For Servicing Information as regard to the:

-Cassette mechanisms refer to Service Manual

"Tape Transport RT76, "Tape Transports RT74".

-Record Player refer to service Manual "Record player Q510AR".

-Loudspeakers refer to 70FB152/11R for F1664/30/35

70FB250/11R for F1664/32

70FB360/11R for F1667/32/43

Attention

This set is equipped with microprocessors having built-in test programmes.

For this test programme and the corresponding repair manual, see page CS 4 053 of this documentation.

Attentie

Dit apparaat is uitgerust met microprocessors met een ingebouwd testprogramma.

Zie voor dit testprogramma en de bijbehorende reparatiehandleidingen pagina CS 4 053 van deze documentatie

Attention

Cet appareil est équipé de microprocesseurs ayant un programme de test incorporé.

Se référer à la page CS 4 053 de cette Documentation pour ce qui concerne ce programme de test et la méthode de réparation qui s'y rapporte.

Achtung!

Dieses Gerät ist mit Mikroprozessoren mit einem eingebauten Prüfprogramm ausgestattet.

Für dieses Prüfprogramm und die zugehörige Reparaturanleitung siehe Seite CS 4 053 dieser Dokumentation.

WARNING

ESD

All ICs and many other semi-conductors are susceptible to electrostatic discharges (ESD). Careless handling during repair can reduce life drastically.
When repairing, make sure that you are connected with the same potential as the mass of the set via a wrist wrap with resistance.
Keep components and tools also at this potential.

NL

WAARSCHUWING

ESD

Alle IC's en vele andere halfgeleiders zijn gevoelig voor elektrostatische ontladingen (ESD). Onzorgvuldig behandelen tijdens reparatie kan de levensduur drastisch doen verminderen.
Zorg ervoor, dat u tijdens reparatie via een polsband met weerstand verbonden bent met hetzelfde potentiaal als de massa van het apparaat.
Houd componenten en hulpmiddelen ook op ditzelfde potentiaal.

F

ATTENTION

ESD

Tous les IC et beaucoup d'autres semi-conducteurs sont sensibles aux décharges statiques (ESD). Leur longévité pourrait être considérablement écourtée par le fait qu'aucune précaution n'est prise à leur manipulation.
Lors de réparations, s'assurer de bien être relié au même potentiel que la masse de l'appareil et enfiler le bracelet serti d'une résistance de sécurité.
Veiller à ce que les composants ainsi que les outils que l'on utilise soient également à ce potentiel.

D

WARNUNG

ESD

Alle IC's und viele andere Halbleiter sind empfindlich gegenüber elektrostatischen Entladungen (ESD). Unsorgfältige Behandlung im Reparaturfall kan die Lebensdauer drastisch reduzieren.
Veranlassen Sie, dass Sie im Reparaturfall über ein Pulsarmband mit Widerstand verbunden sind mit dem gleichen potential wie die Masse des Gerätes.
Bauteile und Hilfsmittel auch auf dieses gleiche Potential halten.

GB

Safety regulations require that the set be restored to its original condition and that parts which are identical with those specified be used.

NL

Veiligheidsbepalingen vereisen, dat het apparaat in zijn oorspronkelijke toestand wordt teruggebracht en dat onderdelen, identiek aan de gespecificeerde worden toegepast.

D

Bei jeder Reparatur sind die geltenden Sicherheitsvorschriften zu beachten. Der Originalzustand des Geräts darf nicht verändert werden für Reparaturen sind Original-Ersatzteile zu verwenden.

F

Les normes de sécurité exigent que l'appareil soit remis à l'état d'origine et que soient utilisées les pièces de rechange identiques à celles spécifiées.

ELECTRICAL MEASUREMENTS AND ADJUSTMENTS RECORDER AND RECORD PLAYER

General conditions recorder

- Prior to any measurement or adjustment with the tape running, heads and tape guides should be degaussed and cleaned.
- The measurements and adjustments are related to the left-hand channel.
- The corresponding test points and adjusting elements for the right-hand channel are given in brackets.
- The voltages have been measured relative to earth.

Required test equipment and test cassettes

- LF generator
- AC mV meter
- Wow and flutter meter
- Frequency counter
- Cassette service set 801CSS 4822 395 30078
- Universal test cassette SBC420Fe 4822 397 30071

RECORDER A + B

Fig. 11

Fig. 12

GB Electrical measurements and adjustments "Recorder"

- *A. – The maximum permissible speed deviation is $\pm 0.5\%$.
Moreover, the wow and flutter value can be read.
 - This value should not exceed 0.35% .
- *B. – Connect the Service cassette set to the apparatus via one of the loudspeaker connectors.
 - Set the apparatus to the play back position with the 50 Hz cassette service set.
 - With R at the back of the motor, adjust for minimum variation of the indicator reading.
- *C. – If the accuracy requirements are less stringent a high quality ferro (normal) cassette may be used as an alternative.
- *D. – If the adjustment is correct the frequency response curve will be similar to curve b in Fig. 12 (distortion $\leq 5\%$).

F Mesures électriques et réglages "Recorder"

- *A. – L'écart de vitesse maximum admissible est de $\pm 0.5\%$.
La taux de pleurage pourra également être lu lors de cette mesure.
 - Cette valeur ne doit pas dépasser 0.35% .
- *B. – Relier le jeu de cassette Service à travers un des haut-parleurs à l'appareil.
 - Positionner l'appareil en lecture et utiliser la cassette Service de 50 Hz.
 - À l'aide de R à l'arrière du moteur, ajuster pour un minimum de variation à l'indication.
- *C. – Si de exigences du point de vue de la précision ne zont pas tellement hautes, une cassette ferro (normale) de bonne qualité suffira.
- *D. – Si le réglage est correct, la courbe de réponse sera seuivable à la courbe b de la Fig. 12 (distorsion $\leq 5\%$).

I Misure e regolazione elettrica "Recorder"

- *A. – La deviazione massima di velocità è $\pm 0.5\%$.
Inoltre, può essere rilevato il wow e flutter.
 - Questo valore non deve eccedere dello 0.35% .
- *B. – Collegare lo strumento di servizio al connettore di uscita di una cassa acustica dell'apparecchio.
 - Posizionare l'apparecchio in riproduzione e usare la cassetta test a 50 Hz.
 - Regolare la velocità del motore (R), per la minima deviazione dello strumento.

NL Elektrische metingen en instellingen "Recorder"

- *A. – De hoogst toelaatbare snelheidsafwijking bedraagt $\pm 0.5\%$.
Tevens kan bij deze meting de jengelwaarde afgelezen worden.
 - Deze waarde mag niet hoger zijn dan 0.35% .
- *B. – Via een van de luidsprekerconnectors het Service-cassettedeel met het apparaat verbinden.
 - Zet het apparaat in de weergeefstand met de 50 Hz cassette uit het Service-cassettedeel.
 - Met R aan de achterzijde van de motor op minimale variatie van de indicatoraflezing instellen.
- *C. – Als de nauwkeurigheidseisen minder streng zijn, kan als alternatief een ferro-cassette (normal) van hoge kwaliteit gebruikt worden.
- *D. – Als de instelling juist is, zal de frekwentiekromme gelijk zijn aan kromme b in Fig. 12 (vervorming $\leq 5\%$).

D Elektrische Messungen und Einstellungen "Recorder"

- *A. – Die höchstzulässige Geschwindigkeitsabweichung beträgt $\pm 0.5\%$.
Auch lässt sich bei dieser Messung der Jaulwert ablesen.
 - Dieser Wert darf 0.35% nicht überschreiten.
- *B. – Über einen der Lautsprecherkonnektoren den Service-Cassetten teil mit dem Gerät verbinden.
 - Mit dem 50-Hz-Cassette aus dem Service-Cassetten teil das Gerät in die Wiedergabestellung bringen.
 - Mit R auf der Rückseite des Motors auf mindest-Schwankungen der Anzeigerablesung einstellen.
- *C. – Wenn die Genauigkeitsanforderungen weniger streng sind, kann als Alternative eine Hochleistungs-ferrocassette (Normal) benutzt werden.
- *D. – Wenn die Einstellung richtig ist, wird der Frequenzgang gleich der Kurve b in Bild 12 (Verzerrung $\leq 5\%$) sein.

- *C. – Se le esigenze de precisione sone meno alte può essere una cassetta du alta qualità al ferro (normale).
- *D. – Se la regolazione è corretta la curva di risposta in frequenza sarà simile alla curva b in Fig. 12 (distorsione $\leq 5\%$).

Achtung

"Bei notwendigem Abgleich ist das Gerät auf die gesetzlich vorgeschriebenen Eckfrequenzen abzugleichen".
>87.2 MHz <108.5 MHz.

ALIGNMENT

General

- During the alignment, keep the levels of the injected signals as low as possible.
- Alignment of IF stages requires a sweep signal.
- For FM: Apply a 10.7 MHz signal with a sweep of 300 kHz at a frequency of 50 Hz.
- For AM: Apply a 450 kHz (468 kHz) signal with a sweep of 10 kHz at a frequency of 50 Hz.
- Place the peak of the band-pass curve in the middle of the picture by shifting the sweep frequency.

Equipment required

- RF generator
- Oscilloscope
- DC-millivoltmeter
- AC-millivoltmeter
- Frequency counter
