

# **TOSHIBA**

STEREO AMPLIFIER

# **SB-A25**

## **SPECIFICATIONS**

### **■ General**

Power supply:

220V – 50 Hz for Europe  
240V – 50 Hz for United Kingdom and Australia  
115V/230V – 50 Hz/60 Hz for Middle East, Asia and South America

Power consumption:

240W

Weight:

4.9 kg

Dimensions:

420(W) x 109(H) x 286(D)  
mm

### **■ Amplifier**

Continuous power output 40 Hz ~

25W x 2 (4Ω), 25W x 2 (8Ω)  
28W x 2 (4Ω), 28W x 2 (8Ω)

20 kHz both ch. driven:

1 kHz both ch. driven:

Total harmonic distortion:

0.1% (at rated power 8Ω)

Frequency response:

28 Hz ~ 50 kHz ( $\pm 3$  dB)

Load impedance:

4Ω ~ 16Ω

Damping factor:

25

S/N (IHF a Network):

92 dB (TUNER/AUX)

72 dB (PHONO)

Input sensitivity/-

impedance:

PHONO 2.5mV/47KΩ

TUNER 150mV/47KΩ

AUX/TAPE 150mV/47KΩ

MIC 0.5mV/47KΩ

Output level:

TAPE REC 150mV

Tone control:

BASS (at 100 Hz)  $\pm 8$  dB

Phono overload level:

TREBLE (at 10 kHz)  $\pm 8$  dB

120mV

# 1. OPERATING

(The photographs are shown from the front and rear.)

**(1) Loudness Switch**

Depress this switch ON when listening at very low volume levels (between 0 and 5 on the volume scale) to emphasize the low and high frequency regions.

**(2) Peak Power Meters**

These meters indicate the peak (instantaneous) power output levels when using 8 ohm speakers. For 4 ohm speakers, multiply the indicated readings by 2 to obtain approximate values.

**(3) Power Switch**

Depress this switch to turn on power, depress again to turn power off.

**(4) Phones**

Plug into this jack when listening through headphones. If headphones are connected to this jack, the sound from the speakers is cut off.

**(5) Tone Controls**

Turn these knobs clockwise from the centre zero (flat) position to emphasize bass or treble tones. Turn counterclockwise to attenuate (decrease) bass or treble tones.

**(6) Balance Control**

Turn this knob to adjust volume balance between left and right speakers.

REAR

# CONTROLS

(Graphs are ones of Europe Model)

## FRONT VIEW

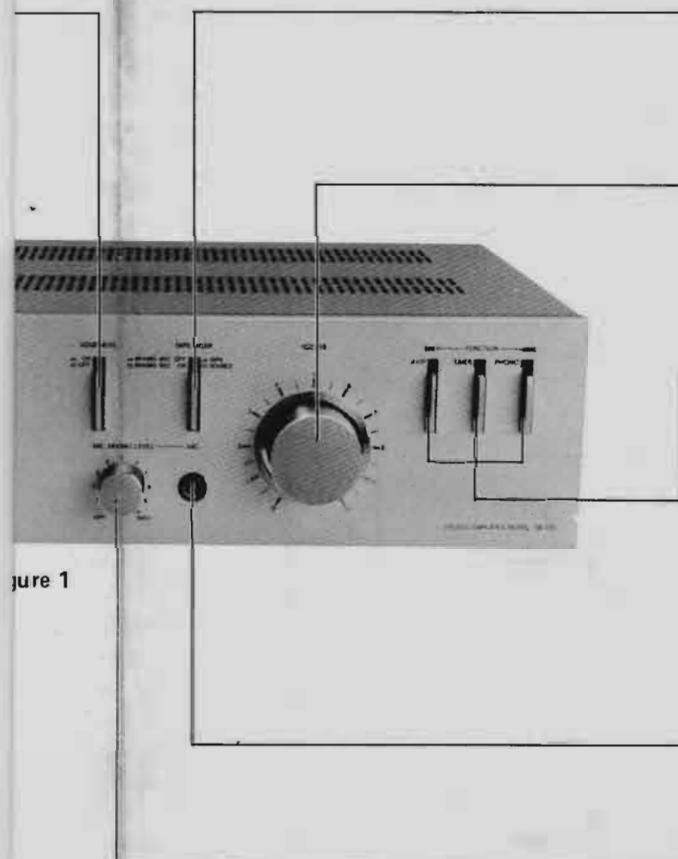

Figure 1

### (11) Tape Mode Switch

Depress this switch to the relevant settings for tape playback or other sources.

### (12) Volume

Turn this knob to adjust the volume level.

### (13) Function Selector

AUX: For use with any kind of audio equipment (excluding turntables and microphones)  
PHONO: For listening to records on the turntable  
TUNER: For listening to radio broadcasts

### (14) Mic Jack

Plug in microphone plug to this jack when using mics.

### (15) Mic Mixing Volume

Turn this knob to adjust mic volume level. When mixing sound from mic with other sources, the mic volume can be adjusted independently of the main volume level. Turn this volume knob OFF when not in use to prevent the pick-up of extraneous sounds and the loss of stereo separation.

## REAR VIEW

### (17) Voltage Selector Switch

### (18) Power Cord

## 2. SYSTEM CONNECTIONS

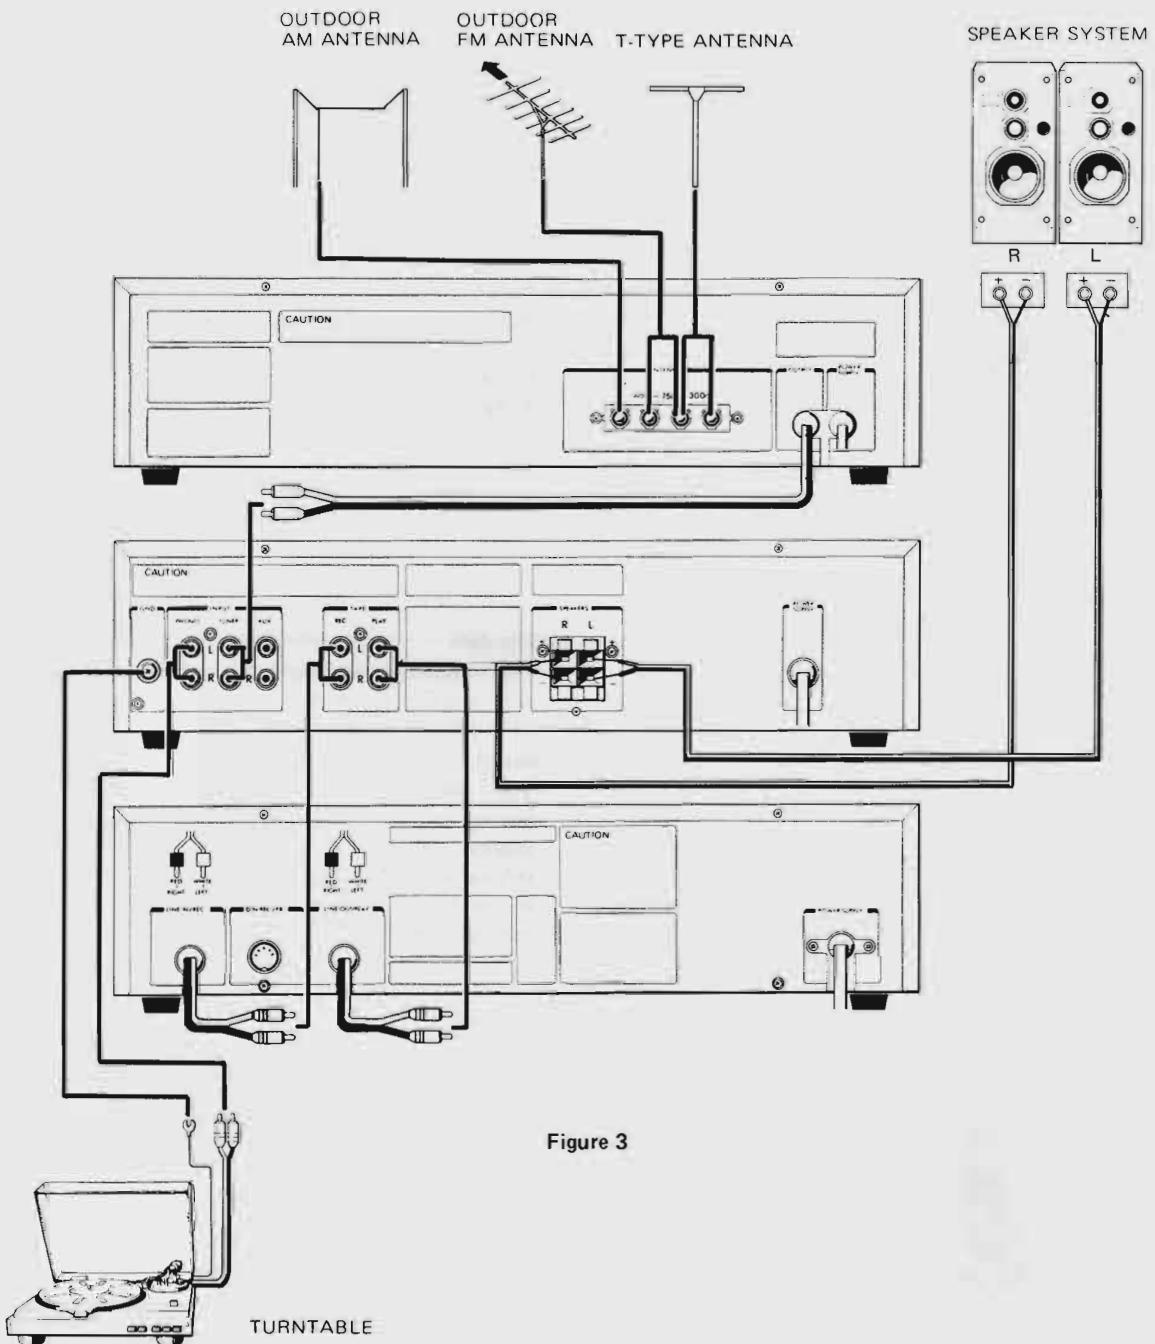

Figure 3

### 3. OPERATION

#### Connections of Speakers to the Amplifier

Connect the right speaker cord to the "R" amplifier speaker output terminal and the left speaker cord to the "L" terminal. Be sure to connect the plus terminal of the speaker to the plus terminal of the amplifier speaker output terminal and minus to minus. Wrong connection of plus and minus causes the loss of stereophonic playback sound.

- Be sure to leave the power switch of the amplifier OFF while performing connections.
- Don't short-circuit the plus and minus terminals of the speakers.

**Note:** When using a pair of speakers, use only those with an impedance of at least 4 ohms to avoid overloading the amplifier.

- Confirm that the volume knob is in the 0 position before the power is turned on.

#### To Play Phonograph Records

Connect the output cables from the turntable to the PHONO terminals of the amplifier. If the turntable is equipped with an earth wire or terminal, be sure to connect it to the earth wire terminal (GND) of the amplifier, if this simple task is overlooked, it may result in the generation of a hum.

#### To Listen to Radio Broadcast

Connect the tuner output cables to the TUNER input terminals on the rear panel of the amplifier.

There is no special need to link the tuner and amplifier with an earth wire.

#### To Use the AUX Terminals

When an audio component is connected to the AUX terminals, place the FUNCTION Selector in the AUX position. Operate the connected component according to its instruction manual. Finally, adjust the volume and tone as desired.

#### Using a tape deck

Connect the tape deck input terminals (LINE IN) to the amplifier record terminals (REC), and the tape deck output terminals (LINE OUT) to the amplifier playback (PLAY) terminals.

#### (1) To record on tape

Prepare the program source (turntable, tuner, etc.) to be recorded, and set up the tape deck to record following the tape deck instruction manual. Note that while recording, the amplifier volume and tone controls will have no effect on the recording level or tone.

#### (2) To Playback tapes

Place the tape mode switch to the TAPE position, and follow the instructions for tape playback in the tape deck instruction manual.

#### Mic mixing and mic mixing recording

This set is designed to permit direct mic mixing with tuner, turntable, or other audio sources, and mic mixing recording.

**Note:** Always remember to turn the mic volume level to the MIN position before unplugging the microphone.

#### (1) Mic mxing

Insert the microphone plug into the mic jack (14) and prepare the source for play. For mic mixing with records, place the Function switch (13) to the PHONO position, or if using a tuner or a component connected to the AUX terminal, place this switch on TUNER or AUX. Depress "SOURCE" MIX REC. With the controls thus set, turn Volume (12) to the proper level, then turn the Mic mixing level (15) to the right until the mic volume is balanced with that of the source. For mic mixing with tapes, depress the "TAPE" MIX REC button, then the procedure is the same as noted above.

#### (2) MIC mixing recording

The mic mixing described in the procedure above using a source connected to PHONO, TUNER, or AUX may be recorded by the tape deck by merely operating the tape deck in the recording mode. Mic mixing using a tape deck as a source cannot be recorded onto another tape.

#### Tape Monitoring

When recording with a tape deck equipped with proper tape monitoring facilities, monitoring of the recording is possible by moving the TAPE MODE switch from the SOURCE position to the corresponding TAPE position.

## 4. DISASSEMBLY INSTRUCTIONS

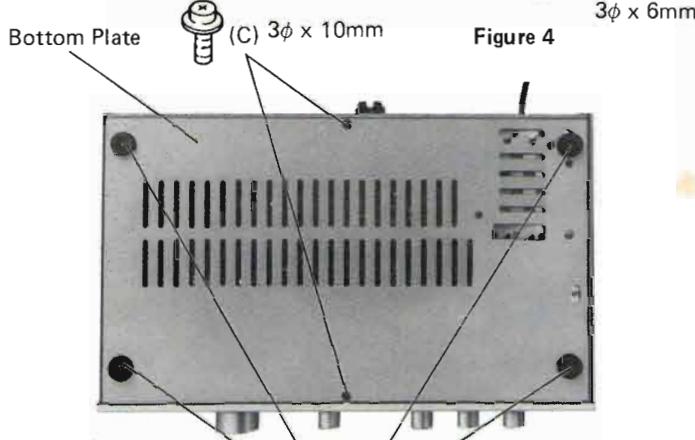

### TOP COVER REMOVAL

1. Remove four screws (A) ( $3\phi \times 6\text{mm}$ ) from each side of the top cover as shown in Figure 4.
2. Remove two screws (B) ( $3\phi \times 6\text{mm}$ ) from back side of the top cover. Then, the top cover can be removed from the unit as shown in Figure 4.

### BOTTOM PLATE REMOVAL

1. Remove two screws (C) ( $3\phi \times 10\text{mm}$ ) holding the bottom plate as shown in Figure 5.
2. Remove four screws (D) ( $3\phi \times 12\text{mm}$ ) holding the legs on the bottom plate. Then, the bottom plate can be removed from the unit, and the P.C. Board can be checked easily as shown in Figure 5.

### FRONT PANEL REMOVAL

1. Remove five knobs (E) as shown in Figure 6.
2. Remove the hexagon nut holding the Volume Ring under the Volume knob.

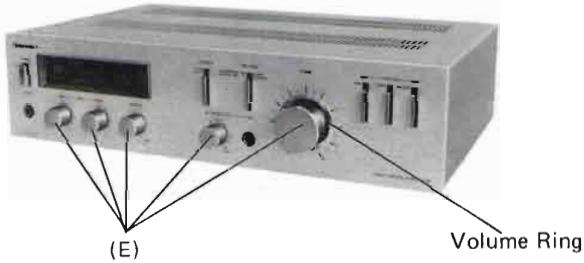

Figure 6

3. Remove four screws (F) ( $3\phi \times 8\text{mm}$ ) and one screw (G) ( $3\phi \times 12\text{mm}$ ) holding the P.C. Board as shown in Figure 7.
4. Remove four screws (H) ( $3\phi \times 8\text{mm}$ ) of the side panel plate holding the side plate as shown in Figure 8 and 9.
5. Remove the P.C. Board and the other installed in the panel. Then, the panel can be removed from the unit.

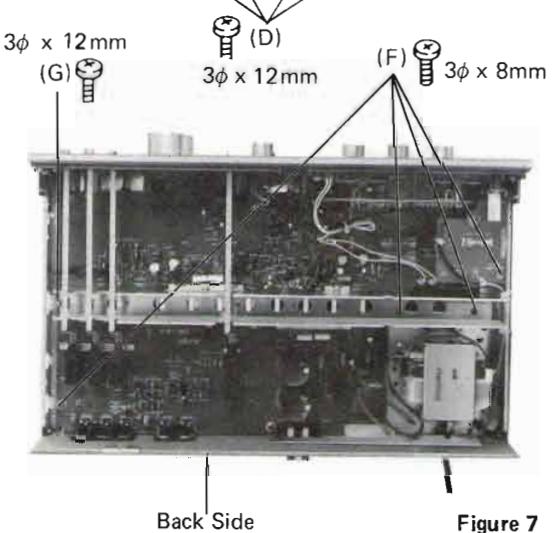

Figure 7

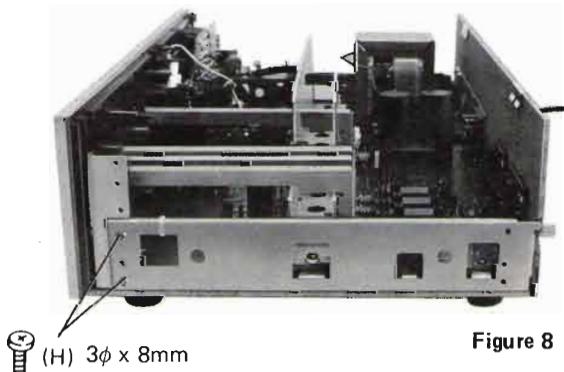

Figure 8

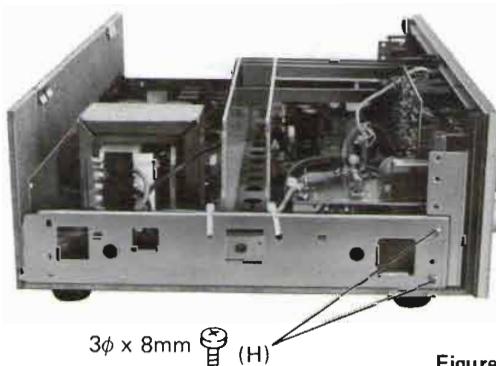

Figure 9

## 5. ADJUSTMENTS

### IDLE CURRENT ADJUSTMENT

1. Idle current adjustment can easily be done by setting the semi-fixed VR R650 (Rch), R649 (Lch) (300 ohm) to mechanical mid point VR as shown in Figure 10.
2. The idle current between TP and TP must be less than 30mA when power has been on for 30 seconds.

△ R625, 626	22500290	100 ohm, Fusible
R627, 628	22555471	470 ohm
R631, 632	22555561	5.6 ohm
R633, 634	22555561	5.6 ohm

Symbol No.	Part No.	Description
△ R635, 636	22500150	68 ohm, Fusible
△ R637, 638	22500150	68 ohm, Fusible
△ R639, 640	22500189	0.47 ohm, 2W
△ R641, 642	22500189	0.47 ohm, 2W
△ R643, 644	22500286	47 ohm, Fusible
△ R645, 646	22570250	10 ohm, 1W, Metal Film
R647, 648	22555221	220 ohm
R649, 650	22658500	300 ohm, B, Semi-fixed
R651, 652	22555821	8.2K ohm
R653	22620017	100K ohm, C, Variable
R654	22620017	100K ohm, C, Variable
R655, 656	22500122	1.2K ohm
R657, 658	22555182	1.8K ohm
R659, 660	22555471	470 ohm
△ R661, 662	22570267	270 ohm, 1W, Metal Oxied Film
R701, 702	22555102	1K ohm
R703, 704	22555101	100 ohm
R705, 706	22555474	470K ohm
R707, 708	22555822	8.2K ohm
R709, 710	22555183	18K ohm
R711, 712	22555183	18K ohm
R713, 714	22555103	10K ohm
R715, 716	22555822	8.2K ohm
R717, 718	22555222	22K ohm
R719, 720	22555681	680 ohm
R721, 722	22555681	680 ohm
R723, 724	22555681	680 ohm
R725, 726	22555681	680 ohm
R727, 728	22555681	680 ohm
R729, 730	22555102	1K ohm
R901, 902	22555103	10K ohm
△ R903, 904	22570273	820 ohm, 1W, Metal Oxied Film
△ R905	22570272	680 ohm, 1W, Metal Oxied Film
R906	22547101	100 ohm, 1/2W
R909	22545152	1.5K ohm
R910	22570278	2.2K ohm,1W, Metal Oxied Film
△ R911	22500171	6.8 ohm, Fusible
R912	22555102	1K ohm
△ R913	22500169	4.7 ohm, Fusible
<b>ACCESSORIES</b>		
AC01	22902988	Owner's Manual(TE, TU, AY)
AC01	22902993	Owner's Manual (VF)
AC02	22167658	AC Adapter (VF)
