### AUDIO

#### DIGITAL AUDIO OUTPUT

Each DVD disc has a variety of audio output options. Set the player's Digital Audio Output according to the type of audio system you use.

**DOLBY DIGITAL Bitstream/PCM:** Select "DOLBY DIGITAL/PCM" if you connected the DVD Player's DIGITAL OUT jack to a Dolby Digital decoder (or an amplifier or other equipment with a Dolby Digital decoder).

Select when connected to a 2-channel digital stereo amplifier. The DVD player outputs sounds in the PCM 2channel format when you play a DVD video disc recorded on the Dolby Digital, MPEG1, or MPEG2 recording system.

#### SAMPLE FREQUENCY

To change the Sample Frequency setting, first select the desired Digital Audio Output as indicated as above.

If your receiver or amplifier is NOT capable of handling 96 KHz signals, select 48 KHz. When this choice is made, this unit will automatically convert any 96 KHz signals to 48 KHz so your system can decode them. If your receiver or amplifier is capable of handling 96 KHz signals, select 96 KHz. When this choice is made, this unit will pass each type of signal through without any further processing.

#### DYNAMIC RANGE COMPRESSION (DRC)

With the DVD format, you can hear a program's soundtrack in the most accurate and realistic presentation possible, thanks to digital audio technology. However, you may wish to compress the dynamic range of the audio output (the difference between the loudest sounds and the quietest ones). Then, you may listen to a movie at a lower volume without losing clarity of sound. Set DRC to On for this effect.

**OTHERS**

#### What is "CPRM"?

CPRM is a copy protection, using encryption technology, so that to only allow the recording of "copy once" broadcast programs. CPRM is an acronym for Content Protection for Recorded Media.

This player is CPRM compatible, which means you can play "copy-once" broadcast programs. CPRM recordings can only be made on DVD+RW formatted in VR mode, and CPRM recordings can only be played on players that are specifically compatible with CPRM.

NOTES ON MP3/WMA RECORDINGS

ABOUT MP3

- An MP3 file is audio data compressed by using the MPEG1 audio layer-3 file-coding scheme. We call files that have the ".mp3" file extension "MP3 files".
- The player can not read an MP3 file that has a file extension other than ".mp3".

ABOUT WMA (WINDOW MEDIA AUDIO)

- An WMA file is a Microsoft audio compression technology.
- WMA (Windows Media Audio) offers double the audio compression of the MP3 format.

MP3 / WMA Disc compatibility with this player is limited as follows:

- 1 Sampling Frequency / only at 44.1 kHz (MP3), 22.05 - 44.1 kHz (WMA)
- 2 Bit rate / within 32 - 320 kbps (MP3), 32 - 196 kbps (WMA)
- 3 CD-R physical format should be "ISO 9660"
- 4 If you record MP3/WMA files using the software which cannot create a FILE SYSTEM, for example "Direct-CD" etc., it is impossible to playback MP3/WMA files. We recommend that you use "Easy-CD Creator", which creates an ISO9660 file system.
- 5 A single session disc requires MP3/WMA files in the first track. If there is no MP3/WMA file in the 1st track, it cannot playback MP3/WMA files. If you wish to playback MP3/WMA files, format all the data in the disc or use a new one.
- 6 File names should be named using 8 letters or less and must incorporate ".mp3" or ".wma" extension e.g. "\*\*\*\*\*.MP3" or "\*\*\*\*\*.WMA".
- 7 Do not use special letters such as / : \ \* ? " < > " etc.
- 8 Total number of files on the disc should be less than 650. This DVD player requires discs/recordings to meet certain technical standards in order to achieve optimal playback quality. Pre-recorded DVDs are automatically set to these standards. There are many different types of recordable disc formats (including CD-R containing MP3 or WMA files) that require certain pre-existing conditions (see above) to insure compatible playback.

Customers should also note that permission is required in order to download MP3/WMA files and music from the Internet. NAD Electronics International has no right to grant such permission. Permission should always be sought from the copyright owner.
