3	XOUT		—
4	VSS	Negative power supply pin (GND)	—
5	F _{32K}	32,768 Hz clock output pin. This clock is always being output and cannot be controlled by command.	N-channel open drain output (No protective diode on the side of VDD)
6	SCL	Serial clock input pin. Follow the specification with great care to the rising/falling time of the SCL signal because the signal is treated at its rising/falling edge.	CMOS input (No protective diode on the side of VDD)
7	SDA	Serial data input/output pin. This pin is usually pulled up to VDD via a resistor, and connected to other open-drain or open-collector output devices in wired OR configuration.	N-channel open drain output (No protective diode on the side of VDD) CMOS input
8	VDD	Positive power supply pin.	—

ADJUSTMENT & CONFIRMATIONS OF OPERATIONS

ADJUSTMENT OF FREQUENCY

- a) Turn C702 CCW to set minimum position before POWER ON.
- b) Set the frequency at P702 to 32768Hz by adjusting C702 under the condition of no input and no load, immediately after POWER ON.
- c) After 4 ~ 6 minutes of heat running, re-adjust by following b.

OPERATIONS OF SPEAKER RELAYS

The relay shall be ON about 5 seconds after POWER is ON and shall be OFF immediately after POWER is OFF.

INITIAL SETTING FOR SHIPPING

1. Initialization of memories

Press STANDBY/ON button while pressing down INPUT button when the unit is POWER ON, then the FLT displays "CLEAR", and turn to STAND-BY. Remove power cord from power line.

2. Other settings

Pull out the AC cord at the standby mode.

FIRMWARE UPDATE - 1

Arrangements for PC

- 1 Make the firmware folder under the Net-Tune Central folder.
- 2 Make the folder of a suitable name (ex.:FWNC500) in that.
- 3 Putting the following 4 files in that.
 Fdist.fdf - File Distribution File
 FW_0_1_0.dcf - Device Construcion File
 LanY08na.mot - The program of Network microprocessor (The file name changes by the version).
 LanY08rb(L).mot - The program of System microprocessor (The file name changes by the version)
- 4 Start Net-Tune Central.

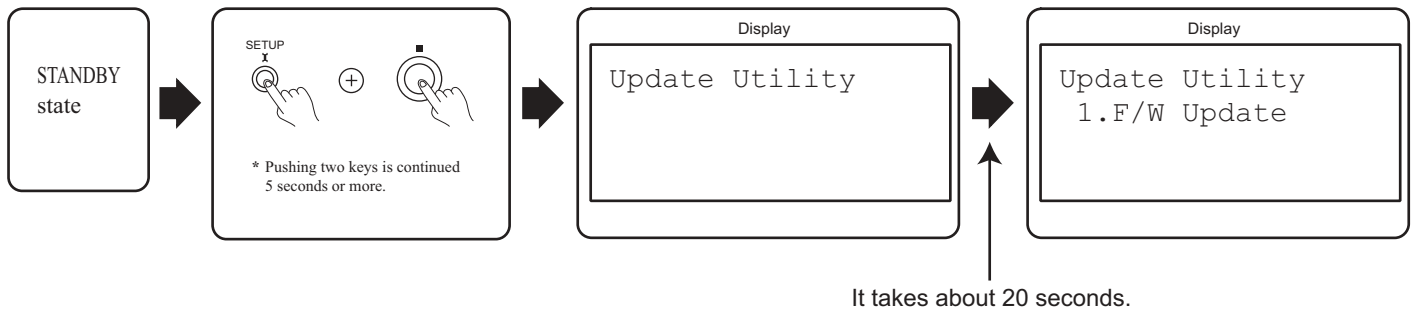

Note!

Update initializes each setting data.

Put only the folder which puts firmware in the firmware folder. And, do not make the folder of the subordinate position from it.

When you replaces or edits the above file, you should end Net-Tune Central once, and restart. Otherwise, the change is not reflected.

FIRMWARE UPDATE - 2

Update Utility : ON

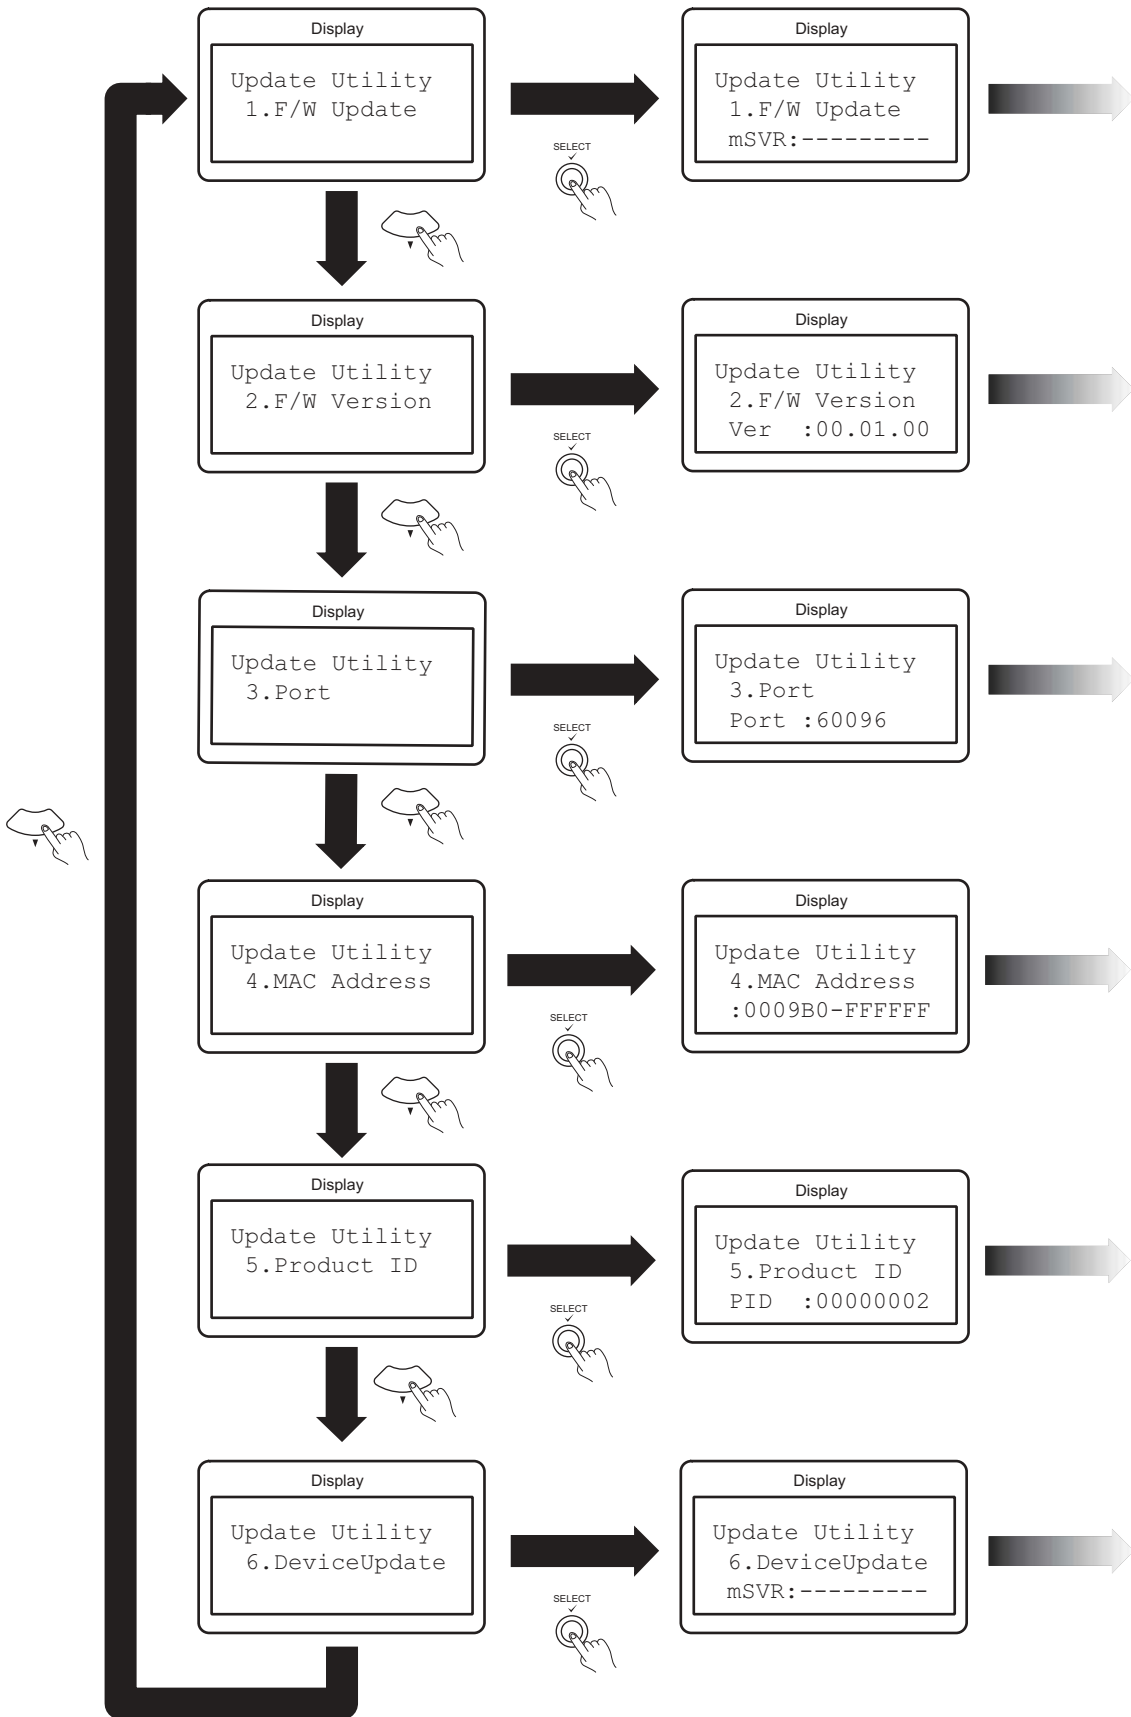

Note!

When the power supply is cut off during update of Network (the power cord fell out etc.), it becomes impossible to update by this method. It is necessary to take out a Network board and to write in firm-ware using a special pc board with a Linux PC.
