

THORENS

THORENS *New-Line.*

We are proud to introduce our all new line of turntables to you. The new models are designed and built to meet the requirements of the actual and future markets. To be useable in every country and under every power condition all models have a fully regulated motorelectronic where also speed is selected. Every model is belt driven by a synchronius motor. They are equipped with Rega tonearms and can be used with other tonearms up to 10 inch versions also.
