Operating Instructions

IMPORTANT

IMPORTANT SAFETY INSTRUCTIONS

POWER-CORD PROTECTION — Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to cords at plugs, convenience receptacles, and the point where they exit from the product.

OUTDOOR ANTENNA GROUNDING — If an outside antenna or cable system is connected to the product, be sure the antenna or cable system is grounded so as to provide some protection against voltage surges and built-up static charges. Article 810 of the National Electrical Code, ANSI/NFPA 70, provides information with regard to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of grounding conductors, location of antenna-discharge unit, connection to grounding electrodes, and requirements for the grounding electrode. See Figure A.

LIGHTNING — For added protection for this product during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna or cable system. This will prevent damage to the product due to lightning and power-line surges.

POWER LINES — An outside antenna system should not be located in the vicinity of overhead power lines or other electric light or power circuits, or where it can fall into such power lines or circuits. When installing an outside antenna system, extreme care should be taken to keep from touching such power lines or circuits as contact with them might be fatal.

OVERLOADING — Do not overload wall outlets, extension cords, or integral convenience receptacles as this can result in a risk of fire or electric shock.

OBJECT AND LIQUID ENTRY — Never push objects of any kind into this product through openings as they may touch dangerous voltage points or short-out parts that could result in a fire or electric shock. Never spill liquid of any kind on the product.

SERVICING — Do not attempt to service this product yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

DAMAGE REQUIRING SERVICE — Unplug this product from the wall outlet and refer servicing to qualified service personnel under the following conditions:
- When the power-supply cord or plug is damaged.
- If liquid has been spilled, or objects have fallen into the product.
- If the product has been exposed to rain or water.
- If the product does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as an improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to its normal operation.
- If the product has been dropped or damaged in any way.
- When the product exhibits a distinct change in performance — this indicates a need for service.

REPLACEMENT PARTS — When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer or have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or other hazards.

SAFETY CHECK — Upon completion of any service or repairs to this product, ask the service technician to perform safety checks to determine that the product is in proper operating condition.

WALL OR CEILING MOUNTING — The product should not be mounted to a wall or ceiling.

HEAT — The product should be situated away from heat sources such as radiators, heat registers, stoves, or other products (including amplifiers) that produce heat.

IMPORTANT NOTICE
The serial number for this equipment is located on the rear panel. Please write this serial number on your enclosed warranty card and keep it in a secure area. This is for your security.

H006A_En

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
– Reorient or relocate the receiving antenna.
– Increase the separation between the equipment and receiver.
– Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
– Consult the dealer or an experienced radio/ TV technician for help. **H010_En**

Information to User
Alteration or modifications carried out without appropriate authorization may invalidate the user's right to operate the equipment. **H011_En**

CAUTION:
This product satisfies FCC regulations when shielded cables and connectors are used to connect the unit to other equipment. To prevent electromagnetic interference with electric appliances such as radios and televisions, use shielded cables and connectors for connections. **H012_En**

CAUTION
• Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.
• The use of optical instruments with this product will increase eye hazard. **H013_En**

[For Canadian model]
CAUTION: TO PREVENT ELECTRIC SHOCK, DO NOT USE THIS (POLARIZED) PLUG WITH AN EXTENSION CORD, RECEPTACLE OR OTHER OUTLET UNLESS THE BLADES CAN BE FULLY INSERTED TO PREVENT BLADE EXPOSURE.

ATTENTION: POUR PREVENIR LES CHOCS ELECTRIQUES NE PAS UTILISER CETTE FICHE POLARISEE AVEC UN PROLONGATEUR UNE PRISE DE COURANT OU UNE AUTRE SORTIE DE COURANT, SAUF SI LES LAMES PEUVENT ETRE INSEREES A FOND SANS EN LAISSER AUCUNE PARTIE A DECOUVERT. **H007A_2L**

[For Canadian model]
This Class B digital apparatus complies with Canadian ICES-003.

[Pour le modèle Canadien]
Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada. **H009_2L**

[For U.S. model]

ENERGY STAR® and ENERGY STAR certification mark are registered US marks. **K001B_En**

This product is for general household purposes. Any failure due to use for other than household purposes (such as long-term use for business purposes in a restaurant or use in a car or ship) and which requires repair will be charged for even during the warranty period. **K041_En**

WARNING:

Handling the cord on this product or cords associated with accessories sold with the product will expose you to lead, a chemical known to the State of California and other governmental entities to cause cancer and birth defects or other reproductive harm. **Wash hands after handling.**

Dear Customer:

Selecting fine audio equipment such as the unit you've just purchased is only the start of your musical enjoyment. Now it's time to consider how you can maximize the fun and excitement your equipment offers. This manufacturer and the Electronic Industries Association's Consumer Electronics Group want you to get the most out of your equipment by playing it at a safe level. One that lets the sound come through loud and clear without annoying blaring or distortion- and, most importantly, without affecting your sensitive hearing.

Sound can be deceiving. Over time your hearing "comfort level" adapts to higher volumes of sound. So what sounds "normal" can actually be loud and harmful to your hearing. Guard against this by setting your equipment at a safe level BEFORE your hearing adapts.

To establish a safe level:
● Start your volume control at a low setting.
● Slowly increase the sound until you can hear it comfortably and clearly, and without distortion.

Once you have established a comfortable sound level:
● Set the dial and leave it there.

Taking a minute to do this now will help to prevent hearing damage or loss in the future. After all, we want you listening for a lifetime.

We Want You Listening For A Lifetime

Used wisely, your new sound equipment will provide a lifetime of fun and enjoyment. Since hearing damage from loud noise is often undetectable until it is too late, this manufacturer and the Electronic Industries Association's Consumer Electronics Group recommend you avoid prolonged exposure to excessive noise. This list of sound levels is included for your protection.

Decibel Level	Example
30	Quiet library, soft whispers
40	Living room, refrigerator, bedroom away from traffic
50	Light traffic, normal conversation, quiet office
60	Air conditioner at 20 feet, sewing machine
70	Vacuum cleaner, hair dryer, noisy restaurant
80	Average city traffic, garbage disposals, alarm clock at two feet.

THE FOLLOWING NOISES CAN BE DANGEROUS UNDER CONSTANT EXPOSURE

90	Subway, motorcycle, truck traffic, lawn mower
100	Garbage truck, chain saw, pneumatic drill
120	Rock band concert in front of speakers, thunderclap
140	Gunshot blast, jet plane
180	Rocket launching pad

Information courtesy of the Deafness Research Foundation.

Contents

Chapter 1
Before you start

Features

24-bit/192kHz compatible DAC
This player is fully compatible with high sampling-rate discs, capable of delivering better-than-CD sound quality in terms of dynamic range, low-level resolution and high-frequency detail.

Excellent audio performance with Dolby*1 Digital and DTS*2 software

Logos: [DD DOLBY DIGITAL] [dts DIGITAL OUT]

When connected to a suitable AV amplifier or receiver, this player gives great surround sound with Dolby Digital and DTS discs.

TruSurround*3 and Virtual Dolby Digital

Logo: [SRS(•) TruSurround]

TruSurround/Virtual Dolby Digital creates a realistic surround-sound effect from any Dolby Digital source using just two speakers. See *Virtual Surround* on page 44.

PureCinema progressive scan
When connected to a progressive scan-compatible TV or monitor using the component video outputs, you can enjoy extremely stable, flicker free images, with the same frame refresh rate as the original movie.

Picture zoom
While a DVD or Video CD is playing, you can zoom in on any part of the picture at up to 4x magnification for a closer look. See *Zooming the screen* on page 40.

MP3 and WMA compatibility
This player is compatible with CD-R, CD-RW and CD-ROM discs that contain MP3 or WMA audio tracks. See also *Compressed audio compatibility* on page 11.

Graphical on-screen displays
Setting up and using your DVD player is made very easy using the graphical on-screen displays.

Energy saving design
This player features an auto power-off function. If the player is not used for over 30 minutes, it automatically switches itself into standby.

This unit is designed to use 0.12 W of power when in standby mode.

*1 Manufactured under license from Dolby Laboratories. "Dolby" and the double-D symbol are trademarks of Dolby Laboratories.

*2 "DTS" and "DTS Digital Out" are registered trademarks of Digital Theater Systems, Inc.

*3 TruSurround and the (•) symbol are trademarks of SRS Labs, Inc. TruSurround technology is incorporated under license from SRS Labs, Inc.

What's in the box

Please confirm that the following accessories are in the box when you open it.

- Remote control
- AA/R6P dry cell batteries x2
- Audio/video cable (red/white/yellow plugs)
- Power cable
- Operating instructions
- Warranty card

Putting the batteries in the remote control

⚠ Important

Incorrect use of batteries can result in hazards such as leakage and bursting. Please observe the following:

- Don't mix new and old batteries together.
- Don't use different kinds of battery together—although they may look similar, different batteries may have different voltages.
- Make sure that the plus and minus ends of each battery match the indications in the battery compartment.
- Remove batteries from equipment that isn't going to be used for a month or more.
- When disposing of used batteries, please comply with governmental regulations or environmental public instruction's rules that apply in your country or area.

H048 En

1   Open the battery compartment cover on the back of the remote control.
2   Insert two AA/R6P batteries into the battery compartment following the indications (⊕, ⊖) inside the compartment.
3   Close the cover.
Using the remote control

Keep in mind the following when using the remote control:

- Make sure that there are no obstacles between the remote and the remote sensor on the unit.
- The remote has a range of about 7m (23ft.).
- Remote operation may become unreliable if strong sunlight or fluorescent light is shining on the unit's remote sensor.

- Remote controllers for different devices can interfere with each other. Avoid using remotes for other equipment located close to this unit.
- Replace the batteries when you notice a fall off in the operating range of the remote.

Disc / content format playback compatibility

General disc compatibility
This player was designed and engineered to be compatible with software bearing one or more of the following logos:

DVD-Video   DVD-R   DVD-RW

Audio CD   Video CD   CD-R   CD-RW

Fujicolor CD

- Kodak Picture CD
- ✍ is a trademark of Fuji Photo Film Co. Ltd.

Other formats, including but not limited to the following, are not playable in this player:

DVD-Audio / SACD / DVD-RAM DVD-ROM / CD-ROM*

  * *Except those that contain MP3, WMA or JPEG. See also Compressed audio compatibility and JPEG file compatibility below.*

DVD-R/RW and CD-R/RW discs (Audio CDs and Video CDs) recorded using a DVD recorder, CD recorder or personal computer may not be playable on this unit. This may be caused by a number of possibilities, including but not limited to: the type of disc used; the type of recording; damage, dirt or condensation on either the disc or the player's pick-up lens. See below for notes about particular software and formats.

CD-R/RW compatibility
- This unit will play CD-R and CD-RW discs recorded in CD Audio or Video CD format, or as a CD-ROM containing MP3, WMA or JPEG files. However, any other content may cause the disc not to play, or create noise/distortion in the output.
- This unit cannot record CD-R or CD-RW discs.
- Unfinalized CD-R/RW discs recorded as CD Audio can be played, but the full Table of Contents (playing time, etc.) will not be displayed.

DVD-R/RW compatibility
- This unit will play DVD-R/RW discs recorded using the DVD-Video format that have been finalized using a DVD-recorder.
- This unit will play DVD-RW discs recorded using the Video Recording (VR) format.
- **DVD-RW** shows in the display when a VR format DVD-RW disc is loading.
- When playing a VR format DVD-RW discs that was edited on a DVD recorder, the screen may go momentarily black at edited points and/or you may see scenes from immediately before the edited point.
- This unit cannot record DVD-R/RW discs.
- Unfinalized DVD-R/RW discs cannot be played in this player.

PC-created disc compatibility

• If you record a disc using a personal computer, even if it is recorded in a "compatible format" as listed above, there will be cases in which the disc may not be playable in this machine due to the setting of the application software used to create the disc. In these particular instances, check with the software publisher for more detailed information.

• Check the DVD-R/RW or CD-R/RW software disc boxes for additional compatibility information.

About WMA

The Windows Media™ logo printed on the box indicates that this player can playback WMA data.

WMA is short for Windows Media Audio and refers to an audio compression technology developed by Microsoft Corporation. WMA data can be encoded by using Windows Media Player version 8 (or less) or Windows Media Player for Windows XP.

Windows Media, and the Windows logo are trademarks, or registered trademarks of Microsoft Corporation in the United States and/or other countries.

Compressed audio compatibility

• This unit will play CD-ROM, CD-R, and CD-RW discs containing files saved in the MPEG-1 Audio Layer 3 (MP3) or Windows Media Audio (WMA) format with a sampling rate of 32, 44.1 or 48kHz. Incompatible files will not play and the message **Can't play this format** will be displayed (**NO PLAY** in the front panel display).

• Fixed bit-rate MP3 files are recommended. Variable bit-rate (VBR) MP3 files are playable, but playing time may not be shown correctly.

• This player is compatible with WMA data encoded using Windows Media Player version 8 (or less) or Windows Media Player for Windows XP.

• This player is not compatible with lossless-encoding or variable bit-rate (VBR) WMA files.

• WMA files encoded with DRM (Digital Rights Management) copy protection will not play and the message **Can't play this format** will be displayed (**NO PLAY** in the front panel display).

• The CD-ROM used to compile your WMA/MP3 files must be ISO 9660 Level 1 or 2 compliant. CD physical format: Mode1, Mode2 XA Form1. Romeo and Joliet file systems are both compatible with this player.

• Use CD-R or CD-RW media for recording your files. The disc must be finalized (i.e. the session must be closed) in order to play in this unit. This player is not compatible with multi-session discs. Only the first session of a multi-session disc will be recognized.

• This player only plays tracks that are named with the file extension .mp3, .MP3, .wma, or .WMA.

• When naming MP3 and WMA files, add the corresponding file name extension (.mp3 or .wma). Files are played according to the file extension. To prevent noise and malfunctions, do not use these extensions for other kinds of files.

• This player can recognize up to 999 files (WMA/MP3/JPEG) and up to 499 folders. If a disc exceeds these limits, only files and folders up to these limits will be playable. Files and folders are read/displayed in alphabetical order. Note that if the file structure is very complex, you may not be able to read/play all files on the disc.

• Folder and track names (excluding the file extension) are displayed.

• There are many different recording bit-rates available to encode MP3 files. This unit was designed to be compatible with all of them. Audio encoded at 128Kbps should sound close to regular CD Audio quality. This player will play lower bit-rate files, but please note that the sound quality becomes noticeably worse at lower bit-rates.

JPEG file compatibility

• Baseline JPEG and EXIF 2.1* still image files up to 8 mega-pixels are supported (maximum vertical and horizontal resolution is 5120 pixels). (*File format used by digital still cameras)

• The CD-ROM used to compile your JPEG files must be ISO 9660 Level 1 or 2 compliant. CD physical format: Mode1, Mode2 XA Form1. Romeo and Joliet file systems are both compatible with this player.

• This player only displays files that are named with the file extension .jpg or .JPG.

Chapter 2
Connecting up

Rear panel connections
⚠ **Important**

• When connecting this player up to your TV, AV receiver or other components, make sure that all components are switched off and unplugged.

1 DIGITAL AUDIO OUT – COAXIAL
This is a digital audio output for connection to a PCM, Dolby Digital, DTS and/or MPEG-compatible AV receiver that has a coaxial digital input.

Connect using a commercially available coaxial digital audio cable.

2 COMPONENT VIDEO OUT
This is a high quality video output for connection to a TV, monitor or AV receiver that has component video inputs.

Connect using a commercially available three-way component video cable. Be careful to match the colors of the jacks and cables for correct connection.

3 AUDIO OUT L / R
This pair of analog audio outputs connects to your TV, AV receiver or stereo system. Even if you are connecting up one of the digital outputs, we still recommend you connect these jacks.

Use the supplied audio/video cable when connecting these jacks. Match the colors of the jacks and cables for correct stereo sound.

4 AC IN
Connect the supplied power cable here, then plug into a power outlet.

5 VIDEO OUT
This is a standard video output that you can connect to your TV or AV receiver using the supplied audio/video cable.

6 S (S-video output)
This is an S-video output that you can use instead of the video output described in **5** above.

7 DIGITAL AUDIO OUT – OPTICAL

This is a digital audio output for connection to a PCM, Dolby Digital, DTS and/or MPEG-compatible AV receiver that has an optical digital input.

Connect using a commercially available optical digital audio cable.

Tip

• You may find it useful to have the manuals supplied with your other components handy when connecting this player.

• If you come across any unfamiliar terms in this section of the manual, turn to the *Glossary* on page 63.

Easy connections

The setup described here is a basic setup that allows you to play discs using just the cables supplied with the player. In this setup, stereo audio is played through the speakers in your TV.
Important

• This player is equipped with copy protection technology. Do not connect this player to your TV via a VCR using AV cables, as the picture from this player will not appear properly on your TV. (This player may also not be compatible with some combination TV/VCRs for the same reason; refer to the manufacturer for more information.)

• When connecting to your TV as shown above, do not set the **Component Out** setting (page 50) to **Progressive**.

1   Connect the VIDEO OUT and AUDIO OUT L/R jacks to a set of A/V inputs on your TV.
Use the supplied audio/video cable, connecting the red and white plugs to the audio outputs and the yellow plug to the video output. Make sure you match up the left and right audio outputs with their corresponding inputs for correct stereo sound.

See below if you want to use a component or S-video cable for the video connection.

2   Connect the supplied AC power cable to the AC IN inlet, then plug into a power outlet.

✎ Note

- Before unplugging the player from the power outlet, make sure you first switch it into standby using either the front panel ⏻ **STANDBY/ON** button, or the remote control, and wait of the **-OFF-** message to disappear from the player's display.

- For the above reasons, do not plug this player into a switched power supply found on some amplifiers and AV receivers.

- When **Component Out** (page 50) is set to **Progressive**, there is no video output from the **VIDEO OUT** (composite) and **S** (S-video) jacks. If you want to display video on more than one monitor simultaneously, make sure that it is set to **Interlace**. Switch the player to standby then, using the front panel controls, press ⏻ **STANDBY/ON** while pressing ⏮◀◀ to switch the player back to **Interlace**.

Connecting using the S-video output

If your TV (or other equipment) has an S-video input, you can use this instead of the standard (composite) output for a better quality picture.

- **Use an S-video cable (not supplied) to connect the S-VIDEO OUT to an S-video input on your TV (or monitor or AV receiver).**
Line up the small triangle above the jack with the same mark on the plug before plugging in.
Connecting using the component video output

You can use the component video output instead of the standard video out jack to connect this player to your TV (or other equipment). This should give you the best quality picture from the three types of video output available.

• **Use a component video cable (not supplied) to connect the COMPONENT VIDEO OUT jacks to a component video input on your TV, monitor or AV receiver.**
Note

• To set up the player for use with a progressive scan TV, see *Component Out* on page 50.

Connecting to an AV receiver

To enjoy multichannel surround sound you need to connect this player to an AV receiver using a digital output. This player has both coaxial and optical digital jacks; use whichever is convenient.

In addition to a digital connection, we recommend also connecting using the stereo analog connection.

You'll probably also want to connect a video output to your AV receiver. You can use any of the video outputs available on this player (the illustration shows a standard (composite) connection).

1 Connect one of DIGITAL AUDIO OUT jacks on this player to a digital input on your AV receiver.
This enables you to listen to multichannel surround sound.

For an optical connection, use an optical cable (not supplied) to connect the **OPTICAL DIGITAL AUDIO OUT** jack to an optical input on your AV receiver.

For a coaxial connection, use a coaxial cable (similar to the supplied video cable) to connect the **COAXIAL DIGITAL AUDIO OUT** jack to a coaxial input on your AV receiver.

2 Connect the analog AUDIO OUT L/R and VIDEO OUT jacks on this player to a set of analog audio and video inputs on your AV receiver.
The diagram shows standard video connections, but you can alternatively use the S-video or component video connections if they're available.

3 Connect the AV receiver's video output to a video input on your TV.

⚙️ **Tip**

• You usually have to connect the same kind of video cable between your DVD player and AV receiver, and between your AV receiver and TV.

❓ **FAQ**

• *My TV doesn't have any inputs to connect the DVD player. How can I watch DVDs?*

If your TV has no inputs you can't use this player with it.

• *My VCR is already connected to my TV, so there aren't any spare inputs. What should I do?*

If all your TV's inputs are already in use, you can buy a video input selector from an electronics store, which effectively gives you more inputs.

• *My TV only has one input for the sound. What should I plug it into?*

If you don't mind mono sound, you can buy a stereo RCA-to-mono RCA cable from an electronics store. Connect the stereo end to this player and the mono end to your TV.

If you want stereo sound, connect this player to your amplifier or stereo system using a stereo audio cable.

• *I connected the DVD player to my AV receiver, and although the sound is fine, there's no picture. What did I do wrong?*

Make sure that the correct video input is selected on your TV.

Also make sure that the type of video connection from the DVD player to your AV receiver is the same as that from the receiver to your TV. Most AV receivers won't convert from one kind of connection to another.

Press to display information about the disc playing (see *Displaying disc information* on page 40).

24 ZOOM
Press to change the zoom level (see *Zooming the screen* on page 40).

Chapter 4
Getting started

Switching on

After making sure that everything is connected properly and that the player is plugged in, press ⏻ **STANDBY/ON** on the front panel, or on the remote control to switch the player on.

Also, switch on your TV and make sure that it is set to the input you connected the DVD player to.

⏻ **STANDBY/ON**
🔖 **FAQ**

• *My DVD player switches on but there is nothing displayed on my TV.*

Make sure that the TV is set to the correct video input (not a TV channel). For example, if you connected this player to the **VIDEO 1** inputs on your TV, switch your TV to **VIDEO 1**.

✎ **Note**

• This player features a screen saver and an auto power off function. If the player is stopped and no button is pressed for five minutes, the screen saver starts. If the disc tray is closed but no disc is playing and no control is pressed for 30 minutes, the player automatically goes into standby.

Let's Get Started

When you switch on the player for the first time, you should see a welcome screen displayed on your TV. From here you can let the player know what kind of TV you have, then either use the Setup Navigator to make more settings, or jump right in and start playing some discs.
1 After you're finished reading the welcome screen, press ENTER to move on.

Welcome to Pioneer DVD!

Thank you for purchasing this Pioneer DVD player

Before using, please take a l ttle time
to setup your DVD player
Put the batteries into the remote control

Next, press the [ENTER] button on the remote control
and start the Let s Get Started Menu

Next
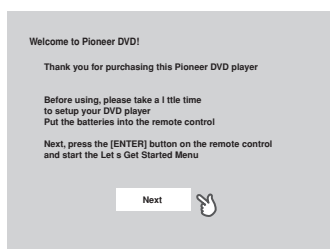

2   Use the ←/➡ (cursor left/right) buttons to select either 'Wide screen (16:9)' or 'Standard size screen (4:3)' according to the kind of TV you have, then press ENTER.

Let's Get Started Menu

What kind of TV do you have?
Use the ←/→ cursor buttons
to choose, then press [ENTER]

Wide screen (16:9)   Standard size screen (4:3)
3   Press ENTER again to finish setting up.

Let's Get Started Menu

Setup complete
If you re finished setting up,
choose [Complete],
to start aga n choose [Back]

Complete   Back
• Select **Back** then press **ENTER** if you want to go back and change the setting you just made.

Using the on-screen displays

For ease of use, this player makes extensive use of graphical on-screen displays (OSDs). You should get used to the way these work as you'll need to use them when setting up the player, using some of the playback features, such as program play, and when making more advanced settings for audio and video.

All the screens are navigated in basically the same way, using the cursor buttons (↑/↓/←/➡)to change the highlighted item and pressing **ENTER** to select it.

⚠ **Important**

• Throughout this manual, 'Select' means use the cursor buttons to highlight an item on-screen, then press **ENTER**.
Button	What it does
HOME MENU	Display/exit the on-screen display.
↑/↓/←/➡	Changes the highlighted menu item.
ENTER	Selects the highlighted menu item (both **ENTER** buttons work in exactly the same way).
RETURN	Returns to the main menu without saving changes.

✿ **Tip**

• If you're using the DV–260/DV-263 or DV-363, the buttons to navigate the on-screen displays are available on the front panel as well as the remote control. (See *Front panel* on page 18 for the location and description of all the front panel controls for your model.)

• The button guide at the bottom of every OSD screen shows you which buttons you'll need to use for that screen.

Setting up with the Setup Navigator

Using the Setup Navigator you can make a number of other initial settings for this player. We recommend using the Setup Navigator, especially if you connected this player to an AV receiver for playing surround sound. To answer some of the questions about digital audio formats you may need to look at the instructions that came with your AV receiver.

1   If a disc is playing, press ■ (stop).
Also turn on your TV and make sure that it is set to the correct video input.

2   Press HOME MENU.
The on-screen display (OSD) appears.

```
        ⊙ HOME MENU
            DVD

  🔲 Audio Settings      🔲 Video Adjust

  🔲 Play Mode           🔲 Disc Navigator

  ◯ Initial Settings     ◯ Setup Navigator
```
3   Select 'Setup Navigator'.

```
        ⊙ HOME MENU
            DVD

  🔲 Audio Settings      🔲 Video Adjust

  🔲 Play Mode           🔲 Disc Navigator

  ◯ Initial Settings     ◯ Setup Navigator
```
4   Select a DVD language.
Some DVD discs feature on-screen menus, soundtracks and subtitles in several languages. Set your preferred language here.

```
  ◯ Setup Navigator

  Language Settings   DVD Language   English
  Audio Out Settings                 French
  AV Receiver Func.                  German
                                     Italian
                                     Spanish
                                     Other Language
```
- Note that the language you choose here may not be available on all discs.

- If you want to select a language other than those listed, select **Other Language**. See Selecting languages using the language code list on **page 62** for detailed information.

5   Did you connect this player to an amplifier or AV receiver?
Select **Connected** or **Not Connected**.
```
  ◯ Setup Navigator

  Language Settings    AV Receiver    Connected
  Audio Out Settings                  Not Connected
  AV Receiver Func.
```

- If you selected **Not Connected** here, that completes setup using the Setup Navigator. Press **ENTER** to exit.

6 Did you connect this player to an AV receiver using a digital output?
Select **Connected** or **Not Connected**.
Setup Navigator

Language Settings	AV Receiver	Connected
Audio Out Settings	Digital Audio Out	Not Connected
AV Receiver Func.		

• If you selected **Not Connected** here, that completes setup using the Setup Navigator. Press **ENTER** to exit.

7 Is your AV receiver Dolby Digital compatible?
Select **Compatible**, **Not Compatible** or **Don't Know**.

Setup Navigator

Language Settings	Dolby Digital	Compatible
Audio Out Settings		Not Compatible

Language Settings	Dolby Digital	Compatible
Audio Out Settings	DTS	Not Compatible
AV Receiver Func.	MPEG	Don't Know
10 Is your AV receiver compatible with 96kHz Linear PCM audio?
Select **Compatible**, **Not Compatible** or **Don't Know**.

Setup Navigator

Language Settings	Dolby Digital	Compatible
Audio Out Settings	DTS	Not Compatible
AV Receiver Func.	MPEG	Don't Know
	96kHz Linear PCM	
11 Press ENTER to complete the setup, or press HOME MENU to quit the Setup Navigator without making any changes.

Setup Navigator

Language Settings	Dolby Digital	Compatible
Audio Out Settings	DTS	e
AV Receiver Func.	MPEG	Settings complete
	96kHz Li	Press ENTER to exit
		ENTER
Congratulations, setup is complete!

Playing discs

The basic playback controls for playing DVD, CD, Video CD and WMA/MP3 discs are covered here. Further functions are detailed in the next chapter.
1 If the player isn't already on, press ⏻ STANDBY/ON to switch it on.
If you're playing a DVD or Video CD, also turn on your TV and make sure that it is set to the correct video input.

2 Press ⏏ OPEN/CLOSE to open the disc tray.

3 Load a disc.
Load a disc with the label side facing up, using the disc tray guide to align the disc (if you're loading a double-sided DVD disc, load it with the side you want to play face down).
4 Press ► (play) to start playback.
If you're playing a DVD or Video CD, a menu may appear. See *DVD-Video disc menus* on page 30 and *Video CD PBC menus* on page 30 for more on how to navigate these.

If you're playing an WMA/MP3 disc, it may take a few seconds before playback starts, depending on the complexity of the file structure on the disc.

If you loaded a CD/CD-R/RW containing JPEGs, a slideshow will start. See *Viewing JPEG discs* on page 42 for more on playing these discs.

• See also *PhotoViewer* on page 56 if the disc contains both WMA/MP3 audio files and JPEG picture files (by default, you will not be able to play the WMA/MP3 files).

FAQ

• *After I load a DVD disc, it ejects automati-
cally after a few seconds!*

Most likely, the disc is the wrong region
for your player. The region number should
be printed on the disc; check it against
the region number of the player (which
you can find on the rear panel). See also
DVD-Video regions on page 60.

If the region number is OK, it may be that
the disc is damaged or dirty. Clean the
disc and look for signs of damage. See
also *Taking care of your player and discs* on
page 57.

• *Why won't the disc I loaded play?*

First check that you loaded the disc the
right way up (label side up), and that it's
clean and not damaged. See *Taking care
of your player and discs* on page 57 for
information on cleaning discs.

If a disc loaded correctly won't play, it's
probably an incompatible format or disc
type, such as DVD-Audio or DVD-ROM.
See *Disc / content format playback
compatibility* on page 10 for more on disc
compatibility.

• *I have a widescreen TV so why are there
black bars at the top and bottom of the
screen when I play some discs?*

Some movie formats are such that even
when played on a widescreen TV, black
bars are necessary at the top and bottom
of the screen. This is not a malfunction.

• *I have a standard (4:3) TV and set the player
to show widescreen DVDs in pan & scan
format, so why do I still get black bars top
and bottom with some discs?*

Some discs override the display prefer-
ences of the player, so even if you have **4:3
(Pan & Scan)** selected, those discs will
still be shown in letter box format. This is
not a malfunction.

• *My AV receiver is definitely compatible with
96kHz Linear PCM audio, but it doesn't
seem to work with this player. What's
wrong?*

For digital copy-protection purposes,
some 96kHz DVD discs are automatically
downsampled to 48kHz. This is not a
malfunction. With these kinds of discs, if
you want to enjoy high-quality analog
audio, set **Digital Out** to **Off** (see *Digital
Out* on page 48), and **96kHz PCM Out** to
96kHz (see *96kHz PCM Out* on page 49).

Basic playback controls

The table below shows the basic controls on
the remote for playing discs. The following
chapter covers more playback features in
more detail.

Button	What it does
►	Starts playback. DVD and Video CD: If the display shows **RESUME** or **LAST MEM** playback starts from the resume or last memory point (see also *Resume and Last Memory* below.)
❚❚	Pauses a disc that's playing, or restarts a paused disc.

Button	What it does
■	Stops playback. DVD and Video CD: Display shows **RESUME**. Press ■ (stop) again to cancel the resume function. (See also *Resume and Last Memory* below.)
◄◄	Press to start fast reverse scanning. Press ► (play) to resume normal playback.
►►	Press to start fast forward scanning. Press ► (play) to resume normal playback.
I◄◄	Skips to the start of the current track or chapter, then to previous tracks/chapters.
►►I	Skips to the next track or chapter.
Numbers	Use to enter a title/track number. Press **ENTER** to select (or wait a few seconds). • If the disc is stopped, playback starts from the selected title (for DVD) or track number (for CD/Video CD/WMA/MP3). • If the disc is playing, playback jumps to the start of the selected chapter or track.

Front panel controls

The ► (play), ■ (stop), and II (pause) buttons on the front panel work in exactly the same way as their remote control equivalents.

The combined scan/skip buttons on the front panel (I◄◄ ◄◄ and ►► ►►I) work slightly differently from the remote buttons. Press and hold for fast scan; press for track/chapter skip.

See *Front panel* on page 18 for the location and description of all the front panel controls for your model.

Important

• You may find with some DVD discs that some playback controls don't work in certain parts of the disc. This is not a malfunction.

• Track skip and number buttons for track selection do not work with unfinalized CD-R/RW discs.

Resume and Last Memory

When you stop playback of a DVD or Video CD disc, **RESUME** is shown in the display indicating that you can resume playback again from that point.

If the disc tray is not opened, the next time you start playback the display shows **RESUME** and playback resumes from the resume point.

For DVD discs only: If you take the disc out of the player, the play position is stored in memory. When you load the disc next time, the display shows **LAST MEM** and you can resume playback (this works for up to five discs).

If you want to clear the resume/last memory point, press ■ (stop) while **RESUME** or **LAST MEM** is displayed.

Note

• When a Video CD is loaded, the Resume point is lost if the player is switched off.

• For the Last Memory function to work, you must press ■ (stop) to stop playback before opening the disc tray.

• The Last Memory function doesn't work with VR format DVD-RW discs.

DVD-Video disc menus

Many DVD-Video discs contain menus from which you can select what you want to watch. They may give access to additional features, such as subtitle and audio language selection, or special features such as slideshows. See the disc packaging for details.

Sometimes DVD-Video menus are displayed automatically when you start playback; others only appear when you press **MENU** or **TOP MENU**.
Button	What it does
TOP MENU	Displays the 'top menu' of a DVD disc—this varies with the disc.
MENU	Displays a DVD disc menu—this varies with the disc and may be the same as the 'top menu'.
↑/↓/←/→	Moves the cursor around the screen.
ENTER	Selects the current menu option.
RETURN	Returns to the previously displayed menu screen.
Numbers	Highlights a numbered menu option (some discs only). Press **ENTER** to select.

 Tip

• If you're using the DV–260/263 or DV–363, most of the buttons to navigate DVD disc menus are available on the front panel as well as the remote control. (See *Front panel* on page 18 for the location and description of all the front panel controls for your model.)

Video CD PBC menus

Some Video CDs have menus from which you can choose what you want to watch. These are called PBC (Playback control) menus.

You can play a PBC Video CD without having to navigate the PBC menu by starting playback using a number button to select a track, rather than the ► (play) button.
Button	What it does
RETURN	Displays the PBC menu.
Numbers	Use to enter a numbered menu option. Press **ENTER** to select.
◄◄	Displays the previous menu page (if there is one).
►►I	Displays the next menu page (if there is one).

Chapter 5
Playing discs

Introduction

Most of the features described in this chapter make use of on-screen displays. For an explanation of how to navigate these, see *Using the on-screen displays* on page 24.

Many of the functions covered in this chapter apply to DVD discs, Video CDs, CDs and WMA/MP3/JPEG discs, although the exact operation of some varies slightly with the kind of disc loaded.

Some DVD discs restrict the use of some functions (random or repeat, for example). This is not a malfunction.

When playing Video CDs, some of the functions are not available during PBC playback. If you want to use them, start the disc playing using a number button to select a track.

Using the Disc Navigator to browse the contents of a disc

Use the Disc Navigator to browse through the contents of a disc to find the part you want to play. You can use the Disc Navigator when a disc is playing or stopped.

1 Press HOME MENU and select 'Disc Navigator' from the on-screen display.
Alternatively, if a VR format DVD-RW, CD, Video CD or WMA/MP3/JPEG disc is loaded, you can press **MENU**, which takes you straight to the Disc Navigator screen.
2 Select what you want to play.
Depending on the type of disc you have loaded, the Disc Navigator looks slightly different.

The screen for DVD discs shows the titles on the left and the chapters on the right. Select a title, or a chapter within a title.
For a VR (Video Recording) mode DVD-RW disc select beween the **Playlist** and **Original** areas of the disc, or a title. Press ➡ (cursor right) to preview the title.

- It's not possible to switch between **Original** and **Playlist** during playback.

• Not all VR format DVD-RW discs have a Playlist.

```
Disc Navigator

DVD-RW        Title(1-03)
Original      01. 3/31 FIRST LEAGUE          ➡
Play List     02. 4/28 SECOND LEAGUE
              03. 4/29 FINAL ROUND
```
The screen for CDs and Video CDs shows a list of tracks.

```
Disc Navigator

              Track 1-10
CD            Track 01
              Track 02
              Track 03
              Track 04
              Track 05
              Track 06
              Track 07
              Track 08            ⬇
```
The screen for an WMA/MP3 disc shows the folder names on the left and the track names on the right (note that if there are more than 16 folders or names that contain accented or non-roman characters, tracks and folders may show up with generic names – **F_033**, **T_035**, etc.).

Select a folder, or a track within a folder.

```
Disc Navigator

              Folder 1-17        Track 1-10
WMA/MP3       001. ACP           001. Gravity deluxe
              002. Nth Degree    002. Tesla's patent
              003. Pfeuti        003. Border dispute
              004. Live          004. Delayed by rain
              005. Glitch music  005. Accident incident
              006. CodHead       006. Pigeon post
              007. Thermo        007. Outernational
              008. Missing Man ⬇ 008. Vacuum tube ⬇
```
Playback starts after you press **ENTER**.

✹ Tip

• The Disc Navigator is not available unless there is a disc loaded.

• It's not possible to use the Disc Navigator when playing a Video CD in PBC mode, or an unfinalized CD-R/RW disc.

• Another way to find a particular place on a disc is to use one of the search modes. See *Searching a disc* on page 38.

Scanning discs

You can fast-scan discs forward or backward at various different speeds.

1   During playback, press ◄◄ or ►► to start scanning.

2   Press repeatedly to increase the scanning speed.

• WMA/MP3 tracks can only be scanned at one speed.

• The scanning speed is shown on-screen.

3   To resume normal playback, press ► (play).

🖉 Note

• Sound can be heard while scanning audio CDs and WMA/MP3 discs.

• When scanning a Video CD or WMA/MP3 track, playback automatically resumes at the end or beginning of the track.

• There is no sound while scanning DVDs and Video CDs, and no subtitles while scanning DVDs.

• Depending on the disc, normal playback may automatically resume when a new chapter is reached on a DVD disc.

Playing in slow motion

You can play DVDs and Video CDs at four different forward slow motion speeds. DVD discs can also be played at two reverse speeds.

1   During playback, press ❚❚ (pause).

2   Press and hold ◀❙/◀❚❚ or ❚❚▶/❙▶ until slow motion playback starts.
- The slow motion speed is shown on-screen.
- There is no sound during slow motion playback.

3   Press repeatedly to change the slow motion speed.
- The slow motion speed is displayed on-screen.

4   To resume normal playback, press ▶ (play).

📝 **Note**

- Video CD only supports forward slow motion playback.
- The picture quality during slow motion playback is not as good as during normal playback.
- Depending on the disc, normal playback may automatically resume when a new chapter is reached.

Frame advance/frame reverse
You can advance or back up a DVD disc frame-by-frame. With Video CDs and VR format DVD-RWs, you can only use frame advance.

1   During playback, press ❚❚ (pause).

2   Press ◀❙/◀❚❚ or ❚❚▶/❙▶ to reverse or advance a frame at a time.

3   To resume normal playback, press ▶ (play).

📝 **Note**

- The picture quality when using frame reverse is not as good as frame advance.
- Depending on the disc, normal playback may automatically resume when a new chapter is reached.
- When changing direction with a DVD disc, the picture may 'move' in an unexpected way. This is not a malfunction.

Looping a section of a disc
The A-B Repeat function allows you to specify two points (A and B) within a track (CD and Video CD) or title (DVD) that form a loop which is played over and over.

⚠ **Important**

- You can't use A-B Repeat with WMA/MP3 discs, Video CDs in PBC mode, or unfinalized CD-R/RW discs.

1   During playback, press PLAY MODE and select 'A-B Repeat' from the list of functions on the left.

🗂 Play Mode	
A-B Repeat	**A(Start Point)**
Repeat	B(End Point)
Random	Off
Program	
Search Mode	
2 Press ENTER on 'A(Start Point)' to set the loop start point.

```
🎵 Play Mode

A-B Repeat      A(Start Point)
Repeat          B(End Point)
Random          Off
Program
Search Mode
```
3 Press ENTER on 'B(End Point)' to set the loop end point.

```
🎵 Play Mode

A-B Repeat      A(Start Point)
Repeat          B(End Point)
Random          Off
Program
Search Mode
```
After pressing **ENTER**, playback jumps back to the start point and plays the loop.

• The minimum loop time is 2 seconds.

4 To resume normal playback, select 'Off' from the menu.

Using repeat play

There are various repeat play options, depending on the kind of disc loaded. It's also possible to use repeat play together with program play to repeat the tracks/chapters in the program list (see *Creating a program list* on page 36).

⚠ **Important**

• You can't use Repeat play with Video CDs in PBC mode, or unfinalized CD-R/RW discs.

1 During playback, press PLAY MODE and select 'Repeat' from the list of functions on the left.

```
🎵 Play Mode

A-B Repeat      Title Repeat
Repeat          Chapter Repeat
Random          Repeat Off
Program
Search Mode
```
2 Select a repeat play option.
If program play is active, select **Program Repeat** to repeat the program list, or **Repeat Off** to cancel.

For DVD discs, select **Title Repeat** or **Chapter Repeat** (or **Repeat Off**).

```
🎵 Play Mode

A-B Repeat      Title Repeat
Repeat          Chapter Repeat
Random          Repeat Off
Program
Search Mode
```
For CDs and Video CDs, select **Disc Repeat** or **Track Repeat** (or **Repeat Off**).

```
🎵 Play Mode

A-B Repeat      Disc Repeat
Repeat          Track Repeat
Random          Repeat Off
Program
Search Mode
```
For WMA/MP3 discs, select **Disc Repeat**, **Folder Repeat** or **Track Repeat** (or **Repeat Off**).

```
📋 Play Mode

A-B Repeat      Disc Repeat
Repeat          Folder Repeat
Random          Track Repeat
Program         Repeat Off
Search Mode
```
📝 Note

• You can't use repeat and random play at the same time.

• If you switch camera angle during repeat play, repeat play is canceled.

Using random play

Use the random play function to play titles or chapters (DVD-Video) or tracks (CD, Video CD and WMA/MP3 discs) in a random order.

You can set the random play option when a disc is playing or stopped.

⚠️ Important

• You can't use random play with VR format DVD-RW discs, Video CDs playing in PBC mode, or while a DVD disc menu is being displayed.

1   Press PLAY MODE and select 'Random' from the list of functions on the left.

```
📋 Play Mode

A-B Repeat      Random Title
Repeat          Random Chapter
Random          Random Off
Program
Search Mode
```
2   Select a random play option.
For DVD discs, select **Random Title** or **Random Chapter**, (or **Random Off**).

```
📋 Play Mode

A-B Repeat      Random Title
Repeat          Random Chapter
Random          Random Off
Program
Search Mode
```
For CDs and Video CDs, select **On** or **Off** to switch random play on or off.

```
📋 Play Mode

A-B Repeat      On
Repeat          Off
Random
Program
Search Mode
```
For WMA/MP3 discs, select **Random All** (all folders) or **Random Track** (current folder only), (or **Random Off**).

```
📋 Play Mode

A-B Repeat      Random All
Repeat          Random Track
Random          Random Off
Program
Search Mode
```
⚙️ Tip

• To stop the disc and cancel random playback, press ■ (stop).

• To cancel random playback without stopping playback, press **CLEAR**. The disc will play to the end, then stop.

- During random play, the ◄◄ and ►► buttons function a little differently to normal: ◄◄ returns to the beginning of the current track/chapter. You can't go back further than this. ►► selects another track/chapter at random from those remaining.
- You can't use random play together with program or repeat play.

Creating a program list

This feature lets you program the play order of titles/chapters/folders/tracks on a disc.

⚠ Important

- You can't use Program play with VR format DVD-RW discs, Video CDs playing in PBC mode, or while a DVD disc menu is being displayed.

1 Press PLAY MODE and select 'Program' from the list of functions on the left.

🖭 Play Mode	
A-B Repeat	Create/Edit
Repeat	Playback Start
Random	Playback Stop
Program	Program Delete
Search Mode	Program Memory ▷ Off

2 Select 'Create/Edit' from the list of program options.

🖭 Play Mode	
A-B Repeat	Create/Edit
Repeat	Playback Start
Random	Playback Stop
Program	Program Delete
Search Mode	Program Memory ▷ Off
The Program edit screen that appears depends on the kind of disc loaded.

On the left side is the program list, then to the right is a list of titles (if a DVD disc is loaded), tracks (for CDs and Video CDs), or folder names (for WMA/MP3 discs). On the far right is a list of chapters (for DVD) or track names (for WMA/MP3).

3 Select a title, chapter, folder or track for the current step in the program list.
For a DVD disc, you can add a whole title, or a chapter within a title to the program list.

- To add a title, select the title.

🖭 Program		
Program Step	Title 1~38	Chapter 1~4
01. 01	Title 01	Chapter 001
02.	Title 02	Chapter 002
03.	Title 03	Chapter 003
04.	Title 04	Chapter 004
05.	Title 05	
06.	Title 06	
07.	Title 07	
08.	Title 08	↓
- To add a chapter, first highlight the title, then press ➡ (cursor right) and select a chapter from the list.

🖭 Program		
Program Step	Title 1-38	Chapter 1~4
01. 01-003	Title 01	Chapter 001
02.	Title 02	Chapter 002
03.	Title 03	Chapter 003
04.	Title 04	Chapter 004
05.	Title 05	
06.	Title 06	
07.	Title 07	
08.	Title 08	↓
For a CD or Video CD, select a track to add to the program list.

🖭 Program	
Program Step	Track 1~12
01. 04	Track 01
02.	Track 02
03.	Track 03
04.	Track 04
05.	Track 05
06.	Track 06
07.	Track 07
08.	Track 08 ↓
For an WMA/MP3 disc, you can add a whole folder, or a track within a folder to the program list.

• To add a folder, select the folder.

Program		
Program Step	**Folder 1-6**	**Track 1-10**

05.	005. Glitch music	005. Accident incident
06.	006. CodHead	006. Pigeon post
07.		007. Outernational
08.		008. Vacuum tube
• To add a track, first find the folder, then press ➡ (cursor right) and select a track name from the list.

Program		
Program Step	**Folder 1-6**	**Track 1-10**
01. 001-003	001. ACP	001. Gravity deluxe
02.	002. Nth Degree	002. Tesla's patent
03.	003. Pfeuti	003. Border dispute
04.	004. Live	004. Delayed by rain
05.	005. Glitch music	005. Accident incident
06.	006. CodHead	006. Pigeon post
07.		007. Outernational
08.		008. Vacuum tube
After pressing **ENTER** to select the title/chapter/folder/track, the step number automatically moves down one.

4 Repeat step 3 to build up a program list.
A program list can contain up to 24 titles/chapters/folders/tracks.

5 To play the program list, press ▶ (play).
Program play remains active until you turn off program play (see below), erase the program list (see below), eject the disc or switch off the player.

Tip

• To save your program list and exit the program edit screen without starting playback, press **PLAY MODE** or **HOME MENU**. (Don't press **RETURN** – your program list won't be saved.)

• During program play, press ▶▶I to skip to the next program step.

• Press **CLEAR** during playback to switch off program play. Press while stopped to erase the program list.

Editing a program list
After creating a program list, you can add, delete and change steps.

1 Press PLAY MODE and select 'Program' from the list of functions on the left.

2 Select 'Create/Edit' from the list of program options.

3 To clear a step, highlight the step number and press CLEAR.

4 To insert a step in the middle of the program list, highlight the step where you want the new step to appear, then select a title/chapter/folder/track to add.
After pressing **ENTER**, the new step is inserted into the list.

5 To add a step to the end of the program list, highlight the next free step then select a title/chapter/folder/track to add.

Tip

• To save your program list and exit the program edit screen without starting playback, press **PLAY MODE** or **HOME MENU**.

• If you want to exit the program edit screen without saving the changes you made, press **RETURN**.

Other functions available from the program menu

As well as creating and editing a program list, you can start program play, cancel program play, erase the program list, and memorize a program list from the Play Mode menu.

1   Press PLAY MODE and select 'Program' from the list of functions on the left.

```
Play Mode

A-B Repeat        Create/Edit
Repeat            Playback Start
Random            Playback Stop
Program           Program Delete
Search Mode       Program Memory    ▶ Off
```
2   Select a program play function.
• **Create/Edit** – See above

• **Playback Start** – Starts playback of a saved program list

• **Playback Stop** – Turns off program play, but does not erase the program list

• **Program Delete** – Erases the program list and turns off program play

• **Program Memory** (DVD only) – Select On to save the program list for the disc loaded. (Select **Off** to cancel the program memory for the disc loaded)

✏ Note

• Program lists are saved for the DVD disc loaded. When you load a disc with a saved program list, program play is automatically turned on.

• You can save program lists for up to 24 discs. After that, the oldest one is replaced with the new one saved.

Searching a disc

You can search DVD discs by title or chapter number, or by time. CDs can be searched by track number, and Video CDs by track number or time. WMA/MP3 discs can be searched by folder or track number.

1   Press PLAY MODE and select 'Search Mode' from the list of functions on the left.

The search options that appear depend on the kind of disc loaded. The screen below shows the DVD search options.

```
Play Mode

A-B Repeat        Title Search
Repeat            Chapter Search
Random            Time Search
Program
Search Mode
```
2   Select a search mode.

3   Use the number buttons to enter a title, chapter, folder or track number, or a time.

```
Play Mode

A-B Repeat        Title Search
Repeat            Chapter Search    Input Chapter
Random            Time Search
Program                             0  0  1
Search Mode
```
• For a time search, enter the number of minutes and seconds into the currently playing title (DVD) or track (Video CD) you want playback to resume from. For example, press **4**, **5**, **0**, **0** to have playback start from 45 minutes into the disc. For 1 hour, 20 minutes and 30 seconds, press **8**, **0**, **3**, **0**.

4 Press ENTER to start playback.

Note

- The disc must be playing in order to use time search.
- Search functions are not available with Video CDs in PBC mode, or unfinalized CD-R/RW discs.

Switching subtitles

Some DVD discs have subtitles in one or more languages; the disc box will usually tell you which subtitle languages are available. You can switch subtitle language during playback.

1 Press SUBTITLE repeatedly to select a subtitle option.

	Current / Total	
Subtitle	1 / 2	English
Note

- Some discs only allow you to change subtitle language from the disc menu. Press **TOP MENU** to access.
- To set subtitle preferences, see *Subtitle Language* on page 52.

Switching DVD audio language

When playing a DVD disc recorded with dialog in two or more languages, you can switch audio language during playback.

1 Press AUDIO repeatedly to select an audio language option.

	Current /Total		
Audio	1 / 2	French	Dolby Digital 3/2.1CH

Note

- Some discs only allow you to change audio language from the disc menu. Press **TOP MENU** to access.
- To set audio language preferences, see *Audio Language* on page 51.

Switching VR format DVD-RW audio channel

When playing a VR format DVD-RW disc recorded with dual-mono audio, you can switch between the main, sub, and mixed channels during playback.

1 Press AUDIO repeatedly to select an audio channel option.

Audio	1L	Dolby Digital 1+1CH
Switching Video CD audio channel

When playing a Video CD, you can switch between stereo, just the left channel or just the right channel.

1 Press AUDIO repeatly to select an audio channel option.

Audio	Stereo

Zooming the screen

Using the zoom feature you can magnify a part of the screen by a factor of 2 or 4, while watching a DVD or Video CD.

1 During playback, use the ZOOM button to select the zoom factor.
- **Normal**
- **2x**
- **4x**

Normal

Zoom 2x

Zoom 4x
- Since DVD and Video CD have a fixed resolution, picture quality will deteriorate, especially at 4x zoom. This is not a malfunction.

2 Use the cursor buttons to change the zoomed area.
You can change the zoom factor and the zoomed area freely during playback.

- If the navigation square at the top of the screen disappears, press **ZOOM** again to display it.

Note

- We do not recommend using DVD disc menus when the screen is zoomed as menu options will not be highlighted.
- If you are displaying subtitles, these will disappear when the screen is zoomed. They will reappear when you return the screen to normal.

Switching camera angles

Some DVD discs feature scenes shot from two or more angles—check the disc box for details.

When a multi-angle scene is playing, a icon appears on screen to let you know that other angles are available (this can be switched off if you prefer—see *Angle Indicator* on page 53).

1 During playback (or when paused), press ANGLE to switch angle.

Displaying disc information

Various track, chapter and title information, as well as the video transmission rate for DVD discs, can be displayed on-screen while a disc is playing.

1 To show/switch the information displayed, press DISPLAY.
When a disc is playing, the information appears at the top of the screen. Keep pressing **DISPLAY** to change the displayed information.

• DVD displays

📝 Note

• You can see disc information (number of titles/chapters, tracks, folders and so on) from the Disc Navigator screen. See *Using the Disc Navigator to browse the contents of a disc* on page 31.

Chapter 6
Viewing JPEG discs

Viewing JPEG discs

After loading a CD/CD-R/RW containing JPEG pictures, press ► to start a slideshow from the first folder/picture on the disc. The player displays the pictures in each folder in alphabetical order.

Pictures are automatically adjusted so that they fill as much of the screen as possible (if the aspect ratio of the picture is different to your TV screen you may notice black bars at the sides, or at the top and bottom of the screen).

While the slideshow is running:

Button	What it does
❚❚	Pauses the slideshow; press again to restart.
⏮	Displays the previous picture.
⏭	Displays the next picture.
ANGLE	Pauses the slideshow and rotates the currently displayed picture 90º clockwise. Press ► (play) to restart slideshow).
ZOOM	Pauses the slideshow and zooms the screen (see below). Press ► (play) to restart slideshow).
MENU	Displays the Disc Navigator screen (see below).

📝 Note

- The ❚❚, **ANGLE** and **ZOOM** buttons do not work while the display shows **LOADING**.
- The time it takes for the player to load a file increases with large file sizes.
- Up to 999 files are viewable on a disc. If there are more files than this on a disc, only the first 999 files are viewable.

Using the JPEG Disc Navigator and Photo Browser

Use the JPEG Disc Navigator to find a particular folder or picture by filename; use the Photo Browser to find a picture within a folder by thumbnail image.

1 Press MENU to display the Disc Navigator screen.
The left column shows the folders on the disc, the right column shows the files in a folder.

2 Use the cursor buttons (↑/↓/←/→) to navigate.
When a file is highlighted, a thumbnail image is displayed.

• When a folder is highlighted you can press **ENTER** to open the Photo Browser screen for that folder. See below for more on using the Photo Browser.

3 To resume the slideshow from the highlighted file, press ENTER.

Using the Photo Browser

The Photo Browser displays nine thumbnail images at a time from the current folder.

1 From the Disc Navigator screen, highlight a folder to display then press ENTER.
The Photo Browser screen opens with the first nine pictures displayed as thumbnails.
2 Use the cursor buttons (↑/↓/←/→) to highlight a thumbnail picture.

• Use the track skip buttons (◄◄ and ►►) to see the previous / next page of thumbnails. Keep the button pressed if you want to skip several pages; release when you reach the page you want.

• To return to the Disc Navigator screen, press **RETURN**.

3 Press ENTER to display the selected thumbnail full size on screen.
The slideshow resumes from the selected picture.

Zooming the screen

Using the zoom feature you can magnify a part of the screen by a factor of 2 or 4, while viewing pictures from a JPEG disc.

1 During slideshow playback, use the ZOOM button to select the zoom factor.
• **Normal**

• **2x**

• **4x**
• The slideshow is paused when the screen is zoomed.

• Since JPEG pictures have a fixed resolution, picture quality may deteriorate, especially at 4x zoom. This is not a malfunction.

2 Use the cursor buttons (↑/↓/←/→) to change the zoomed area.
You can change the zoom factor and the zoomed area freely.

• When you change the zoom area, this becomes the new 'default' zoom area for the disc loaded.

3 To resume the slideshow, press ► (play).

Chapter 7
Audio Settings menu

Audio DRC

• Default setting: **Off**

When watching Dolby Digital DVDs at low volume, it's easy to lose the quieter sounds completely—including some of the dialog. Switching Audio DRC (Dynamic Range Control) to On can help by bringing up the quieter sounds, while controlling loud peaks.

How much of a difference you hear depends on the material you're listening to. If the material doesn't have wide variations in volume, you may not notice much change.

1   Press HOME MENU and select 'Audio Settings' from the on-screen display.

```
          ⊘ HOME MENU
                DVD

  📄 Audio Settings      📄 Video Adjust

  📄 Play Mode           📄 Disc Navigator

  ⬡ Initial Settings    📄 Setup Navigator
```
2   Highlight Audio DRC, then use the ⬅/➡ (cursor left/right) buttons to change to 'On' or 'Off', as required.

```
  📄  Audio Settings

     Audio DRC        ⬅        Off        ➡
     Virtual Surround           Off
```

3   Press ENTER to make the setting and exit the Audio Settings screen.

📝 **Note**

• Audio DRC is only effective with Dolby Digital audio sources.

• Audio DRC is only effective through the digital output when **Digital Out** (see page 48) is set to **On**, and **Dolby Digital Out** (see page 48) is set to **Dolby Digital > PCM**.

• The effect of Audio DRC depends on your speakers and AV receiver settings.

Virtual Surround

• Default setting: **Off**

Switch on Virtual Surround to enjoy surround sound effects from just two speakers.

When you play a Dolby Digital soundtrack, Virtual Dolby Digital, which uses TruSurround technology from SRS, produces a deep, realistic 3D soundspace from a pair of stereo speakers.

SRS ⦿
TruSurround

1 Press HOME MENU and select 'Audio Settings' from the on-screen display.

```
                ⊙ HOME MENU
                     DVD

    🔊 Audio Settings    📋 Video Adjust

    📖 Play Mode         ✐ Disc Navigator

    ◯ Initial Settings   ⬚ Setup Navigator
```
2 Highlight Virtual Surround, then use the ⬅/➡ (cursor left/right) buttons to change to 'ᴰᴰV/SRS TruSurround' or 'Off', as required.

```
    🔊  Audio Settings

    Audio DRC              Off
    Virtual Surround   ◀   Off   ▶
```

3 Press ENTER to make the setting and exit the Audio Settings screen.

💠 **Tip**

• You can also use the **SURROUND** button on the remote control to switch Virtual Surround on (ᴰᴰV/SRS TruSurround)/ **Off**.

📝 **Note**

• Virtual Surround doesn't work with DTS or 96kHz linear PCM audio, or during WMA/ MP3 playback, through either the analog or digital outputs.

• If the player is outputting Dolby Digital or MPEG bitstream audio (in other words, no conversion to PCM), Virtual Surround has no effect on the audio from the digital output. See *Digital Audio Out settings* on page 48 for how to set up the digital output formats.

• How good the surround effect is varies with the disc.

Chapter 8
Video Adjust menu

Video Adjust

 • Default setting: **Standard**

From the Video Adjust screen you can select the standard video presentation or define presets of your own.

1 Press HOME MENU and select 'Video Adjust' from the on-screen display.
2 Use the ←/→ (cursor left/right) buttons to select a preset.

 • **Standard** – Normal
 • **Memory1–2** – Use for saving your own presets (see below)

3 Press ENTER to make the setting and exit the Video Adjust screen.

✎ Note

 • Depending on the disc and the TV/ monitor, you may not see the effect clearly.

Creating your own presets

You can create up to three presets of your own.

1 Select one of the Memory presets (see above).

2 Press ↓ (cursor down) to select 'Detailed Settings' then press ENTER.
3 Adjust the picture quality settings.
 • Use the ↑/↓ (cursor up/down) buttons to select a setting.
 • Use the ←/→ (cursor left/right) buttons to adjust the current setting.
 • Press **DISPLAY** to switch between full and single view.
 • You can change the preset number from the **Recall Settings** menu item.

You can adjust any or all of the following picture quality settings:

- **Contrast** – Adjusts the contrast between light and dark.
- **Brightness** – Adjusts the overall brightness.
- **Chroma Level** – Adjusts how saturated colors appear.

4 Press ENTER to save the preset and exit the Video Adjust screen.

Chapter 9
Initial Settings menu

Using the Initial Settings menu

The Initial Settings menu gives you complete control in setting up your DVD player, including audio, and video output settings, audience limitation settings, among others.

If an option is grayed out it means that it cannot be changed at the current time. This is usually because a disc is playing. Stop the disc, then change the setting.

1   Press HOME MENU and select 'Initial Settings' from the on-screen display.
2   Select the setup category from the list on the left, then select an item from the menu list to the right.

3   Make the setting you want.

✐ Note

• The language options shown in the on-screen display illustrations on the following pages may not correspond to those available in your country or region.

Digital Audio Out settings

Digital Out

You only need to make this setting if you connected this player to an AV receiver (or other component) using one of the digital outputs.

• Default setting: **On**
If at any time you need to switch off the digital audio output, set this to **Off**, otherwise leave it **On**.

Note that you can't switch on/off the optical and coaxial outputs individually.

Dolby Digital Out

You only need to make this setting if you connected this player to an AV receiver (or other component) using one of the digital outputs.

• Default setting: **Dolby Digital**
If your AV receiver (or other connected
component) is Dolby Digital compatible, set
to **Dolby Digital**, otherwise set to **Dolby
Digital > PCM**.

DTS Out

*You only need to make this setting if you
connected this player to an AV receiver (or other
component) using one of the digital outputs.*

• Default setting: **DTS**

Initial Settings		
Digital Audio Out	Digital Out	■ DTS
Video Output	Dolby Digital Out	Off
Language	DTS Out	
Display	96 kHz PCM Out	
Options	MPEG Out	
If your AV receiver (or other connected
component) has a built-in DTS decoder, set
this to **DTS**, otherwise set to **Off**. Check the
manual that came with the other component
if you're unsure whether it is DTS compatible.

Note

• If you set to **DTS** with a non-DTS compat-
ible amplifier, noise will be output when
you play a DTS disc.

96kHz PCM Out

*You only need to make this setting if you
connected this player to an AV receiver (or other
component) using one of the digital outputs.*

• Default setting: **96kHz > 48kHz**

Initial Settings		
Digital Audio Out	Digital Out	■ 96 kHz > 48kHz
Video Output	Dolby Digital Out	96 kHz
Language	DTS Out	
Display	96 kHz PCM Out	
Options	MPEG Out	
If your AV receiver (or other connected
component) is compatible with high
sampling rates (96 kHz), set this to **96kHz**,
otherwise set it to **96kHz > 48kHz** (96 kHz
audio is converted to a more compatible 48
kHz). Check the manual that came with the
other component if you're unsure whether it
is 96 kHz compatible.

MPEG Out

*You only need to make this setting if you
connected this player to an AV receiver (or other
component) using one of the digital outputs.*

• Default setting: **MPEG > PCM**

Initial Settings		
Digital Audio Out	Digital Out	MPEG
Video Output	Dolby Digital Out	■ MPEG > PCM
Language	DTS Out	
Display	96 kHz PCM Out	
Options	MPEG Out	
If your AV receiver (or other connected
component) is compatible with MPEG audio,
set this to **MPEG**, otherwise set it to **MPEG >
PCM** (MPEG audio is converted to more
compatible PCM audio). Check the manual
that came with the other component if you're
unsure whether it is MPEG audio compatible.

Video Output settings

TV Screen
• Default setting: **4:3 (Letter Box)**
If you have a widescreen TV, select the **16:9 (Wide)** setting—widescreen DVD software is then shown using the full screen area. When playing software recorded in conventional (4:3) format, the settings on your TV will determine how the material is presented—see the manual that came with your TV for details on what options are available.

If you have a conventional TV, select either **4:3 (Letter Box)** or **4:3 (Pan & Scan)**. In Letter Box mode, widescreen software is shown with black bars at the top and bottom of the screen. Pan & Scan chops the sides off widescreen material to make it fit the 4:3 screen (so even though the image looks larger on the screen, you're actually seeing less of the picture). See also *Screen sizes and disc formats* on page 59.

Component Out
You only need to make this setting if you connected this player to a progressive scan compatible TV using the component video outputs.

• Default setting: **Interlace**
If you have a progressive-scan compatible TV, set this to **Progressive** for flicker-free video output. If your TV is not compatible with progressive-scan video, set to **Interlace**. Check the operating instructions that came with your TV if you're unsure about its compatibility.

• When setting to **Progressive**, you have to press **ENTER** once more to confirm. See also below for important information on progressive scan video.

About progressive scan video
Compared to interlace video, progressive scan video effectively doubles the scanning rate of the picture, resulting in a very stable, flicker-free image. Progressive scan video is available only from the component video output.

![Important]

• When **Component Out** (see above) is set to **Progressive**, there is no video output from the **VIDEO OUT** (composite) and **S** (S-video) jacks. If you want to display video on more than one monitor simultaneously, make sure that it is set to **Interlace**.

• If you connect a TV that is not compatible with a progressive scan signal and switch the player to progressive, you will not be able to see any picture at all. In this case, switch everything off and reconnect using

the supplied video cable (see *Easy connections* on page 14), then switch back to **Interlace**. Switch the player to standby then, using the front panel controls, press ⏻ **STANDBY/ON** while pressing ◄◄◄ ◄◄ to switch the player back to **Interlace**.

⏻ **STANDBY/ON**

DV-263

◄◄◄ ◄◄
Compatibility of this unit with progressive-scan TVs.

This player is compatible with progressive video Macro Vision System Copy Guard.

CONSUMERS SHOULD NOTE THAT NOT ALL HIGH DEFINITION TELEVISION SETS ARE FULLY COMPAT-IBLE WITH THIS PRODUCT AND MAY CAUSE ARTI-FACTS TO BE DISPLAYED IN THE PICTURE. IN CASE OF 525 PROGRESSIVE SCAN PICTURE PROBLEMS, IT IS RECOMMENDED THAT THE USER SWITCH THE CONNECTION TO THE "STANDARD DEFINITION" OUTPUT. IF THERE ARE QUESTIONS REGARDING OUR TV SET COMPATIBILITY WITH THIS MODEL 525p DVD PLAYER, PLEASE CONTACT OUR CUSTOMER SERVICE CENTER.

This player is compatible with the following Pioneer displays and monitors: PDP-5030HD, PRO-1000HD, PRO-800HD, PDP-4330HD, PRO-720HD, PRO-620HD, PRO-520HD, SD-643HDS, SD-533HDS, PDP-503HDG, PDP-433HDG.

S-Video Out

You only need to make this setting if you connected this player to your TV using an S-video cable.

• Default setting: **S2**
If you find that the picture is stretched or distorted on the default **S2** setting, try changing it to **S1**.

Language settings

Audio Language

• Default setting: **English**
This setting is your preferred audio language for DVD discs. If the language you specify here is recorded on a disc, the player auto-matically plays the disc in that language.

The DVD format recognizes 136 different languages. Select **Other Language** if you want to specify a language other than those listed. See also *Selecting languages using the language code list* on page 61.

⚙ **Tip**

• You can switch between the languages recorded on a DVD disc during playback using the **AUDIO** button. (This does not affect this setting.) See *Switching DVD audio language* on page 39.

- Some DVD discs set the audio language automatically when loaded, overriding the **Audio Language** setting.
- Discs with two or more audio languages usually allow you to select the audio language from the disc menu. Press **MENU** to access the disc menu.

Subtitle Language
- Default setting: **English**

Initial Settings		
Digital Audio Out	Audio Language	■ English
Video Output	Subtitle Language	French
Language	DVD Menu Lang.	German
Display	Subtitle Display	Italian
Options		Spanish
		Other Language
This setting is your preferred subtitle language for DVD discs. If the language you specify here is recorded on a disc, the player automatically plays the disc with those subtitles.

The DVD format recognizes 136 different languages. Select **Other Language** if you want to specify a language other than those listed. See also *Selecting languages using the language code list* on page 61.

Tip

- You can change or switch off the subtitles on a DVD disc during playback using the **SUBTITLE** button. (This does not affect this setting.) See *Switching subtitles* on page 39.
- Some DVD discs set the subtitle language automatically when loaded, overriding the **Subtitle Language** setting.

- Discs with two or more subtitle languages usually allow you to select the subtitle language from the disc menu. Press **MENU** to access the disc menu.

DVD Menu Language
- Default setting: **w/Subtitle Lang.**

Options

Parental Lock
• Default level: **Off**
• Default password: *none*
• Default Country code: **us (2119)**

Some DVD-Video discs feature a Parental Lock level. If your player is set to a lower level than the disc, the disc won't play. This gives you some control about what your children watch on your DVD player.

Some discs also support the Country code feature. The player does not play certain scenes on these discs, depending on the Country code you set.

Before you can set the Parental Lock level or the Country code you must register a password. As the password owner, you can change the Parental Lock level or Country code whenever you like. You can also change the password.

✎ Note

• Not all discs that you may consider inappropriate for your children use the Parental Lock feature. These discs will always play without requiring the password first.

• If you forget your password, you'll need to reset the player to its factory settings (see *Resetting the player* on page 60), then register a new password.

Registering a new password
You must register a password before you can change the Parental Lock level or enter a Country code.

1 Select 'Password'.

Initial Settings

Digital Audio Out	Parental Lock	Password
Video Output	PhotoViewer	Level Change
Language		Country Code
Display		
Options		
2 Use the number buttons to enter a 4-digit password.

Initial Settings

Digital Audio Out
Video Output   Parental Lock: Register Code Number
Language
Display   * * * *
Options
The numbers you enter show up as asterisks (*) on-screen.

3 Press ENTER to register the password and return to the Options menu screen.
If you forget your password, you can reset the player then register a new one. See *Resetting the player* on page 60 for how to reset the player.

Changing your password

To change your password, confirm your existing password then enter a new one.

1 Select 'Password Change'.

Initial Settings

Digital Audio Out	Parental Lock	Password Change
Video Output	PhotoViewer	Level Change
Language		Country Code
Display		
Options		
2 Use the number buttons to enter your existing password, then press ENTER.
The numbers appear as asterisks as you enter them.

Initial Settings

Digital Audio Out
Video Output   Parental Lock: Password Change
Language
Display   Password   * * * *
Options
                        New Password _ _ _ _

3 Enter a new password.

Initial Settings
Digital Audio Out
Video Output   Parental Lock: Password Change
Language
Display   Password   * * * *
Options
                        New Password * * * *
4 Press ENTER to register the new password and return to the Options menu screen.

Setting/changing the Parental Lock level

1 Select 'Level Change'.
Initial Settings

Digital Audio Out	Parental Lock	Password Change
Video Output	PhotoViewer	Level Change
Language		Country Code
Display		
Options		

2 Use number buttons to enter your password, then press ENTER.

Initial Settings

Digital Audio Out	Parental Lock : Level Change
Video Output	Password [*][*][*][*]
Language	
Display	
Options	1 2 3 4 5 6 7 8 off

3 Select a new level.

Initial Settings

Digital Audio Out	Parental Lock : Level Change
Video Output	Password [*][*][*][*]
Language	
Display	
Options	1 2 3 4 [5] 6 7 8 off
Press ◄ (cursor left) repeatedly to lock more levels (more discs will require the password); press ► (cursor right) to unlock levels. You can't lock level 1.

4 Press ENTER to set the new level and return to the Options menu screen.

Setting/changing the Country code

You may also want to refer to the *Country code list* on page 62.

1 Select 'Country Code'.

Initial Settings

Digital Audio Out	Parental Lock	Password Change
Video Output	PhotoViewer	Level Change
Language		Country Code
Display		
Options		

2 Use number buttons to enter your password, then press ENTER.

Initial Settings

Digital Audio Out	Parental Lock: Country Code
Video Output	Password [*][*][*][*]
Language	
Display	Country Code List Code
Options	us [2][1][1][9]
3 Select a Country code.
There are two ways you can do this.

• Select by code letter: Use ↑/↓ (cursor up/down) to change the Country code.

Initial Settings

Digital Audio Out	Parental Lock: Country Code
Video Output	Password [*][*][*][*]
Language	
Display	Country Code List Code
Options	us [2][1][1][9]
• Select by code number: Press ► (cursor right) then use the number buttons to enter the 4-digit Country code (you can find the *Country code list* on page 62.)

Initial Settings

Digital Audio Out	Parental Lock: Country Code
Video Output	Password [*][*][*][*]
Language	
Display	Country Code List Code
Options	us [2][1][1][9]
4 Press ENTER to set the new Country code and return to the Options menu screen.

📝 **Note**

• Changing the Country code does not take effect until the next disc is loaded (or the current disc is reloaded).

PhotoViewer

• Default setting: **On**

Initial Settings		
Digital Audio Out	Parental Lock	■ On
Video Output	PhotoViewer	Off
Language		
Display		
Options		
This setting is important if you load a disc that contains both WMA/MP3 audio files and JPEG picture files.

The default **On** setting allows you to view only the JPEG files on this kind of disc. Set to **Off** to be able to play the WMA/MP3 audio files.

Note

• Changing the PhotoViewer setting does not take effect until the next disc is loaded (or the current disc is reloaded).

Chapter 10
Additional information

Taking care of your player and discs

Handling discs

When holding discs of any type, take care not to leave fingerprints, dirt or scratches on the disc surface. Hold the disc by its edge or by the center hole and edge.

Damaged or dirty discs can affect playback performance. Take care also not to scratch the label side of the disc. Although not as fragile as the recorded side, scratches can still result in a disc becoming unusable.

Should a disc become marked with fingerprints, dust, etc., clean using a soft, dry cloth, wiping the disc lightly from the center to the outside edge as shown in the diagram below.
Wipe lightly from the center of the disc using straight strokes.

Don't wipe the disc surface using circular strokes.

If necessary, use a cloth soaked in alcohol, or a commercially available CD/DVD cleaning kit to clean a disc more thoroughly. Never use benzine, thinner or other cleaning agents, including products designed for cleaning vinyl records.

Storing discs

Although CDs and DVD discs are more durable than vinyl records, you should still take care to handle and store discs correctly. When you're not using a disc, return it to its case and store upright. Avoid leaving discs in excessively cold, humid, or hot environments (including under direct sunlight).

Don't glue paper or put stickers onto the disc, or use a pencil, ball-point pen or other sharp-tipped writing instrument. These could all damage the disc.

For more detailed care information see the instructions that come with discs.

Do not load more than one disc into the player at a time.

Discs to avoid

Discs spin at high speed inside the player. If you can see that a disc is cracked, chipped, warped, or otherwise damaged, don't risk using it in your player—you could end up damaging it.
This player is designed for use with conventional, fully circular discs only. Use of shaped discs is not recommended for this product. Pioneer disclaims all liability arising in connection with the use of shaped discs.

Cleaning the unit's exterior

* Use a polishing cloth or dry cloth to wipe off dust and dirt. If the surfaces are very dirty, wipe with a soft cloth dipped in some neutral cleanser diluted five or six times with water and wrung out well, then wipe again with a dry cloth.

* Do not use furniture wax or cleaners. Never use thinners, benzine or insecticide sprays or other chemicals on or near this unit since they will corrode the surfaces.

* If you use a chemical-impregnated cleaning cloth, read the instructions carefully before use. These cloths may leave smear marks on half-mirror finish surfaces; if this happens, finish with a dry cloth.

* Unplug the unit when cleaning.

Cleaning the pickup lens

The DVD player's lens should not become dirty in normal use, but if for some reason it should malfunction due to dust or dirt, consult your nearest Pioneer-authorized service center. Although lens cleaners for CD players are commercially available, we do not recommend using them since some may damage the lens.

Problems with condensation

Condensation may form inside the player if it is brought into a warm room from outside, or if the temperature of the room rises quickly. Although the condensation won't damage the player, it may temporarily impair its performance. For this reason you should leave it to adjust to the warmer temperature for about an hour before switching on and using.

Hints on installation

We want you to enjoy using this product for years to come, so please bear in mind the following points when choosing a suitable location for it:

Do...
* Use in a well-ventilated room.
* Place on a solid, flat, level surface, such as a table, shelf or stereo rack.

Don't...
* Use in a place exposed to high temperatures or humidity, including near radiators and other heat-generating appliances.
* Place on a window sill or other place where the player will be exposed to direct sunlight.
* Use in an excessively dusty or damp environment.

- Place directly on top of an amplifier, or other component in your stereo system that becomes hot in use.
- Use near a television or monitor as you may experience interference—especially if the television uses an indoor antenna.
- Use in a kitchen or other room where the player may be exposed to smoke or steam.
- Use on a thick rug or carpet, or cover with cloth—this may prevent proper cooling of the unit.
- Place on an unstable surface, or one that is not large enough to support all four of the unit's feet.

Moving the player

If you need to move the player, first press ⏻ **STANDBY/ON** on the front panel to turn the player off. Wait for **-OFF-** to disappear from the display, then unplug the power cable. Never lift or move the unit during play-back—discs rotate at a high speed and may be damaged.

Power cable caution

Handle the power cable by the plug part. Do not pull out the plug by tugging the cable, and never touch the power cable when your hands are wet, as this could cause a short circuit or electric shock. Do not place the unit, a piece of furniture, or other object on the power cable or pinch the cable in any other way. Never make a knot in the cable or tie it with other cables. The power cables should be routed so that they are not likely to be stepped on. A damaged power cable can cause a fire or give you an electric shock. Check the power cable once in a while. If you find it damaged, ask your nearest Pioneer authorized service center or your dealer for a replacement.

Screen sizes and disc formats

DVD-Video discs come in several different screen aspect ratios, ranging from TV programs, which are generally 4:3, to Cinema-Scope widescreen movies, with an aspect ratio of up to about 7:3.

Televisions, too, come in different aspect ratios; 'standard' 4:3 and widescreen 16:9.

Widescreen TV users

If you have a widescreen TV, the **TV Screen** setting (page 50) of this player should be set to **16:9 (Wide)**.

When you watch discs recorded in 4:3 format, you can use the TV controls to select how the picture is presented. Your TV may offer various zoom and stretch options; see the instructions that came with your TV for details.

Please note that some movie aspect ratios are wider than 16:9, so even though you have a widescreen TV, these discs will still play in a 'letter box' style with black bars at the top and bottom of the screen.

Standard TV users

If you have a standard TV, the **TV Screen** setting (page 50) of this player should be set to **4:3 (Letter Box)** or **4:3 (Pan&Scan)**, depending on which you prefer.

Set to **4:3 (Letter Box)**, widescreen discs are shown with black bars top and bottom.

Set to **4:3 (Pan&Scan)**, widescreen discs are shown with the left and right sides cropped. Although the picture looks larger, you don't actually see the whole picture.

Please note that many widescreen discs override the player's settings so that the disc is shown in letter box format regardless of the setting.

📝 Note

• Using the **16:9 (Wide)** setting with a standard 4:3 TV, or either of the **4:3** settings with a widescreen TV, will result in a distorted picture.

Resetting the player

Use this procedure to reset all the player's settings to the factory default.

1   Switch the player into standby.

2   Using the front panel buttons, hold down the ■ (stop) button and press ⏻ STANDBY/ON to switch the player back on.
All the player's settings are now reset, and you should see the 'Let's Get Started' screen.

Titles, chapters and tracks

DVD discs are generally divided into one or more titles. Titles may be further subdivided into chapters.

Title 1   Title 2   Title 3

Chapter 1   Chapter 2   Chapter 3   Chapter 1   Chapter 1   Chapter 2
CDs and Video CDs are divided into tracks.

Track 1   Track 2   Track 3   Track 4   Track 5   Track 6

CD-ROMs contain folders and files. MP3 and WMA files are referred to as tracks. Folders may contain further folders.

Folder A   Folder B   Folder C

Track 1   Track 2   Track 3   Track 1   File 1   File 2
DVD-Video regions

All DVD-Video discs carry a region mark on the case somewhere that indicates which region(s) of the world the disc is compatible with. Your DVD player also has a region mark, which you can find on the rear panel. Discs from incompatible regions will not play in this player. Discs marked **ALL** will play in any player.

The diagram below shows the various DVD regions of the world.
Selecting languages using the language code list

Some of the language options (such as 'DVD Language' in the Setup Navigator) allow you to set your prefered language from any of the 136 languages listed in the language code list on page 62.

1 Select 'Other Language'.

2 Use the ←/→ (cursor left/right) buttons to select either a code letter or a code number.

3 Use the ↑/↓ (cursor up/down) buttons to select a code letter or a code number.
See *Language code list* on page 62 for a complete list of languages and codes.

Glossary

Analog audio

An electrical signal that directly represents sound. Compare this to digital audio which can be an electrical signal, but is an indirect representation of sound. See also *Digital audio*.

Aspect ratio

The width of a TV screen relative to its height. Conventional TVs are 4:3 (in other words, the screen is almost square); widescreen models are 16:9 (the screen is almost twice as wide as it is high).

Digital audio

An indirect representation of sound by numbers. During recording, the sound is measured at discrete intervals (44,100 times a second for CD audio) by an analog-to-digital converter, generating a stream of numbers. On playback, a digital-to-analog converter generates an analog signal based on these numbers. See also *Sampling frequency* and *Analog audio*.

Dolby Digital

Using a maximum of 5.1 channels of audio, this high quality surround system is used in many of the finer movie theaters around the world.

The on-screen display shows which channels are active, for example showing 3/2.1. The 3 being the two front channels and the center channel; the 2 being the surround channels, and the .1 being the LFE channel.

DRM

DRM (digital rights management) is a type of server software developed to enable secure distribution of paid content over the web, recently incorporated by WMA (Windows Media Audio).

DTS

DTS stands for Digital Theater Systems. DTS is a surround system different from Dolby Digital that has become a popular surround sound format for movies.

Dynamic range

The difference between the quietest and loudest sounds possible in an audio signal (without distorting or getting lost in noise). Dolby Digital and DTS soundtracks are capable of a very wide dynamic range, delivering dramatic cinema-like effects.

EXIF (Exchangeable Image File)

A file format developed by Fuji Photo Film for digital still cameras. Digital cameras from various manuafcturers use this compressed file format which carries date, time and thumbnail information, as well as the picture data.

File extension

A tag added to the end of a filename to indicate the type of file. For example, ".mp3" indicates an MP3 file.

ISO 9660 format

International standard for the volume and file structure of CD-ROM discs.

JPEG

A file format used for still images, such as photographs and illustrations. JPEG files are identified by the file extension ".jpg" or ".JPG". Most digital cameras use this format.

MP3

MP3 (MPEG1 audio layer 3) is a compressed audio file format. Files are recognized by their file extension ".mp3" or ".MP3".

MPEG audio

An audio format used on Video CDs and some DVD discs. This unit can convert MPEG audio to PCM format for wider compatibility with digital recorders and AV amplifiers. See also *PCM (Pulse Code Modulation)*.

MPEG video

The video format used for Video CDs and DVDs. Video CD uses the older MPEG-1 standard, while DVD uses the newer and much better quality MPEG-2 standard.

PBC (PlayBack Control) (Video CD only)

A system of navigating a Video CD through on-screen menus recorded onto the disc. Especially good for discs that you would normally not watch from beginning to end all at once—karaoke discs, for example.

PCM (Pulse Code Modulation)

The most common system of encoding digital audio, found on CDs and DAT. Excellent quality, but requires a lot of data compared to formats such as Dolby Digital and MPEG audio. For compatibility with digital audio recorders (CD, MD and DAT) and AV amplifiers with digital inputs, this unit can convert Dolby Digital, DTS and MPEG audio to PCM. See also *Digital audio*.

Regions (DVD-Video only)

These associate discs and players with particular areas of the world. This unit will only play discs that have compatible region codes. You can find the region code of your unit by looking on the rear panel. Some discs are compatible with more than one region (or all regions).

Sampling frequency

The rate at which sound is measured to be turned into digital audio data. The higher the rate, the better the sound quality, but the more digital information is generated. Standard CD audio has a sampling frequency of 44.1kHz, which means 44,100 samples (measurements) per second. See also *Digital audio*.

WMA

WMA is short for Windows Media Audio and refers to an audio compression technology developed by Microsoft Corporation. WMA data can be encoded by using Windows Media Player version 8 or Windows Media Player for Windows XP. Files are recognized by their file extension ".wma" or ".WMA".

Microsoft, Windows Media, and the Windows logo are trademarks, or registered trademarks of Microsoft Corporation in the United States and/or other countries.
