DO NOT OPEN

**CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK,
DO NOT REMOVE COVER (OR BACK)
NO USER-SERVICEABLE PARTS INSIDE
REFER SERVICING TO QUALIFIED SERVICE PERSONNEL**

The lightning flash with arrowhead symbol within an equilateral triangle is intended to alert the user to the presence of uninsulated “dangerous voltage” within the product’s enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the product.

WARNING

TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE: Changes or modifications may cause this unit to fail to comply with Part 15 of the FCC Rules and may void the user's authority to operate the equipment.

**This Class B digital apparatus complies with Canadian ICES-003.
Cet appareil numérique de la Classe B est conforme a la norme NMB-003 du Canada.**

IMPORTANT SAFETY INSTRUCTIONS

READ BEFORE OPERATING EQUIPMENT

This product was designed and manufactured to meet strict quality and safety standards. There are, however, some installation and operation precautions which you should be particularly aware of.

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean only with dry cloth.
7. Do not block any ventilation openings. Install in accordance with the manufacture's instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11. Only use attachments/accessories specified by the manufacturer.
12. Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.

13. Unplug this apparatus during lightning storms or when unused for long periods of time.
14. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.

Additional Safety Information!

- This product should not be placed in a built-in installation such as a bookcase or rack unless proper ventilation is provided or the manufacturer's instructions have been adhered to.
- Apparatus shall not be exposed to dripping or splashing and that no objects filled with liquids, such as vases, shall be placed on the apparatus.
- The AC adaptor shall be installed near the Socket-Outlet and shall be easily accessible.

- Do not drop, apply excessive impact on your remote controller.
- Do not leave your remote controller in a place such as;
 - At high humidity/temperature (near heater, bathroom)
 - At extremely low temperature
 - Dusty

■ Before using your remote controller

Note that your remote controller is provided with lithium battery and can be operative after removing insulation sheet.

■ Handling battery

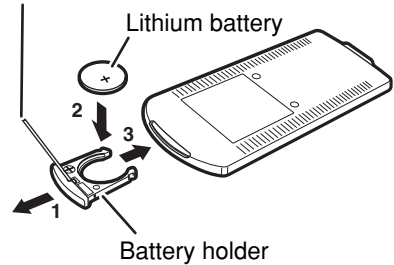

Improper handling of lithium battery may cause heat generation, ignition or bursting, so be sure to follow the below instructions when handling the lithium battery.

- The supplied battery is provided to check the functionality of your remote controller.
- Use only battery type CR2025.
- Do not recharge your battery.
- Do not handle roughly or disassemble your battery.
- When you replace your battery, be sure to insert the battery with polarity (+)(-) correctly.
- Do not place your battery in any place where it will be subjected to direct sunlight or high temperature.
- Keep your battery out of the reach of children. In case of accidental ingestion, immediately consult a doctor.
- Leaky battery should be disposed immediately. If the liquid is spilt on your skin or cloth, you can get a skin burn, so be sure to handle leaky battery carefully. When the solution adheres to the skin and/or clothes, wash it with water and consult a doctor.
- At disposal of used batteries, insulate terminal parts by winding with tape. Dispose the battery away from fire in accordance with applicable local regulations.

■ Battery replacement

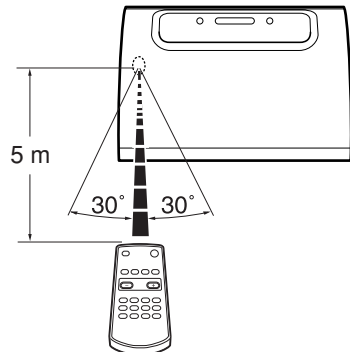

If you find that the remote control must be used closer to the main unit than usual, the battery is weak. Replace the battery new one.

1. Slide out the battery holder from the remote control by pushing into the hole in the holder with a ball-point pen ,etc.
 2. Replace the battery from the battery holder, and then place new one in the holder, positive side upward.
 3. Slide the holder into the remote control.
- a ball-point pen ,etc.

■ Remote-controllable range

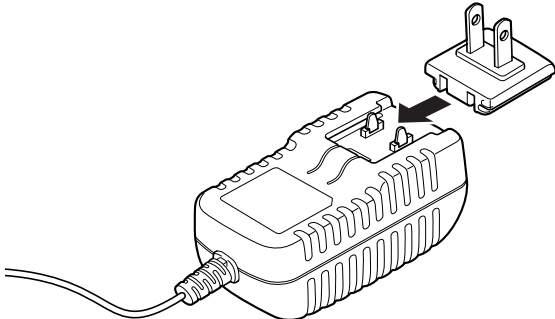

The distance between the transmitter of the remote control and the IR SENSOR of the IS201 should be less than 5 meters. If the remote control is pointed in a direction other than the IR SENSOR or if there is an obstacle between them, use of the remote control may not be possible.

CONNECTION

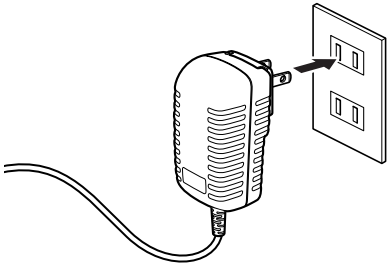

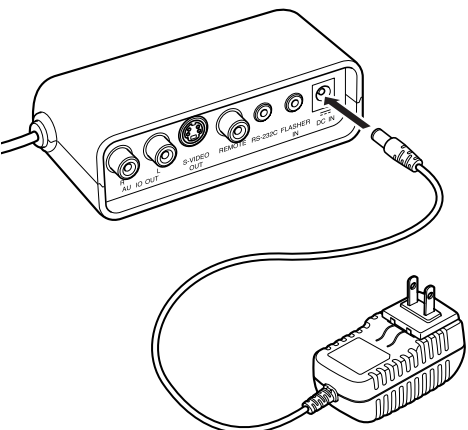

CONNECTING TO OUTLET

1. Fit the appropriate AC plug adapter to the AC adaptor as shown below.

2. Connect the AC adaptor to the IS201's DC IN jack.

3. Plug the AC adaptor into a suitable wall outlet.

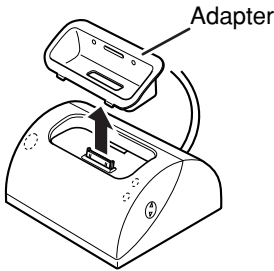

WALL SETTING

- Please note that supplied wall setting screws are used for wooden wall.
- Make sure that screws are firmly secured to the wall (poll).
- Make sure that there is no electric wiring or piping inside the wall.

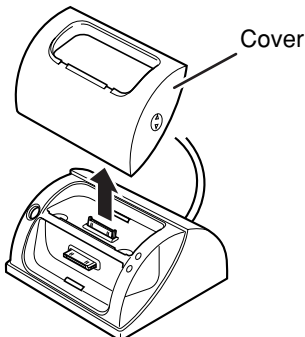

Note

- Do not mount the dock connector on plaster board, ALC (autoclaved lightweight concrete), concrete block or plywood less than 10mm thick as the intensity is insufficient (If the dock connector falls from the wall, it may cause an injury).

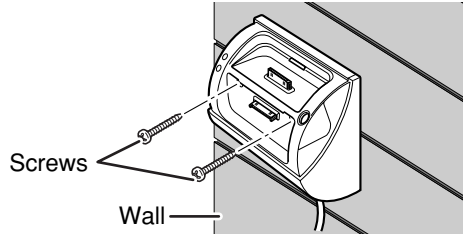

1. Disconnect the adapter.

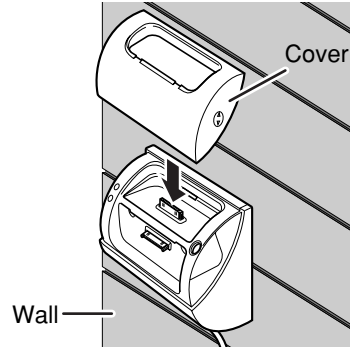

2. Remove the cover.

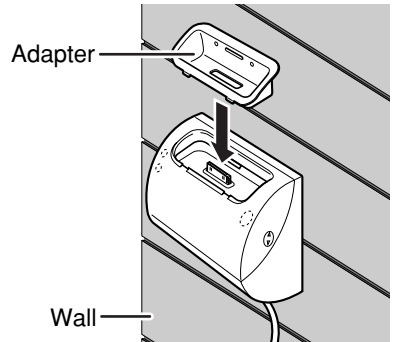

3. Install the supplied screws in the dock connector and fasten it on the wall.

4. Attach the cover.

5. Connect the adapter

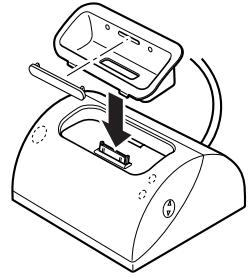

Notes

- Be sure that the cover is attached or removed in the direction of arrow shown on the side.
- Do not leave the cover and adapter removed while using the dock connector as it may cause a malfunction.

Notes

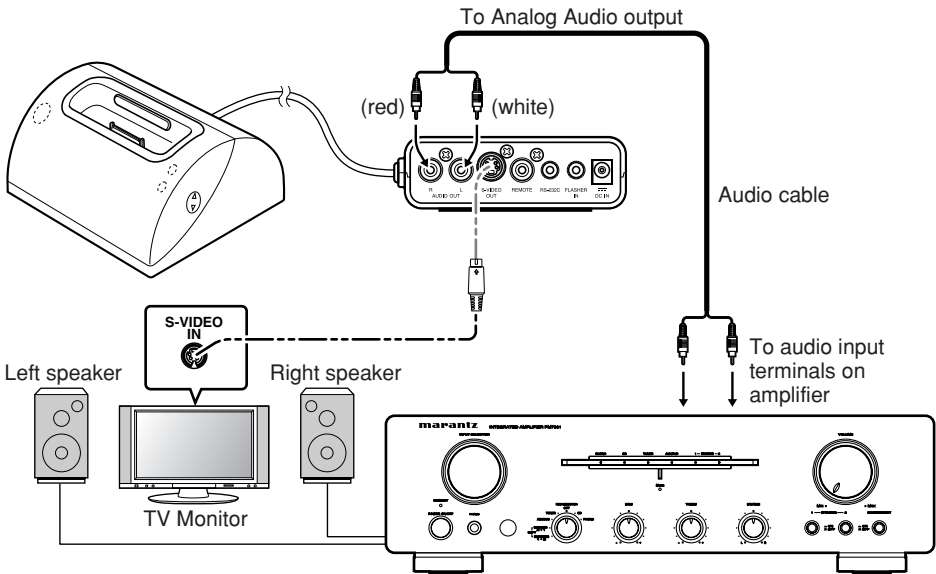

- Marantz bears no responsibility whatsoever for any loss or damage to data on your iPod that may occur when the iPod is used connected to the dock connector.
- Be sure to use the correct adapter for your type of iPod. If the wrong adapter is used, it may not operate correctly even if the blue power indicator lights up.
- If your iPod is inserted into the IS201 with the power off, or if you plugged the AC adapter into a wall outlet with your iPod inserted in the IS201, it may take some time for your iPod power to switch on and become operable.
- To prevent dock connector damage, don't twist your iPod when inserting or removing it.
- Be careful not to knock over the iPod when inserted to prevent dock connector damage.
- Don't use with any other iPod accessories, such as FM transmitters and microphones, because they may cause a malfunction.

HOOKING UP THE DOCK CONNECTOR

■ Connecting to AV receiver

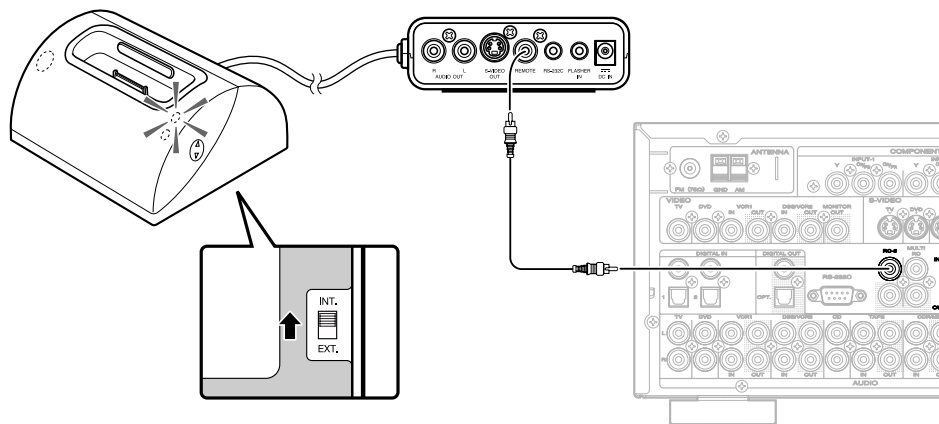

■ Connecting to Amp, Monitor

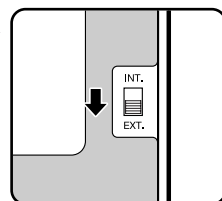

■ Connecting to Marantz product's remote control jack (RC-5)

- When the dock connector is used without connecting any other Marantz product's remote control jack, set the switch to "INT".
- By connecting the dock connector's remote jack to the remote jack on other Marantz product, the dock connector can act as a remote control signal receiver for the other Marantz product. In order to do this, set the dock connector's switch to "INT.", and set the remote jack on the connected Marantz product to "EXT."

- If IR remote of other Marantz product is used instead of the dock connector's remote, set the switch to "EXT." dock connector.

SETTING

MODE SETTING

You can operate your iPod with this dock connector in two modes, OSD mode and LCD mode, and mode selection can be available by pressing MODE button.

Note

- Note that in case of removing AC adapter or blackout occurrence after mode setting, the dock connector is set to OSD mode(default setting).

■ OSD Mode (On Screen Display Mode)

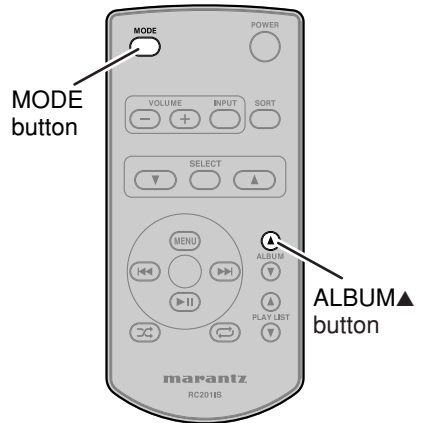

Only remote controller can control your iPod. "marantz" is shown on your iPod's display. The connected TV's screen shows the Control Menu to control your iPod.

Notes

- Depending on the type of iPod, some settings are not supported. In this case, please update your iPod to the latest firmware.
- The Control Menu supports only English. If the set language is non-English, "#" may be displayed on the screen.
- The LCD mode is used to playback video contents or photograph data.
- Leaving the iPod's Control Menu displayed on an LCD or plasma TV for a long period of time may result in afterimages on the screen. To prevent that, press the remote controller's ALBUM ▲ button for two seconds or more to turn off the OSD menu when it does not need to be displayed. The menu will display again when PLAY/PAUSE or other operation buttons are pressed.

■ LCD Mode

- Operation can be available by both your iPod and the remote controller.
- Your iPod's LCD (liquid crystal) displays normally.
- The iPod's Control Menu is not displayed on the connected TV screen.

VIDEO OUTPUT MODE SWITCH

Press MODE button for more than three seconds, then control display's output mode is switched to PAL/NTSC. The default mode is set to NTSC.

Notes

- Note that in case of removing AC adapter or blackout occurrence after video mode setting, it is set to NTSC mode(default setting).
- Set your iPod's TV signal and TV out on your iPod.

TROUBLESHOOTING

■ There's no sound

Check your IS201 dock connector.

- Make sure the iPod is inserted properly in the dock connector.
- Make sure your iPod is playing.
- Make sure the cable plugs are pushed in all the way.
- Make sure the AC adapter is connected to a suitable wall outlet and connected to IS201 dock connector.

Check the receiver or amp connected to IS201 dock connector.

- Make sure the power is turned on.
- Make sure the input is selected on the jack connected to your iPod.
- Make sure the volume control is not set too low.

■ The remote controller doesn't control the iPod

Check your IS201 dock connector

- Make sure the iPod is inserted properly in the dock connector.
- Make sure there is nothing to block the infrared radiation between IS201 dock connector and remote controller.
- Make sure you've selected the right mode for the remote mode switch on the rear of IS201 dock connector.
- Make sure the remote control cable is connected properly.

■ There's no control display on TV screen

Make sure the display mode (OSD/LCD) is set properly, or the selected mode is suitable for the TV type. (p. 14)

OTHERS

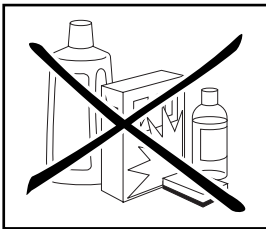

The section describes the care and maintenance tasks that must be performed to optimize the operation of your Marantz equipment.

■ Cleaning of equipment external surfaces

The exterior finish of your unit will last indefinitely with proper care and cleaning. Never use scouring pads, steel wool, scouring powders or harsh chemical agents (e.g., lye solution), alcohol, thinner, benzine, insecticide or other volatile substances as these will mar the finish of the equipment. Likewise, never use cloths containing chemical substances. If the equipment gets dirty, wipe the external surfaces with a soft, lint-free cloth.

If the equipment becomes heavily soiled:

- dilute some washing up liquid in water, in a ratio of one part detergent to six parts water.
- dip a soft, lint-free cloth in the solution and wring the cloth till it is damp.
- wipe the equipment with the damp cloth.
- dry the equipment by wiping it with a dry cloth.

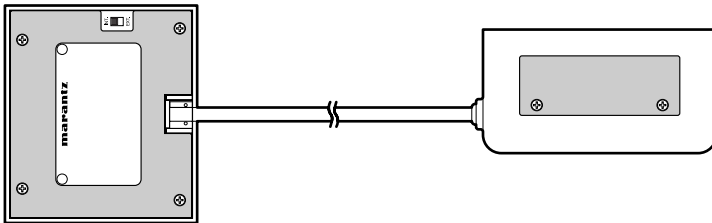

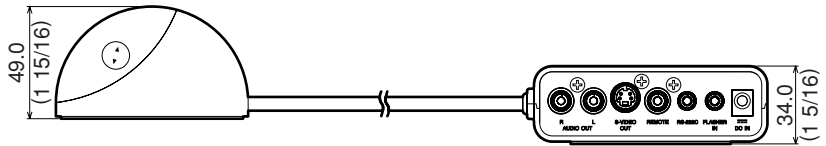

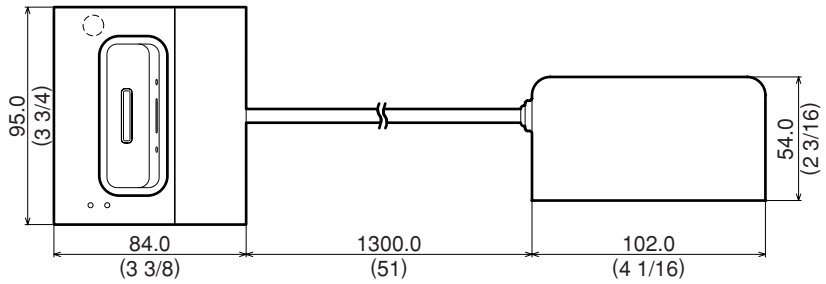

■ Repairs

Only the most competent and qualified service technicians should be allowed to service the factory-trained warranty station personnel have the knowledge and special facilities needed for repair and calibration of this precision equipment. After the warranty period has expired, repairs will be performed for a charge if the equipment can be returned to normal operation.

In the event of difficulty, refer to your dealer or write directly to the nearest location to you that is listed on the Marantz Authorized Service Station list. If writing, please include the model and serial number of the equipment together with a full description of what you think is abnormal about the equipment's behaviour.
