Safety Precautions

1. The design of this product contains special hardware and many circuits and components specially for safety purposes. For continued protection, no changes should be made to the original design unless authorised in writing by the manufacturer. Replacement parts must be identical to those used in the original circuits.
2. Any unauthorised design alterations or additions will void the manufacturer's guarantee ; furthermore the manufacturer cannot accept responsibility for personal injury or property damage resulting therefrom.
3. Essential safety critical components are identified by (Δ) on the Parts List and by shading on the schematics ,and must never be replaced by parts other than those listed in the manual. Please note however that many electrical and mechanical parts in the product have special safety related characteristics . These characteristics are often not evident from visual inspection . Parts other than specified by the manufacturer may not have the same safety characteristics as the recommended replacement parts shown in the Parts List of the service manual and may create shock , fire , or other hazards .
4. The leads in the products are routed and dressed with ties, clamps, tubings, barriers and the like to be separated from live parts, high temperature parts, moving parts and/or sharp edges for the prevention of electric shock and fire hazard. When service is required, the original lead routing and dress should be observed, and it should be confirmed that they have been returned to normal, after re-assembling.

Warning

1. Service should be performed by qualified personnel only.
2. This equipment has been designed and manufactured to meet international safety standards.
3. It is the legal responsibility of the repairer to ensure that these safety standards are maintained.
4. Repairs must be made in accordance with the relevant safety standards.
5. It is essential that safety critical components are replaced by approved parts.
6. If mains voltage selector is provided, check setting for local voltage .

Instruction Book

Switches, Buttons and Controls

Become familiar with the buttons and controls on the receiver before use.

- Refer to the pages in parentheses for details.

Specifications..... 35

Getting Started

This section explains how to connect stereo components and speakers to the receiver, and how to connect the power supply.

Before Installation

General

- Be sure your hands are dry.
- Turn the power off to all components.
- Read the manuals supplied with the components you are going to connect.

Locations

- Install the receiver in a location that is level and protected from moisture.
- The temperature around the receiver must be between -5° and 35° C (23° and 95° F).
- Make sure there is good ventilation around the receiver. Poor ventilation could cause overheating and damage the receiver.

Handling the receiver

- Do not insert any metal object into the receiver.
- Do not disassemble the receiver or remove screws, covers, or cabinet.
- Do not expose the receiver to rain or moisture.

Checking the Supplied Accessories

Check to be sure you have all of the following items, which are supplied with the receiver. The number in the parentheses indicates quantity of the pieces supplied.

- Remote Control (1)
- Batteries (2)
- AM (MW/LW) Loop Antenna (1)
- FM Antenna (1)

If anything is missing, contact your dealer immediately.

Connecting the FM and AM (MW/LW) Antennas

FM Antenna Connections

- A Using the Supplied FM Antenna**
The FM antenna provided can be connected to the FM 75-ohm COAXIAL terminal as temporary measure.
- B Using the Standard Type Connector (Not Supplied)**
A standard type connector (IEC or DIN45325) should be connected to the FM 75-ohm COAXIAL terminal.

Note: Make sure the antenna conductors do not touch any other terminals, connecting cords or power cord. This could cause poor reception.

Extend the supplied FM antenna horizontally.

If reception is poor, connect an outdoor FM antenna.

Before attaching a 75-ohm coaxial cable (the kind with a round wire going to the outdoor FM antenna), disconnect the supplied FM antenna.

AM (MW/LW) Antenna Connections

Turn the loop until you have the best reception.

Snap the tabs on the loop into the slots of the base to assemble the AM (MW/LW) loop.

If reception is poor, connect an outdoor single vinyl-covered wire to the AM EXT terminal. (Keep the AM (MW/LW) loop antenna connected.)

Note: Make sure the antenna conductors do not touch any other terminals, connecting cords or power cord. This could cause poor reception.

Connecting the Speakers

You can connect the following speakers:

- Two sets of front speakers to produce normal stereo sound
- One set of rear speakers to enjoy the surround effect
- One center speaker to produce more effective surround effect (to make human voices outstanding)
- One subwoofer to enhance the bass

For each speaker (except for subwoofer), connect one end of the speaker signal cable (not supplied) to the speaker terminal on the rear panel and the other end to the speaker. (For connecting a subwoofer, see page 7.)

1. Open each terminal.
2. Insert the end of the speaker signal cable as shown (be sure to remove the insulation at the end of each wire first).
3. Close the terminals to clamp the speaker signal cables firmly in place.
4. Connect the black (-) and red (+) terminals on the rear panel to the black (-) and red (+) terminals marked on the speakers.

CAUTION:
When connecting speakers, use speakers with the same SPEAKER IMPEDANCE indicated by the speaker terminals.

Connecting the front speakers

Connect the front speakers to the FRONT SPEAKERS terminals.

Connecting the rear and center speakers

Connect rear speakers to the REAR SPEAKERS terminals and a center speaker to the CENTER SPEAKER terminal.

Note:
When you connect rear speakers, make sure that both left and right speakers are connected; otherwise, no sound will come out of the rear speakers.

About the speaker impedance of the speakers

CAUTION:
When connecting speakers, use speakers with the same SPEAKER IMPEDANCE indicated by the speaker terminals.

Notes:

- The required speaker impedance of the front speakers does not differ depending on whether both the FRONT SPEAKERS ① and FRONT SPEAKERS ② terminals are used or only one of them is used.
- The required speaker impedance of the front speakers differs depending on whether or not a center and/or rear speakers are connected at the same time. Since there are four possible speaker connections with the receiver, check which one fits your case and use the speaker with the impedance described below.

CASE 1 When you connect only front speakers

Use front speakers with 4 — 16 ohm impedance.

CASE 2 When you connect front speakers and a center speaker

Use the following speakers:
 • Front speakers: 8 — 16 ohm impedance
 • Center speaker: 8 — 16 ohm impedance

CASE 3 When you connect front and rear speakers

Use the following speakers:
 • Front speakers: 8 — 16 ohm impedance
 • Rear speakers: 8 — 16 ohm impedance

CASE 4 When you connect front and rear speakers as well as a center speaker

Use the following speakers:
 • Front speakers: 8 — 16 ohm impedance
 • Rear speakers: 8 — 16 ohm impedance
 • Center speaker: 8 — 16 ohm impedance

Connecting the subwoofer speaker

Connect the input jack of a powered subwoofer to the SUBWOOFER(OUT) jack on the rear panel, using a cable with RCA pin plugs.

Connecting Audio/Video Components

You can connect the following components to the receiver using cables with RCA pin plugs.

Audio Components	Video Components
• Turntable	• VCR
• CD player	• Video disc player
• Cassette deck	• TV

Note: Any turntables incorporating a small-output cartridge such as an MC (moving-coil type) must be connected to the receiver through a commercial head amplifier or step-up transformer. Direct connection may result in insufficient volume.

Audio component connections

If a ground cable is provided for your turntable, connect the cable to the GND terminal of the AM LOOP terminals on the rear panel.

Video component connections

CAUTION:

If you connect a sound-increasing device such as a graphic equalizer between the source components and the receiver, the sound output through the receiver may be distorted.

Connecting Audio Components for the COMPU LINK-3 Remote Control System

The COMPU LINK-3 remote control system allows you to control other JVC audio components from the receiver or vice versa. To use this system, connect your JVC audio components and the receiver with the cable (monaural mini-plug) supplied with those components.

If your audio component has two COMPU LINK-3 SYNCHRO jacks, you can use either one. If it has only one COMPU LINK-3 SYNCHRO jack, connect it so that it is the last item in the series of components (for example, the turntable and the CD player in the diagram below).

Notes:

- The COMPU LINK-3 remote control system is the upgraded version of the COMPU LINK-1 and COMPU LINK-2. Even if your component has the COMPU LINK-1 or COMPU LINK-2 jacks, you can still connect it in the COMPU LINK-3 remote control system, but some functions may not work correctly.
- For more information about the COMPU LINK-3 (1 and 2) remote control system, see page 31.

Basic Operations

The following operations are commonly used when you play any sound source.

Turning the Power On and Off (Standby)

On the front panel:

To turn on the power, press STANDBY/ON (O/I).
The STANDBY lamp goes off. The name of the current source (or station frequency) appears on the display.

Current source name appears Current volume level is shown here

To turn off the power (into standby mode), press STANDBY/ON (O/I) again.
The STANDBY lamp lights up.

From the remote control:

To turn on the power, press AUDIO.

The STANDBY lamp goes off. The name of the current source (or station frequency) appears on the display.

To turn off the power (into standby mode), press AUDIO again.
The STANDBY lamp lights up.

Note:

Pressing STANDBY/ON (O/I) again turns off the power (into standby mode) and lights the STANDBY lamp. A small amount of power is consumed in standby mode. To turn the power off completely, press O POWER to set it in the OFF position on the front panel.

Selecting the Source to Play

From the remote control:

Press one of the source button directly.

- CD* Listen to the CD player.
- TAPE* Listen to the cassette deck connected to the TAPE jacks.
- FM/AM* Listen to an FM or AM (MW/LW) broadcast.
- VCR View the video component connected to the VCR jacks.
- VIDEO View the video component connected to the VIDEO jacks.
- PHONO* Listen to a record.

Note:

* When you press one of the source buttons on the remote control marked above with an asterisk, the receiver automatically turns on.

Connecting the Power Cord

Before plugging the receiver into an AC outlet, make sure that all connections have been made.

1. Plug the power cord into an AC outlet.
2. Press O POWER to set it in the ON position.
The STANDBY lamp lights up. A small amount of power is always consumed.

To shut off the power completely:
Press O POWER to set it in the OFF position.

Keep the power cord away from the connecting cables for the TV, VCR, and antenna. The power cord may cause noise or screen interference. We recommend that you use a coaxial cable to connect the antenna, since it is well-shielded against interference.

The difference between the O POWER switch and the STANDBY/ON (O/I) button

- The O POWER switch is the mains supply switch, allowing the receiver to connect to the mains supply. To shut off the power completely, press the O POWER switch to set it in the OFF position.
- The STANDBY/ON (O/I) button is a functional on/off (standby) switch, and does not disconnect the receiver from the mains supply. A small amount of power is consumed even in standby mode for the receiver to accept signals from the remote control.

Note:

- The preset settings such as preset channel and sound adjustment may be erased in the following cases:
 - When you press O POWER to set it in the OFF position.
 - When you unplug the power cord.
 - When a power failure occurs.

CAUTIONS:

- Do not touch the power cord with wet hands.
- Do not pull on the power cord to unplug the receiver. When unplugging the receiver, always grasp the plug itself so as not to damage the cord.

Putting Batteries in the Remote Control

Before using the remote control, put the two supplied batteries in first. When using the remote control, aim the remote control directly at the remote sensor on the receiver.

1. On the back of the remote control, press down on the battery cover and slide it out.
2. Insert batteries. Make sure to observe the proper polarity: (+) to (+) and (-) to (-).
3. Slide the cover.

If the range or effectiveness of the remote control decreases, replace the batteries. Use two R6P (SUM-3)/AA (1.5F) type dry-cell batteries.

CAUTIONS:

- Follow these precautions to avoid leaking or cracking cells:
 - Place batteries in the remote control so they match the polarity indicated: (+) to (+) and (-) to (-).
 - Use the correct type of batteries. Batteries that look similar may differ in voltage.
 - Always replace both batteries at the same time.
 - Do not expose batteries to heat or flame.

Selecting the Front Speakers

When you have connected two sets of front speakers, you can select which to use. Pressing SPEAKERS 1 or SPEAKERS 2 activates the respective set of speakers.

- To use the set of speakers connected to the FRONT SPEAKERS ① terminals, press SPEAKERS 1 to set it in the **ON** position, and press SPEAKERS 2 to set it in the **OFF** position.
- To use the set of speakers connected to the FRONT SPEAKERS ② terminals, press SPEAKERS 2 to set it in the **ON** position, and press SPEAKERS 1 to set it in the **OFF** position.
- To use both sets of speakers, press both SPEAKERS 1 and 2 to set them in the **ON** position.
- To use neither set of speakers, press both SPEAKERS 1 and 2 to set them in the **OFF** position.

Note: When only one set of the front speakers is connected to either the FRONT SPEAKERS ① or ② terminals, do not press both SPEAKERS 1 and 2 to set them in the **ON** position. If you do, no sound comes out of the front speakers.

Adjusting the Volume

On the front panel:

- To increase the volume, turn MASTER VOLUME clockwise.
- To decrease the volume, turn it counterclockwise.

When you turn MASTER VOLUME rapidly, the volume level also changes rapidly. When you turn MASTER VOLUME slowly, the volume level also changes slowly.

From the remote control:

- To increase the volume, press VOLUME +.
- To decrease the volume, press VOLUME -.

From the remote control

CAUTION: Always set the volume to the minimum before starting any source. If the volume is set at its high level, the sudden blast of sound energy can permanently damage your hearing and/or ruin your speakers.

Muting the Sound

From the remote control only:

Press MUTE to mute the sound through all speakers and headphones connected. "MUTE" appears on the display and the volume turns off.

To restore the sound, press MUTE again so that "OFF" appears on the display. Turn MASTER VOLUME or pressing VOLUME +/- also restores the sound at the previous volume level.

Recording a Source

You can record any source playing through the receiver to a cassette deck connected to the TAPE jacks and VCR connected to the VCR jacks at the same time. While recording, you can listen to the selected sound source at whatever sound level you like, without affecting the sound levels of the recording.

Note: The output volume level, preset SEA, and surround modes cannot affect the recording.

Listening with Headphones

A standard pair of headphones can be connected to the PHONES jack on the front panel. Be sure to turn down the volume before connecting or putting on headphones, as high volume can damage both the headphones and your hearing.

To listen with only headphones
Press both SPEAKERS 1 and 2 to set them in the **OFF** position.

Basic Settings

Some of the following settings are required after connecting and positioning your speakers in your listening room, while others will make operations easier.

Adjusting the Front Speaker Output Balance

If the sounds you hear from the front right and left speakers are unequal, you can adjust the speaker output balance.

1. **Press SETTING** so that the Control $\Delta / \nabla / \triangleleft / \triangleright$ buttons work for adjusting the balance. The lamp above the button lights up.
2. Press Control Δ / ∇ until "BALANCE" appears on the display.
3. Press Control $\triangleleft / \triangleright$ to adjust the balance.
 - Pressing Control \triangleleft decreases the right channel output.
 - Pressing Control \triangleright decreases the left channel output.

Listening at Low Volume (Loudness)

Human ears are not sensitive to bass at low volume. To compensate for this, the loudness function automatically boosts the bass level as you lower the volume.

1. **Press SETTING** so that the Control $\Delta / \nabla / \triangleleft / \triangleright$ buttons work for setting the loudness. The lamp above the button lights up.
2. Press Control Δ / ∇ until "LOUDNESS" appears on the display.
3. Press Control $\triangleleft / \triangleright$ to set the loudness function to "ON" or "OFF."
 - Select "ON" to activate the loudness function.
 - The LOUDNESS indicator lights up on the display.
 - Select "OFF" to cancel it.
 - The indicator goes off.

Using the Sleep Timer

Using the Sleep Timer, you can fall asleep to music and know the receiver will turn off by itself rather than play all night.

1. **Press SETTING** so that the Control $\Delta / \nabla / \triangleleft / \triangleright$ buttons work for setting the Sleep Timer. The lamp above the button lights up.
2. Press Control Δ / ∇ until "<SLEEP>" appears on the display.
3. Press Control $\triangleleft / \triangleright$ to set the shut-off time. Each time you press the button, the shut-off time on the display changes as follows, and the SLEEP indicator lights up on the display.

When the shut-off time comes, the receiver turns off (into standby mode) automatically.

1. Press SETTING until the time remaining until the shut-off time: (The SLEEP indicator goes off.)
2. Press Control Δ / ∇ if necessary, until "<SLEEP>" appears on the display.
3. Press Control $\triangleleft / \triangleright$.
 - The remaining time until the shut-off time appears in minutes.
 - To change the shut-off time, press Control $\triangleleft / \triangleright$ repeatedly.

To cancel the Sleep Timer, press Control $\triangleleft / \triangleright$ repeatedly in step 3 above until "0" appears on the display. Turning off the power (into standby mode) also cancels the Sleep Timer.

Selecting the Center Speaker Size

You can register the information about the center speaker after all connections are completed. If you do this registration first, you do not have to adjust the center speaker mode when you want to activate the surround sound. However, to register the information, first you have to set the surround mode either to "PROLOGIC" or "3CHLOGIC." (You cannot select the center speaker size when the surround mode is "OFF" or "HALL.")

On the front panel only:

1. Press SURROUND so that the Control Δ / ∇ buttons work for selecting the surround mode. The lamp above the button lights up.
2. Press Control Δ / ∇ until "PROLOGIC" or "3CHLOGIC" appears on the display. The indicator of the selected mode also lights up on the display.
3. Press SETTING so that the Control $\Delta / \nabla / \triangleleft / \triangleright$ buttons work for selecting the center speaker size. The lamp above the button lights up.
4. Press Control Δ / ∇ until "CNTR SPK" (Center Speaker) appears on the display.
5. Press Control $\triangleleft / \triangleright$ to select the appropriate item about your center speaker. Each time you press the button, the display changes to show the following:

LARGE	Select this mode when the size of the center speaker is the same as that of the front speakers.
SMALL	Select this mode when the size of the center speaker is smaller than that of the front speakers.
NO	Select this mode when you do not use a center speaker. (This mode cannot be selected when you select "3CHLOGIC.")

Note: This "center speaker size" setting is so related to the center mode setting for the Dolby Surround that changing this setting affects and changes the center mode to a relevant mode, and vice versa. For example,

- If you select "LARGE," the center mode is automatically set to "WIDE," and vice versa.
- If you select "SMALL," the center mode is automatically set to "NORMAL," and vice versa.
- If you select "NO," the center mode is automatically set to "PHANTOM," for PROLOGIC, and vice versa.

One Touch Operation

This receiver can memorize the optimum sound setting for each playing source.

About the One Touch Operation

JVC's One Touch Operation function is used to assign and store different sound settings for each different playing source. By using this function, you do not have to change the settings every time you change the source. The stored settings for the newly selected source are automatically recalled.

The following can be stored for each source:

- Volume level (see page 11)
- Balance (see page 13)
- Loudness (see page 13)
- Preset SEA modes (see page 22)
- Surround mode settings (see page 24)

Note:

If the source is FM or AM (MW/LW), the One Touch Operation function works only when preset channels from 1 - 20 are turned in. You can assign a different setting for each preset channel.

Using the One Touch Operation

To store the sound settings:

1. Press ONE TOUCH OPERATION.
The ONE TOUCH OPERATION lamp lights up, then the previously memorized settings are recalled and appear on the display in turn.
2. Adjust the sound using the functions listed above.
The newly adjusted settings are memorized.

On the front panel

From the remote control

To recall the sound settings:

With the ONE TOUCH OPERATION lamp lit, the settings for the currently selected source is recalled, and appears on the display when the source is selected.

To cancel the One Touch Operation function:

Press ONE TOUCH OPERATION so that the lamp goes off. (Even though the One Touch Operation function is canceled, the recalled sound effects remain active.)

Receiving Radio Broadcasts

You can browse through all the stations or use the preset function to go immediately to a particular station.

Tuning in Stations Manually

On the front panel only:

1. Press TUNER/BAND so that the Control Δ / ∇ / \triangleleft / \triangleright buttons work for tuner settings.
The indicator above the button lights up.
2. Press Control Δ / ∇ until "<FM AM>" appears on the display.
3. Press Control \triangleleft / \triangleright to select the band.
Each time you press the button, the band alternates between FM and AM (MW/LW).
4. Press Control Δ / ∇ until "<TUNING+>" appears on the display.
5. Press Control \triangleleft / \triangleright until you find the frequency you want.
 - Pressing Control \triangleleft decreases the frequency.
 - Pressing Control \triangleright increases the frequency.

Notes:

- When you hold down Control \triangleleft / \triangleright in step 5, the frequency keeps changing until you press Control \triangleleft / \triangleright again or a station is tuned in.
- When a station of sufficient signal strength is tuned in, the TUNED indicator lights up on the display.
- When an FM stereo program is received, the STEREO indicator also lights up.

Using Preset Tuning

Once a station is assigned to a channel number, the station can be quickly tuned. You can preset up to 40 stations at random.

Storing the preset stations

On the front panel only:

1. Tune in the station you want to preset (see above).
If you want to store the FM reception mode for this station, select the FM reception mode you want. See page 18 for details.
2. Press MEMORY.
"CH-" appears and the channel number position starts flashing on the display for about 5 seconds.
3. Press Control \triangleleft / \triangleright to select a channel number while the channel number position is flashing.
 - Pressing Control \triangleleft decreases the number.
 - Pressing Control \triangleright increases the number.

Note:

You can press 10 keys on the remote control to select a channel number in this step if you have pressed FM/AM prior to starting this preset procedure.
For channel number 5, press 5. For channel number 15, press +10 then 5.
For channel number 20, press +10 then 10. For channel number 30, press +10, +10 then 10.

What Information Can RDS Signals Provide?

You can see the RDS signals the station sends.

To show the RDS signals

Press **DISPLAY MODE** or **DISPLAY** on the remote control while listening to an FM station. Each time you press the button, the display changes to show you the following information:

From the remote control

PS (Program Service): While searching, "PS" appears and then the station names will be displayed. "NO PS" appears if no signal is sent.

PTY (Program Type): While searching, "PTY" appears and then the type of the broadcast program will be displayed. "NO PTY" appears if no signal is sent.

RT (Radio Text): While searching, "RT" appears and then text messages the station sends will be displayed. "NO RT" appears if no signal is sent.

Station Frequency: Station frequency (non-RDS service)

When pressing DISPLAY on the remote control: Make sure that you have selected FM station using the remote control only. If not, the DISPLAY button does not work for tuner operation. (Pressing FM/AM activates the remote control for tuner operation.)

Notes:

- If searching finishes at once, "PS", "PTY", and "RT" will not appear on the display.
- If you press DISPLAY MODE or DISPLAY while listening to an AM (MW/LW) station, the display only shows station frequency.
- RDS is not available for AM (MW/LW) broadcasts.

Searching for a Program by PTY Codes

One of the advantages of the RDS service is that you can locate a particular kind of program from the preset channels by specifying the PTY codes.

To search for a program using the PTY codes

On the front panel:

1. Press **PTY SEARCH** while listening to an FM station so that Control <1/> buttons work for selecting PTY code. "PTY" and "SELECT" alternate on the display.

2. Press Control <1/> until the PTY code you want appears on the display. Each time you press the button, the display gives you the PTY codes described below.

3. Press **PTY SEARCH** again.

While searching, "SEARCH" and the selected PTY code alternate on the display. The receiver searches 40 preset channels, stops when it finds the one you have selected, and tunes in that station.

To continue searching after the first stop:

Press **PTY SEARCH** again while the indications on the display are flashing. If no program is found, "NOTFOUND" appears on the display.

To stop searching any time during the process:

Press **PTY SEARCH** while searching.

From the remote control:

Before starting the procedure below, make sure you have selected FM station only using the remote control. If not, the following RDS operating buttons do not work for tuner operation. (Pressing FM/AM activates the remote control for tuner operation.)

1. Press **PTY SEARCH** while listening to an FM station. "PTY" and "SELECT" alternate on the display.
2. Press **PTY SELECT +/-** until the PTY code you want appears on the display. The display gives you the PTY codes described below.
3. Press **PTY SEARCH** again. While searching, "SEARCH" and the selected PTY code alternate on the display. The receiver searches 40 preset channels, stops when it finds the one you have selected, and tunes in that station.

To continue searching after the first stop:

Press **PTY SEARCH** again while the indications on the display are flashing. If no program is found, "NOTFOUND" appears on the display.

To stop searching any time during the process:

Press **PTY SEARCH** while searching.

Descriptions of the PTY codes:

- NEWS:** News
- AFFAIRS:** Topical programs expanding on the current news or affairs
- INFO:** Programs on medical service, weather forecast, etc.
- SPORT:** Sports events
- EDUCATE:** Educational programs
- DRAMA:** Radio plays
- CULTURE:** Programs on national or regional culture
- SCIENCE:** Other programs on natural sciences and technology
- VARIED:** Other programs like comedies or ceremonies
- POP M:** Pop music
- ROCK M:** Rock music
- M.O.R. M:** Middle-of-the-road music (usually called "easy listening")
- LIGHT M:** Light music
- CLASSICS:** Classics
- OTHER M:** Other music
- NONE:** Undefined (this cannot be searched.)

When an emergency broadcast (ALARM signal) is sent from an FM station:

- The receiver automatically switches the source to FM and tunes in the station except in the following cases:
 - When you are listening to non-RDS stations (all AM (MW/LW) and some FM stations).
 - When the power is not supplied to the receiver.
- While receiving an emergency broadcast, "ALARM" appears on the display.

Using the Preset SEA Modes

The preset SEA (Sound Effect Amplifier) modes give you control over the way your music sounds.

Note:
The preset SEA mode cannot be used for recording.

Selecting Your Favorite SEA Mode

On the front panel:

1. Press **PRESET SEA** so that the Control Δ / ∇ / \triangleleft / \triangleright buttons work for preset SEA setting. The lamp above the button lights up.

2. Press Control Δ / ∇ until the mode you want appears on the display. The SEA indicator also lights up on the display. Each time you press the button, the preset SEA modes change as follows:

Note:

When you turn on the preset SEA mode, the mode and its effect level previously selected is recalled at first.

3. Press Control \triangleleft / \triangleright to select the effect level. Each time you press the button, the effect level changes as follows:

When "MOVIE" is selected:

When "SPORTS" is selected:

When "MUSIC" is selected:

MOVIE	Adds breadth to sounds so you feel like you are in a movie theater.
SPORTS	Makes sound exciting.
MUSIC	Select one of the modes below: JAZZ: Gives a feeling of a live atmosphere. Good for acoustic music. ROCK: Gives a heavy sound. Both high and low frequencies are boosted. MUSICAL: Enhances the mid-frequency range, which the human voice is mostly made up of. COUNTRY: Enhance the high-frequency range so that instruments such the violin and banjo are emphasized.
OFF	No preset SEA mode is applied. (See below)

To cancel the preset SEA mode, select "OFF" in step 2 above. The SEA indicator goes off from the display.

Switching to a Broadcast Program of Your Choice Temporarily

Another convenient RDS service is called "EON (Enhanced Other Network)." This allows the receiver to switch temporarily to a broadcast program of your choice (NEWS, T.A. and/or INFO) from a different station except in the following cases:

- When you are listening to a non-RDS stations (all AM (MW/LW) and some FM stations).
- When the last received FM station is a non-RDS station.

On the front panel only:

- Press **EON** so that the last selected program type appears on the display.
- Press **TA/NEWS/INFO** until the program type you want appears on the display. Each time you press the button, the display changes to show the following. The receiver enters EON standby mode.

TA: Traffic Announcement in your area.
NEWS: News.
INFO: Programs on medical service, weather forecast, etc.

CASE 1 If there is no station broadcasting the program you have selected

The receiver continues playing the current source.

When a station starts broadcasting the program you have selected, the receiver automatically switches to the station. The indicator of received PTY code starts flashing.

When the program is over, the receiver goes back to the previously selected source, but still remains in EON standby mode.

CASE 2 If there is a station broadcasting the program you have selected

The receiver stops playing the current source, and tunes in the program. The indicator of received PTY code starts flashing.

When the program is over, the receiver goes back to the previously selected source, but still remains in EON standby mode.

To stop listening to the program selected by EON:
 Press **EON** until the program type (TA/NEWS/INFO) goes off from the display. The receiver enters EON off mode and goes back to the previously selected source.
 Each time you press **EON**, the EON mode alternates between standby mode and off mode.

Notes:

- In EON standby mode, if you change the source to AM (MW/LW) or if you carry out synchronized recording (see page 31), EON standby mode is canceled temporarily. The receiver goes back to EON standby mode again when you have finished that operation.
- While listening to a program tuned in by the EON function, you can only use **STANDBY/ON** (1), **EON**, and **DISPLAY MODE** on the front panel or **AUDIO** and **DISPLAY** on the remote control.
- When the receiver is turned off (into standby mode), the EON function is also turned off.

CAUTION:

When the source alternates intermittently between the station tuned in by the EON function and the currently selected source, press **EON** to cancel the EON function. This is not a malfunction of the receiver.

Using the Surround Processor

The built-in surround processor provides three types of surround programs — Dolby Pro Logic, Dolby 3-Channel Logic, and JVC's Hall Surround.

What is surround?

The sound heard in a concert hall or a movie theater consists of direct sound and indirect sound: early reflections and reflections from behind. The reflected sounds are always delayed by the distances of the ceiling and walls from the listener. These reflections are some of the most important elements of the acoustic surround.

On JVC's Hall Surround

In order to reproduce a more realistic sound field in your listening room while playing an ordinary stereo source, JVC's Hall Surround has been designed to give you clear vocals and to create the feeling of a concert hall. The sound is reproduced through the front speakers and rear speakers.

On Dolby Surround

Dolby Surround has been also developed to reproduce the important elements of the acoustic surround at home. To watch the soundtracks of video software bearing the mark **DOLBY SURROUND** * which includes the same encoded surround information as found in Dolby Stereo films, the receiver can provide you with 2 Dolby Surround programs (Dolby Pro Logic and Dolby 3ch Logic). **Dolby Pro Logic:** Select this mode when the optional rear speakers are connected (as well as a center speaker). **Dolby 3ch Logic:** Select this mode when a center speaker is connected without rear speakers.

Notes:

- The surround processor has no effect on monaural sources.
- The surround processor cannot be used for recording.

Using JVC's Hall Surround

You need to connect one set of rear speakers to obtain the full effect. Once you have adjusted the Hall Surround, the receiver memorizes the settings.

On the front panel:

1. Press **SURROUND** so that the Control $\Delta / \nabla / \triangleleft / \triangleright$ buttons work for selecting the surround modes. The lamp above the button lights up.
2. Press Control Δ / ∇ until "HALL" appears on the display. The HALL indicator also lights up on the display. Each time you press the button, the surround modes change as follows:
 PROLOGIC \longleftrightarrow 3CHLOGIC \longleftrightarrow HALL \longleftrightarrow OFF

The indicator of the selected surround mode lights up in turn as you select the surround modes.

From the remote control:

1. Press **SEA ON/OFF** so that the SEA indicator lights up on the display. The previously selected mode is recalled (at its previous effect level) and is shown on the display. Each time you press the button, the preset SEA mode turns on and off.

Note: When selecting the preset SEA mode, the display will show the current effect level of the preset SEA mode selected.

2. Press **AUDIO CONTROL** so that 10 keys work for adjusting the sound.

3. Press **SEA MODE** until the mode you want appears on the display.

Each time you press the button, the three preset SEA modes change as follows:

Ex. $\boxed{\text{MOVIE 1} \rightarrow \text{SPORTS2} \rightarrow \text{JAZZ 2}}$

4. Press **PRESET** to select the effect level.

Each time you press the button, the effect level changes as follows:

When "MOVIE" is selected:

$\boxed{\text{MOVIE 1} \rightarrow \text{MOVIE 2} \rightarrow \text{MOVIE 3}}$

When "SPORTS" is selected:

$\boxed{\text{SPORTS1} \rightarrow \text{SPORTS2} \rightarrow \text{SPORTS3}}$

When "MUSIC" is selected:

$\boxed{\text{JAZZ 1} \rightarrow \text{JAZZ 2} \rightarrow \text{ROCK 1} \rightarrow \text{ROCK 2} \rightarrow \text{COUNTRY2} \rightarrow \text{COUNTRY1} \rightarrow \text{MUSICAL2} \rightarrow \text{MUSICAL1}}$

To cancel the preset SEA mode, press **SEA ON/OFF** so that the SEA indicator goes off from the display.

Each time you press the button, the preset SEA mode turns on and off.

Speaker arrangements for Dolby Surround

The following illustrations show how to obtain the optimum sound environment for various Dolby Surround settings. Try to find the speaker direction and location to create the optimum sound field.

CASE 1

When you have added a center speaker and rear speakers

In this case:
 1. Select "PROLOGIC."
 2. Select "NORMAL" or "WIDE" for center mode.
 See pages 27 to 29 for more details.

CASE 2

When you have added rear speakers (without a center speaker)

In this case:
 1. Select "PROLOGIC."
 2. Select "PHANTOM" for center mode.
 See pages 27 to 29 for more details.

CASE 3

When you have added a center speaker (without rear speakers)

In this case:
 1. Select "3CHLOGIC."
 2. Select "NORMAL" or "WIDE" for center mode.
 See pages 27 to 29 for more details.

3. Press **ADJUST** so that the Control $\Delta / \nabla / \triangleleft / \triangleright$ buttons work for surround settings. The lamp above the button lights up.

4. Press Control Δ / ∇ until "**REAR +**" appears on the display.

5. Press Control $\triangleleft / \triangleright$ to adjust the rear speaker output level.
 • Pressing Control \triangleleft decreases the output level up to -10 dB.
 • Pressing Control \triangleright increases the output level up to +10 dB.

6. Press Control Δ / ∇ until "**DELAY +**" appears on the display.

7. Press Control $\triangleleft / \triangleright$ to adjust the delay time of the rear speaker output. Each time you press the button, the delay time changes as follows:

→ DELAY 1 → DELAY 2 → DELAY 3 →

DELAY 1	Select this when the distance from you to your rear speakers is greater than that to the front speakers.
DELAY 2	Select this when the distance from you to your rear speakers is almost equal to that to the front speakers.
DELAY 3	Select this when the distance from you to your rear speakers is less than that to the front speakers.

To cancel the Hall surround, select "OFF" in step 2. The HALL indicator goes off.

From the remote control:

1. Press **SURROUND ON/OFF** so that one of the surround mode indicators (PRO LOGIC, 3CH LOGIC, HALL) lights up on the display. The previous mode is recalled (at its previous settings) and is shown on the display. Each time you press the button, the surround mode turns on and off.

2. Press **AUDIO CONTROL** so that 10 keys work for adjusting the sound.

3. Press **SURR MODE** until "HALL" appears on the display. The HALL indicator also lights up on the display. Each time you press the button, the surround modes change as follows:

→ PROLOGIC → 3CHLOGIC → HALL →

The indicator of the selected surround mode lights up in turn as you select the surround modes.

4. Press **REAR +/-** to adjust the rear speaker output level.
 • Pressing **REAR -** decreases the output level up to -10 dB.
 • Pressing **REAR +** increases the output level up to +10 dB.

5. Press **DELAY** to adjust the delay time. Each time you press the button, the delay time changes as follows:

→ DELAY 1 → DELAY 2 → DELAY 3 →

To cancel the Hall Surround, press **SURROUND ON/OFF** so that the HALL indicator goes off. Each time you press the button, the surround mode turns on and off.

Preparing for Dolby Surround

The receiver memorizes two sets of Dolby Surround adjustments; one for Pro Logic and the other for 3ch Logic.

On the front panel:

1. Press SURROUND so that the Control Δ / ∇ buttons work for selecting the surround modes. The lamp above the button lights up.

2. Press Control Δ / ∇ until "PROLOGIC" or "3CHLOGIC" whichever you want appears on the display.

The PRO LOGIC or 3CH LOGIC indicator also lights up. Each time you press the button, the surround modes change as follows:

The indicator of the selected surround mode lights up in turn as you select the surround modes.

PROLOGIC	Select this mode when you use a center speaker and rear speakers.
3CHLOGIC	Select this mode when you use a center speaker without rear speakers.
HALL	This is JVC's original surround mode, and is different from Dolby Surround. To use this, see page 24.
OFF	Select this to turn off the surround mode.

3. Press ADJUST so that the Control $\Delta / \nabla / \triangleleft / \triangleright$ buttons work for adjusting the selected surround mode. The lamp above the button lights up.

4. Press Control Δ / ∇ until "CNT MODE" (Center Mode) appears on the display.

5. Press Control $\triangleleft / \triangleright$ to select the center mode.

Each time you press the button, the center modes change as follows:

WIDE	Select this mode when the center speaker can reproduce the bass better than the front speakers. All signals of the center channel are output through the center speaker.
NORMAL	Select this mode when the center speaker cannot reproduce the bass better than the front speakers. The bass portions of the center channel signals are output through the front speakers.
PHANTOM	Select this mode when you do not use a center speaker. The center speaker channel signals are output through the front speakers.
OFF	Select this mode to turn off the center speaker channel.

Notes:

- If you have already set the center speaker size following the procedure described on page 14, you do not have to select the center mode in this procedure.
- When you have selected "3CHLOGIC," you cannot select "PHANTOM."

6. Press Control Δ / ∇ until "--DELAY +--" appears on the display.

7. Press Control $\triangleleft / \triangleright$ to adjust the delay time of the rear speaker output. Each time you press the button, the delay time changes as follows:

DELAY 1	Select this when the distance from you to your rear speakers is greater than that to the front speakers.
DELAY 2	Select this when the distance from you to your rear speakers is almost equal to that to the front speakers.
DELAY 3	Select this when the distance from you to your rear speakers is less than that to the front speakers.

Note:

- When you have selected "3CHLOGIC," you cannot adjust the delay time.

8. Press Control Δ / ∇ until "TEST" appears on the display, then press Control $\triangleleft / \triangleright$ to start checking the speaker output balance.

"TEST" starts flashing on the display, and a test tone comes out of the speakers in the following order:

Notes:

- No test tone comes out of the rear speakers when you have selected "3CHLOGIC."
- No test tone comes out of the center speaker when you select "PHANTOM" or "OFF" for the center mode.

9. If necessary, adjust the speaker output balance as follows:

- To adjust the rear speaker output level, press Control Δ / ∇ until "--REAR +--" appears on the display, then press Control $\triangleleft / \triangleright$.
- To adjust the center speaker output level, press Control Δ / ∇ until "--CENTER+--" appears on the display, then press Control $\triangleleft / \triangleright$.

Notes:

- The sound levels of the left and right rear speakers will be the same.
- You cannot set the sound level of the rear speakers when you have selected "3CHLOGIC."
- You cannot set the sound level of the center speaker when you select "PHANTOM" or "OFF" for the center mode.

10. Press Control Δ / ∇ until "TEST" appears on the display, then press Control $\triangleleft / \triangleright$ to stop the test tone.

Using Dolby Surround

From the remote control:
If you have already set the center speaker size following the procedure described on page 14, you can use the remote control for Dolby Surround preparation.

1. Press **SURROUND ON/OFF** so that one of the surround mode indicators (**PRO LOGIC**, **3CH LOGIC**, **HALL**) lights up on the display.
The previous mode is recalled (at its previous settings) and is shown on the display.
Each time you press the button, the surround mode turns on and off.

2. Press **AUDIO CONTROL** so that 10 keys work for adjusting the sound.

3. Press **SURR MODE** until "PROLOGIC" or "3CHLOGIC" whichever you want appears on the display.
Each time you press the button, the surround modes change as follows:

The indicator of the selected surround mode lights up in turn as you select the surround modes.

4. Press **DELAY** to adjust the delay time of the rear speaker output.
Each time you press the button, the delay time changes as follows:

Note:
When you have selected "3CHLOGIC", you cannot adjust the delay time.

5. Press **TEST** to start checking the speaker output balance.
"TEST" starts flashing on the display, and a test tone comes out from the speakers in the following order:

- Notes:**
- No test tone comes out of the rear speakers when you have selected "3CHLOGIC."
 - No test tone comes out of the center speaker when you select "PHANTOM" or "OFF" for the center mode.

6. If necessary, adjust the speaker output balance as follows:

To adjust the rear speaker output level, press **REAR +/-**.
To adjust the center speaker output level, press **CENTER +/-**.
Pressing - decreases the output level up to -10 dB.
Pressing + increases the output level up to +10 dB.

- Notes:**
- The sound levels of the left and right rear speakers will be the same.
 - You cannot set the sound level of the rear speakers when you have selected "3CHLOGIC."
 - You cannot set the sound level of the center speaker when you select "PHANTOM" or "OFF" for the center mode.

7. Press **TEST** again to stop the test tone.

Once you have set the Dolby Surround adjustments you can use the same adjustments every time you want to enjoy Dolby Surround.

On the front panel:

1. Press **SURROUND** so that the Control Δ / ∇ buttons work for selecting the surround modes.
The lamp above the button lights up.

2. Press Control Δ / ∇ until "PROLOGIC" or "3CHLOGIC" whichever you want appears on the display.
The PRO LOGIC or 3CH LOGIC indicator also lights up.

Each time you press the button, the surround modes change as follows:

The indicator of the selected surround mode lights up in turn as you select the surround modes.

3. Select and play a sound source which was processed with Dolby Surround and is labeled with **DOLBY SURROUND** mark.

To cancel Dolby Surround, select "OFF" in step 2 above. The indicator of the selected mode goes off.

From the remote control:

1. Press **SURROUND ON/OFF** so that one of the surround mode indicators (**PRO LOGIC**, **3CH LOGIC**, **HALL**) lights up on the display.
The previous mode is recalled (at its previous settings) and is shown on the display.
Each time you press the button, the surround mode turns on and off.

2. Press **AUDIO CONTROL** so that 10 keys work for adjusting the sound.

3. If necessary, press **SURR MODE** until "PROLOGIC" or "3CHLOGIC" whichever you want appears on the display.
Each time you press the button, the surround modes change as follows:

The indicator of the selected surround mode lights up in turn as you select the surround modes.

4. Select and play a sound source which was processed with Dolby Surround and is labeled with **DOLBY SURROUND** mark.

To cancel Dolby Surround, press **SURROUND ON/OFF** so that the indicator of the selected mode goes off.
Each time you press the button, the surround mode turns on and off.

COMPU LINK Remote Control System

The COMPU LINK remote control system allows you to operate JVC audio components through the remote sensor on the receiver.
To use this remote control system, you need to connect JVC audio components through the COMPU LINK-3 SYNCHRO jacks with the cables (monaural mini-plug supplied with those components):

This remote control system allows you to use the (four) functions listed below.

Remote Control through the Remote Sensor on the Receiver

You can control JVC audio components through the remote sensor on the receiver using this remote control. Aim the remote control directly at the remote sensor on the receiver. For details, see page 32.

Notes:

- Without connecting the audio components with RCA pin plugs as described on page 7, the COMPU LINK remote control system cannot operate the components.
- Refer also to the manuals supplied with your audio components.

Automatic Source Selection

When you press the play (▶) button on a connected component or on its own remote control, the receiver automatically turns on and changes its source to the component. On the other hand, if you select a new source on the receiver or the remote control, the selected component begins playing immediately. In both cases, the previously selected source continues playing without sound for a few seconds.

Automatic Power On/Off (Standby) (only possible with the COMPU LINK-3 connection)

Both the CD player and cassette deck turn on and off (into standby mode) with the receiver. When you turn on the receiver, the CD player or cassette deck will turn on automatically, depending which component has been previously selected. When you turn off the receiver (into standby mode), both the CD player and cassette deck will turn off (into standby mode).

Synchronized Recording

Synchronized recording means the cassette deck starts recording as soon as a CD or record begins playing.

To use synchronized recording, follow these steps:

- Put a tape in the cassette deck, and a disc in the CD player (or a record on the turntable).
- Press the record (●) button and the pause (⏸) button on the cassette deck at the same time. This puts the cassette deck into recording pause.

Note:

If you do not press the record (●) button and pause (⏸) button at the same time, the synchronized recording feature will not operate.

Press the play (▶) button on the CD player or on the turntable.

The source changes on the receiver, and as soon as play starts, the cassette deck starts recording. When the play ends, the cassette deck enters recording pause, and stops 4 seconds later.

Notes:

- During synchronized recording, the selected source cannot be changed.
- If your CD player is playing in program mode, a 4-second blank is recorded between tracks so that the music scan feature of your cassette deck can be used on the recorded tape.
- If the power of any component is shut off during synchronized recording, the COMPU LINK remote control system may not operate properly. In this case, you must start again from the beginning.
- Refer also to the manuals supplied with your CD player and cassette deck.

Using the Remote Control

You can operate JVC audio and video components with the receiver's remote control, since control signals for JVC components are present in the remote control.
To operate these components with the remote control, first select a source with the source buttons on the remote control. Then, operate that source using the remote control.

IMPORTANT:

- To operate JVC audio components using this remote control.
- You need to connect JVC audio components through the COMPU LINK-3 SYNCHRO jacks (see page 8) in addition to the connections using cables with RCA pin plugs (see page 7).
- Aim the remote control directly at the remote sensor on the receiver.

After pressing FM/AM, you can perform the following operations:

- FM/AM**
 - Alternates between FM and AM (MW/LW)
 - Selects a preset channel number directly
 - For channel number 5, press 5.
 - For channel number 15, press +10, then 5.
 - For channel number 20, press +10, then 10.
 - For channel number 30, press +10, +10 then 10.

RDS operating buttons Starts and ends searching a broadcast using the RDS.

- PTY, SEARCH** Selects a program type.
- PTY, SELECT +/-** Changes the RDS display mode.

After pressing CD, you can perform the following operations on a CD player:

- ▶** Starts playing
- ◀▶** Returns to the beginning of the current (or previous) track
- ▶▶** Skips to the beginning of the next track
- Stops playing
- ⏸** Pauses. To resume playing, press ▶.
- ▶** Selects a track number directly
- 1-10, +10**
 - For track number 5, press 5.
 - For track number 15, press +10, then 5.
 - For track number 20, press +10, then 10.
 - For track number 30, press +10, +10, then 10.

After pressing CD-DISC, you can perform the following operations on a CD player-changer:

- 1-6, 7p** Select the number of a disc installed in a CD player-changer. Then continue to operate the CD player as described above.

After pressing TAPE, you can perform the following operations on a cassette deck:

- ▶** Starts playback
- ▶▶** Fast winds a tape from right to left
- ▶▶▶** Fast winds a tape from left to right
- Stops operation
- ⏸** Pauses. To resume playing, press ▶.

Troubleshooting

IMPORTANT:
 To operate JVC video components using this remote control:
 • Aim the remote control directly at the remote sensor on the VCR or TV, not on the receiver.

After pressing VCR, you can perform the following operations on a VCR:

- ▶ Starts playback
 - ◀ Rewinds a video tape
 - ▶ Fast winds a video tape
 - ▶ Stops operation
 - ▬ Pauses. To resume playing, press ▶.
 - CH+/- Changes channels on a VCR
- Without pressing VCR, you can always perform the following:
 VCR (in the Ⓞ/1 (Standby/On) section)
 Turns on/off the VCR

After pressing TV (in the TV CONTROL section), you can perform the following operations on TV:

- CH+/- Changes TV channels
- Without pressing TV (in the TV CONTROL section), you can always perform the following:
 TV/VIDEO Sets input mode (either to TV or to VIDEO)
 VOLUME +/- (in the TV CONTROL section)
 TV (in the Ⓞ/1 (Standby/On) section)
 Turns on/off the TV

Use this chart to help you solve daily operational problems. If there is any problem you cannot solve, contact your JVC service center.

PROBLEM	POSSIBLE CAUSE	SOLUTION
The display does not light up	The power cord is not plugged in or the Ⓞ POWER switch is pressed to set in the ■ OFF position	Plug the power cord into an AC outlet and press Ⓞ POWER to set it in the ■ ON position
No sound from speakers	Speaker signal cables are not connected The SPEAKERS 1 and 2 are not set correctly	Check speaker wiring and reconnect if necessary Press SPEAKERS 1 and 2 correctly
Sound from one speaker only	An incorrect source is selected Speaker signal cables are not connected properly	Select the correct source Check speaker wiring and reconnect if necessary
Continuous hiss or buzzing during FM reception	The balance is set to one extreme Incoming signal is too weak The station is too far away An incorrect antenna is used Antennas are not connected properly	Adjust the balance properly (see page 13) Connect an outside FM antenna or contact your dealer Select a new station Check with your dealer to be sure you have the correct antenna Check connections
Occasional cracking noise during FM reception	Ignition noise from automobiles	Move the antenna farther from automobile traffic
Howling during record playing	Your turntable is too close to speakers	Move speakers away from the turntable
Remote control does not work	There is an obstruction in front of the remote sensor on the receiver Batteries are weak	Remove the obstruction Replace batteries

Specifications

Amplifier

Output Power	At Stereo Operation Front Channels	55 watts per channel, min. RMS, driven into 4 ohms at 1 kHz with no more than 0.9% total harmonic distortion. (IEC268-3/DIN)
		30 watts per channel, min. RMS, driven into 8 ohms at 1 kHz with no more than 0.9% total harmonic distortion. (IEC268-3/DIN)
		30 watts per channel, min. RMS, driven into 8 ohms, 40 Hz to 20 kHz, with no more than 0.8% total harmonic distortion.
	At Surround Operation Front Channels	50 watts per channel, min. RMS, driven into 8 ohms at 1 kHz with no more than 0.8% total harmonic distortion.
	Center Channel	50 watts, min. RMS, driven into 8 ohms at 1 kHz, with no more than 0.8% total harmonic distortion.
	Rear Channels	50 watts per channel, min. RMS, driven into 8 ohms at 1 kHz, with no more than 0.8% total harmonic distortion.
Total Harmonic Distortion (8 ohms, 1 kHz)		0.8%* at 30 watts output (* Measured by JVC Audio Analysis System)
Frequency Response (8 ohms)	PHONO CD, TAPE, VCR, VIDEO	20 Hz to 20 kHz (±1 dB) 20 Hz to 20 kHz (±1 dB)
Audio Input Sensitivity/ Impedance (1 kHz)	PHONO (MM) CD, TAPE, VCR, VIDEO	2.5 mV/47 k ohms 200 mV/47 k ohms
Audio Output Level	TAPE, VCR	200 mV
Signal-to-Noise Ratio (*66 IHF/DIN)	PHONO CD, TAPE, VCR, VIDEO	70 dB/66 dB 87 dB/67 dB
RIAA Phono Equalization		
Loudness (Volume Control at -40 dB)		
Video Input Sensitivity/ Impedance	VCR, VIDEO	±0.5 dB (20 Hz to 20 kHz) +5 ± 2 dB at 100 Hz
Video Output Level	VCR, MONITOR OUT	1 Vp-p/75 ohms
Synchronization		1 Vp-p (at 1 Vp-p input) negative
Signal-to-Noise Ratio		45 dB

FM tuner (IHF)

Tuning Range	87.5 MHz to 108.0 MHz
Usable Sensitivity	12.7 dBf (1.2 µV/75 ohms)
50 dB Quieting Sensitivity	16.3 dBf (1.8 µV/75 ohms) 38.3 dBf (22.5 µV/75 ohms)
Signal-to-Noise Ratio (IHF-A weighted)	80 dB at 85 dBf 73 dB at 85 dBf
Total Harmonic Distortion	0.15 % at 1 kHz 0.2 % at 1 kHz
Stereo Separation at REC OUT	40 dB at 1 kHz
Capture Ratio	1.5 dB (10 mV)
Alternate Channel Selectivity	60 dB: (±400 kHz)
Frequency Response	30 Hz to 15 kHz: (+0.5 dB, -3 dB)

AM (MW/LW) tuner

Tuning Range	MW: LW:	522 kHz to 1,629 kHz 144 kHz to 288 kHz
Usable Sensitivity	MW: Loop antenna External antenna LW: Loop antenna	300 µV/m 30 µV 600 µV/m
Signal-to-Noise Ratio		50 dB (100 mV/m)

General

Power Requirements	AC 230V, 50 Hz
Power Consumption	240 watts 5 watts (in standby mode)
Dimensions (W x H x D)	435 x 146 x 403 mm (17 1/16 x 5 7/8 x 15 7/16 inches)
Mass	8.0 kg (17.7 lbs)

3. Description

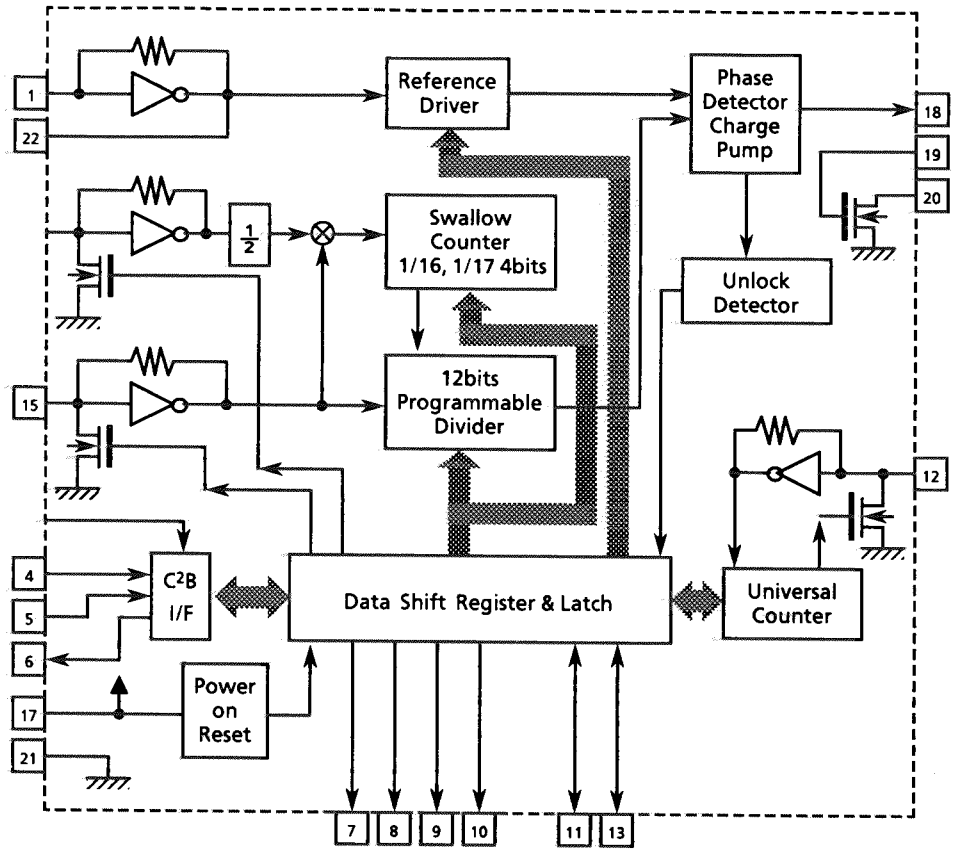

Pin No.	Symbol	I/O	Function	Pin No.	Symbol	I/O	Function
1,2	IN1,IN2	I	JOG VOL. control	53	CK	O	Clock signal to IC121
3	VIDEO1	O	Video select signal	54	DI	I	Data signal for IC121
4	VIDEO2	O	Video select signal	55	DO	O	Data signal to IC121
5	STD.1	O	STAND-BY indication control	56	DCSI	I	COMPULINK signal input
6	STB 3	O	Load strobe signal to IC202	57	DCSO	O	COMPULINK signal output
7~10	KI0~KI3	I	Key matrix in	58	STB2	O	Load strobe signal to IC201
11	VCR S/C	I	VCR S/C select signal	59	POWER	O	POWER ON/OFF control
12~14	G11~G9	O	Grid control signal	60	SURR	O	SURROUND ON/OFF control
15	G8/KO0	O	Grid control signal (Key matrix out)	61	STB5	O	Load strobe signal to IC641
16	G7/KO1	O	Grid control signal (Key matrix out)	62	T.MUTE	O	Tuner mute signal output
17	G6/KO2	O	Grid control signal (Key matrix out)	63	S.MUTE	O	SORCE muteing control
18	G5/KO3	O	Grid control signal (Key matrix out)	64	TV.CONT.	--	Pull down
19	G4	O	Grid control signal	65	TV OUT	--	Pull down
20	G3/KO5	O	Grid control signal (Key matrix out)	66	VCR OUT	--	Pull down
21	G2/KO6	O	Grid control signal (Key matrix out)	67	VCR IN	--	Pull down
22	G1/KO7	O	Grid control signal (Key matrix out)	68	RESTE IN	I	Reset signal input
23	V _{pp}	--	Power supply for FL display	69	X1	--	Connect to GND
24~39	S1~S16	O	Segment control signal	70	X2	--	Not used
40	STB1	O	Load strobe signal to IC321	71	V _{SS}	--	Connect to GND
41	CLK	O	Clock signal to IC201,202,252,321,601,641	72	OSC2	--	Oscillation terminal
42	STB4	O	Load strobe signal to IC252	73	OSC1	--	Oscillation terminal
43	DATA	O	Data signal to IC201,202,252,321,601,641	74	VDD	--	Power supply
44	INH	I	Inhibit signal input	75	SET.I	O	SETTING indication control
45	RDS CLK	O	Clock signal to IC191	76	ADJ.I	O	ADJUST indication control
46	RDS DATA	I	Data signal for IC191	77	SURR.I	O	SURROUND indication control
47	RDS RESET	O	Reset signal to IC191	78	SOURCE.I	O	SORCE indication control
48	RM	I	Remocon signal for IC402	79	SEA.I	O	SEA indication control
49	D-START	I	Data start signal for IC191	80	BAND.I	O	TUNER BAND indication control
50	STEREO	I	STEREO signal input	81	MUSIC.I	--	Pull up
51	TUNED	I	Tunig signal input	82	SPORTS.I	--	Pull up
52	CE	O	chip enable to IC121	83	MOVIE.I	--	Pull up
				84	ONE/I	O	ONE TOUCH OP. indication control

■ LC72131 (IC102) : PLL Synthesizer

1. Terminal Layout

XIN	1	22	XOUT
	2	21	VSS
PLLCE	3	20	LPF OUT
PLLDA	4	19	LPF IN
PLLCK	5	18	PD
IFDATA	6	17	VDD
FM	7	16	FM OSC
MW	8	15	AM OSC
LW	9	14	
AUTO/MONO	10	13	IF REQ
POWER	11	12	FM/AM IF

2. Block Diagram

3. Pin Functions

Pin No.	Symbol	I/O	Functions	Pin No.	Symbol	I/O	Functions
1	X in	I	Crystal oscillator (7.2MHz).	12	FM/AM IF	I	Universal counter input
2		--	Not use	13	IF REQ	O	Output the "IF-signal request" to IC102
3	PLLCE	I	Fix the chip enable to "H" when inputting(DI) and outputting (DO) the serial data	14		I	Not use
4	PLLDA	I	Receive the control data from the controller (IC201).	15	AMOSC	I	Input the local oscillator signal of AM.
5	PLLCK	I	This clock is used to synchronize data when transmitting the data of DI and DO.	16	FM OSC	I	Input the local oscillator signal of FM.
6	IFDATA	O	Transmit the data from LC72131 to the controller which is synchronized with CK.	17	VDD	O	This is a terminal of power supply.
7	FM	O	It is "L" on FM mode.	18	PD	O	PLL charge pump output : When the local oscillator signal frequency is higher than the reference frequency high level signals will output. When it is lower than the reference frequency, low level signals will output. When it is same as reference frequency signals, it will be floating.
8	MW	O	It is "L" on MW mode.	19	LPF IN	I	Transistor used for the PLL active low-pass filter
9	LW	O	It is "L" on LW mode.	20	LPF OUT	O	Transistor used for the PLL active low-pass filter
10	AUTO/MONO	O	It is "L" on monaural, "H" on auto.	21	VSS	--	Connected to GND
11	POWER	O	Regulator control signal PON "H", STANDBY "L"	22	X out	O	Crystal oscillator (7.2MHz).

LA1837 (IC102) : FM AM IF AMP & detector, FM MPX Decoder

1. Block Diagram

3. Pin Function

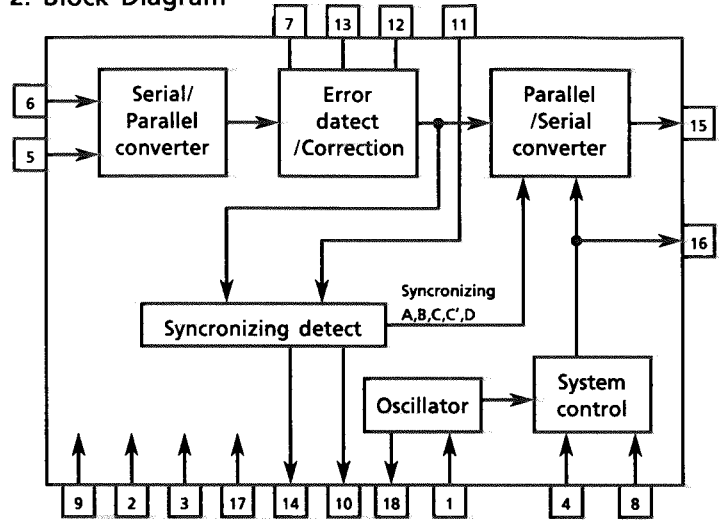

Pin No.	Symbol	I/O	Function	Pin No.	Symbol	I/O	Function
1	FM IN	I	This is an input terminal of FM IF Signal.	16	L OUT	O	Left channel signal output.
2	AM MIX	O	This is an output terminal for AM mixer.	17	R OUT	O	Right channel signal output
3	FM IF	I	Bypass of FM IF	18	L IN	I	Input terminal of the Left channel post AMP.
4	AM IF	I	Input of AM IF Signal.	19	R IN	I	Input terminal of the Right channel post AMP.
5	GND	-	This is the device ground terminal.	20	RO	O	Mpx Right channel signal output.
6	TUNED	O	When the set is tuning , this terminal becomes "L".	21	LO	O	Mpx Left channel signal output.
7	STEREO	O	Stereo indicator output. Stereo : "L", Mono : "H"	22	IF IN	I	Mpx input terminal.
8	VCC	-	This is the power supply terminal.	23	FM OUT	O	FM detection output.
9	FM DET	-	FM detect transformer.	24	AM DET	O	AM detection output.
10	AM SD	-	This is a terminal of AM ceramic filter.	25	AM AGC	I	This is an AGC voltage input terminal for AM.
11	FM VSM	O	Adjust FM SD sensitivity.	26	AFC	-	This is an output terminal of voltage for FM-AFC.
12	AM VSM	O	Adjust AM SD sensitivity.	27	AM RF	I	AM RF signal input.
13	MUTE	I/O	When the signal of IF REQ of IC121(LC72131) appear, the signal of FM/AM IF output. //Muting control input.	28	REG	O	Register value between pin26 and pin28 desides the frequency width of the input signal.
14	FM/AM	I	Change over the FM / AM input. "H" : FM, "L" : AM	29	AM OSC	-	This is a terminal of AM Local oscillation circuit.
15	MONO/ST	O	Stereo : "H", Mono : "L"	30	OSC BUFFER	O	AM Local oscillation Signal output.

■ LC7073M (IC191) : Radio Data System

1. Terminal Layout

2. Block Diagram

3. Pin Functions

Pin No.	Symbol	I/O	Function	Pin No.	Symbol	I/O	Function
1	OSC1	I	Oscillation terminal	10	RECEIVE	—	Non connection
2	GND	—	GND	11	GND	—	GND
3	GND	—	GND	12	CORRECTION	—	Non connection
4	RES	I	Reset input	13	ERRDR	—	Non connection
5	CLOCK IN	I	RDS clock input	14	DATA START	O	Data start signal for block data to output serial data
6	DATA IN	I	RDS data input	15	DATA OUT	O	Serial data output
7	CORR.SEL	I	Non connection	16	CLOCK OUT	O	Data output of serial data output
8	GND	—	GND	17	GND	—	GND
9	VDD	—	Power supply	18	OSC2	O	Oscillation terminal

■ SAA6579T (IC192) : Radio data system demodulator

1. Terminal Layout

QUAL	1	16	CL
DA	2	15	T57
Vref	3	14	X2
MUX	4	13	X1
V _{DD}	5	12	V _{DD}
GND	6	11	GND
CIN	7	10	GND
OUT	8	9	GND

2. Pin Function

Pin No.	Symbol	I/O	Function
1	QUAL	—	Non connection
2	DA	O	RDS data output
3	Vref	O	Reference voltage output
4	MUX	I	Multiplex signal input
5	V _{DD}	—	+5V supply voltage for analog part
6	GND	—	Ground for analog part (0V)
7	CIN	I	Subcarrier input to comparator
8	OUT	O	Subcarrier output of reconstruction filter
9	GND	—	Ground for digital part (0V)
10	GND	—	Ground for digital part (0V)
11	GND	—	Ground for digital part (0V)
12	V _{DD}	—	+5V supply voltage for digital part
13	X1	I	Oscillator input
14	X2	O	Oscillator output
15	T57	—	Non connection
16	CL	O	RDS clock output

3. Block Diagram

■ GP1U501X (IC402) : Receiver for remote controller

■ PST600E (IC403) : Reset IC

■ TA7317P (IC901) : PROTECTOR IC

(1) Terminal Layout

(2) Block Diagram

■ NJM2246D (IC671) : Video Switch

Control Signal—OutputSignal

CTL 1	CTL 2	Output
L	L	V IN 1
H	L	V IN 2
L/H	H	V IN 3

■ M5243P (IC551) : S.E.A. Graphic Equalizer

1. Functions

It makes inductive characteristic instead of coil.

2. Block Diagram

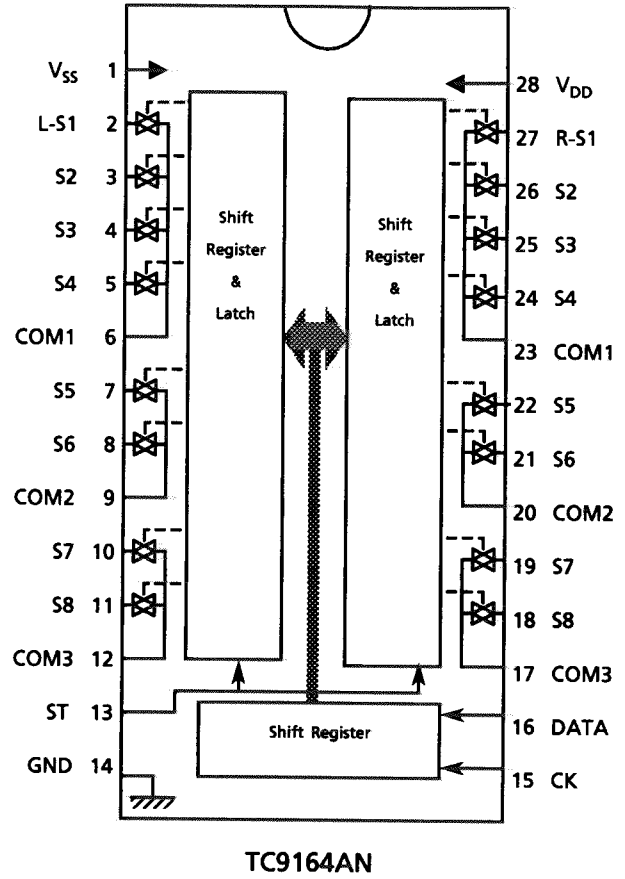

■ TC9163AN(IC252) , TC9164AN(IC321) : Analog Switch

1. Functions

These analog switches are controlled by 14 bit serial date from computer for selecting the source.

2. Terminal Layout & Block diagram

3. First 10bits are used to source select. Last 4bits are chip select. The switches (S1~S8) are connected to common terminals (COM1~COM3) according to the DATA from computer.

	Chip Select Bit			
	S11	S12	S13	S14
TC9163AN	1	0	0	0
TC9164AN	0	1	0	0

■ LA2786 (IC501) : Dolby Pro Logic Surround Signal Processor

1. Terminal Layout

2. Pin Functions

Pin No	Symbol	I/O	Functions	Pin No	Symbol	I/O	Functions
1	NS-BPF1	--	Capacitor for spectrum filter in noise sequencer	22	VCS-1	--	Capacitor for time constant (in log differential area)
2	NS-BPF2	--	Capacitor for spectrum filter in noise sequencer	23	VCS-2	--	Capacitor for time constant (in log differential area)
3	VREF	--	Analog reference voltage	24	VCS-TH	--	Capacitor for time constant (in log differential area)
4	S-DC-OUT	--	Capacitor for DC-cut Sch	25	L+R RECT	--	Capacitor for Center channel detection
5	C-DC-OUT	--	Capacitor for DC-cut Cch	26	DC-CUT	--	Capacitor for DC-cut at detection circuit
6	L-DC-OUT	--	Capacitor for DC-cut Lch	27	L-R RECT	--	Capacitor for Surround channel detection
7	R-DC-OUT	--	Capacitor for DC-cut Rch	28	DC-CUT	--	Capacitor for DC-cut at detection circuit
8	VREF-BUFFER	--	VREF low impedance	29	R-BPF3	--	LPF,HPF for Right channel control circuit
9	L-IN	I	Left channel signal input	30	R-BPF2	--	LPF,HPF for Right channel control circuit
10	R-IN	I	Right channel signal input	31	R-BPF1	--	LPF,HPF for Right channel control circuit
11	GND	--	Ground	32	C-TRIM DC-CUT	--	Capacitor for DC-cut Center channel
12	L-BPF1	--	LPF,HPF for Lch control circuit	33	C-MODE- CAP	--	Capacitor for Center channel output low-pass filter
13	L-BPF2	--	LPF,HPF Left channel control circuit	34	C-OUT	O	Center signal output
14	L-BPF3	--	LPF,HPF Left channel control circuit	35	S-OUT	O	Surround signal output
15	DC-CUT	--	Capacitor for DC-cut at detection circuit	36	R-OUT	O	Right channel signal output
16	R RECT	--	Capacitor for Right channel detection	37	L-OUT	O	Left channel signal output
17	DC-CUT	--	Capacitor for DC-cut at detection circuit	38	VCC	--	power supply
18	L RECT	--	Capacitor for Left channel detection	39	OSC	--	Oscillation for noise sequencer and auto balance
19	VLR-TH	--	Capacitor for time constant (in log differential area)	40	STB	I	Strobe signal input
20	VLR-2	--	Capacitor for time constant (in log differential area)	41	DATA	I	Serial interface data input
21	VLR-1	--	Capacitor for time constant (in log differential area)	42	CLK	I	Serial interface clock

■ LV1016 (IC541) : Dolby Surround Passive Decoder

1. Terminal Layout

2. Block Diagram

3. Pin Functions

Pin No.	Symbol	I/O	Functions
1	DGND	--	Digital GND
2	CLK	I	Serial interface clock
3	DATA	I	Serial interface data input
4	STB	I	Strobe signal input
5	NR-DET	--	Capacitor for noise reduction detection
6	NR-IREF	--	Resistor for noise reduction reference current
7	VCC	--	Supply
8	L-IN	I	Left channel signal input
9	R-IN	I	Right channel signal input
10	S-IN	I	Surround signal input
11	DELAY-OUT	--	Not used
12	DC-CUT	--	Capacitor for DC-cut
13	S-OUT	O	Surround signal output
14	VREF	--	Analog reference voltage
15	R-MIX-OUT	--	Not used
16	L-MIX-OUT	--	Not used
17	ADND	--	Analog ground
18	DC-CUT	--	Capacitor for DC-cut
19	D/A	--	Capacitor for integrator
20	NOISE SHAPER	--	Capacitor for noise shaper
21	A/D	--	Capacitor for integrator
22	VDD	--	Supply for the digital section
23	OSC	--	Oscillation terminal
24	OSC	--	Oscillation terminal

Disassembly Procedures

■ Top cover removal

1. Remove 4 screws (A) on both sides of the top cover and 3 screws (B) on the rear side.(FIG.1)
2. Lift the back of the top cover spreading both sides to remove.

FIG.1

■ Front panel assembly removal

1. Remove the top cover.
2. Remove 3 screws (K) on the bottom side and 3 screws (C) on the top side.(FIG.2,4)
3. Disconnect the wires CN304 and CN801. Disconnect the wire CN112.
4. Cut the tie bands on the tuner p.c.board and ENC-135-6. And cut the tie bands CN801 wires.
5. Remove 2 hooks on both sides of the front panel assembly.
6. Remove the front panel assembly.

FIG.2 Top side

■ Rear panel removal

1. Remove the top cover.
2. Remove 20 screws (F),(G),(H) and (I). (FIG.3)
3. Remove the power cord stopper up side.
4. Remove the rear panel.

FIG.3 Rear side

■ Video P.C.Board removal

1. Remove the top cover.
2. Remove 5 screws (D) and (F).(FIG.2,3)
3. Disconnect the connector CN601.
4. Remove the video P.C.Board(ENC-135-2).

■ Tuner P.C.Board removal

1. Remove the top cover.
2. Remove 2 screws (G).(FIG.3)
3. Disconnect the connector CN101. Disconnect the wire CN112.
4. Remove the tuner P.C.Board(ENA-178).

■ Main amp. P.C.Board with same P.C.Board and front panel assembly removal

1. Remove the top cover.
2. Cut the tie band bottom base left front side.
3. Remove 3 screws (L).(FIG.3)
4. Remove 4 screws (O).(FIG.4)
5. Remove 3 screws (U).(FIG.4)
6. Remove 6 screws (E).(FIG.2)
7. Lift the right side of the P.C.Board ass'y to remove the bottom base.

FIG.4 Bottom side

■ Front P.C. Board removal

1. Remove the top cover.
2. Remove the front panel assembly.
3. Remove the master volume knob and nut.
4. Remove 13 screws (M).(FIG.5)
5. Remove the front P.C. Board.

FIG.5 Front panel ass'y rear side

■ Power Transistor removal

1. Remove the top cover.
2. Remove the front panel assembly.
3. Remove the main amp. P.C.Board with same P.C.Board
4. Unsolder the broken transistor.
5. Remove the some screws (N) fastening it.(FIG.6)

FIG.6

ADJUSTMENT PROCEDURES

■ Tuner section

Tuning range

Area	Range		
	LW (kHz)	MW (kHz)	FM (MHz)
Continental Europe, the U.K	144~288	522~1629	87.5~108.0

(1) Tuning Voltage

Confirm the voltages in the table at TP101.

FM Tuning voltage (Unit : V)

Area	Frequency	
	87.5MHz	108MHz
All Area	1.6±1.0	8.0±2.0

AM Tuning voltage (Unit : V)

Area	Frequency (MW)		Frequency (LW)	
	522KHz	1629KHz	144kHz	288kHz
the U.K. , Continental Europe	>0.7	<7.9	0.5 <1.0	5.0 <7.5

(2) FM Center meter

Receive a broadcast by using the function of 'AUTO STOP'.

Adjust T141 (Detector coil) so that the voltage at TP102 becomes $0 \pm 1.5\text{mV}$.

■ Power Amplifier section

■ Idling current

- (1) Set the volume control to minimum during this adjustment.
* Set the surround mode "ON".
- (2) Turn VR741 and VR742 fully counterclockwise to warm up before adjustment.
If the heatsink is already warm from previous use the correct adjustment can not be made.
- (3) For L-ch, connect a DC voltmeter between TP001's pin1 and pin2 (Lch).
And, connect it between pin3 and pin4(Rch).
- (4) Appox. 30minutes later after power on, adjust VR741 for L-ch , or VR742 for R-ch so that the DC voltmeters value has 1mV~3mV.

The Marks for Designated Areas

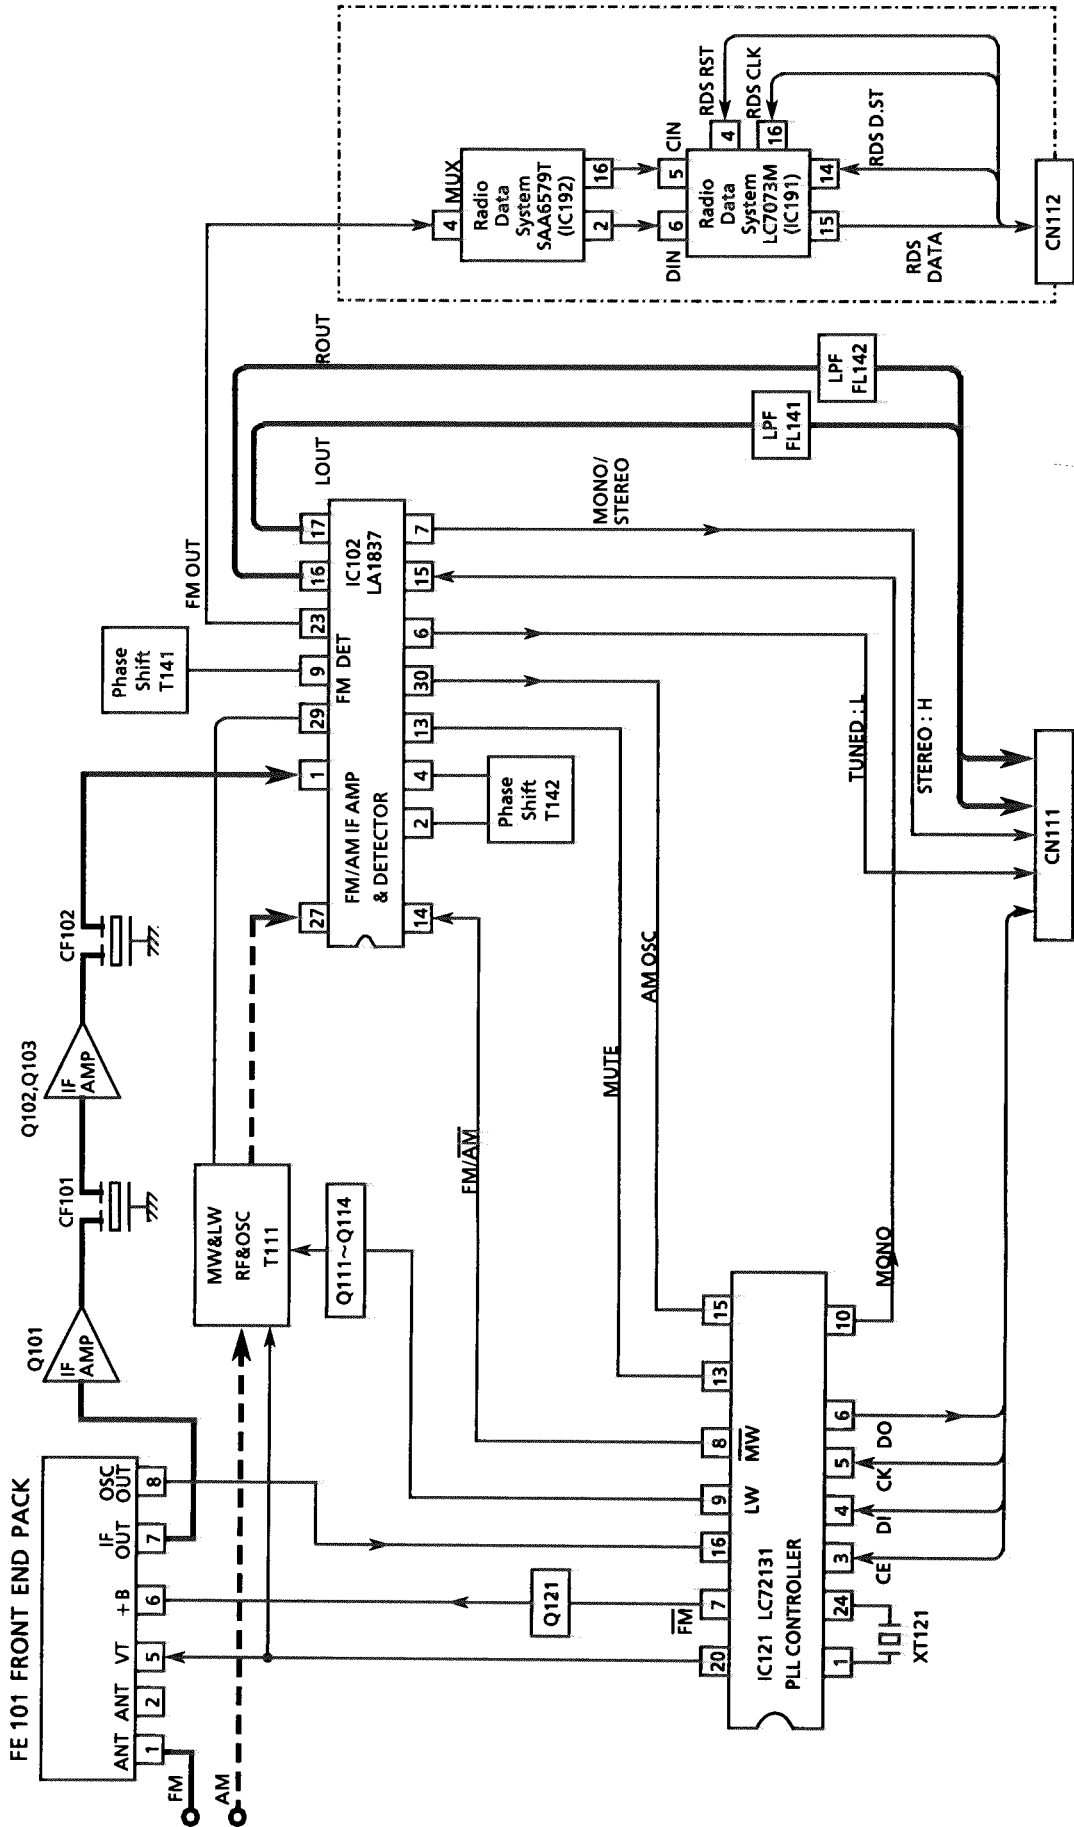

BS	the U.K.	EF	Continental Europe	EN ...	Nordic Countries
G	Germany				

No mark indicates all area.
