### The CR100 complies with Part 15 of the FCC rules

This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide a reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by

turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The CR100 is a sophisticated 'universal' remote control that can control up to eight devices.

- The CR100 is preprogrammed for use with Arcam products (Solo Movie, amplifiers, multi-channel sound processors, CD players and DVD players) within range.

SEE PAGES 8-15

- The CR100 can control your complete home entertainment system. With its extensive built-in library of codes, the CR100 can be used with thousands of third-party TVs, satellite decoders, set-top boxes, VCRs and CD players.

SEE PAGES 6, 21

- The CR100 can 'learn' almost any function from an old single-device remote.

SEE PAGE 16

- You can customise the CR100 to suit, and program it to issue a sequence of commands (a 'Macro') at a single key press.

SEE PAGES 16, 19

The CR100 is supplied with several Arcam products. For specific information on how to use the CR100 to control the product it was supplied with, please refer to that product's manual.

### Device Mode keys

The Device Mode keys (shown below) select the source on your amplifier, preamplifier or receiver. These keys also change the functionality of the remote control. It's like having eight different remotes in your hand!

If you press and hold a Device Mode key, you change the Device Mode *without* changing the signal source.

Each Device Mode changes the behaviour of many of the CR100 keys to control the source appropriately (see pages 8-15). For example:

- In **CD** mode the **M** key plays the previous CD track
- In **AV** mode the **M** key issues the TV 'Channel Down' command.

### Navigation keys

The Navigation keys steer the cursor in setup menus or on-screen menus. They also replicate the navigation

functions of original

remotes supplied with other home entertainment devices in your system. **OK** confirms a setting.

# Getting started

Here's how to get the most out of your CR100 universal remote:

## Insert the batteries

- Follow the instructions on the facing page to insert four AAA alkaline batteries.

## Get to know the CR100 by using it with your Arcam equipment

- Familiarise yourself with the CR100 by using it with the Arcam components in your system. Refer to the relevant Arcam Handbook.

## Set up the CR100 to control your other audio-visual components

- Use the methods described on pages 6 and 7 to use your CR100 to control the third-party devices in your home entertainment system.

## Customise the CR100

- Use the methods described in 'Customising the CR100' (pages 16–19) to make the CR100 work in exactly the way you want: Control volume intelligently, switch multiple devices on and off with a single key press, and much more.

## Useful information

When reading this manual keep the following information in mind, as it will help you understand the operation of the CR100.

### Backlight

- A blue backlight comes on for five seconds whenever a key is pressed. This helps you use the handset in subdued lighting conditions.

### Power LED 'blinks'

- Short blinks indicate a valid key press.
- Multiple short blinks convey information (such as a device code) or signal the beginning and successful completion of a programming sequence.
- Long blinks indicate an invalid key press or entry.
- The symbol  is used in the manual to indicate a Power LED blink.

### Timeouts and unassigned keys

- Time Out – After 10 seconds the CR100 exits the programming state and returns to normal operation.
- Stuck Key Timeout – After any key is pressed continuously for 30 seconds, the CR100 stops sending IR transmission to conserve battery life. The CR100 remains off until all keys are released.
- Unassigned Keys – The CR100 control ignores any unassigned key presses for a particular mode and does not transmit IR.

## Inserting batteries

1. Open the battery compartment by pressing the button on the back of the handset.

2. Insert four AAA batteries into the battery compartment: two with '+' facing the top of the handset, and two with '+' facing the end cap, as in the diagram.
3. Lower the end cap onto the plastic locating plate in the handset. This acts as a hinge, and you can now push the end cap firmly into its locked position with a click.

## Low voltage indicator

When the batteries are running down, the IR transmit indicator on the CR100 (the LED surrounding the Power button) flashes five times whenever you press a button.

If this happens, please fit four new AAA alkaline batteries as soon as possible.

## Maintaining reliability

Please keep in mind the following when using the CR100:

- Make sure there are no obstacles between the remote control and the remote sensors on any devices you're controlling. The CR100 has a range of about seven meters. (If a unit's remote sensor is obscured, you may be able to use a remote control input jack on the rear panel – contact your dealer for further information.)
- As with any IR remote, operation may become unreliable if strong sunlight or strong fluorescent light is shining on a front panel remote sensor.

# Controlling other devices: Method 1 (Direct code setup)

This section describes the simplest (preferred) way to program the CR100's Device Mode keys to control the non-Arcam devices in your system.

- Some of the modes are locked to Arcam operation but can be unlocked if required (see page 18).
-  mode **only** controls Arcam equipment.

DVD mode	Locked
SAT mode	Unlocked
AV mode	Unlocked
TUN mode	Locked
AUX mode	Locked
VCR mode	Unlocked
CD mode	Locked

## Example: To set up the CR100 for an Addison TV

Here is a specific example of how to program the  key to control an Addison television. The principles for controlling other devices are exactly the same.

1. Make sure your device is switched on (not just on 'stand-by').
2. Find the correct Device Code table (e.g. TV) for the type of device you want to control from the CR100.
3. Find the row containing the codes for the manufacturer of your device (e.g. Addison) (page 21). The most popular code is listed first.
4. Press the appropriate Device Mode key (e.g. ) on the CR100.
5. Press and hold  until the red Power LED blinks twice:  (It actually blinks once when you press the key, then twice after about three seconds).

6. Enter the first four-digit device code using the number keys. The device key (e.g. ) blinks twice: .
7. Aim the CR100 at the device and press . If the device switches off, the setup is complete.
8. Turn your device back on and test all the CR100's functions to ensure they are working properly.
9. **Important!** Write your device code down on the next page so you can remember it if you ever reset the CR100.

## What if I still can't control my device?

- If your device doesn't respond, repeat the above steps until one of the device codes listed for your brand works.
- If none of the codes listed for your brand operates your device, or if your brand is not listed at all, try the Library Search Method described in the next section.

### Notes:

- Some codes are quite similar. If your device does not respond or is not functioning properly with one of the codes, try another code listed under your brand.
- If your device's original remote control does not have a  (POWER) key, press  instead of  when setting up your device.
- Remember to press the corresponding device key before operating your device.
- Many TVs do not switch on pressing . Please try pressing a number key ('channel select') to switch your TV back on.
- To search for the code for another device follow the instructions above, but press the appropriate device key instead of  during step 2.

# Controlling other devices: Method 2 (Library search)

This section describes another way to program the CR100 to control third-party equipment.

Library Search allows you to scan through all the codes contained in the CR100's memory. It can take a lot longer than the previous method, so only use this method if:

- Your device does not respond to the CR100 after you have tried all the codes listed for your brand.
- Your brand is not listed at all in the Device Code tables.

## Example: To search for a TV code

1. Switch your TV on (not stand-by) and aim the CR100 at it.
2. Press **AV** on your CR100.
3. Press and hold **SHIFT** until the power LED blinks twice.
3. Press **9 9 1**. The power LED key blinks twice: 
5. Press **POWER**.
6. Aim the CR100 at your Television and press **MEM** repeatedly until your Television turns off.

Every time you press **MEM** the CR100 sends out a POWER signal from the next code contained in its memory. In the worst case, you may have to press this key up to 150 times, so patience is required! If you skip past a code, step back by pressing **MEM**. Remember to keep pointing the CR100 at your Television while pressing this key.

7. As soon as your television turns off, press **SHIFT** to store the code.

## Notes:

- Many TVs do not switch on pressing **POWER**. Please try pressing a number key ('channel select') to switch your TV back on.
- If you cannot control your Television properly, please continue the Search Method, you may be using the wrong code.
- To search for the code for another device follow the instructions above, but press the appropriate

Device Mode key instead of **AV** during step 2.

- If your device's original remote control does not have a **POWER** key, press **▶** instead during step 5.

## Code blink-back

Once you have set up your CR100, you can blink back your device set-up codes for future reference.

### Example: To blink back your Television code

1. Press the appropriate Device Mode key (e.g. **AV**) once.
2. Press and hold **SHIFT** until the red Power LED blinks twice  (It actually blinks once when you press the key, then twice after about three seconds).
3. Press **9 9 0**. The **POWER** key blinks twice.
4. For the first digit of your four-digit code, press **1** and count all the red blinks. If there are no blinks, the digit is '0'.
5. For the second, third and fourth digits, repeat the previous step, pressing **2**, **3**, or **4** as appropriate.

Now you have the four-digit code.

### Make a note of the codes

Write down the codes for your devices in the boxes below for future reference.

Device	Code

# Device Mode key functions

## DVD mode

	Toggles power between stand-by and on		Starts the playback of a DVD. <b>SHIFT</b> followed by  cycles Angle options on Arcam DVD player
	Searches for and plays the track corresponding to the key pressed		Pauses DVD play-back. Press  to restart playback
	Selects Tape input on amplifier		Fast forward <b>SHIFT</b> +  cycles through slow forward play modes
	Toggles random ('shuffle') play on and off		Ejects disc
	Modifies many keys (see individual key descriptions, below)		Stop playback of a DVD
	Selects multichannel (MCH) input on amplifier		Start recording (on products that have this feature)
	Cycles through repeat options (track, disc, etc.) <b>SHIFT</b> + <b>RPT</b> gives RPT A-B functionality.		Displays Search menu with Title, Track and Time options. <b>SHIFT</b> + <b>TRIM</b> displays Trim menu on Arcam DVD players
	Navigate setup and DVD programme selection menus. <b>OK</b> confirms a selection. <b>SHIFT</b> to Power on <b>SHIFT</b> to Power off		Displays Setup menu. <b>SHIFT</b> + <b>SETUP</b> displays programming screen on Arcam DVD players
	Confirms a setting ('Enter' or 'Select' on some remotes)		Displays Title menu. <b>SHIFT</b> + <b>TITLE</b> clears bookmark, search and program display entries on Arcam DVD players
	Cycles through available surround sound modes. <b>SHIFT</b> + <b>MODE</b> changes the HDMI setting.		Changes Audio decode format (Dolby digital, DTS, etc.) <b>SHIFT</b> + <b>AUDIO</b> displays the 'Mem' function (Bookmarks).
	Activates DVD menu if available		Cycles through DVD subtitle language options, if available <b>SHIFT</b> + <b>INFO</b> displays STATUS on Arcam DVD players
	Cycles through the front panel display's brightness options (dim to bright, off)		
	Toggles the mute function, if available. By default this key always operates the AMP Mute		
	Press and release to skip back to the beginning of the current/previous track.		
	Press and release to skip forwards to the beginning of the next track.		
	Decrease (-) and increase (+) amplifier volume		
	Fast rewind <b>SHIFT</b> +  cycles through slow playback speeds		

## SAT mode

	Toggles power between stand-by and on
	Functions as original remote number key.
	Selects Tape input on amplifier
	Toggles between the available inputs
	Modifies many keys (see individual key descriptions, below)
	Selects multichannel (MCH) input on amplifier
	(not used)
	Navigate setup menus. <b>OK</b> confirms a selection
	Confirms a setting (equivalent to 'Enter' or 'Select' on some remotes)
	Controls BACKUP function, if available.
	Performs same function as on original remote, if available.
	On some Satellite and Cable set top boxes this key functions as the Guide key to open the EPG (Electronic Program Guide).
	Toggles the mute function, if available. By default this key always operates the AMP Mute
	Channel down
	Channel up.
	Decrease (-) and increase (+) amplifier volume
	Fast rewind
	Starts the playback
	Toggles pause of playback

	Fast forward
	(not used)
	Stop playback
	Start recording
	(not used)
	Duplicates function of <b>RED</b> key for some Satellite and Cable set-top boxes
	Duplicates function of <b>GREEN</b> key for some Satellite and Cable set-top boxes
	Duplicates function of <b>YELLOW</b> key for some Satellite and Cable set-top boxes
	Duplicates function of <b>BLUE</b> key for some Satellite and Cable set-top boxes

## AV (i.e. TV) mode AV

	Toggles power between stand-by and on. (Some TVs require you to use a number key to turn them on.)		Activates PIP swap, if available
	Functions as original remote number key – usually for channel selection.		Activates PIP freeze, if available
	Selects Tape input on amplifier		Activates PIP channel up, if available
	Toggles between the available inputs (e.g. TV/AV)		Activates PIP channel down, if available
	Modifies many keys (see individual key descriptions, below)		Duplicates function of <b>RED</b> key for Text TV
	Selects multichannel (MCH) input on amplifier		Duplicates function of <b>GREEN</b> key for Text TV
	(not used)		Duplicates function of <b>YELLOW</b> key for Text TV
	Navigate setup and programme selection menus. <b>OK</b> confirms a selection.		Duplicates function of <b>BLUE</b> key for Text TV
	Confirms a setting (equivalent to 'Enter' or 'Select' on some remotes)		
	<b>EXIT</b> function on some models.		
	Functions as original remote key, if available.		
	INFO or OSD function, if available.		
	Toggles the mute function, if available. By default this key always operates the AMP Mute		
	Channel down		
	Channel up		
	Decrease (-) and increase (+) amplifier volume		
	Toggles TEXT page on/off		
	TEXT page off		
	Turns Programme-In-Programme (PIP) on, if available		
	Activates PIP move, if available		

## TUN mode

	Toggles power between stand-by and on.
to	Functions as original remote number key.
	Selects Tape input on amplifier
	Selects FM band
	Modifies many keys (see individual key descriptions, below)
	Selects multichannel (MCH) input on amplifier
	Selects AM band
	Navigate setup and programme selection menus. <b>OK</b> confirms a selection. <b>SHIFT</b> to Power on <b>SHIFT</b> to Power off
	Confirms a setting (equivalent to 'Enter' or 'Select' on some remotes)
	Cycles through different frequency bands.
	Functions as original remote key, if available
	Cycles through the front panel display's brightness options (dim to bright, off)
	Toggles the mute function, if available. By default this key always operates the AMP Mute.
	Sends Preset Down command
	Sends Preset Up command
	Decrease (-) and increase (+) amplifier volume
	Fast rewind (DAB rewind radio)
	Play (DAB rewind radio)
	Toggles pause of playback (DAB rewind radio)
	Fast forward (DAB rewind radio)

	Selects FM band on the DAB tuner
	Stops playback (DAB rewind radio)
	Start recording (DAB rewind radio)
	Selects DAB band on the DAB tuner
	Toggles FM tuner mode between FM Mute mode and Mono mode on Arcam Receivers and Tuners.
	Toggles between Preset and Tune mode on Arcam Receivers and Tuners.
	Stores tuner preset on Arcam Receivers and Tuners.
	Cycles through RDS radio display modes for Arcam Receiver and Tuners.

# AMP mode

	Toggles power between stand-by and on.
to	<ol style="list-style-type: none"> <li>1 DVD input</li> <li>2 CD player input</li> <li>3 AV (television sound input)</li> <li>4 AUX Auxiliary line input</li> <li>5 VCR Video Cassette Recorder input</li> <li>6 SAT Satellite decoder input</li> <li>7 TUN DAB/FM/AM tuner input</li> <li>8 Phono input, if available</li> </ol>
	Selects Tape input on amplifier
	Selects FM band on Tuner
	Modifies many keys (see individual key descriptions, below)
	Selects multichannel (MCH) input on amplifier
	Selects AM band
	<p>Navigate the menus on Arcam surround amplifiers. <b>OK</b> confirms a selection.</p> <p><b>SHIFT</b>  to Power on</p> <p><b>SHIFT</b>  to Power off</p> <p><b>SHIFT</b>  to switch Zone 2 on, if available.</p> <p><b>SHIFT</b>  to switch Zone 2 off, if available.</p>
	Confirms a setting (equivalent to 'Enter' or 'Select' on some remotes)
	Changes Audio mode
	Activates the main menu on Arcam amplifier.
	Cycles through Display panel brightness options (dim to bright, off)
	<p>Toggles the mute function, if available.</p> <p>By default this key always operates the AMP Mute</p>

	Sends Preset Down command
	Sends Preset Up command
	Decrease (-) and increase (+) amplifier volume
	Toggles Direct mode
	Toggles EQ on/off on Arcam surround amplifiers with room EQ function
	Cycles through available THX modes on Arcam surround amplifiers with THX function
	Cycles through stereo effects on Arcam surround amplifiers
	Restores current Favourite Preset on Arcam surround amplifiers, if available
	Displays lip sync adjustment menu on Arcam surround amplifiers
	Displays subwoofer adjustment menu on Arcam surround amplifiers
	Displays trim levels menu on Arcam surround amplifiers
	Toggles between FM/Mono-Stereo/Mute on AVR
	Toggles between Tune and Preset mode on AVR
	Stores tuner preset on AVR
	Cycles through RDS Info options on AVR

## AUX mode

	Toggles power between stand-by and on.
to	Functions as original remote number key.
	Selects Tape input on amplifier
	(not used)
	Modifies many keys (see individual key descriptions, below)
	Selects multichannel (MCH) input on amplifier
	(not used)
	Navigate setup and programme selection menus. <b>OK</b> confirms a selection.
	Confirms a setting (equivalent to 'Enter' or 'Select' on some remotes)

Behaviour of all other CR100 keys in AUX mode depends on the type of auxiliary device. Refer to the appropriate table for the device.

By default, AUX mode has been set up for future ARCAM products.

The AUX control page can be assigned for use with a DVD or VCR player using the following method:

1. Unlock the code page (this is described on page 18 – 'Locking/Unlocking a specific device mode').
2. The functions of AUX mode can now be replaced by those of a DVD or VCR by changing the four-figure device code (this is also explained on page 18 – 'Mode Mover').
3. Now lock the mode so the new settings are not changed inadvertently.

## VCR mode

	Toggles power between stand-by and on.
	Functions as original remote number key.
	Selects Tape input on amplifier
	Toggles between available inputs (e.g. AV1, AV2)
	Modifies many keys (see individual key descriptions, below)
	Selects multichannel (MCH) input on amplifier
	(not used)
	Navigate setup and programme selection menus. <b>OK</b> confirms a selection.
	Confirms a setting (equivalent to 'Enter' or 'Select' on some remotes)
	Operates the Exit function if the VCR uses this feature
	Turns on the Menu function if the VCR uses this feature
	Toggles display between TV and VCR
	Toggles the mute function, if available. By default this key always operates the AMP Mute
	Channel down
	Channel up.
	Decrease (-) and increase (+) amplifier volume
	Fast rewind
	Play
	Toggles pause of playback
	Fast forward

	Ejects tape
	Stop playback
	Starts recording
	Displays Search menu, if available
	Red selection button (if used)
	Green selection button (if used)
	Yellow selection button (if used)
	Blue selection button (if used)

## CD mode

	Toggles power between stand-by and on.
	Functions as original remote number key.
	Selects Tape input on amplifier
	Toggles random ('shuffle') play on and off
	Modifies many keys (see individual key descriptions, below)
	Selects multichannel (MCH) input on amplifier
	Cycles through repeat options (track, disc, etc.)
	Navigate the menus on Arcam surround amplifiers. <b>OK</b> confirms a selection. <b>SHIFT</b> to Power on <b>SHIFT</b> to Power off.
	Confirms a setting (equivalent to 'Enter' or 'Select' on some remotes)
	Changes the time display modes on Arcam CD player
	(not used)
	Cycles through the front panel display's brightness options (dim to bright, off).
	Toggles the mute function, if available. By default this key always operates the AMP Mute
	Press and release to skip back to the beginning of the current/previous track.
	Press and release to skip forwards to the beginning of the next track.
	Decrease (-) and increase (+) amplifier volume
	Fast rewind
	Play
	Toggles pause of playback

	Fast forward
	Open/close disc tray
	Stop playback
	Start recording (on products that have this feature)
	Scans first 10 seconds of each track on CD (Audio search)
	Starts Program mode
	Clears programmed item
	Starts and stops A-B repeat function
	(not used)

# Customising the CR100

## Code Learning

The CR100 comes with a complete library of preprogrammed codes. After you have set up the CR100 for your device, you may find that there are one or more functions on your original remote which do not have a place on the CR100 keypad. For convenience, the CR100 offers a Code Learning feature that allows you to copy up to 16 functions from an original remote control onto the CR100 keypad.

Before you start, make sure that:

- The original remote control is working correctly.
- The remotes are not pointing at your device.
- The remotes have new batteries.
- The remotes are not in direct sunlight or under strong fluorescent lights.

*Learned functions are mode-dependent: You could theoretically assign up to eight different functions to a single key (the CR100 can handle a total of 16 learned functions)*

**Example: To copy the 'text hold' function from a TV remote onto the  key of your CR100.**

1. Place both remotes on a flat surface, 2 to 5cm apart, with the IR ports facing each other.
2. On the CR100, press and hold  until the power LED blinks twice: .
3. Press   . The power LED blinks twice: .
4. On the CR100, press the device key that matches the 'source' device (e.g. if you're learning a TV function, press .
5. On the CR100, press the key to which you want to assign the learned function (e.g. ). The device key blinks rapidly.

6. On the original remote, press and hold the function key that you want to learn (e.g. **TEXT HOLD**) until the CR100 device key blinks twice: .
7. If you want to learn other functions from the same source device, simply repeat steps 5 and 6 pressing the next key you want to learn.
8. To exit Code Learning mode, press and hold  until the device key blinks twice: .
9. To use the learned function on the CR100, press the Device Mode key, followed by the function key.

In this example, you'd press  followed by .

## Shifted Learning

You can assign a learned function to a CR100 key without sacrificing its original function.

You can assign Shifted Learning functions to any key **except** for: Device Mode keys (e.g. , , or number keys ( to ).

1. To assign a Shifted Learning function, simply follow Code Learning steps in the previous section. During step 5, press  once before you press the key to which you want to assign the learned function.
2. To access the shifted function, press  and then the target key.

## Important notes

- Once you start a Code Learning session, you have approximately 10 seconds to conduct each step. Any longer, and a timeout means that you'll have to start the process again.
- The Learning feature is mode-specific – you can copy one feature *per mode* onto a key.
- The CR100 can learn approximately 16 functions in total.

- To replace a learned function, simply assign a new one to the same key.
- Learned functions *are* retained when you change batteries.
- If Code Learning fails, try altering the distance between the two remotes; make sure that the light in the area is not too bright.

### To delete a learned function:

1. Press and hold  until the power LED blinks twice: .
3. Press   . The power LED blinks twice: .
3. Press a Device Mode key once. For example, if you want to delete one of your learned TV functions, press .
4. Press twice on the key you want to deassign. The handset blinks twice:  to confirm.

The original function of the CR100 is restored.

### To delete a Shifted Learned function:

To delete a Shifted Learned function, press  before you press the key to be deassigned (during step 4 above).

### To delete ALL learned functions within a given Device Mode:

1. Press and hold  until the power LED blinks twice: .
2. Press    – the power LED blinks twice: .
3. Press the appropriate Device Mode key twice.

## Creating Macros

You can program your CR100 to issue a sequence of commands when you press a single key. Any sequence of commands you regularly use can be reduced to a single key press for your convenience.

For example, you might want to turn off your TV, VCR and Satellite at the same time.

- A key programmed with a Macro is available in all modes; it will replace that key's different functions for all modes.
- A Macro can consist of up to eight key presses.

### Example: To assign a Macro to the key

1. Press and hold  until the power LED blinks twice: .
2. Press   .
3. Press  (the Macro will be assigned to this key).
4. Press , , , , , .
5. To store the Macro, press and hold  until the power LED blinks twice: .

Now, whenever you press , the CR100 will toggle the power to your TV, VCR and Satellite.

- The important word here is 'toggle'. For example, if the TV and Satellite devices are currently on, but the VCR is off, pressing  will switch off the TV and Satellite and switch on the VCR (rather than switching all three devices on or off).
- When using Macros, remember that you may need to change mode or use , and that each key press (including changing modes and pressing ) counts as one of the Macro steps. You cannot use a Macro key within another Macro.
- If the amount of memory storage for a particular Macro is exceeded, the power LED comes

on for five seconds. You can, however, save the macro steps up to that point by pressing , or you can cancel the Macro recording by pressing any other key.

- The delay between key presses is recorded as part of the Macro. A delay of up to 30 seconds is permitted.

### Example: To deassign the Macro associated with the key

1. Press and hold  until the power LED blinks twice:  .
2. Press   .
3. Press .
4. Press and hold  until the power LED blinks twice:  .

## Key Mover

Sometimes you might find that a key you use a lot for your system is in the 'wrong' place on the CR100 keypad. It's quite easy to reassign a favourite function to a more accessible key.

Remember that key functions are Mode-specific.

### Example: To assign the DISP function to the MENU key in SAT mode:

1. Press .
2. Press and hold  until the power LED blinks twice:  .
3. Press   .
4. Press the key you want to move (e.g. .
5. Press the key you want to move the key to (e.g. .

To restore a moved key and return it to its previous function, repeat the process above, pressing the key to be restored twice.

## Mode Mover

If your home entertainment setup contains devices of the same type (e.g. two TVs, perhaps from different manufacturers) you can still control both those devices with the CR100. You simply need to reassign an *unused* Device Mode key.

### Example: To use the key to control a second TV

1. Press and hold  until the power LED blinks twice:  .
3. Press   .
3. Press the Device Mode key for the type of device you want to control (e.g. for a TV, press .
4. Press the Device Mode key you want to use (e.g. .
5. Don't forget to set up the CR100 to control the second device, using one of the methods on pages 6 or 7.

Note that Volume lock features are not applied to a Device Mode that has been altered using Mode Mover.

### To restore a moved Device Mode key to its original state

1. Press and hold  until the power LED blinks twice:  .
2. Press   .
3. Press the Device Mode key you want to restore *twice*.

## Locking/Unlocking a specific device mode

When you first unpack your CR100 and insert the batteries, for your convenience it is able to control certain Arcam components automatically (e.g. DVD players, Amplifiers, Tuners and CD Players). We achieve this by preprogramming specific Arcam device codes onto the relevant Device Mode keys, then locking the Device Modes so you don't reprogram them inadvertently.

If you want to override these locked default settings – to control a third-party DVD player, for example – you will first need to unlock DVD Mode before setting up the CR100 using one of the methods described at the start of this guide.

Here are the factory default settings:

Mode	Default Status	Default Arcam codes
DVD mode	Locked	0762
SAT mode	Unlocked	0877
AV mode	Unlocked	0586
TUN mode	Locked	2009
AMP mode	Locked	1956
AUX mode	Locked	2004
VCR mode	Unlocked	0111
CD mode	Locked	0680

Alternative codes are available for multi-room solutions, or in the case of code clashes with other manufacturer's products.

For example:

DVD (system code 12) 1655  
AMP (system code 19) 1371

You will need to change the system code on the product you wish to control, as well as the CR100.

**Note:** AMP mode is permanently locked; it will only control Arcam Amplifiers

To toggle a Device Mode lock setting:

1. Press the Device Mode key you want to unlock (e.g. )
  2. Press and hold  until the power LED blinks twice:  .
  3. Press   .
- The power LED blinks twice when being locked, and blinks four times when being unlocked.
  - If you enter an invalid key sequence, the power LED gives one long blink and returns to normal operation.

While the Device Mode key is locked, the Direct Code Setup and Move Mode functions are not available.

## Volume punch-through

Volume punch-through means that, no matter which Device Mode is selected, the CR100 controls the Amplifier volume. You don't need to press  on your CR100. This feature is switched on by default.

There are times, however, when you might want to control a device's volume directly when in a specific Device Mode.

### Example: To cancel volume punch-through for a TV (AV mode)

1. Press  once.
2. Press and hold  until the power LED blinks twice:  .
3. Press   .
4. Press . The power LED blinks four times.

Now, while in TV (AV) mode, you will be able to control the volume or mute functions of your TV directly.

### To completely cancel all volume punch-through settings

1. Press and hold  until the power LED blinks twice:  .
2. Press   .
3. Press . The power LED blinks four times    .

Now, whichever mode you're in, you will have direct access to that device's volume or mute functions, assuming they are available. You would need to switch to **AMP** mode to alter the Amplifier volume.

### Example: To restore default volume punch-through settings in VCR, DVD, AMP and SAT mode

1. Press and hold  until the power LED blinks twice:  .
2. Press   .
3. Press . The power key LED blinks twice:  .

## Mode key IR punch-through

The Mode key IR punch-through default is 'on'.

### Example: To set the Mode key IR punch-through to AMP

1. Press and hold  until the power LED blinks twice: .
2. Press   . The power LED blinks twice: .
3. Press  to punch through IR from it.

Now, whenever you press and release a Mode key, the IR data assigned to **AMP** is transmitted, no matter what the current mode is (i.e. it 'punches through' any other device).

### To cancel Mode key IR punch-through:

1. Press and hold  until the power LED blinks twice: .
2. Press   . The power LED blinks twice: .
3. Press  until the power LED blinks twice: .

## Resetting the CR100

Resetting the CR100 will erase all learned functions across all modes, as well as some other programmed functions like Macros. It will not reset the Device Mode keys; these will remain programmed to your choice of component.

1. Press and hold  until the power LED blinks twice: .
2. Press   . The power LED blinks four times: .

# Command summary

## Direct code setup

(e.g. AV mode, *NNNN*=code number)

## Library search

(e.g. AV mode)

until unit turns off

to save

## Code blink back

- 1 count blinks for first *N*
- 2 count blinks for second *N*
- 3 count blinks for third *N*
- 4 count blinks for fourth *N*

## Code learning

(e.g. AV mode fast forward key)

(Press key on original remote that you wish to copy)

## Delete a learned function

(e.g. AV mode fast forward key)

## Delete all learned functions with a device

(e.g. AV mode)

## Creating macros

(e.g. **SRCH** key)

## Deassign macro

## Key mover

(e.g. SAT mode, **DISP** key to **MENU** key)

## Mode mover

(e.g. change SAT to TV(AV))

## Restore device mode

(e.g. restore SAT)

## Locking/unlocking a mode

(e.g. DVD mode)

(i.e. two blinks for lock)

(i.e. four blinks for unlock)

## Cancel volume punch through

## Restore volume punch through

## Mode key IR punch through

## Cancel mode key IR punch through

## Reset the CR100

As elsewhere in this Handbook, a single 'blink' of the red LED behind the power button is indicated by the symbol

# Device code tables

The tables that begin on the opposite page list the four-figure codes for different manufacturers' devices.

Use these when setting your CR100 up to control your devices, as described in Method 1 (see page 6).

If more than one code number is listed, try the first number. If the results are unsatisfactory, continue trying the numbers for that manufacturer to get the best 'fit' with the functionality required.

If the manufacturer of your equipment is not listed, you can try Method 2, the Library Search (see page 7). This allows you to scan through every set of codes contained in the CR100's memory.
