

THORENS
 TD 121 and
 TD 124 Transcription Turntable
 Mounting template (full size)
 CB. 935

Recommend

1. Place this template in the proper position on the turntable with tape strips. If you cut the template along the outline of unit plate, it may ease the location on the turntable.
2. Mark the center of the turntable with a pencil.
3. Mark along the cut-out line of panel cut-out.
4. Remove the turntable and cut out the panel.
5. See cut view for the assembly of rubber dampers and leveling devices. Allow 3" space below top of turntable.

Notice. It is advisable to check the distance between the lengths indicated on the template. This may prevent actual shrinkage of the template.

The use of washers and nuts M 5 VSM 12707 is optional. These should be ordered from...

Procedure for installation
