KENWOOD

MULTIPLE COMPACT DISC PLAYER

CD-2260M/DPF-J7010

INSTRUCTION MANUAL

KENWOOD CORPORATION

This unit is designed for home use only. If the unit is used in a location other than at home, such as in a shop (for commercial use), in a car or in a ship, etc., and is damaged, a service fee may be charged even during the warranty period.

This instruction manual is used for two models. Model availability and features (functions) may differ depending on the country and sales area.

About the DTS multi-channel audio format
The DTS multi-channel audio format is available on CD, LD and DVD software. DTS is a strictly digital format and can not be decoded inside most CD, LD or DVD players. For this reason, if you attempt to listen to DTS encoded software through the analog output of your new CD player, you will experience digital noise. This noise can be quite loud if the analog output is connected directly to a high power amplification system. Proper precautions should be taken to avoid this situation. To enjoy DTS Digital Surround playback, an external 5.1 channel DTS Digital Surround decoder system must be connected to the digital output (S/PDIF, AES/EBU, or TosLink) of the CD player.

Introduction

Before applying power

⚠ Caution : Read this section carefully to ensure safe operation.

Units are designed for operation as follows.

U.S.A. and Canada .... **AC 120 V only**	Europe and U.K. .... **AC 230 V only**
Australia .... **AC 240 V only**	Other countries .... **AC 110-120 / 220-240 V switchable**

For the United Kingdom

Factory fitted moulded mains plug

1. The mains plug contains a fuse. For replacement, use only a 13-Amp ASTA-approved (BS1362) fuse.
2. The fuse cover must be refitted when replacing the fuse in the moulded plug.
3. Do not cut off the mains plug from this equipment. If the plug fitted is not suitable for the power points in your home or the cable is too short to reach a power point, then obtain an appropriate safety approved extension lead or adapter, or consult your dealer.
   If nonetheless the mains plug is cut off, remove the fuse and dispose of the plug immediately, to avoid a possible shock hazard by inadvertent connection to the mains supply.

IMPORTANT
The wires in the mains lead are coloured in accordance with the following code:
    Blue   : Neutral
    Brown : Live
Do not connect those leads to the earth terminal of a three-pin plug.

Safety precautions

⚠ Caution : Read this section carefully to ensure safe operation.

WARNING : TO PREVENT FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

⚡	**CAUTION** **RISK OF ELECTRIC SHOCK DO NOT OPEN**	⚠	CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.
⚡			THE LIGHTNING FLASH WITH ARROWHEAD SYMBOL, WITHIN AN EQUILATERAL TRIANGLE, IS INTENDED TO ALERT THE USER TO THE PRESENCE OF UNINSULATED "DANGEROUS VOLTAGE" WITHIN THE PRODUCT'S ENCLOSURE THAT MAY BE OF SUFFICIENT MAGNITUDE TO CONSTITUTE A RISK OF ELECTRIC SHOCK TO PERSONS.
⚠			THE EXCLAMATION POINT WITHIN AN EQUILATERAL TRIANGLE IS INTENDED TO ALERT THE USER TO THE PRESENCE OF IMPORTANT OPERATING AND MAINTENANCE (SERVICING) INSTRUCTIONS IN THE LITERATURE ACCOMPANYING THE APPLIANCE.

REQUIREMENT BY NEDERLAND GAZETTE

Batteries are supplied with this product. When they empty, you should not throw away. Instead, hand them in as small chemical waste.
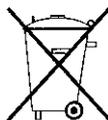

The marking of products using lasers
(Except for some areas)

CLASS 1
LASER PRODUCT

The marking is located on the rear panel and says that the component uses laser beams that have been classified as Class 1. It means that the unit is utilizing laser beams that are of a weaker class. There is no danger of hazardous radiation outside the unit.

Special features

CD player with 200-disc changer

This unit can accommodate up to 200 discs and can be used like a home jukebox.

CD-TEXT support

The text information (disc title, track titles, names of the artists, songwriters, composers, etc.) recorded on the CDs can be easily called and displayed in alphanumerics. (Some Japanese words and text may not be displayed.) → 15

Title name registrable

In case of a disc not corresponding to CD-TEXT, you can register a disc title and track titles yourself. → 20

Programmed playback

Desired tracks from up to 200 discs can be selected and programmed in the desired order. (Maximum 32 tracks) → 16

Filing functions suitable for a 200-disc changer

An enhanced filing function is provided to handle the large disc capacity.

Music type:	Discs are filed by 26 music genres. → 24
Best selection:	Only favorite tracks can be registered from 200 discs and played. → 27

Contents

Unpacking

Unpack the unit carefully and make sure that all accessories are put aside so they will not be lost.

Examine the unit for any possibility of shipping damage. If your unit is damaged or fails to operate, notify your dealer immediately. If your unit was shipped to you directly, notify the shipping company without delay. Only the consignee (the person or company receiving the unit) can file a claim against the carrier for shipping damage.

We recommend that you retain the original carton and packing materials for use should you transport or ship the unit in the future.
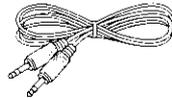

**Keep this manual handy for future reference.**

Types of discs playable on this unit

● With CD-G (CD Graphics) discs, this unit can play only the audio part.
● An 8 cm CD cannot be played back.

Disc Type	Disc Size
CD (ordinary Compact Disc)	12 cm
Audio part of CDV (CD with video)	12 cm

Disc handling precautions

Handling
Hold compact discs so that you do not touch the playing surface.

— Label side
— Playing side

Sticker

Sticky paste

● Do not attach paper or tape to either the playing side or the label side of compact discs.
● The paste left on the label surface after a sticker has been peeled off is a factor which may cause malfunction. If the surface is sticky due to remaining paste, be sure to clean it with alcohole before use.

Cleaning
If fingerprints or foreign matter become attached to the disc, lightly wipe the disc with a soft cotton cloth (or similar) from the center of the disc outwards in a radial manner.
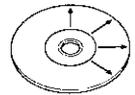

Storage
When a disc is not to be played for a long period of time, remove it from the CD player and store it in its case.

Never play a cracked or warped disc

During playback, the disc rotates at high speed in the player.
Therefore, to avoid danger, never use a cracked or deformed disc or a disc repaired with tape or adhesive agent.
Please do not use discs which are not round because they may cause a malfunction.

CD accessories

The CD accessories (stabilizer, protection sheet, protection ring, etc.) which are marketed for improving the sound quality or protecting discs as well as the disc cleaner should not be used with this system because they may cause malfunction.

About the DTS multi-channel audio format

The DTS multi-channel audio format is available on CD, LD and DVD software. DTS is a strictly digital format and can not be decoded inside most CD, LD or DVD players. For this reason, if you attempt to listen to DTS encoded software through the analog output of your new CD player, you will experience digital noise. This noise can be quite loud if the analog output is connected directly to a high power amplification system. Proper precautions should be taken to avoid this situation. To enjoy DTS Digital Surround playback, an external 5.1 channel DTS Digital Surround decoder system must be connected to the digital output (S/PDIF, AES/EBU, or ToSLink) of the CD player.

System connections

Make connections as shown below.
When connecting the related system components, refer also to the instruction manuals of the related components.
Do not plug in the power lead until all connections are completed.
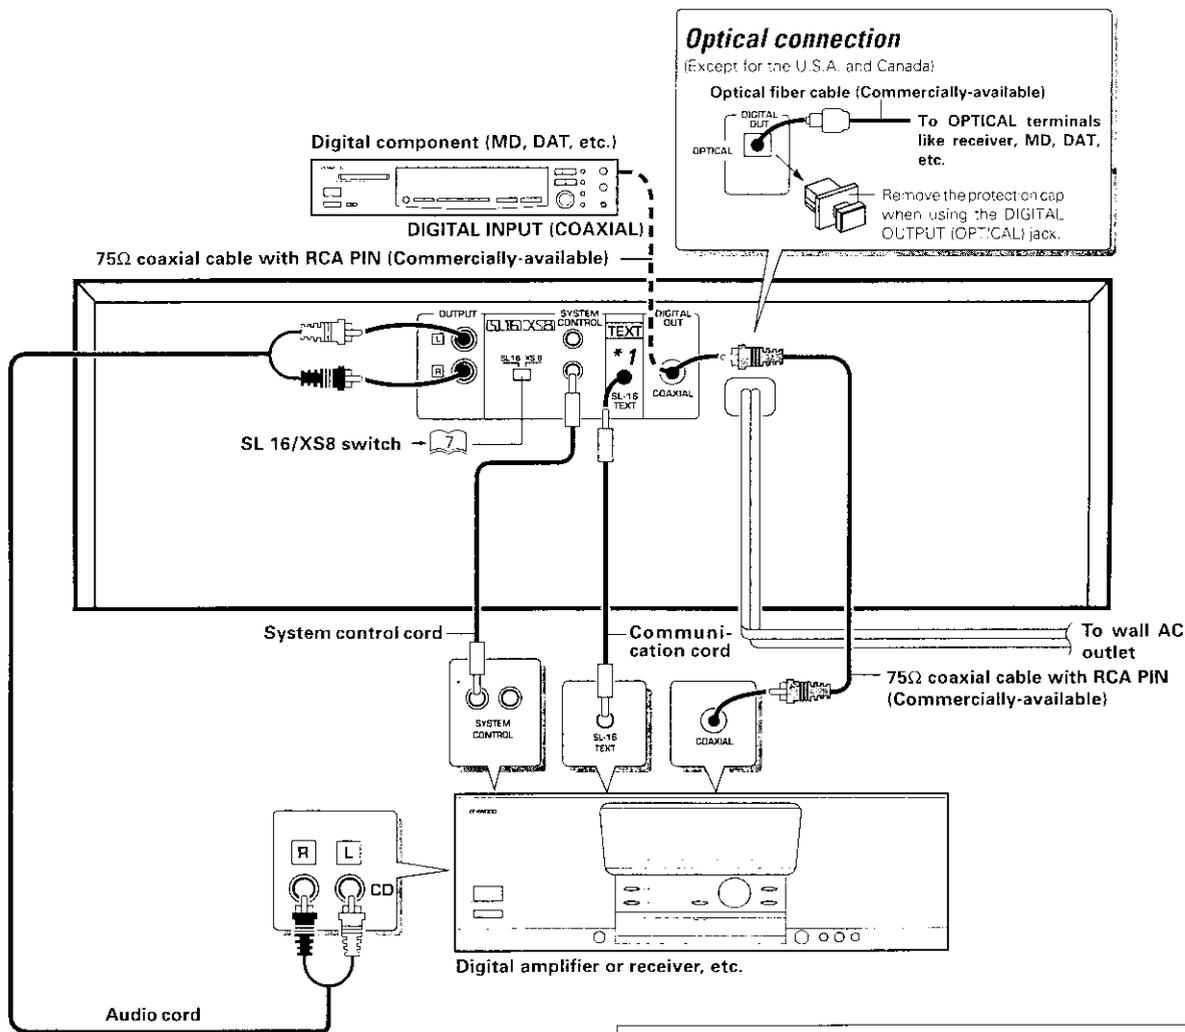

♪ **Malfunction of microcomputer**
If operation is not possible or erroneous display appears even though all connections have been made properly, reset the microcomputer referring to "In case of difficulty". → 31

Be sure to use this unit placed on a level surface.

*1
Note on the SL-16 TEXT jack
When using a KENWOOD Receiver equipped with the SL-16 TEXT jack, connect it to the Receiver using the communication cord provided with this unit. This makes it possible to display the disc and track titles on the LCD remote control unit (provided with the Receiver).

♪ Note — Do not forget to set the SL-16/XS8 switches of the Receiver and this unit to SL-16.

About the DTS multi-channel audio format
The DTS multi-channel audio format is available on CD, LD and DVD software. DTS is a strictly digital format and can not be decoded inside most CD, LD or DVD players. For this reason, if you attempt to listen to DTS encoded software through the analog output of your new CD player, you will experience digital noise. This noise can be quite loud if the analog output is connected directly to a high power amplification system. Proper precautions should be taken to avoid this situation. To enjoy DTS Digital Surround playback, an external 5.1 channel DTS Digital Surround decoder system must be connected to the digital output (S/PDIF, AES/EBU, or TosLink) of the CD player.

♪ Notes
1. Connect all cords firmly. If connections are loose there could be loss of sound or noise produced.
2. When plugging and unplugging connection cords, be sure to first remove the power cord from the AC outlet. Plugging/unplugging connection cords without removal of the power cord can cause malfunctions or damage to the unit.

Connection to digital amplifier or MD

Connect the DIGITAL OUT (OPTICAL or COAXIAL) jack to the digital input jack of the amplifier, DAT recorder, MD recorder, etc., using an optical fiber cable or coaxial cable which are commercially available in audio stores.

● When using an optical fiber cable to connect this unit to a digital amplifier, insert the plug straight into the jack until a snap sound is heard.
● Be careful not to bend, coil, or bundle the optical fiber cable.
● Optical fiber cables available on the market may not always be able to be used with this player. If your cord cannot be used with this unit, consult the store from which you purchased the cord or your nearest dealer.

Optical fiber cable
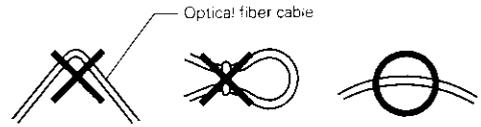

Connection to a general-use amplifier

Use the provided audio cords to connect the OUTPUT jacks of this unit to the CD input jacks (or AUX jacks) of the amplifier.
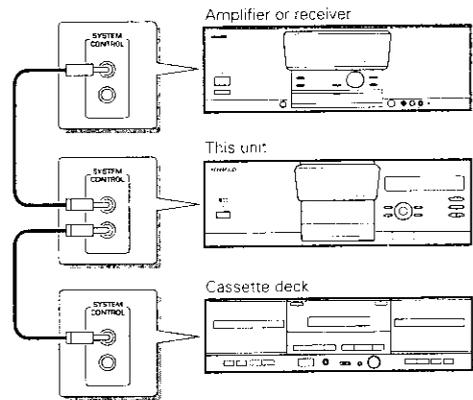

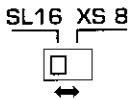

SYSTEM CONTROL CONNECTIONS

Connecting system control cords after connecting a KENWOOD audio component system lets you take advantage of convenient system control operations.
There are two KENWOOD system control modes. Make connections according to the groups of terminal symbols shown below.

[XS8] Mode : lets you combine [XR], [XS], and [XS8] terminals
[SL16]Mode : for [SL16] terminals only

This unit is compatible with both [XS8] and [SL16] modes.
Select the mode according to the connected components.
→ 6

SL16   XS 8

● Do this operation after completing all connections.
(Ensure that the power plug is not connected.)

Amplifier or receiver

This unit

Cassette deck

Notes
1. If your amplifier or receiver does not have a system control terminal, do not connect any system control cords to the system control terminals on the other components.
2. Do not connect system control cords to any components other than those specified by KENWOOD. It may cause a malfunction and damage your equipment.
3. Be sure the system control plugs are inserted all the way in to the system control terminals.
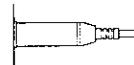

SYSTEM CONTROL OPERATIONS

Remote Control
Lets you operate this unit with the system remote control unit supplied with the amplifier or receiver.

Automatic Operation (Except [XR] equipment)
Automatically switches the input selector on the amplifier or receiver when you start playback from this unit.

Synchronized Recording (Except [XR] equipment)
Lets you synchronize recording with the start of playback when recording from a CD. Also, the simple CCRS operation enables great recordings from CDs.
See the operating instructions supplied with your cassette deck for details.

Loading batteries

❶ Remove the cover.

❷ Insert batteries.

❸ Close the cover.
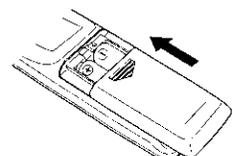

● Insert two AA-size (R6) batteries as indicated by the polarity making.

Operation

After plugging in the power cord, press the POWER (I / ⏻) key of the main unit to turn the power ON. When the power is turned ON, press the key of the function to be operated.

Remort control light sensor

6m

30° 30°

Operating range (approx.)

● When pressing more than one remote control key successively, press the keys securely by leaving an interval of 1 second or more between keys.
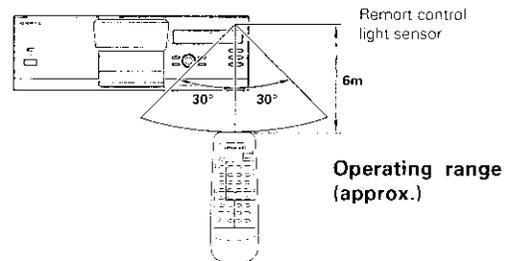

Notes
1. The supplied batteries are intended for use in operation checks. Therefore, their lives may be shorter than ordinary batteries.
2. When the remote-controllable distance gets shorter than before, replace both batteries with new ones.
3. Malfunction may occur if direct sunlight or the light of a high-frequency lighting fluorescent lamp enters the remote control light sensor. In such a case, change the system installation position to prevent the malfunction.

Preparation

Up to 200 CDs can be loaded in the carousel. Disc exchange also is possible during playback.

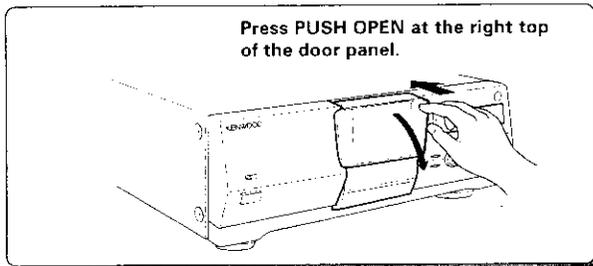

Never let your hand or any object enter inside the unit.
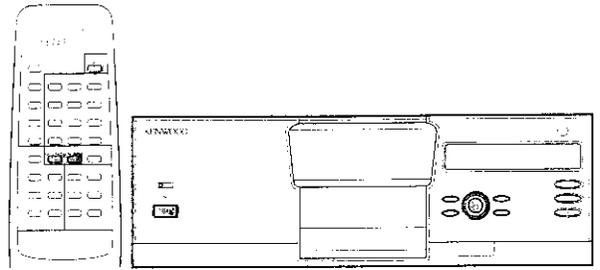

: Keys and controls used in the operations described on this page.
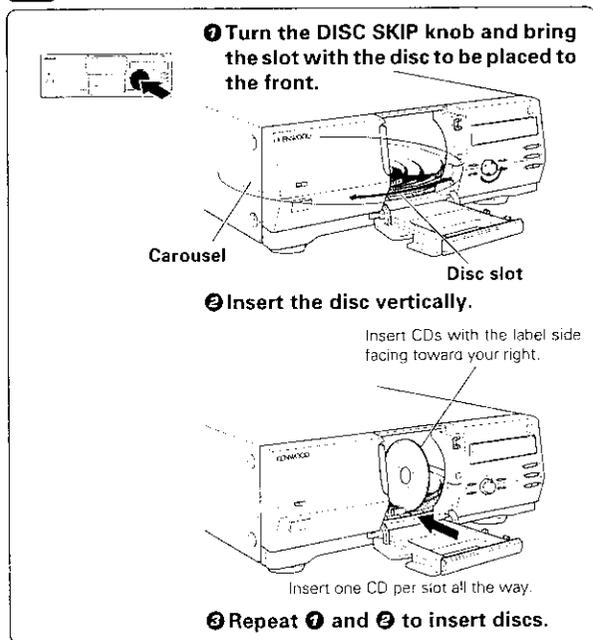

Loading discs in the carousel

1 Switch power ON.

Press the POWER (I / ○) key.

2 Open the door panel toward the front.

Press PUSH OPEN at the right top of the door panel.

● Do not place any object on the open door panel.

3 Load discs.

❶ Turn the DISC SKIP knob and bring the slot with the disc to be placed to the front.

Carousel

Disc slot

❷ Insert the disc vertically.

Insert CDs with the label side facing toward your right.

Insert one CD per slot all the way.

❸ Repeat ❶ and ❷ to insert discs.

```
DISC001
```

The slot No. is displayed when the DISC SKIP knob is turned.

Insert discs with the label on the right side. Playback is not possible when a disc is inserted the other way round.

● Do not insert more than one disc in a slot.

When a disc not corresponding to CD-TEXT is inserted, searching for this disc will be facilitated when the title name is registered at the time of disc insertion.
"Registration of Title Name" → 20

Disc replacement

Discs can be replaced with the same procedure as "Loading discs in the carousel". In stopped condition, all discs can be exchanged. However, when the door panel is opened while "DISC DETEC-TION" is being displayed, it may not be possible to remove the disc which had been played. Accordingly, wait for the "DISC DETECTION" indication to go out before opening the door panel. When the disc information has been read in at the time of registration of disc information like title name, music type, etc., the disc information can be recalled even when the disc insertion place is changed. → [20] → [24]

- When the set time comes, playback will start automatically.

Important items

Cleaning

Do not use volatile solvents such as alcohol, paint thinner, gasoline, or benzine, etc. to clean the cabinet. Use a clean dry cloth.

Do not use contact cleaners because it could cause a malfunction. Be specially careful against contact cleaners containing oil, for they may deform the plastic components.

Periodic inspection

This unit incorporates an optical pickup which is a precision device. It is recommended to have this unit inspected periodically to clear the pickup after about 1000 hours of use, although this period may vary depending on the installation condition (temperature, humidity, dust, smoke, etc.) of the unit.

The unit has inspected, please consult your dealer or a KENWOOD service center in your area.

Caution on condensation

Condensation (of dew) may occur inside the unit when there is a great difference in temperature between this unit and the outside. This unit may not function properly if condensation occurs. In this case, leave the unit for a few hours with the power left ON, and restart the operation after the condensation has dried up.

Be specially cautious against condensation in a following circumstance:

When this unit is carried from a place to another across a large difference in temperature, when the humidity in the room where this unit is installed increases, etc.

Note related to transportation and movement

Before transporting or moving this unit, carry out the following operation:

1. Remove all discs from the carousel and close the door panel.
2. Confirm that the flashing "NO DISC" display has changed to steady lighting, and then switch off the power.

```
NO DISC
```

3. Wait a few seconds, then disconnect the power plug.

Memory backup function

Stored contents for at least 3 weeks after power plug is unplugged from the AC outlet.	Power status (ON or OFF), Title name registration contents Music type registration contents Best selection registration contents
