LOCATION OF CONTROLS

* [XA] area is provided with AC outlet.

• Switches

Equalization switch (EQ)

This switch can be used to turn the equalization circuitry on and off.

on: Set to this position for equalizer correction.

off: Set to this position to turn off equalizer correction. By turning this switch on and off, the equalizer effect can also be checked. When this switch is in the "off" position, signals will still pass through the unit and be emitted, regardless of whether the power switch is in the "on" or "off" position.

Tape-monitor selector (tape monitor)

source: Set to this position to listen to the radio or a disc.

tape: Set to this position to listen to a tape deck.

Note:

If the equalization-position selector is set to the "source" position and the equalization switch is set to the "on" position, the frequency response of the radio, disc and tape deck can be controlled.

Equalization-position selector (EQ position)

source: Set to this position to record without equalizer correction.

rec out: Set to this position in order to make a tape recording of a radio broadcast or a disc while controlling the frequency response. Also, compensated playback sound can be heard at this position.

Note:

The equalization switch must be set to the "on" position, otherwise the frequency response cannot be controlled.

DISASSEMBLY INSTRUCTIONS

How to remove the front panel

1. Remove setscrews ① ~ ⑨ in Fig. 1 to remove the cabinet.
2. Remove 5 setscrews of the front panel (Fig. 1).
3. Pull out the connectors J3 and J4 from the switch printed circuit board on the left side.
4. Remove the front panel with care not to damage the knob.

How to remove the bottom board

1. Remove 9 setscrews as in Fig. 2 and remove the bottom board.

Fig. 1

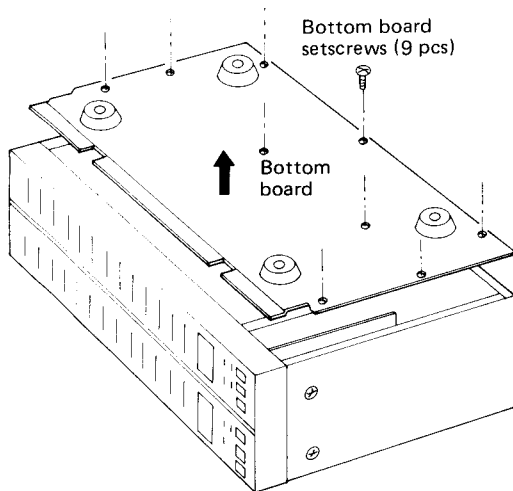

Fig. 2

How to remove the slide volume

1. Remove the cabinet and front panel.
2. Pull out the 33 knobs of the right and left channels, totalling 66 knobs.
3. Remove the 2 setscrews of the ornament panel as in Fig. 3.
4. Press the claws at the top of the ornament panel (A and B) illustrated in order to remove the ornament panel. (Remove the remaining two ornament panels in the same way.)
5. Remove 18 slide volume setscrews to catch the slide volume from the chassis together with the printed circuit board.

How to attach the knobs

Insert the top (left channel) volume lever into the lower hole of the knob, and the bottom (right channel) lever into the upper hole, as shown in Fig. 4.
