Version 1.0

PHILIPS

TECHNICAL SPECIFICATION

General

Dimensions (incl. sockets & feet)	: 184 x 196 x 65mm
Net weight	: 0.8kg

Power supply (via external AC/DC-Adaptor)

Mains voltage (AC)	: 98-264V, 50-60Hz
Power consumption	: 17W max., <1W standby

Video playback performance

S/N Luminance	: >60dB
S/N Chrominance AM	: >60dB
S/N Chrominance PM	: >60dB
Bandwidth Luminance	: 4.8MHz ±2dB

Y/Pr/Pb / Progressive Scan

S/N (all channels)	: >60dB
Bandwidth Y	: >12MHz ±3dB
Bandwidth PrPb	: >6MHz ±3dB
YPrPb crosstalk (bw < 10MHz)	: < -50dB

Audio playback performance – Line out

Output voltage	: 1.6Vrms ±2dB
Channel unbalance (1kHz)	: <1dB
Frequency response	: 20Hz-20kHz ±0.5dB
Crosstalk (1kHz)	: >80dB
S/N unweighted	: >90dB
Dynamic range (1kHz)	: >85dB
Distortion and noise (1kHz)	: >82dB

Audio playback performance – SCART out

Output voltage	: 1.6Vrms ±2dB
Channel unbalance (1kHz)	: <1dB
Frequency response	: 20Hz-20kHz ±0.5dB
Crosstalk (1kHz)	: >75dB
S/N unweighted	: >85dB
Dynamic range (1kHz)	: >80dB
Distortion and noise (1kHz)	: >75dB

Network

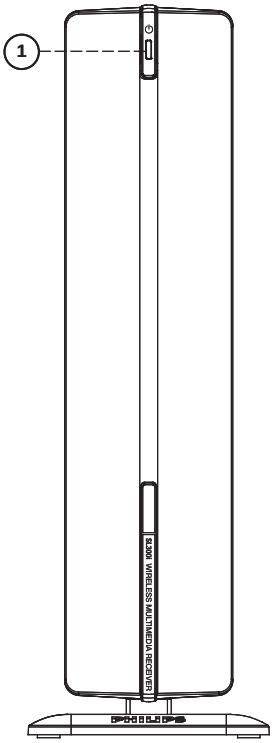
Interoperability	: Universal Plug&Play (UPnP)
Protocol	: TCP/IP
Wired Ethernet	: RJ45 jack, IEEE802.3
Wireless LAN	: WiFi IEEE802.11g

Supported multimedia formats

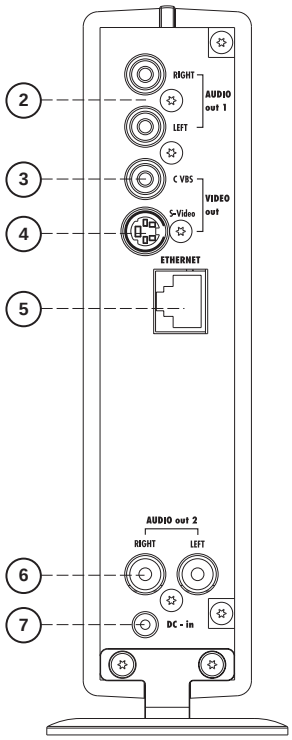
Audio playback	: MP3, MP3pro, Real Audio, PCM
Video playback	: MPEG1, MPEG2, MPEG4, DivX4.0/5.03
Picture	: JPEG, BMP, GIF
Playlist	: M3U, ID3

CONNECTIONS & CONTROLS

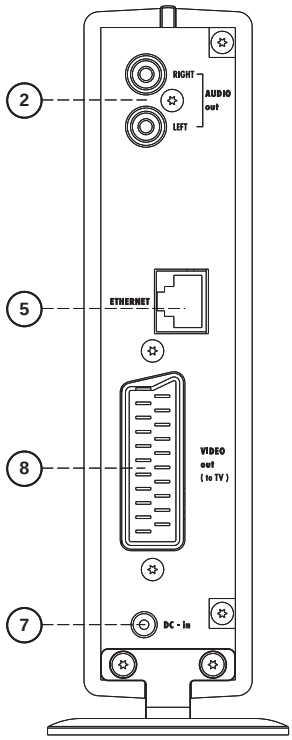
Front View *(all versions)*



Rear View *(version /37)*



Rear View *(versions /00/05/19)*



Pos	Function	Remarks
1	On/Off	Power on/Standby button with integrated red standby indicator
2	Audio L/R output	To connect the SL300i to the left and right audio inputs of an Audio system
3	Video out / CVBS	To connect the SL300i to the Composite video input of a TV set
4	Video out / S-Video	To connect the SL300i to the S-Video input of a TV set
5	Ethernet connector	Optional RJ-45 Ethernet connection for a wired home network
6	Audio L/R output	To connect the SL300i to the left and right audio inputs of an Audio system
7	DC-in	For connecting the SL300i's power adaptor
8	SCART A/V output	Connects the SL300i to a TV set

ACCESSORIES

Article	Codenumber	SL300i/00	SL300i/05	SL300i/19	SL300i/37

SAFETY & WARNINGS

SAFETY

(GB)
Safety regulations require that the set be restored to its original condition and that parts which are identical with those specified be used.
Safety components are marked by the symbol ⚠

(F)
Les normes de sécurité exigent que l`appareil soit remis à l`état d`origine et que soient utilisées les pièces de rechange identiques à celles spécifiées.
Les composants de sécurité sont marqués ⚠

(D)
Bei jeder Reparatur sind die geltenden Sicherheitsvorschriften zu beachten. Der Originalzustand des Gerätes darf nicht verändert werden. Für Reparaturen sind Originalersatzteile zu verwenden.
Sicherheitsbauteile sind durch das Symbol ⚠ markiert.

(NL)
Veiligheidsbepalingen vereisen, dat het apparaat in zijn oorspronkeliijke toestand wordt teruggebracht en dat onderdelen, identiek aan de gespecificeerde, worden toegepast.
De Veiligheidsonderdelen zijn aangeduid met het symbool ⚠

(I)
Le norme di sicurezza estigono che l´apparecchio venga rimesso nelle condizioni originali e che siano utilizzati i pezzi di ricambiago identici a quelli specificati.
Componenty di sicurezza sono marcati con ⚠

ESD

(GB) WARNING
All ICs and many other semiconductors are susceptible to electrostatic discharges (ESD). Careless handling during repair can reduce life drastically.
When repairing, make sure that you are connected with the same potential as the mass of the set via a wristband with resistance. Keep components and tools at this potential.

(F) ATTENTION
Tous les IC et beaucoup d´autres semi-conducteurs sont sensibles aux décharges statiques (ESD). Leur longévite pourrait être considérablement écourtée par le fait qu´aucune précaution nést prise à leur manipulation.
Lors de réparations, s´assurer de bien être relié au même potentiel que la masse de l´appareil et enfileer le bracelet serti d´une résistance de sécurité.
Veiller à ce que les composants ainsi que les outils que l´on utilise soient également à ce potentiel.

(D) WARNUNG
Alle ICs und viele andere Halbleiter sind empfindlich gegenüber elektrostatischen Entladungen (ESD).
Unsorgfältige Behandlung im Reparaturfall kann die Lebensdauer drastisch reduzieren.
Sorgen Sie dafür, daß Sie im Reparaturfall über ein Pulsarmband mit Widerstand mit dem Massepotential des Gerätes verbunden sind.
Halten Sie Bauteile und Hilfsmittel ebenfalls auf diesem Potential.

(NL) WAARSCHUWING
Alle IC´s en vele andere halfgeleiders zijn gevoelig voor electrostatische ontladingen (ESD).
Onzorgvuldig behandelen tijdens reparatie kan de levensduur drastisch doen vermindern. Zorg ervoor dat u tijdens reparatie via een polsband met weerstand verbonden bent met hetzelfde potentiaal als de massa van het apparaat.
Houd componenten en hulpmiddelen ook op ditzelfde potentiaal.

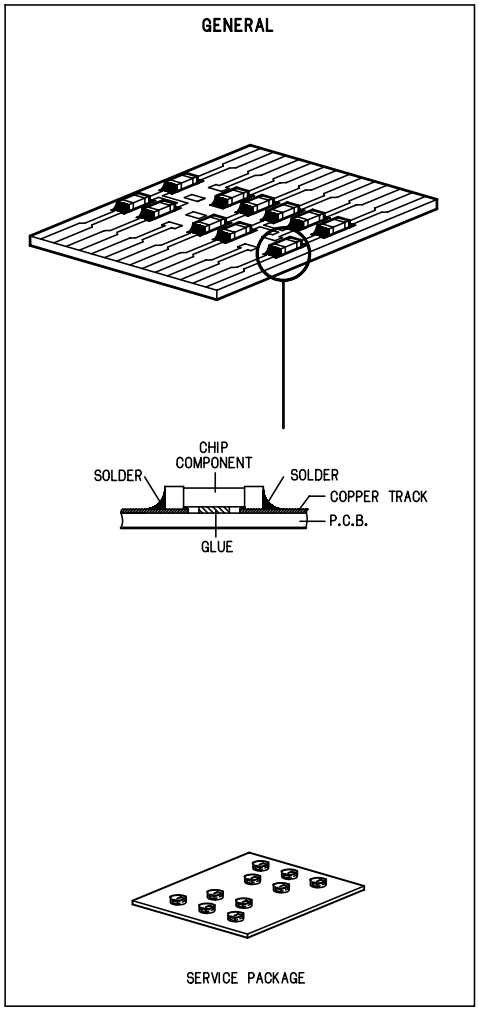
(I) AVVERTIMENTO
Tutti IC e parecchi semi-conduttori sono sensibili alle scariche statiche (ESD).
La loro longevità potrebbe essere fortemente ridatta in caso di non osservazione della più grande cauzione alla loro manipolazione. Durante le riparationi occorre quindi essere collegato allo stesso potenziale che quello della massa delápparecchio tramite un braccialetto a resistenza.
Assicurarsi che i componenti e anche gli utensili con quali si lavora siano anche a questo potenziale.

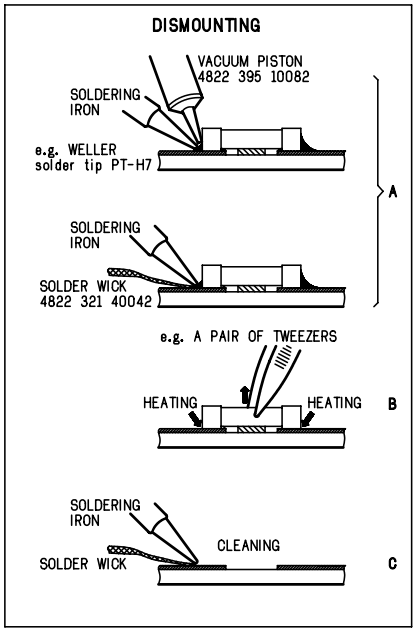
ESD PROTECTION EQUIPMENT

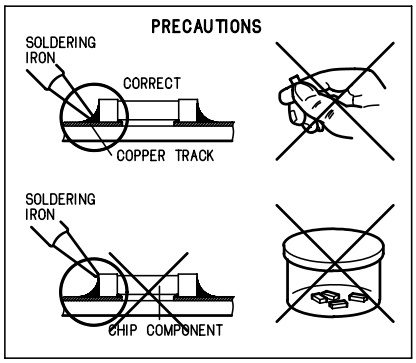
ESD3 KIT – 4822 310 10671
- Anti-static table mat (600x650x1.25mm)
- Anti-static wristband
- Connection box (3 press stud connections, 1MΩ)
- Extendible cable (2m, 2MΩ, to connect wristband to connection box)
- Connecting cable (3m, 2MΩ, to connect table mat to connection box)
- Earch cable (1MΩ, to connect any product to table mat or to connection box)

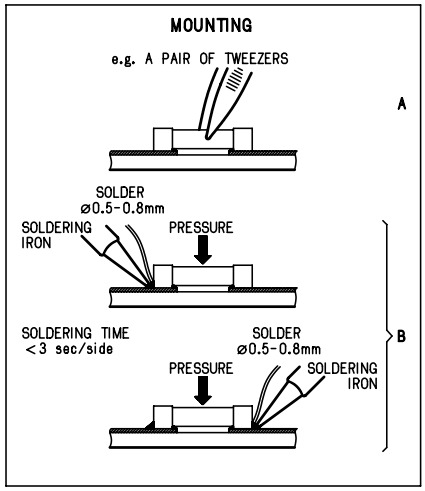
SERVICE HINTS

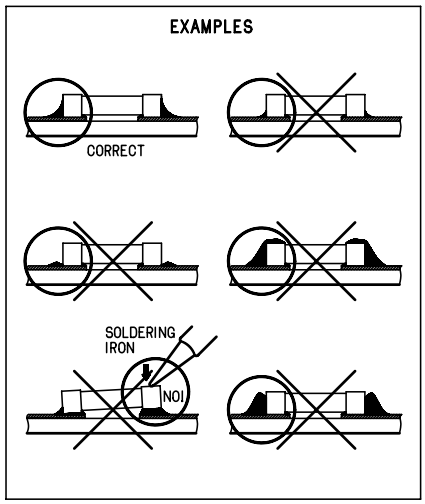
HANDLING CHIP COMPONENTS











TIPS FOR TROUBLESHOOTING

1. General information

The Wireless Multimedia Receiver SL300i contains the following printed boards and modules:
• External AC/DC-Adaptor
• Main Board
• Internet A/V-Module “StreamIOm G1.0/LinX”
• WiFi-Antenna (2x)
• Stand Illumination Board

The external AC/DC-Adaptor, the Main Board and the Internet A/V module are not intended to be repaired on component level. When shallow faultfinding fails and diagnostics threaten to escalate, the board/module in question should be replaced entirely.

2. Operational tests

The following checks will help to delimit hardware problems down to board/module level:

Check	Repair action on failure
Connect external AC/C-Adaptor and check if stand-by LED is on.	Measure if output voltage of AC/DC-Adaptor is 12V. If voltage is not ok replace AC/DC-Adaptor.
Press the stand-by button. Check if colour of standby-LED changes from red to blue.	Check FFC cables. If connections are ok replace entire Main Board.
If unit wakes up check if OSD works and if there is any response on the MENU key.	Hold RED key (=subtitle key) on the RC depressed while plugging in mains. This will enter the “system recovery mode”. TV-screen will show an emergency OSD for downloading the module firmware via internet. Follow the instructions on screen (press RED key on the RC when prompted to continue). DO NOT DISCONNECT WHILE DOWNLOAD IS IN PROGRESS!
If unit fails to wake up or OSD does not work at all	Replace entire StreamIOm module. Caution: When replacing StreamIOm module, the set 12NC must be programmed into the module (see factory test server, chapter 4-3). After setting the set 12NC, upgrade firmware via system recovery mode (see above).
If wired streaming works but wireless streaming fails	Check wiring of WiFi-Antennas. If wiring is ok replace WiFi-Card. If problem remains replace entire StreamIOm module.
If no fault found	Upgrade firmware via system recovery mode (see above).

3. Functional tests

The following tests should be carried out before returning the set to the customer:

Functional test	Test sequence
Factory server mode (after replacement of StreamIOm module only)	• Start factory test server on PC → select correct set type • Start set with STANDBY+STANDBY(RC)+plug in mains (press keys until set powers on automatically) • Set will boot as in normal operation • Check/modify set 12NC on the OSD when factory test server is active
Wired streaming test	• Navigate through filestructure • Stream high bitrate Video content and testpicture, check line out, screen appearance and line outputs
Video output test (for EUR version only)	• Press “Menu” on RC → PICTURE → TV settings → VIDEO OUTPUT → select “RGB” • Check if OSD is still visible (assure that the TV is capable of using RGB) • RESET SETTINGS by pressing “Menu” → “Reset settings” → YES → unplug mains
Video output test (for NAFTA version only)	• Check if OSD is visible on TV connected via CVBS and S-Video • RESET SETTINGS by pressing “Menu” → “Reset settings” → YES → unplug mains
Wireless test	• Remove Ethernet cable • Plug in mains • Wake up the unit by pressing PC-LINK button on the RC • Wireless networks will be shown → select your network and hit OK • Stream high bitrate video content • Press the RED key on the RC repeatedly and check if color key bar and more OSD details are shown • Press until Colour key bar disappears • Press the PAUSE key on the RC repeatedly and check if the set pauses and resumes play • Press “Menu” on RC → Network → wireless settings → SSID and try to modify the SSID by entering about 10 characters in SMS style. If problems are observed, routing of wireless cables may be wrong.
Reset settings	As last step of the functional test, all settings MUST be reset to the factory defaults as described above! Else, the connection wizard will not work and the customer will face problems connecting the set to the home network. The reset will also restore the default video output mode.

4. Wiring instructions for WiFi-Antennas

Caution: The terminals for the WiFi-Antennas must not be interchanged!
The cable connected to the “Main” terminal on the WiFi-Card MUST be connected to the antenna on the right side of the set (seen from front panel). Wrong wiring will disturb the functionality of the IR-Receiver and cause serious problems with the Remote Control in WiFi mode.

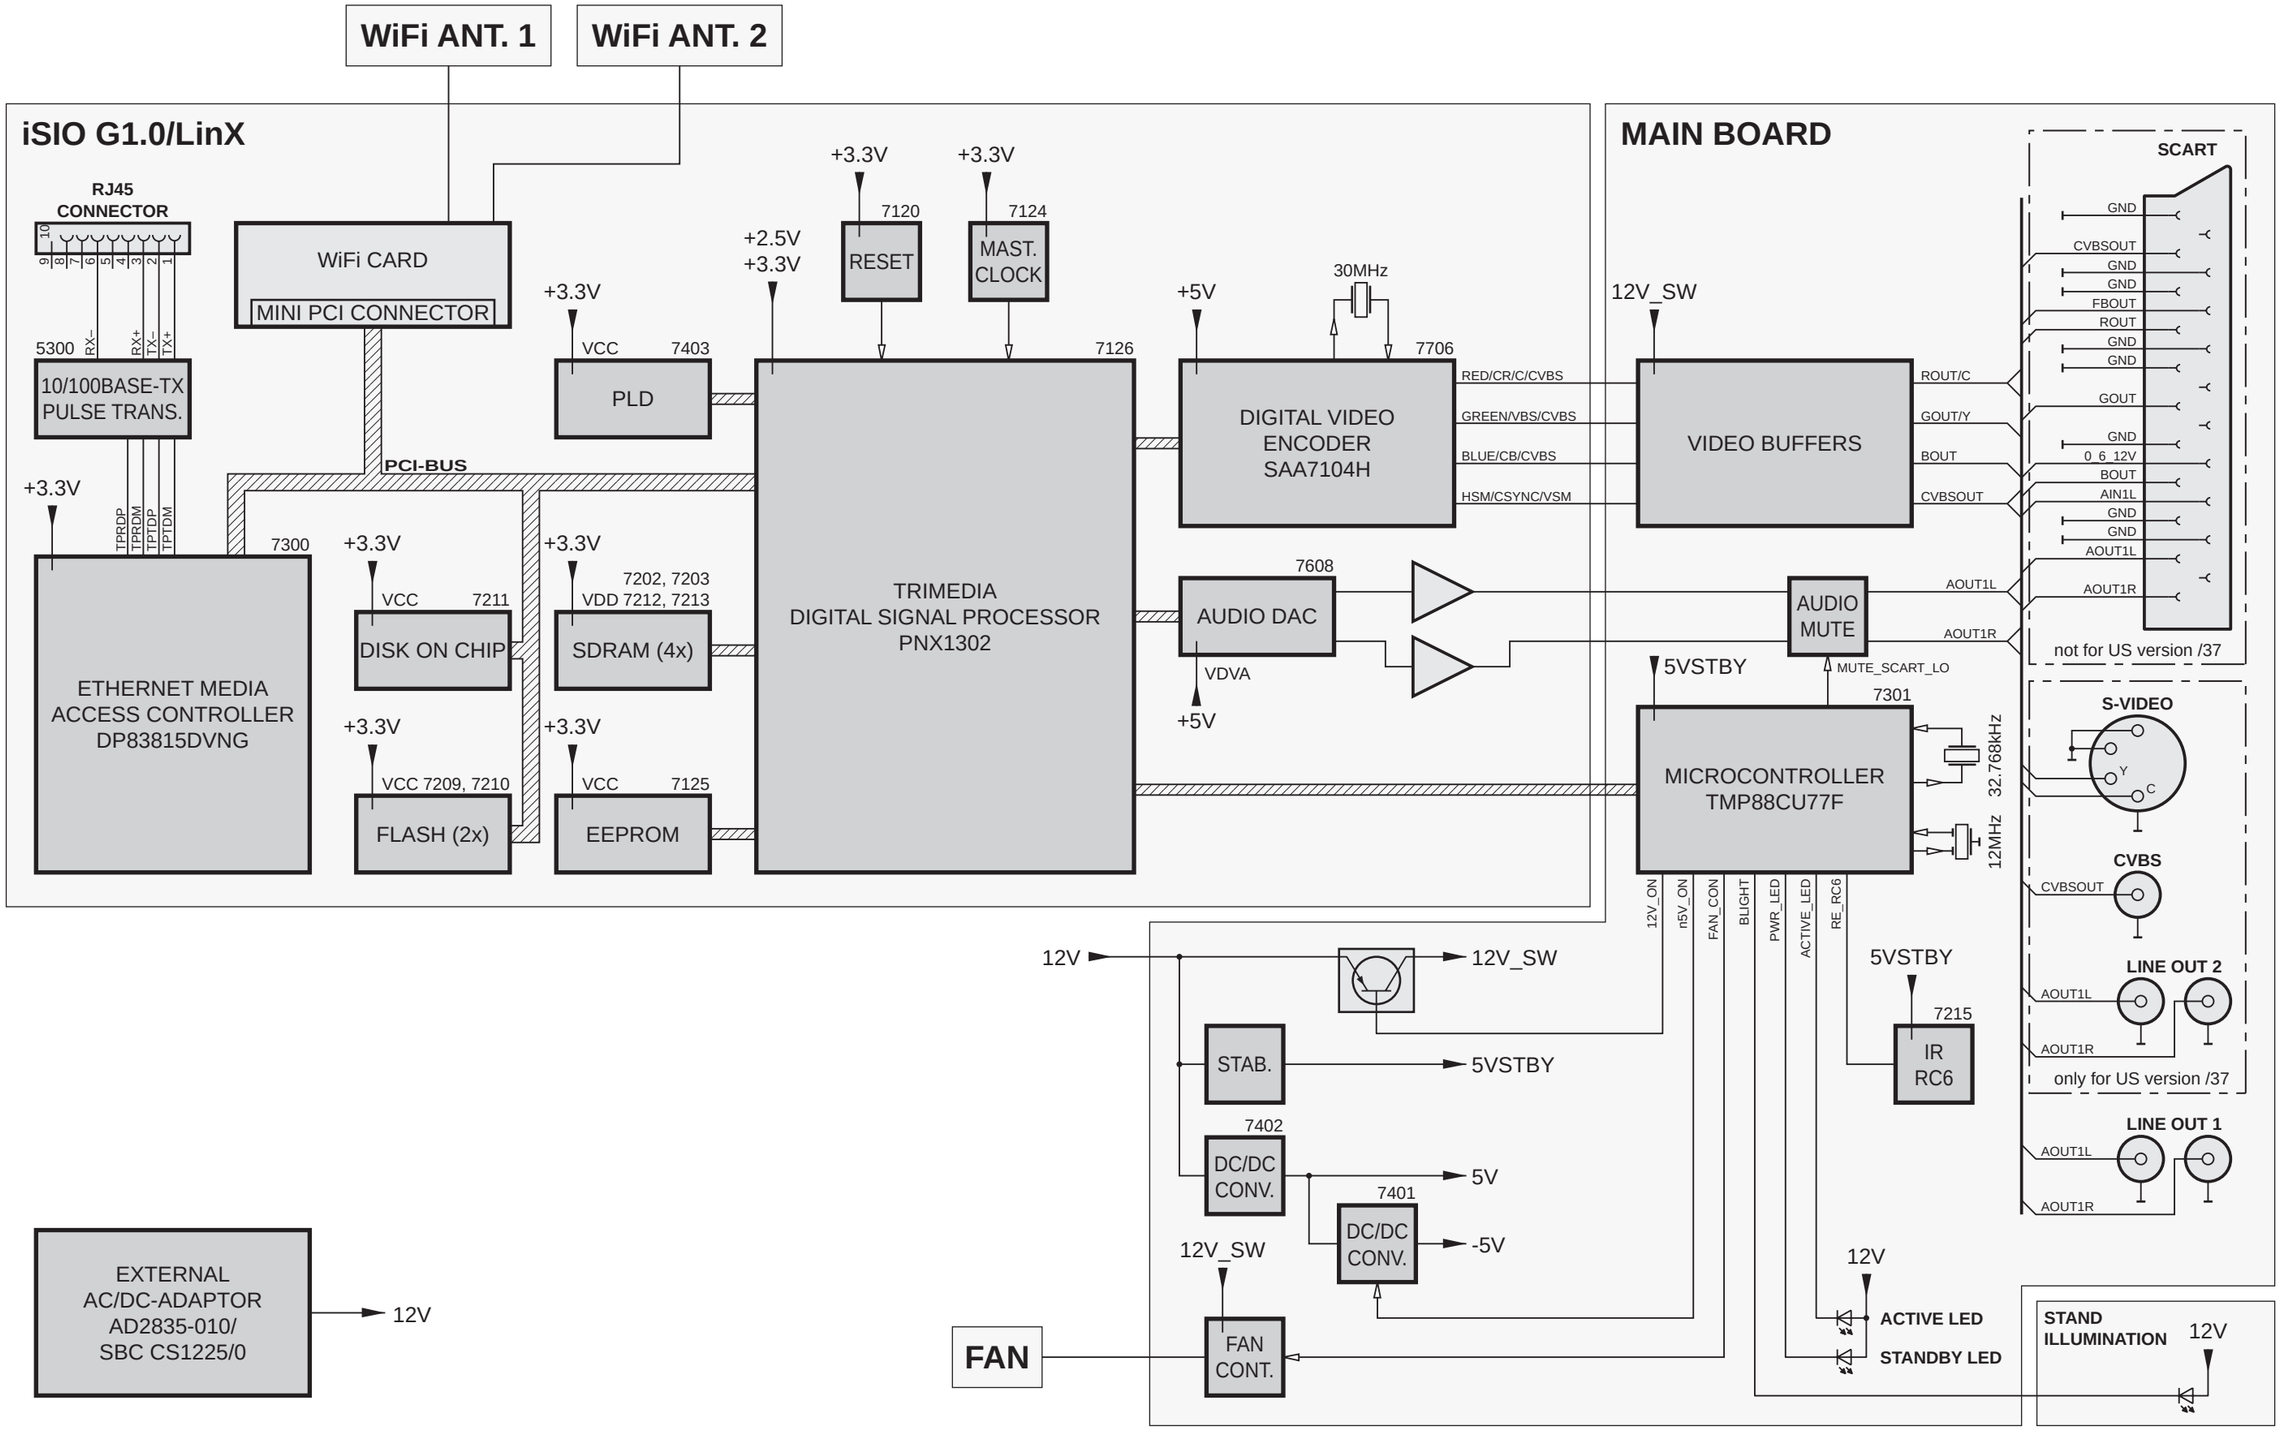
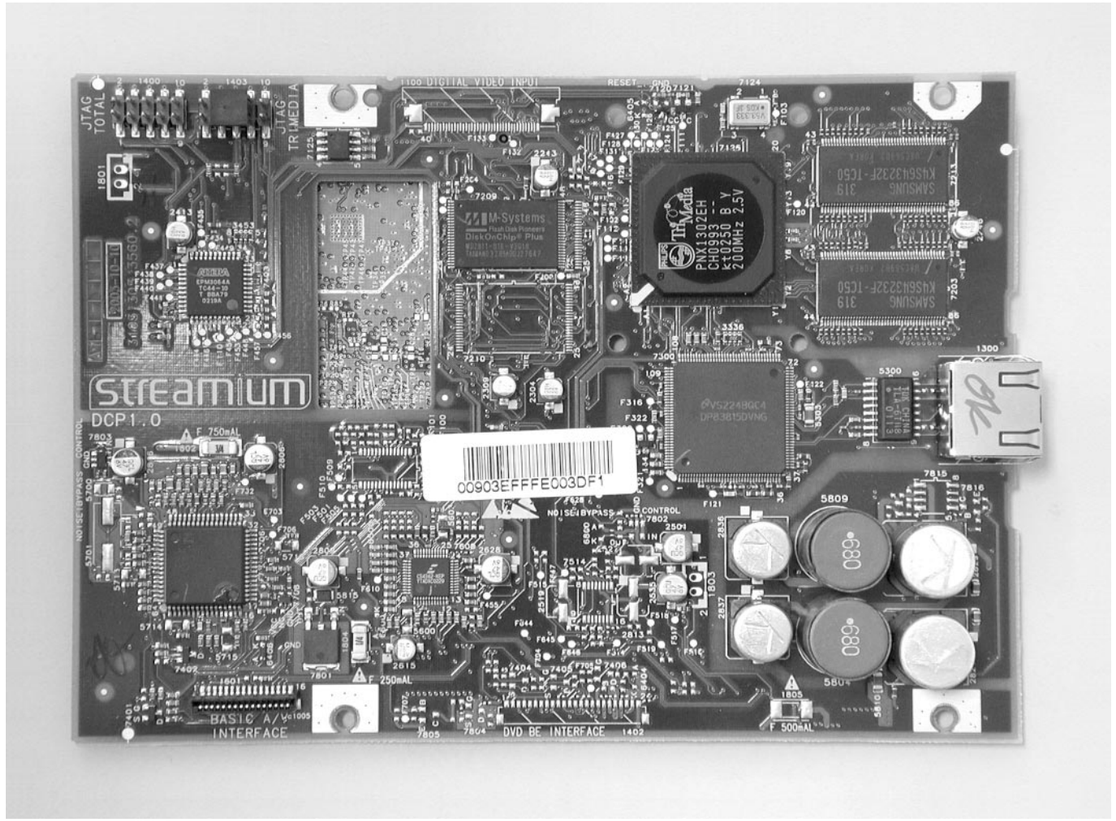
BLOCK DIAGRAM





StreamIOm G1.0/LinX Internet A/V Module

This module is not intended to be repaired on component level.
Circuit Diagrams and Printed Circuit Board drawings
are published for orientation only.

In case of defects please replace the entire module.

Modules can be ordered with codenumber “3103 308 67790”.

4-1

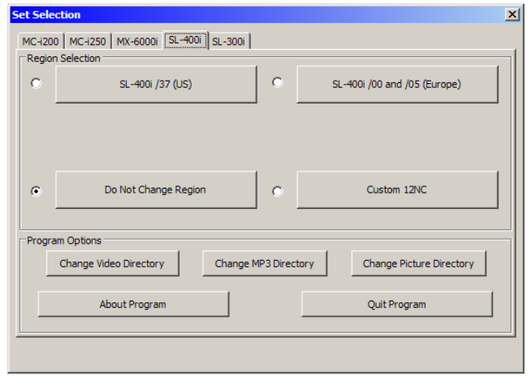
Internet A/V Module – Service Hints

The Internet A/V Module **StreamIOm G1.0/LinX** is not intended to be repaired on component level. Only the complete Printed Board Assembly and the Wireless LAN Card are available as service spare part. These articles can be ordered with the following codenumbers:

StreamIOm G1.0/LinX PBAS 3103 308 67790
Wireless LAN Card.....9307 008 01371

Important note: When replacing the Internet A/V Module the set 12NC must be programmed into the module before returning the set to the customer !!
The 12NC depends on the stroke version of the set and can only be programmed with the help of an external application – the so-called **Factory Test Server**.

Factory Test Server Application



The Factory Test Server serves two purposes:
1. To test the Internet streaming of the module, without having a broadband Internet connection present.
2. To program the SET 12NC into the module after replacement.

The Factory Test Server Application is available at dedicated workshops, only.

Basic requirements:
- PC running Windows NT4 Service Pack 6 or higher, Windows 2000, or Windows XP Pro
- 400MB hard disk space
- Ethernet network card
- Ethernet crossover cable or Ethernet hub with standard patch cable
- Wireless Access Point
- Mouse
- Monitor
- CD-ROM drive (for installation)

For detailed instructions on how to install, setup and use this application please refer to the “Factory Test Server Application Manual”, included on the CD-ROM.

Main Board

This board is not intended to be repaired on component level.
Circuit Diagrams and Printed Circuit Board drawings
are published for orientation only.

In case of defects please replace the entire board.

Boards can be ordered with the following codenumbers:

Main Board EUR Version /00/05/19..... 3103 308 67800
Main Board NAFTA Version /37..... 3103 308 67810
