❏ SAFETY PRECAUTIONS

CAUTION
RISK OF ELECTRIC SHOCK
DO NOT OPEN

CAUTION:
TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

WARNING:
TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

CAUTION:
HOT SURFACE. DO NOT TOUCH.
The top surface over the internal heat sink may become hot when operating this product continuously.
Do not touch hot areas, especially around the "Hot surface mark" and the top panel.

IMPORTANT SAFETY INSTRUCTIONS

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean only with dry cloth.
7. Do not block any ventilation openings.
   Install in accordance with the manufacturer's instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11. Only use attachments/accessories specified by the manufacturer.
12. Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
13. Unplug this apparatus during lightning storms or when unused for long periods of time.
14. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
15. Batteries shall not be exposed to excessive heat such as sunshine, fire or the like.

CAUTION:
To completely disconnect this product from the mains, disconnect the plug from the wall socket outlet.
The mains plug is used to completely interrupt the power supply to the unit and must be within easy access by the user.

FCC INFORMATION (For US customers)

1. COMPLIANCE INFORMATION
Product Name: AV Pre Tuner
Model Number: AV7701
This product complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this product may not cause harmful interference, and (2) this product must accept any interference received, including interference that may cause undesired operation.

Tel. 201-762-6500

2. IMPORTANT NOTICE: DO NOT MODIFY THIS PRODUCT
This product, when installed as indicated in the instructions contained in this manual, meets FCC requirements. Modification not expressly approved by marantz may void your authority, granted by the FCC, to use the product.

3. IMPORTANT
When connecting this product to network hub or router, use only a shielded STP or ScTP LAN cable which is available at retailer.
Follow all installation instructions. Failure to follow instructions could void your authority, granted by the FCC, to use the product.

4. NOTE
This product has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.
This product generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this product does cause harmful interference to radio or television reception, which can be determined by turning the product OFF and ON, the user is encouraged to try to correct the interference by one or more of the following measures:
• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the product into an outlet on a circuit different from that to which the receiver is connected.
• Consult the local retailer authorized to distribute this type of product or an experienced radio/TV technician for help.

For Canadian customers:
This Class B digital apparatus complies with Canadian ICES-003.

Features

Current feedback amplifier

This unit uses a high-speed current feedback amplifier circuit for its preamplifier so that signals from a Blu-ray Disc player and other equipment that support high-definition audio formats can be amplified with high fidelity. The high-speed current feedback amplifier also reproduces a natural sound space.

Digital video processor up-scales analog video signals (SD resolution) to 4K

This unit is equipped with the 4K video upscaling function, which allows for outputting analogue or SD (standard video quality) video to HDMI at 4K (3840 × 2160 pixels). This enables the unit and a TV connected with a single HDMI cable and any video source to be reproduced precisely with HD level of quality.

Equipped with "Hybrid PLL Jitter Reducer" capable of reducing jitter and phase noise that negatively affect sound quality

"Hybrid PLL Jitter Reducer" provided with this unit improves the sound localization, reproducing a natural sound field.

Equipped with a Multi-Zone Function 3 source, 3 zone output (incl.HDMI output for ZONE2)

This unit is equipped with a multi-zone function, so you can enjoy separate sound sources in three rooms including MAIN ZONE. Furthermore, this unit is equipped with an HDMI ZONE2 OUT connector, so you can play back in ZONE2 a video that is different from the one played back in MAIN ZONE.

7.2 ch XLR Balanced Output

This unit is equipped with balanced output connectors that are insusceptible to external noise.
It is possible to achieve audio transmission of higher quality by connecting this unit to a power amplifier equipped with a balanced input connector.

Supports internet radio, music, and photograph streaming
Supports AirPlay® (v page 75)

You can enjoy a wide variety of content, including listening to Internet radio, playing the audio files stored on your PC, and displaying on a TV the photographs stored on your PC.
This unit also supports AirPlay that lets you stream your music library from an iPhone, iPad, iPod touch or iTunes.

Compatible with "marantz Remote App" for performing basic operations of the unit with an iPad, iPhone*1 or Android smartphone

"marantz Remote App" is application software that allows you to perform basic operations with an iPad, iPhone, Android smartphone or Android tablet such as turning the unit ON/OFF, controlling the volume, and switching the source.

*1 Download "marantz Remote App" from iTunes® App Store. The unit needs to be connected to a LAN and the iPhone/iPod touch needs to be connected to the same network by Wi-Fi (wireless LAN).

"Setup Assistant", providing easy-to-follow setup instructions

First select the language when prompted. Then simply follow the instructions displayed on the TV screen to set up the speakers, network, etc.

Easy to use, Graphical User Interface

This unit is equipped with an easy to see "Graphical User Interface" that uses menu displays and levels. The use of level displays increases operability of the this unit.

HDMI connectors enable connection to various digital AV devices (input: 7, output: 3)

The unit is equipped with 7 HDMI input connectors for connecting devices with HDMI connectors, such as a Blu-ray Disc player, game machine, HD digital camcorder, etc.

Supports HDMI (3D, ARC, Deep Color, "x.v.Color", Auto Lip Sync, 4K) and HDMI control function (☞page 8)

In addition to HDMI 3D and ARC (Audio Return Channel) functions, this unit supports the video pass-through function, which outputs video to TV without changing the video quality when video signals of 4K (3840 × 2160 pixels) are input, and the GUI overlay function, which overlays the menu screen (GUI) on the 4K video screen.

Simultaneous playback on two HDMI channels (for MAIN ZONE)

This unit is equipped with two HDMI MONITOR outputs. You can connect one output to a projector and the other output to a TV for simultaneous signal outputs.

Direct play for iPod® and iPhone® via USB (☞page 20)

Music data from an iPod can be played back if you connect the USB cable supplied with the iPod via the iPod/USB port of this unit, and also an iPod can be controlled with the remote control unit for this unit.

Audyssey DSX®

This unit is equipped with Audyssey DSX® processor. By connecting front height speakers to Power Amplifier and playing back through Audyssey DSX®, you can experience a more powerful playback expression in the height audio range. By connecting front wide speakers, you can experience a more powerful playback expression in the wide audio range.

M-XPort (marantz-eXtension Port) (☞page 24)

This unit is equipped with the M-XPort, a marantz original innovation that provides outstanding expandability. You can connect the Wireless Receiver RX101 (sold separately) to this port.

Remote Power Control

This unit is equipped with a remote power control function. When a marantz Power Amplifier MM8077 or MM7055 or MM7025 is connected to this unit, this unit's power can be switched ON/OFF together with the MM8077 or MM7055 or MM7025 power supply. Connection to the MM8077 or MM7055 or MM7025 is a ground floating connection that prevents negative influences on sound quality as far as possible.

Cautions on handling

• **Before turning the power on**
Check once again that all connections are correct and that there are no problems with the connection cables.

• Power is supplied to some of the circuitry even when the unit is set to the standby mode. When going on vacation or leaving home for long periods of time, be sure to unplug the power cord from the power outlet.

• **About condensation**
If there is a major difference in temperature between the inside of the unit and the surroundings, condensation (dew) may form on the operating parts inside the unit, causing the unit not to operate properly.
If this happens, let the unit sit for an hour or two with the power turned off and wait until there is little difference in temperature before using the unit.

• **Cautions on using mobile phones**
Using a mobile phone near this unit may result in noise. If that occurs, move the mobile phone away from this unit when it is in use.

• **Moving the unit**
Turn off the power and unplug the power cord from the power outlet. Next, disconnect the connection cables to other system units before moving the unit.

• **About care**
 • Wipe the cabinet and control panel clean with a soft cloth.
 • Follow the instructions when using a chemical cleaner.
 • Benzene, paint thinner or other organic solvents as well as insecticide may cause material changes and discoloration if brought into contact with the unit, and should therefore not be used.

Basic version

Here, we explain the connections and basic operation methods for this unit.

Connections

Important information

Make connections before using this unit.
To create a home theater that can play back higher quality video and audio by fully utilizing the capabilities of this unit and your video devices, connect this unit to each of your video devices with HDMI cables.

❏ HDMI-compatible device

If your video device does not support HDMI connections, use the following connection.

❏ HDMI-incompatible device

This unit can change the source that is assigned to the DIGITAL AUDIO IN and COMPONENT VIDEO IN connectors.
You can change the source for connectors listed in ⌈Input connector setting⌋ within pages that describe connections for devices.
For details on assigning a source to connectors, see "Changing the source assigned to connectors" (☞page 13). For the setting method, see "Input Assign" (☞page 122).

NOTE

• **The menu screen is only displayed on TV connected to this unit via HDMI. If your TV is connected to this unit via other video output connectors, perform menu operations while seeing the display on this unit.**
• Do not plug in the power cord until all connections have been completed. However, when the "Setup Assistant" is running, follow the instructions in the "Setup Assistant" (📖 page 7) screen for making connections. (During "Setup Assistant" operation, the input/output connectors do not conduct current.)
• When running the "Setup Assistant" (📖 page 7), turn off the power supply of connected devices.
• When making connections, also refer to the operating instructions of the other devices being connected.
• Be sure to connect the left and right channels properly (left with left, right with right).
• Do not bundle power cords together with connection cables. Doing so can result in noise.

Converting input video signals for output (Video conversion function)

This unit is equipped with three types of video input connectors (HDMI, Component video and video) and three types of video output connectors (HDMI, Component video and video).

This function automatically converts various formats of video signals input to this unit into the formats used to output the video signals from this unit to a monitor.

【Flow of video signals for MAIN ZONE】
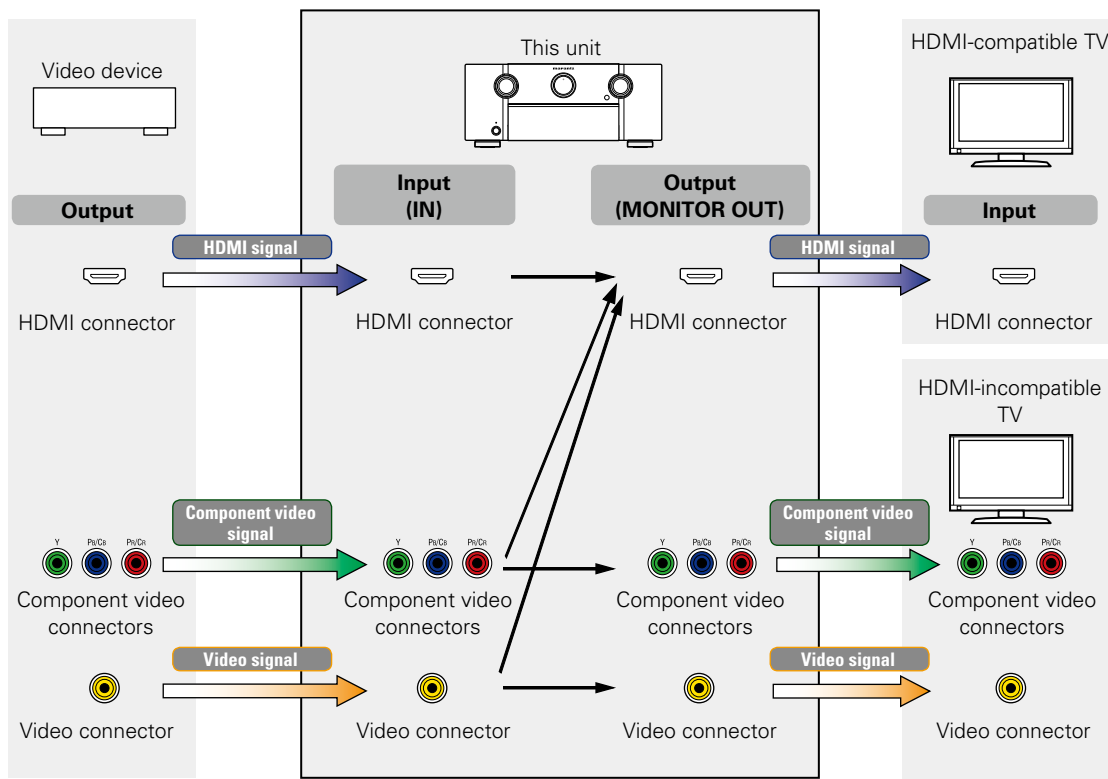

For example, if you connect this unit to an HDMI-compatible TV with a single HDMI cable, this unit automatically converts input signals other than HDMI video signals to HDMI signals to output from the HDMI connector to the TV. This unit outputs only one type of video signals, so video signals output from this unit to the TV remain unchanged even if you switch to a device that outputs another type of video signals for playback. Therefore, you do not need to switch the video input on the TV. Furthermore, this unit converts the input analog video signals such as video and component video signals to high resolution digital HDMI video signals for output, improving the quality of the video.

If your TV does not support HDMI connections, connect this unit to TV with analog video connectors. This unit can not convert HDMI input signals to analog video signals, so when inputting from an HDMI device, use component video or video input connectors.

Make Settings as Necessary

- If you do not want this unit to convert video signals automatically, use the following setting item to disable this function.
  "Video Conversion" (page 118)
- If you want to change the resolution of video signals output to the TV, use the following setting item to do so.
  "Resolution" (page 118)

- The video conversion function supports the NTSC, PAL, SECAM, NTSC 4.43, PAL-N, PAL-M and PAL-60 formats.
- Resolutions of HDMI-compatible TVs can be checked at "Video" – "Monitor" (page 137).

NOTE

- **The menu screen is only displayed on TV connected to this unit via HDMI. If your TV is connected to this unit via other video output connectors, perform menu operations while seeing the display on this unit.**
- HDMI signals are digital. HDMI signals cannot be converted into analog signals.
- When a non-standard video signal from a game machine or some other source is input, the video conversion function might not operate.
- The HDMI ZONE2 function is only compatible with the HDMI 1 – 6 IN connectors. It is not compatible with the HDMI 7 IN connector.

Information

Connecting an HDMI-compatible device

You can connect up to ten HDMI-compatible devices (7-inputs/3-outputs) to the unit.
When a TV is connected to the HDMI ZONE2 OUT connector, you can play back a video or audio from the device connected to the HDMI 1 – 6 IN connector in ZONE2 (☞page 100).
If the device connected to this unit is equipped with an HDMI connector, it is recommended to use HDMI connections. Connections with an HDMI cable offer the following benefits that can not be achieved with other connection methods.

- **High quality playback by transmitting audio and video via digital signals**
  HDMI connections can transmit high definition video and high quality audio formats adopted by Blu-ray disc players (Dolby Digital Plus, Dolby TrueHD, dts-HD, dts-HD Master Audio).
  HDMI connections also convey information required for playback between devices. The information is used for copyright protection and TV resolution recognition, the ARC function, the HDMI control function, etc.

- **Transmission of audio and video signals with a single HDMI cable**
  Previous connections require multiple audio and video cables, but HDMI connections require only a single HDMI cable to transmit audio and video signals. This allows wires in a home theater system, which tend to be complicated, to be more organized.

- **Mutual control through the HDMI control function (☞page 92)**
  This unit and the HDMI device connected via HDMI can be linked to perform operations such as power control, volume control, and input source switching.

- **Other video and audio functions, such as 3D video playback, Content Type, the ARC function, are supported (☞page 12).**

- There is more than one version of HDMI standard. The supported functions and the performance vary according to the version. This unit complies with the HDMI standard, supporting the ARC and 3D playback functions. To enjoy these functions, the HDMI device connected to this unit also needs to use the same version of the standard. For the version of the HDMI standard on the device connected to this unit, see the device's manual.
- Some TVs do not support audio input via HDMI connections. For details, see your TV's manual.

❏ About ARC (Audio Return Channel) function

This function plays TV audio on this unit by sending the TV audio signal to this unit via HDMI cable.
If a TV without the ARC function is connected via HDMI connections, video signals of the playback device connected to this unit are transmitted to the TV, but this unit can not play back the audio from the TV. If you want to enjoy surround audio for TV program, a separate audio cable connection is required.
In contrast, if a TV with the ARC function is connected via HDMI connections, no audio cable connection is required. Audio signals from the TV can be input to this unit through the HDMI cable between this unit and the TV. This function allows you to enjoy surround playback on this unit for the TV.

When the ARC function is used, connect a device with a "Standard HDMI cable with Ethernet" or "High Speed HDMI cable with Ethernet" for HDMI.
Refer to the owner's manual for your TV for details about TV connection and settings.

• Video signals are not output if the input video signals do not match the monitor's resolution. In this case, switch the Blu-ray Disc/DVD player's resolution to a resolution with which the monitor is compatible.
• When this unit and monitor are connected with an HDMI cable, if the monitor is not compatible with HDMI audio signal playback, only the video signals are output to the monitor. Make audio connections (vpage 14 "Connecting a TV").

NOTE

• The audio signal from the HDMI output connector (sampling frequency, number of channels, etc.) may be limited by the HDMI audio specifications of the connected device regarding permissible inputs.
• **When connecting a TV that does not support the ARC function, an audio cable connection is required in addition to the HDMI cable. In this case, refer to "Connecting a TV" (vpage 14) for the connection method.**
For the ARC function, see "About ARC (Audio Return Channel) function" (vpage 9).

Connecting to a device equipped with a DVI-D connector

The DVI-D (Digital Visual Interface) method is also used for video transmission via digital signals. This is developed mainly for computers, and some AV devices such as projectors are equipped with this interface. To output HDMI video signals to a DVI-D video input compatible device, use an HDMI/DVI conversion cable, which converts HDMI video signals to DVI signals.
The DVI-D connector can transmit high quality digital signals, but the copy guard and other issues may hinder normal operations for some device combinations.

NOTE

• No sound is output when connected to a device equipped with a DVI-D connector. Make audio connections as described in "Connecting a TV" (vpage 14).
• Signals cannot be output to DVI-D devices that do not support HDCP.
• Depending on the combination of devices, the video signals may not be output.

Settings required when using a TV that supports the ARC function

When using a TV that supports the ARC function, make the following settings.
• Set "HDMI Control" (vpage 117) to "On".
• Set "Control Monitor" (vpage 117) to match the number of the HDMI MONITOR connector connected to the TV that supports the ARC function.

NOTE

If the TV that supports the ARC function is connected to both HDMI MONITOR 1 and HDMI MONITOR 2 connectors, you cannot use ARC function at the same time.

HDMI function

This unit supports the following HDMI functions:

❏ About 3D function

This unit supports input and output of 3D (3 dimensional) video signals of HDMI.
To play back 3D video, you need a TV and player that provide support for the HDMI 3D function and a pair of 3D glasses.

NOTE

- When playing back 3D video, refer to the instructions provided in the manual of your playback device together with this manual.
- When playing back 3D video content, the menu screen or status display screen can be superimposed over the image. However, the menu screen or status display screen cannot be superimposed over certain 3D video content.
- If 3D video with no 3D information is input, the menu screen and status display on this unit are displayed over the playback video.
- If 2D video is converted to 3D video on the television, the menu screen and status display on this unit are not displayed correctly. To view the menu screen and status display on this unit correctly, turn the television setting that converts 2D video to 3D video off.

❏ About 4K function

This unit supports input and output of 4K (3840 × 2160 pixels) video signals of HDMI.

When a device supporting 4K is connected, use a cable compatible with "High Speed HDMI cable" or "High Speed HDMI cable with Ethernet".

❏ HDMI control function (☞page 92)

This function allows you to operate external devices from the unit and operate the unit from external devices.

NOTE

- The HDMI control function may not work depending on the device it is connected to and its settings.
- You cannot operate a TV or Blu-ray Disc player/DVD player that is not compatible with the HDMI control function.
- The HDMI ZONE2 function is not compatible with the HDMI control function.

❏ About Content Type

This function was added with the HDMI standard. It automatically makes settings suitable for the video-output type (content information).

NOTE

To enable the Content Type, set "Video Mode" to "Auto" (☞page 118).

❏ Deep Color (☞page 166)

When a device supporting Deep Color is connected, use a cable compatible with "High Speed HDMI cable" or "High Speed HDMI cable with Ethernet".

❏ Auto Lip Sync (☞page 116, 166)

❏ "x.v.Color", sYCC601 color, Adobe RGB color, Adobe YCC601 color (☞page 166, 168)

❏ High definition digital audio format

❏ ARC (Audio Return Channel) (☞page 9)

Copyright protection system
In order to play back digital video and audio such as BD-Video or DVD-Video via HDMI connection, both this unit and TV or the player need to support the copyright protection system known as HDCP (High-bandwidth Digital Content Protection System). HDCP is copyright protection technology comprised of data encryption and authentication of the connected AV devices. This unit supports HDCP. • If a device that does not support HDCP is connected, video and audio are not output correctly. Read the owner's manual of your television or player for more information.

Settings related to HDMI connections

Set as necessary. For details, see the respective reference pages.

❏ HDMI Setup (☞page 116)

Make settings for HDMI video/audio output.

NOTE

The audio signal input from the HDMI input connector can be output as an output signal from the HDMI output connector by setting the HDMI audio output destination to TV.
Audio signals input via the Analog/Coaxial/Optical input connectors cannot be output from the HDMI MONITOR output connector.

Connecting an HDMI-incompatible device

For high quality video and surround playback, it is recommended to use an HDMI cable to connect this unit to TV and other video devices (☞page 8 "Connecting an HDMI-compatible device").

Changing the source assigned to connectors

This unit can change the source that is assigned to the HDMI IN, DIGITAL AUDIO IN and COMPONENT VIDEO IN connectors.
Let us take a digital audio connection for Blu-ray Disc players for an example. The rear panel digital audio input connectors do not have the input connector indication for Blu-ray disc players (Blu-ray). You can assign Blu-ray disc players to these connectors to use them for Blu-ray disc players. Select "Blu-ray" when switching functions on this unit to play back the source connected to these connectors.

❏ How to change the source assigned to connectors (☞page 122)

Connecting a TV

- This section describes how to connect when your TV does not support HDMI connections.
  For instructions on HDMI connections, see "Connecting an HDMI-compatible device" (vpage 8).
- If the TV connected to this unit is equipped with an HDMI connector that supports ARC, digital audio signals from TV can be transmitted to this unit (vpage 9 "About ARC (Audio Return Channel) function"). The ARC function allows you to enjoy on this unit the audio from TV programs and HDMI devices directly connected to TV, without having to make a separate audio connection. For the ARC function, also see your TV's manual.
- To listen to TV audio through this device, use the optical digital connection.

For video connections, see "Converting input video signals for output (Video conversion function)" (vpage 6).

❏ Audio connection

The following methods are available for connecting to this unit. **Use either of the methods to make a connection.**

① DIGITAL AUDIO OPTICAL connector
DIGITAL AUDIO COAXIAL connector ∗

When a multichannel audio (digital bit stream audio) is input, this unit decodes the audio to play back surround sound.

∗ When making this type of connection, you must change the settings on this unit.
(v **Input connector setting**)

❏ Video connection

The following methods are available for connecting to this unit. **Use either of the methods to make a connection.**
The numbers prefixed with connectors indicate the recommendation order. The smaller the number is, the higher playback quality is achieved.

❶ COMPONENT VIDEO OUT (MONITOR) connector

This makes an analog video connection. This connection method separates video signals into 3 signals for transmission based on color components, achieving the best quality video playback among analog video connections, with less signal degradation.

❷ VIDEO OUT (MONITOR) connector

This makes an analog video connection.

Input connector setting

When making the following connection, you must change the input connector settings.

① DIGITAL AUDIO COAXIAL connector

When connecting to connectors marked as ①, change "CBL/SAT" to "TV AUDIO".

For how to change, see "Input Assign" (vpage 122).
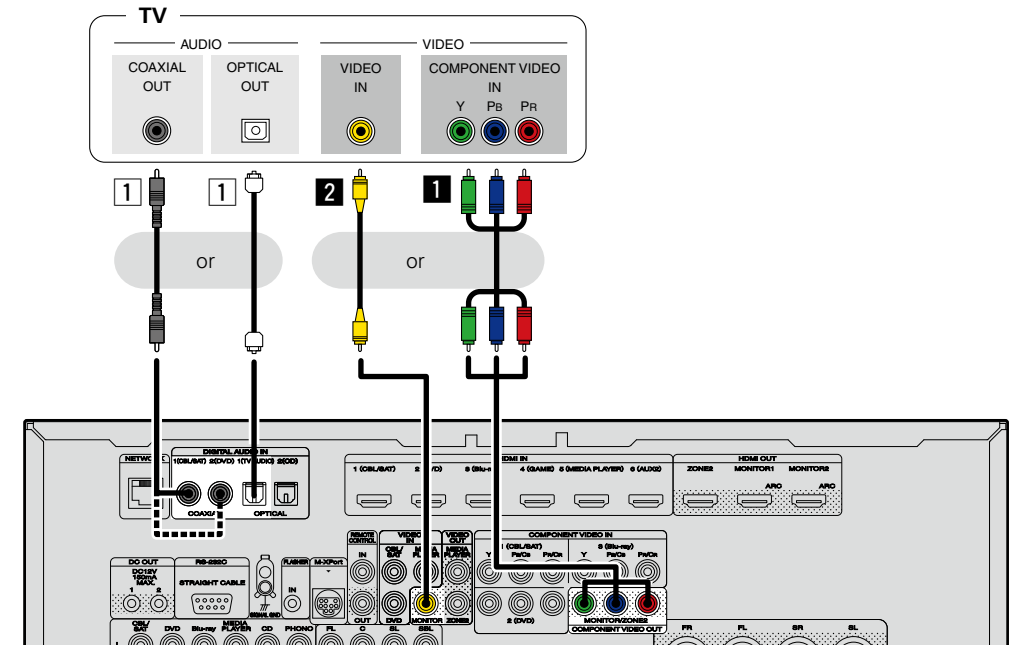

NOTE

- **The menu screen is only displayed on TV connected to this unit via HDMI. If your TV is connected to this unit via other video output connectors, perform menu operations while seeing the display on this unit.**
- If you do not connect this unit to your TV via HDMI, do not make HDMI connections for video inputs from other video devices, either. For details see "Converting input video signals for output (Video conversion function)" (vpage 6).

marantz does not guarantee that all USB memory devices will operate or receive power. When using a portable USB connection type HDD of the kind to which an AC adapter can be connected to supply power, use the AC adapter.

NOTE

- USB memory devices will not work via a USB hub.
- It is not possible to use this unit by connecting the unit's iPod/USB port to a PC via a USB cable.
- Do not use an extension cable when connecting a USB memory device. This may cause radio interference with other devices.
- When connecting an iPhone to this unit, keep the iPhone at least 20 cm away from this unit. If the iPhone is kept closer to this unit and a telephone call is received by the iPhone, noise may be output from this device.
- If the iPod is connected using an iPod cable (commercially available) that is longer than 6.6 ft (2 m), sound may not be played correctly. In this case, use a genuine iPod cable, or a cable that is shorter than 3.3 ft (1 m).

🖉

• This unit is compatible with record players with an MM cartridge. When you connect to a record player with an MC cartridge, use a commercially available MC head amp or a step-up transformer.
• If you set this unit's input source to "PHONO" and increase the volume without connecting the record player, there may be a "booming" noise from the speakers.

NOTE

The SIGNAL GND terminal of this unit is not a safety ground connection. Connect it to reduce noise when noise is excessive. Note that depending on the record player, connecting the ground line may have the reverse effect of increasing noise. In this case, it is not necessary to connect the ground line.
Connecting an HD Radio receiver

• By connecting a HD Radio antenna to this unit, you can receive HD Radio programs.
• HD Radio broadcasting currently is available in the United States and select other countries.
• After connecting the antenna and receiving a broadcast signal (v page 46 "Listening to HD Radio stations"), fix the antenna with tape in a position where the noise level becomes minimal.

NOTE

• Do not connect two FM antennas simultaneously.
• Even if an external AM antenna is used, do not disconnect the AM loop antenna.
• Make sure the AM loop antenna lead terminals do not touch metal parts of the panel.
• If the signal has noise interference, connect the ground terminal (GND) to reduce noise.
• If you are unable to receive a good broadcast signal, we recommend installing an outdoor antenna. For details, inquire at the retail store where you purchased the unit.

Connecting a wireless receiver (RX101)

- You can connect a wireless receiver (RX101, sold separately) to play back music on your Bluetooth device with this unit.
- To do this, switch the input source to "M-XPort" (☞page 36 "Selecting the input source").
- This unit supports the A2DP standard of the Bluetooth profile.
- See also the manuals for your wireless receiver and Bluetooth device.

- When connecting your Bluetooth device to the wireless receiver for the first time, pairing is necessary. Once pairing is completed, the communication between your Bluetooth device and the wireless receiver can be established just by connecting them. Pairing is necessary for each Bluetooth device.
- You can also use the wireless receiver as an IR receiver. In this case, disable the remote control signal receiving function (☞page 98 "Remote lock function").

Connecting to a home network (LAN)

You can connect this unit to your home network (LAN) to perform various types of playbacks and operations as follows. Make network connections for this unit by carefully reading information on this page.

- Playback of network audio such as the Internet radio and music servers
- Playback of music from online services
- AirPlay
- Operations on this unit via the network

In addition, when an updated firmware becomes available for improving this unit, the update information is delivered from us to this unit over the network. You can then download the latest firmware.
For more information, on the menu, select "Update" ().

Network settings are necessary. See "Network" on the menu () for more information on network setting.

Required system

❏ Broadband internet connection

❏ Modem
Device that connects to the broadband circuit and conducts communications on the Internet.
A type that is integrated with a router is also available.

❏ Router
When using this unit, we recommend you use a router equipped with the following functions:
- Built-in DHCP server
  This function automatically assigns IP addresses on the LAN.
- Built-in 100BASE-TX switch
  When connecting multiple devices, we recommend a switching hub with a speed of 100 Mbps or greater.

❏ Ethernet cable (CAT-5 or greater recommended)
- Use only a shielded STP or ScTP LAN cable which is available at retailer.
- The normal shielded-type Ethernet cable is recommended. If a flat-type cable or unshielded-type cable is used, other devices could be affected by noise.

- If you have an Internet provider contract for a line on which network settings are made manually, make the settings at "Network" (page 130).
- With this unit, it is possible to use the DHCP and Auto IP functions to make the network settings automatically.
- When using this unit with the broadband router's DHCP function enabled, this unit automatically performs the IP address setting and other settings.
  When using this unit connected to a network with no DHCP function, make the settings for the IP address, etc., at "Network" (page 130).
- When setting manually, check the setting contents with the network administrator.

NOTE
- A contract with an ISP is required to connect to the Internet.
  No additional contract is needed if you already have a broadband connection to the Internet.
- The types of routers that can be used depend on the ISP. Contact an ISP or a computer shop for details.
- marantz assumes no responsibility whatsoever for any communication errors or troubles resulting from customer's network environment or connected devices.
- This unit is not compatible with PPPoE. A PPPoE-compatible router is required if you have a contract for a type of line set by PPPoE.
- Do not connect an NETWORK connector directly to the LAN port/ Ethernet connector on your computer.
- To listen to audio streaming, use a router that supports audio streaming.

NOTE

• **Do not plug in the power cord until all connections have been completed.**

• Do not bundle power cords together with connection cables. Doing so can result in humming or noise.

Setup

Here, we explain "Audyssey® Setup", which allows you to automatically make the optimal settings for your speakers, and "Network", which allows you to connect this unit to a home network (LAN).

This unit lets you play via your home network (LAN) music files stored on a computer and music content such as that from Internet radio.

Set up speakers (Audyssey® Setup) GUI

The acoustic characteristics of the connected speakers and listening room are measured and the optimum settings are made automatically. This is called "Audyssey® Setup".

To perform measurement, place the setup microphone in multiple locations all around the listening area. For best results, we recommend you measure in six or more positions, as shown in the illustration (up to eight positions).

- When performing Audyssey® Setup, Audyssey MultEQ® XT/ Audyssey Dynamic EQ®/Audyssey Dynamic Volume® functions become active (☞page 112).
- To set up the speakers manually, use "Speakers" (☞page 126) on the menu.

NOTE

- Make the room as quiet as possible. Background noise can disrupt the room measurements. Close windows and turn off the power on electronic devices (TVs, radios, air conditioners, fluorescent lights, etc.). The measurements could be affected by the sounds emitted by such devices.
- During the measurement process, place cell phones outside the listening room. Cell phone signals could disrupt the measurements.
- Do not unplug the setup microphone from the main unit until Audyssey® Setup is completed.
- Do not stand between the speakers and setup microphone or allow obstacles in the path while the measurements are being made. This will cause inaccurate readings.
- During the measurement process, loud test sounds may be played, but this is part of normal operation. If there is background noise in room, these test signals will increase in volume.
- Operating **VOLUME ▲▼** on the remote control unit or **VOLUME** on the main unit during the measurements will cancel the measurements.
- Measurement cannot be performed when headphones are connected. Unplug the headphones before performing Audyssey® Setup.
About setup microphone placement

- Measurements are performed by placing the setup microphone successively at multiple positions throughout the entire listening area, as shown in 【Example ①】. For best results, we recommend you measure in six or more positions, as shown in the illustration (up to eight positions).
- Even if the listening environment is small as shown in 【Example ②】, measuring at multiple points throughout the listening environment results in more effective correction.

About the main listening position (*M)

The main listening position is the position where listeners would normally sit or where one would normally sit alone within the listening environment. Before starting Audyssey® Setup, place the setup microphone in the main listening position. Audyssey MultEQ® XT uses the measurements from this position to calculate speaker distance, level, polarity, and the optimum crossover value for the subwoofer.

1 Prepare the included setup microphone

Mount the setup microphone on a tripod or stand and place it in the main listening position.
When placing the setup microphone, adjust the height of the sound receptor to the level of the listener's ear.

Sound receptor ⟶ **Setup microphone**
If you do not have a tripod or stand, set up the microphone on, for example, a seat without a back.

NOTE

- Do not hold the setup microphone in your hand during measurements.
- Avoid placing the setup microphone close to a seat back or wall as sound reflections may give inaccurate results.

2 Set up the subwoofer

If using a subwoofer capable of the following adjustments, set up the subwoofer as shown below.

For details, see your subwoofer's manual.

❏ **When using a subwoofer with a direct mode**
Set the direct mode to "On" and disable the volume adjustment and crossover frequency setting.

❏ **When using a subwoofer without a direct mode**
Make the following settings:
- **Volume** : "12 o'clock position"
- **Crossover frequency** : "Maximum/Highest Frequency"
- **Low pass filter** : "Off"
- **Standby mode** : "Off"

NOTE

When using 2 subwoofers at the same time, before starting Audyssey® Setup. adjust the volume of the subwoofers by using "Subwoofer Level" (v page 111) from the menu. You cannot set the volume for individual subwoofers.

3 Set up the remote control unit
❏ **Set up the zone mode**

16 Set Audyssey Dynamic Volume®.

Audyssey Setup
You can set Dynamic Volume function, which automatically adjusts volume level for all content.

Do you want to enable?

Yes
No
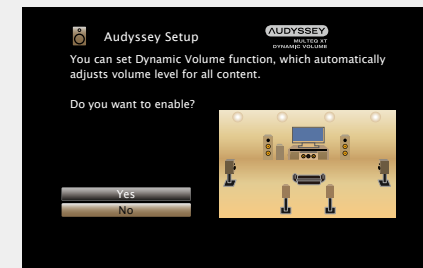

- This feature adjusts the output volume to the optimal level while constantly monitoring the level of the audio input to the unit. Optimal volume control is performed automatically without any loss in the dynamism and clarity of the sound when, for example, the volume suddenly increases for commercials shown during television programs.

❏ **When turning Dynamic Volume on**
- Press △ to select "Yes", and then press **ENTER**.
  The unit automatically enters "Medium" (☞page 113) mode.

❏ **When turning Dynamic Volume off**
- Press ▽ to select "No", and then press **ENTER**.
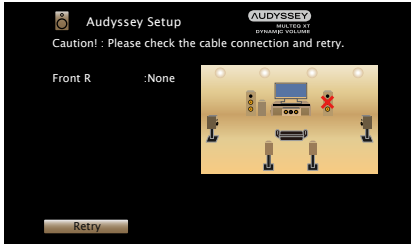

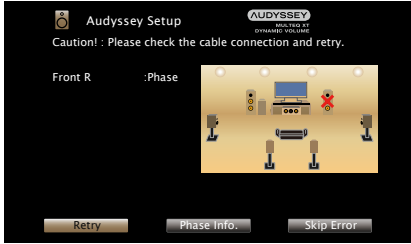

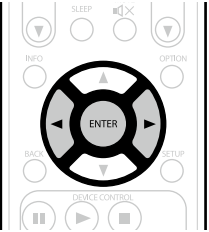

NOTE

After performing Audyssey® Setup, do not change the speaker connections or subwoofer volume. In event of a change, perform Audyssey® Setup again.

Error messages

- An error message is displayed if Audyssey® Setup could not be completed due to speaker placement, the measurement environment, etc. If an error message is displayed, check the relevant items and perform the necessary measures. Then perform Audyssey® Setup again.
- If the result still differs from the actual connection status after c or the error message still appears, it is possible that the speakers are not connected properly. Turn this unit off, check the speaker connections and repeat the measurement process from the beginning.
- Be sure to turn off the power before checking speaker connections.

Listening to HD Radio stations

For antenna connections, see "Connecting an HD Radio receiver" (☞page 23).

Important information

❏ Using the HD Radio™ receiver

HD Radio stations offer higher sound quality than conventional FM/ AM broadcasts. It is also possible to receive data services and select broadcasts from among up to eight multicast programs.
HD Radio Technology provides higher quality sound than conventional broadcasts and allows reception of data services.

Digital Sound

• Digital, CD-quality sound. HD Radio Technology enables local radio stations to broadcast a clean digital signal. AM sounds like today's FM and FM sounds like a CD.

PSD

• Program Service Data: Contributes to the superior user experience of HD Radio Technology. Presents song name, artist, station IDs, and other relevant data streams.

HD2/HD3

• Adjacent to traditional main stations are extra local FM channels. These HD2/HD3 Channels provide new, original music as well as deep cuts into traditional genre.

How to tune in

The modes for receiving FM broadcasts consists of "Auto" mode that automatically searches available broadcast stations and "Manual" mode that lets you tune in using buttons to change the frequency. The default setting is "Auto". You can also use "Direct Tune" to tune in by entering the frequency directly.
In "Auto" mode, you cannot tune in to radio stations if the reception is not good. If this is the case, then use the "Manual" mode or "Direct Tune" to tune in.

Search Podcasts	Displays Internet radio stations in the podcasts that this unit can tune in to.
Recommended Stations	Displays recommended Internet radio stations.
radiomarantz. com	Displays Internet radio stations added to favorites in vTuner. For instructions on how to add to favorites in vTuner, see "Using vTuner to add Internet radio stations to favorites" (☞page 56).
Recently Played	Displays recently played Internet radio stations. Up to 20 stations stored in "Recently Played".
Search by Keyword	Displays Internet radio stations searched by keyword. For character input, see page 107.

5 **Repeat step 4 until the station list is displayed.**
The station list is displayed.

6 Use △▽ to select the station, then press **ENTER or ▷.**
Playback starts once buffering reaches "100%".

❏ Adjusting the sound quality (M-DAX)

Make this setting at "M-DAX" (☞page 111) in the menu.
You can use the "M-DAX" function to restore to a state close to the audio before compression while correcting the bass feel to enjoy a richer playback experience. The default setting is "Off".

❏ Switching the screen display

Press **STATUS** on the main unit.
The display switches between track title and radio station name etc. each time the button is pressed.

❏ Going back to the previous screen

Press ◁ or **BACK**.

❏ Changing the screen display duration

Make this setting at "Audio Display" (☞page 120) in the menu.
The default setting is "30s".
Press △▽◁ ▷ while the display is off to return to the original screen.

_✎_

- There are many Internet radio stations on the Internet, and the quality of the programs they broadcast as well as the bit rate of the tracks varies widely.
Generally, the higher the bit rate, the higher the sound quality, but depending on the communication lines and server traffic, the music or audio signals being streamed may be interrupted. Inversely, lower bit rates mean a lower sound quality but less tendency for the sound to be interrupted.
- "Radio station server full" or "Connection down" is displayed if the station is busy or not broadcasting.
- On this unit, folder and file names can be displayed as titles. Any characters that cannot be displayed are replaced with "." (period).

NOTE

The radio station database service may be suspended without notice.

Operations available through the OPTION button

Press the **OPTION** button to display a menu of functions that can be used on the TV screen. Select the function you want to use from this menu. You can easily find and use the desired function.

❏ **Searching content with keywords (Text Search)** (☞page 71)

❏ **Add to favorites from the Option menu (Favorite Memory)** (☞page 73)

❏ **Playing back music and a favorite picture at the same time (Picture View)** (☞page 74)

❏ Playing the last played Internet radio station

This unit memorizes the last played Internet radio station. If you press **INTERNET RADIO** to switch to the Internet radio function from another input source, the last Internet radio station you listened to is played.

Press INTERNET RADIO.
The source switches to "Internet Radio" and the last played radio station plays.

55
❑ Using vTuner to add Internet radio stations to favorites

There are many Internet radio stations in the world, and this unit can tune into these stations. But finding the radio station you want to hear may be difficult, because there are too many stations. If this is the case, then please use vTuner, an Internet radio station search website specifically designed for this unit. You can use your PC to search Internet radio stations and add them as your favorites. This unit can play radio stations added to vTuner.

1 **Check the MAC address of this unit (☞page 131).**

- The MAC address is necessary when you create an account for vTuner.

2 **Use your PC to access the vTuner website (http://www.radiomarantz.com).**
The vTuner login screen is displayed.

3 **Enter the MAC address of this unit, then click "Go".**
The account creation screen is displayed.

4 **Enter your E-mail address and a password of your choice.**
The account is registered and you can now log in.

5 **Enter your account information (E-mail address and password) and log in.**
The top menu of vTuner is displayed.

6 **Select the search criteria (genre, region, language, etc.) of your choice.**
The list of radio stations matching the criteria is displayed.

- You can also enter a keyword to search for a station you want to hear.

7 **Select the radio station of your choice from the list, and then click the Add to Favorites icon.**
The screen that lets you create a favorite group is displayed.

8 **Enter the name of the favorite group, then click "Go".**
A new favorite group that includes the selected radio station is created.

- Internet radio stations added to favorites in vTuner can be played from "radiomarantz.com" (☞page 54) with this unit.

Applying media sharing settings

Here, we apply the settings to share music files stored on a PC and NAS on the network.

❏ Sharing media stored in PC

If you are using a media server, be sure to apply this setting first.

When using Windows Media Player 12 (Windows 7)

NOTE

Perform this procedure after changing the control panel display to "Category".

1 In the PC's "Control Panel", select "Network and Internet" - "Choose homegroup and sharing options".

2 Select the "Stream my pictures, music, and videos to all devices on my home network" check box and select "Choose media streaming options".

3 Select "Allowed" in the drop-down list for "AV7701".

4 Select "Allowed" in the drop-down list for "Media programs on this PC and remote connections...".

5 Click "OK" to finish.

When using Windows Media Player 11

1 Start up Windows Media Player 11 on the PC.

2 Select "Media Sharing" in the "Library".

3 Click the "Share my media" check box, select "AV7701", and then click "Allow".

4 As you did in step 3, select the icon of the device (other PCs and mobile devices) you want to use as a media controller, and then click "Allow".

5 Click "OK" to finish.

Sharing media stored in NAS

Change settings on the NAS to allow this unit and other devices (PCs and mobile devices) used as media controllers to access the NAS. For details, see the owner's manual that came with the NAS.

Playing back files stored on a PC and NAS

Use this procedure to play music files, image files or playlists.

1 Prepare for playback.

① Check the network environment, then turn on this unit's power (☞page 27 "Connecting to a home network (LAN)").

② If settings are required, make the "Settings" (☞page 132).

③ Prepare the computer (☞Computer's operating instructions).

2 Press NETWORK.

3 Use △▽◁ ▷ to select "Media Server", then press ENTER.
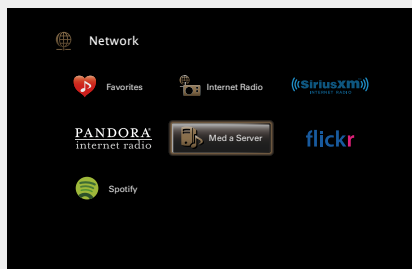

4 Use △▽ to select the server including the file to be played, then press ENTER or ▷.

5 Use △▽ to select the search item or folder, then press ENTER or ▷.

6 Repeat step 4 until the file is displayed.

7 Use △▽ to select the file, then press ENTER or ▷.
Playback starts once buffering reaches "100%".

❏ Adjusting the sound quality (M-DAX)
Make this setting at "M-DAX" (☞page 111) in the menu.
You can use the "M-DAX" function to restore to a state close to the audio before compression while correcting the bass feel to enjoy a richer playback experience. The default setting is "Off".

❏ Switching the screen display
Press STATUS on the main unit.
The display switches between track title, artist name, and album title each time the button is pressed.

❏ Going back to the previous screen
Press ◁ or BACK.

❏ Changing the screen display duration
Make this setting at "Audio Display" (☞page 120) in the menu.
The default setting is "30s".
Press △▽◁ ▷ while the display is off to return to the original screen.

✎

- When a WMA (Windows Media Audio), MP3 or MPEG-4 AAC file includes album art data, the album art can be displayed while the music files are playing.
- If you use Ver. 11 or later of Windows Media Player, the album art for WMA files can be displayed.
- WMA Lossless files can be played when using a server supporting transcoding, such as Windows Media Player Ver. 11 or later.

NOTE

- Depending on the size of the still picture (JPEG) file, some time may be required for the file to be displayed.
- The order in which the tracks/files are displayed depends on the server specifications. If the tracks/ files are not displayed in alphabetical order due to the server specifications, searching by the first letter may not work properly.

Selecting a listening mode (Sound Mode)

This unit allows you to enjoy various kinds of surround and stereo playbacks.

Multi-channel audio formats are adopted by many of the contents including Blu-ray disc and DVD as well as digital broadcasting and Internet-delivered movies and music.
This unit supports playback of almost all of these multi-channel audio formats. It also supports surround playback of audio formats other than multi-channel audio such as 2-channel stereo audio.

This unit automatically generates a list of all the playable sound modes based on the input audio format and the current speaker setup configuration and displays the list on the screen. Therefore, you can select a correct surround playback mode even if you are not familiar with sound mode selection. Try out various surround playback modes and enjoy surround playback in your favorite mode.

[Example] When **MOVIE** is pressed and held

```
        MOVIE SOUND

```

The displayed sound modes include the 2-channel stereo playback mode.

For audio formats recorded in a disc, see the disc jacket.

Selecting a listening mode

1 Play the selected device (☞page 37 – 69).

2 Press and hold **MOVIE, MUSIC or GAME** to select a listening mode.
This unit automatically generates and displays a list of selectable sound modes.

• Each time **MOVIE**, **MUSIC** or **GAME** is pressed, the listening mode is switched.

(MOVIE) Switches to the listening mode suitable for enjoying movies and TV programs.

(MUSIC) Switches to the listening mode suitable for enjoying music.

(GAME) Switches to the listening mode suitable for enjoying games.

• Pressing **MOVIE**, **MUSIC** or **GAME** displays a list of the listening modes that can be selected. Each time you press **MOVIE**, **MUSIC** or **GAME**, the listening mode changes.
• While the list is displayed, you can also use $\triangle\nabla$ to select a listening mode.
• The **MOVIE**, **MUSIC**, or **GAME** button memorizes the last sound mode selected for its button. Pressing **MOVIE**, **MUSIC**, or **GAME** recalls the same sound mode as the one selected at the previous playback.
• If the content played back does not support the previously selected sound mode, the most standard sound mode for the content is automatically selected.
• This can also be set by pressing **MOVIE**, **MUSIC**, or **GAME** on the main unit.

❏ Description of listening mode types

Dolby listening mode

Listening mode type	Description
DOLBY PLⅡx*1	This mode can be selected when a Dolby Pro Logic Ⅱx decoder is used to play back 2-channel source in 6.1/7.1-channel surround sound including the surround back channel. By adding the surround back channel, a stronger surround feeling is obtained compared to Dolby Pro Logic Ⅱ. There are three playback modes: "Movie" mode that is optimized for movie playback, "Music" mode that is optimized for music playback, and "Game" mode that is optimized for game play.
DOLBY PLⅡ	This mode can be selected when a Dolby Pro Logic Ⅱ decoder is used to play back 2-channel source in 5.1-channel surround sound with a natural, realistic feel.
DOLBY Pro Logic	This mode can be selected when a Dolby Pro Logic decoder is used to play 2-channel source in 4.1-channel surround sound (Left/Center/Right/Surround Mono).
DOLBY PLⅡz*2	This mode can be selected when a Dolby Pro Logic Ⅱz decoder is used to play back 2-channel source in 7.1-channel surround sound with added front height channel. By adding a front height channel, the vertical expression is emphasized, improving the three-dimensionality of the sound.
DOLBY DIGITAL	This mode can be selected when playing sources recorded with Dolby Digital.
DOLBY DIGITAL EX*1	Using a Dolby Digital EX decoder, this mode plays Dolby Digital source in 6.1/7.1 channel surround sound with added surround back channel. By adding a surround back channel, spacial expressiveness and sound localization are enhanced.
DOLBY TrueHD	This mode can be selected when playing sources recorded in Dolby TrueHD.
DOLBY DIGITAL Plus	This mode can be selected when playing sources recorded with Dolby Digital Plus.

*1 This can be selected when "Speaker Config." – "Surr. Back" is not set to "None".
*2 This can be selected when "Speaker Config." – "Front Height" is not set to "None".

DTS listening mode

Listening mode type	Description
DTS NEO:6	This mode can be selected when a DTS NEO:6 decoder is used to play back 2-channel source in 6.1/7.1-channel surround sound including the surround back channel. There is a "Cinema" mode optimized for movie playback, and a "Music" mode optimized for music playback.
DTS SURROUND	This mode can be selected when playing sources recorded in DTS.
DTS ES DSCRT6.1*	This mode is suitable for playing discs recorded in DTS-ES. The surround back channel added using the discrete method is played as an independent channel. Since all channels are independent, the 360-degree spacial expressiveness and sound localization are enhanced.
DTS ES MTRX6.1*	This mode is suitable for playing discs recorded in DTS-ES. The surround back channel added to the surround-left and surround-right channels by a matrix encoder at software recording time is decoded by this unit's matrix decoder and played from each channel (surround left, surround right, surround back).
DTS 96/24	This mode can be selected when playing sources recorded in DTS 96/24.
DTS-HD	This mode can be selected when playing sources recorded in DTS-HD.
DTS Express	This mode can be selected when playing sources recorded in DTS Express.

* This can be selected when "Speaker Config." – "Surr. Back" is not set to "None".

PCM multi-channel listening mode

Listening mode type	Description
MULTI CH IN	This mode can be selected when playing multi-channel PCM sources .

81

Audyssey DSX listening mode

Listening mode type	Description
Audyssey DSX (A-DSX)✱	This mode creates playback for the new channels (front wide or front height) in 5.1-channel systems. By adding front wide or front high channels, the surround sound effects sound more three dimensional and realistic.

✱ This can be selected when a setting other than "None" is selected for "Front Height" or "Front Wide", and a setting other than "None" is selected for "Center" in "Speaker Config." (☞page 127).

Original listening mode

Listening mode type	Description
MULTI CH STEREO	This mode is for enjoying stereo sound from all speakers. The same sound as that from the front speakers (L/R) is played back at the same level from the surround speakers (L/R) and surround back speakers (L/R).
VIRTUAL	This mode is for enjoying surround effects using only the front speakers or headphones.

AUTO listening mode

Listening mode type	Description
AUTO	In this mode, the type of digital signal input, such as Dolby Digital, Dolby TrueHD, Dolby Digital Plus, DTS, DTS-HD, PCM (multi-channel) is detected, and the playback mode switches automatically to the corresponding mode. If the input signal is analog or PCM (2-channel), stereo playback is used.

STEREO listening mode

Listening mode type	Description
STEREO	This is the mode for playing in stereo. The tone can be adjusted. • Sound is output from the front left and right speakers and subwoofer. • If multichannel signals are input, they are mixed down to 2-channel audio and are played.

Direct listening mode

Listening mode type	Description
DIRECT	Sound recorded in source is played as is.
PURE DIRECT	This mode is for playback in higher sound quality than in DIRECT mode. Turn the display of the amplifier off to stop the analogue video circuit. This suppresses the source of noise that affects sound quality.

Install

Determine the speaker system depending on the number of speakers you are using and install each speaker and subwoofer in the room. Here, we explain how to install the speakers using a typical example.

This unit is compatible with Audyssey DSX® (☞page 166) and Dolby Pro Logic IIz (☞page 166), which offers an even wider and deeper surround sensation.
When using Audyssey DSX™, install front wide speakers or front height speakers.
When using Dolby Pro Logic IIz, install front height speakers.

NOTE

When not connecting an IR receiver, make sure to enable the remote control signal receiving function. When the function is disabled, you can not perform operations with the remote control unit.

Remotely connecting marantz devices

- When you are using a marantz device other than this unit that supports remote connection, an IR receiver is not necessary.
- You can transmit remote control signals just by connecting the device to the REMOTE CONTROL IN/OUT connector with a monaural cable.
- Set the remote control switch located on the rear panel of the connected audio component to "EXTERNAL" or "EXT." to use this feature.
- If a marantz power amplifier (excluding certain models is connected to any of these connectors, the power of the power amplifier switches to on/standby in conjunction with the ⏻ **ON/STANDBY** button of the this unit.

Connecting an external control device

RS-232C connector

When you connect an external control device, you can control this unit with the external control device (such as power supply operation, volume adjustment, and input source switching).

External serial controller
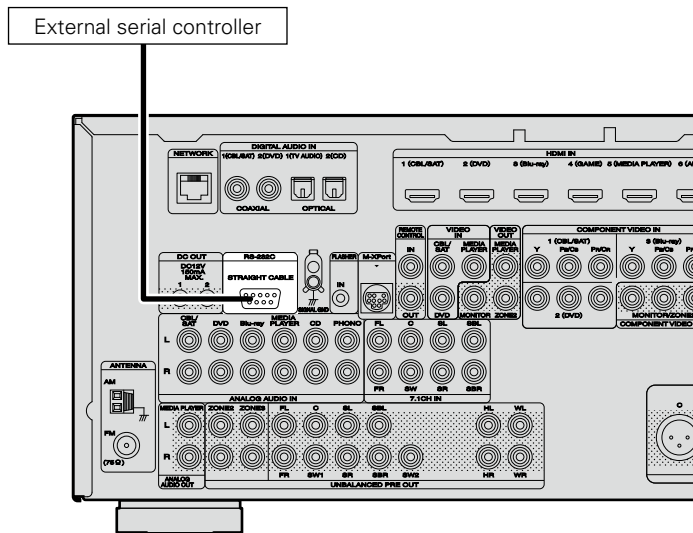

Perform the operation below beforehand.
① Turn on the power of this unit.
② Turn off the power of this unit from the external controller.
③ Check that the unit is in the standby mode.

DC OUT jacks

When a device with DC IN jack is connected, the connected device's power on/standby can be controlled through linked operation to this unit.
The DC OUT jack outputs a maximum 12 V/150 mA electrical signal.

12 V/150 mA trigger-compatible device
NOTE

- Use the monaural mini-plug cable for connecting DC OUT jacks. Do not use the stereo mini-plug cable.
- If the permissible trigger input level for the connected device is larger than 12 V/150 mA, or has shorted, the DC OUT jack cannot be used. In this case, turn off the power to the unit, and disconnect it.

Playback (Advanced operation)

HDMI control function

If you connect the unit and an HDMI control function compatible TV or player with an HDMI cable and then enable the HDMI control function setting on each device, the devices will be able to control each other.

❏ Operations possible by HDMI control

- **This unit power off can be linked to the TV power off step.**
- **You can switch audio output devices with a TV operation.**
  When you set "Output audio from amp" in the TV audio output setup operation, you can switch the amp power on.
- **You can adjust this unit volume in the TV volume adjustment operation.**
- **You can switch this unit input sources through linkage to TV input switching.**
- **When playing the player, this unit input source switches to the source for that player.**
- **If you switch the input source of the unit to "TV AUDIO", you can play TV audio with this unit (☞page 9 "About ARC (Audio Return Channel) function").**
- **When "HDMI Control" (☞page 117) in the menu is set to "On", signals input to the HDMI input connector are output to the television or other device connected to the HDMI output connector, even if the power of this unit is in standby (pass-through function).**

✎

- To use this unit to play the audio of a TV that does not support the ARC function, connect the TV with an optical-digital or analog connection (☞page 9).
- To use the pass-through function, connect an HDMI connection device that is compatible with HDMI control.

❏ Setting procedure

1 **Set the HDMI output connector corresponding with the HDMI control function.**
Set "HDMI Control" (☞page 117) to "On".

2 **Turn the power on for all the devices connected by HDMI cable.**

3 **Set the HDMI control function for all devices connected by HDMI cable.**

- Please consult the operating instructions for the connected devices to check the settings.
- Carry out steps 2 and 3 should any of the devices be unplugged.

4 **Switch the television input to the HDMI input connected to this unit.**

5 **Switch this unit input to the HDMI input source and check if the picture from the player is ok.**

6 **When you turn the TV's power to standby, check that the power of this unit also goes to standby.**

92

If the HDMI control function does not operate properly, check the following points.
• Is the TV or player compatible with the HDMI control function?
• Is "HDMI Control" (☞page 117) set to "On"?
• Is "Power Off Control" (☞page 117) set to "All" or "Video"?
• Is "Control Monitor" (☞page 117) set for the monitor output connected to television?
• Is "Control Monitor" (☞page 117) set to the TV that uses the HDMI control function when this unit is connected to two TVs that support HDMI connectors?
• Are the HDMI control function settings of all devices correct?

NOTE

• **When "HDMI Control" is set to "On", it consumes more standby power.**
• The HDMI control function controls operations of a TV that is compatible with the HDMI control function. Make sure that the TV and HDMI are connected when you perform HDMI control.
• Some functions may not operate depending on the connected TV or player. Check the owner's manual of each device for details beforehand.
• When "Power Off Control" on the menu is set to "Off" (☞page 117), this unit is not set to standby even if the connected device is in the standby mode.
• When connection changes are implemented, such as adding connections to HDMI devices, linked operations may be initialized. In this case, you will need to reconfigure the settings.
• When "HDMI Control" is set to "On", it is not possible to assign an HDMI connector to "TV AUDIO" at "Input Assign" (☞page 122).
• Should any of the operations below be performed, the interlocking function may be reset, in which case, repeat steps 2 and 3.
  • "Input Assign" – "HDMI" (☞page 122) setting has changed.
  • "Video Output" (☞page 117) setting is changed.
  • There is a change to the connection between the devices and the HDMI, or an increase in devices.
• The HDMI ZONE2 function is not compatible with the HDMI control function.
• When the HDMI ZONE2 function is used with "HDMI Control" in the menu set to "On", the HDMI ZONE2 function may not fully work.
• If "HDMI Control" in the menu is set to "On" and the power of ZONE2 is on, this units may behave as follows. It is recommended to disable the HDMI control function on your TV and player when using the HDMI ZONE2 function. (Some example behaviors are listed below.)
  • When the power of the TV used for MAIN ZONE is off and the player selected for ZONE2 starts playback, the TV used for MAIN ZONE is turned on. In this case, the input source selected for MAIN ZONE changes to the input source selected for ZONE2.
  • When playing back a TV used for MAIN ZONE and ZONE2 with an HDMI connection, turning off the TV used for MAIN ZONE also turns off this unit and the player.
  • When a same input source is selected for MAIN ZONE and ZONE2, stopping playback of the player on the TV stops the playback on the player and the video being played back in ZONE2 as well.
Sleep timer function

- You can have the power automatically switched to standby once a set time has elapsed. This is convenient for viewing and listening while going to sleep.
- The sleep timer function can be set for each zone (☞page 102 "Sleep timer function"). (The MAIN ZONE setting method is explained here.)

1 **Press ZONE SELECT to switch "MAIN".**

2 **Press SLEEP and display the time you want to set.**
The **S** indicator on the display lights.

- If **SLLEP** on the main unit is pressed, the same function as with the remote control unit can be obtained.

- The time switches as shown below each time **SLEEP** is pressed.

```
  ┌──→ Off ──→ 10 min ──→ 20 ──→ 30 ──→ 40 ──→ 50 ──┐
  └─ 120 ←─110 ←─100 ←─ 90 ←─ 80 ←─ 70 ←─ 60 ←──┘
```
To confirm the countdown time before putting the unit to sleep

Press **SLEEP**.
"Sleep : ✳min" appears on the display.
✳ Countdown time

To cancel the sleep timer

Press **SLEEP** to set "Off".
The **S** indicator on the display turns off.

✎

- The sleep timer setting is canceled if this unit's power is set to standby.
- The sleep timer function can be set separately for the different zones (☞page 102 "Sleep timer function").

NOTE

The sleep timer function cannot turn off the power of devices connected to this unit. To turn off the power of those connected devices, set up sleep timers on the connected devices themselves.

Various memory functions

Personal memory plus function

This function sets the settings (input mode, sound mode, HDMI output mode, MultEQ® XT, Dynamic EQ, audio delay etc.) last selected for the individual input sources.

The surround parameters, tone settings and the volumes of the different speakers are stored for the individual sound modes.

Last function memory

This function stores the settings which were made before going into the standby mode.
When the power is turned back on, the settings are restored.

Playback in ZONE2/ZONE3 (Separate room)

- You can operate this unit so as to enjoy audio in a room (ZONE2, ZONE3) other than the MAIN ZONE (room where the unit is located).
- You can simultaneously play back the same source in both the MAIN ZONE, ZONE2 and ZONE3. You can also play back separate sources in the MAIN ZONE, ZONE2 and ZONE3.
- When a TV is connected to the HDMI ZONE2 OUT connector, you can play back a video or audio from the device connected to the HDMI 1 – 6 IN connector in ZONE2 (**HDMI ZONE2 function**).

The source selected for ZONE2 is also output from the recording output connectors (MEDIA PLAYER).

NOTE

The following restrictions apply to the HDMI ZONE2 function.
- If you select a same input source for MAIN ZONE and ZONE2, audio playback may be restricted or video may be interrupted.
- Video may not be output depending on the resolution of the TV used for MAIN ZONE and ZONE2. In this case, use your player to set the resolution of the TV.
- The HDMI audio signals for the input source selected in ZONE2 are not output from the ZONE2 speakers.
- When HDMI ZONE2 function is used, you cannot set the following.
  - Picture Adjust
  - Auto Lip Sync
  - Video Mode
  - Video Conversion
  - i/p Scaler
  - Progressive Mode
  - Aspect Ratio
 - Setup menu display

Audio output

It is possible to play 2-channel audio in rooms other than the MAIN ZONE where multi-channel playback is done. Choose one of the methods.
- Zone playback by audio output (PRE OUT)
  Use an external amplifier.

Zone playback by audio output (PRE OUT)

❑ Audio connections (ZONE2, ZONE3)

The audio signals of this unit's ZONE2 and ZONE3 audio output terminals are output to the ZONE2 and ZONE3 amplifiers and played on these amplifiers.
We recommend using high quality pin-plug cables for audio connections in order to prevent noise.
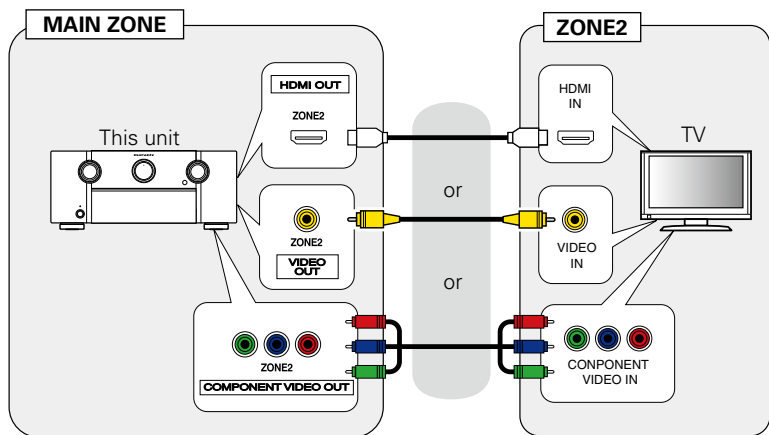

NOTE

In ZONE2 or ZONE3, the digital audio signals input from the HDMI, COAXIAL or OPTICAL connector cannot be played back. When playing back in ZONE2 or ZONE3, make an analog connection.

Video output

Video Connection

The video signals of this unit's ZONE2 video output connector are played by the ZONE2 TV.

When "Component Video Out" (☞page 119) in the menu is set to "ZONE2", the component video output connector outputs the ZONE2 video.

NOTE

The menu screen is not output.

To confirm the countdown time before putting the unit to sleep

Press **SLEEP**.
"Z2 Sleep : ✱min" or "Z3 Sleep : ✱min" appears on the display.
✱ Countdown time

To cancel the sleep timer

Press **SLEEP** to set "Off".

✎

The sleep timer is also cancelled when this unit is set to the standby mode or the ZONE2 or ZONE3 power is turned off.

NOTE

The sleep timer function cannot turn off the power of devices connected to this unit. To turn off the power of those connected devices, set up sleep timers on the connected devices themselves.

You can adjust the surround audio sound field effects to match your preferences.
The items (parameters) that can be adjusted depend on the signal being input and the currently set sound mode. For details on the adjustable parameters, see "Sound modes and surround parameters" (☞page 158).
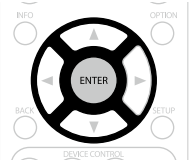

NOTE

- Some setting items cannot be set while playback is stopped. Make the settings during playback.
- When the sound mode is "PURE DIRECT", you cannot set the surround parameters.

Setting items	Setting details
Home Theater EQ Softens the treble range of movie soundtracks for better understanding.	**On** : "Home Theater EQ" is used. **Off** : "Home Theater EQ" is not used.
Loudness Management This can be set in the Dolby TrueHD mode. This sets whether to output as specified in "Dynamic Compression" or output directly without compressing the dynamic range of audio recorded in the disc.	**On** : Outputs using the settings made in "Dynamic Compression". **Off** : "Dynamic Compression" settings and "Dialogue normalization" (☞page 137) are disabled, and the signals on the disk are output as is.
Dynamic Compression Compress dynamic range (difference between loud and soft sounds).	**Auto** : Automatic dynamic range compression on/off control according to source. **Low** / **Medium** / **High** : These set the compression level. **Off** : Dynamic range compression always off. ✏ You can set "Auto" only for the Dolby TrueHD source.

Setting items	Setting details
Low Frequency Effects Adjust the low-frequency effects level (LFE).	❏ **When "Input Mode" (☞page 124) is set other than to "7.1CH IN"** **–10dB – 0dB** ❏ **When "Input Mode" (☞page 124) is set to "7.1CH IN"** **0dB** / **+5dB** / **+10dB** / **+15dB** ✏ For proper playback of the different sources, we recommend setting to the values below. • Dolby Digital sources : "0dB" • DTS movie sources : "0dB" • DTS music sources : "–10dB"
Center Image Distributes the dialogue output from the center channel to the front left and right channels and widens the sound image in the front. You can set this when the sound mode is set to DTS NEO:6 in the "Music" mode.	**0.0 – 1.0 (0.3)** ✏ The smaller the value, the more dialogue is concentrated on the center channel. The larger the value, the more dialogue is distributed to front left and right channels, and the more the sound image widens in the front.
Panorama Assign front L/R signal also to surround channels for wider sound. You can set this when the sound mode is Dolby PLⅡ in the "Music" mode.	**On** : Set. **Off** : Do not set.
Dimension Shift sound image center to front or rear to adjust playback balance. You can set this when the sound mode is Dolby PLⅡ in the "Music" mode.	**0 – 6 (3)** ✏ As you set a smaller number, the surround sound field shifts backward; as you set a larger number, the surround sound field shifts forward.

Setting items	Setting details
Center Width Distributes the dialogue output from the center channel to left and right channels and widens the sound image in the front. You can set this when the sound mode is Dolby PLⅡx in the "Music" mode.	**0 – 7 (3)** ✎ The smaller the value, the more dialogue is concentrated on the center channel. The larger the value, the more dialogue is distributed to front left and right channels, and the more the sound image widens in the front.
Height Gain Control the front height channel volume.	**Low** : Reduce the front height channel volume. **Normal** : Front height channel sound is output with standard sound volume. **High** : Increase the front height channel volume. **NOTE** "Height Gain" is displayed for the following settings. • When the "Speaker Config." – "Front Height" setting (☞page 128) is set other than to "None". • When sound mode is "PLⅡz" or the PLⅡz decoder is used.
Speaker Select Make settings for the speakers outputting sound when playing back in original surround mode.	**Surround Back** : Sound is output from the surround back speakers. **Height** : Sound is output from the front height speakers. **Wide** : Sound is output from the front wide speakers. **Off** : Sound is not output from the surround back speakers, front wide speakers and front height speakers. **NOTE** Only speakers that are set to something other than "None" in "Speaker Config." (☞page 127) can be selected.
Set Defaults The "Surround Parameter" settings are returned to the default settings.	**Yes** : Reset to the defaults. **No** : Do not reset to the defaults. ✎ When you select "Set Defaults" and press **ENTER**, the "Reset to the default values?" prompt is displayed. Select either "Yes" or "No", and press **ENTER**.

Tone

Default settings are underlined.

Adjust the tonal quality of the sound.

Setting items	Setting details
Tone Control Set the tone control function to "On" and "Off".	**On** : Allow tone adjustment (bass, treble). **Off** : Playback without tone adjustment. ✎ "Tone Control" can be set when "Dynamic EQ" (☞page 113) is set to "Off". **NOTE** • "Tone Control" settings are not reflected to ZONE2 and ZONE3. • The tone cannot be adjusted in the "DIRECT" or "PURE DIRECT" mode.
Bass Adjust bass.	**–6dB – +6dB (0dB)** ✎ "Bass" can be set when the menu "Tone Control" setting is "On".
Treble Adjust treble.	**–6dB – +6dB (0dB)** ✎ "Treble" can be set when the menu "Tone Control" setting is "On".

Dialogue Level

Default settings are underlined.

Sets the output level to clarify the dialogue output from the center channel.

Setting items	Setting details
Dialogue	**–12.0dB – +12.0dB (0dB)**

Subwoofer Level

Default settings are underlined.
Sets the subwoofer on/off and its output level.

Setting items	Setting details
Subwoofer Turn subwoofer output on and off.	**On** : The subwoofer is used. **Off** : The subwoofer is not used. **NOTE** This can be set when the sound mode is "DIRECT" or "PURE DIRECT" (☞page 77) and the "Subwoofer Mode" (☞page 128) is "LFE+Main".
Subwoofer Level Set the subwoofer output level.	**–12.0dB – +12.0dB (0dB)**

M-DAX

Default settings are underlined.

Compressed audio formats such as MP3, WMA (Windows Media Audio) and MPEG-4 AAC reduce the amount of data by eliminating signal components that are hard for the human ear to hear. The M-DAX function generates the signals eliminated upon compression, restoring the sound to conditions near those of the original sound before compression. It also corrects the sense of volume of the bass to obtain richer sound with compressed audio signals.

Setting items	Setting details
Mode Set the mode for M-DAX.	**Off** : Do not use M-DAX. **Low** : Optimized mode for compressed sources with normal highs. **Mid** : Apply suitable bass and treble boost for all compressed sources. **High** : Optimized mode for compressed sources with very weak highs. ✍ • This item can be set with analog signals or PCM signal (Sample rate = 44.1/48 kHz) is input. • "M-DAX" settings are stored for each input source. • When set to "Off", the M-DAX indicator on the front panel switches off. • This cannot be set when the surround mode is set to "DIRECT" or "PURE DIRECT". • This can also be set by pressing **M-DAX** on the main unit. Each time **M-DAX** is pressed, the setting is changed as shown below. Off → Low → Mid → High (loops back)

Audio Delay

Default settings are underlined.

While viewing video, manually adjust the time to delay audio output.

Setting details

0ms – 200ms

- This item can be set within the range of 0 to 100 ms when "Auto Lip Sync" (☞page 116) is set to "On" and when a TV compatible with Auto Lip Sync is connected.
- Store "Audio Delay" for each input source.
- Audio Delay for game mode can be set when "Video Mode" (☞page 118) is set to "Auto" or "Game".

Volume

Default settings are underlined.

Set the MAIN ZONE (room where the unit is located) volume setting.

Setting items	Setting details
Scale Set how volume is displayed.	**0 – 98** : Display in the range 0 (Min) to 98. **–79.5dB – 18.0dB** : Display -–dB (Min), in the range –79.5 dB to 18.0 dB. • The "Scale" setting is applied also to the "Limit" and "Power On Level" display method. • The "Scale" setting applies to all zones.
Limit Make a setting for maximum volume.	**Off** : Do not set a maximum volume. **60 (–20dB) / 70 (–10dB) / 80 (0dB)**
Power On Level Define the volume setting that is active when the power is turned on.	**Last** : Use the memorized setting from the last session. **Mute** : Always use the muting on condition when power is turned on. **1 – 98 (–79dB – 18dB)** : The volume is adjusted to the set level.
Mute Level Set the amount of attenuation when muting is on.	**Full** : The sound is muted entirely. **–40dB** : The sound is attenuated by 40 dB down. **–20dB** : The sound is attenuated by 20 dB down.

Audyssey

Default settings are underlined.

Set Audyssey MultEQ® XT, Audyssey Dynamic EQ® and Audyssey Dynamic Volume®. These can be selected after Audyssey® Setup has been performed. For additional information on Audyssey technology, please see page 166.

NOTE

- If you have not performed Audyssey® Setup, or if you change the speaker settings after performing Audyssey® Setup, you may not be able to select Dynamic EQ/Dynamic Volume.
  In this case, either perform Audyssey® Setup over again or perform "Restore..." (☞page 35) to return to the settings after Audyssey® Setup was run.
- When HD Audio for which the sampling frequency exceeds 96 kHz is played back, the "Audyssey" cannot be set.

| Setting items	Setting details
MultEQ® XT MultEQ® XT compensates for both time and frequency characteristics of the listening area based on "Audyssey® Setup" measurement results. Selection is done from three types of compensation curves. We recommend the "Audyssey" setting. MultEQ® XT is the prerequisite function for Dynamic EQ and Dynamic Volume.	**Audyssey** : Optimize the frequency response of all speakers. **Audyssey Byp. L/R** : Optimize frequency response of speakers except front L and R speakers. **Audyssey Flat** : Optimize frequency response of all speakers to flat response. **Graphic EQ** : Apply frequency response set with "Graphic EQ" (☞page 114). **Off** : Turn "MultEQ® XT" equalizer off. • "Audyssey", "Audyssey Byp. L/R" and "Audyssey Flat" can be selected after "Audyssey® Setup" has been performed. "Audyssey" is automatically selected after performing "Audyssey® Setup". When "Audyssey", "Audyssey Byp. L/R" or "Audyssey Flat" is selected, ᴧUDYSSEY illuminates. • After running "Audyssey® Setup", if the Speaker Configuration, Distance, Channel Level, and Crossover Frequency have changed without increasing the number of speakers measured, only ᴧUDYSSEY illuminates. **NOTE** When using headphones, "MultEQ® XT" is automatically set to "Off".
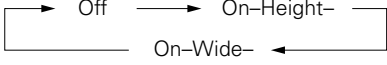

"MultEQ® XT", "Dynamic EQ" and "Dynamic Volume" settings are stored for each input source.

Setting items	Setting details
Dynamic EQ Solve the problem of deteriorating sound quality as volume is decreased by taking into account human perception and room acoustics. Works with MultEQ® XT.	**On** : Use Dynamic EQ. **Off** : Do not use Dynamic EQ. • ΛUDYSSEY is displayed when set to "On". • This can also be set by pressing **DYNAMIC EQ** on the main unit. Each time **DYNAMIC EQ** is pressed, the setting is changed as shown below. On ⟷ Off **NOTE** When the menu "Dynamic EQ" setting is "On", it is not possible to do "Tone Control" (☞page 110) adjustment.
Reference Level Offset Audyssey Dynamic EQ® is referenced to the standard film mix level. It makes adjustments to maintain the reference response and surround envelopment when the volume is turned down from 0 dB. However, film reference level is not always used in music or other non-film content. Dynamic EQ Reference Level Offset provides three offsets from the film level reference (5 dB, 10 dB, and 15 dB) that can be selected when the mix level of the content is not within the standard. Recommended setting levels are shown at right.	**0dB** (Film Ref) : This is the default setting and should be used when listening to movies. **5dB** : Select this setting for content that has a very wide dynamic range, such as classical music. **10dB** : Select this setting for jazz or other music that has a wider dynamic range. This setting should also be selected for TV content as that is usually mixed at 10 dB below film reference. **15dB** : Select this setting for pop/rock music or other program material that is mixed at very high listening levels and has a compressed dynamic range. Setting is enabled when "Dynamic EQ" is "On" (☞page 113).

Setting items	Setting details
Dynamic Volume Solve the problem of large variations in volume level between TV, movies and other content (between quiet passages and loud passages, etc.) by automatically adjusting to the user's preferred volume setting.	**Heavy** : Most adjustment to softest and loudest sounds. **Medium** : Medium adjustment to loudest and softest sound. **Light** : Least adjustment to loudest and softest sounds. **Off** : Do not use "Dynamic Volume". • ΛUDYSSEY is displayed when set to "Heavy", "Medium" or "Light". • If "Dynamic Volume" is set to "Yes" in "Audyssey® Setup" (☞page 33), the setting is automatically changed to "Medium". • This can also be set by pressing **DYNAMIC VOL** on the main unit. Each time **DYNAMIC VOL** is pressed, the setting is changed as shown below. Off → Heavy Light ← Medium
Audyssey DSX® Provides more immersive surround sound by adding the new channels.	**On–Height–** : Turn on A-DSX processing for height expansion. **On–Wide–** : Turn on A-DSX processing for wide expansion. **Off** : Do not set Audyssey DSX®. This can also be set by pressing **A-DSX** on the main unit. Each time **A-DSX** is pressed, the setting is changed as shown below. Off → On–Height– On–Wide– **NOTE** "Audyssey DSX®" cannot be configured if the HD Audio source being played includes Front height and Front wide channels. In this case, the respective channels are played back using the input signals.

| Setting items	Setting details
Stage Height Adjust sound stage height when using front height speakers.	**−10 – +10 (0)** ✐ • "Audyssey DSX®" can be set when you are using front height speakers or front wide speakers. • "Audyssey DSX®" is only valid when using a center speaker. • "Audyssey DSX®" is valid when surround mode is DOLBY listening mode or DTS listening mode other than PLⅡz Height. **About Audyssey Dynamic Surround Expansion (A-DSX)** Audyssey DSX® is a scalable system that adds new speakers to improve surround impression. Starting with a 5.1 system Audyssey DSX® first adds Wide channels for the biggest impact on envelopment. Research in human hearing has proven that information from the Wide channels is much more critical in the presentation of a realistic soundstage than the Back Surround channels found in traditional 7.1 systems. Audyssey DSX® then creates a pair of Height channels to reproduce the next most important acoustical and perceptual cues. In addition to these new Wide and Height channels, Audyssey DSX® applies Surround Envelopment Processing to enhance the blend between the front and surround channels.
Stage Width Adjust sound stage width when using front wide speakers.	**−10 – +10 (0)**

Graphic EQ

<u>Default settings are underlined.</u>

Use the graphic equalizer to adjust the tone of each speaker.
"Graphic EQ" can be set when "MultEQ® XT" setting (☞page 112) is "Graphic EQ".

Setting items	Setting details
Speaker Selection Select whether to adjust tones for individual speakers or for all speakers.	**All** : Adjust the tone of all speakers together. <u>**Left/Right**</u> : Adjust the tone of left and right speakers together. **Each** : Adjust the tone of each speaker.

Adjust EQ
Adjust tones for each frequency band. Adjust the speaker selected in "Speaker Selection".
	① Select the speaker.
	② Select the adjustment frequency band.
	  63Hz / 125Hz / 250Hz / 500Hz / 1kHz / 2kHz / 4kHz / 8kHz / 16kHz

Items that can be set with the "Video" procedure

Picture Adjust

Default settings are underlined.

Picture quality can be adjusted.
We recommend leaving the settings unchanged from the default settings. First adjust the display image quality on your TV, and use this menu only when you want to make fine adjustments.

- This item can be set when the input source is `CBL/SAT` `DVD` `Blu-ray` `GAME` `AUX1` `AUX2` `MEDIA PLAYER` `CD` `NETWORK` `TV AUDIO`.
- With input sources other than the ones above, this item can be set when "Video Select" is selected. In this case, the original input source settings are called out.
- Can be set when the "Video Conversion" setting (v page 118) is "On".
- "Blu-ray", "GAME", "AUX2", "TV AUDIO" or "CD" can be set when "HDMI" or "COMP" (v page 122, 123) has been assigned.

Noise Reduction Reduce overall video noise.	<u>Off</u> / Low / Medium / High
Enhancer Emphasize picture contours.	<u>0</u> – +12

- "Picture Adjust" can not be set when video and component video signals are output.
- "Picture Adjust" can not be set when 4K signals are input.

HDMI Setup

Default settings are underlined.

Make settings for HDMI video/audio output.

Setting items	Setting details
Auto Lip Sync Make automatic compensation for timing shift in audio and video output.	<u>On</u> : Compensated. **Off** : Not compensated.
HDMI Audio Out Select HDMI audio output device.	<u>AVP</u> : Play back through speakers connected to Power Amplifier. (Audio is output from the PRE OUT terminal0 on this unit.) **TV** : Play back through TV connected to the unit.

- The audio signal input from the HDMI input connector can be output as an output signal from the HDMI output connector by setting the HDMI audio output destination to TV.
  Audio signals input via the Analog/Coaxial/Optical input connectors cannot be output from the HDMI output connector.
- When the HDMI control function is activated, priority is given to the TV audio setting (v page 92 "HDMI control function").

Setting items	Setting details
Video Output Make settings for HDMI monitor output.	**Auto (Dual)** : The presence of a TV connected to the HDMI MONITOR 1 or HDMI MONITOR 2 connector is detected automatically, and that TV connection is used. **Monitor 1** : A TV connected to the HDMI MONITOR 1 connector is always used. Video is not output from the TV connected to the HDMI MONITOR 2 connector. **Monitor 2** : A TV connected to the HDMI MONITOR 2 connector is always used. Video is not output from the TV connected to the HDMI MONITOR 1 connector. ✎ • If both the HDMI MONITOR 1 and HDMI MONITOR 2 connectors are connected and "Resolution" (☞page 118) is set to "Auto", the signals are output with a resolution compatible with both TV. • With "Resolution" (☞page 118) not set to "Auto", check whether the TV you are using is compatible with the resolution under "Video" – "Monitor" (☞page 137). • This can also be set by pressing **HDMI OUT** on the main unit. Each time **HDMI OUT** is pressed, the setting is changed as shown below. Auto (Dual) → Monitor 1 → Monitor 2 → **NOTE** Depending on the monitor you have connected, the display may not be correct when you set to "Auto (Dual)". In such a case, set to either "Monitor 1" or "Monitor 2".
HDMI Control You can link operations with devices connected to HDMI and compatible with HDMI Control.	**On** : Use HDMI control function. **Off** : Do not use HDMI control function. ✎ • When a device that is not compatible with the HDMI control function is connected, set "HDMI Control" to "Off". • Please consult the operating instructions for each connected device to check the settings. • Refer to "HDMI control function" (☞page 92) for more information about the HDMI control function. **NOTE** • **When "HDMI Control" is set to "On", it consumes more standby power.** If you are not using this unit for an extended period, it is recommended that you unplug the power cord from the power outlet. • The HDMI control function controls operations of a TV that is compatible with the HDMI control function. Make sure that the TV and HDMI are connected when you perform HDMI control. • If the "HDMI Control" settings have been changed, always reset the power to connected devices after the change.

Setting items	Setting details
Standby Source Sets the HDMI input source to put into standby when the power is on.	**Last** : Enters standby with the previously used input source. **CBL/SAT** / **DVD** / **Blu-ray** / **GAME** / **AUX1** / **AUX2** / **MEDIA PLAYER** / **CD** : Enters standby with each of the input sources assigned to each input connector. ✎ "Standby Source" can be set when "HDMI Control" is set to "On".
Control Monitor Set the HDMI MONITOR terminal to output the HDMI control signal.	**Monitor 1** : Output from the HDMI MONITOR 1 connector. **Monitor 2** : Output from the HDMI MONITOR 2 connector. ✎ • "Control Monitor" can be set when "HDMI Control" is set to "On". • ARC function works only with the terminal selected by "Control Monitor".
Power Off Control Links the power standby of this unit to external devices.	**All** : If power to a connected TV is turned off independently of the input source, power to this unit is automatically set to standby. **Video** : If power to a connected TV is turned off when the input source is CBL/SAT / DVD / Blu-ray / GAME / AUX1 / AUX2 / MEDIA PLAYER / CD, power to this unit is automatically set to standby. **Off** : This unit does not link with power to a TV. ✎ "Power Off Control" can be set when "HDMI Control" is set to "On".

Output Settings

Default settings are underlined.

Makes screen-related settings.

∗ "Blu-ray", "GAME", "AUX2", "TV AUDIO" or "CD" can be set when "HDMI" or "COMP" (☞page 122, 123) has been assigned.

✏ "Output Settings" can not be set when 4K signals are input.

Setting items	Setting details
Video Mode Make settings for video processing. `CBL/SAT` `DVD` `Blu-ray`∗ `GAME`∗ `AUX1` `AUX2`∗ `MEDIA PLAYER` `CD`∗ `TV AUDIO`∗	**Auto** : Process video automatically based on the HDMI content information. **Game** : Always process video for game content. **Movie** : Always process video for movie content. ✏ • If "Video Mode" is set to "Auto", the mode is switched according to the input contents. • If a source is played in both MAIN ZONE (audio and video) and ZONE2 (audio only) modes in the same room, audio in MAIN ZONE and ZONE2 modes may sound out of synchronization, but this is not malfunction. In this case, setting to "Game" mode may improve audio synchronization.
Video Conversion The input video signal is converted automatically in conjunction with the connected TV (☞page 6 "Converting input video signals for output (Video conversion function)"). `CBL/SAT` `DVD` `Blu-ray`∗ `GAME`∗ `AUX1` `AUX2`∗ `MEDIA PLAYER` `CD`∗ `TV AUDIO`∗	**On** : The input video signal is converted. **Off** : The input video signal is not converted. ✏ • When a non-standard video signal from a game machine or some other source is input, the video conversion function might not operate. In this case set "Video Conversion" to "Off". • When "Video Conversion" is set to "Off", the video conversion function does not work. In this case, connect this unit and TV with the same type of cable.

Setting items	Setting details
i/p Scaler Convert the input source resolution to the resolution set. `CBL/SAT` `DVD` `Blu-ray`∗ `GAME`∗ `AUX1` `AUX2`∗ `MEDIA PLAYER` `CD`∗ `NETWORK` `TV AUDIO`∗	**Analog** : Use i/p scaler function for analog video signal. **Analog & HDMI** : Use i/p scaler function for analog and HDMI video signal. **HDMI** : Use i/p scaler function for HDMI video signal. **Off** : Do not use i/p scaler function. ✏ • "Analog & HDMI" can be set for input sources for which an HDMI input connector is assigned. • Which items can be set depend on the input source assigned to each input connector. • This function is not effective when the input signal is "x.v.Color", 3D, sYCC 601 color, Adobe RGB color, Adobe YCC 601 color or computer resolution.
Resolution Set the output resolution. You can set "Resolution" separately for HDMI output of the analog video input and HDMI input. `CBL/SAT` `DVD` `Blu-ray`∗ `GAME`∗ `AUX1` `AUX2`∗ `MEDIA PLAYER` `CD`∗ `NETWORK` `TV AUDIO`∗	**Auto** : The number of pixels the TV connected to the HDMI MONITOR OUT connector supports is detected automatically and the appropriate output resolution is set. **480p/576p** / **1080i** / **720p** / **1080p** / **1080p:24Hz** / **4K** : Set the output resolution. ✏ • This item can be set when "i/p Scaler" is set to anything other than "Off". • When "i/p Scaler" is set to "Analog & HDMI", the resolution of both the analog video input signal and HDMI input signal can be set. • To watch 1080p/24Hz pictures, use a TV that supports 1080p/24Hz video signals. • When set to "1080p:24Hz", you can enjoy film-like pictures for film sources (in 24 Hz). For video sources and mixed sources, we recommend setting the resolution to "1080p". • It is not possible to convert a 50 Hz signal into 1080p/24Hz. It is output at a resolution of 1080p/50Hz.

✎ The analog input level and digital input level can be adjusted independently for input sources for which "DIGITAL" is assigned at "Input Assign" (☞page 122).

Input Select

Default settings are underlined.

Set the audio input mode and decode mode of each input source.
The input modes available for selection may vary depending on the input source.

Setting items	Setting details
Input Mode Set the audio input modes for the different input sources. It is normally recommended to set the audio input mode to "Auto".	**Auto** : Automatically detect input signal and perform playback. **HDMI** : Play only signals from HDMI input. **Digital** : Play only signals from digital input. **Analog** : Play only signals from analog input. **7.1CH IN** : Only signals input from the 7.1CH IN connector will be played back. ✎ • "Digital" can be set for input sources for which "DIGITAL" is assigned at "Input Assign" (☞page 123). • If the input source is set to "CBL/SAT", "DVD", "Blu-ray", "MEDIA PLAYER", "CD" or "PHONO", it can be set to "Analog". • When digital signals are properly input, the **DIG.** indicator lights on the display. If the **DIG.** indicator does not light, check "Input Assign" (☞page 122) and the connections. • If "HDMI Control" is set to "On" and a TV compatible with the ARC is connected via the HDMI MONITOR connectors, the input mode whose input source is "TV" is fixed to ARC. • The surround mode cannot be set if the input mode is set to "7.1CH IN".
Decode Mode Set the audio decode mode for input source. CBL/SAT DVD Blu-ray GAME AUX1 AUX2 MEDIA PLAYER CD TV AUDIO	**Auto** : Detect type of digital input signal and decode and play automatically. **PCM** : Decode and play only PCM input signals. **DTS** : Decode and play only DTS input signals. ✎ • This item can be set for input sources for which "DIGITAL" is assigned at "Input Assign" (☞page 122). • Normally set this mode to "Auto". Set "PCM" and "DTS" when inputting the corresponding input signal.

Video Source

Default settings are underlined.

Video of another input source is played back combined with the playing audio.

Setting details

<u>**Default**</u> : Play the picture and sound of the input source.

CBL/SAT / **DVD** / **Blu-ray** / **GAME** / **AUX1** / **AUX2** / **MEDIA PLAYER** / **TV AUDIO** / **CD** : Select video input source to view. The video of the selected input source is played along with the audio currently being played. This can be set for individual input sources.

✎ "Blu-ray", "GAME", "AUX2", "TV AUDIO" or "CD" can be selected only when "COMP" is assigned to the input source.

NOTE

- It is not possible to select HDMI input signals.
- Input sources for which "Hide" is selected at "Hide Sources" (☞page 124) cannot be selected.

Setting items	Setting details
Add New Feature Display new features that can be downloaded to this unit and perform an upgrade. **NOTE** In cases where it is not possible to connect to the network after adding a new function, connect to the network again using "Network" (☞page 130).	**Upgrade Package** : Display the items to be upgraded. **Upgrade Status** : Display a list of the additional functions provided by the upgrade. **Upgrade Start** : Execute the upgrade process. When the upgrade starts, the STANDBY indicator becomes red and the menu screen is shut down. During the upgrade, the amount of upgrade time which has elapsed is displayed. • If the upgrade is not successful, an error message identical to those in "Update" will appear on the display. Check the settings and network environment and then perform the upgrade again. ✎ See the marantz website for details about upgrades. When the procedure is complete, "Registered" is displayed in this menu and upgrades can be carried out. If the procedure has not been carried out, "Not Registered" is displayed. The ID number shown on this screen is needed when carrying out the procedure. The ID number can also be displayed by pressing and holding the main unit's **SETUP** and ◁ for at least 3 seconds.

Notes concerning use of "Update" and "Add New Feature"
• In order to use these functions, you must have the correct system requirements and settings for a broadband Internet connection (☞page 27). • Do not turn off the power until updating or upgrading is completed. • Even with a broadband connection to the Internet, approximately 1 hour is required for the updating/upgrading procedure to be completed. • Once updating/upgrade starts, normal operations on this unit cannot be performed until updating/upgrading is completed. Furthermore, there may be cases where backup data is reset for the parameters, etc., set on this unit. • If the update or upgrade fails, press and hold the ⏻ **ON/STANDBY** on the main unit for more than 5 seconds, or remove and re-insert the power cord. "Update retry" appears on the display and update restarts from the point at which update failed. If the error continues despite this, check the network environment.

✎
• Information regarding the "Update" function and "Add New Feature" will be announced on the marantz web site each time related plans are defined.
• When usable new firmware is released with "Update" or "Add New Feature", a notification message is displayed on the menu screen. When you do not want to be notified, set "Notifications" – "Update" (☞page 138) and "Notifications" – "Upgrade" (☞page 138) to "Off".

Operating external devices with the remote control

By registering preset codes for external devices to the provided remote control, you can operate your TV and playback devices (such as Blu-ray Disc player and DVD player) with the remote control.

Registering preset codes

When preset codes are registered in the included remote control unit, it can then be used to operate any devices you have, such as DVD players or TVs made by different manufacturers.

❏ Buttons used for operating the devices

⑥ **CH/PAGE** ▲▼
⑦ **TV** ⏻, **TV INPUT**
   For operating a TV
   This button is enabled in any mode.

For details on operation with the remote control unit, see pages .

NOTE

The preset code cannot be registered to **M-XP**, **TUNER**, **PHONO**, **iPod/USB**, **NETWORK** and **INTERNET RADIO**.

Registering preset codes

The following two methods can be used for registering the reset code.
① Entering a 4-digit code
② Scanning the code table

❏ Entering a 4-digit code

See the preset code list table for the code to be input.

1 **Press and hold the input source select buttons for the appliance to control, and press SET until 🔊 indicator blinks twice.**
The back light flashes.

NOTE

Note that the group numbers that can be registered are predefined for each input source select button (℡page 142).

2 **Press the 4-digit code for the appliance using 0 – 9 (code table at the end of this manual).**
When the settings are complete, "OK" is shown in the remote control display.

NOTE

If "NG" is displayed in the remote control display, repeat steps 1 and 2, and enter the same code again.

❏ Scanning the code table

1 **Switch the power on of the device for which you want to set the preset code.**

2 **Press and hold the input source select buttons for the appliance to control, and press SET until 🔊 indicator blinks twice.**
The back light flashes.

3 **Aim the remote control at the appliance and slowly alternate between pressing CH/PAGE ▲ and DEVICE ⏻ for the appliance.**
The preset code is shown in the remote control display.

4 **Stop when the appliance turns off.**

5 **Press ENTER once to lock in the code.**

• Some manufacturers use more than one type of remote control code. Preset codes to change the number and verify correct operation.
• If the AV device is not a marantz device, or if the device does not operate even when the preset code is registered, use the learning function. Remote codes for different devices can be remembered for use by the marantz remote control included with this device.

NOTE

Depending on the model and year of manufacture of your device, some buttons may not operate.

Check the registered preset code

1 **Press and hold the input source select buttons for the appliance to control, and press SET until ⊚ indicator blinks twice.**
The back light flashes.

2 **Press INFO.**
The ⊚ indicator blinks twice, after which the set code is shown for 3 seconds in the remote control display.
❑ Remote control operation modes

By default, the input source select buttons on the remote control perform only the input source select operation. To operate an external device with this remote control, set the preset code in "List of preset codes" () for the device you want to register to each input source select button.
For how to set preset codes to buttons, see "Registering preset codes" ().

If you register preset codes on this remote control, the input source select buttons on the remote control can perform the following two functions.

① The function to switch input sources on this unit (AVR operation mode)
② The function to make this remote control switch to the mode in which you can operate the device registered to the button (External device operation mode)

❑ How to switch operation modes

Press the input source select button.

① AVR operation mode*1

② External device operation mode*2

Press **AVR**.

Input source select buttons

*2 If you press one of these buttons, the input source on this unit changes and the remote control switches to the mode in which you can operate the external device registered to that button.

❑ **Devices that can be registered to input source select buttons on the remote control**

The types of devices that can be registered to each input source select button on this remote control are assigned as shown in the following table. Register the preset code under the desired device name in "List of preset codes" (vpage 177).

Preset codes that can be registered to CBL/SAT, Blu-ray, GAME, MEDIA PLAYER, DVD, AUX1, AUX2, and CD buttons

TV AUDIO *1	TV AUDIO	Device registered on the **TV AUDIO** button

*1 If a preset code is registered for this button, the remote control unit of this unit can control another devices.

*2 With this mode, you can operate: HD Radio, iPod, USB memory device, turn table and network function.

When the **FAVORITE STATION** is pressed, the AVR-operation mode starts automatically.

NOTE

If the mode of the remote control unit is set to other than AVR-operation mode, press **AVR** to switch the remote control unit to the AVR-operation mode to perform the following operations:
- For menu operation by pressing **SETUP**.

Operating external devices

The supplied remote control unit can control a device other than this unit.

1 Press the input source select button to which the preset code for the device you want to operate has been registered (vpage 143).

2 Operate the device.

- For details, refer to the device's operating instructions.

Operating learn function

- If the AV device is not a marantz device, or if the device does not operate even when the preset code is registered, use the learning function. Remote codes for different devices can be remembered for use by the marantz remote control included with this device.
- This remote control unit is capable of learning around 160 codes.

Remembering remote control codes from other devices

1 **Place the marantz remote control and remote control from the other device approximately 5 cm apart, with the remote control signal transmission sections facing each other.**

5 cm

2 **Press and hold SET until the LEARN indicator blinks.**

3 **Press input source select buttons to select the input source.**
The input source is shown in the remote control display.

> **NOTE**
>
> Before using the learning function, register a preset code (☞page 140 "Registering preset codes") for a mode other than AVR preset (☞page 142) to each input source switch button.

4 **Select the button to be learned.**
LEARN indicator lights up.

5 **Press and hold the button that you want to register on the other remote control until "OK" is displayed on the marantz remote control display.**

- If "NG" is shown on the remote control display, perform step 5 again. If "NG" is shown again on the remote control display, the remote control may not be able to learn the code correctly. In this case, use the specialized remote control for the device.
- If the remote control memory becomes full, "FULL" is shown on the remote control display. If you want to learn the code, you should erase other learned button.

6 **Repeat steps 4 and 5 to learn other buttons for the same input source.**

7 **Repeat steps 3 to 6 to learn other input sources.**

8 **When programming of the remote control unit is completed, press SET.**
The LEARN indicator turns off, and the remote control unit exits learn mode.

✎

- There are some remote control units that cannot be programmed, or even if they can be programmed, they may not operate correctly. If this happens, use the remote control unit supplied with the AV equipment to operate it.
- The operations of the programmed buttons override the preset memory. If you do not require the programmed buttons, erase the stored remote control codes to return to the initial settings (☞page 147 "Delete saved remote control codes").
- The number of buttons that can be stored varies depending on the remote control unit used. If you have stored the maximum number of buttons allowed for the remote control unit, "FULL" appears on its display.

> **NOTE**
>
> - The learning function is unavailable for all **ZONE SELECT**, **SET**, **AVR**, **ON/STANDBY** ⏻, **VOLUME** ▲▼, **FAVORITE STATION**, **SOUND MODE** and input source select buttons in any mode.
> - While in the AVR operation mode, the learning function is unavailable.
> - The learning procedure does not operate correctly if the batteries have become worn.
> - If no buttons are pressed for approximately 1 minutes while in the LEARN mode, the remote control unit automatically exits from the LEARN mode.

Delete saved remote control codes

Codes can be erased in three ways: by buttons, sources, and by all memory contents.

❏ Delete remote control codes for each button

1 Press and hold **SET** until the LEARN indicator blinks.

2 Press input source select buttons to select the input source you want to delete.
The input source is shown in the remote control display.

3 Press and hold **ON/STANDBY** Φ and press the learned button to be erased twice.
"ERASE" is shown in the remote control display, and the mode returns to LEARN mode.

• To return the normal mode, press **SET**.
❏ Delete remote control codes for each input source

1 Press and hold **SET** until the LEARN indicator blinks.

2 Press and hold **ON/STANDBY** Φ and press the learned input source select buttons to be erased twice.
"ERASE" is shown in the remote control display.

3 Press **ENTER** to continue erasing.
The indicator blinks twice and the mode returns to LEARN mode.

• To cancel the erasing operation, do not press **ENTER**, and simply press any other button.
• To return the normal mode, press **SET**.
❏ Delete remote control codes for all input sources

1 Press and hold **SET** until the LEARN indicator blinks.

2 Press and hold **ON/STANDBY** Φ and press **AVR** .

## Inserting the batteries

① Remove the rear lid in the direction of the arrow and remove it.

② Load the two batteries properly as indicated by the marks in the battery compartment.

R03/AAA

③ Put the rear cover back on.

NOTE

- Insert the specified batteries in the remote control unit.
- Replace the batteries with new ones if the set does not operate even when the remote control unit is operated close to the unit. (The supplied batteries are only for verifying operation. Replace them with new batteries at an early date.)
- When inserting the batteries, be sure to do so in the proper direction, following the ⊕ and ⊖ marks in the battery compartment.
- To prevent damage or leakage of battery fluid:
  - Do not use a new battery together with an old one.
  - Do not use two different types of batteries.
  - Do not attempt to charge dry batteries.
  - Do not short-circuit, disassemble, heat or dispose of batteries in flames.
  - Do not keep the battery in a place exposed to direct sunlight or in places with extremely high temperatures, such as near a heater.
- If the battery fluid should leak, carefully wipe the fluid off the inside of the battery compartment and insert new batteries.
- Remove the batteries from the remote control unit if it will not be in use for long periods.
- Used batteries should be disposed of in accordance with the local regulations regarding battery disposal.
- The remote control unit may function improperly if rechargeable batteries are used.

Operating range of the remote control unit

Point the remote control unit at the remote sensor when operating it.

Approx. 23 ft/7 m

30° 30°
NOTE

- The set may function improperly or the remote control unit may not operate if the remote control sensor is exposed to direct sunlight, strong artificial light from an inverter type fluorescent lamp or infrared light.
- When using 3D video devices that transmit radio communication signals (such as infrared signals etc) between the various units (such as the monitor, 3D glasses, 3D transmitter unit etc), the remote control unit may not operate due to interference from those radio communication signals. If this occurs, adjust the direction and distance of the 3D communication for each unit, and check that the remote control unit operation is not affected by these signals.

NOTE

• The status display screen cannot be displayed at a computer's resolution (e.g. VGA) or while certain 3D video contents is being played.
• When the menu is operated on a computer's resolution (e.g. VGA) or during playback of certain 3D video content, the playback image switches to the menu screen image.

Video signal resolution conversion table

When "Video Conversion" (☞page 118) is set to "On", "i/p Scaler" (☞page 118) is set to "Analog", "Analog & HDMI" or "HDMI" are set, the resolution of the input video signal can be converted to a different resolution for output (☞page 6 "Converting input video signals for output (Video conversion function)").
The relationship between the resolution of the convertible video signal and HDMI output resolution is shown in the table below.

∗4 The resolution set in "Resolution" (☞page 118) in the menu is set to "Auto", and a television that supports 1080p 24Hz video signals is connected.
∗5 Output at the same resolution as the input video signal resolution.

NOTE

- Component video and video output are output at the same resolution as the input video signal resolution.
- The 4K, 3D, Computer resolution, "x.v.Color", sYCC601 color, Adobe RGB color or Adobe YCC601 color input to HDMI is output at the same resolution as the input video signal.
- When "Video Mode" in the menu is set to "Game" or "Auto" and game contents are played, the same resolution as the input video signal is output.
- When "Resolution" in the menu is set to "Auto", the number of pixels in the television panel connected to the HDMI output connector is automatically detected, and the optimum resolution is output according to the table above.
- If 1080p 24Hz signals input from the HDMI terminal are converted into 1080p 60Hz/1080p 50Hz for output, they are output according to the specified "Format" (☞page 120) setting in the menu:
  "NTSC" – Output as 1080p 60Hz.
  "PAL" – Output as 1080p 50Hz.
- You can not convert 60Hz into 50Hz or vice versa.
- You can not convert 50Hz into 24Hz.
- This item does not support the HDMI ZONE2 function.

Explanation of terms

A

A2DP

A2DP is one profile of Bluetooth definded for in-car devices or AV devices that use wireless communication instead of a cable.

Adobe RGB color, Adobe YCC601 color

The color space defined by Adobe Systems Inc. Because it is a wider color space than RGB, it can produce more vivid and natural images.

AirPlay

AirPlay sends (plays) contents recorded in iTunes or on an iPhone/iPod touch/iPad to a compatible device via the network.

App Store

App Store is a site that sells application software for such devices as the iPhone or iPod Touch, and is operated by Apple Inc.

Audyssey Dynamic EQ®

Dynamic EQ solves the problem of deteriorating sound quality as volume is decreased by taking into account human perception and room acoustics. Audyssey Dynamic EQ® works in tandem with Audyssey MultEQ® XT to provide well-balanced sound for every listener at any volume level.

Audyssey Dynamic Surround Expansion (A-DSX)

Audyssey DSX® is a scalable system that adds new speakers to improve surround impression.

Starting with a 5.1 system Audyssey DSX® first adds Wide channels for the biggest impact on envelopment. Research in human hearing has proven that information from the Wide channels is much more critical in the presentation of a realistic soundstage than the Back Surround channels found in traditional 7.1 systems. Audyssey DSX® then creates a pair of Height channels to reproduce the next most important acoustical and perceptual cues. In addition to these new Wide and Height channels, Audyssey DSX® applies Surround Envelopment Processing to enhance the blend between the front and surround channels.

Audyssey Dynamic Volume®

Dynamic Volume solves the problem of large variations in volume level between television programs, commercials, and between the soft and loud passages of movies. Audyssey Dynamic EQ® is integrated into Dynamic Volume so that as the playback volume is adjusted automatically, the perceived bass response, tonal balance, surround impression, and dialog clarity remain the same.

Audyssey MultEQ® XT

MultEQ® XT is a room equalization solution that calibrates any audio system so that it can achieve optimum performance for every listener in a large listening area. Based on several room measurements, MultEQ® XT calculates an equalization solution that corrects for both time and frequency response problems in the listening area and also performs a fully automated surround system setup.

Auto Lip Sync

If you connect the unit to a TV that supports the Auto Lip Sync function, it can automatically correct delay between the audio and video.

B

Bluetooth

Bluetooth is a short-distance wireless communication technology used for connecting handheld devices several meters apart. This enables notebook computers, PDA s, mobile phones, etc. to connect without a cable for transmitting audio and data.

D

Deep Color

An imaging technology supported by HDMI. Unlike RGB, which uses 8 bits (256 shades) per color, it can use 10 bits (1024 shades), 12 bits (4096 shades), or 16 bits (65536 shades) to produce colors in higher definition.

Both devices linked via HDMI must support Deep Color.

DLNA

DLNA and DLNA CERTIFIED are trademarks and/or service marks of Digital Living Network Alliance. Some contents may not be compatible with other DLNA CERTIFIED® products.

Dolby Digital

Dolby Digital is a multi-channel digital signal format developed by Dolby Laboratories.

A total of 5.1 channels are played: 3 front channels ("FL", "FR" and "C"), 2 surround channels ("SL" and "SR") and the "LFE" channel for low frequencies.

Because of this, there is no crosstalk between channels and a realistic sound field with a "three-dimensional" feeling (sense of distance, movement and positioning) is achieved.

A realistic, powerful sense of presence is achieved when playing movie sources in AV rooms as well.

Dolby Digital EX

Dolby Digital EX is a 6.1-channel surround format proposed by Dolby Laboratories that allows users to enjoy in their homes the "DOLBY DIGITAL SURROUND EX" audio format jointly developed by Dolby Laboratories and Lucas Films.

The 6.1 channels of sound, including surround back channels, provide improved sound positioning and expression of space.

Dolby Digital Plus

Dolby Digital Plus is an improved Dolby Digital signal format that is compatible with up to 7.1 channels of discrete digital sound and also improves sound quality thanks to extra data bit rate performance. It is upwardly compatible with conventional Dolby Digital, so it offers greater flexibility in response to the source signal and the conditions of the playback device.

Dolby Pro Logic II

Dolby Pro Logic II is a matrix decoding technology developed by Dolby Laboratories.

Regular music such as that on CDs is encoded into 5 channels to achieve an excellent surround effect. The surround channel signals are converted into stereo and full band signals (with a frequency response of 20 Hz to 20 kHz or greater) to create a "three-dimensional" sound image offering a rich sense of presence for all stereo sources.

Dolby Pro Logic IIx

Dolby Pro Logic IIx is a further improved version of the Dolby Pro Logic II matrix decoding technology. Audio signals recorded in 2 channels are decoded to achieve a natural sound with up to 7.1 channels. There are three modes: "Music" suited for playing music, "Movie" suited for playing movies, and "Game" which is optimized for playing games.

Dolby Pro Logic IIz

Dolby Pro Logic IIz introduces a new dimension to Home Entertainment through the addition of a pair of front height channels. Compatible with stereo, 5.1-channel and 7.1-channel content, Dolby Pro Logic IIz provides enhanced spaciousness, depth and dimension to movies, concert video and video game playback while maintaining the full integrity of the source mix.

Dolby Pro Logic IIz identifies and decodes spatial cues that occur naturally in all content, directing this information to the front height channels, complementing the performance of left and right surround sound speakers. Content that is encoded with Dolby Pro Logic IIz height channel information can be even more revealing, with perceptually discrete height channel information bringing an exciting new dimension to home entertainment.

Dolby Pro Logic IIz, with front height channels is also an ideal alternative for households that cannot support the placement of back surround speakers of a typical 7.1-channel system but may have bookshelf space available to support the addition of height speakers.

Dolby TrueHD

Dolby TrueHD is a high definition audio technology developed by Dolby Laboratories, using lossless coding technology to faithfully reproduce the sound of the studio master.

This format provides the facility to support up to 8 audio channels with a sampling frequency of 96 kHz/24 bit resolution and up to 6 audio channels with a sampling frequency of 192 kHz/24 bit resolution. Dolby TrueHD is adopted for applications that put very high importance on sound quality.

Downmix

This function converts the number of channels of surround audio to less number of channels and plays back.

DTS

This is an abbreviation of Digital Theater System, which is a digital audio system developed by DTS. When playing back audio by connecting this system with a device such as DTS amplifier, accurate sound field position and realistic sound effect as if you are in a movie theater can be obtained.

DTS 96/24

DTS 96/24 is a digital audio format enabling high sound quality playback in 5.1 channels with a sampling frequency of 96 kHz and 24 bit quantization on DVD-Video.

DTS Digital Surround

DTS Digital Surround is the standard digital surround format of DTS, Inc., compatible with a sampling frequency of 44.1 or 48 kHz and up to 5.1 channels of digital discrete surround sound.

DTS-ES™ Discrete 6.1

DTS-ES™ Discrete 6.1 is a 6.1-channel discrete digital audio format adding a surround back (SB) channel to the DTS digital surround sound.
Decoding of conventional 5.1-channel audio signals is also possible according to the decoder.

DTS-ES™ Matrix 6.1

DTS-ES™ Matrix 6.1 is a 6.1-channel discrete digital audio format inserting a surround back (SB) channel to the DTS digital surround sound through matrix encoding. Decoding of conventional 5.1-channel audio signals is also possible according to the decoder.

DTS Express

DTS Express is an audio format supporting low bit rates (max. 5.1 channels, 24 to 256 kbps).

DTS-HD

This audio technology provides higher sound quality and enhanced functionality than the conventional DTS and is adopted as an optional audio for Blu-ray Disc. This technology supports multi-channel, high data transfer speed, high sampling frequency, and lossless audio playback. Maximum 7.1-channels are supported in Blu-ray Disc.

DTS-HD High Resolution Audio

DTS-HD High Resolution Audio is an improved version of the conventional DTS, DTS-ES and DTS 96/24 signals formats, compatible with sampling frequencies of 96 or 48 kHz and up to 7.1 channels of discrete digital sound. High data bit rate performance provides high quality sound. This format is fully compatible with conventional products, including conventional DTS digital surround 5.1-channel data.

DTS-HD Master Audio

DTS-HD Master Audio is a lossless audio format created by Digital Theater System (DTS). This format provides the facility to support up to 8 audio channels with a sampling frequency of 96 kHz/ 24 bit resolution and up to 6 audio channels with a sampling frequency of 192 kHz/24 bit resolution. It is fully compatible with conventional products, including conventional DTS digital surround 5.1-channel data.

DTS NEO:6™ Surround

DTS NEO:6™ is a matrix decoding technology for achieving 6.1-channel surround playback with 2-channel sources. It includes "DTS NEO:6 Cinema" suited for playing movies and "DTS NEO:6 Music" suited for playing music.

Dynamic range

The difference between the maximum undistorted sound level and the minimum discernible level above the noise emitted by the device.

F

FLAC

FLAC stands for Free lossless Audio Codec, and is a lossless free audio file format. Lossless means that the audio is compressed without any loss in quality. The FLAC license is as shown below.

H

HDCP

When transmitting digital signals between devices, this copyright protection technology encrypts the signals to prevent content from being copied without authorization.

HDMI

This is an abbreviation of High-Definition Multimedia Interface, which is an AV digital interface that can be connected to a TV or amplifier. Video signal and audio signal can be connected using 1 cable.

I

iTunes

iTunes is the name of the multimedia player provided by Apple Inc. It enables management and playback of multimedia contents including music and movies. iTunes supports many main file formats including AAC, WAV, and MP3.

L

LFE

This is an abbreviation of Low Frequency Effect, which is an output channel that emphasizes low frequency effect sound. Surround audio is intensified by outputting 20 Hz to 120 Hz deep bass.

M

MAIN ZONE

The room where this unit is placed is called the MAIN ZONE .

MP3 (MPEG Audio Layer-3)

This is an internationally standardized audio data compression scheme, using the "MPEG-1" video compression standard. It compresses the data volume to about one eleventh its original size while maintaining sound quality equivalent to a music CD.

MPEG (Moving Picture Experts Group), MPEG-2, MPEG-4

These are the names for digital compression format standards used for the encoding of video and audio. Video standards include "MPEG-1 Video", "MPEG-2 Video", "MPEG-4 Visual", "MPEG-4 AVC". Audio standards include "MPEG-1 Audio", "MPEG-2 Audio", "MPEG-4 AAC".

P

Pairing

Pairing is an operation required for settings to connect two Bluetooth devices. Pairing enables Bluetooth devices to access each other.

Progressive (sequential scanning)

This is a scanning system of video signal that displays 1 frame of video as one image. Compared to the interlace system, this system provides images with less flickering and bleeding.

S

Sampling frequency

Sampling involves taking a reading of a sound wave (analog signal) at regular intervals and expressing the height of the wave at each reading in digitized format (producing a digital signal).

The number of readings taken in one second is called the "sampling frequency". The larger the value, the closer the reproduced sound is to the original.

Speaker impedance

This is an AC resistance value, indicated in Ω (ohms). Greater power can be obtained with this value smaller.

sYCC601 color

Like "x.v.Color", each of these color spaces defines a palette of available colors that is larger than the traditional RGB color model.

Windows Media DRM

This is a copyright protection technology developed by Microsoft.

Content providers are using the digital rights management technology for Windows Media contained in this device (WM-DRM) to protect the integrity of their content (Secure Content) so that their intellectual property, including copyright, in such content is not misappropriated. This device uses WM-DRM software to play Secure Content (WM-DRM Software). If the security of the WM-DRM Software in this device has been compromised, owners of Secure Content (Secure Content Owners) may request that Microsoft revoke the WM-DRM Software's right to acquire new licenses to copy, display and/or play Secure Content. Revocation does not alter the WM-DRM Software's ability to play unprotected content. A list of revoked WM-DRM Software is sent to your device whenever you download a license for Secure Content from the Internet or from a PC. Microsoft may, in conjunction with such license, also download revocation list onto your device on behalf of Secure Content Owners.

Windows Media Player Ver.11 or later

This is a media player distributed free of charge by Microsoft Corporation.

It can play playlists created with Ver.11 or later of Windows Media Player, as well as WMA, DRM WMA, WAV, and other files.

WMA (Windows Media Audio)

This is audio compression technology developed by Microsoft Corporation.

WMA data can be encoded using Windows Media® Player Ver.7, 7.1, Windows Media® Player for Windows® XP and Windows Media® Player 9 Series.

To encode WMA files, only use applications authorized by Microsoft Corporation. If you use an unauthorized application, the file may not work properly.

X

x.v.Color

This function lets HDTVs display colors more accurately. It enables display with natural, vivid colors. "x.v.Color" is trademark of Sony Corporation.

Z

ZONE2

This unit can operate in a room other than the room where this unit is placed (MAIN ZONE) (ZONE2 playback). The room for ZONE2 playback is called ZONE2.

ZONE3

This unit can operate in a room other than the room where this unit is placed (MAIN ZONE) (ZONE3 playback). The room for ZONE3 playback is called ZONE3.

Troubleshooting

If a problem should arise, first check the following:
1. Are the connections correct?
2. Is the set being operated as described in the owner's manual?
3. Are the other devices operating properly?
If this unit does not operate properly, check the items listed in the table below. Should the problem persist, there may be a malfunction.
In this case, disconnect the power immediately and contact your store of purchase.

[General]

Symptom	Cause/Solution	Page
Power does not turn on.	• Check whether the power plug is correctly inserted into the power outlet.	36
	• The protection circuit is active. Disconnect the power plug from the electric outlet, wait 5 to 10 seconds and then insert it back into the outlet.	–
Power automatically switches to standby mode.	• The sleep timer is set. Turn on the power again, or change the sleep timer settings.	94, 102
	• "Auto Standby" is triggered when there is no operation for a set amount of time. To disable "Auto Standby", set "Auto Standby" on the menu to "Off".	136
Display is off.	• Set "Display" on the menu to something other than "Off".	136
Set does not operate properly.	• Reset the microprocessor.	173

[HDMI]

Symptom	Cause/Solution	Page
No audio is output with HDMI connection.	• Check the connection of the HDMI connectors.	11
	• When outputting HDMI audio from the speakers, set "HDMI Audio Out" on the menu to "AVP".	116
	• When outputting HDMI audio from a TV, set "HDMI Audio Out" on the menu to "TV".	116
No video is output with HDMI connection.	• Check the connection of the HDMI connectors.	11
	• Set the input source to match the connected HDMI connector.	11, 36
	• Check whether the TV is compatible with copyright protection (HDCP). If connected to a device not compatible with HDCP, video will not be output correctly.	12

Symptom	Cause/Solution	Page
When the following operations are performed on devices compatible with HDMI control, the same operations occur on this unit. • Power ON/OFF • Switching audio output devices • Adjust volume • Switch input source	• Set "HDMI Control" in the menu to "Off". Furthermore, if you do not want to link the power off operation with devices compatible with HDMI control, set "Power Off Control" in the menu to "Off".	92, 117
When the HDMI ZONE2 function is used and an operation is performed in MAIN ZONE, the following operations occur. • The player is turned off or playback pauses. • The input source on this unit automatically changes.	• "HDMI Control" in the menu is set to "On". In this case, the HDMI control function set for MAIN ZONE affects playback in ZONE2. When the HDMI ZONE2 function is used, set "HDMI Control" in the menu to "Off". • When the input source for ZONE2 is "SOURCE", select an input source that is different from the one for MAIN ZONE.	92, 117
When the HDMI ZONE2 function is used, Dolby TrueHD/ DTS HD Master Audio/Dolby Digital/ DTS cannot be played back in MAIN ZONE.	• Make sure that "HDMI Audio Out" in the menu is set to "AVP". When a same input source is selected for MAIN ZONE and ZONE2, set the ZONE2 ON/OFF button to "OFF", or change the input source for ZONE2 to an input source that is different from the one for MAIN ZONE.	116

Symptom	Cause/Solution	Page
When the HDMI ZONE2 function is used, no video or audio is output to TV in ZONE2.	• Make sure that the power is on for ZONE2. • Check the input source for ZONE2. • Check the output settings (resolution/audio format) for the input device	102 102 –
When playing back the input device just to use the HDMI ZONE2 function, the TV used for MAIN ZONE is turned on.	• "HDMI Control" in the menu is set to "On". When using the HDMI ZONE2 function, set "HDMI Control" in the menu to "Off".	92, 117

【Video】

Symptom	Cause/Solution	Page
No picture appears.	• Check the connection between the video output terminal of this unit and the input terminal of the TV. • Match the input settings to the input terminal of the TV connected to this unit.	10, 14 –

【Audio】

Symptom	Cause/Solution	Page
Audio is not output.	• Check the connections for all devices. • Check the speaker connections and configurations. • Check the connections for PRE OUT terminals. • Check whether the audio device power is turned on. • Adjust the master volume. • Cancel the mute mode. • Check the connection with the playback device and select the proper input source. • Match the input mode and the terminal assigned to be the digital input terminal. • Disconnect the headphones. No sound is output from the PRE OUT terminals when headphones are connected.	10,11,14,15, 16,17,18,19, 20,21,22,23, 24,25,26,27 26, 86, 87 26, 86, 87 – 37, 102 37, 102 36, 102 124 150
The volume does not increase.	• The maximum volume is set too low. Set the maximum volume using "Limit" on the menu. • Power for external devices connected to the output connectors of the unit may not be turned on. Check the power of connected external devices.	112 –
No sound is produced from surround speaker.	• Check if the surround speakers are connected to the SURROUND terminals of Power Amplifire.	–
No sound is produced from surround back speaker.	• Set "Speaker Config." – "Surr. Back" on the menu to something other than "None". • Set the sound mode to something other than "STEREO" and "VIRTUAL".	128 77
No sound is produced from front height speaker.	• Set "Speaker Config." – "Front Height" on the menu to something other than "None".	128
No sound is produced from front wide speaker.	• Set "Speaker Config." – "Front Wide" on the menu to something other than "None".	128

Symptom	Cause/Solution	Page
No sound is produced from subwoofer.	• Check the subwoofer connections.	26, 86, 87
	• Turn on the subwoofer's power.	–
	• Set "Speaker Config." – "Subwoofer" on the menu to "Yes".	127
	• If "Front" and "Center" for "Speaker Config." are set to "Large", and "Subwoofer Mode" is set to "LFE", no sound may be output from the subwoofers, depending on the input signal or selected sound mode.	127, 128
DTS sound is not output.	• Set "Decode Mode" on the menu to "Auto" or "DTS".	124
Dolby TrueHD, DTS-HD, Dolby Digital Plus audio is not output.	• Make HDMI connections.	11
Dolby PLII mode or DTS NEO:6 mode cannot be selected.	• Check that "Speaker Config." – "Center" or "Surround" is set to other than "None". If the speaker system is 2.0/2.1ch, this sound mode cannot be selected.	127
	• When headphones are used, Dolby PLII or DTS NEO:6 cannot be selected.	–
Audyssey MultEQ® XT, Audyssey Dynamic EQ® and Audyssey Dynamic Volume® cannot be selected.	• Switch the sound mode to other than "DIRECT" or "PURE DIRECT".	77
	• When headphones are used, Audyssey MultEQ® XT, Audyssey Dynamic EQ® and Audyssey Dynamic Volume® cannot be selected.	–
Audyssey DSX® cannot be selected.	• Check that "Speaker Config." – "Front Height" or "Front Wide" is set to other than "None".	128
	• Check that "Speaker Config." – "Center" is set to other than "None".	127
	• Switch the sound mode to DOLBY listening mode or DTS listening mode.	77
	• When headphones are used, Audyssey DSX® cannot be selected.	–
Audyssey Dynamic EQ® and Audyssey Dynamic Volume® cannot be selected.	• Run Audyssey® Setup.	29, 88
"M-DAX" cannot be selected.	• Check that an analog signal or PCM signal (Sample Rate=44.1/48 kHz) is input. For playback of multichannel signals such as Dolby Digital or DTS surround, "M-DAX" cannot be used.	111
	• Switch the sound mode to other than "DIRECT" or "PURE DIRECT".	77

【HD Radio】

Symptom	Cause/Solution	Page
Reception fails, or there is a lot of noise or distortion.	• Change the antenna orientation or position.	23
	• Separate the AM loop antenna from the unit.	23
	• Use an FM outdoor antenna.	23
	• Separate the antenna from other connection cables.	23

【iPod / USB memory device / Internet radio / Media server / Flickr / Pandora / SiriusXM / Spotify】

Symptom	Cause/Solution	Page
iPod cannot be played.	• Some iPods do not support being used connected directly to the iPod/USB port.	20
The file names are not displayed properly ("...", etc.).	• Characters that cannot be displayed are used. This is not a malfunction. On this unit, characters that cannot be displayed are replaced with a "." (period).	–
	• Invalid tags are used for files within the USB memory device connected to this unit. Use tags that are supported by this unit.	42
When a USB memory device is connected, "No Connection" is displayed.	• The set cannot recognize a USB memory device. Check the connection.	20
	• This unit supports mass storage class and MTP-compatible USB memory devices. It will not recognize other USB memory devices.	–
	• A USB memory device that the set cannot recognize is connected. This is not a malfunction. marantz does not guarantee that all USB memory devices will operate or receive power.	–
	• USB memory device is connected via USB hub. Connect the USB memory device directly to the iPod/USB port.	–
	• The unit supports file structures with up to 8 levels and a total maximum of 5000 subfolders and files per 1 folder. Change the file structure of the USB memory device if necessary.	42
Files on a USB memory device cannot be played.	• The USB memory device format should be set to FAT16 or FAT32. For details, refer to the USB memory device's operating instructions.	–
	• If the USB memory device is divided into multiple partitions, only files in partition one can be played.	–
	• Files are stored in a non-compatible format. Record the files in a compatible format.	42
	• You are attempting to play a file that is copyright protected. Files that are copyright protected cannot be played on this unit.	42

Symptom	Cause/Solution	Page
Internet radio cannot be played.	• Ethernet cable is not properly connected or network is disconnected. Check the connection status.	27
	• Program is being broadcast in non-compatible format. Only Internet radio programs in MP3 and WMA can be played on this unit.	54
	• The firewall of the PC or router has been activated. Check the firewall settings of the connected PC or router.	–
	• Radio station is not currently broadcasting. Choose a radio station that is currently broadcasting.	54
	• IP address is wrong. Check the set's IP address.	131
	• Some radio stations may go silent at certain times of the day. In this case, no audio is output even when a station is received. Try again later, or switch to another radio station.	–
Files stored on a computer cannot be played.	• Files are stored in a non-compatible format. Record in a compatible format.	57
	• You are attempting to play a file that is copyright protected. Files that are copyright protected cannot be played on this unit.	57
	• Set and computer are connected by USB cable. The set's iPod/USB port cannot be used for connection to a computer.	–
	• Media sharing settings are not correct. Change media sharing settings so that the unit can access the folders on your computer.	58
Music stored on a NAS cannot be played.	• If you use a NAS in conformity with the DLNA standard, enable the DLNA server function in the NAS setting.	–
	• If you use a NAS that does not conform with the DLNA standard, play the music via a PC. Set Windows Media Player's media sharing function and add NAS to the selected play folder.	58
	• If connection is restricted, set audio equipment as the connection target.	–
Server is not found, or it is not possible to connect to the server.	• The computer's or router's firewall is activated. Check the computer's or router's firewall settings.	–
	• Computer's power is not turned on. Turn on the power.	–
	• Server is not running. Launch the server.	–
	• Set's IP address is wrong. Check the set's IP address.	131
Cannot connect to preset or favorite radio stations.	• Radio station is not currently broadcasting. Wait a while before trying again.	–
	• Radio station is not currently in service. It is not possible to connect to radio stations that are no longer in service.	–
A list of broadcasting stations is not displayed.	• Connection to the network is unstable. Reconnect to the network or redo the "Network" setting in the menu.	27, 132

Symptom	Cause/Solution	Page
For some radio stations, "Radio station server full" or "Connection down" is displayed and station cannot be connected to.	• Station is congested or not currently broadcasting. Wait a while before trying again.	–
Sound is broken during playback.	• Network or USB memory device's signal transfer speed is slow or communications lines or radio station is congested. This is not a malfunction. When playing broadcast data with a high bit rate, the sound may be broken, depending on the communications conditions.	–
Sound quality is poor or noise is heard during play.	• File being played has a low bit rate. This is not a malfunction.	–
Cannot login to Pandora. ("Email address" or "Password" is displayed.)	• Login information is incorrect. Check if the "Email address" for Pandora has been properly entered. Re-enter the "Password". (Password is not displayed.) http://www.pandora.com/marantz	64

〖AirPlay〗

Symptom	Cause/Solution	Page
The AirPlay icon ⬛ is not displayed in iTunes or on the iPhone/iPod touch/iPad.	• This unit and the computer or iPhone/iPod touch/iPad are not connected to the same network (LAN). Connect the computer or iPhone/iPod touch/iPad to the same network as this unit.	27
	• iTunes or the iPhone/iPod touch/iPad do not have firmware that supports AirPlay installed. Update to the latest firmware.	138
No sound.	• The volume in iTunes or on the iPhone/iPod touch/iPad is set to the minimum setting. Adjust the volume to the optimum level.	–
	• This unit is not selected in the screen that is displayed when iTunes or the iPhone/iPod touch/iPad is started. Start iTunes or switch on the iPhone/iPod touch/iPad, click the AirPlay icon ⬛ in the displayed screen, and select this unit.	75
	• AirPlay playback has not started. Click the ▶ button in iTunes or press the ▶ button on the iPhone/iPod touch/iPad.	–

Symptom	Cause/Solution	Page
When using AirPlay with the iPhone/iPod touch/iPad, the sound suffers from intermittent breaks or AirPlay does not function.	• Quit the application running in the background of the iPhone/iPod touch/iPad, and then play using AirPlay.	–
	• When playing via a wireless connection, outside conditions may affect the unit. To remedy this, change the network environment, e.g. shorten the distance to the wireless LAN access point.	–
	• Update the iPhone/iPod touch/iPad application or iTunes to the latest version.	–

【M-XPort】

Symptom	Cause/Solution	Page
Audio is not output when a wireless receiver (RX101 is connected).	• Check that the Bluetooth device and Wireless receiver (RX101) are correctly paired.	24, 166, 168

【Remote control unit】

Symptom	Cause/Solution	Page
The set cannot be operated with the remote control unit.	• Batteries are worn out. Replace with new batteries.	156
	• Operate the remote control unit within a distance of about 23 ft/7 m from this unit and at an angle of within 30°.	156
	• Remove any obstacle between this unit and the remote control unit.	156
	• Insert the batteries in the proper direction, checking the ⊕ and ⊖ marks.	156
	• The set's remote control sensor is exposed to strong light (direct sunlight, inverter type fluorescent bulb light, etc.). Move the set to a place in which the remote control sensor will not be exposed to strong light.	156
	• The setting of the zone to operate does not match. Press **ZONE SELECT** to select the zone to operate.	30, 102

Resetting the microprocessor

Perform this procedure if the display is abnormal or if operations cannot be performed.
When the microprocessor is reset, all the settings are reset to their default values.

GAME   A-DSX
Ⓤ ON/STANDBY

1 Turn off the power using Ⓤ.

2 Press Ⓤ **ON/STANDBY** while simultaneously pressing **GAME** and **A-DSX**.

3 Once the display starts flashing at intervals of about 1 second, release the two buttons.

✎

If in step 3 the display does not flash at intervals of about 1 second, start over from step 1.

Specifications

❏ Audio section

• Analog

Input sensitivity/Input impedance:	200 mV/47 kΩ
Frequency response:	10 Hz – 100 kHz — +1, –3 dB (DIRECT mode)
S/N:	105 dB (IHF–A weighted, DIRECT mode)
Distortion:	0.005 % (20 Hz – 20 kHz) (DIRECT mode)
Rated output:	Unbalanced pre-output: 1.2 V
	Balanced pre-output: 2.4 V

• Digital

D/A output:	Rated output — 2 V (at 0 dB playback)
	Total harmonic distortion — 0.008 % (1 kHz, at 0 dB)
	S/N ratio — 102 dB
	Dynamic range — 100 dB
Digital input:	Format — Digital audio interface

• Phono equalizer (PHONO input — MEDIA PLAYER OUT)

Input sensitivity:	2.5 mV
RIAA deviation:	±1 dB (20 Hz to 20 kHz)
S/N:	74 dB (A weighting, with 5 mV input)
Rated output:	150 mV
Distortion factor:	0.03 % (1 kHz, 3 V)

❏ Video section

• Standard video connectors

Input/output level and impedance:	1 Vp-p, 75 Ω
Frequency response:	5 Hz – 10 MHz — +1, –3 dB

• Color component video connector

Input/output level and impedance:	Y (brightness) signal — 1 Vp-p, 75 Ω
	P_B / C_B signal — 0.7 Vp-p, 75 Ω
	P_R / C_R signal — 0.7 Vp-p, 75 Ω
Frequency response:	5 Hz – 60 MHz — 0, –3 dB

❏ Tuner section
(ANTENNA input – MEDIA PLAYER OUT)

(Note: µV at 75 Ω, 0 dBf = 1×10^{-15} W)

	[FM]	[AM]
Receiving Range:	87.5 MHz – 107.9 MHz	530 kHz – 1710 kHz
Usable Sensitivity:	1.5 µV (14.8 dBf)	20 µV
S/N (IHF–A weighted):	MONO 78 dB	
	STEREO 68 dB	
	HD 85 dB	85 dB
Distortion (1 kHz):	MONO 0.1 %	
	STEREO 0.2 %	
	HD 0.02 %	0.02 %

❏ General

Power supply:	AC 120 V, 60 Hz
Power consumption:	60 W
Power consumption in standby mode:	0.2 W
Power consumption in CEC standby mode:	0.5 W
Power consumption in network standby mode:	2.7 W

Boost Software License - Version 1.0 - August 17th, 2003

Permission is hereby granted, free of charge, to any person or organization obtaining a copy of the software and accompanying documentation covered by this license (the "Software") to use, reproduce, display, distribute, execute, and transmit the Software, and to prepare derivative works of the Software, and to permit third-parties to whom the Software is furnished to do so, all subject to the following:

The copyright notices in the Software and this entire statement, including the above license grant, this restriction and the following disclaimer, must be included in all copies of the Software, in whole or in part, and all derivative works of the Software, unless such copies or derivative works are solely in the form of machine-executable object code generated by a source language processor.

THE SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE AND NON-INFRINGEMENT. IN NO EVENT SHALL THE COPYRIGHT HOLDERS OR ANYONE DISTRIBUTING THE SOFTWARE BE LIABLE FOR ANY DAMAGES OR OTHER LIABILITY, WHETHER IN CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF OR IN CONNECTION WITH THE SOFTWARE OR THE USE OR OTHER DEALINGS IN THE SOFTWARE.

❏ FastDelegate

http://www.codeproject.com/KB/cpp/FastDelegate.aspx

THE WORK (AS DEFINED BELOW) IS PROVIDED UNDER THE TERMS OF THIS CODE PROJECT OPEN LICENSE ("LICENSE"). THE WORK IS PROTECTED BY COPYRIGHT AND/OR OTHER APPLICABLE LAW. ANY USE OF THE WORK OTHER THAN AS AUTHORIZED UNDER THIS LICENSE OR COPYRIGHT LAW IS PROHIBITED.

BY EXERCISING ANY RIGHTS TO THE WORK PROVIDED HEREIN, YOU ACCEPT AND AGREE TO BE BOUND BY THE TERMS OF THIS LICENSE. THE AUTHOR GRANTS YOU THE RIGHTS CONTAINED HEREIN IN CONSIDERATION OF YOUR ACCEPTANCE OF SUCH TERMS AND CONDITIONS. IF YOU DO NOT AGREE TO ACCEPT AND BE BOUND BY THE TERMS OF THIS LICENSE, YOU CANNOT MAKE ANY USE OF THE WORK.

1. Definitions.
a. "Articles" means, collectively, all articles written by Author which describes how the Source Code and Executable Files for the Work may be used by a user.
b. "Author" means the individual or entity that offers the Work under the terms of this License.
c. "Derivative Work" means a work based upon the Work or upon the Work and other pre-existing works.
d. "Executable Files" refer to the executables, binary files, configuration and any required data files included in the Work.
e. "Publisher" means the provider of the website, magazine, CD-ROM, DVD or other medium from or by which the Work is obtained by You.
f. "Source Code" refers to the collection of source code and configuration files used to create the Executable Files.
g. "Standard Version" refers to such a Work if it has not been modified, or has been modified in accordance with the consent of the Author, such consent being in the full discretion of the Author.
h. "Work" refers to the collection of files distributed by the Publisher, including the Source Code, Executable Files, binaries, data files, documentation, whitepapers and the Articles.
i. "You" is you, an individual or entity wishing to use the Work and exercise your rights under this License.
2. Fair Use/Fair Use Rights. Nothing in this License is intended to reduce, limit, or restrict any rights arising from fair use, fair dealing, first sale or other limitations on the exclusive rights of the copyright owner under copyright law or other applicable laws.
3. License Grant. Subject to the terms and conditions of this License, the Author hereby grants You a worldwide, royalty-free, non-exclusive, perpetual (for the duration of the applicable copyright) license to exercise the rights in the Work as stated below:
a. You may use the standard version of the Source Code or Executable Files in Your own applications.
b. You may apply bug fixes, portability fixes and other modifications obtained from the Public Domain or from the Author. A Work modified in such a way shall still be considered the standard version and will be subject to this License.
c. You may otherwise modify Your copy of this Work (excluding the Articles) in any way to create a Derivative Work, provided that You insert a prominent notice in each changed file stating how, when and where You changed that file.
d. You may distribute the standard version of the Executable Files and Source Code or Derivative Work in aggregate with other (possibly commercial) programs as part of a larger (possibly commercial) software distribution.
e. The Articles discussing the Work published in any form by the author may not be distributed or republished without the Author's consent. The author retains copyright to any such Articles. You may use the Executable Files and Source Code pursuant to this License but you may not repost or republish or otherwise distribute or make available the Articles, without the prior written consent of the Author.
Any subroutines or modules supplied by You and linked into the Source Code or Executable Files this Work shall not be considered part of this Work and will not be subject to the terms of this License.
4. Patent License. Subject to the terms and conditions of this License, each Author hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, import, and otherwise transfer the Work.
5. Restrictions. The license granted in Section 3 above is expressly made subject to and limited by the following restrictions:
a. You agree not to remove any of the original copyright, patent, trademark, and attribution notices and associated disclaimers that may appear in the Source Code or Executable Files.
b. You agree not to advertise or in any way imply that this Work is a product of Your own.
c. The name of the Author may not be used to endorse or promote products derived from the Work without the prior written consent of the Author.
d. You agree not to sell, lease, or rent any part of the Work. This does not restrict you from including the Work or any part of the Work inside a larger software distribution that itself is being sold. The Work by itself, though, cannot be sold, leased or rented.
e. You may distribute the Executable Files and Source Code only under the terms of this License, and You must include a copy of, or the Uniform Resource Identifier for, this License with every copy of the Executable Files or Source Code You distribute and ensure that anyone receiving such Executable Files and Source Code agrees that the terms of this License apply to such Executable Files and/or Source Code. You may not offer or impose any terms on the Work that alter or restrict the terms of this License or the recipients' exercise of the rights granted hereunder. You may not sublicense the Work. You must keep intact all notices that refer to this License and to the disclaimer of warranties. You may not distribute the Executable Files or Source Code with any technological measures that control access or use of the Work in a manner inconsistent with the terms of this License.
f. You agree not to use the Work for illegal, immoral or improper purposes, or on pages containing illegal, immoral or improper material. The Work is subject to applicable export laws. You agree to comply with all such laws and regulations that may apply to the Work after Your receipt of the Work.
6. Representations, Warranties and Disclaimer. THIS WORK IS PROVIDED "AS IS", "WHERE IS" AND "AS AVAILABLE", WITHOUT ANY EXPRESS OR IMPLIED WARRANTIES OR CONDITIONS OR GUARANTEES. YOU, THE USER, ASSUME ALL RISK IN ITS USE, INCLUDING COPYRIGHT INFRINGEMENT, PATENT INFRINGEMENT, SUITABILITY, ETC. AUTHOR EXPRESSLY DISCLAIMS ALL EXPRESS, IMPLIED OR STATUTORY WARRANTIES OR CONDITIONS, INCLUDING WITHOUT LIMITATION, WARRANTIES OR CONDITIONS OF MERCHANTABILITY, MERCHANTABLE QUALITY OR FITNESS FOR A PARTICULAR PURPOSE, OR ANY WARRANTY OF TITLE OR NON-INFRINGEMENT, OR THAT THE WORK (OR ANY PORTION THEREOF) IS CORRECT, USEFUL, BUG-FREE OR FREE OF VIRUSES. YOU MUST PASS THIS DISCLAIMER ON WHENEVER YOU DISTRIBUTE THE WORK OR DERIVATIVE WORKS.
7. Indemnity. You agree to defend, indemnify and hold harmless the Author and the Publisher from and against any claims, suits, losses, damages, liabilities, costs, and expenses (including reasonable legal or attorneys??? fees) resulting from or relating to any use of the Work by You.
8. Limitation on Liability. EXCEPT TO THE EXTENT REQUIRED BY APPLICABLE LAW, IN NO EVENT WILL THE AUTHOR OR THE PUBLISHER BE LIABLE TO YOU ON ANY LEGAL THEORY FOR ANY SPECIAL, INCIDENTAL, CONSEQUENTIAL, PUNITIVE OR EXEMPLARY DAMAGES ARISING OUT OF THIS LICENSE OR THE USE OF THE WORK OR OTHERWISE, EVEN IF THE AUTHOR OR THE PUBLISHER HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

3. The names of its contributors may not be used to endorse or promote products derived from this software without specific prior written permission.

THIS SOFTWARE IS PROVIDED BY THE COPYRIGHT HOLDERS AND CONTRIBUTORS "AS IS" AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL THE COPYRIGHT OWNER OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.
