* Manufactured under license from Dolby Laboratories Licensing Corporation. "Dolby", the double-D symbol and "PRO LOGIC" are trade marks of Dolby Laboratories Licensing Corporation.

■ Specifications

■ AMPLIFIER SECTION

Power output			Frequency response	
DIN 1 kHz (T. H. D. 1%)	2 X 100 W (6Ω)		PHONO	RIAA standard curve(30Hz-15kHz) ± 0.8 dB
20 Hz-20 kHz continuous power output			CD, TAPE, DVD, VCR, TV	10 Hz - 40 kHz, ± 3 dB
both channels driven	2 X 80 W (6Ω)		Input sensitivity and impedance	
Total harmonic distortion			PHONO	3 mV / 47 kΩ
rated power at 20 Hz - 20 kHz	0.05% (6Ω)		CD, TAPE, DVD, VCR, TV	200 mV / 22 kΩ
half power at 1 kHz	0.03% (6Ω)		S/N at rated power (6Ω)	
Power output at the Dolby Pro Logic operation			PHONO	70 dB (IHF, A : 80dB)
DIN 1 kHz (T. H. D. 1%)			CD, TAPE, DVD, VCR, TV	75 dB (IHF, A : 85dB)
Front	2 X 100 W (6Ω)		Tone controls	
Center	100 W (6Ω)		BASS	50 Hz, +10 to -10 dB
Surround	2 X 100 W (6Ω)		TREBLE	20 kHz, +10 to -10 dB
Power bandwidth both channels driven,-3dB	10Hz - 40kHz (6Ω)		Output voltage TAPE REC (OUT), VCR OUT	200 mV
Damping factor	30 (6Ω)		Channel balance (250 Hz - 6.3 kHz)	±1 dB
Load impedance			Channel separation	55 dB
Front			Headphones output level and impedance	430 mV / 330Ω
A or B	4-16 Ω		Sub-Woofer frequency response	7 -100 Hz, ±3 dB
A and B	8-16 Ω			
Center	6-16 Ω			
Surround	6-16 Ω			

⚠ WARNING

This service information is designed for experienced repair technicians only and is not designed for use by the general public. It does not contain warnings or cautions to advise non-technical individuals of potential dangers in attempting to service a product. Products powered by electricity should be serviced or repaired only by experienced professional technicians. Any attempt to service or repair the product or products dealt with in this service information by anyone else could result in serious injury or death.

FM TUNER SECTION

Frequency range	87.5 — 108.0 MHz
Sensitivity	
S/N 30 dB	1.5 μ V / 75 Ω
S/N 26 dB	1.3 μ V / 75 Ω
S/N 20 dB	1.2 μ V / 75 Ω
IHF usable sensitivity (IHF' 58)	1.5 μ V / 75 Ω
IHF 46 dB stereo quieting sensitivity	22 μ V / 75 Ω
Total harmonic distortion	
MONO	0.2%
STEREO	0.3%
S/N	
MONO	60 dB (73 dB, IHF)
STEREO	58 dB (67 dB, IHF)
Frequency response 20Hz - 15 kHz	+1 dB, -2 dB
Alternate channel selectivity \pm 400 kHz	65 dB
Capture ratio	1.5 dB
Image rejection at 98MHz	40 dB
IF rejection at 98 MHz	70 dB
Spurious response rejection at 98MHz	70 dB
AM suppression	50 dB
Stereo separation	
1 kHz	40 dB
Carrier leak	
19 kHz	-30 dB (-35 dB, IHF)
38 kHz	-50 dB (-55 dB, IHF)
Channel balance (250 Hz - 6.3 kHz)	\pm 1.5 dB
Limiting point	1.2 μ V

Bandwidth	
IF amplifier	180 kHz
FM demodulator	1000 kHz
Antenna terminal(s)	75 Ω (unbalanced)

AM TUNER SECTION

Frequency range	522 - 1611 kHz (9 kHz steps) 530 - 1620 kHz (10 kHz steps)
Sensitivity	20 μ V, 330 μ V/m
Selectivity (at 999 kHz)	55 dB
IF rejection (at 999 kHz)	50 dB

VIDEO SECTION

Output voltage at 1V Input (unbalanced)	1 \pm 0.1 Vp-p
Maximum input voltage	1.5 Vp-p
Input/output Impedance	75 Ω

GENERAL

Power consumption	240 W (In standby mode : 3 W)
Power supply	AC 230 - 240V, 50 Hz
Dimensions (W x H x D)	430 x 158 x 324.5 mm
Weight	9.7 kg

Notes :

- Specifications are subject to change without notice. Weight and dimensions are approximate.
- Total harmonic distortion is measured by the digital spectrum analyzer.

Accessories

Before Repair and Adjustment

Disconnect AC power, discharge Power Supply Capacitors C703, C704, C705 and C706 through a 10 Ω , 5W resistor to ground. DO NOT SHORT-CIRCUIT DIRECTLY (with a screwdriver blade, for instance), as this may destroy solid state devices. After repairs are completed, restore power gradually using a variac, to avoid overcurrent. Current consumption at AC 230~240 V, 50Hz in NO SIGNAL mode should be 240 ~ 330 mA.

Protection Circuitry

The protection circuitry may have operated if either of the following conditions are noticed :

- No sound is heard when the power is turned on.
- Sound stops during a performance.

The function of this circuitry is to prevent circuitry damage if, for example, the positive and negative speaker connection wires are "shorted", or if speaker systems with an impedance less than the indicated rated impedance of the amplifier are used.

If this occurs, follow the procedure outlines below:

1. Turn off the power.
2. Determine the cause of the problem and correct it.
3. Turn on the power once again after one minute.

Note:

When the protection circuitry functions, the unit will not operate unless the power is first turned off and then on again.

■ Caution for AC Mains Lead

(For "EB" area code model only.)

For your safety, please read the following text carefully.

This appliance is supplied with a moulded three pin mains plug for your safety and convenience.

A 5-ampere fuse is fitted in this plug.

Should the fuse need to be replaced please ensure that the replacement fuse has a rating of 5-ampere and that it is approved by ASTA or BSI to BS1362.

Check for the ASTA mark  or the BSI mark  on the body of the fuse.

If the plug contains a removable fuse cover you must ensure that it is refitted when the fuse is replaced.

If you lose the fuse cover, the plug must not be used until a replacement cover is obtained.

A replacement fuse cover can be purchased from your local dealer.

CAUTION !

IF THE FITTED MOULDED PLUG IS UNSUITABLE FOR THE SOCKET OUTLET IN YOUR HOME THEN THE FUSE SHOULD BE REMOVED AND THE PLUG CUT OFF AND DISPOSED OFF SAFELY.

THERE IS A DANGER OF SEVERE ELECTRICAL SHOCK IF THE CUT OFF PLUG IS INSERTED INTO ANY 13-AMPERE SOCKET.

If a new plug is to be fitted, please observe the wiring code as shown below.

If in any doubt please consult a qualified electrician.

IMPORTANT

The wires in this mains lead are coloured in accordance with the following code:

Blue: Neutral
Brown: Live

As these colours may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:

The wire which is coloured Blue must be connected to the terminal which is marked with the letter N or coloured Black or Blue.

The wire which is coloured Brown must be connected to the terminal which is marked with the letter L or coloured Brown or Red.

WARNING: DO NOT CONNECT EITHER WIRE TO THE EARTH TERMINAL WHICH IS MARKED WITH THE LETTER E, BY THE EARTH SYMBOL  OR COLOURED GREEN OR GREEN/YELLOW.

THIS PLUG IS NOT WATERPROOF—KEEP DRY.

Before use

Remove the connector cover.

How to replace the fuse

The location of the fuse differ according to the type of AC mains plug (figures A and B). Confirm the AC mains plug fitted and follow the instructions below.

Illustrations may differ from actual AC mains plug.

1. Open the fuse cover with a screwdriver.

Figure A

Figure B

2. Replace the fuse and close or attach the fuse cover.

Figure A

Figure B

Front Panel Controls

- | No. | Name |

Basic Operations

1 POWER

2 A SPEAKERS B

3 INPUT SELECTOR

4 VOLUME

A A SPEAKERS B

B TAPE MONITOR

Before operation, set VOLUME to the "MIN" position.

- 1** Press [POWER].
- 2** Press [A] and/or [B] to select the speaker system(s) to be used.
A and B refer to the speaker terminals at the rear of the unit.
- 3** Turn [INPUT SELECTOR] to select and start the desired source.
(Refer to the appropriate operating instructions for details.)

The indicator which corresponds to the selected input source will illuminate.
The selected source will be shown on the display.

- TAPE (MONITOR):** To listen to cassette tapes
- VCR:** To watch video tapes
- TV/DSS:** To watch TV or DSS
- DVD:** To watch DVD
- CD:** To listen to compact discs
- TUNER:** To listen to radio broadcasts
- PHONO:** To listen to phono discs

If a Dolby Pro Logic or SFC mode has been selected
After displaying the selected source, the display will then change to show the Dolby Pro Logic or SFC mode.
If the source chosen was TUNER then the display will change again to show the frequency.

Note
To watch a video (or DVD) or the TV, set the TV to either the TV mode or VIDEO mode.

For your reference
If you are using a VCR and you select TAPE, CD, TUNER, or PHONO, the picture will remain on the screen.

4 Adjust the volume.

When you finish listening
Be sure to reduce the volume level, and switch the power to the standby condition by pressing [POWER].

When using speakers under 8 Ω **A**

Press and hold [A] or [B] until "LOW IMP" lights up on the display.

If even one of the speakers being used has an impedance under 8 Ω, press and hold down either button A or button B for 4 seconds or more to set the impedance to LOW.

(Press and hold down once again for 4 seconds or more to turn it off.)

Note that when "LOW IMP" is illuminated, speakers **A** and **B** cannot both be used at the same time.

To change a speaker:
e.g. To use speaker **B**, press [A] (**A** goes out), and then press [B] to activate speaker **B**.

Tape monitor **B**

If [TAPE MONITOR] is pressed while a source other than "TAPE (MONITOR)" is selected, the "TAPE (MONITOR)" indicator lights and the tape monitor comes on.

Sources other than tape can still be selected with [INPUT SELECTOR] while the "TAPE (MONITOR)" indicator is on.

Press [TAPE MONITOR] again to turn the tape monitor off.

(➔ See "Making a recording" for details on how to use the tape monitor during recording.)

Dolby Pro Logic

1 Turn the sound mode selector to select "SURROUND".

2 Press [CENTER MODE] to select the correct center mode.

3 Press [TEST] to output a test signal.

SURROUND mode L-C-R-S
3 STEREO mode L-C-R

4 Press [VOL (-) or (+)] to set the volume level normally used for enjoying the source.

5 Press [LEVEL] to select the center or surround speakers.

Selected channel 5 0dB

6 Press [-] or [+] to adjust the output level.

Output level 5 +3dB

Setting the center mode and adjusting speaker output level

- When ready to adjust speaker output level, situate yourself where you would normally be listening.
- First turn ON the speakers with SPEAKER A on the receiver.
- If front speaker volume is unbalanced, adjust the balance with [BALANCE].

Note

Ensure the front speakers are connected to the A terminals when you use Dolby Pro Logic. The Dolby Pro Logic modes cannot be turned on if "SPEAKERS B" is selected.

The following steps are for setting the output level of the front speakers and the center/surround speakers to the same listening level.

1 Turn the sound mode selector to select "SURROUND".

Note

1. Select "3 STEREO" if surround speakers have not been connected.
2. Remember you cannot adjust the output level of the surround speakers if you selected "3 STEREO" mode.

2 Press [CENTER MODE] to select the correct center mode.

When the button is pressed, the current center mode is displayed. Pressing it again changes the center mode.

NORMAL

When the center speaker is smaller than the front speakers.

WIDEBAND

When the center speaker is the same size as or larger than the front speakers.

PHANTOM SURROUND mode only

When no center speaker is connected.

Note

In the PHANTOM mode, the sound which would have been sent to the center speaker will be divided equally between both the left and right front speakers.

by remote control only

3 Press [TEST] to output a test signal.

The speaker outputting the test signal is displayed while the test is running.

L : Front speaker (Left) R : Front speaker (Right)
C : Center speaker S : Surround speakers

The subwoofer is muted while testing.

In the PHANTOM mode, the center speaker is OFF, so there is no center test signal and "C" is not displayed.

4 Press [VOL (-) or (+)] to set the volume level normally used for enjoying the source.

5 Press [LEVEL] to select the center or surround speakers.

6 Press [-] or [+] to adjust the output level.

Adjust the output level of each speaker from the listening position until they are all identical.

- : Decrease the output level.

+ : Increase the output level.

Output level can be varied within a range of -12 dB to +12 dB with front speaker output level serving as the zero point.

Note

During steps 5 and 6 above the test signal sequence is interrupted and the signal will only come from the selected speaker. The sequence will resume when adjustments are stopped.

To stop the test signal

Press [TEST].

To turn off the Dolby Pro Logic systems

Press [STEREO].

Adjusting the delay time

When enjoying with SURROUND only

Adjust the sound from the surround speakers until the proper effect is produced.

1 Turn the sound mode selector to select "SURROUND".

2 Press [DELAY TIME] to set the time.

When the button is pressed, the current delay time is displayed.

Each time the button is pressed, the delay time will increase by 5 ms within a range of 15 ms to 30 ms.

The standard setting is 20 ms.

To calculate the delay time A

D₁: Distance from front speakers

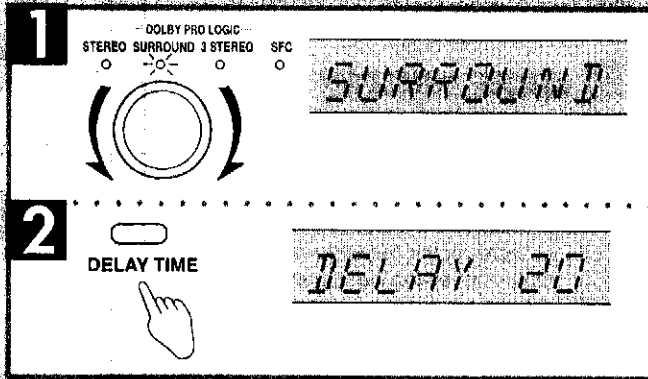

D₂: Distance from surround speakers

• If D₁ is equal to or less than D₂

Set to 15 ms.

• If D₂ is less than D₁

Start at 15 ms and increase by 5 ms for every 1.5 m of difference between D₁ and D₂.

Enjoying SURROUND or 3 STEREO

1 Turn [INPUT SELECTOR] to select and start the desired source.

2 Turn the sound mode selector to select "SURROUND" or "3 STEREO".

Note

When employing SURROUND, use software recorded in Dolby Surround.

For your reference

You can set the Dolby Pro Logic mode for each source. Each source will retain the selected mode.

To turn off the Dolby Pro Logic systems

Turn the sound mode selector (2) to select "STEREO".

Sound Field control (SFC)

The SFC function gives presence and spread thereby enhancing and enriching the music or movie. Read the following explanations in order to better understand how to make your selection.

Note: The center speaker is not used in the hall, and simulated modes.

HALL
This mode imparts a reflection and spread which will make you feel as if you are in a large concert hall.

CLUB
Like a jazz club, this mode provides an exciting and intimate atmosphere. It simulates the sound field of a relatively small room having a low ceiling and hard reflective surfaces, for a "live" sound with enhanced presence to bring the performers up close.

LIVE
Primarily for vocal pieces, this mode adds gloss to the vocals and you'll feel as though you were hearing a live stage performance.

THEATER
You can clearly perceive the directions and source of the movie. Real ambience of sound can also be recreated naturally using this mode. THEATER mode can be used with stereo sources not encoded with Dolby Surround.

Note: When using Dolby Surround encoded materials, select "SURROUND".

SIMULATED (SIM SURR)
Choose this mode if little or no sound will be heard from the surround speakers. You can feel as if you were in a more expanded space adding to the actual sound from the source. This mode also adds effect to monaural sources by outputting sound from surround speakers.

1 Turn [INPUT SELECTOR] to select and start the desired source.

2 Turn the sound mode selector to select "SFC".

3 Turn [MODE] to select the desired SFC mode.

Note: The SFC mode can also be selected by directly turning [MODE] in step 2 instead of selecting "SFC".

For your reference
You can set the SFC mode for each source. Each source will retain the selected mode.

To turn off the SFC function
Turn the sound mode selector (B) to select "STEREO".

Note: Ensure the front speakers are connected to the A terminals when you use SFC. The SFC modes cannot be turned off if "SPEAKERS B" is selected.

Adjusting field of sound

With this unit, you can adjust speaker volume. Adjust the field of sound while listening to a source.

To adjust the volume of the center and surround speakers A by remote control only

1 Press [LEVEL] to select the center or surround speakers.

Note: You can adjust the center speaker volume only in the theater mode.

2 Press [+] or [-] to adjust the output level.

To adjust the delay time B

Press [DELAY TIME] to set the time.

When the button is pressed, the current delay time is displayed. Each time the button is pressed, the delay time will change.

The delay time increments are different depending on the SFC mode. Select a delay time setting to accommodate to your individual needs.

SFC modes	Available delay time setting (ms)
HALL	20, 25, 30, 40, 50
CLUB	0, 15, 20, 25, 30
LIVE	15, 20, 30, 40, 50
THEATER	15, 20, 25, 30, 40
SIMULATED	15, 20, 25, 30, 40

The figures in bold italics are the factory settings.

DVD 6CH INPUT Mode

This receiver can playback 6 channel discrete sound. It has terminals for connecting to a component with 6 channel discrete output, such as a DVD player.

6 channel discrete output makes playback sound more real by adding depth, movement, position and other characteristics to the field of sound. It will make you feel as if you were at the movie theater when in your own home.

To enjoy 6 channel discrete output sound
 You have to connect a DVD player, Digital Surround Processor or other component that has 6 channel discrete output capabilities.

- 1 Turn [INPUT SELECTOR] to select "DVD".**
 - 2 Press [DVD 6CH INPUT] to select "DVD 6CH".**
 Changes as follows, each time the button is pressed.
 DVD 6CH ⇌ DVD (2CH)
- The "DVD 6CH INPUT" indicator lights when "DVD 6CH" is selected.
- If you press this button while another source (CD, PHONO, etc.) is selected, the receiver switches the source to DVD and engages the DVD 6CH INPUT mode.
- 3 Start the desired source.**
 Follow your equipment's operating instructions.

NOTE
 You cannot select Dolby Pro Logic or any of the SFC modes while in the DVD 6CH INPUT mode.

NOTE
 Ensure the front speakers are connected to the A terminals when you use DVD 6CH INPUT mode. The DVD 6CH INPUT mode cannot be turned on if "SPEAKERS B" is selected.

About the HELP function

If you make a mistake in operation or if sound output stops due to some operation which was performed, the HELP function displays information which can be useful for indicating the method by which this condition can be remedied.

If "ERROR" or scrolling characters (for instance, "SPEAKER OFF NOW") appear on the display during operation, carry out the following operation.

Press [HELP/-RESET].
 The method for remedying this situation will be displayed.

For your reference
 If the above button is pressed for 2 seconds or more until "RESET" appears on the display, the operation settings for the unit will be initialized to the settings made at the time of shipment. However, any broadcasting stations which have been preset into memory will not be erased at this time.

Other Functions

To adjust the tone quality
 Turn [BASS] to adjust the low frequency sound.
 Turn [TREBLE] to adjust the high frequency sound.

To adjust the sound balance
 Turn [BALANCE] to adjust the left/right sound balance.

To mute the sound level
 By remote control only

Press [MUTING]
 The message "MUTING ON NOW" runs repeatedly from right to left across the display as long as the muting function is on.
 Press once again to return to the previous volume level.

NOTE
 When the receiver is turned off, the muting operation will be automatically cancelled.

To listen through headphones
 1 Reduce the volume level.
 2 Connect the headphones.
 Plug type: 6.3 mm (1/4 in.) stereo
 3 Adjust the volume level.

If you do not want sound from the speakers, press [SPEAKERS] button(s) and check the speaker indicator(s) goes out.

If a subwoofer is connected to your system, turn off the power to it (or the subwoofer amp you are using) or lower the volume to the minimum level.

NOTE
 Avoid listening for prolonged periods of time to prevent hearing damage.

Making A Recording

Recording on a tape deck A

Before recording, prepare the tape deck for recording. See the tape deck's operating instructions for details.

- 1** Turn [INPUT SELECTOR] to select the source to be recorded.
Any source can be selected except TAPE.
- 2** Begin recording on the tape deck.
Follow your tape deck's operating instructions.
- 3** Begin the source to be recorded.
Follow your equipment's operating instructions.

To check the sound recorded while a recording is being made B

It is possible to check the sound being recorded if your tape deck is a 3 head system.

Press [TAPE MONITOR] on this unit and set the monitor button on the tape deck to "TAPE".

Press [TAPE MONITOR] once again to turn it off.

Recording on a VCR C

Before recording, prepare VCR for recording. See the VCR's operating instructions for details.

- 1** Turn [INPUT SELECTOR] to select the source to be recorded.
Any source can be selected except VCR and TAPE.

Note
Recording from the tape deck is not possible.

- 2** Begin recording on the VCR.
Follow your VCR's operating instructions.

- 3** Begin the source to be recorded.
Follow your equipment's operating instructions.

.....

Note
When you select DVD 6CH INPUT mode, only sound from the front left and right speakers is recorded.

To record all 6 channels
Set the playback mode on your DVD player or decoder to 2 channel (stereo) mode.

For details, see the instruction manual that came with the connected equipment.

Using the Remote Control

Point the remote control toward the receiver

Basic operations

To turn the unit ON/OFF

Once the unit has been set to ON, it can be turned ON and OFF simply by pressing [⏻].

Note

After turning the TV, VCR or DVD player ON or OFF, always press TUNER/BAND before pressing [⏻] when turning the receiver ON and OFF.

To select an input source and switch the remote control transmitter to each operation mode

Note

PHONO can not be selected with this remote control.

To turn off the Dolby Pro Logic and SFC mode

To turn on the Dolby Pro Logic and select the SURROUND mode

Note

3 STEREO can not be selected with this remote control.

To turn on the SFC function and select the desired mode

Changes as follows each time the button is pressed.

HALL → CLUB → LIVE → THEATER
└─ SIM SURR (SIMULATED) ─┘

To output a test signal

When the SURROUND or 3 STEREO mode is ON

Press once more to stop the signal.

To adjust the output level of the center speaker and/or surround speakers

- ① Select center (C) or surround (S).
- ② Adjust output level.

- When the SURROUND mode is ON and the center mode is on PHANTOM, you cannot select the center channel.
- When SFC is used, the center mode can be changed only if THEATER is on.
- When the 3 STEREO mode is ON, you cannot select the surround channel.

To adjust the delay time

When the SURROUND or SFC mode is ON

To mute the sound level

The message "MUTING ON NOW" runs repeatedly from right to left across the display as long as the muting function is on.
Press once more to return to the original volume.

To adjust the volume level

■ Operation Checks

"ATTENTION SERVICER" Some chassis components may have sharp edges. Be careful when disassembling and servicing.

1. This section describes procedures for checking the operation of the major printed circuit boards and replacing the main components.
2. For reassembly after operation checks or replacement, reverse the respective procedures.
Special reassembly procedures are described only when required.
3. Select items from the following index when checks or replacement are required.

• Contents

	page
• Checking Procedure For Each Major P.C.B.	12 ~ 14
• Main Component Replacement Procedures	14 ~ 15

■ Checking Procedure For Each Major P.C.B.

To remove Front Panel and check Panel P.C.B. , Operation P.C.B. and Headphone Jack P.C.B.

Step 1
Remove the top cabinet.

Step 2

Step 7
Pull out the Headphone Jack P.C.B.

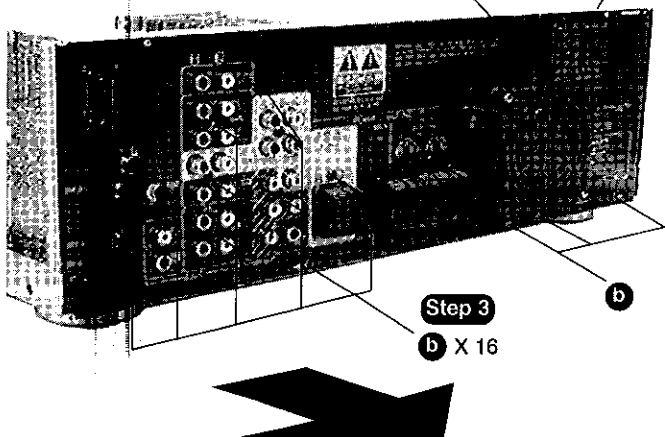

To remove Rear Panel and check Main P.C.B. and Power P.C.B.

Step 4
Release the AC In/Out P.C.B. catches and the fan motor connector, then pull out the rear panel in the direction of arrow.

Step 1
Remove the top cabinet.

Step 2
Remove the front panel.

Step 3
b X 16

Step 6
e X 2

Step 5
f X 12

■ Main Component Replacement Procedures

1. Replacement of the Power IC and Regulator Transistor

Step 1

Remove the top cabinet.

Step 2

Cut the joints as shown below. (8 joints)

Step 3

Fold the joints. (8 joints)

Step 4

Desolder the terminals of Power IC and Regulator Transistor.

Step 5

Remove all screws (b) for the Tuner, AC-3 and Pro Logic P.C.B.'s at the Rear Panel and pull out these P.C.B.'s from the Main P.C.B.

Regulator transistor (Q701, Q708) [2SD2374PQAU, 2SB1548PQAU]

Step 7

(g) X 3

•The PROTO Offset Screwdriver No. 34-1/4 is recommended for use in the application above.

Installation of the bottom cover after replacement

Step 1

Flip over the bottom cover

[XTB3+8J] (Black)

Step 2

Align the ribs of bottom cover into the lugs.

Step 3

Screw (XTB3+8J) (Prepare this screw to fix the bottom cover.)

CAUTION

1. After replacing the power IC or regulator transistor, apply a sufficient quantity of compound grease (RFKX0002/SZZ0L15) between the heat sink and the power IC or regulator transistor (Radiation of power IC).
2. Tighten enough the screws (g) after replacing the power IC and regulator transistor. Otherwise, the heat radiation works little.
3. When installing or removing the power IC or transistor holder, be sure to use an offset screwdriver.

A long straight screwdriver

Fig.1

A short straight screwdriver

Fig.2

- A long straight screwdriver cannot be used for removing or mounting the screws since its long grip interferes with the neighbouring P.C.B. (See Fig.1)
- A short straight screwdriver may be used for removal, but cannot be used for mounting because the limited space in the unit will not allow sufficient tightening torque.(See Fig.2)

- Insufficient tightening will cause poor heat dissipation from the power IC and regulator transistor and, in the worst case, may lead to their thermal breakdown.

Terminal Functions Of ICs

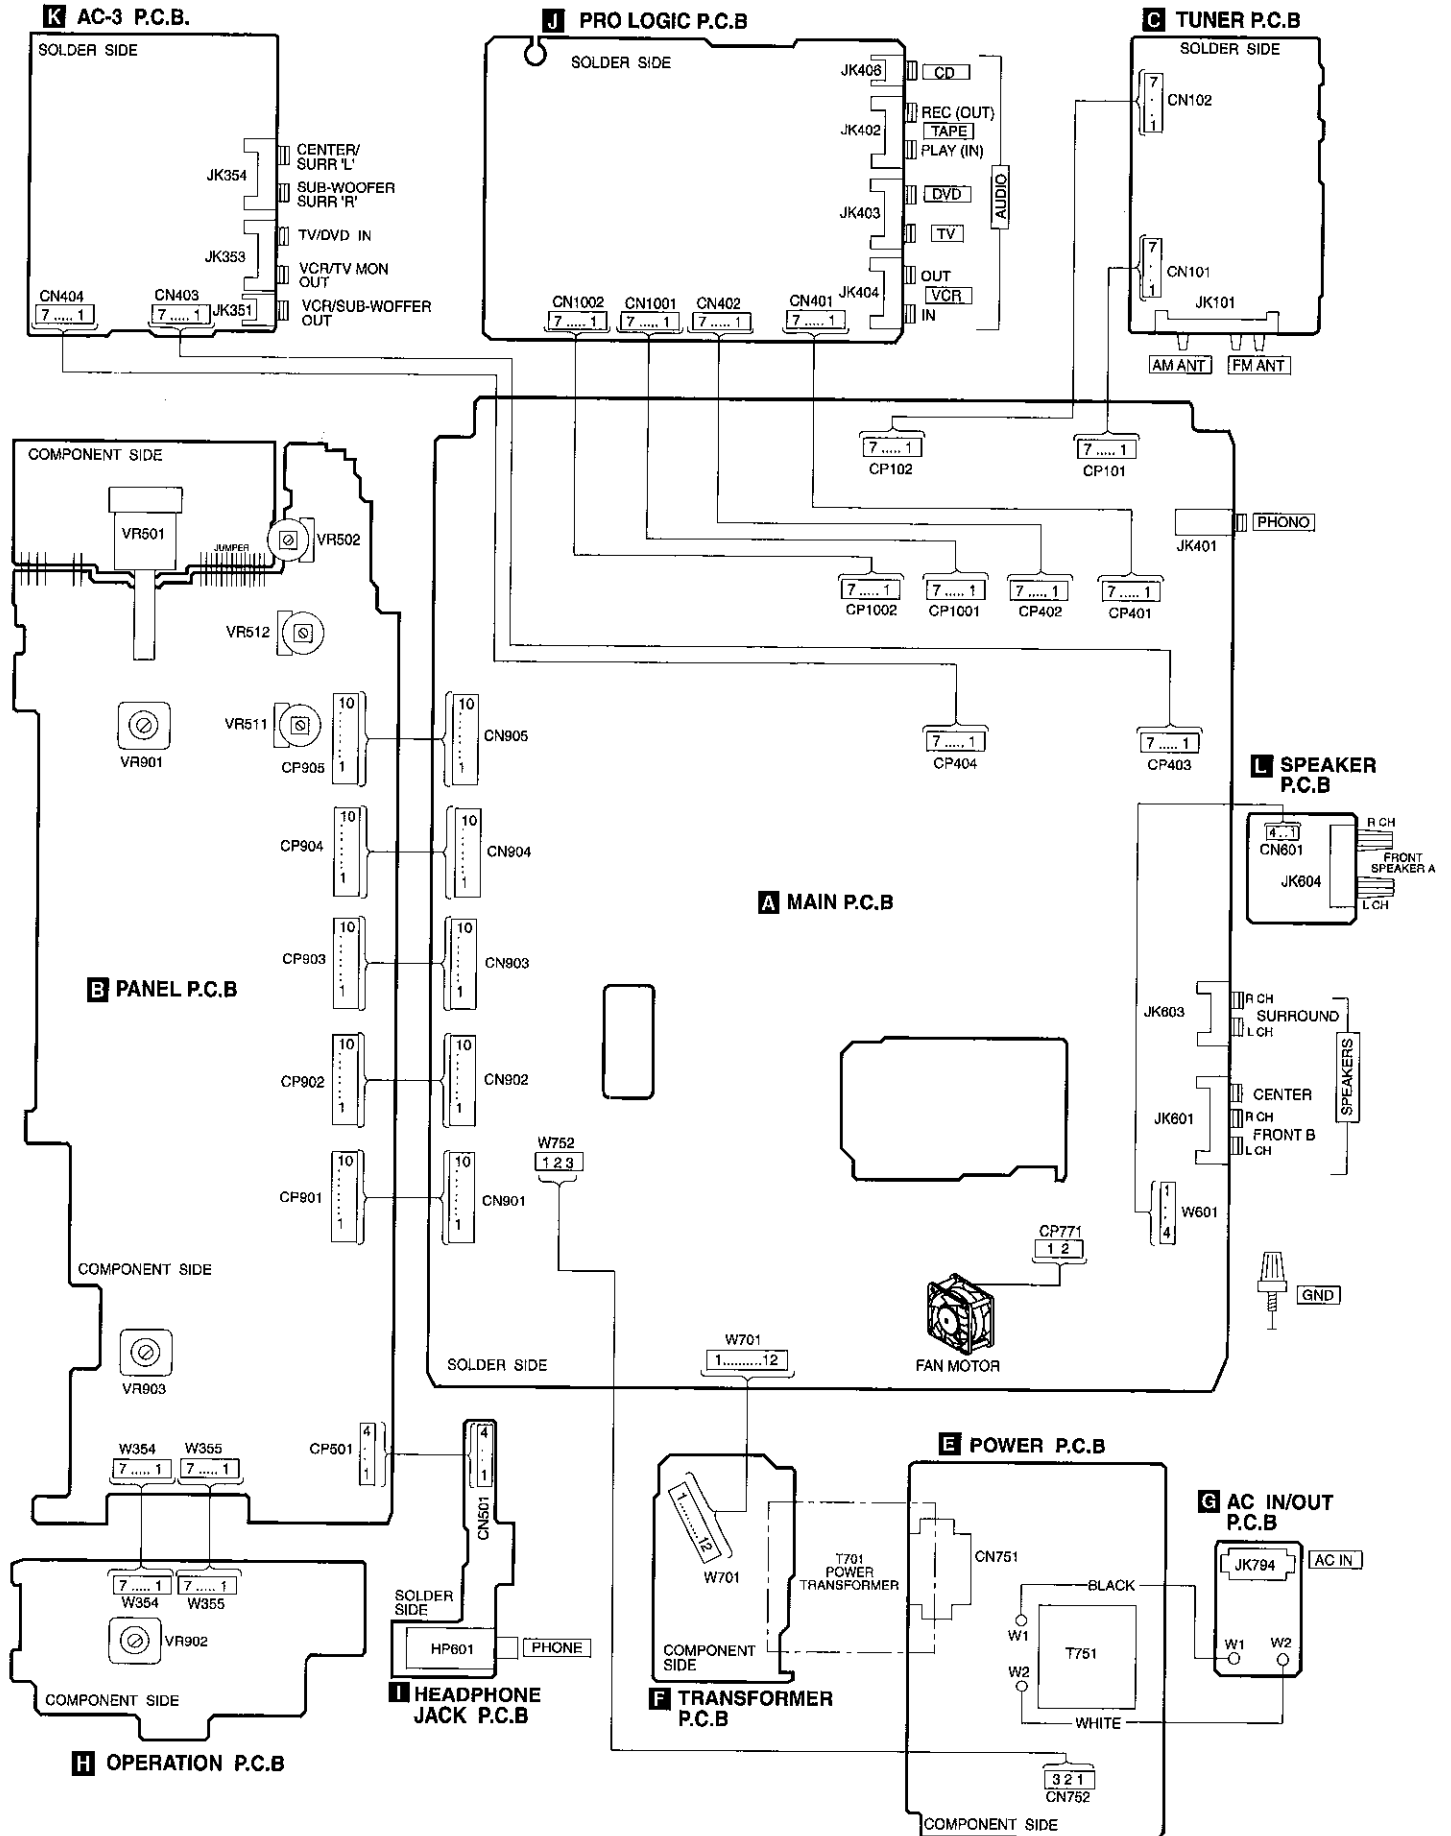

• IC901 (M38B57M6120F) System Microprocessor

Pin No.	Mark	I/O	Function
1~2	KEY2~KEY1	I	Key Input 1 ~ 2
3	THERM/OVLD	I	Thermal/Over load input
4	KEY4	I	Key Input 4
5	OVERLOAD2	I	Over load input 2
6	FMST	I	Stereo signal detect terminal
7	WAKE	-	Wake up timer LED
8	RDS_DI	-	Control of RDS IC (Not used,open)
9	REMOTE	I	Remote control terminal
10	RESET	I	Reset detect terminal
11	RDS_CK	-	Control of RDS IC (CK) clock signal
12	RDS_DT	-	Control of RDS IC (DT) data signal
13	GND	-	GND terminal
14	XIN	I	Crystal oscillator terminal (4 MHz)
15	XOUT	O	Crystal oscillator terminal (4 MHz)
16	VDD (+5V)	-	Power supply terminal +5V
17	LED_CK	O	LED driver IC (CK) clock signal
18	LED_DATA	O	LED driver IC (DT) data signal
19	SFC1	I	SFC mode encoder input 1
20	SFC2	I	SFC mode encoder input 2
21	SEL1	I	Selector encoder for input 1
22	HOLD	I	Blackout detection terminal
23	SEL2	I	Selector encoder for input 2
24	TV_VCR2	I	TV-VCR2 control input
25	RLY	-	Relay control output
26	LOUDNESS	O	Loudness control output
27	6CH_ST	O	6 ch sw control output (ST)
28	VEE	-	Power supply for FL driver
29	S/C_SP	O	Surround/Center speaker control output
30	SP_B	O	Speaker B control output
31	SP_A	O	Speaker A control output
32	AF_MUTE	O	Muting control output
33~48	SEG16~SEG1	O	FL segment signal output
49~58	DEG1~DEG10	O	FL digit signal output
59	INIT_IN	I	Diode input initial settings
60	VOL_DOWN	O	Volume control output (Down)
61	VOL_UP	O	Volume control output (Up)
62	REC_MUTE	O	REC Mute control
63	IF_DATA	I	Serial data signal
64	LIMITTER	O	Power limiter control output
65	TNR_CE	O	Tuner control (CE) chip enable signal
66	SEL/TNR_CK	O	Selector/Tuner (CK) clock signal
67	SEL/TNR_DT	O	Selector/Tuner (DT) data signal
68	SEL_ST	O	Selector control terminal
69	MMD	O	MMD control terminal
70	SURR/OSD_CK	O	Surround control (CK) clock signal
71	SURR/OSD_DT	O	Surround control (DT) data signal
72	SURR_CE	O	Surround control (CE) chip enable signal
73	AVSS	-	GND for A-D converter
74	VREF	-	Reference voltage for A-D converter
75	SD	I	SD signal detect input
76	SUR1	I	Encoder of surround mode selector input1
77	HELP_LED/RDS_CE	O	Help LED control output
78	SUR2	I	Encoder of surround mode selector input2
79	VIDEO_B	O	Video selector control output B
80	VIDEO_A	O	Video selector control output A

	: AM Signal Line		
	: AM OSC Signal Line		

- The voltage value and waveforms are the reference voltage of this unit measured by DC electronic voltmeter (high impedance) and oscilloscope on the basis of chassis. Accordingly, there may arise some error in voltage values and waveforms depending upon the internal impedance of the tester or the measuring unit.

< > : FM

• Importance safety notice:

Components identified by  mark have special characteristics important for safety. Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used. When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.

Caution !

IC, LSI and VLSI are sensitive to static electricity.

Secondary trouble can be prevented by taking care during repair.

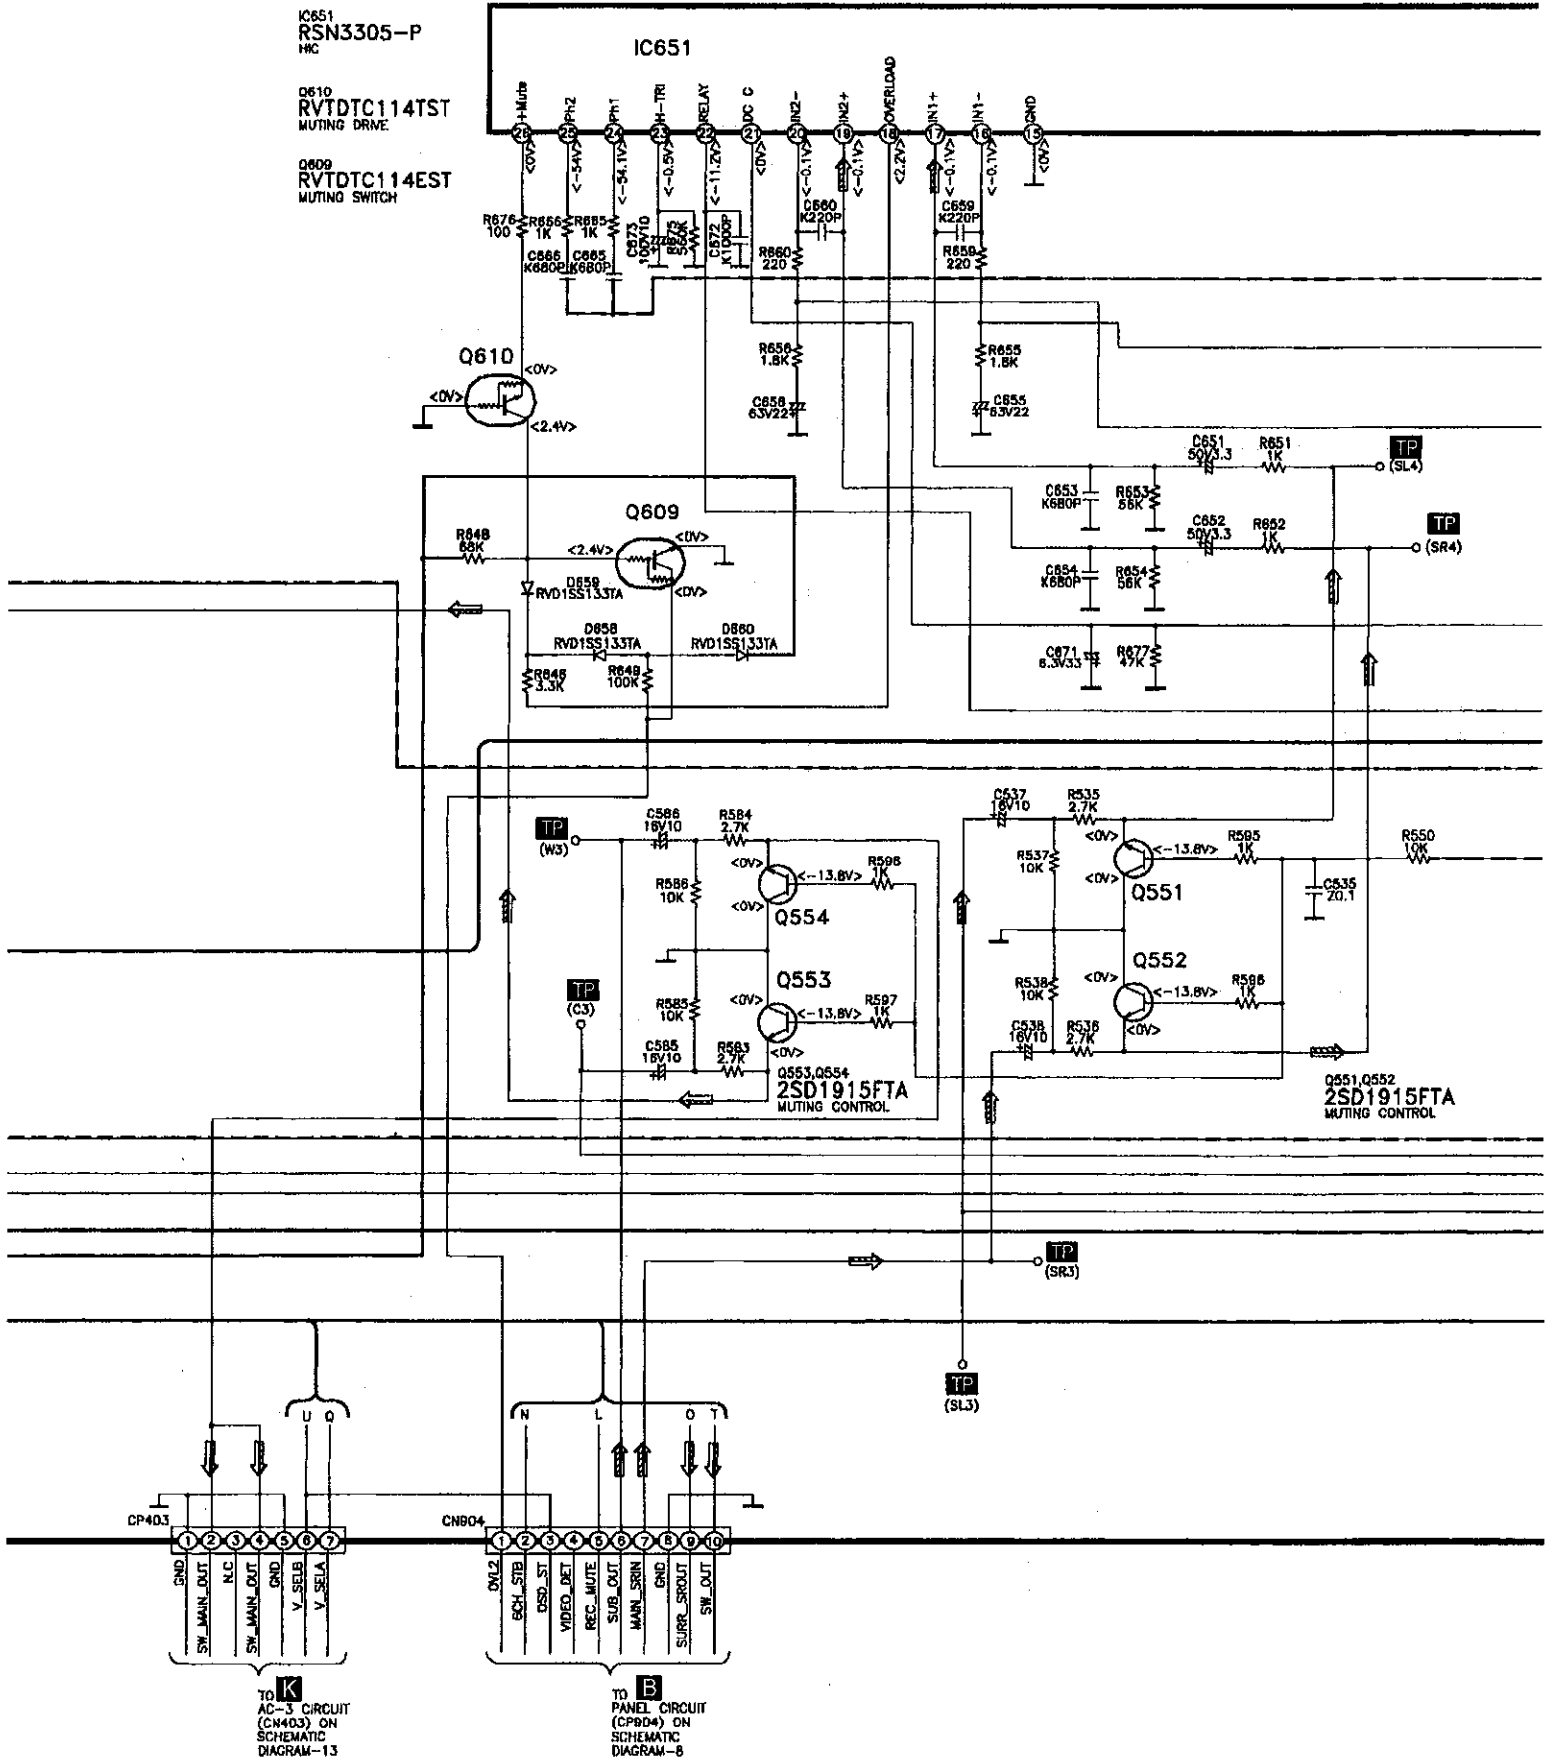

- Cover the parts boxes made of plastics with aluminium foil.
- Ground the soldering iron.
- Do not touch the pins of IC, LSI or VLSI with fingers directly.
- Put a conductive mat on the work table.

■ Cabinet Parts Location

■ Replacement Parts List

Notes: * Important safety notice :

 Components identified by \triangle mark have special characteristics important for safety.

Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used. When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.

* The parenthesized in the Remarks columns specify the areas. (Refer to the cover page for area.)

Parts without these indication can be used for all areas.

* [M] in Remarks column indicates parts that are supplied by MESA.

Resistors & Capacitors

- Notes :
- Important safety notice:
Components identified by \triangle mark have special characteristics important for safety. Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used. When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.
 - The parenthesized in the Remarks columns specify the areas. (Refer to the cover page for area.) Parts without these indication can be used for all areas.
 - [M] in Remarks column indicates parts that are supplied by MESA.
 - Capacitor values are in microfarad (μF) unless specified otherwise, P=Pico-farads (pF) F=Farads (F)
 - Resistors values are in ohms, unless specified otherwise, 1k=1,000(OHM), 1M=1,000k(OHM)

■ Packing Materials & Accessories

Notes :

- * Important safety notice : Components identified by \triangle mark have special characteristics important for safety. Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used. When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.
- * The parenthesized in the Remarks columns specify the areas. (Refer to the cover page for area.)
- * Parts without these indication can be used for all areas.
- * The mark "(SF)" denotes standard part.
- * [M] in Remarks column indicates parts supplied by MESA.
- * Remote Control Unit : Supply period for three years from termination of production.
- * Reference for O/I book languages are as follows :

Ar : Arabic	Cf : Canadian French	CO : Chinese (old)	Cn : Chinese (new)	Cz : Czech	Da : Danish
