

Marantz Stereo Electrostatic Headphones—

you may never want to take them off.

The benefits of Marantz Electrostatic Headphones are as crystal clear as the sound you get. The Marantz SE-1S performs virtually free from distortion—not just at 1kHz or 10kHz, but consistently throughout the listening range. The result: Sound quality as close to perfect as technologically possible. An unsurpassed frequency response from 20Hz to 20kHz, full dynamic range and the ability to achieve high sound pressure levels with low distortion even at low frequencies.

The SE-1S owes its superiority to an electrostatic transducer diaphragm that's unequalled in its ability to track the audio signals from your amplifier. The diaphragm is six times thinner than the human eardrum and so low in mass that inertia is all but eliminated. The less inertia a diaphragm has, the more accurately and instantaneously it can track audio signals. And the better its tracking ability, the lower its transient distortion. That means you can listen longer without suffering listening fatigue. And the lightweight design incorporating soft ear cushions and acoustical seals lets you wear them comfortably for hours.

Marantz Stereo Electrostatic Headphones are powered by the EE-1 Energizer—a combination that makes the SE-1S the ultimate audio experience.

- The EE-1 needs only .3 watt for a 100dB sound pressure level, so it's at home with any amplifier. If severely overdriven, a protection circuit automatically shuts the energizer off—without an irritating pop.

- Its step-up transformers feature special cores developed by Marantz to provide excellent linearity and low distortion.
- It accepts two SE-1 headphones so you can share the pleasure of private listening. And headphone/speaker switching is built-in.

The Marantz SE-1S Stereo Electrostatic Headphone System costs \$129.95. It's the top of the Marantz line that also includes Marantz Dynamic Headphone Systems from \$39.95. Get our informative headphone brochure at your Marantz dealer. And try on a pair.
