH (MH).
 ALL CAPACITORS ARE SHOWN IN THE FORM OF CAPACITANCE (μF)/RATED VOLTAGE (V).
 ALL DIODES ARE HS104TJ OR 1SS251-77

▶ Main signal
 Parts are safety assurance parts. When replacing those parts make sure to use the specified one.
