Amplifier

Amplifier

SE-CH730

Colour

(K) : Black

Areas

Suffix for Model No.	Area	Colour
(E)	Europe	(K)
(EB)	Britain	
(EG)	Germany and Italy	
(GC)	Asia, Latin America, Middle East, Africa and Oceania	

Note: The design of SB-CH530A is differ from the above picture.

Because of unique interconnecting cables, when a component requires service, send or bring in the entire system.

System: SC-CH730

Specifications

Power output

DIN 1 kHz, THD 1%, both channel driven 2 × 50 W (6 Ω)
 RMS 1 kHz, THD 10%, both channel driven
 [For (E), (EB) and (EG) areas] 2 × 70 W (6 Ω)
 [For (GC) area] 2 × 65 W (6 Ω)

PRO LOGIC mode

DIN 1 kHz, THD 1 %
 MAIN (both channels driven) 2 × 40 W (6 Ω)
 SURROUND 40 W (4 Ω + 4 Ω)
 CENTER 40 W (8 Ω)

RMS 1 kHz, THD 10 %

MAIN (both channels driven) 2 × 50 W (6 Ω)
 SURROUND 50 W (4 Ω + 4 Ω)
 CENTER 50 W (8 Ω)

Total harmonic distortion

Rated power at 1 kHz 1% (6 Ω)
 Half power at 1 kHz 0.09% (6 Ω)

Load impedance

MAIN 6 Ω – 8 Ω

SURROUND

4 Ω – 8 Ω

CENTER

8 Ω

S/N (rated power)

MAIN

90 dB

General

Power consumption

213 W

Power supply

[For (E) and (EG) areas] 230 V, AC 50/60 Hz

[For (EB) area] 230 – 240 V, AC 50/60 Hz

[For (GC) area] 110/127/220/230-240 V, AC 50/60 Hz

Dimensions (W × H × D)

270 × 118.5 × 341.5 mm

Weight

4.8 kg

Notes:

Specifications are subject to change without notice.

Weight and dimensions are approximate.

Total harmonic distortion is measured by the digital spectrum analyzer.

Area	System	Tuner/sound processor	Compact disc player	Amplifier	Cassette deck	Right and left speakers	Surround speakers

(GC)						*2 SB-CH530A	—

*1 For (E) (EB) and (EG) areas Made in PAES

*2 For (GC) area Made in NABEL

WARNING

This service information is designed for experienced repair technicians only and is not designed for use by the general public. It does not contain warnings or cautions to advise non-technical individuals of potential dangers in attempting to service a product. Products powered by electricity should be serviced or repaired only by experienced professional technicians. Any attempt to service or repair the product or products dealt with in this service information by anyone else could result in serious injury or death.

Before Repair

- (1) Turn off the power supply. Using a 10 Ω, 10 W resistor, connect both ends of power supply capacitors (C701, C702) in order to discharge the voltage.
- (2) Before turning the power supply on, after completion of repair, slowly apply the primary voltage by using a power supply voltage controller to make sure that the consumed current at 50/60 Hz in NO SIGNAL mode should be shown below with respect to supply voltage 230 V/240 V.

Area	(E) (EG)		(GC)	
	(E) (EG)	(EG)	(GC)	(GC)
Power supply voltage	AC 230 V	AC 240 V	AC 110 V	AC 240 V
Consumed current 50 Hz	60 ~ 200 mA	60 ~ 420 mA	180 ~ 200 mA	60 ~ 200 mA

Protection Circuitry

The protection circuitry may have operated if either of the following conditions is noticed:

- * No sound is heard when the power is switched ON.
- * Sound stops during a performance.

The functions of this circuitry is to prevent circuitry damage if, for example, the positive and negative speaker connection wires are "shorted", or if speaker systems with an impedance less than the indicated rated impedance of this unit are used.

If this occurs, follow the procedure outlined below:

1. Switch OFF the power.
2. Determine the cause of the problem and correct it.
3. Switch ON the power once again.

Note:
When the protection circuitry functions, the unit will not operate unless the power is first switched OFF and then ON again.

Accessories

- AC power supply cord
(E), (EG) and (GC) areas : (RJA0019-2K) 1
(EB) area : (VJA0733) 1

for (GC) area only (SJP5213-2) 1

■ Caution for AC Main Lead

[(EB) area code model only]

For your safety, please read the following text carefully.

This appliance is supplied with a moulded three pin mains plug for your safety and convenience.

A 5-ampere fuse is fitted in this plug.

Should the fuse need to be replaced please ensure that the replacement fuse has a rating of 5-ampere and that it is approved by ASTA or BSI to BS1362.

Check for the ASTA mark  or the BSI mark  on the body of the fuse.

If the plug contains a removable fuse cover you must ensure that it is refitted when the fuse is replaced.

If you lose the fuse cover the plug must not be used until a replacement cover is obtained.

A replacement fuse cover can be purchased from your local dealer.

CAUTION!

IF THE FITTED MOULDED PLUG IS UNSUITABLE FOR THE SOCKET OUTLET IN YOUR HOME THEN THE FUSE SHOULD BE REMOVED AND THE PLUG CUT OFF AND DISPOSED OF SAFELY.

THERE IS A DANGER OF SEVERE ELECTRICAL SHOCK IF THE CUT OFF PLUG IS INSERTED INTO ANY 13-AMPERE SOCKET.

If a new plug is to be fitted please observe the wiring code as shown below.

If in any doubt please consult a qualified electrician.

IMPORTANT

The wires in this mains lead are coloured in accordance with the following code:

Blue: Neutral

Brown: Live

As the colours of the wires in the mains lead of this appliance may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:

The wire which is coloured BLUE must be connected to the terminal in the plug which is marked with the letter N or coloured BLACK.

This apparatus was produced to BS 800.

■ Location of Controls

The wire which is coloured BROWN must be connected to the terminal in the plug which is marked with the letter L or coloured RED.

Under no circumstances should either of these wires be connected to the earth terminal of the three pin plug, marked with the letter E or the Earth Symbol .

Before use

Remove the connector cover as follows.

How to replace the fuse

1. Remove the fuse cover with a screwdriver.

2. Replace the fuse and attach the fuse cover.

① Power "STANDBY /ON" switch (POWER, STANDBY

Press to switch the unit from on to standby mode or vice versa. In standby mode, the unit is still consuming a small amount of power.

② Standby indicator (STANDBY)

When the unit is connected to the AC mains supply, this indicator lights up in standby mode and goes out when the unit is turned on.

③ Dolby Pro-Logic Surround indicators (SURROUND, 3 STEREO)

④ Dolby Pro-Logic Surround buttons (PRO LOGIC, TEST, DELAY TIME, CENTER MODE)

⑤ Volume control (VOLUME)

⑥ Source direct indicator (SOURCE DIRECT)

⑦ Source direct button (SOURCE DIRECT)

⑧ EQ SPACE/flat button (EQ SPACE/FLAT)

⑨ V. bass button (V. BASS)

⑩ Headphones jack (PHONES) (ϕ 3.5, 32 Ω)

⑪ Microphone jack (MIC) (ϕ 6.3, 600 Ω)

⑫ Microphone volume control (MIC VOL)

Stacking the Components

- Install the various components as shown in the illustration.
- To produce a better stereo sound, install both speakers away from the system.

Horizontal stacking **A**

Vertical stacking **B**

System layout example **C**

System connections **D**

Connections

Connect the AC power supply cord after you have connected all other cables.

I Connect the flat cables.

Hold the connector with the recessed part up and press in at the center until you hear a click.

1. Connect the shorter flat cable to the terminal of the A1 and A2.
2. Connect the longer flat cable to the terminal of the B1 and B2.
3. Connect the longest flat cable to the terminal of the C1 and C2.

To disconnect the flat cable, hold the connector as shown in the illustration, and pull it out.

After connection, fold and press the cable as flat to the back of the unit as possible. (To minimize noise pickup while listening an AM broadcast)

Do not try connecting or disconnecting the flat cables while the power is switched to ON.

2 Connect the FM indoor antenna.

The tip of the internal antenna wire should not come into contact with any metal objects.

Note

When you cannot get a good reception of FM radio broadcast:

- Install the antenna on a wall at a height and in a direction which result in the best reception.
- When you cannot get a good reception with this FM indoor antenna, we recommend you install an FM outdoor antenna (not included).

3 Connect the AM (MW/LW) loop antenna.

1. Attach the antenna holder to the rear panel of the tuner/sound processor. Press the antenna holder hard enough to get it fixed firmly in the place, with a click.
2. Clamp the antenna with its cord come upward to the antenna holder.
3. Connect the antenna terminal to the rear panel of the tuner/sound processor.

While listening to an MW/LW broadcast, position the loop antenna for the best reception.

You may attach the antenna holder to a rack or other structure. Use a screw (included) to attach as shown in the figure. **A**

Note

To minimize noise pickup, bundle the loop antenna cord using a tape or so to keep the flat cables away from the AM loop antenna cord.

B

4 Connect the right (R) and left (L) speaker cables.

Notes

- Be sure to connect speaker cables before connecting the AC power supply cord.
- The load impedance of any speaker used with this unit must be 6–8Ω.

Connection of speaker cables **A**

1. Strip off the outer covering, and twist the center conductor. Make sure the bare ends of the wires are not unraveled. (If they are, twist them tight again.)
2. ① Tilt the lever back and insert the wire.
② Close the lever and pull the cord gently to be sure that it is secured.
3. Insert the wire to the rear panel of the amplifier, and close the lever.

Notes

- To prevent damage to circuitry, never short-circuit positive (+) and negative (-) speaker wires.
- Be sure to connect only positive (red) wires to positive (+) terminals and negative (black) wires to negative (-) terminals.

Caution

Use this speaker only with the recommended system.

Failure to do so may lead to damage to the amplifier and/or the speaker, and may result in the risk of fire. Consult a qualified service person if damage has occurred or if you experience a sudden change in performance.

5 Connect the surround speaker cords.

6 Connect the AC power supply cord after you have connected all other cables and cords.

Insertion of Connector **B**

Even when the connector is perfectly inserted, depending on the type of inlet used, the front part of the connector may jut out as shown in the drawing.

However there is no problem using the unit.

Optional Antenna Connections

FM outdoor antenna (not included) **A**

You may need an outdoor antenna if you use this system in a mountainous region or inside a reinforced-concrete building, etc. An outdoor antenna should be installed by a competent technician only.

AM (MW/LW) outdoor antenna (not included) **B**

An outdoor antenna may be required in a mountainous region, or if this system is located inside a reinforced-concrete building, etc.

Connect the outdoor antenna without removing the AM loop antenna.

Run 5 to 12 m of vinyl-covered wire horizontally along a window or other convenient location.

External Unit Connection

A

B

C

D

E

F

G

H

I

External unit connection

- For details, refer to the operating instructions of the units which are to be connected.
- When units other than those described below are to be connected, please consult with your audio dealer.
- These connection cables and audio products described in the illustration (except for tuner/sound processor and amplifier) are all sold separately.

Connecting the stereo connection cable (not included) **A**

Connect the red plug to the right (R) connector.
Connect the white plug to the left (L) connector.

DCC (digital compact cassette deck) or mini disc player **B**

Analog player **C**

This example shows how to connect the analog player with the PHONO OUT/LINE OUT switch.

"GND" terminal is for a ground wire use.
Set to the PHONO OUT position at the back of the analog player.

Video cassette recorder **D**

- Using 21 pin scart cable **E**

Video disc player **F**

Television set **G**

- Using 21 pin scart cable **H**

Center speaker **I**

■ Using the Dolby Pro-Logic Surround

By combining front, center and surround speakers, you can enjoy the SURROUND mode which conveys a feeling of presence or the 3 STEREO mode which conveys a feeling of orientation.

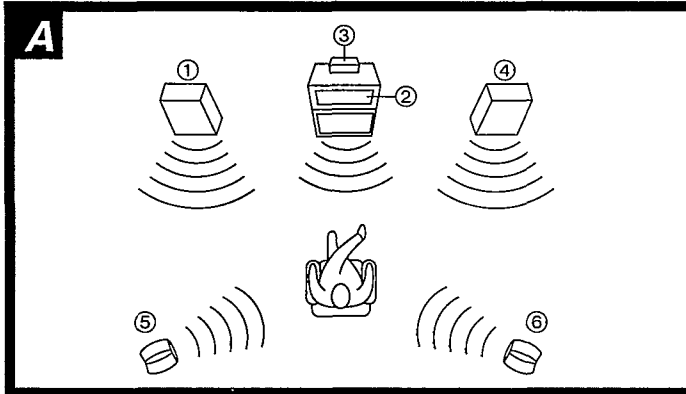

SURROUND

By reproducing the feeling of depth and movement of sound, video software or compact discs recorded with Dolby Surround provide the listener with a feeling of presence like that of a movie theater.

Installation example: A

- ① Front speaker (L)
- ② TV
- ③ Center speaker
- ④ Front speaker (R)
- ⑤ Surround speaker (L)
- ⑥ Surround speaker (R)

To enjoy SURROUND, be sure to connect the surround speakers.

3 STEREO

You can enjoy audio/video sources with clear sound, more presence and a good feeling of orientation. 3 STEREO can be used with sources not recorded in DOLBY SURROUND.

Installation example: B

- ① Front speaker (L)
- ② Center speaker
- ③ Front speaker (R)
- ④ Surround speaker (L)
- ⑤ Surround speaker (R)

To enjoy 3 STEREO, be sure to connect the center speaker.

Setting the center mode G

For Dolby Pro Logic systems, center mode setting is necessary to play back bass sounds effectively.

Set the center mode in accordance with the size of your center speaker.

1 Press PRO LOGIC to turn on the Dolby Pro Logic systems and select the desired mode.

Each time you press the button, the display will change as follows:

SURROUND → 3 STEREO → OFF

2 Press CENTER MODE to select the correct center mode.

Each time you press the button, the display will change as follows:

NORMAL → WIDE → PHANTOM

Note

"PHANTOM" will not be displayed when you select "3 STEREO" in step 1.

NORMAL:

When the center speaker is smaller than the front speakers

WIDE:

When the center speaker is the same or larger size as the front speakers

PHANTOM:

When no center speaker is connected.

Note

In the PHANTOM mode, the sound which would have been sent to the center speaker will be divided equally between both the left and right front speakers.

■ Adjusting Speaker Output Level **A**

In order to reproduce the movement of the sound and its clear orientation, it is important to adjust the output level of each speaker. Adjust output to the correct levels while listening to the test signal.

1 Press **PRO LOGIC** to turn on the Dolby Pro Logic systems and select the desired mode.

2 Press **TEST** to output a test signal.
The test signal is emitted in the following order:

For SURROUND mode

Front speaker (left) → Center speaker

↑ ↓
Surround speakers (left, right) ← Front speaker (right)

Note

The test signal is not emitted from the center speaker when the center mode is on PHANTOM.

For 3 STEREO mode

Front speaker (left) → Center speaker

↑ ←
Front speaker (right)

3 Turn **VOLUME** to set the volume level normally used for enjoying the source.

4 Press **CENTER (-) or (+)** or **SURROUND (-) or (+)** on the remote control to adjust the output level balance.

Adjust the output level of each speaker from the listening position until they are all identical.

Output levels can be varied within a range of ±12 dB with front speaker output level serving as the zero point.

Notes

- The test signal is output only by the speaker you are now adjusting and does not repeat the sequence until adjustments are complete.
- Remember you cannot adjust output level of the surround speakers if you selected the 3 STEREO mode in step 2.

To stop the test signal: **B**

Press **TEST**

■ Adjusting the Delay Time

(When enjoying with SURROUND only)
Adjust the sound from the surround speakers until the proper effect is produced.

1 Press PRO LOGIC to turn on the Dolby Pro Logic systems and select the SURROUND mode.

2 Press DELAY TIME to set to the suitable time.

When the button is pressed, the current delay time is displayed, pressing it again changes the delay time.

Each time the button is pressed, the delay time will increase by 5 ms.

20 ms → 25 ms → 30 ms → 15 ms

To calculate the delay time, refer to the calculation methods.

1

PRO LOGIC

2

DELAY TIME

The standard setting is 20 ms.

D1: Distance from front speakers

D2: Distance from surround speakers

If D1 is equal to or less than D2

Set to 15 ms.

If D2 is less than D1

Start at 15 ms and increase by 5 ms for every 1.5 m of difference between D1 and D2.

■ Enjoying with SURROUND or 3 STEREO

Make sure that you have set the center mode and adjusted speaker output level.

1 Press PRO LOGIC to turn on the Dolby Pro Logic systems and select the desired mode.

2 Select the desired source.

3 Start the desired source.

Note

When employing SURROUND, use software recorded in Dolby Surround.

1

PRO LOGIC

To turn off the Dolby Pro Logic systems:

Press PRO LOGIC to select "OFF".

Manufactured under license from Dolby Laboratories Licensing Corporation.

"Dolby" and the double-D symbol are trademarks of Dolby Laboratories Licensing Corporation.

■ Operation Check and Main Component Replacement Procedures

NOTE

1. This section describes procedures for checking the operation of the major printed circuit boards and replacing the main components.
2. For reassembly after operation checks or replacement, reverse the respective procedures. Special reassembly procedures are described only when required.
3. Select items from the following index when checks or replacement are required.
4. Illustrated screws are equivalent to actual size.
5. Refer the parts No. on the page of "Main Component Replacement Procedures", if necessary.

● Contents

• Checking Procedures for each P.C.B.	Page.
1. Checking for the operation P.C.B.	13.
2. Checking for the main P.C.B.	14.
• Main Component Replacement Procedures	
1. Replacement for the power IC and regulator transistor.	15.

■ Checking Procedure for each P.C.B.

1. Checking for the operation P.C.B.

• Check the operation P.C.B. as shown below.

-  a
- [RHD30007-K1] (Black)
-  b
- [XTBS3+10JFZ1] (Black)
-  c
- [XTBS3+8JFZ1] (Black)

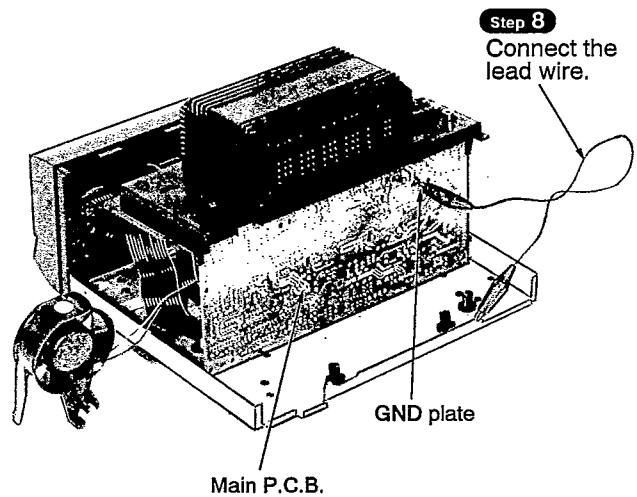

2. Checking for the main P.C.B.

-  **a**
[RHD30007-K1] (Black)
-  **b**
[XTBS3+10JFZ1] (Black)
-  **c**
[XTB3+10JFZ] (Black)
-  **d**
[XTB3+20JFZ] (Black)

Step 3
Remove the cabinet.

• Check the main P.C.B. as shown below.

Main Component Replacement Procedures

1. Replacement for the power IC and regulator transistor

- Follow the item 2 (**Step 1** ~ **Step 7**) checking procedures for each P.C.B..

NOTE

When mounting the power IC or regulator transistor, apply silicone compound (RFKX0002) to the rear side of power IC or regulator transistors.

Power Source ON/OFF of This Unit

- Connect this unit to an AC outlet by the AC power cord. (This unit comes to stand-by mode.)
- Short the test point **TP701** in Fig. 1. This unit comes to power ON mode.

Operation Check

- Set this unit to power ON mode.
- Input a signal (1 kHz, 100mV), and confirm it to be outputted from the speaker terminal.

	INPUT	OUTPUT
Lch	J603 - J308	Lch speaker terminal
Rch	J604 - J308	Rch speaker terminal
Surround	J611 - J308	Surround speaker terminal (To output a signal, both Lch and Rch should be connected.)
Center	J612 - J308	Center speaker terminal

Replacement Parts List

Notes: *Important safety notice:

 Components identified by Δ mark have special characteristics important for safety

Furthermore, special parts which have purposes of fire-retardant (resistors) high-quality sound (capacitors), low-noise (resistors), etc. are used.

When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list

*The parenthesized indications in the Remarks columns specify the areas. (Refer to the cover page for area)

Parts without these indications can be used for all areas

*Remote Control Assy Supply period for three years from termination of product on.

*The (SF) mark denotes the standard part.

*<VRD> indicates parts that are supplied by Video Recorder Division

Replacement Parts List

Notes: *Important safety notice:

 Components identified by Δ mark have special characteristics important for safety

Furthermore, special parts which have purposes of fire-retardant (resistors) high-quality sound (capacitors), low-noise (resistors), etc. are used.

When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list

*The parenthesized indications in the Remarks columns specify the areas. (Refer to the cover page for area)

Parts without these indications can be used for all areas

*Remote Control Assy Supply period for three years from termination of product on.

*The (SF) mark denotes the standard part.

*<VRD> indicates parts that are supplied by Video Recorder Division
