

MC303 THREE CHANNEL POWER AMPLIFIER

At 300 watts per channel the new McIntosh MC303 Three Channel Power Amplifier with Autoformers is our most powerful multi-channel amplifier offering to date. This powerhouse is also the first ever multi-channel amplifier from McIntosh to include Autoformer coupled output stages. The McIntosh Autoformer, a premium technology found only on the best McIntosh designs, allows each channel of the MC303 to deliver maximum power into 2, 4, or 8 ohm loads resulting in the lowest noise and distortion performance possible. With available peak power of 1200 watts per channel, the MC303 is ready to drive the finest loudspeakers to sound their very best.

Premium cosmetics featuring a 1/2" thick glass faceplate, custom machined and anodized aluminum handles, and a mirror polished stainless steel chassis are standard equipment on the MC303. Power Guard, a McIntosh circuit innovation, maximizes sound quality at high power levels while our Sentry Monitor feature provides continuous short circuit protection of the amplifier and connected loudspeakers. A triple bank of Peak Reading Watt Meters provides instant recognition of power output and may be switched off for theater use.

LEGENDARY™

MC303 THREE CHANNEL POWER AMPLIFIER

EXCLUSIVE MCINTOSH POWER ASSURANCE SYSTEM

A collection of technologies that enhance performance and reliability while protecting the amplifier and loudspeakers.

POWER GUARD®

A waveform comparison circuit continuously monitors both input and output signals. Power Guard dynamically adjusts the input level to avoid clipping while preventing harsh sounding distortion.

SENTRY MONITOR®

Fuse-less short-circuit protection circuit disengages the output stage before current exceeds safe operating level – resets automatically.

OUTPUT AUTOFORMERS

Unique McIntosh technology delivers the full rated amplifier output with the least possible distortion into loudspeaker impedances of 2, 4, or 8 ohms; you get all the power you paid for and the freedom to choose any loudspeaker.

WATTMETER

Swift, accurate response reveals program peaks so staying within the power limits of your loudspeakers is easy.
