# BASIC CONNECTIONS

## CONNECTING THE AMPLIFIER

Use the audio connecting cord to connect the unit with a stereo amplifier or AV amplifier.

### Cautions:

- Do not connect the unit to the PHONO input connectors on the amplifier.
- When making the connections, insert the plugs securely into the connectors. Failure to insert the plugs securely may result in noise.

### Notes:

- Do not plug in the mains cord until all connections have been completed.
- When making connections, also refer to the operating instructions of the other components.
- Be sure to connect the left and right channels properly (left with left, right with right).
- Note that binding pin-plug cords together with mains cords or placing them near a power transformer will result in generating hum or other noise.

**CONNECTING THE ANTENNA TERMINALS**

**ASSEMBLING THE AM LOOP ANTENNA**

1. Release the vinyl tie and take out the connection line.
3. Insert the hook at the bottom of the loop part into the slot at the base part.

2. Bend the base part in the reverse direction.

**Connecting the supplied FM antenna**

The supplied FM antenna is for indoor use only. During use, extend the antenna and move it in various directions until the clearest signal is received. Fix it with push pins or similar implements in the position that will cause the least amount of distortion. If you experience poor reception quality, an outdoor antenna may improve the quality.

**Connecting the supplied AM loop antenna**

The supplied AM loop antenna is for indoor use only. Set it in the direction and position it to where you receive the clearest sound. Put it as far away as possible from the unit, televisions, speaker cables, and power cords. If you experience poor reception quality, an outdoor antenna may improve the quality.

1. Press and hold down the lever of the AM antenna terminal.
2. Insert the bare wire into the antenna terminal.
3. Release the lever.

**CONNECTING AN FM OUTDOOR ANTENNA**

**Notes:**

- Keep the antenna away from noise sources (neon signs, busy roads, etc.).
- Do not put the antenna close to power lines. Keep it well away from power lines, transformers, etc.
- To avoid the risk of lightning and electrical shock, grounding is necessary.

**CONNECTING AN AM OUTDOOR ANTENNA**

An outdoor antenna will be more effective if it is stretched horizontally above a window or outside.

**Notes:**

- Do not remove the AM loop antenna.
- To avoid the risk of lightning and electrical shock, grounding is necessary.

SYMPTOM	CAUSE	REMEDY
Power does not turn on when POWER ON/STANDBY switch is pressed.	Mains cord's plug is not plugged into wall outlet.	Plug the mains cord in properly.
Hissing noise is heard on FM broadcasts.	Antenna cable is not properly connected.	Connect the leads properly.
	Antenna is not pointing in the right direction.	Point the antenna in the right direction.
	Radio waves are weak.	Install an outdoor antenna.
Hissing or buzzing sound is heard on AM broadcasts.	Noise from a TV or interference in the signals sent from the broadcast station.	Turn off the TV. Change the position of the loop antenna. Install an outdoor antenna.
Booming sound (humming) is heard in AM broadcasts.	Signals transmitted over the main cord are modulated by the power source frequency.	Insert the plug in the opposite direction. Install an outdoor antenna.
I can not get any sound.	Power connected amplifier not turned on.	Connection leads to amplifier not made correctly.
