

# YAMAHA T-7 FM/AM TUNER

## SCHEMATIC DIAGRAM

PARTIAL CHANGES MADE ACCORDING TO DESTINATION	R, U, C	A, B, G
C145, C146	0.015	0.01
R1	200	RP Inductor <math>\le 50k\Omega</math>

\* All voltages measured with a 10M $\Omega$ /V DC electric volt meter, under no signal condition.  
 FUNCTION  $\rightarrow$  FM  
 RX MODE  $\rightarrow$  AUTO DX (at local position)  
 BLEND  $\rightarrow$  AUTO  
 REC CAL  $\rightarrow$  OFF

The voltages are measured at FM reception mode. The voltages ( ) are at detuned mode, but the voltages at IC109, 110 are at AM reception mode.

\* Schematic Diagram is subject to change without notice.
