HANDLING CHIP COMPONENTS

Ⓢ WARNING
 All ICs and many other semiconductors are susceptible to electrostatic discharges (ESD). Careless handling during repair can reduce life drastically.
 When repairing, make sure that you are connected with the same potential as the mass of the set via a wristband with resistance. Keep components and tools at this potential.

Ⓢ WAARSCHUWING
 Alle IC's en vele andere halfgeleiders zijn gevoelig voor electrostatische ontladingen (ESD).
 Onzorgvuldig behandelen tijdens reparatie kan de levensduur drastisch doen verminderen. Zorg ervoor dat u tijdens reparatie via een polsband met weerstand verbonden bent met hetzelfde potentiaal als de massa van het apparaat.
 Houd componenten en hulpmiddelen ook op ditzelfde potentiaal.

f ATTENTION
 Tous les IC et beaucoup d'autres semi-conducteurs sont sensibles aux décharges statiques (ESD). Leur longévité pourrait être considérablement écourtée par le fait qu'aucune précaution n'est prise à leur manipulation.
 Lors de réparations, s'assurer de bien être relié au même potentiel que la masse de l'appareil et enfilez le bracelet sert d'une résistance de sécurité.
 Veiller à ce que les composants ainsi que les outils que l'on utilise soient également à ce potentiel.

d WARNUNG
 Alle ICs und viele andere Halbleiter sind empfindlich gegenüber elektrostatischen Entladungen (ESD).
 Unvorsichtige Behandlung im Reparaturfall kann die Lebensdauer drastisch reduzieren.
 Sorgen Sie dafür, daß Sie im Reparaturfall über ein Pulsarmband mit Widerstand mit dem Massepotential des Gerätes verbunden sind.
 Halten Sie Bauteile und Hilfsmittel ebenfalls auf diesem Potential.

i AVVERTIMENTO
 Tutti IC e parecchi semi-conduttori sono sensibili alle scariche statiche (ESD).
 La loro longevità potrebbe essere fortemente ridotta in caso di non osservazione della più grande cautela alla loro manipolazione. Durante le riparazioni occorre quindi essere collegato allo stesso potenziale che quello della massa dell'apparecchio tramite un bracciale a resistenza.
 Assicurarsi che i componenti e anche gli utensili con quali si lavora siano anche a questo potenziale.

Ⓢ DANGER! Invisible laser radiation when open. AVOID DIRECT EXPOSURE TO BEAM.

Ⓢ
 After servicing and before returning the set to customer perform a leakage current measurement test from all exposed metal parts to earth ground, to assure no shock hazard exists.
 The leakage current must not exceed 0.5mA.

s Varning!
 Osynlig laserstrålning när apparaten är öppnad och spårren är urkopplad. Betrakta ej strålen.

Advarsel!
 Usynlig laserstrålning ved åbning når sikkerhedsafbrydere er ude af funktion. Undgå udsættelse for stråling.

SERVICE MEASUREMENTS

Tuner FM

Use a bandpass filter to eliminate hum (50Hz, 100Hz) and disturbance from the pilotone (19kHz, 38kHz).

Tuner AM (MW, LW)

To avoid atmospheric interference all AM-measurements have to be carried out in a Faraday's cage.
Use a bandpass filter (or at least a high pass filter with 250Hz) to eliminate hum (50Hz, 100Hz).

CD

Use Audio Signal Disc SBC429 4822 397 30184
(replaces test disc 3)

RECORDER

Use Universal Test Cassette Fe SBC420 4822 397 30071

BASIC FUNCTIONS

- 1 POWER: CD, TAPE, BAND ...selects the sound source
- 2 DBBenhances the bass
- 3 VOLUMEadjusts the volume level
- 4 P3.5mm headphone socket (back of the set)

Note: Connecting the headphones will switch off the speakers.

5 CASSETTE RECORDER

- PAUSE ;interrupts recording or playback
- OPEN-STOP / 9stops the tape and opens the cassette compartment
- SEARCH 6rewinds the tape
- SEARCH 5fast forwards the tape
- PLAY 1starts playback
- RECORD Ostarts recording

- 6Sensor for the infrared remote control

RADIO

- 7 TUNINGtunes to radio stations
- 1 BAND: FM, MW ...selects the wave band

8 CD PLAYER

- OPEN • CLOSEopens the CD compartment
- 9stops CD play and erases the program
- 2;starts and interrupts CD play
- Sskips and searches forward
-skips and searches backward

REMOTE CONTROL

- SHUFFLEplays CD tracks in random order
- REPEATrepeats a track, the entire CD or the program
- 2;starts and interrupts CD play
- iTMselects the beginning of the current, a previous or a subsequent track of a CD
- 9stops CD play and erases the program
- 5 6 SEARCHsearches backward/forward in a CD track

Batteries

For the set (optional)

Open the battery compartment of the set and insert 6 batteries, type R20, UM-1 or D-cells (preferably alkaline).

For the remote control (optional)

Open the battery compartment of the remote control and insert 2 batteries, type R03, UM-4 or AAA-cells (preferably alkaline).

Remove batteries if they are flat or if the set is not going to be used for a long time.

Batteries contain chemical substances, so they should be disposed of properly.

Mains

- 1 Check whether the mains voltage as shown on the type plate corresponds to your local mains voltage. If it does not, consult your dealer or service organisation. **The type plate is located on the bottom of the set.**
- 2 If the set is equipped with a VOLTAGE selector A, set this selector to the local mains voltage.

- 3 Connect the mains cable to the AC MAINS socket and the wall socket. This switches on the mains supply. **The mains cable is inside the battery compartment.**

The battery supply will be switched off when the set is connected to the mains. To change over to battery supply, pull out the plug from the unit's AC-MAINS socket.

To disconnect the set from the mains completely, remove the mains plug from the wall socket.

Switching the set on and off

Set the POWER slider to the desired sound source: CD, TAPE, or BAND (for radio).

The set is switched off when the POWER slider is set to **OFF/TAPE** and the keys of the tape deck are released.

Note: If you use batteries, switch the set off after use. This will avoid unnecessary power consumption.

Adjusting volume and sound

Adjust the volume using the VOLUME control.

Increase and decrease the bass level by pressing DBB.

The bass level can also be emphasised if you place the set against wall or shelf. Do not cover any vents; leave sufficient room around the unit for ventilation.

Radio – tuning to radio stations

1 Set the POWER slider to FM or MW to select the desired wave band.

2 Tune to the desired radio station by using the TUNING wheel.

Improving RADIO reception

For **FM** stations, pull out the telescopic antenna. To improve the signal, incline and turn the antenna. Reduce its length if the signal is too strong (very close to a transmitter).

For **MW** stations, direct the built-in antenna by turning the whole set. The telescopic antenna is not needed.

Playing a CD

1 Set the POWER slider to CD.

2 Press / OPEN to open the CD compartment.

3 Insert an audio CD (printed side up) and close the CD compartment.

™ The CD player starts and scans the contents list of the CD. Then, the CD player stops. Display indication: the total number of tracks.

4 Press the 2; button to start CD play.

™ Display indication: the current track number.

5 Press the 9 button to stop CD play.

™ Display indication: the total number of tracks.

You can interrupt CD play by pressing 2; . Continue CD play by pressing the button again.

™ Display indication: the current track number (flashing).

Note: CD play will also stop if:

- you open the CD compartment,
- the end of the CD is reached, or
- you move the POWER slider.

If you make a mistake when operating the CD player, or if the CD player cannot read the CD, the display shows **E** or **no**. (See "TROUBLESHOOTING".)

If you press 2; and there is no CD inserted, the display shows **no**.

Environmental information

All redundant packing material has been omitted. We have done our utmost to make the packaging easily separable into three mono materials: cardboard (box), polystyrene foam (buffer) and polyethylene (bags, protective foam sheet).

Your set consists of materials which can be recycled if disassembled by a specialized company. Please observe the local regulations regarding the disposal of packing materials, exhausted batteries and old equipment.

Search backward and forward S

Selecting another track

Briefly press the **or S** button once/several times to skip to the beginning of the current, previous or subsequent track(s).

During CD play:

CD play continues automatically with the selected track.

When CD play is stopped:

Press **2**; to start CD play.

TM Display indication: the selected track number.

Searching for a passage during CD play

1 Hold down the **or S** button to find a particular passage in a forward or backward direction.

TM CD play continues at a low volume.

2 Release the button when you have reached the desired passage.

Note: In the different CD modes or when playing a program, searching is only possible within the particular track.

CD MODE: Shuffle and Repeat

1 During CD play press CD MODE repeatedly to cause the display to show the different playing modes.

TM **SHUFFLE**: All tracks of the CD (or program) are played in random order.

TM **SHUFFLE REPEAT ALL**: All tracks of the CD (or program) are played repeatedly in random order.

TM **REPEAT**: The current track is played repeatedly.

TM **REPEAT ALL**: The entire CD (or program) is played repeatedly.

2 After 2 seconds of flashing display indication, CD play starts in the chosen mode.

3 To return to normal CD play, press CD MODE until the display indication disappears.

CD MODE: Programming track numbers

You can select a number of tracks and store these in the memory in the desired sequence. You can store any track more than once. A maximum of 20 tracks can be stored in the memory.

1 When CD play is stopped, select the desired track with **or S**.

2 As soon as the number of the desired track is displayed, press CD MODE to store the track in the memory.

TM **PROGRAM** appears on the display, **P** lights up briefly, then the number of the stored track is shown.

3 Select and store all desired tracks in this way.

4 You can review your settings by pressing and holding CD MODE for more than 1 second.

TM The display shows all stored track numbers in sequence.

If you try to store more than 20 tracks, the display shows **F**.

Playing the program

Press **2**; to play the program.

Erasing the program

From the stop position, press **9**.

TM **no** lights up briefly, **PROGRAM** disappears and your program is erased.

Note: The program will also be erased if you:

- interrupt the power supply,
- open the CD compartment, or
- move the POWER slider.

Playing a cassette

- 1 Set the POWER slider to TAPE.
- 2 Press OPEN-STOP / 9 to open the cassette compartment.
- 3 Insert a recorded cassette with the open side upwards and close the cassette compartment.
- 4 Press PLAY 1 to start playback.
- 5 Press 6 or 5 to rewind or fast forward the tape.
- 6 To stop the tape press OPEN-STOP / 9.

Note: The keys are released at the end of the tape.

General information on recording

Recording is permissible insofar as copyright or other rights of third parties are not infringed upon.

For recording on this set you should use a cassette of the type NORMAL (IEC type I). This deck is not suitable for recording on cassettes of the type CHROME (IEC type II) or METAL (IEC type IV).

The recording level is set automatically. The controls VOLUME and DBB do not affect the recording.

At the very beginning and end of the tape, no recording will take place in the 7 seconds during which the leader tape passes the recorder heads.

Protecting tapes from accidental erasure

Keep the cassette side to be protected in front of you and snap off the left tab. Now, recording on this side is no longer possible.

To record again on this side of the cassette, cover the opening with a piece of adhesive tape.

Recording from the CD player – CD synchro start

- 1 Set the POWER slider to CD.
- 2 Insert a CD and, if desired, program the track numbers.
- 3 Press OPEN-STOP / 9 to open the cassette compartment.
- 4 Insert a blank, unprotected, cassette and close the cassette compartment.
- 5 Press RECORD O to start recording.
™ Playing of the CD or program starts automatically.
- 6 For brief interruptions press PAUSE ; . Press the PAUSE ; key again to resume recording.
- 7 To stop recording, press OPEN-STOP / 9.

Note: the recording can be started from different positions:
 – if the CD player is in pause mode, recording will start from this very position (use or S);
 – if the CD player is in stop mode, recording will start from the beginning of the CD or program.

Recording from the radio

- 1 Tune to the desired radio station (see "RADIO").
- 2 Press OPEN-STOP / 9 to open the cassette compartment.
- 3 Insert a blank, unprotected, cassette and close the cassette compartment.
- 4 Press RECORD O to start recording.
- 5 For brief interruptions press PAUSE ; . To resume recording press the PAUSE ; key again.
- 6 To stop recording, press OPEN-STOP / 9.

General maintenance

Do not expose the set, batteries, CDs, or tapes to humidity, rain, sand, or excessive heat (caused by heating equipment or direct sunlight).

The mechanical parts of the set contain self-lubricating bearings and must not be oiled or lubricated!

You can clean the set with a soft, slightly dampened, lint-free cloth. Do not use any cleaning agents as they may have a corrosive effect.

Tape deck maintenance

To ensure proper recording and playback quality, clean parts **A**, **B**, and **C** after approximately 50 hours of operation. Use a cotton swab slightly moistened with alcohol or head-cleaner fluid. Press **PLAY 1** and clean the rubber pressure roller **A**. Press **PAUSE** ; and clean the capstan **B** and the heads **C**.

Note: Cleaning of the heads **C** can also be done by playing a cleaning tape once.

CD player and CD handling

The lens **X** of the CD player should never be touched. Always keep the CD compartment closed to avoid dust on the lens.

The lens may cloud over when the set is suddenly moved from cold to warm surroundings. Playing a CD is not possible then. Leave the CD player in a warm environment until the moisture evaporates.

To take the CD out of its box easily, press the centre spindle while lifting the CD. Always pick up the CD by the edge and put it back in its box after use.

To clean the CD, wipe it in a straight line from the center toward the edge using a soft, lint-free cloth. A cleaning agent may damage the disc!

Never write on a CD or attach a sticker to it.

WARNING

If a fault occurs, first check the points listed below before taking the set for repair.

If you are unable to solve a problem by following these hints, consult your dealer or service center.

Under no circumstance should you try to repair the set yourself as this will invalidate the guarantee.

Problem	Possible cause	Solution
No sound, no power	VOLUME is not adjusted. Headphones are connected. Mains cable is not securely connected. Batteries are flat. Batteries are inserted incorrectly.	Adjust volume. Disconnect headphones. Connect mains cable properly. Insert fresh batteries. Insert batteries correctly.
No reaction to operation of any keys	Trying to change over from mains to battery supply without removing the plug. Electrostatic discharge.	Remove the mains plug from the unit's AC MAINS socket. Disconnect the set from power supply, reconnect after a few seconds.
Poor radio reception	Weak radio signal. Interference caused by electrical equipment like TVs, computers, engines, etc. The CD is badly scratched or dirty. No CD is inserted.	Direct the antenna for optimum reception. Keep the radio away from electrical equipment. Replace or clean the CD. Insert a CD.
The CD skips tracks	The CD is inserted upside down. The laser lens is steamed up. The CD is damaged or dirty. SHUFFLE or PROGRAM is active.	Insert CD with label facing up. Wait until the lens has cleared. Replace or clean the CD. Switch off SHUFFLE or PROGRAM.
Poor cassette sound quality	Dust and dirt on the heads, capstans or pressure rollers. Use of unsuitable cassette types (METAL or CHROME) for recording. Cassette tab(s) may be snapped off.	Clean heads, capstans, and pressure rollers. Only use NORMAL type cassettes for recording. Apply a piece of adhesive tape over the opening.
Recording does not work	Batteries are inserted incorrectly. Batteries are flat.	Insert batteries correctly. Insert fresh batteries.
Remote control does not function properly	Distance to the set is too large.	Reduce distance.

This set complies with the radio interference requirements of the European Community

CD ERROR codes

Error number	Error description	Error type
E0	Focus Error Triggered when the focus is lost for more than 250ms during playing the CD.	W
E2	Slide-in error Generated when the inner-switch did not close within approx. 4s when the pick up is moved inside. Inner-switch or slide motor problems.	W
E3	Slide-out error Generated when the inner-switch did not open within approx. 250ms when the pick up is moved from the inner position outside. Inner-switch or slide motor problems.	W
E5	Jump error. Triggered when the servo processor counts too less tracks in a defined time during JUMPS. This can be caused by a disturbed HF-signal (the tracks cannot be recognized exactly), slide motor problems, track servo problems or scratched discs.	W
E6	Subcode Error No valid subcode for 300ms during PLAY.	W
E7	PLL lock error. When the PLL did not lock after 10 retries then this warning message is generated and the servo is stopped and restarted (as if the user would have pressed STOP and then PLAY immediately) to recover.	W
F0	Focus Search Error Triggered when the focus could not be found within 3s when starting up the CD.	F
F2	Fatal Subcode Error No valid subcode for more than 4s during PLAY.	F

Table 1

Error type: W = Warning set continues operation, message remains on the display until next error occurs or any key is pressed.
F = Fatal Error set stops operation, message remains on the display. (The set can only be operated again via a reset)
