### **Optimum disc playability : ensuring excellent picture quality**

Philips components and modules for the various CD applications have always enjoyed an excellent reputation in the market place for super disc playability - the ability to play discs which may be scratched, soiled or not fully according to the standard specification. This position has been underlined by tests showing the superior performance of the various Philips players, as well as by the positive experiences of millions of individual consumers around the world.

### **Constantly improving performance**

As the penetration of the CD system has increased, and new applications like CD-ROM and Video CD have become commonplace, Philips Components - as the CD technology inventor and as one of the major suppliers of CD player modules in the industry - has constantly improved the performance of its products.

One of the ways in which this benefits users is by optimum disc playability. This is an important parameter for CD players other than CD Audio, and especially for the Video CD applications, because any loss of data from the disc will at best cause disturbances in the reproduced picture, and at worst can cause the player to lose track so that disc playing fails.

### **Presenting Super Error Correction**

To ensure consistently good results when playing Video CD discs of all quality grades and conditions, Philips has introduced further improvements in the system's playability. These developments together are called Super Error Correction, a proprietary Philips technology optimizing the system's ability to handle less than perfect discs with the minimum disturbance to normal playing.

By effectively eliminating virtually all errors arising under normal playing conditions, Super Error Correction ensures that the picture quality as seen by the user is independent of disc play. The video encoding and processing during mastering of the disc, and the MPEG-1 decoding and video encoding in the signal processing stages, are now the only limiting factors for picture quality.

# MP3 General Information

## Dear Customer,

Thank you for buying the Philips MP3-CD Soundmachine. Your great new acquisition will allow you to listen to up to 10 hours of CD-like quality music, using the revolutionary new music compression technology MP3.

## MP3 technology

MP3 is short for MPEG1 Layer-3 encoding and decoding technology, a very powerful encoding algorithm with which you can shrink down the original digital audio sound data with a factor of up to 10 without losing significant sound quality.

## Recording and Playback

**It is recommended to set your recording bit rate to 128kbps, sampling frequency at 44.1kHz to achieve CD-like music playback quality.**

Since downloading MP3 files from the Internet, ripping songs from your own legal CD's and burning MP3 songs onto a CD-R, are a delicate process, the quality of a MP3 song may vary by these process. Subsequently, making a MP3-CD may not be entirely perfect.

**As a result of the above imperfection, you may experience an occasional "skip" while listening, or an occasional delay in accessing "previous/next" title to MP3-CD's. This is considered to be normal.**

A comparison chart is enclosed as below:

Sound Quality	Bit Rate	Approximate Reduction Ratio	Approximate total MP3-CD time	Comment
AM radio	32 kbps	40 : 1	40 hrs	Sound quality significantly affected-not recommended.
FM radio	64 kbps	20 : 1	20 hrs	
Near-CD	96 kbps	15 : 1	15 hrs	Balanced sound quality compression rate.
CD-like	128 kbps	10 : 1	10 hrs	
CD	256 kbps	5 : 1	5 hrs	Compression rate low suggest to play CDs instead.
CD	320 kbps	3 : 1	3 hrs	

## SUPPLIED ACCESSORIES

- ㉒ **KEY+ / KEY-** - to change the VCD key tone to suit to your vocal range.
- ㉓ **ECHO + / ECHO -** - to adjust the VCD echo level for karaoke after you inserted a microphone.

# POWER SUPPLY

## IMPORTANT!

For best CD/MP3-CD/VCD playback, please plug in your set to an AC power supply where convenient.

If operated in DC mode, see below approximate playtime. (Playtime is also varied from different brand batteries) :

Battery type	Playtime
Alkaline	approximate 9 hrs
Zinc Carbonate	approximate 45 minutes

The CD part of this system also serves as a Video CD player if you connect it to your TV set.

Before viewing the Video CD, ensure that the set is switched to corresponding PAL or NTSC system of your TV set (exception Multi-system TV).

## BATTERIES (NOT SUPPLIED)

Whenever convenient, use the mains supply if you want to conserve battery life. The battery supply will be switched off when the set is connected to the mains. Make sure you remove the plug from the set and wall outlet before inserting batteries.

### Batteries

1. Open the battery compartment and insert six batteries, type **R20, UM1** or **D-cells**, (preferably alkaline) with the correct polarity as indicated by the "+" and "-" symbols inside the compartment.

### Remote control

Open the battery compartment and insert two batteries, type **AAA, R03** or **UM4** (preferably alkaline).

2. Replace the compartment door, making sure the batteries are firmly and correctly in place.

3. Remove the batteries if they are exhausted or if they will not be used for a long period.

- The incorrect use of batteries can cause electrolyte leakage and will corrode the compartment or cause the batteries to burst. Therefore:
- Do not mix battery types, e.g. alkaline with zinc carbonate.
- When inserting new batteries, replace all at the same time.
- Remove the batteries if the set is not to be used for a long time.

### Notes :

- The battery supply is switched off when the set is connected to the mains.

**TV screen is disabled during CD / MP3-CD playing if your AZ5155 is battery powered.**

**Batteries contain chemical substances, so they should be disposed of properly**

## MAINS

1. Check if the mains voltage as shown on the type plate (on the bottom of the set) corresponds to your local mains voltage. Select 110 or 220V by the selector (for some version only).
2. If your set is equipped with a voltage selector, adjust the selector so that it matches with the local mains.
3. Connect the mains lead to the **AC MAINS ~** socket and the wall socket.  
→ The set is now ready for use.
4. To switch off the mains supply completely, pull the mains plug out of the wall socket.  
→ Disconnect the mains lead when you change over to battery supply, or to protect the set during heavy thunderstorms.

**The type plate is located on the bottom of the set.**

## GENERAL OPERATION

1. To switch on the set, adjust the source selector.
2. Adjust the sound using the **VOLUME, DYNAMIC BASS BOOST** and **INCREDIBLE SURROUND** control buttons.
3. To switch off the set, adjust the source selector to the **TAPE/OFF** position, with the cassette keys released.

## RADIO RECEPTION

1. Set the source selector to **FM** or **MW**.
2. Adjust the sound using the **VOLUME, DYNAMIC BASS BOOST** and **INCREDIBLE SURROUND** control buttons.
3. Tune to a radio station using the **TUNING** knob.
  - For FM, pull out the telescopic aerial. To improve FM-reception, incline and turn the aerial. Reduce its length if the FM-signal is too strong (very close to a transmitter).
  - For MW, the set is provided with a built-in aerial, so the telescopic aerial is not needed. Direct the aerial by turning the whole set.
4. To switch off, set the source selector to the **TAPE/OFF** position (with the cassette keys released).

## CAUTION

Use of controls or adjustments or performance of procedures other than herein may result in hazardous radiation exposure or other unsafe operation.

### Environmental information

All unnecessary packaging material has been omitted. We have done our utmost to make the packaging easily separable into three mono materials: cardboard, polystyrene and plastic.

**Your set consists of materials which can be recycled if disassembled by a specialized company. Please observe the local regulations regarding the disposal of packaging materials, exhausted batteries and old equipment.**

## DISCS FOR PLAYBACK

This set can play all digital audio CD, video CD, finalised digital audio CD-Recordable (CDR) discs and finalised digital audio CD-Rewritable (CDRW) discs.

### Support following MP3-CD formats:

- ISO 9660 or ISO 9660 + Joliet format - Max. 30 characters
- Max. Track number is 400
- Max. nested directory is 8 levels
- The max. album number is 99
- The max. MP3 programme track number is 20
- The max. length of each track is 99 minutes 59 seconds
- The player can play mixed mode disc of CD / MP3-CD
- Supported VBR bit-rate
- Supported sampling frequencies for MP3 disc : 8 kHz to 48 kHz (44.1kHz preferably)
- Supported bit-rates of MP3 disc are: 32 - 320 kbps (128 kbps preferably)

### Following formats are not supported

- The files like \*.WMA, \*AAC, \*.DLF, \*.M3U, \*.PLS, MP3 PRO
- The non-session closed discs

## LOADING A DISC

1. Set the source selector to **CD/VCD**.
2. Lift to open the CD door.  
→ "CD" will be displayed

## PRECAUTIONS & GENERAL MAINTENANCE

- Place the set on a hard, flat surface so that the system does not tilt.
- Do not expose the set, CDs, batteries or cassettes to humidity, rain, sand or excessive heat caused by heating equipment or direct sunlight.
- Always shut the CD door to keep the CD compartment dust-free. To clean, dust the compartment with a soft dry cloth.
- Do not cover the set. Adequate ventilation with a minimum gap of 15 cms between the ventilation holes and surrounding surfaces is necessary to prevent heat build-up.
- The mechanical parts of the set contain self-lubricating bearings and must not be oiled or lubricated.
- To clean the set, use a soft, slightly dampened chamois leather. Do not use any cleaning agents containing alcohol, ammonia, benzene or abrasives as these may harm the housing.

## CD PLAYER AND CD HANDLING

- The lens of the CD player should *never be touched*.
- Sudden changes in the surrounding temperature can cause condensation to form and the lens of your CD player to cloud over. Playing a CD is then not possible. Do not attempt to clean the lens but leave the set in a warm environment until the moisture evaporates.
- Use only Digital Audio CDs.
- To take a CD out of its box, press the centre spindle while lifting the CD.  
Always pick up the CD by the edge and replace the CD back in its box after use to avoid scratching and dust.
- To clean the CD, wipe in a straight line from the centre towards the edge using a soft, lint-free cloth. Do not use cleaning agents as they may damage the disc.
- *Never write* on a CD or attach stickers to it.

## TAPE DECK MAINTENANCE

To ensure a good recording and playback of the tape deck, clean parts (A), (B) and (C) show in the diagram below, after approx. 50 hours of operation, or on average once a month. Use a cotton bud slightly moistened with alcohol or a special head cleaning fluid to clean the deck.

- Open the cassette holder by pressing **STOP•OPEN** ■ ▲.
- Press **PLAY** ◀ and clean the rubber pressure rollers (C).
- Press **PAUSE** II and clean the magnetic heads (A) and also the capstans (B).
- After cleaning, press **STOP•OPEN** ■ ▲.

Cleaning of the heads can also be done by playing a cleaning cassette through once.

# TROUBLESHOOTING

If a fault occurs, first check the points listed below before taking the set for repair.  
If you are unable to remedy a problem by following these hints, consult your dealer or service centre.

**WARNING:** *Do not open the set as there is a risk of electric shock. Under no circumstances should you try to repair the set yourself, as this will invalidate the guarantee.*

## Problem

## Solution

### CD/VCD OPERATION

"NO DISC" is displayed

- Insert a disc.
- Check if the disc is inserted upside down.
- Wait until the moisture condensation at the lens has cleared.
- Replace or clean the disc, see "Maintenance"
- Use a readable disc or correct recorded format MP3-CD.

No picture on TV screen

- Connect the cable between the system and TV.

No colour on TV

- Change the system to the respective PAL or NTSC setting.

### RADIO RECEPTION

Radio reception is poor

- If the signal is too weak, adjust the antenna for better reception.
- Increase the distance between the Receiver and your TV or VCR.

### TAPE OPERATION/RECORDING

Recording or playback cannot be made

- Clean deck parts, see "Maintenance".
- Use only NORMAL (IEC I) tape.
- Apply a piece of adhesive tape over the missing tab space.

### GENERAL

The system does not react when buttons pressed/set does not work/no display on LCD.

- Slide the source sector to TAPE/OFF. Remove and reconnect the AC power plug for 30 seconds and switch on the system again.

Sound cannot be heard or is of poor quality

- Adjust the volume.
- Make sure the MP3-CD was recorded within 32-320 kbps (128kbps preferably) with sampling frequencies at 8 - 48 kHz (44.1kHz preferably).

The remote control does not function properly

- Reduce the distance between the remote control and the system.
- Insert the batteries with their polarities (+/- signs) aligned as indicated.
- Replace the batteries.
- Point the remote control in the direction of the system's IR sensor.
