Safety Precautions

CAUTION
RISK OF ELECTRIC SHOCK
DO NOT OPEN

CAUTION:

TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

WARNING:

TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

R&TTE Directive 1999/5/EC

This product may be operated in the following countries;

AT	BE	CZ	DK	FI
FR	DE	GR	HU	IE
IT	NL	PL	PT	SK
ES	SE	GB	NO	CH

• DECLARATION OF CONFORMITY

Hereby, D&M Holdings Inc., Denon Brand Company declares that this product AVC-A1HD is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC, in conformity with the following standards;

EN60065, EN55013, EN55020, EN55022, EN55024, EN61000-3-2, EN61000-3-3, EN300328, EN301489-01, EN301489-17 and EN50385

The declaration of conformity may be consulted to our European representative, DENON Europe.

• ÜBEREINSTIMMUNGSERKLÄRUNG

Hiermit erklärt D&M Holdings Inc., Denon Brand Company, dass sich das Gerät AVC-A1HD in Übereinstimmung mit den grundlegenden Anforderungen und den übrigen einschlägigen Bestimmungen der Richtlinie 1999/5/EG befindet, den folgenden Standards entspricht:

EN60065, EN55013, EN55020, EN55022, EN55024, EN61000-3-2, EN61000-3-3, EN300328, EN301489-01, EN301489-17 und EN50385

Wenden Sie sich bei Fragen zur Konformitätserklärung an unseren europäischen Vertreter, DENON Europe.

• DECLARATION DE CONFORMITE

Par la présente, D&M Holdings Inc., Denon Brand Company déclare que l'appareil AVC-A1HD est conforme aux exigences essentielles et aux autres dispositions pertinentes de la directive 1999/5/CE, e conforme alle seguenti normative:

EN60065, EN55013, EN55020, EN55022, EN55024, EN61000-3-2, EN61000-3-3, EN300328, EN301489-01, EN301489-17 e EN50385.

La déclaration de conformité pourra être consultée auprès de notre représentant en Europe, DENON Europe.

• DICHIARAZIONE DI CONFORMITÀ

Con la presente D&M Holdings Inc., Denon Brand Company dichiara che questo AVC-A1HD è conforme ai requisiti essenziali ed alle altre disposizioni pertinenti stabilite dalla direttiva 1999/5/CE, e conforme alle seguenti normative:

EN60065, EN55013, EN55020, EN55022, EN55024, EN61000-3-2, EN61000-3-3, EN300328, EN301489-01, EN301489-17 e EN50385.

La dichiarazione di conformità può essere consultata presso il nostro rappresentante europeo, DENON Europe.

QUESTO PRODOTTO E' CONFORME

AL D.M. 28/08/95 N. 548

• DECLARACIÓN DE CONFORMIDAD

Por la presente, D&M Holdings Inc., Denon Brand Company, declara que este AVC-A1HD cumple con los requisitos esenciales y otras exigencias relevantes de la Directiva 1999/5/EC, esta conforme con los siguientes estándares:

EN60065, EN55013, EN55020, EN55022, EN55024, EN61000-3-2, EN61000-3-3, EN300328, EN301489-01, EN301489-17 y EN50385.

Puede consultar a nuestro representante europeo, DENON Europe, acerca de la declaración de conformidad.

• EENVORMIGHEIDSVERKLARING

Hierbij verklaart D&M Holdings Inc., Denon Brand Company dat het toestel AVC-A1HD in overeenstemming is met de essentiële eisen en de andere relevante bepalingen van richtlijn 1999/5/EG, in overeenstemming is met de volgende normen:

EN60065, EN55013, EN55020, EN55022, EN55024, EN61000-3-2, EN61000-3-3, EN300328, EN301489-01, EN301489-17 en EN50385.

De eenvormigheidsverklaring mag worden geconsulteerd aan onze Europese vertegenwoordiger, DENON Europe.

• ÖVERENSSTÄMMELSESINTYG

Denna utrustning är i överensstämmelse med de väsentliga kraven och andra relevanta bestämmelser i Direktiv 1999/5/EC, uppfyller följande standarder:

EN60065, EN55013, EN55020, EN55022, EN55024, EN61000-3-2, EN61000-3-3, EN300328, EN301489-01, EN301489-17 och EN50385.

EU-konformitetsintyget kan på begäran fås från DENON Europe, vår representant i Europa.

DENON EUROPE
Division of D&M Germany GmbH
An der Landwehr 19, Nettetal,
D-41334 Germany

CAUTION:

To completely disconnect this product from the mains, disconnect the plug from the wall socket outlet.

The mains plug is used to completely interrupt the power supply to the unit and must be within easy access by the user.

VORSICHT:

Um dieses Gerät vollständig von der Stromversorgung abzutrennen, ziehen Sie bitte den Stecker aus der Wandsteckdose.

Der Netzstecker wird verwendet, um die Stromversorgung zum Gerät völlig zu unterbrechen; er muss für den Benutzer gut und einfach zu erreichen sein.

PRECAUTION:

Pour déconnecter complètement ce produit du courant secteur, débranchez la prise de la prise murale.

La prise secteur est utilisée pour couper complètement l'alimentation de l'appareil et l'utilisateur doit pouvoir y accéder facilement.

ATTENZIONE:

Per scolare completamente questo prodotto dalla rete di alimentazione elettrica, scolare la spina dalla relativa presa a muro. La spina di rete viene utilizzata per interrompere completamente l'alimentazione all'unità e deve essere facilmente accessibile all'utente.

PRECAUCIÓN:

Para desconectar completamente este producto de la alimentación eléctrica, desconecte el enchufe del enchufe de la pared.

El enchufe de la alimentación eléctrica se utiliza para interrumpir por completo el suministro de alimentación eléctrica a la unidad y debe de encontrarse en un lugar al que el usuario tenga fácil acceso.

WAARSCHUWING:

Om de voeding van dit product volledig te onderbreken moet de stekker uit het stopcontact worden getrokken.

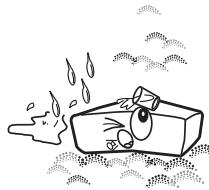

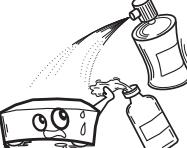

De netstekker wordt gebruikt om de stroomtoevoer naar het toestel volledig te onderbreken en moet voor de gebruiker gemakkelijk bereikbaar zijn.

FÖRSIKTHETSMÅTT:

Koppla lossa stickproppen från eluttaget för att helt skilja produkten från nätet.

Stickproppen används för att helt bryta strömförseringen till apparaten, och den måste vara lättillgänglig för användaren.

NOTE ON USE / HINWEISE ZUM GEBRAUCH / OBSERVATIONS RELATIVES A L'UTILISATION / NOTE SULL'USO / NOTAS SOBRE EL USO / ALVORENSTE GEBRUIKEN / OBSERVERA ANGÅENDE ANVÄNDNINGEN

			<p>CAUTION:</p> <ul style="list-style-type: none"> The ventilation should not be impeded by covering the ventilation openings with items, such as newspapers, tablecloths, curtains, etc. No naked flame sources, such as lighted candles, should be placed on the unit. Observe and follow local regulations regarding battery disposal. Do not expose the unit to dripping or splashing fluids. Do not place objects filled with liquids, such as vases, on the unit.
<ul style="list-style-type: none"> Avoid high temperatures. Allow for sufficient heat dispersion when installed in a rack. Vermeiden Sie hohe Temperaturen. Beachten Sie, dass eine ausreichende Belüftung gewährleistet wird, wenn das Gerät auf ein Regal gestellt wird. Eviter des températures élevées. Tenir compte d'une dispersion de chaleur suffisante lors de l'installation sur une étagère. Evitate di esporre l'unità a temperature elevate. Assicuratevi che vi sia un'adeguata dispersione del calore quando installate l'unità in un mobile per componenti audio. Evite altas temperaturas. Permite la suficiente dispersión del calor cuando está instalado en la consola. Vermij hoge temperaturen. Zorg er bij installatie in een audiorack voor, dat de door het toestel geproduceerde warmte goed kan worden afgevoerd. Undvik höga temperaturer. Se till att det finns möjlighet till god värmearvledning vid montering i ett rack. 	<ul style="list-style-type: none"> Keep the unit free from moisture, water, and dust. Halten Sie das Gerät von Feuchtigkeit, Wasser und Staub fern. Protéger l'appareil contre l'humidité, l'eau et la poussière. Tenete l'unità lontana dall'umidità, dall'acqua e dalla polvere. Mantenga el equipo libre de humedad, agua y polvo. Laat geen vochtigheid, water of stof in het apparaat binnendringen. • Utsätt inte apparaten för fukt, vatten och damm. 	 <ul style="list-style-type: none"> Do not let foreign objects into the unit. Lassen Sie keine fremden Gegenstände in das Gerät kommen. Ne pas laisser des objets étrangers dans l'appareil. Non inserite corpi estranei all'interno dell'unità. No deje objetos extraños dentro del equipo. Laat geen vreemde voorwerpen in dit apparaat vallen. Se till att främmande föremål inte tränger i apparaten. 	<p>ACHTUNG:</p> <ul style="list-style-type: none"> Die Belüftung sollte auf keinen Fall durch das Abdecken der Belüftungsöffnungen durch Gegenstände wie beispielsweise Zeitungen, Tischtücher, Vorhänge o. Ä. behindert werden. • Auf dem Gerät sollten keinerlei direkte Feuerquellen wie beispielsweise angezündete Kerzen aufgestellt werden. • Bitte beachten Sie bei der Entsorgung der Batterien die örtlich geltenden Umweltbestimmungen. • Das Gerät sollte keiner tropfenden oder spritzenden Flüssigkeit ausgesetzt werden. • Auf dem Gerät sollten keine mit Flüssigkeit gefüllten Behälter wie beispielsweise Vasen aufgestellt werden.
	<ul style="list-style-type: none"> Handle the power cord carefully. Hold the plug when unplugging the cord. Gehen Sie vorsichtig mit dem Netzkabel um. Halten Sie das Kabel am Stecker, wenn Sie den Stecker herausziehen. Manipuler le cordon d'alimentation avec précaution. Tenir la prise lors du débranchement du cordon. Manneggiate il cavo di alimentazione con attenzione. Tenete ferma la spina quando scollegate il cavo dalla presa. Maneje el cordón de energía con cuidado. Sostenga el enchufe cuando desconecte el cordón de energía. Hanteer het netsnoer voorzichtig. Houd het snoer bij de stekker vast wanneer deze moet worden aan- of losgekoppeld. • Hantera nätkabeln varsamt. Håll i kabeln när den kopplas från el-uttaget. 	 <ul style="list-style-type: none"> Unplug the power cord when not using the unit for long periods of time. Lassen Sie das Gerät nicht mit Insektiziden, Benzin oder Verdünnungsmitteln in Berührung kommen. Wenn das Gerät längere Zeit nicht verwendet werden soll, trennen Sie das Netzkabel vom Netzstecker. Débrancher le cordon d'alimentation lorsque l'appareil n'est pas utilisé pendant de longues périodes. Scollegate il cavo di alimentazione quando prevedete di non utilizzare l'unità per un lungo periodo di tempo. Desconecte el cordón de energía cuando no utilice el equipo por mucho tiempo. Neem altijd het netsnoer uit het stopcontact wanneer het apparaat gedurende een lange periode niet wordt gebruikt. Koppla loss nätkabeln om apparaten inte kommer att användas i lång tid. 	 <ul style="list-style-type: none"> Do not let insecticides, benzene, and thinner come in contact with the unit. Lassen Sie das Gerät nicht mit Insektiziden, Benzin oder Verdünnungsmitteln in Berührung kommen. Ne pas mettre en contact des insecticides, du benzène et un diluant avec l'appareil. Assicuratevi che l'unità non entri in contatto con insetticidi, benzolo o solventi. No permita el contacto de insecticidas, gasolina y diluyentes con el equipo. Voorkom dat insecticiden, benzene of verfverdunner met dit toestel in contact komen. Se till att insektsmedel på spraybruk, bensen och thinner kommer i kontakt med apparatens hölje.
	<p>* (For apparatuses with ventilation holes)</p> <ul style="list-style-type: none"> Do not obstruct the ventilation holes. Decken Sie den Lüftungsbereich nicht ab. Ne pas obstruer les trous d'aération. Non coprite i fori di ventilazione. No obstruya los orificios de ventilación. De ventilatieopeningen mogen niet worden beblokkeerd. Täpp inte till ventilationsöppningarna. 	 <ul style="list-style-type: none"> Never disassemble or modify the unit in any way. Versuchen Sie niemals das Gerät auseinander zu nehmen oder zu verändern. Ne jamais démonter ou modifier l'appareil d'une manière ou d'une autre. Nunca desarme o modifique el equipo de ninguna manera. Dit toestel mag niet gedemonteerd of aangepast worden. Ta inte isär apparaten och försök inte bygga om den. 	<p>ATTENTION:</p> <ul style="list-style-type: none"> La ventilation ne doit pas être gênée en recouvrant les ouvertures de la ventilation avec des objets tels que journaux, rideaux, tissus, etc. Aucune flamme nue, par exemple une bougie, ne doit être placée sur l'appareil. Veillez à respecter les lois en vigueur lorsque vous jetez les piles usagées. L'appareil ne doit pas être exposé à l'eau ou à l'humidité. Ne pas poser d'objet contenant du liquide, par exemple un vase, sur l'appareil. <p>ATTENZIONE:</p> <ul style="list-style-type: none"> Le aperture di ventilazione non devono essere ostruite coprendole con oggetti, quali giornali, tovaglie, tende e così via. Non posizionate sull'unità fiamme libere, come ad esempio candele accese. Prestate attenzione agli aspetti legati alla tutela dell'ambiente nello smaltimento delle batterie. L'apparecchiatura non deve essere esposta a gocciolii o spruzzi. Non posizionate sull'unità alcun oggetto contenente liquidi, come ad esempio i vasi. <p>PRECAUCIÓN:</p> <ul style="list-style-type: none"> La ventilación no debe quedar obstruida por haberse cubierto las aperturas con objetos como periódicos, manteles, cortinas, etc. No debe colocarse sobre el aparato ninguna fuente inflamable sin protección, como velas encendidas. A la hora de deshacerse de las pilas, respete la normativa para el cuidado del medio ambiente. No exponer el aparato al goteo o salpicaduras cuando se utilice. No colocar sobre el aparato objetos llenos de líquido, como jarras. <p>WAARSCHUWING:</p> <ul style="list-style-type: none"> De ventilatie mag niet worden belemmerd door de ventilatieopeningen af te dekken met bijvoorbeeld kranten, een tafelkleed, gordijnen, enz. Plaats geen open vlammen, bijvoorbeeld een brandende kaars, op het apparaat. Houd u steeds aan de milieuvorschriften wanneer u gebruikte batterijen wegdoet. Stel het apparaat niet bloot aan druppels of spatten. Plaats geen voorwerpen gevuld met water, bijvoorbeeld een vaas, op het apparaat. <p>OBSERVERA:</p> <ul style="list-style-type: none"> Ventilationen bör inte förhindras genom att täcka över ventilationsöppningarna med föremål såsom tidningar, borddukar, gardiner osv. Inga blottade brandkärror, såsom tända ljus, får placeras på apparaten. Tänk på miljöaspekterna när du bortskaffar batterier. Apparaten får inte utsättas för vätska. Placerar inte föremål fylda med vätska, t.ex. vaser, på apparaten.

A NOTE ABOUT RECYCLING:

This product's packaging materials are recyclable and can be reused. Please dispose of any materials in accordance with the local recycling regulations.

When discarding the unit, comply with local rules or regulations.

Batteries should never be thrown away or incinerated but disposed of in accordance with the local regulations concerning battery disposal.

This product and the supplied accessories, excluding the batteries, constitute the applicable product according to the WEEE directive.

HINWEIS ZUM RECYCLING:

Das Verpackungsmaterial dieses Produktes ist zum Recyceln geeignet und kann wieder verwendet werden. Bitte entsorgen Sie alle Materialien entsprechend der örtlichen Recycling-Vorschriften.

Beachten Sie bei der Entsorgung des Gerätes die örtlichen Vorschriften und Bestimmungen.

Die Batterien dürfen nicht in den Hausmüll geworfen oder verbrannt werden; bitte entsorgen Sie die Batterien gemäß der örtlichen Vorschriften.

Dieses Produkt und das im Lieferumfang enthaltene Zubehör (mit Ausnahme der Batterien!) entsprechen der WEEE-Direktive.

UNE REMARQUE CONCERNANT LE RECYCLAGE:

Les matériaux d'emballage de ce produit sont recyclables et peuvent être réutilisés. Veuillez disposer des matériaux conformément aux lois sur le recyclage en vigueur.

Lorsque vous mettez cet appareil au rebut, respectez les lois ou réglementations en vigueur.

Les piles ne doivent jamais être jetées ou incinérées, mais mises au rebut conformément aux lois en vigueur sur la mise au rebut des piles.

Ce produit et les accessoires inclus, à l'exception des piles, sont des produits conformes à la directive DEEE.

NOTA RELATIVA AL RICICLAGGIO:

I materiali di imballaggio di questo prodotto sono riutilizzabili e riciclabili. Smaltire i materiali conformemente alle normative locali sul riciclaggio.

Per lo smaltimento dell'unità, osservare le normative o le leggi locali in vigore.

Non gettare le batterie, né incenerirle, ma smaltirle conformemente alla normativa locale sui rifiuti chimici.

Questo prodotto e gli accessori inclusi nell'imballaggio sono applicabili alla direttiva RAEE, ad eccezione delle batterie.

ACERCA DEL RECICLAJE:

Los materiales de embalaje de este producto son reciclables y se pueden volver a utilizar. Disponga de estos materiales siguiendo los reglamentos de reciclaje de su localidad.

Cuando se deshaga de la unidad, cumpla con las reglas o reglamentos locales.

Las pilas nunca deberán tirarse ni incinerarse. Deberá disponer de ellas siguiendo los reglamentos de su localidad relacionados con los desperdicios químicos.

Este producto junto con los accesorios empaquetados es el producto aplicable a la directiva RAEE excepto pilas.

EEN AANTEKENING MET BETrekking tot de RECYCLING:

Het inpakmateriaal van dit product is recycleerbaar en kan opnieuw gebruikt worden. Er wordt verzocht om zich van elk afvalmateriaal te ontdoen volgens de plaatselijke voorschriften.

Volg voor het wegdoen van de speler de voorschriften voor de verwijdering van wit- en bruinoed op.

Batterijen mogen nooit worden weggegooid of verbrand, maar moeten volgens de plaatselijke voorschriften betreffende chemisch afval worden verwijderd.

Op dit product en de meegeleverde accessoires, m.u.v. de batterijen is de richtlijn voor afgedankte elektrische en elektronische apparaten (WEEE) van toepassing.

OBSERVERA ANGÅENDE ÅTERVINNING:

Produktens emballage är återvinningsbart och kan återanvändas. Kassera det enligt lokala återvinningsbestämmelser. När du kasseras enheten ska du göra det i överensstämmelse med lokala regler och bestämmelser.

Batterier får absolut inte kastas i soporna eller bränna. Kassera dem enligt lokala bestämmelser för kemiskt avfall.

Denna apparat och de tillbehör som levereras med den uppfyller gällande WEEE-direktiv, med undantag av batterierna.

1. IMPORTANT NOTICE: DO NOT MODIFY THIS PRODUCT

This product, when installed as indicated in the instructions contained in this manual, meets R&TTE directive requirements. Modification of the product could result in hazardous Radio and EMC radiation.

2. CAUTION

- Separation distance of at least 20 cm must be maintained between the antenna of this product and all persons.
- This product and its antenna must not be co-located or operating in conjunction with any other antenna or transmitter.

1. WICHTIGER HINWEIS: NEHMEN SIE KEINE VERÄNDERUNGEN AN DIESEM PRODUKT VOR

Wenn dieses Produkt entsprechend dieser Bedienungsanleitung aufgebaut wird, entspricht es den Anforderungen der R&TTE-Richtlinie. Veränderungen am Produkt können zu gefährlicher Funk- und EMV-Strahlung führen.

2. VORSICHT

- Zwischen der Antenne dieses Produkts und Personen muss ein Schutzabstand von 20 cm eingehalten werden.
- Dieses Produkt und seine Antenne dürfen nicht neben anderen Antennen oder Sendern aufgestellt oder zusammen mit ihnen verwendet werden.

1. MISE EN GARDE IMPORTANTE : NE JAMAIS MODIFIER CE PRODUIT

Si toutes les consignes indiquées dans ce mode ont été respectées pendant son installation, ce produit est conforme aux directives R&TTE. Toute modification du produit risquerait alors de générer des radiations radio et EMC dangereuses.

2. ATTENTION

- L'antenne de l'appareil devra être située à une distance de 20 cm au moins des personnes.
- Ce produit ainsi que son antenne ne devront en aucun cas être utilisés à proximité d'une autre antenne ou transmetteur.

1. AVVERTENZA IMPORTANTE: NON MODIFICARE QUESTO PRODOTTO

Se installato come indicato nelle istruzioni del presente manuale, questo prodotto soddisfa i requisiti della direttiva R&TTE. Eventuali modifiche apportate al prodotto potrebbero causare pericolose radiazioni radio ed EMC.

2. ATTENZIONE

- È necessario mantenere una distanza minima di 20 cm tra l'antenna di questo prodotto e le persone.
- Questo prodotto e la relativa antenna non devono essere posizionati in prossimità di altre antenne o trasmettitori e non devono essere utilizzati congiuntamente a questi ultimi.

1. NOTA IMPORTANTE: NO MODIFIQUE ESTE PRODUCTO

Este producto, si es instalado de acuerdo con las instrucciones contenidas en este manual, cumple los requisitos de la directiva R&TTE. La modificación del producto puede producir radiación de Radio y EMC peligrosa.

2. PRECAUCIÓN

- Se debe mantener una separación de al menos 20 cm entre la antena del producto y las personas.
- Este producto y su antena no debe instalarse ni utilizarse conjuntamente con otra antena o transmisor.

1. BELANGRIJKE MEDEDELING: BRENG AAN DIT PRODUCT GEEN AANPASSINGEN AAN

Dit product, indien geïnstalleerd volgens de aanwijzingen in deze gebruiksaanwijzing, voldoet aan de vereisten van de R&TTE-richtlijn. Aanpassing van dit product kan gevarenlijke radio- en EMC-straling tot gevolg hebben.

2. LET OP

- Houd tussen antenne en personen altijd een afstand van tenminste 20 cm aan.
- Dit product en zijn antenne mogen niet in de buurt van een andere antenne of zender worden geplaatst of in combinatie daar mee worden gebruikt.

1. VIKTIGT: APPARATER FÅR INTE MODIFERAS

Under förutsättning att apparaten installeras enligt anvisningarna i denna bruksanvisning, uppfyller denna kraven i R&TTE-direktivet. Ev. modifiering av apparaten kan resultera i farlig radio- och elektromagnetisk strålning.

2. FÖRSIKTIGT

- Se till att det finns ett avstånd på minst 20 cm mellan apparatens antenn och personer i omgivningen.
- Apparaten och dess antenn får inte placeras eller användas i närheten av andra antenner eller sändare.

Cautions on Handling

• Before turning the power switch on

Check once again that all connections are correct and that there are no problems with the connection cables.

- Power is supplied to some of the circuitry even when the unit is set to the standby mode. When traveling or leaving home for long periods of time, be sure to unplug the power cord from the power outlet.

• About condensation

If there is a major difference in temperature between the inside of the unit and the surroundings, condensation (dew) may form on the operating parts inside the unit, causing the unit not to operate properly.

If this happens, let the unit sit for an hour or two with the power turned off and wait until there is little difference in temperature before using the unit.

• Cautions on using mobile phones

Using a mobile phone near this unit may result in noise. If so, move the mobile phone away from this unit when it is in use.

• Moving the unit

Turn off the power and unplug the power cord from the power outlet.

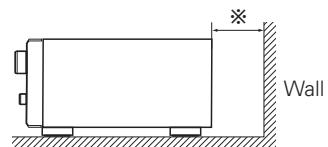

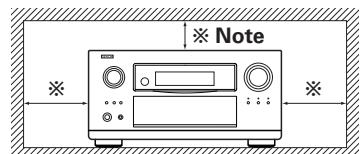

Next, disconnect the connection cables to other system units before moving the unit.

- Note that the illustrations in these instructions may differ from the actual unit for explanation purposes.

Cautions on Installation

Note:

For proper heat dispersal, do not install this unit in a confined space, such as a bookcase or similar enclosure.

About the Remote Control Unit

In addition to the AVC-A1HD, the included main remote control unit (RC-1067) can also be used to operate the equipment listed below.

① DENON system components

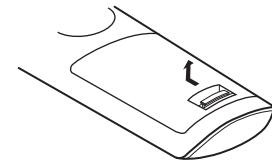

② Non-DENON system components

- By setting the preset memory (page 67 ~ 69)
- By using the learn function (page 70)

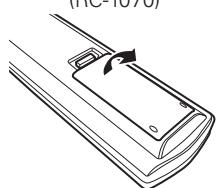

Inserting the Batteries

- Lift the clasp and remove the rear lid.

(RC-1067)

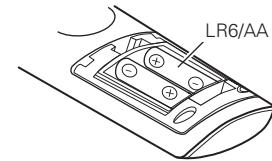

(RC-1070)

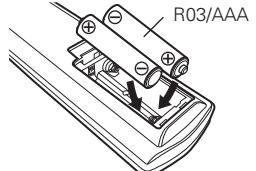

- Load the two batteries properly as indicated by the marks in the battery compartment.

(RC-1067)

(RC-1070)

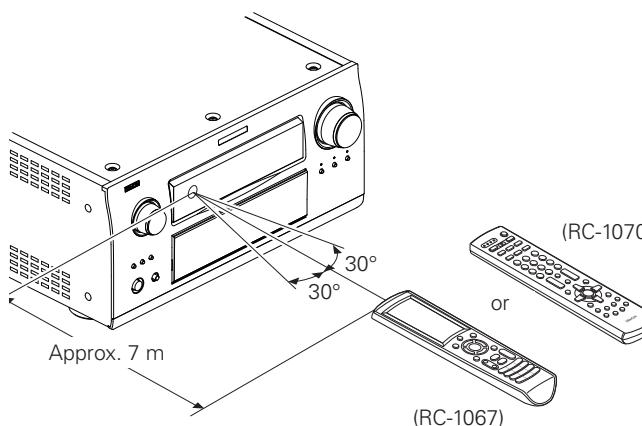

- Put the rear cover back on.

NOTE

- Replace the batteries with new ones if the set does not operate even when the remote control unit is operated close to the unit.
- The supplied batteries are only for verifying operation.
- When inserting the batteries, be sure to do so in the proper direction, following the “ \oplus ” and “ \ominus ” marks in the battery compartment.
- To prevent damage or leakage of battery fluid:
 - Do not use a new battery together with an old one.
 - Do not use two different types of batteries.
 - Do not attempt to charge dry batteries.
 - Do not short-circuit, disassemble, heat or dispose of batteries in flames.
- If the battery fluid should leak, carefully wipe the fluid off the inside of the battery compartment and insert new batteries.
- Remove the batteries from the remote control unit if it will not be in use for long periods.
- When replacing the batteries, have the new batteries ready and insert them as quickly as possible.

Operating Range of the Remote Control Unit

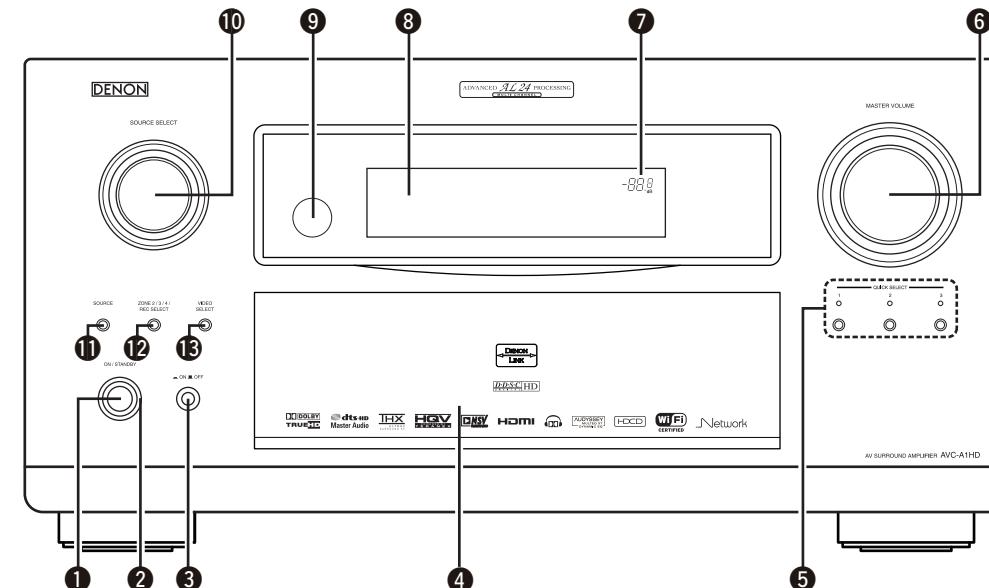

Point the remote control unit at the remote sensor when operating it.

**NOTE**

The set may function improperly or the remote control unit may not operate if the remote control sensor is exposed to direct sunlight, strong artificial light from an inverter type fluorescent lamp or infrared light.

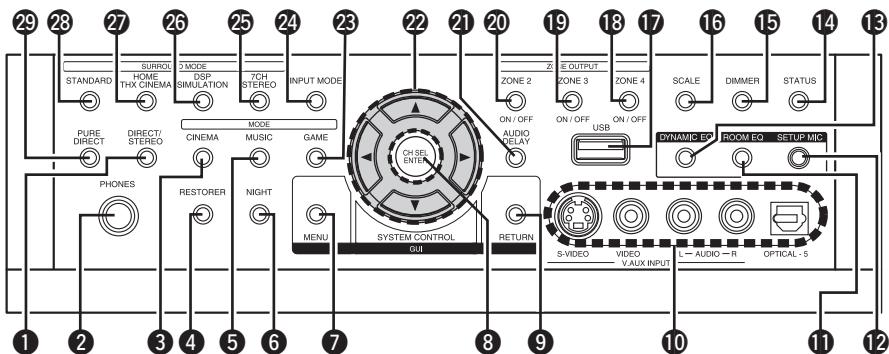

Part Names and Functions

For buttons not explained here, see the page indicated in parentheses ().

Front Panel

Remote Control Unit

□ Main remote control unit (RC-1067)

- ① Signal transmission indicator (67)
- ② Mode select buttons (67)
- ③ Quick select / System call buttons (65, 71)
- ④ Surround mode buttons (46 ~ 48)
- ⑤ System buttons (68, 69)
- ⑥ Audio delay button (A. DL) (52)
- ⑦ Tuner system buttons (69)
- ⑧ Input mode button (INPUT) (45)
- ⑨ MENU button (23)
- ⑩ Cursor buttons ($\triangle \nabla \leftarrow \rightarrow$) (23)
- ⑪ Parameter / Search button (PARA / SRCH) (48, 56)
- ⑫ Monitor select (M. SEL) / HOME button (31, 67)
- ⑬ Channel buttons (CH) (55, 68)
- ⑭ Input source select / Number buttons (42, 54)
- ⑮ Remote control signal transmitter (4)
- ⑯ Device select indicators (DEV1 / DEV2) (67)
- ⑰ ZONE3 / ZONE4 select indicators (Z3 / Z4) (81)
- ⑱ RESTORER button (RSTR) (51)
- ⑲ Night button (NGT) (51)
- ⑳ Test tone button (TEST) (29)
- ㉑ Surround speaker select button (SPKR) (30)
- ㉒ POWER buttons (54)
- ㉓ Channel select (CH SEL) / ENTER button (23, 65)
- ㉔ Return button (RTN) (23)
- ㉕ Master volume control buttons (VOL) (54)
- ㉖ Muting button (MUTE) (54, 81)
- ㉗ Main remote control unit setup button (RC SETUP) (67)

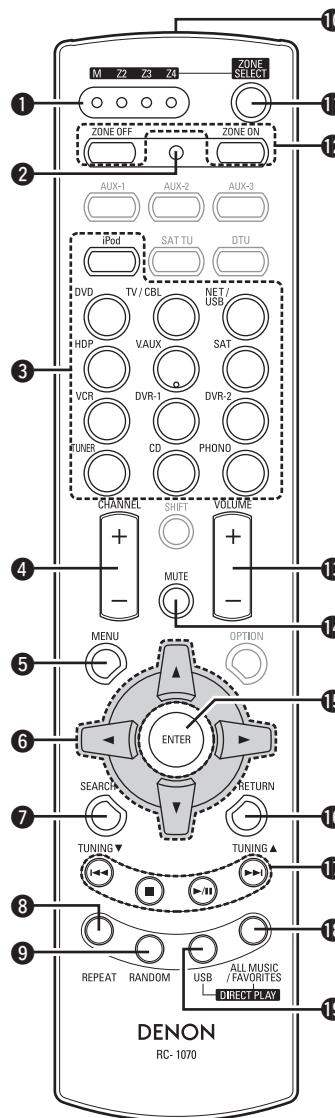

The time for which the backlight stays on can be changed (page 71 "Setting the Time the Backlight Stays Lit").

NOTE

The SAT TU, DTU, ZONE2 mode QUICK SELECT (1 ~ 3), A. DL, RSTR, NGT, INPUT, SPKR, TEST and surround mode buttons cannot be used.

□ Sub remote control unit (RC-1070)

- ① Multi-zone indicators (75)
- ② Advanced setup button (75)
- ③ Input source select buttons (42)
- ④ CHANNEL buttons (55, 74)
- ⑤ MENU button (23)
- ⑥ Cursor buttons ($\triangle \nabla \leftarrow \rightarrow$) (23)
- ⑦ SEARCH button (56)
- ⑧ REPEAT button (55)
- ⑨ RANDOM button (56)
- ⑩ Remote control signal transmitter (4)
- ⑪ ZONE SELECT button (75)
- ⑫ Zone power on/off buttons (ZONE ON / ZONE OFF) (81)
- ⑬ Master volume control buttons (VOLUME) (54)
- ⑭ Muting button (MUTE) (54, 81)
- ⑮ ENTER button (23)
- ⑯ RETURN button (23)
- ⑰ System buttons (74)
- ⑱ ALL MUSIC/FAVORITES (DIRECT PLAY) button (73)
- ⑲ USB (DIRECT PLAY) button (73)

NOTE

The AUX-1, AUX-2, AUX-3, SAT TU, DTU, SHIFT and OPTION buttons cannot be used.

Connections

Connections for all compatible audio and video signal formats are described in this owner's manual. Please select the types of connections suited for the equipment you are connecting. With some types of connections, certain settings must be made on the AVC-A1HD. For details, refer to the instructions for the respective connection items below.

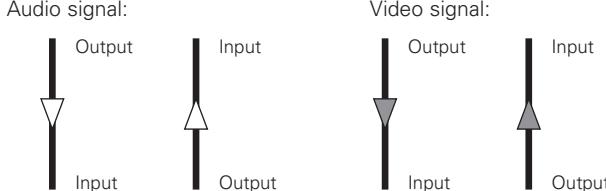

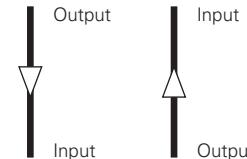

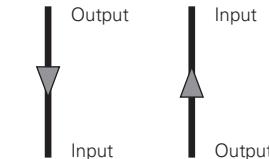

NOTE

- Do not plug in the power cord until all connections have been completed.
- When making connections, also refer to the operating instructions of the other components.
- Be sure to connect the left and right channels properly (left with left, right with right).
- Do not bundle power cords together with connection cables. Doing so can result in humming or noise.

Preparations

Cables Used for Connections

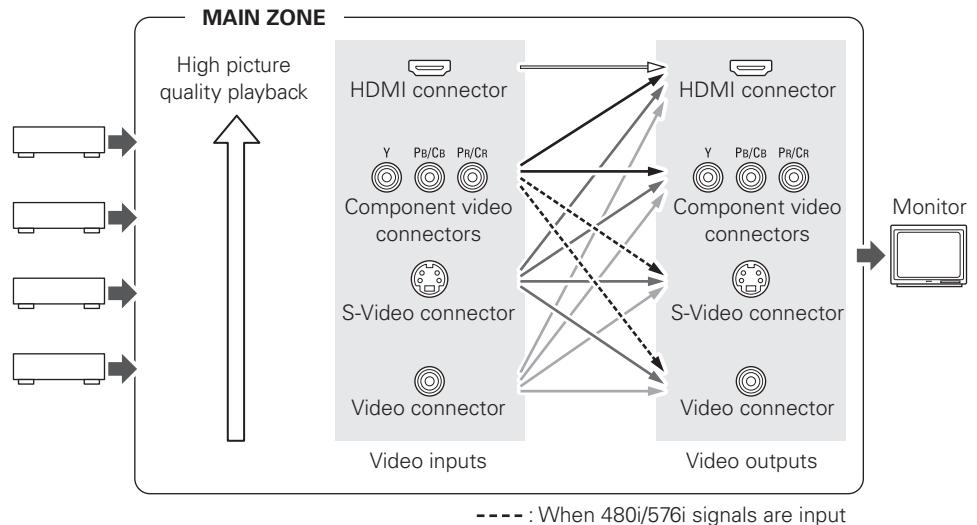

Select the cables according to the equipment being connected.

Audio cables	Video cables
Coaxial digital connections  (Orange) Coaxial digital (75 Ω/ohms pin-plug) cable	Component video connections  (Green) (Blue) (Red) Component video cable
Optical digital connections  Optical cable	  (Green) (Blue) (Red) S-Video cable
BNC digital connections  BNC (75 Ω/ohms) cable	  (Green) (Blue) (Red) BNC (75 Ω/ohms) cable
Analog connections (stereo)  (White) (Red) Stereo pin-plug cable	  (Yellow) 75 Ω/ohms pin-plug video cable
Analog connections (monaural, for subwoofer)  Pin-plug cable	  19-pin HDMI cable
DENON LINK connections  DENON LINK cable	  Signal direction
Speaker connections  Speaker cables	 Audio signal:  Video signal: 
Network connections (wired LAN)  Ethernet cable	

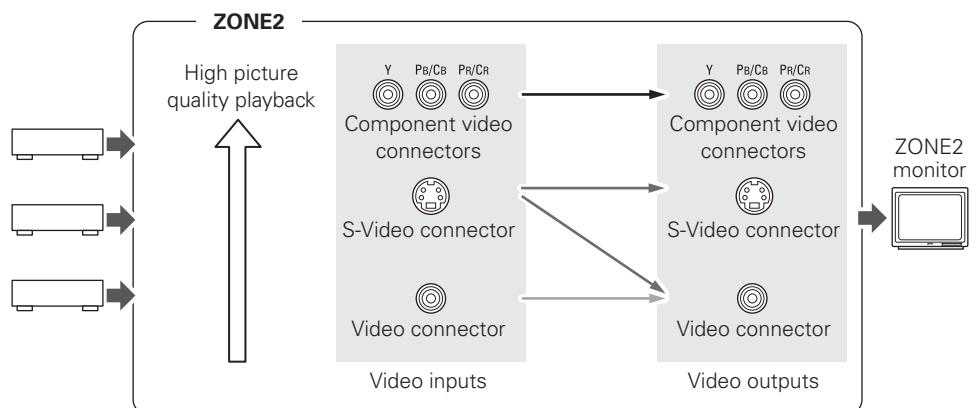

Video Conversion Function

- This function automatically converts various formats of video signals input to the AVC-A1HD into the format used to output the video signals from the AVC-A1HD to a monitor.
 - The AVC-A1HD's video input/output circuitry is compatible with the following four types of video signals:
- Digital video signals: HDMI
 Analog video signals: Component video, S-Video and Video

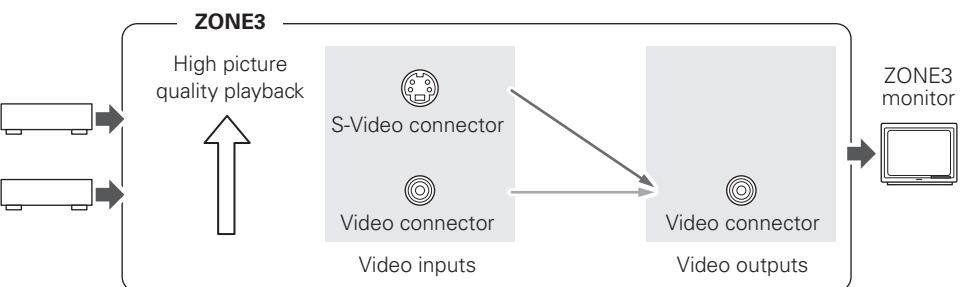

[Flow of video signals inside the AVC-A1HD]

[Flow of video signals for ZONE2]

[Flow of video signals for ZONE3]

- When not using this function, connect a monitor output with the same type of connector as the video input connector.
- The resolution of the HDMI input-compatible monitor connected to the AVC-A1HD can be checked at GUI menu "Information" – "HDMI Information" – "Monitor1" or "Monitor2" (page 53).

NOTE

- For optimum video performance, THX recommends that you set the conversion mode to "OFF" to use video signals pass through system without up conversion.
- Example:** View video input from a component video on the component video monitor.
- HDMI signals cannot be converted into analog signals.
- 1080p component input video signals cannot be output to anything other than component video connectors.
- 480p/576p, 1080i and 720p component video input signals cannot be converted into S-Video or Video format.
- When using the component video output connectors for connection to the ZONE2 monitor, the ZONE2's on-screen display is not displayed.
- When a non-standard video signal from a game machine or some other source is input, the video conversion function might not operate.

Speaker Installation

Getting Started

Connections

Setup

Playback

Remote Control

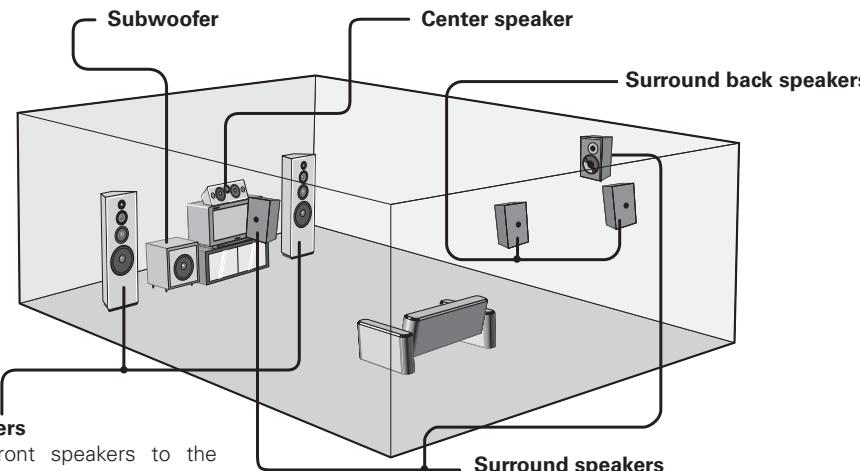

Multi-Zone

Information

Troubleshooting

Speaker Layout

The illustration below shows a basic example of installation of the amplifier combined with 8 speakers and a monitor.

Front speakers

Place the front speakers to the sides of the monitor or screen and as flush with the screen surface as possible.

Two surround back speakers are required to use the THX Ultra2 Cinema, THX Music mode and THX Games mode.

Set the surround back speakers so that the distance to the listening position is the same for both the left and right speakers. It is also recommended that the deviations of the distance from the listening position to L and R channel speakers (front left (FL) and front right (FR), surround left (SL) and surround right (SR), surround back left (SBL) and surround back right (SBR)) is less than 60 cm.

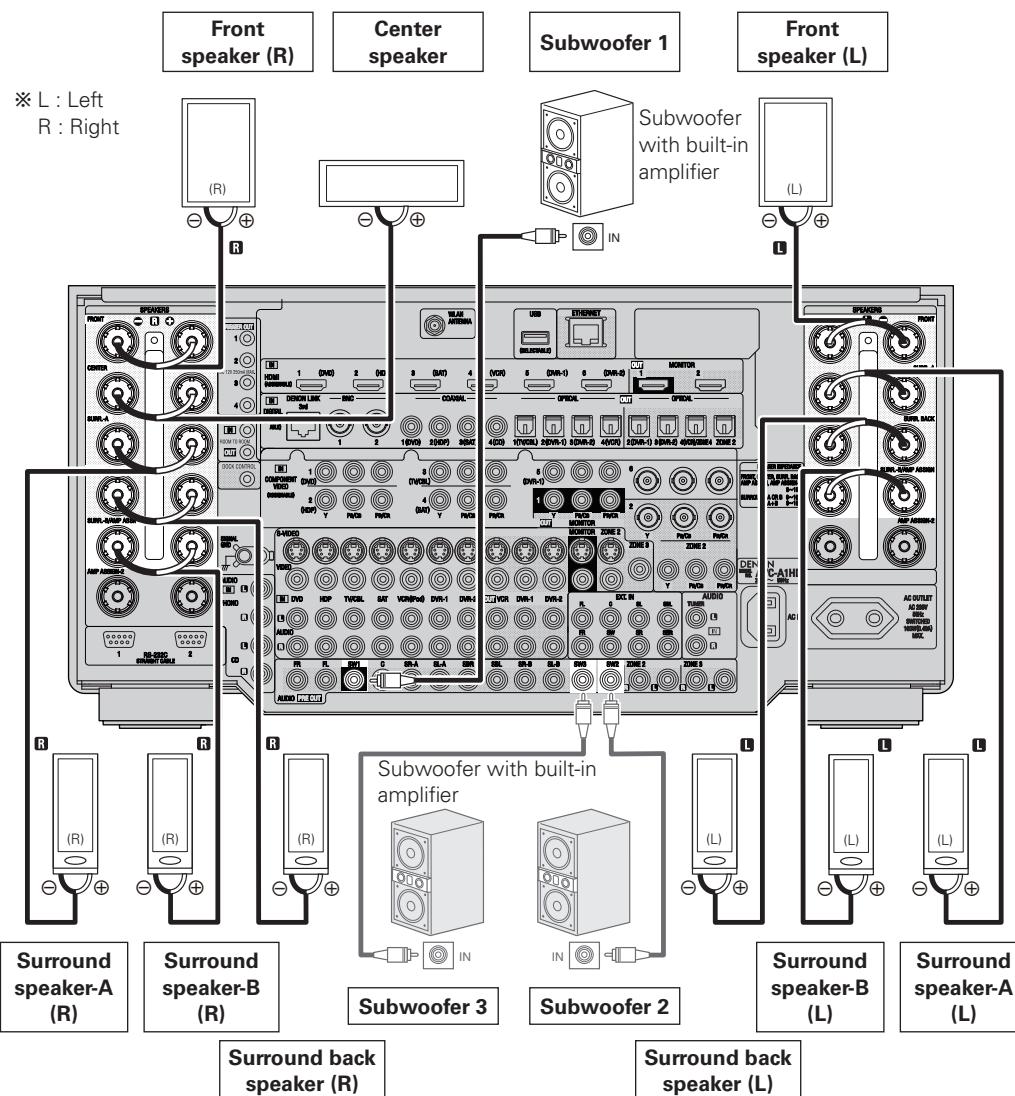

The table below shows a typical speaker configuration for the AVC-A1HD.

	FRONT		CENTER	SURROUND A		SURROUND B		SURROUND BACK			SUBWOOFER (※)
	L	R		L	R	L	R	L	R	1 only	
9.1-channels	<input type="radio"/>	-	<input type="radio"/>								
7.1-channels	<input type="radio"/>	-	-	<input type="radio"/>	<input type="radio"/>	-	<input type="radio"/>				
6.1-channels	<input type="radio"/>	-	-	-	-	<input type="radio"/>	<input type="radio"/>				
5.1-channels	<input type="radio"/>	-	-	-	-	-	<input type="radio"/>				
3.1-channels	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	-	-	-	-	-	-	-	<input type="radio"/>
2.1-channels	<input type="radio"/>	<input type="radio"/>	-	-	-	-	-	-	-	-	<input type="radio"/>
2-channels	<input type="radio"/>	<input type="radio"/>	-	-	-	-	-	-	-	-	-

※ The AVC-A1HD can be connected to a maximum of 3 subwoofers.

Speaker Connections

Example: 9.3-channels

- When using just one surround back speaker, connect it to the left channel (SBL).
- When using Subwoofer 2 or 3, set GUI menu "Manual Setup" – "Speaker Setup" – "Subwoofer Setup" (page 28).

Connecting the Speaker Cables

Carefully check the left (L) and right (R) channels and + (red) and – (black) polarities on the speakers being connected to the AVC-A1HD, and be sure to interconnect the channels and polarities correctly.

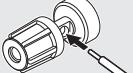

- 1** Peel off about 10 mm of sheathing from the tip of the speaker cable, then either twist the core wire tightly or terminate it.

- 2** Turn the speaker terminal counterclockwise to loosen it.

- 3** Insert the speaker cable's core wire to the hilt into the speaker terminal.

- 4** Turn the speaker terminal clockwise to tighten it.

Protection circuit

If speakers with an impedance lower than specified (for example 4 Ω/ohms speakers) are used for an extended period of time with the volume turned up high, the temperature may rise, activating the protection circuit.

When the protection circuit is activated, the speaker output is shut off and the power indicator flashes red. If this happens, unplug the power cord, then check the speaker cable and input cable connections. If the set is extremely hot, wait for it to cool off and improve ventilation around it. Once this is done, plug the power cord back in and turn the set's power back on.

If the protection circuit is activated again even though there are no problems in the ventilation around the set nor in the connections, the set may be damaged. Turn the power off, then contact a DENON service center.

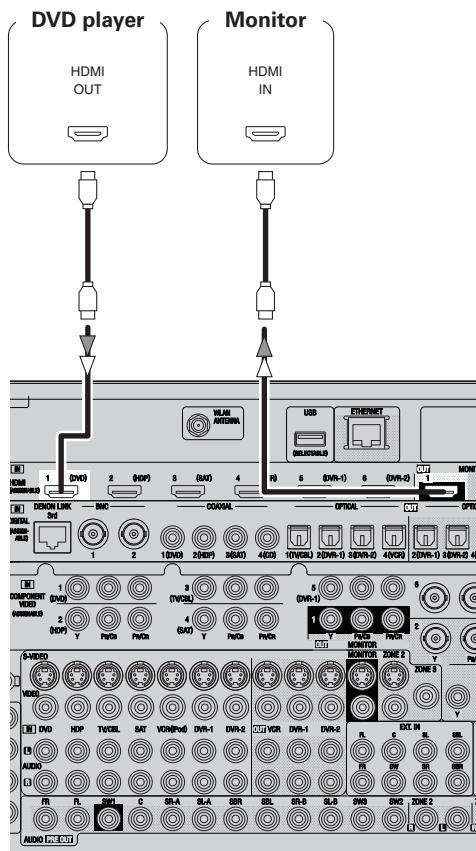

NOTE

- Use speakers with an impedance of 6 to 16 Ω/ohms. When using surround A and B speakers simultaneously, use speakers with an impedance of 8 to 16 Ω/ohms.
- Connect the speaker cables in such a way that they do not stick out of the speaker terminals. The protection circuit may be activated if the core wires touch the rear panel or if the + and – sides touch each other (☞ “Protection circuit”).
- Never touch the speaker terminals while the power supply is connected. Doing so could result in electric shock.

Getting Started	Connections	Setup	Playback	Remote Control	Multi-Zone	Information	Troubleshooting
-----------------	-------------	-------	----------	----------------	------------	-------------	-----------------

Connecting Equipment with HDMI connectors

With HDMI connections, the video and audio signals can be transferred with a single cable.

* The AVC-A1HD is supported to the feature of HDMI listed below.

- 30 and 36 bit Deep Color
- xvYCC
- Auto Lipsync Correction

Compatible audio format	Details	Discs (examples)
2-channel linear PCM	2ch 32-192 kHz 16/20/24 bits	CD, DVD-Video, DVD-Audio
Multi-channel linear PCM	8ch 32-192 kHz 16/20/24 bits	DVD-Audio
Dolby Digital, DTS	Bitstream	DVD-Video
DSD	2/5.1ch 2.8224 MHz 1 bit	SACD
Dolby Digital Plus, Dolby TrueHD, DTS-HD	Bitstream	HD DVD, Blu-ray Disc

NOTE

- Use a CPPM-compatible DVD player to play DVD-Audio discs that are copyright-protected by CPPM.
- The audio signals output from the HDMI connector (sampling frequency, bit rate, etc.) may be restricted by the connected device.
- Video signals are not output properly when using devices that are not HDCP-compatible.
- Video signals are not output if the input video signals do not match the monitor's resolution. In this case, switch the DVD player's resolution to a resolution with which the monitor is compatible.
- If the GUI menu "Manual Setup" – "HDMI Setup" – "Audio" setting (page 31) is set to "Amp," the sound may be interrupted when the monitor's power is turned off.
- Use a cable on which the HDMI logo is indicated (a certified HDMI product) for connection to the HDMI connector. Normal playback may not be possible when using a cable other than one on which the HDMI logo is indicated (a non-HDMI-certified product).
- If the monitor or DVD player does not support Deep Color, Deep Color signal transfer is not possible.
- If the monitor or DVD player does not support xvYCC, xvYCC signal transfer is not possible.
- If the monitor does not support "Auto Lipsync Correction" function, this function will not work.

- The AVC-A1HD is compatible with the HDMI's CEC (Consumer Electronics Control) function. Please note the following.
 - It may not work depending on the device it is connected to and its setup.
 - It does not operate with televisions or players that are not compatible with HDMI's CEC.

- When the AVC-A1HD and DVD player are connected using an HDMI cable, also connect the AVC-A1HD and monitor using an HDMI cable.

- If the connected monitor or DVD player only has a DVI-D connector, use an HDMI/DVI converter cable. When using a DVI cable, no audio signals are transmitted.
- Use a Deep Color compatible cable for connection to Deep Color compatible devices.

Copyright protection system (HDCP)

In order to play the digital video and audio signals of a DVD-Video or DVD-Audio disc using HDMI/DVI connections, both the connected DVD player and monitor must be equipped for a copyright protection system called "HDCP" (High-bandwidth Digital Content Protection). HDCP is a copy protection technology consisting of data encoding and mutual identification of the devices.

The AVC-A1HD is HDCP-compatible. For details on the DVD player or monitor you are using, refer to its operating instructions.

When connecting with an HDMI/DVI converter cable (adapter)

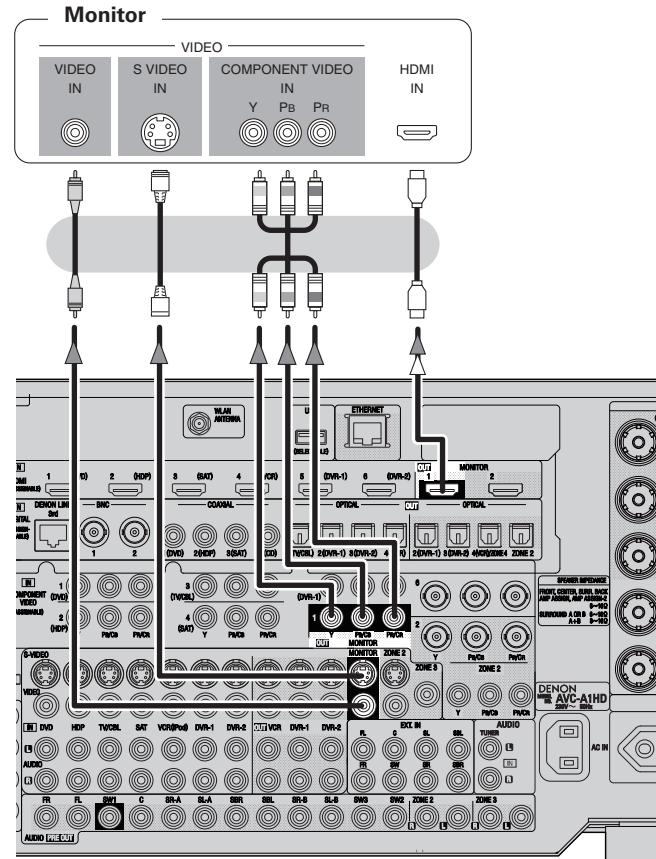

- HDMI video signals are theoretically compatible with the DVI format.
When connecting to a monitor, etc., equipped with a DVI-D connector, connection is possible using an HDMI/DVI converter cable, but depending on the combination of components in some cases the video signals will not be output.
- When connecting using an HDMI/DVI converter adapter, the video signals may not be output properly due to poor connections with the connected cable, etc.

- By default, the HDMI audio signals are output from the speakers connected to the AVC-A1HD.
- To output the sound from the TV, make the settings at GUI menu "Manual Setup" – "HDMI Setup" – "Audio" – "TV" (page 31).

Connecting the Monitor

- Connect the cables to be used (☞ page 9 "Video Conversion Function").
- With HDMI connections, the video and audio signals can be transferred with a single cable.
- To output the audio signals to the monitor with HDMI connections, set GUI menu "Manual Setup" – "HDMI Setup" – "Audio" to "TV" (☞ page 31).

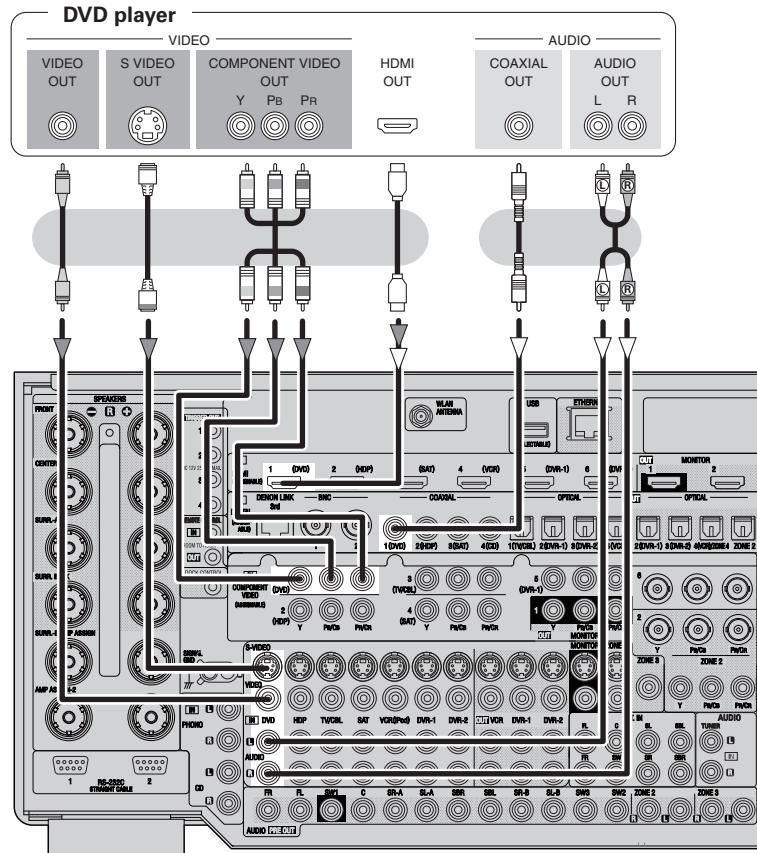

Connecting the Playback Components

Carefully check the left (L) and right (R) channels and the inputs and outputs, and be sure to interconnect correctly.

DVD Player

- Connect the cables to be used.
- With HDMI connections, the video and audio signals can be transferred with a single cable.

NOTE

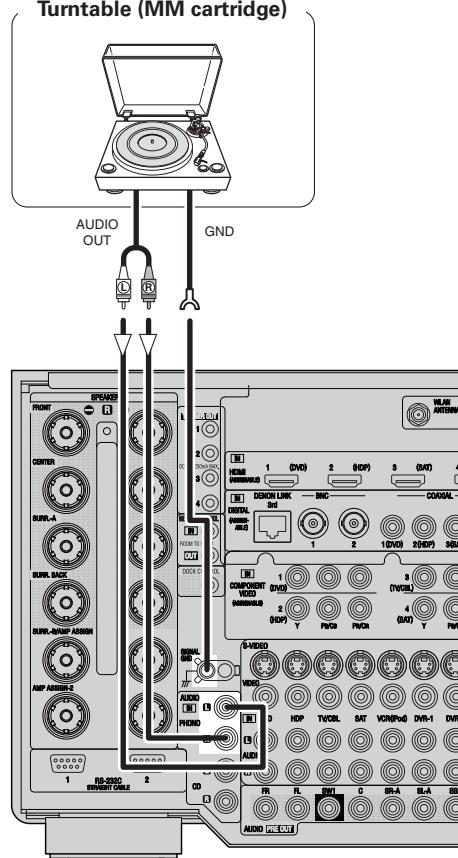

- The component video connectors may be indicated differently on your monitor. For details, see the monitor's operating instructions.
- The audio signals output from the HDMI connectors are only the HDMI input signals.

- Connect an HDP (High-Definition Player) in the same way.
- When using an optical cable or a BNC cable for the digital audio connection, make the settings at GUI menu "Source Select" – "DVD" – "Assign" – "Digital" (☞ page 43).
- When using a BNC cable for the component video connection, make the settings at GUI menu "Source Select" – "DVD" – "Assign" – "Component" (☞ page 43).

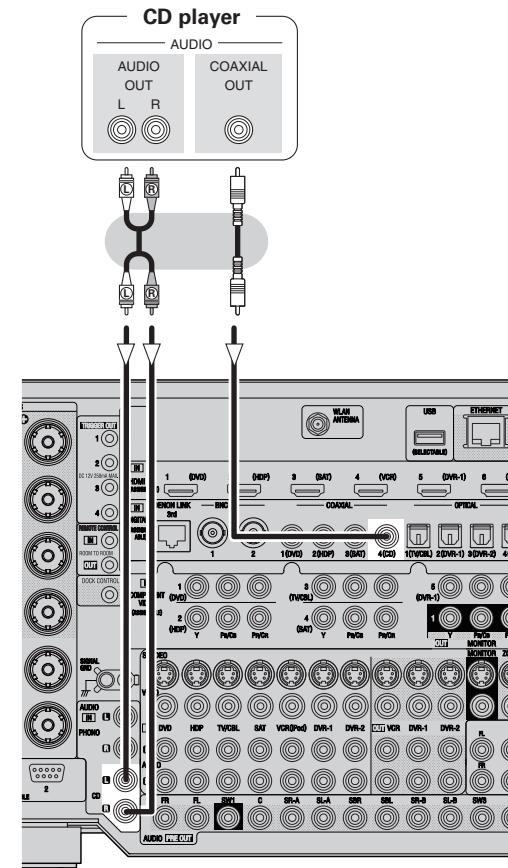

Record Player

Turntable (MM cartridge)

CD Player

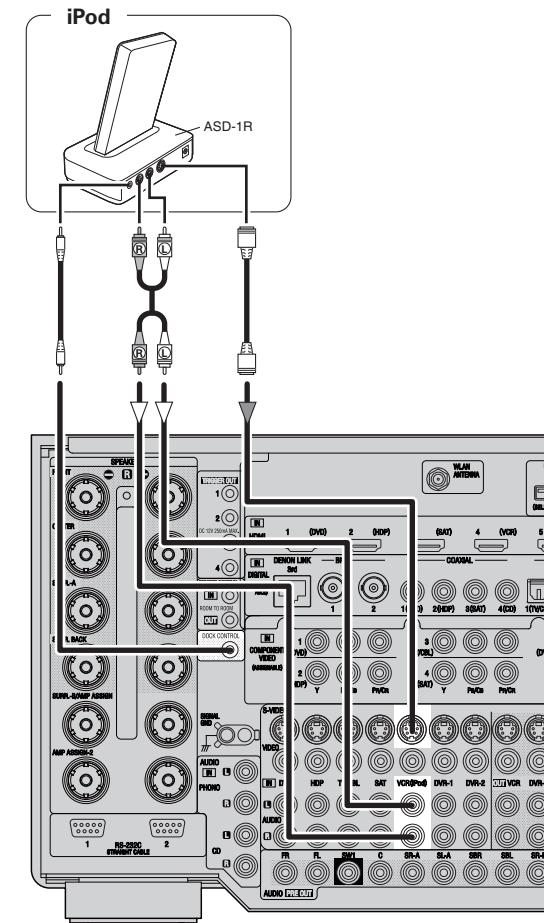

Connect the cables to be used.

iPod®

Use a DENON Control Dock for iPod (ASD-1R, sold separately) to connect the iPod to the AVC-A1HD. For instructions on the Control Dock for iPod settings, refer to the Control Dock for iPod's operating instructions.

Example :

- When connecting a record player with an MC cartridge, use a commercially available MC head amplifier or a step-up transformer.
- Induction hum (a booming sound) may be produced from the speakers if the volume is raised with no record player connected.
- With some record players, noise may be generated when the ground wire is connected. If so, disconnect the ground wire.

NOTE

The AVC-A1HD's SIGNAL GND terminal is meant to reduce noise when a record player is connected. This is not a safety ground terminal.

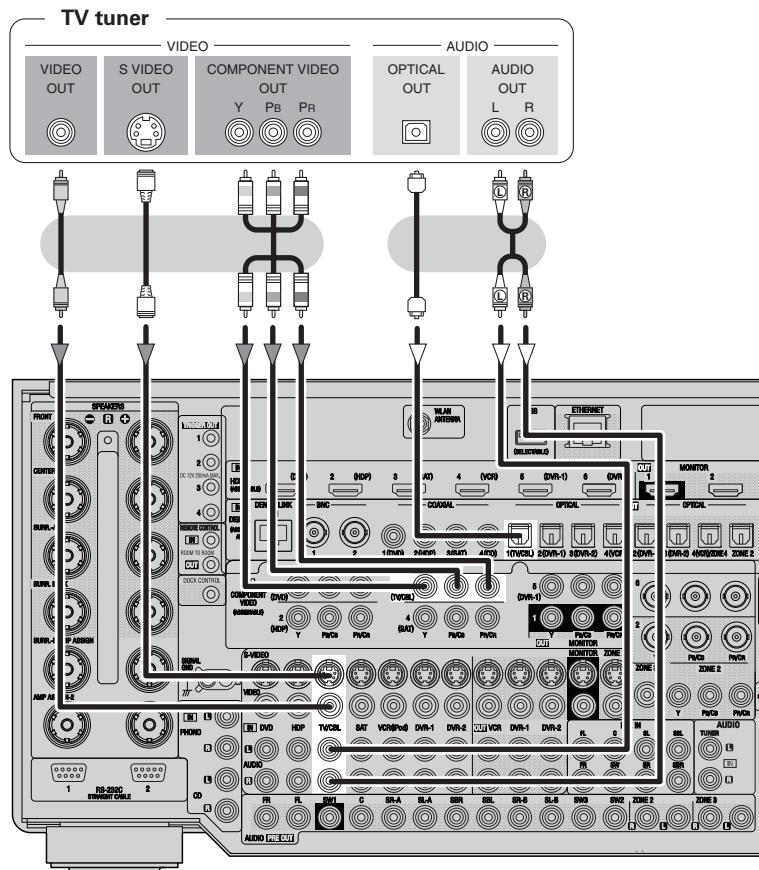

When using an optical cable or a BNC cable for the digital audio connection, make the settings at GUI menu "Source Select" – "CD" – "Assign" – "Digital" (☞ page 43).

- With the default settings, the iPod can be used connected to the VCR (iPod) connector.
- To assign the iPod to a connector other than VCR (iPod), make the settings at GUI menu "Source Select" – "(input source to which iPod dock assigned)" – "Assign" – "iPod dock" (☞ page 44).

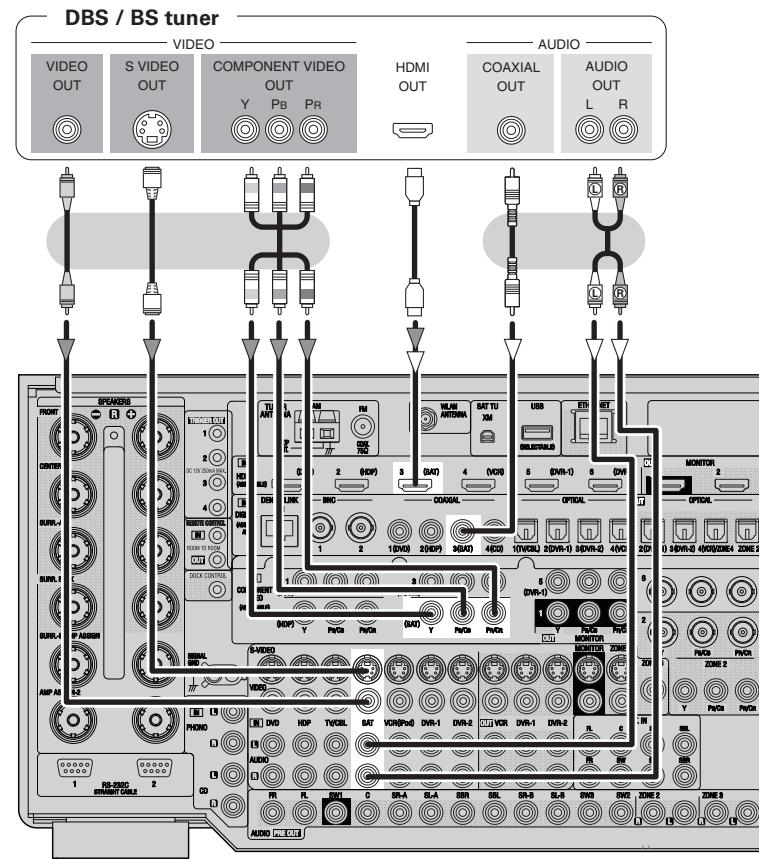

TV/CABLE Tuner

Connect the cables to be used.

Satellite Receiver

Connect the cables to be used.

- When using a coaxial digital cable or a BNC cable for the digital audio connection, make the settings at GUI menu "Source Select" – "TV/CBL" – "Assign" – "Digital" (☞ page 43).
- When using a BNC cable for the component video connection, make the settings at GUI menu "Source Select" – "TV/CBL" – "Assign" – "Component" (☞ page 43).

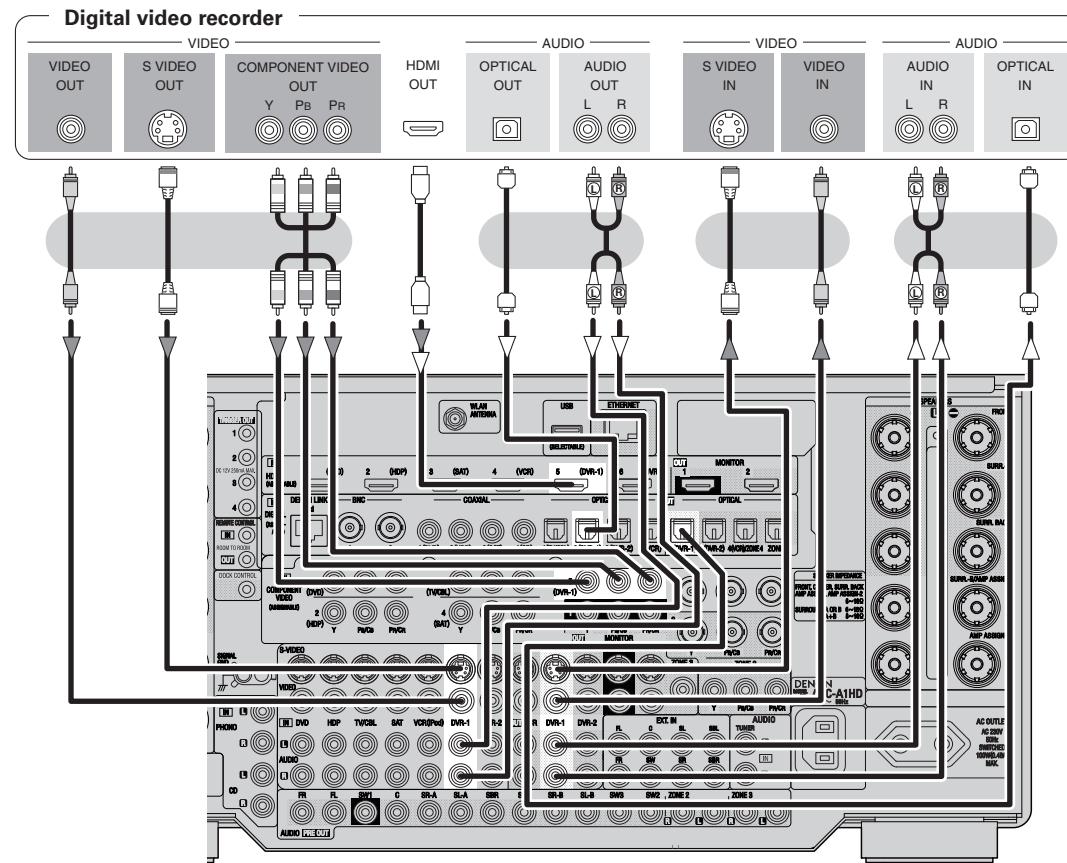

- When using an optical cable or a BNC cable for the digital audio connection, make the settings at GUI menu "Source Select" – "SAT" – "Assign" – "Digital" (☞ page 43).
- When using a BNC cable for the component video connection, make the settings at GUI menu "Source Select" – "SAT" – "Assign" – "Component" (☞ page 43).

Connecting the Recording Components

Carefully check the left (L) and right (R) channels and the inputs and outputs, and be sure to interconnect correctly.

Digital Video Recorder

Connect the cables to be used.

- Make analog connections if you wish to record analog audio signals.
- When recording to a digital video recorder, it is necessary that the type of cable used with the playback source equipment be the same type that is connected to the AVC-A1HD DVR-1 OUT connector.

Example: TV IN → S-Video cable : DVR-1 OUT → S-Video cable
TV IN → Video cable : DVR-1 OUT → Video cable

- Connect a DVR-2 in the same way.
- When using a component video cable or a BNC cable for the component video connection make the settings at GUI menu "Source Select" – "DVR-1" or "DVR-2" – "Assign" – "Component" (page 43).

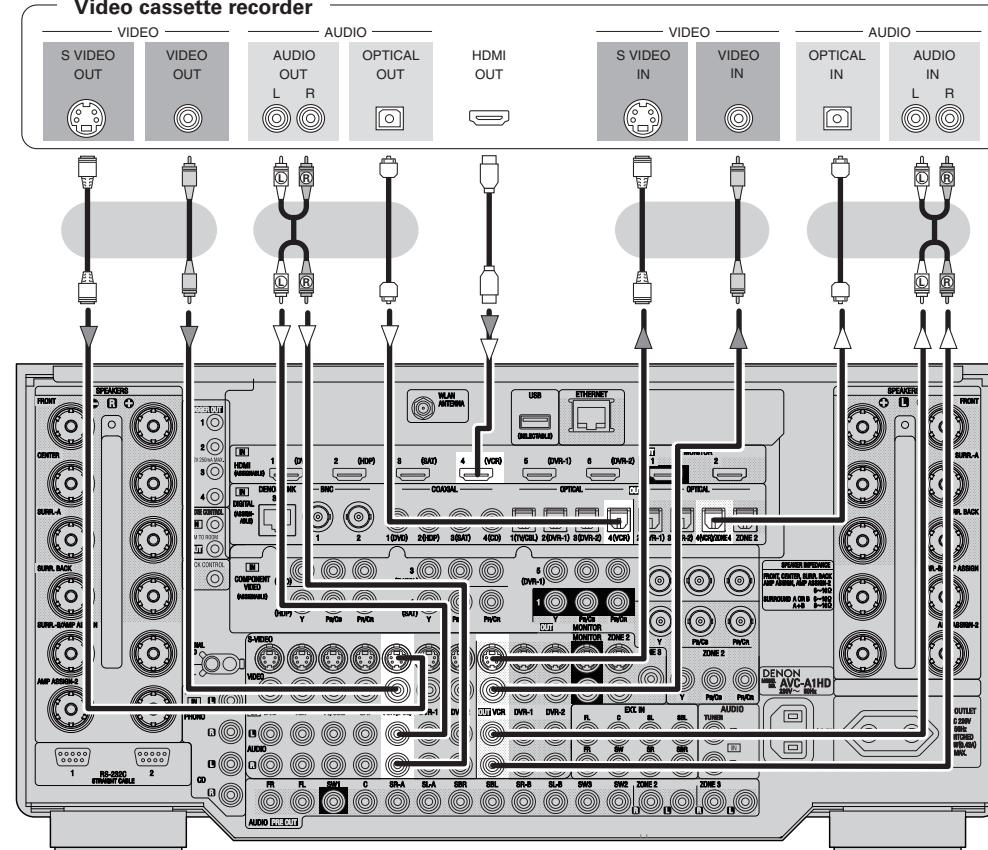

NOTE

- Do not connect the output of the component connected to the AVC-A1HD's OPTICAL2 output connector to any input connector other than OPTICAL2.
- Do not connect the output of the component connected to the AVC-A1HD's OPTICAL3 output connector to any input connector other than OPTICAL3.

Video Cassette Recorder

Connect the cables to be used.

Video cassette recorder

- When recording to a VCR, it is necessary that the type of cable used with the playback source equipment be the same type that is connected to the AVC-A1HD VCR OUT connector.

Example: TV IN → S-Video cable : VCR OUT → S-Video cable
TV IN → Video cable : VCR OUT → Video cable

- When using a component video cable or a BNC cable for the video connection, make the settings at GUI menu "Source Select" – "VCR" – "Assign" – "Component" (page 43).

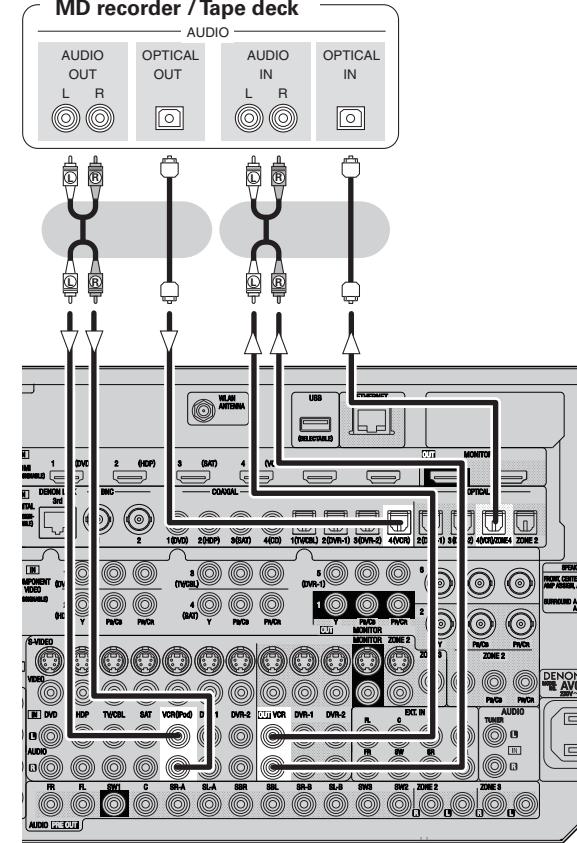

NOTE

Do not connect the output of the component connected to the AVC-A1HD's OPTICAL4 output connector to any input connector other than OPTICAL4.

CD Recorder / MD Recorder / Tape Deck

Make analog connections if you wish to record analog audio signals, or digital connections if you wish to record digital audio signals, depending on the types of connectors on the components being used.

CD recorder / MD recorder / Tape deck

NOTE

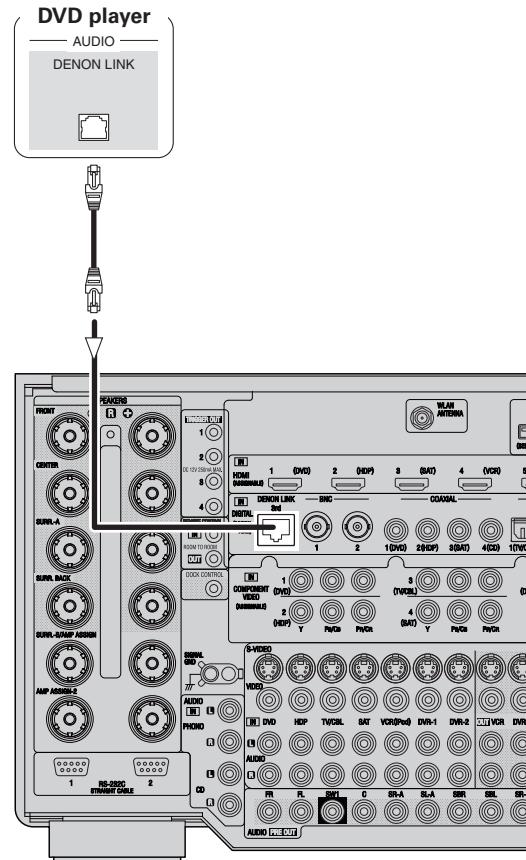

Do not connect the output of the component connected to the AVC-A1HD's OPTICAL4 output connector to any input connector other than OPTICAL4.

Connections to Other Devices

Carefully check the left (L) and right (R) channels and the inputs and outputs, and be sure to interconnect correctly.

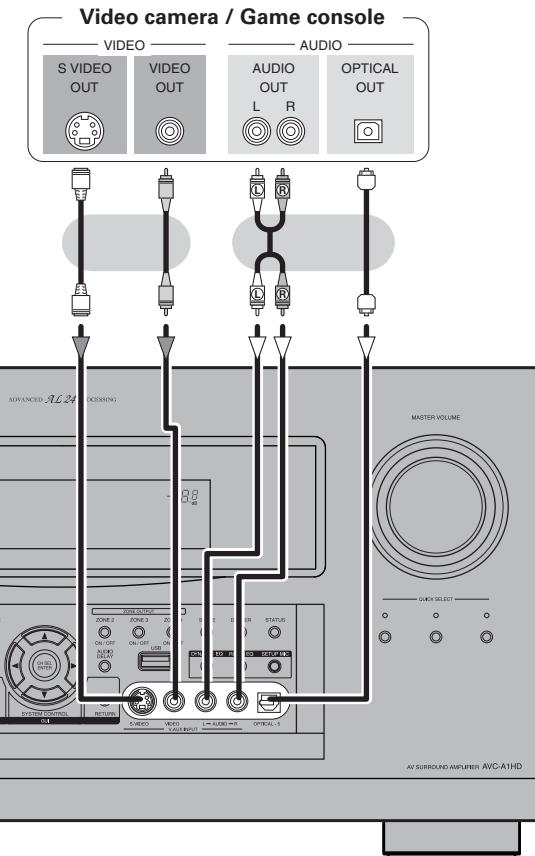

Components Equipped with a DENON LINK connector

Multi-channel playback is possible with DVD-Audio discs, Super Audio CD, etc.

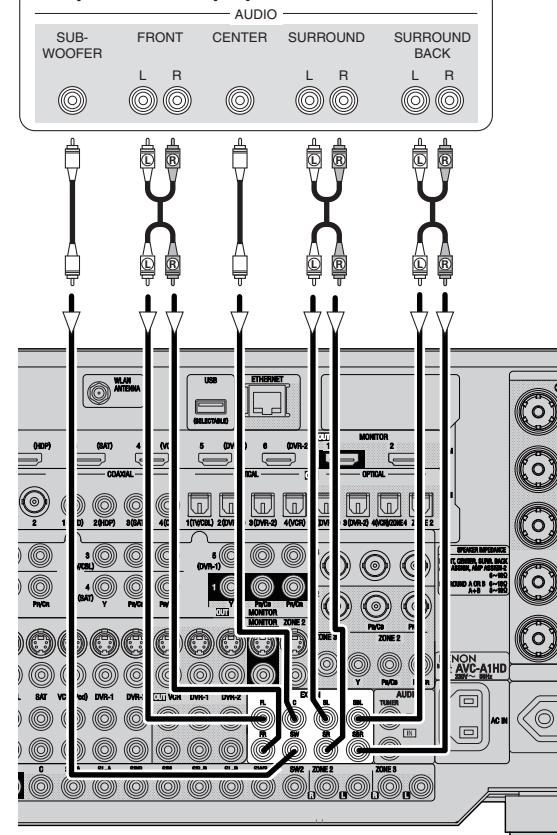

To use with DENON LINK connections, make the settings at GUI menu "Source Select" – "(input source)" – "Assign" – "Digital" – "DENON LINK" (☞ page 43).

Video Camera / Game Console

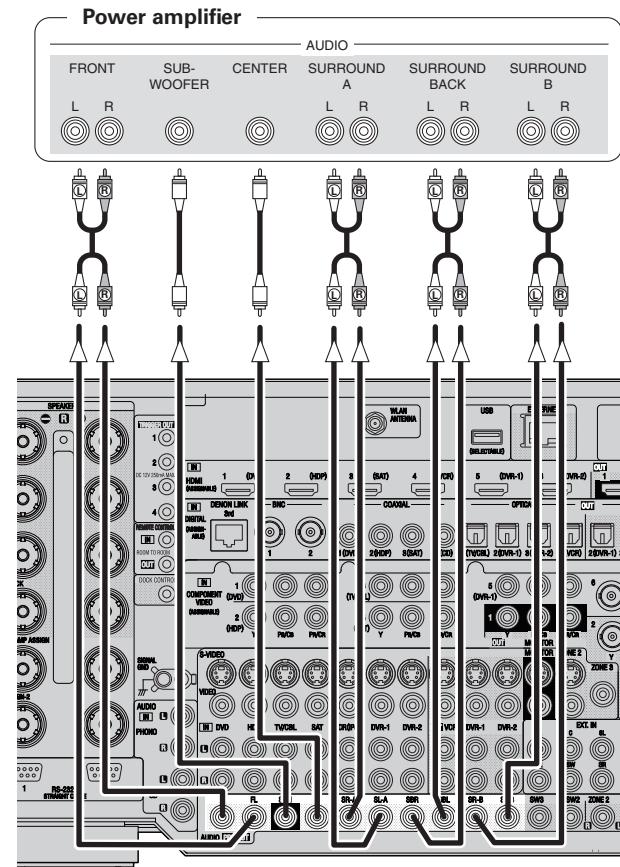

Component with Multi-channel Output connectors

DVD player / Super Audio CD player / External decoder

- To play the analog input signals input to the EXT. IN connectors, press the **INPUT MODE** button on the main unit or **INPUT** button on the main remote control unit and select "EXT. IN" or make the settings at GUI menu "Source Select" – "(input source)" – "Input Mode" – "Input Mode" – "EXT. IN" (☞ page 45).
- The video signal can be connected in the same way as a DVD player (☞ page 13).
- To play copyright-protected discs, connect the AVC-A1HD's EXT. IN connector with the DVD player's analog multi-channel output connector.

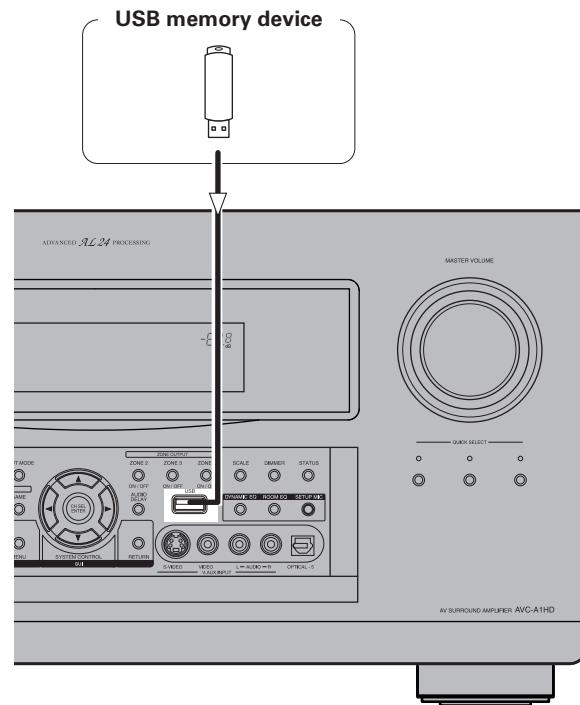

External Power Amplifier

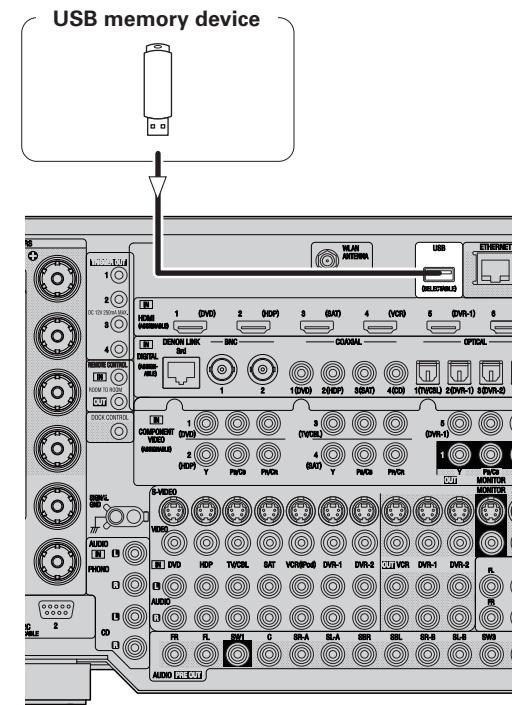

When using just one surround back speaker, connect it to the left channel (SBL).

USB Port

Front panel

Rear panel

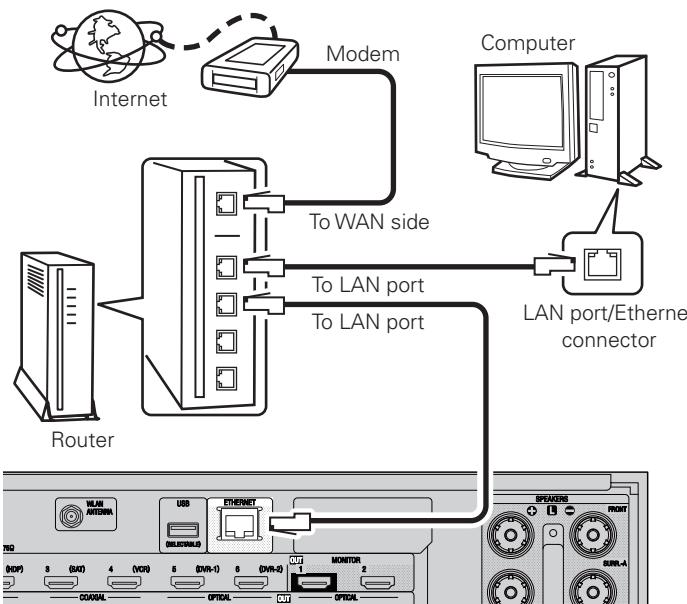

- In the initial status, USB memory devices can be used by connecting them to the USB port on the front panel.
- To change the port to be used, see "USB Select" on page 45.
- For instructions on playing the files on a USB memory device, see page 60, 61.

NOTE

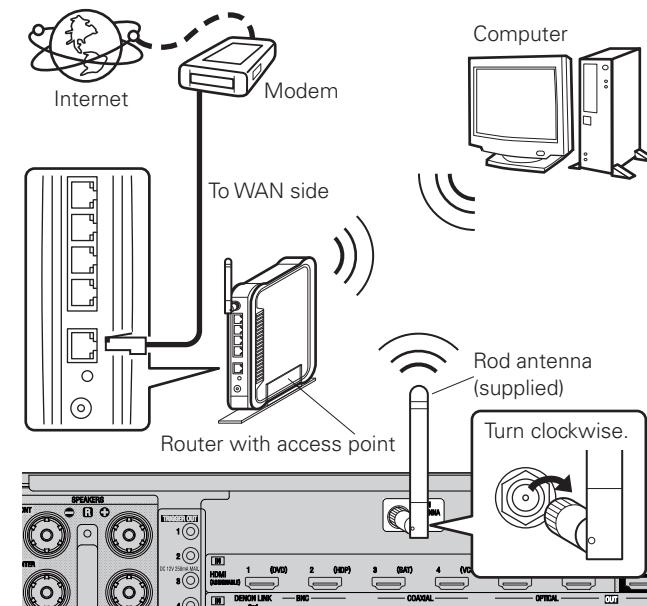

- Set to the USB port you want to use.
- The AVC-A1HD is equipped with two USB ports, one each on the front and rear panels. It is not possible to use the set with USB memory devices connected to both the ports at the same time. Select the USB port you want to use at the GUI menu "Source Select" – "NET/USB" – "Playback Mode" – "USB Select" (page 45).
- Do not use the extension cable for connecting the USB memory device to the AVC-A1HD's USB port. Use of the extension cable may cause harmful interference.

Network Audio

[Wired LAN]

[Wireless LAN]

Required system

□ Broadband Internet connection

A broadband line connection to the Internet is required in order to use the AVC-A1HD's Internet radio function and firmware update.

□ Modem

This is a device that is connected to the broadband line to communicate with the Internet. Some are integrated with the router.

□ Router

- When using the AVC-A1HD, we recommend you use a router equipped with the following functions:

- Built-in DHCP (Dynamic Host Configuration Protocol) server
This function automatically assigns IP addresses on the LAN.
- Built-in 100BASE-TX switch
When connecting multiple devices, we recommend a switching hub with a speed of 100 Mbps or greater.
- When using with a wireless LAN, prepare a broadband router with built-in access point.

□ Ethernet cable (CAT-5 or greater recommended)

Use for wired LAN.

- The AVC-A1HD does not come with an Ethernet cable.
- Some flat type Ethernet cables are easily affected by noise.
We recommend using a normal type cable.
- For the Ethernet cable, used a shielded twisted pair (STP) cable. Do not use an unshielded twisted pair (UTP) cable, as it may exceed noise standard limits.

□ Computer

A computer with the following specifications is required to use a media server:

- OS
Windows® XP Service Pack2, Windows Vista
- Software (Prepare one of the following.)
 - .NET Framework 1.1 and Windows Media Connect (Windows XP)
 - Windows Media Player ver.11
 - DLNA-compatible server software
- Internet browser
Microsoft Internet Explorer 5.01 or later
- LAN port
- 300 MB or more free disk space

※ Free disk space is required to store music and video files. The following sizes are approximate.

Format	Bit rate	Per minute	Per hour
MP3 / WMA	128 kbps	Approx. 1 MB	Approx. 60 MB
	192 kbps	Approx. 1.5 MB	Approx. 90 MB
MPEG-4 AAC	256 kbps	Approx. 2 MB	Approx. 120 MB
	392 kbps	Approx. 3 MB	Approx. 180 MB
WAV (LPCM)	1400 kbps	Approx. 10 MB	Approx. 600 MB
FLAC	1080 kbps	Approx. 7.7 MB	Approx. 464 MB

For connections to the Internet, contact an ISP (Internet Service Provider) or a computer shop.

NOTE

- A contract with an ISP is required to connect to the Internet. No additional contract is needed if you already have a broadband connection to the Internet.
- The types of routers that can be used depend on the ISP. Contact an ISP or a computer shop for details.
- Depending on the server, video files may be displayed, but they cannot be played on the AVC-A1HD.

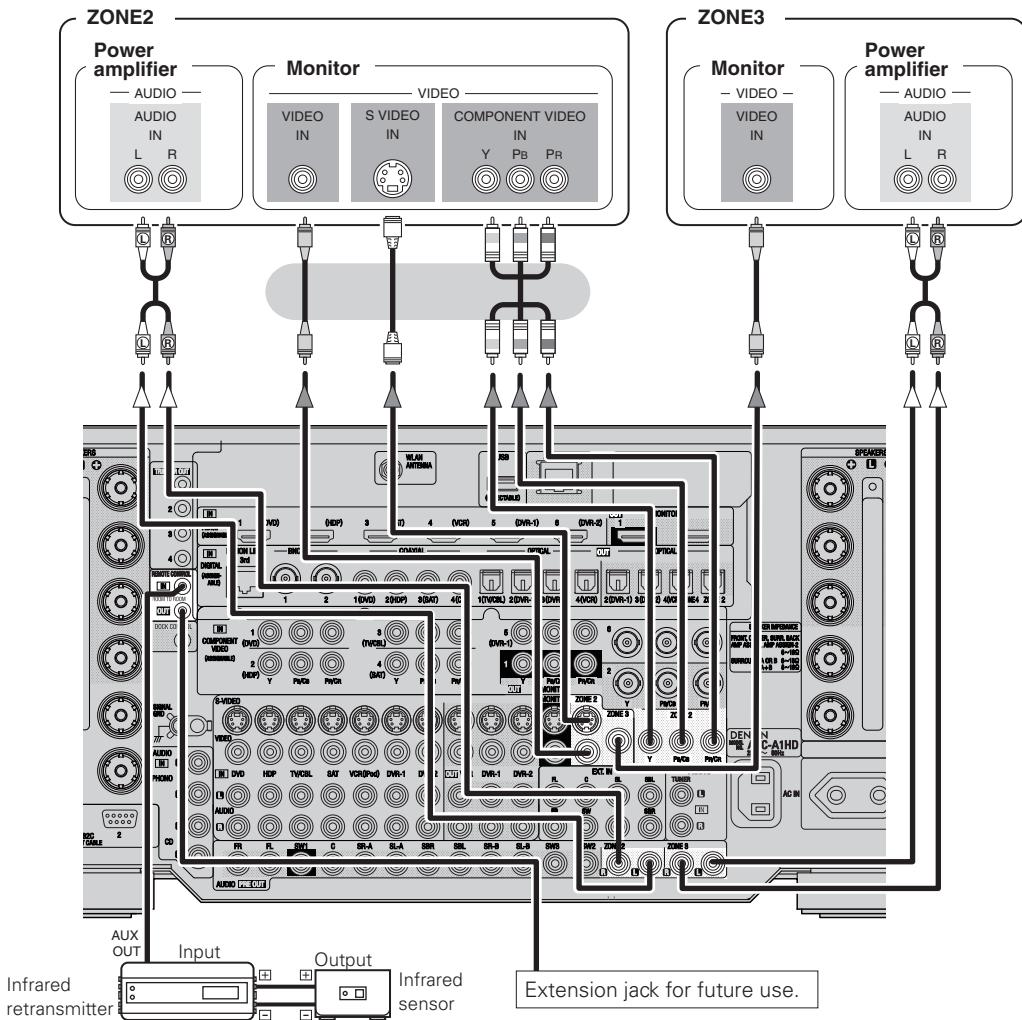

Others

- If you have an Internet provider contract for a line on which network settings are made manually, make the settings at GUI menu "Manual Setup" – "Network Setup" (page 33 ~ 36).
- With the AVC-A1HD, it is possible to use the DHCP and Auto IP functions to make the network settings automatically.
- When using a broadband router (DHCP function), the AVC-A1HD sets the IP address, etc., automatically.
When using the AVC-A1HD connected to a network with no DHCP function, make the settings for the IP address, etc., at GUI menu "Manual Setup" – "Network Setup" (page 33 ~ 36).
- The AVC-A1HD is not compatible with PPPoE. A PPPoE-compatible router is required if you have a contract for a line of the type with which the PPPoE is set.
- Depending on the ISP with which you have your contract, it may be necessary to make proxy server settings to use the Internet radio function. If you made proxy server settings on the computer to connect to the Internet, make the proxy server settings on the AVC-A1HD in the same way.

Multi Zone

ZONE2 or ZONE3 Pre-out Connections

- If another power amplifier or pre-main (integrated) amplifier is connected, the ZONE2 or ZONE3 pre-out (variable or fixed level) connectors can be used to play a different program source in ZONE2 or ZONE3 the same time (☞ page 76 ~ 81).
- When using a component video cable to connect the AVC-A1HD and input device, connect the ZONE2 monitor output to the component video connectors. When using an S-Video cable, connect the cable to the S-Video or the video connectors. When using a video cable, connect the cable to the video connectors.
- The ZONE2 (ZONE3) video out is only for ZONE2 (ZONE3).

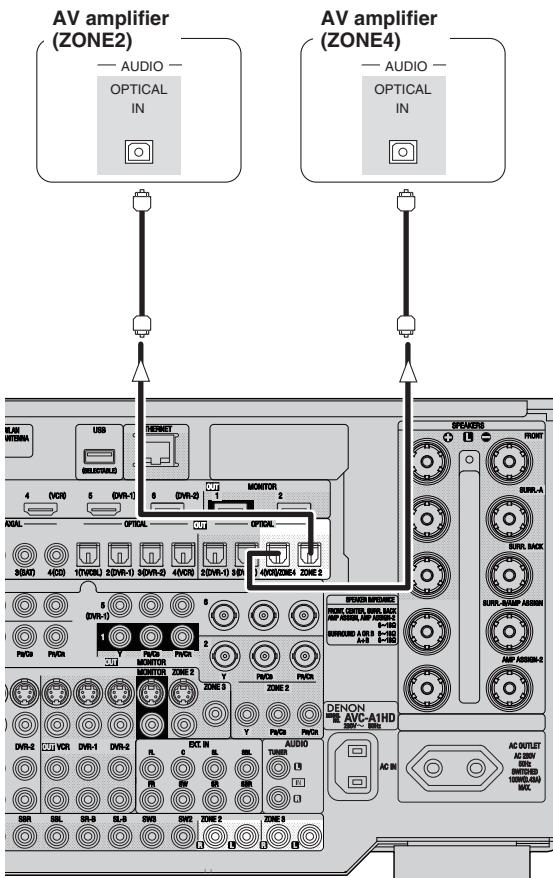

NOTE

- For the audio output, use high quality pin-plug cords so that no induction hum or noise is produced.
- For instructions on installing and operating separately sold devices, refer to the respective devices' operating instructions.
- To conduct multi-zone playback, see "Amp Assign / Multi-Zone Connections and Operations" (☞ page 76 ~ 81).

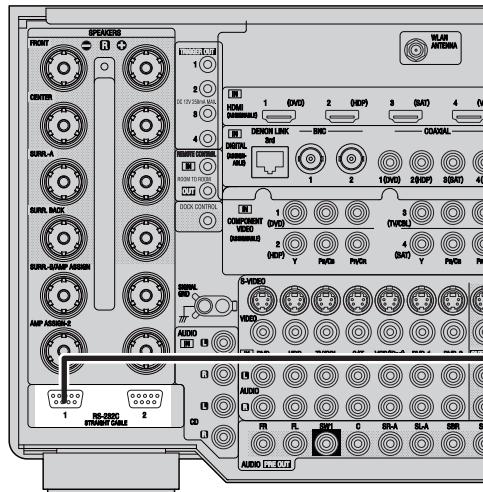

ZONE2 or ZONE4 Optical Connections

The AVC-A1HD is equipped with Optical output connectors for ZONE2 and ZONE4. If a bit-stream amp is rigged-up, these zones can also be used to enjoy home theater.

- Connect the monitor for ZONE2 the same as the "ZONE2 or ZONE3 Pre-out Connectors." (☞ See left column).
- If the signal inputted to ZONE2 is analog, change to PCM(2-channel) signal, and output it from ZONE2 optical output connectors.

External Controller

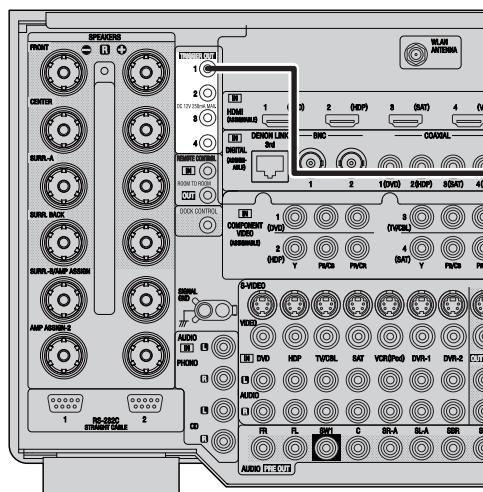

RS-232C connector

This connector is used for an external controller.

- ※ If you wish to control the AVC-A1HD from an external controller using the RS-232C connector, perform the operation below beforehand.
 - ① Turn on the AVC-A1HD's power.
 - ② Turn off the AVC-A1HD's power from the external controller.
 - ③ Check that the AVC-A1HD is in the standby mode.

- When using in combination with an RF Remote Controller (RC-7000CI, sold separately) and RF Remote Receiver (RC-7001RCI, sold separately) two-way communication with an RF Remote Controller is possible. The AVC-A1HD's status information as well as iPod and Internet audio music files can be browsed watching the RF Remote Controller's display. For details, refer to the operating instructions of the respective devices.
- When used in combination with an RF Remote Controller and RF Remote Receiver, make the settings at GUI menu "Manual Setup" – "Option Setup" – "2Way Remote" – "Used" (☞ page 40).
- When using the 2-way remote control unit, connect to the Port 1 RS-232C connector.
- If GUI menu "Manual Setup" – "Option Setup" – "2Way Remote" is set to "Used," you cannot use port 1 of the RS-232C connector I for the external controller.

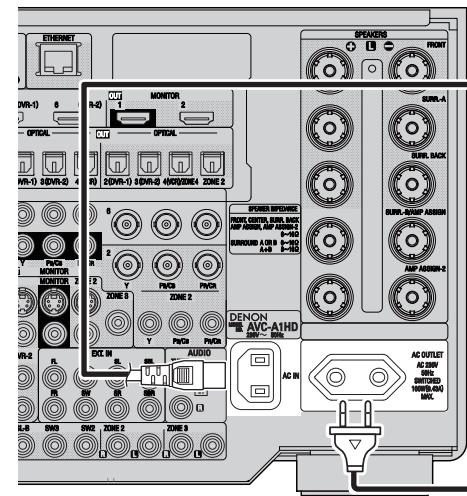

Trigger output jacks

The power of an external device equipped with a trigger input jack can be turned on and off in association with operations on the AVC-A1HD. For details, see GUI menu "Manual Setup" – "Option Setup" – "Trigger Out 1," "Trigger Out 2," "Trigger Out 3" or "Trigger Out 4" (☞ page 39).

- Output level: 250 mA/12 V
Check the trigger input conditions of the connected device.

Connecting the Power Cord

Wait until all connections have been completed before connecting the power cord.

To household power outlet (AC 230 V, 50 Hz)
Power cord (included)

Connection to the AC outlet

- These outlets supply power to external audio devices.
- The power supplied from this outlet turns on and off together with the set's power switch.
- Audio equipment with a total power consumption of 100 W (0.43 A) can be connected.

NOTE

- Insert the AC plugs securely. Incomplete connections could cause noise.
- Only use the AC outlet to plug in audio devices. Do not use them as power supplies for hairdryers or anything other than audio equipment.

Once Connections are Completed

Turning the Power On (☞ page 54)

GUI Menu Operations

With the AVC-A1HD, settings and operations for most functions can be performed by operating while looking at the GUI menus displayed on the monitor screen.

The GUI cannot be superimposed when xvYCC signals and component 1080p signal, computer's resolution (e.g.VGA) are input.

Example of the Display of the GUI Mark at a Title

Items for which this mark is indicated at the title can be operated from the GUI.
We recommend performing such operations from the GUI.

Auto Setup

Optimize settings for speakers in use.

This is the GUI icon for this setting item or for the menu series to which this item belongs.

Example of Display of Default Values

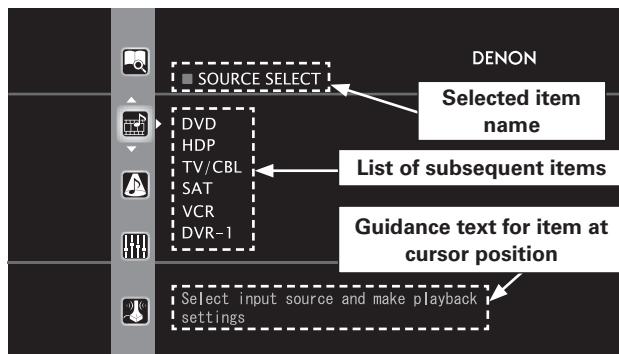

In lists of selectable items or adjustable ranges, the item surrounded by a border is the default value.

[Selectable items] **9.1** 7.1 5.1

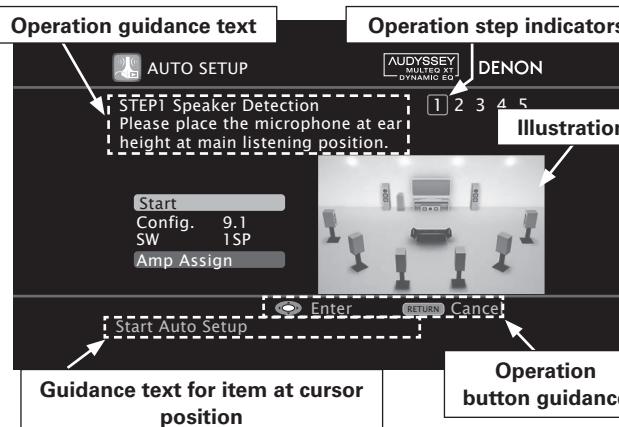

Examples of GUI Screen Displays

Some typical examples are described below.

Example: Browse Menu (Top Menu)

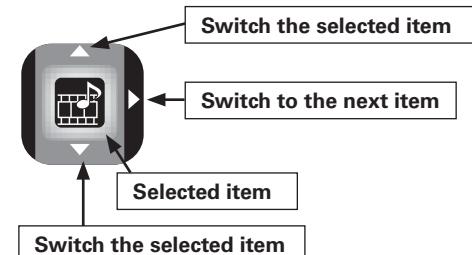

Example: Menus with Illustrations (Auto Setup)

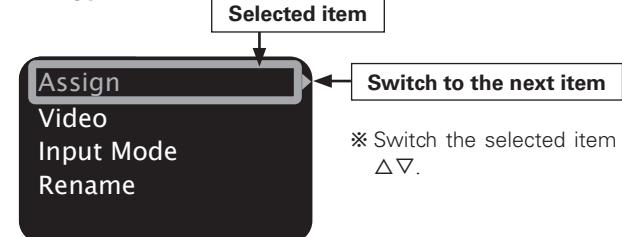

Cursor Position Display

Icon

List

Operations

The same operation is possible on the main unit or remote control unit.

1 Press the MENU button.

The GUI menu is displayed.

※ To operate from the main remote control unit, be sure to set the remote control unit to the AMP mode.

2 Press the △ ▽ ▷ button to select the menu to be set or operated.

※ To return to the previous item, press the ◁ or RETURN button.

3 Press the ENTER button to enter the setting.

4 Press the MENU button to finish.

Auto Setup

- Audyssey MultEQ® XT automatically measures the acoustical problems in the listening environment to create the best audio experience for your home theater.
- It optimizes a large listening area where one or more listeners are seated.

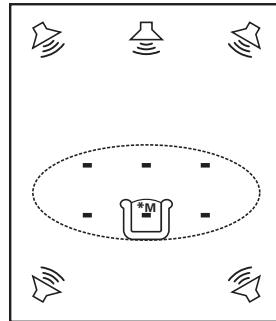

Measurements are performed by placing the calibrated microphone (DM-A505Z) successively at multiple positions throughout the listening area as shown in **Example ①**. For best results, it is strongly recommended to measure 6 or more positions so that the measurements have the proper spatial weighting.

Even if the listening environment is small as shown in **Example ②**, measuring at multiple points throughout the listening environment results in more effective correction.

Example ①

Example ②

About the main listening position (*M)

The main listening position refers to the most central position where one would normally sit within the listening environment. MultEQ XT uses the measurements from this position to calculate speaker distance, level, polarity, and the optimum crossover value for the subwoofer.

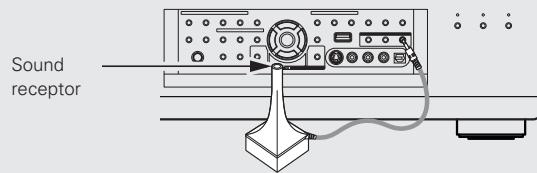

To make manual adjustments to the settings, see pages 28 ~ 30.

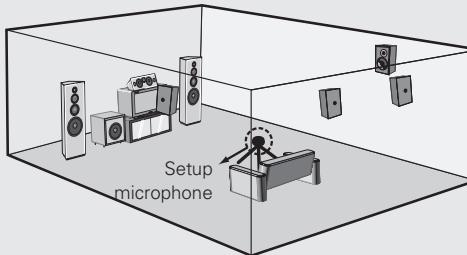

Preparations

- 1 Connect the included calibrated setup microphone to the **SETUP MIC** jack on the main unit.

The "Auto Setup" screen appears automatically.

- 2 Place the microphone at ear height on a tripod or stand with the microphone pointing directly up towards the ceiling.

※ It is not recommended to hold it in your hand. Be sure that the path from microphone to the speakers is not blocked by objects. Avoid placing the microphone close to a seat back or wall as sound reflections may give inaccurate results.

When using a subwoofer, make the following settings before starting the auto setup procedure:

- Defeat the volume and crossover controls if possible
- If this is not possible then set
 - Volume: "12 o'clock" position
 - Crossover frequency: "Maximum/Highest Frequency"
 - Low pass filter: "Off"
 - Standby mode: "Off"

NOTE

- Do not disconnect the setup microphone until the auto setup procedure is completed.
- When using headphones, unplug the headphones before starting the auto setup procedure.

Auto Setup

Optimize settings for speakers in use.

● Menu tree ●

Auto Setup

1 Auto Setup

2 Option

3 Parameter Check

1 Auto Setup

The settings are performed automatically.

[Auto setup flow]

STEP1: Speaker Detection

STEP2: Measurement (2 to 8 positions)

STEP3: Calculation

STEP4: Check

STEP5: Store

Start

Start Auto Setup.

The Audyssey MultEQ XT Auto Setup process automatically calculates the size, level, distance, bass management crossover frequency, and optimal settings for each speaker and subwoofer. Audyssey MultEQ XT corrects acoustical distortions within the listening area.

Before starting, connect and position all your speakers.

Once started, MultEQ XT will play a series of test tones through each speaker.

If an error message appears during the measurements, check "Error Messages" (page 27), take the advised action, then start the measurements again.

Configuration

The speaker system to be measured can be selected ahead of time here.

[Selectable items]	9.1	*1	7.1	*1	5.1	*1
	9.2	*2	7.2	*2	5.2	*2
	9.3	*3	7.3	*3	5.3	*3

*1: This can be set when "Subwoofer" is set to "1SP".

*2: This can be set when "Subwoofer" is set to "2SP L/R" or "2SP MIX".

*3: This can be set when "Subwoofer" is set to "3SP L/R/LFE" or "3SP MIX".

Setting the correct speaker configuration can reduce the time required to measure during the auto setup procedure as the system will not have to look for speakers that are not connected.

Subwoofer

The configuration of the measuring subwoofer can be selected beforehand.

[Selectable items]	1SP	2SP L/R	2SP MIX
	3SP L/R/LFE	3SP MIX	

Amp Assign

Advanced setting : changes power amplifier assignment.

NOTE

The items selectable at "Configuration" differ according to the "Amp Assign" settings.

STEP1 : Speaker Detection

The speaker connection and polarity are detected at the first measurement position. The following attributes are also determined at this time: "Speaker Size", "Speaker Distance", "Channel Level", "Crossover Frequency".

Once the measurements are completed, the results are displayed.

NOTE

- Loud test tone may be played during Audyssey MultEQ XT Automatic Speaker Setup. This is part of normal operation. If there is background noise in room, these test tones will increase in volume.
- Do not stand between the speakers and setup microphone or allow obstacles in the path while the measurements are being made. This will cause inaccurate readings.
- Quiet the listening environment before beginning measurements and refrain from talking. Turn off air conditioning units or other devices that emit noise if at all possible as measurements may be affected by these sounds.
- Operating the **MASTER VOLUME** knob on the main unit or the **VOL +/−** buttons on the remote control unit during the measurements will cancel the measurements.
- Do not change the speaker connections or subwoofer volume after "STEP1".

STEP2: Measurement

After completing a measurement position, move the microphone to the next position.

Measure at least 6 positions (main listening position and at least 5 other surrounding positions). For best results it is recommend measuring **6 or more positions** (with a maximum of 8 positions).

STEP3: Calculation

When "Calculate" is selected at "STEP2", the measurements taken are analyzed automatically to determine how the speaker system interacts with the room.

The time required for this analysis depends on the number of speakers connected. The higher the number of speakers, the longer the time required for analysis.

STEP4: Check

Once the auto setup procedure is complete, a measuring result check screen appears.

Select any item whose results you want to check to review the results.

Values that are different from the actual distance may be set for speakers with built-in filters (subwoofers, etc.). This is because filters add electrical delay to the signal that should be compensated.

STEP5: Store

The auto setup measurement results are stored in the AVC-A1HD.

NOTE

Do not turn the power off while the settings are being stored.

Error Messages

If the auto setup procedure could not be completed due to speaker installation, the measuring environment, etc., an error message is displayed. If this happens, check the relevant items, be sure to take the necessary measures, then perform the auto setup procedure over again.

Error messages (examples)	Cause	Measures
No microphone or speaker	<ul style="list-style-type: none"> Included setup microphone is not connected. Not all speakers could be detected. The front L speaker was not properly detected. 	<ul style="list-style-type: none"> Connect the included setup microphone to the SETUP MIC jack on the main unit. Check the speaker connections.
Ambient noise is too high or Level is too low	<ul style="list-style-type: none"> Too much noise in the room for accurate measurements to be made. Speaker or subwoofer sound is too low for accurate measurements to be made. 	<ul style="list-style-type: none"> Either turn off any device generating noise or move it away. Try again when the surroundings are quieter. Check the speaker installation and the direction in which the speakers are facing. Adjust the subwoofer's volume.
None	<ul style="list-style-type: none"> Displayed speaker could not be detected. <ul style="list-style-type: none"> The front R speaker was not properly detected. Only one channel of the surround (A) and surround (B) speakers was detected. Sound was output from the R channel when only one surround back speaker was connected. The surround back or the surround (B) speaker was detected, but the surround (A) speaker was not detected. When the subwoofer configuration is set at "2SP L/R", "2SP MIX", "3SP L/R/LFE" or "3SP MIX", the subwoofer could not be detected. 	<ul style="list-style-type: none"> Check the connections of the displayed speaker.
Phase	<ul style="list-style-type: none"> Displayed speaker connected with the polarities reversed. 	<ul style="list-style-type: none"> Check the polarities of the displayed speaker. For some speakers, this error message may be displayed even if the speaker is properly connected. If you are sure that the wiring is correct, select "Skip".

- Sometimes due to the electrical complexities of subwoofers and the interaction with the room, THX recommends setting the level and the distance of the subwoofer manually.
- Sometimes due to interaction with the room, you may notice irregular results when setting the level and/or distance of the main speakers. If this happens, THX recommends setting them manually.
- Please note that any THX main speakers should be set to Small (80 Hz). If you set up your speakers using Auto Setup, please make sure manually that any THX speakers are set to Small with 80 Hz crossover.

 Select "Retry" to make the measurements again.

NOTE Be sure to turn the power off before checking the speaker connections.

2 Option

Select settings for room EQ, mic, etc.

Room EQ

Select room EQ setting method.

[Selectable items] **All** Assign

Direct Mode

Select room EQ use for DIRECT or PURE DIRECT mode.

[Selectable items] **ON** OFF

Mic Select

Select the microphone type if not using supplied mic.
The microphone connected to V.AUX Lch is used.

[Selectable items] **Mic** V.AUX L

Only a professionally certified installer should ever connect a professionally-calibrated microphone to the V.AUX L input on the front panel.

3 Parameter Check

Check auto setup measurement results.
This is displayed after the auto setup procedure is completed.

[Selectable items]

Spkr Config Check Distance Check Ch. Level Check

Crossover Check EQ Check Restore

The auto setup results can be reset to what was originally calculated by MultEQ XT when "Restore" is selected.

Make detailed settings for various parameters

Speaker Setup

Use this procedure to set the speakers manually or if you wish to change the settings made with the auto setup procedure.

Menu tree

Manual Setup

Select surround speakers B use and size.

[Selectable items] Large Small None

Surround Back

Select surround back speaker use and size.

[Selectable items] Large Small None

2spkrs 1spkr

Large: Select this for a large speaker with strong bass reproduction.

Small: Select this for a smaller speaker with weaker bass reproduction.

- Select "Large" or "Small" not according to the physical size of the speaker but according to the low frequency reproduction capabilities based on the frequency set at "Crossover Frequency" (page 29, 30).
- When "Front" is set to "Small", "Subwoofer" is automatically set to "Yes".
- If "Subwoofer" is set to "No", "Front" is automatically set to "Large".
- If "Surround A" is set to "None", "Surround B" and "Surround Back" are automatically set to "None".
- When using just one surround back speaker, connect it to the left channel (SBL).
- To take full advantage of the performance of the Home THX certified speaker systems, set the front, center and surround speaker size parameters to "Small" and the subwoofer to "Yes".

2 Subwoofer Setup

Select subwoofer output configuration and bass signal for playback.

Configuration

Select number of subwoofers and configuration.

[Selectable items]

1SP 2SP L/R 2SP MIX 3SP L/R/LFE 3SP MIX

Subwoofer Configuration	Subwoofer Connector
1SP	SW1
2SP L/R	L SW1 R SW2
2SP MIX	1 SW1 2 SW2
3SP L/R/LFE	L SW1 R SW2 LFE SW3
3SP MIX	1 SW1 2 SW2 3 SW3

When "2SP MIX" or "3SP MIX" is selected, "Subwoofer 1", "Subwoofer 2" and "Subwoofer 3" are each displayed.

Mode

Select bass signal for playing with the subwoofer.

[Selectable items] LFE-THX- LFE+Main

- THX recommends LFE-THX- mode so that bass interference is less likely to occur in the room.
- This can be set when the GUI menu "Speaker Configuration" - "Subwoofer" is set to "Yes".
- Play music or a movie source and select the mode offering the strongest bass.
- Select "LFE+Main" if you want the bass signals to always be produced from the subwoofer.

3 Distance

Set distance from listening position to speakers.

Before making the settings, measure the distance from the listening position to the different speakers.

Meters / Feet

Select unit for distance.

Step

Select step. (smallest distance)

[Selectable items]

0.1m **0.01m** : Can be selected when "Meters" is set.

1ft **0.1ft** : Can be selected when "Feet" is set.

Default

Resets the settings to the default values.

Distance measurement

Select the speaker you want to set, then set the distance.

Set the value closest to the measured distance.

[Variable range]

0.00m ~ 18.00m : Display when "Meters" is set.

0.0ft ~ 60.0ft : Display when "Feet" is set.

Two surround back speakers are required to use the THX Ultra2 Cinema, THX Music mode and THX Games mode.

Set the surround back speakers so that the distance to the listening position is the same for both the left and right speakers.

It is also recommended that the deviations of the distance from the listening position to L and R channel speakers (front left (FL) and front right (FR), surround left (SL) and surround right (SR), surround back left (SBL) and surround back right (SBR)) is less than 60 cm (2 ft).

NOTE

Set the distance between the listening position and the various speakers to no more than 6.00 meters (20 ft).

4 Channel Level

Adjust channel levels to obtain equal volume from all speakers.

Mode

Select test tone playback method.

[Selectable items] **Auto** **Manual**

Surround

Select surround speaker from which test tone is output.

[Selectable items] **A** **B** **A+B**

Start

Output test tone.

[Variable range] **-12dB** ~ **0dB** ~ **+12dB** **OFF** *

* : "OFF" can be set by pressing \triangleleft when the subwoofer's volume is set to -12 dB.

Default

Resets the settings to the default values.

Operating from the main remote control unit

Adjusting with the main remote control unit using the test tones is only possible in the "Auto" mode and only effective in the STANDARD (Dolby/DTS Surround) and HOME THX CINEMA modes. The adjusted levels for the different modes are automatically stored in the memory.

[Adjusting using test tones]

① Press the **TEST** button.

Test tones are output from the various speakers.

② Use the $\triangleleft \triangleright$ button to adjust so that the volume is equal for all speakers.

③ When the adjustments are completed, press the **TEST** button again.

- The level of each channel should be adjusted to 75 dB (Cweighted, slow meter mode) on a sound level meter at the listening position. If a sound level meter is not available adjust the channels by ear so the sound levels are the same. Because adjusting the subwoofer level test tone by ear is difficult, use a well known music selection and adjust for natural balance.

- When the GUI menu "Speaker Configuration" – "Surround Back" setting (page 28) is set to "1spkr", the surround back speaker display is set to "Surround Back".

- Speakers set to "None" in the "Speaker Configuration" settings are not displayed.

- "Surround" can be set when GUI menu "Speaker Configuration" – "Surround B" is set to "Large" or "Small" (page 28).

- When using surround speakers, be sure to adjust the volume of the different speakers.

- When "Channel Level" is adjusted, the adjusted values are set for all the surround modes. To adjust the channel level separately for the different surround modes, use the operation see page 65.

5 Crossover Frequency

Select crossover frequency from which subwoofer handles low range signal.

[Selectable items]

FIXED-THX- :

Setup when using a THX-certified speaker.

40Hz **60Hz** **80Hz** **90Hz** **100Hz** **110Hz** **120Hz** **150Hz**

200Hz **250Hz** :

Only the portion of the bass sound of the various speakers output from the subwoofer that has a frequency below the frequency set here is output.

Set this according to the low frequency reproduction capabilities of the speakers you are using.

Advanced :

Specify crossover frequency for each speaker.

- Please set all THX Certified speakers, set the "Speaker Configuration" for all speakers to "Small". We recommend using with the crossover frequency set to "FIXED-THX-", but depending on the speaker, setting it to a different frequency may improve frequency response near the crossover frequency.
- The "Crossover Frequency" can be set when there are speakers that have been set to "Small" at GUI menu "Speaker Configuration" or when "Subwoofer" is set to "Yes" (page 28).
- At the "Advanced" settings, if the "Subwoofer Setup" (page 28) setting is set to "LFE-THX-", GUI menu speakers for which "Speaker Configuration" is set to "Small" can be set. If set to "LFE+Main", the setting can be made regardless of the speaker size.
- For speakers set to "Small", sound below the crossover frequency is cut from the sound output. The cut bass sound is output from the subwoofer or front speakers.

6 THX Audio Setup

Set the speaker to play the optimal THX surround mode.

THX Ultra2 Subwoofer

Set when using a subwoofer compatible with THX Ultra2 standards or a subwoofer that can be properly played at low range.

[Selectable items] **Yes** **No**

Make these settings when "Yes" is selected for the subwoofer in the "Speaker Configuration" settings. This option is not available when "No" is selected (page 28).

BGC (Boundary Gain Compensation)

If bass sound feels big compensate by lowering volume.

[Selectable items] **ON** **OFF**

- If the bass sound seems too strong: Set "BGC" to "ON". This activates a filter that gently reduces very deep bass below 55 Hz to provide the flattest overall deep bass response. Select "ON" or "OFF" according to how strong you prefer the deep bass response to be.
- This can be set when the "THX Ultra2 Subwoofer" setting is set to "Yes".

SB Speaker Position

Set the distance between the left and right surround back speakers.

[Selectable items] **Under 0.3m** **0.3m – 1.2m** **Over 1.2m**

- When two surround back speakers have been set in "Speaker Configuration" (page 28), set the distance of the speakers. This option is not available when "1spkr" is selected.
- This setting is necessary to achieve the optimum effect in the THX Surround EX, THX Ultra2 Cinema, THX Music mode and THX Games mode.

7 Surround Speaker

Select surround speakers to use for each surround mode.

MULTI CH MODE

[Selectable items] **A** **B** **A+B**

Operating from the main remote control unit

Press the **SPKR** button.

- This can be set when GUI menu "Speaker Configuration" – "Surround A" and "Surround B" are used (page 28).
- When using the pre-out connectors, select and use either "Surround A" or "Surround B".
- Make the surround speaker settings when the input mode is set to "EXT. IN" at GUI menu "Manual Setup" – "Audio Setup" – "EXT. IN Setup" (page 32).

About Speaker Type Setting when Using Both Surround speakers A and B

If "Small" is set for either surround speakers A or B, the output is the same as when "Small" is set for both A and B.

HDMI Setup

Make settings for HDMI video/audio output.

Menu tree

Manual Setup

- HDMI Setup**
 - 1 Color Space**
 - 2 RGB Range**
 - 3 Auto Lip Sync**
 - 4 Audio**
 - 5 Monitor Out**
 - 6 HDMI Control**

1 Color Space

Make settings for output color space.

Selectable items **YCbCr** **RGB**

When connected to a monitor with a DVI-D connector (HDCP compatible) using an HDMI/DVI converter cable, the signals are output in RGB format, regardless of this setting.

2 RGB Range

Make settings for RGB output range.

Selectable items **Normal** **Enhanced**

When "YCbCr" is selected under "Color Space", "RGB Range" will have no effect.

3 Auto Lip Sync

Automatic compensation for timing shift in audio and video output.

Selectable items **ON** **OFF**

4 Audio

Select HDMI audio output device.

Selectable items **Amp** **TV**

GUI menu "HDMI Control"- "Control" is "ON", the "Amp" and "TV" will switch with the operation of any television not related to this setting.

5 Monitor Out

Make settings for HDMI monitor output.

Selectable items **Auto (Dual)** **Monitor 1** **Monitor 2**

Operating from the main remote control unit
Press the **M.SEL** button.

- When "Monitor Out" is set to "Auto (Dual)", connections with the MONITOR 1 or MONITOR 2 connectors are recognized automatically.
- If both the MONITOR 1 and 2 connectors are connected and "Resolution" is set to "Auto" (page 44), the signals are output with a resolution compatible with both monitors.
- If "Resolution" is set to something other than "Auto", check the resolutions with which your monitor is compatible at GUI menu "Information" – "HDMI Information" – "Monitor 1" and "Monitor 2" and set accordingly (page 53).

NOTE

Depending on the monitor you have connected, the display may not be correct when you set to "Auto (Dual)". In such a case, set to either "Monitor 1" or "Monitor 2".

6 HDMI Control

Make settings for HDMI control function.

Control

Set HDMI control function to ON/OFF.

Selectable items **ON** **OFF**

Control Monitor

Select the interlocking monitor through the HDMI controls.

Selectable items **Monitor1** **Monitor2**

This can be set when "Control" is set to "ON".

Power Off Control

Interlock with the power off function through the HDMI controls.

Selectable items **ON** **OFF**

- This can be set when "Control" is set to "ON".
- Please consult the operating instructions for each connected device to check the settings.

NOTE

- When the "Control" setting has been changed, always turn off the power to the connecting devices afterwards and then turn back on.
- The HDMI control function does not work when the power to the equipment is off.
- For details, see "HDMI Control Function" (page 64).

Audio Setup

Make settings for audio playback.

● Menu tree ●

Manual Setup

Audio Setup

- 1 EXT. IN Setup**
- 2 2ch Direct/Stereo**
- 3 Downmix Option**
- 4 Auto Surround Mode**
- 5 Manual EQ**

1 EXT. IN Setup

Setup playback method for analog signals inputted from external input connectors (EXT. IN).

Surround Speaker

Select the surround speakers to use.

[Selectable items] **A** **B** **A+B**

This can be set when GUI menu "Speaker Setup" – "Speaker Configuration" – "Surround A" and "Surround B" are used (page 28).

Subwoofer Level

Set the subwoofer level for playback.

Select according to the player in use.

[Selectable items] **0dB** **+5dB** **+10dB** **+15dB**

We recommend setting to "+15dB".

2 2ch Direct/Stereo

Make speaker settings for 2-channel mode playback.

Setting

To change the settings, select "Custom".

[Selectable items] **Basic** * **Custom**

* : Use the same settings as in "Speaker Setup".

Front

Select front speaker size.

[Selectable items] **Large** **Small**

Subwoofer

Select subwoofer use.

[Selectable items] **Yes** **No**

Subwoofer Mode

Select low range signal to be reproduced by subwoofer.

[Selectable items] **LFE-THX-** **LFE+Main**

Crossover

Select crossover frequency from which subwoofer handles low range signal.

[Selectable items]

THX **40Hz** **60Hz** **80Hz** **90Hz** **100Hz** **110Hz** **120Hz**
150Hz **200Hz** **250Hz**

Distance FL

Set distance from listening position to front left speaker.

[Variable range] **0.00m ~ 18.00m**

Distance FR

Set distance from listening position to front right speaker.

[Variable range] **0.00m ~ 18.00m**

3 Downmix Option

Set dynamic range for downmix playback of Dolby Digital sources.

[Selectable items] **ON** **OFF**

- Set this to "ON" if the sound from the front speakers seems distorted.
- When not using the center speaker or surround speakers, the playback sound is down-mixed and output from the front speakers.

4 Auto Surround Mode

Make setting for memorizing surround mode setting for each input signal type.

[Selectable items] **ON** **OFF**

- The auto surround mode function lets you store in the memory the surround mode last used for playing the four types of input signals listed below.
- ① Analog and PCM 2-channel signals
- ② Dolby Digital and DTS 2-channel signals
- ③ Dolby Digital and DTS multi-channel signals
- ④ Multi-channel signals other than Dolby Digital and DTS (PCM, DSD, etc.)
- When playing in the PURE DIRECT mode, the surround mode does not change even if the input signal is changed.

5 Manual EQ

Adjust tonal quality for each speaker using graphic equalizer.

Adjust CH

Select speaker adjustment method.

[Selectable items] **Each** **L/R** **All**

Select the speaker and frequency band and adjust the level.

[Selectable items]

63Hz **125Hz** **250Hz** **500Hz** **1kHz** **2kHz** **4kHz** **8kHz**
16kHz

[Variable range]

-20dB ~ **0dB** ~ **+6dB**

Curve Copy

Copy the Room EQ's "Audyssey Flat" correction curve.

[Selectable items] **Yes** **No**

"Curve Copy" is displayed after the auto setup procedure has been performed.

Default

Resets the settings to the default values.

Network Setup

Make network settings.

GUI

● Menu tree ●

Manual Setup

Network Setup

1 Network Setup

2 Other

3 Network Information

- If you are using a broadband router (DHCP function), there is no need to make the settings at "Setting the IP Address" and "Setting the Proxy", since the DHCP function is set to "ON" in the AVC-A1HD's default settings.
- If the AVC-A1HD is being used connected to a network without the DHCP function, the network settings must be made. In this case, some knowledge of networks is required. For details, consult a network administrator.
- If you cannot connect to the Internet, recheck the connections and settings (page 20).
- If you do not understand about Internet connection, contact your ISP (Internet Service Provider) or the store from which you purchased your computer.

• DHCP (Dynamic Host Configuration Protocol) :

These are systems by which the IP address and other network settings are automatically set for the AVC-A1HD, computer, broadband router and network devices.

• DNS (Domain Name System) :

This is a system for converting the domain names used when browsing Internet sites (for example, "www.denon.jp") into the IP addresses actually used for communications (for example, "202.221.192.106").

1 Network Setup

Make settings for wired or wireless LAN.

Wired LAN settings

Use this procedure to configure the Wired LAN settings.

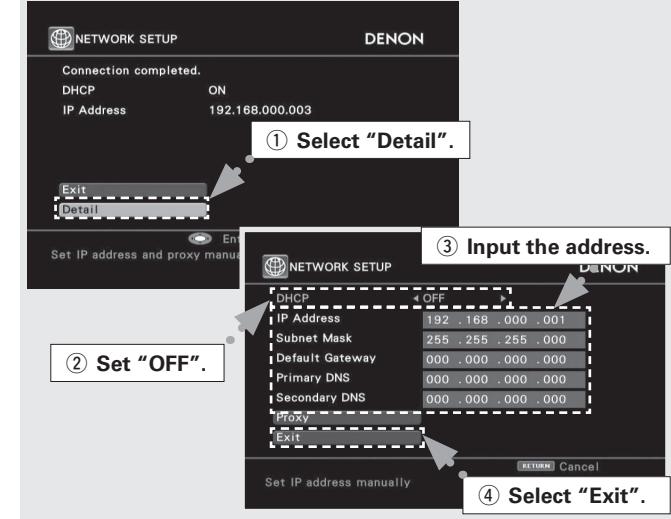

1 Connect the LAN cable (page 20).

2 Turn on the AVC-A1HD (page 54).

AVC-A1HD performs automatic network setup due to the DHCP function.

When connecting to a network that has no DHCP function, perform the setting in step 3.

3 Set the IP address at the GUI menu "Manual Setup" "Network Setup" – "Network Setup".

① Select "Detail" and press **ENTER**.

② Use **◀ ▶** to set "DHCP" to "OFF", then press **▽**.
The DHCP function is disabled.

③ Use $\Delta \nabla \triangleright$ to input the address and press **ENTER**.

IP Address :

Set the IP address within the ranges shown below. The Network Audio function cannot be used if other IP addresses are set.

CLASS A: 10.0.0.0 ~ 10.255.255.255

CLASS B: 172.16.0.0 ~ 172.31.255.255

CLASS C: 192.168.0.0 ~ 192.168.255.255

Subnet Mask :

When connecting an xDSL modem or terminal adapter directly to the AVC-A1HD, input the subnet mask indicated in the documentation supplied by your provider. Normally input 255.255.255.0.

Default Gateway :

When connected to a gateway (router), input its IP address.

Primary DNS Secondary DNS :

If there is only one DNS address indicated in the documentation supplied by your provider, input it at "Primary DNS". If there are two or more DNS addresses, input the first one at "Secondary DNS".

④ Use ∇ to select "Exit" and press **ENTER**.

Setup is complete.

* When connecting to the network via a Proxy server, select "Proxy" and press **ENTER** (page 36 "Proxy settings").

Wireless LAN settings

Use this procedure to configure the Wireless LAN settings.

1 Fitting a rod antenna (page 20).

* If a LAN cable is connected, remove it.

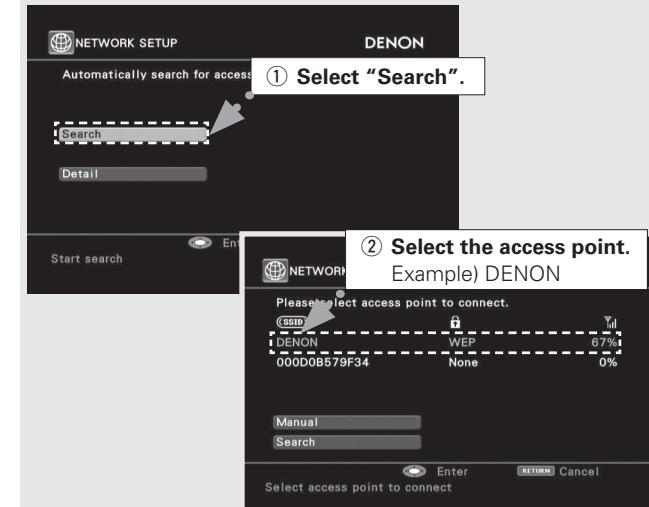

2 Turn on the AVC-A1HD (page 54).

3 Set the access point at the GUI menu "Manual Setup" – "Network Setup" – "Network Setup".

When searching access points to connect automatically, refer to "Automatic settings".

When searching access points to connect manually, refer to "Manual settings".

Automatic settings

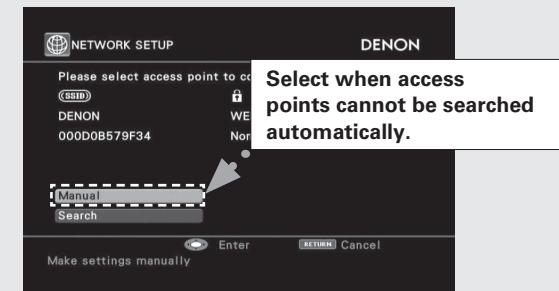

① Select "Search" and press **ENTER**.

The access point you have set is displayed.

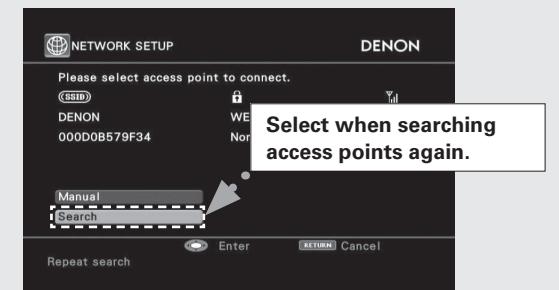

② Use $\Delta \nabla$ to select the access point, and then press **ENTER**.

* If the access points are not detected automatically, use ∇ to select the "Manual" and press **ENTER**.

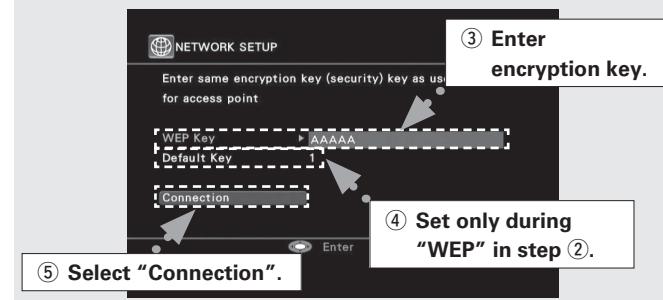

Setting becomes manual. For details, see "Manual settings" (page 35, 36).

* If the access points are repeat search, use ∇ to select the "Search" and press **ENTER**.

③ If there is an encryption setting for the access point you selected in step ②, enter same encryption key as used for the access point. (If there is no encryption setting, proceed to step ⑤.)

Use $\Delta\triangleright\downarrow\triangleright$ to input the "Key" (encryption key) and press **ENTER**.

Enter the same encryption key as used for the access point.

[Selectable items]

A~Z a~z 0~9 ! "# % & ' () * + , - . / : < = > ? @ [\] (space)

When no security settings have been used in the Internet connection settings, this step is not necessary.

- ④ When encryption is by "WEP", select the "Default Key" using ∇ , and then press $\triangle\triangleright$.

[Selectable items] 1 2 3 4

Select the same default key as used for the access point. This should normally be set to "1".

- ⑤ Use ∇ to select "Connection" and press **ENTER**.

Network connection starts.

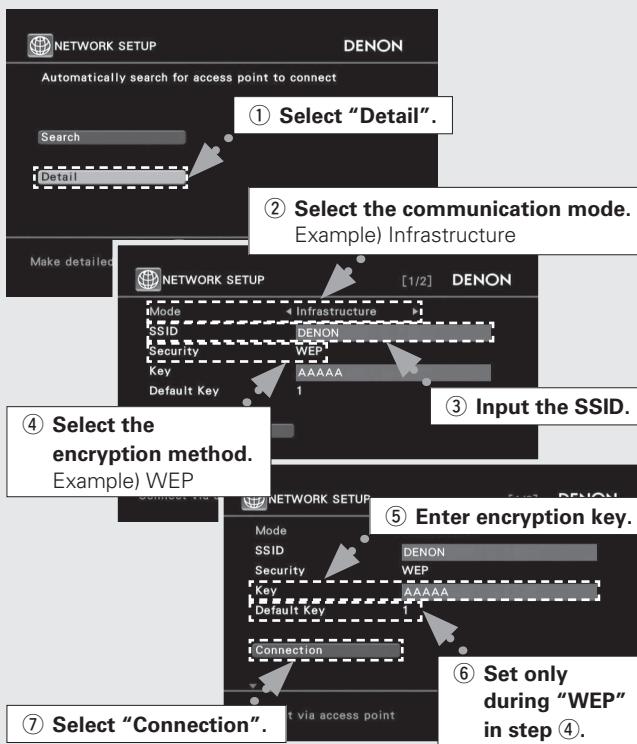

When connection is established with the access point, "Connection completed." is displayed.

AVC-A1HD performs automatic network setup due to the DHCP function.

When connecting to a network that has no DHCP function, perform the setting in step 4.

□ Manual settings

- ① Select "Detail" and press **ENTER**.

- ② Use $\triangle\triangleright\downarrow\triangleright$ to select the Mode and press ∇ .

[Selectable items]

Infrastructure : Select when communication is via an access point.

Ad-hoc : Select during direct communication, when an access point is not used.

- ③ Use $\Delta\triangleright\downarrow\triangleright$ to input the name of the wireless network (SSID) and press **ENTER**.

[Characters that can be input]

A~Z a~z 0~9 ! "# % & ' () * + , - . / : < = > ? @ [\] (space)

- ④ Use $\Delta\triangleright\downarrow\triangleright$ to select the Security and press ∇ .

[Selectable items]

None :

Select if not encrypted.

Can also be used even without encryption, through we recommend encryption for improved security.

WEP WPA-PSK(TKIP) WPA-PSK(AES) WPA2-PSK(TKIP)

WPA2-PSK(AES) :

Select the encryption method according to the encryption setting of the access point you are using.

- ⑤ Use $\Delta\triangleright\downarrow\triangleright$ to input the "Key" (encryption key) and press **ENTER**.

Enter the same encryption key as used for the access point.

[Characters that can be input]

A~Z a~z 0~9 ! "# % & ' () * + , - . / : < = > ? @ [\] (space)

When no security settings have been used in the Internet connection settings, this step is not necessary.

- ⑥ When encryption is by "WEP", select the "Default Key" using ∇ , and then press $\triangle\triangleright$.

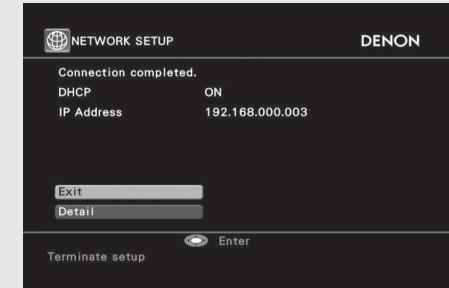

[Selectable items] 1 2 3 4

Select the same default key as used for the access point. This should normally be set to "1".

- ⑦ Use ∇ to select "Connection" and press **ENTER**.

Network connection starts.

When connection is established with the access point, "Connection completed." is displayed.

AVC-A1HD performs automatic network setup due to the DHCP function.

When connecting to a network that has no DHCP function, perform the setting in step 4.

4 Set the IP address.

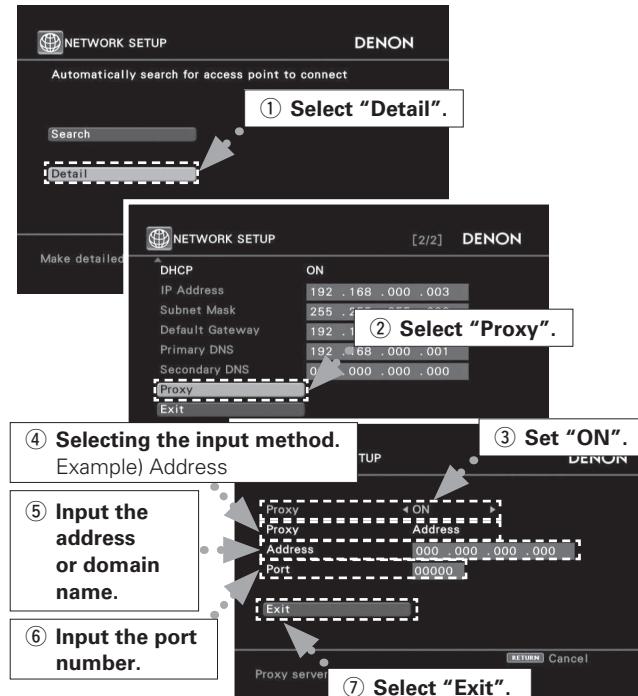

* For details, see page 33, 34 "Wired LAN settings" in step 3.

If you are using a router with no DHCP function to automatically assign the IP address, set the IP address manually.

Proxy settings

Make this setting when connecting to the Internet via a proxy server.

① On the GUI menu, select "Manual Setup" – "Network Setup" – "Network Setup" – "Detail" and press **ENTER**.

② Use $\Delta\triangledown$ to set "Proxy" and press **ENTER**.

③ Use $\lhd\rhd$ to set "Proxy" to "ON" and press \triangledown .

The proxy server is enabled.

④ Use $\lhd\rhd$ to select the proxy server input method, and then press \triangledown .

[Selectable items]

Address : Select when inputting by address.

Name : Select when inputting by domain name.

⑤ Use $\Delta\triangledown\rhd$ to input the proxy server address or domain name and press **ENTER**.

When "Address" is selected in step ④ :

Input the address

When "Name" is selected in step ④ :

Input the domain name

[Characters that can be input]

A ~ Z a ~ z 0 ~ 9 ! " # % & ' () * + , - . / ; < = > ? @ [\] (space)

⑥ Use $\Delta\triangledown\lhd\rhd$ to input the proxy server port number and press **ENTER**.

⑦ Use \triangledown to select "Exit" and press **ENTER**.

Setup is complete.

Display network information.

[Items to be checked]

Wired or Wireless SSID DHCP= ON or OFF IP Address

MAC Address

2 Other

Make setting for amp power save mode and computer language environment.

Power Saving

Make setting for power saving when not connected to network.

[Selectable items]

ON

OFF

To use the web control function, set this setting to "OFF".

Character

Set the character code type of the MP3 ID3-Tag played by USB.

[Selectable items]

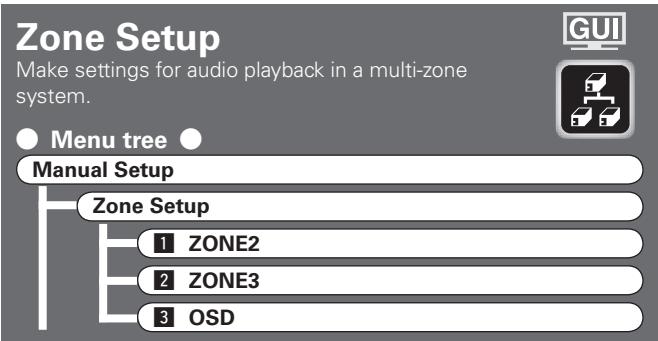

Auto

Latin

Japanese

If the characters are not properly displayed when set to "Auto", set to "Latin" or "Japanese".

1 ZONE2
Make settings for audio playback in a ZONE2 system.

2 ZONE3
Make settings for audio playback in a ZONE3 system.

Bass
Adjust low frequency range (bass).
[Variable range] -10dB ~ 0dB ~ +10dB

Treble
Adjust high frequency range (treble).
[Variable range] -10dB ~ 0dB ~ +10dB

HPF
When using speakers that cannot satisfactorily play low frequencies, distortion of the bass sound can be reduced by setting "HPF" to "ON".
[Selectable items] ON OFF

Lch Level

Adjust the left channel output level.

[Variable range] -12dB ~ 0dB ~ +12dB

The "Lch Level" and "Rch Level" can be set when "Channel" is set to "Stereo".

Rch Level

Adjust the right channel output level.

[Variable range] -12dB ~ 0dB ~ +12dB

Channel

Switch between stereo and mono output.

[Selectable items] Stereo Mono

When GUI menu "Manual Setup" – "Option Setup" – "Amp Assign" is set to "ZONE (MONO)", "Bi & ZONE (MONO)" or "ZONE2/3 (MONO)", the "Channel" setting is automatically set to "Mono".

Volume Level

Adjust the main volume level.

[Selectable items] Variable -40dB 0dB

"Variable" is set when a power amplifier is assigned to the ZONE2/ZONE3 output channel at GUI menu "Manual Setup" – "Option Setup" – "Amp Assign".

Volume Limit

Make a setting for maximum volume.

[Selectable items] OFF -20dB -10dB 0dB

This can be set when "Volume Level" is set to "Variable".

Power On Level

Define the volume setting that is active when the power is turned on.

[Selectable items] Last ---dB -70dB ~ 18dB

This can be set when "Volume Level" is set to "Variable".

Mute Level

Set the amount of attenuation when muting is on.

[Selectable items] Full -40dB -20dB

3 OSD

Set ZONE2 monitor as onscreen display Zone.

[Selectable items]

ZONE2 : Display only ZONE2 operations.

ZONE2/ZONE3 : Display ZONE2 and ZONE3 operations.

NOTE

- When connected to the component video output connectors, the on-screen display is not displayed.
- On-screen display appears only on the ZONE2 monitor. It does not appear on the ZONE3 monitor.

Option Setup

Make various other settings.

● Menu tree ●

Manual Setup

Option Setup

- 1 Amp Assign**
- 2 Volume Control**
- 3 Source Delete**
- 4 GUI**
- 5 Quick Select Name**
- 6 Trigger Out 1**
- 7 Trigger Out 2**
- 8 Trigger Out 3**
- 9 Trigger Out 4**

- 12 Remote ID**
- 13 2Way Remote**
- 14 Dimmer**
- 15 Setup Lock**
- 16 Maintenance Mode**
- 17 Firmware Update**
- 18 Add New Feature**

1 Amp Assign

Change the assignment for the power amps.

The places where the surround amplifier and surround back amplifier are used can be set freely according to the usage environment. This makes it possible to output sound to rooms other than the room (the MAIN ZONE) where surround playback is performed (multi-zone playback) or play the sound with high quality using the front speakers (bi-wiring/bi-amp connections).

[Selectable items]

Normal ZONE2 ZONE3 ZONE(MONO) Bi-Wiring

Bi & ZONE2 Bi & ZONE3 Bi & ZONE(MONO) Bi-Amp

ZONE2/ZONE3 ZONE2/3(MONO) 2CH Bi-Wiring 2CH Bi-Amp

Free Assign

For details, see "Multi-Zone Settings with the Amp Assign Function" (page 76 ~ 79).

2 Volume Control

Set the MAIN ZONE volume setting.

Volume Limit

Make a setting for maximum volume.

[Selectable items] OFF -20dB -10dB 0dB

Power On Level

This sets the volume set when the MAIN ZONE's power is turned on.

[Selectable items] Last ---dB -80dB ~ 18dB

Mute Level

This sets the amount of attenuation of the volume when the mute mode is set in the MAIN ZONE.

[Selectable items] Full -40dB -20dB

3 Source Delete

Remove input sources that are not used from the display.

[Selectable items] ON Delete

NOTE

- Input sources being used in the various zones cannot be deleted.
- Input sources set to "Delete" cannot be selected from GUI menu "Source Select" or using the **SOURCE SELECT** knob on the main unit or **SOURCE SELECT** button on the remote control unit.

4 GUI

Make GUI related settings.

Screensaver

Make screensaver settings.

Use the screensaver to prevent burn-in on the monitor screen.
When set to "ON", the screensaver is activated if there is no activity for about 3 minutes.

[Selectable items] ON OFF

Wall Paper

Change the GUI background.

[Selectable items] Picture Black Gray Blue

Format

Select the video output signal format to match the monitor.

[Selectable items] PAL NTSC

NOTE

When a format other than the video format of the connected monitor is set, the picture will not be displayed properly. Use the procedure described below to change the video format.

Operating from the main unit

- * The GUI menu is not displayed when performing this setting.
- ① Press and hold the **AUDIO DELAY** and **RETURN** buttons for at least 3 seconds.
"Video Format" appears on the display.
- ② Use the **◀ ▶** button to make the setting.
- ③ Press the **ENTER**, **MENU** or **RETURN** button to complete the setting.

Text

Text information display.

[Selectable items] **ON** **OFF**

Master Volume

Master volume display during adjustment.

[Selectable items] **ON** **OFF**

NET/USB, iPod

This sets the time the on-screen display is displayed when an operation is performed.

[Selectable items] **Always** **30s** **10s** **OFF**

5 Quick Select Name

Change "Quick Select" display name.
Up to 16 characters can be input.

[Input characters]

A ~ Z **a ~ z** **0 ~ 9** **! " # % & ' () * + , - . / : ; < = > ? @ [\]** (space)

6 Trigger Out 1

Select the conditions to turn on the trigger out 1 with respect to the zone, input source, surround mode, HDMI monitor, etc. For details about the trigger out function, see page 22.

7 Trigger Out 2

This sets the conditions to turn on the trigger out 2, in the same way as "Trigger Out 1" above.

8 Trigger Out 3

This sets the conditions to turn on the trigger out 3, in the same way as "Trigger Out 1" above.

9 Trigger Out 4

This sets the conditions to turn on the trigger out 4, in the same way as "Trigger Out 1" above.

[Selectable items] **ON** **--**

Setting with Respect to the Zone

When the power of the zone turned on/off, the trigger out turns on.

Setting with Respect to the Input Source

When the input source set to on is selected, the trigger out turns on.

Associated with respect to the input source for zones set to "ON" at "Setting with Respect to the Zone".

Setting with Respect to the Surround Mode

When the surround mode set to on is selected, the trigger out turns on.

This is effective when the "MAIN ZONE" has been set to "ON" for the "Setting with Respect to the Zone" and the input source which is set to "ON" has been selected for the "Setting with Respect to the Input Source".

Setting with Respect to the Monitor

When the HDMI monitor set to on is selected, the trigger out turns on.

This is effective when the "MAIN ZONE" has been set to "ON" for the "Setting with Respect to the Zone" and the input source which is set to "ON" has been selected for the "Setting with Respect to the Input Source".

10 Transducer Setup

Settings when using transducer.

The Transducer Setup can be accessed through GUI menu "Speaker Setup" - "Subwoofer Setup" is "1SP", "2SP L/R" or "2SP MIX". The transducer signal is outputted from "SW3".

Level

[Variable range]

-12dB ~ **0dB** ~ **+12dB** :

Set the transducer level.

OFF :

Turn the transducer output off.

When you adjust "Level", the adjusted value is set for all surround modes. To adjust the level for individual surround modes, use "Channel Level" (page 65).

LPF

Set the upper limit of the low frequency output to the transducer.

[Selectable items]

40Hz	60Hz	80Hz	90Hz	100Hz	110Hz	120Hz
150Hz	200Hz	250Hz				

11 Digital Out

Set usage of OPT4 OUT.

[Selectable items] **ZONE4 Select** **Rec Select**

NOTE

The ZONE4 operations cannot be performed when set to "Rec Select".

12 Remote ID

Set remote control ID.

Match the ID setting of the remote control unit and the receiver.

[Selectable items] **1** **2** **3** **4**

- When changing the remote ID, also change the AMP, iPod and NET/DTU modes of the main remote control unit at the same time (page 70).
- When changing the remote ID, also change the sub remote control unit at the same time (page 75).

13 2Way Remote

Set when using the 2-way remote control unit.

[Selectable items] **Used** **Not Used**

When using a 2-way remote control unit (RC-7000CI and RC-7001RCI, sold separately), set this to "Used".

NOTE

- When using the 2-way remote control unit, connect to the Port 1 RS-232C connector.
- If GUI menu "Manual Setup" – "Option Setup" – "2Way Remote" is set to "Used", you cannot use port 1 of the RS-232C connector for the external controller.

14 Dimmer

Adjust display brightness of the receiver.

[Selectable items] **Bright** **Dim** **Dark** **OFF**

**Operating from the main unit**

Press the **DIMMER** button.

**15 Setup Lock**

Protect settings from inadvertent change.

[Selectable items] **ON** **OFF**

- When "Setup Lock" is set to "ON", the settings listed below can no longer be changed. Also, "SETUP LOCKED!" is displayed if you attempt to operate related buttons.
 - GUI menu operations
 - RESTORER
 - Night Mode
 - Parameter
 - Room EQ
 - Channel Level
 - Audio Delay
- To cancel the setting, press the **MENU** button to re-display the "Setup Lock" screen, then change the setting to "OFF".

16 Maintenance Mode

This sets the function for maintenance by a DENON serviceperson or installer. (For professional use only.)

This function allows a DENON serviceperson or installer to check the AVC-A1HD's status and make settings via the Internet.

NOTE

Only use this function if so instructed by a DENON serviceperson or installer.

17 Firmware Update

Update the firmware of the receiver.

Check for Update

You can check for firmware updates. You can also check approximately how long it will take to complete an update.

Start

Execute the update process.

When updating starts, the power indicator becomes red and the GUI screen is shut down.

The amount of update time which has elapsed is displayed during the update process.

When updating is complete the power indicator becomes green and normal status is resumed.

* If the display reads as shown below, check the settings and network environment, then update again.

Display	Description
Updating failed	Updating failed.
Login failed	Failure to log into server.
Server is busy	Server is busy. Wait a while then try again.
Connection fail	Failure connecting to server.

18 Add New Feature

Display the new functions which can be purchased for downloading to the AVC-A1HD and upgrade.

When you purchase a new function and register your user information, "Registered" is displayed on this menu and you can proceed with the upgrade.

Upon completion of the upgrade, you can start using the new function.

When "Not Registered" is displayed on the Add New Feature screen, you cannot upgrade.

To use the upgrade function, you should purchase an upgrade package from the DENON website.

To purchase the package, you will need the ID number shown on this screen.

To display the ID number on the screen, hold the <D> and <STATUS> buttons down for 3 seconds or more.

Upgrade

Execute the upgrade process.

When upgrading starts, the power indicator becomes red and the GUI screen is shut down.

The amount of upgrade time which has elapsed is displayed during the upgrade process.

When upgrading is complete the power indicator becomes green and normal status is resumed.

* If the upgrade is not successful, an error message identical to those in "Firmware Update" will appear on the display.

Upgrade Status

A list of the additional functions provided by the Upgrade will be displayed.

Notes concerning use of "Firmware Update" and "Add New Feature"

- In order to use these functions, you must have the correct system requirements and settings for a broadband Internet connection. For details, see pages 33 ~ 36 .
 - Do not turn off the power until updating or upgrading is completed.
 - Normally there is no need to use this function, aside from the cases described below.
 - Firmware Update : In the case of applying the latest firmware updates (free)
 - Add New Feature : In the case of future upgrades to add new functions to the receiver (payment required)
 - Information regarding the "Firmware Update" function and "Add New Feature" will be announced on the DENON web site each time related plans are defined.
 - Even with a broadband connection to the Internet, approximately 1 hour is required for the updating/upgrading procedure to be completed.
- Once updating/upgrading starts, normal operations on the AVC-A1HD cannot be performed until updating/upgrading is completed.
- Furthermore, updating/upgrading the firmware may reset the backup data for the parameters, etc., set for the AVC-A1HD.
- When updating/upgrading the firmware, we recommend using wired connections (Ethernet cable).

Language

Select the language displayed on the GUI screen.

Source Select

Use this procedure to select the input source and make the settings related to playing input sources.

Input Source Selection

Operating from the main unit or main remote control unit

[Operation on the main unit]

Turn the **SOURCE SELECT** knob.
※ If "Rec Select" or "Video Select" is selected, press the **SOURCE** button before turning the **SOURCE SELECT** knob.

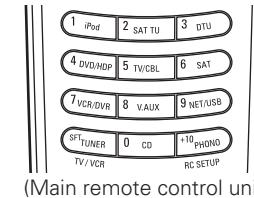

[Operation on the main remote control unit]

Press the **SOURCE SELECT** button.

The desired input source can be selected directly.

(Main unit)

(Main remote control unit)

- To operate the AVC-A1HD using the main remote control unit, set the remote control unit to the AMP mode (refer to page 67 "Remote Control Unit Operations").
- Pressing the **DVD/HDP** button and the **VCR/DVR** button on the main remote control will switch between the following.

DVD/HDP:

DVD ← → HDP

VCR/DVR:

→ VCR → DVR-1 → DVR-2 →

Input source	VCR	DVR-1	DVR-2	V.AUX
Default setting	None	5-RCA	None	None

NOTE

This cannot be set for input sources for which "iPod dock" is assigned.

iPod dock

Assign Control Dock for iPod to this source.

[Input source]

DVD	HDP	TV/CBL	SAT	VCR	DVR-1	DVR-2	V.AUX
TUNER	CD						

[Selectable items] Assign None

- With the default settings, the Control Dock for iPod can be used connected to the VCR (iPod) connector.
- Even if "iPod dock" is set to "Assign", if the set is not connected to a Control dock for iPod, the input source can be used as the normal input source.

4 Video

Setting the video source.

Video Select

Switch video input source while listening to audio signal.

[Selectable items]

DVD	HDP	TV/CBL	SAT	VCR	DVR-1	DVR-2	V.AUX
SOURCE							

Operating from the main unit

Press the **VIDEO SELECT** button, then turn the **SOURCE SELECT** knob until the desired picture appears.

* To cancel, press the main unit's **VIDEO SELECT** button, then turn the main unit's **SOURCE SELECT** knob and select "SOURCE".

NOTE

- It is not possible to select HDMI input signals.
- When playing HDMI video input signals, the analog video signal of another input source cannot be selected for the HDMI video output.
- Input sources for which "Delete" is selected at "Source Delete" cannot be selected.

Video Convert

Automatically convert video input signal to monitor output format.

[Input source]

DVD	HDP	TV/CBL	SAT	VCR	DVR-1	DVR-2	V.AUX
TUNER	CD						

[Selectable items] ON OFF

NOTE

- For optimum video performance, THX recommends that you set the conversion mode to "OFF" to use video signals pass through system without up conversion.

Example: View video input from a component video on the component video monitor.

- When a non-standard video signal from a game machine or some other source is input, the video conversion function might not operate. If this happens, please set the conversion mode to "OFF".

i/p Scaler

Make settings for i/p scaler function.

[Selectable items] A to H A to H & H to H OFF

- This can not be set when "Video Convert" is set to "OFF".
- The "A to H & H to H" can be set to the input source assigned to the HDMI input connector.
- "A to H & H to H" setting:
 - Deep color (10 bit/12 bit) signals are converted into 8-bit signals.
 - The i/p scaler function does not work if xvYCC or computer's resolution signals are input.

Resolution

Set resolution for video signal output to HDMI.

[Selectable items] Auto 480p/576p 1080i 720p 1080p 1080p:24 Hz

Operating from the main unit

Press the **SCALE** button.

- This can be set when "i/p Scaler" is set to anything other than "OFF".
- When the "i/p Scaler" is set to "A to H & H to H" the resolutions can be setup to the analog video input signal and HDMI input signal.
- To enjoy 1080p/24 Hz video images, use a monitor which supports 1080p/24 Hz video signals.
- With film source (24 Hz), you can enjoy a film-like image. It is recommended that you use 1080p/60 Hz for video source and mixed source.
- It is not possible to convert a 50 Hz signal to 1080p/24 Hz. It is output at a resolution of 1080p/50 Hz.
- It is not possible to convert a 1080p/60 Hz signal to 1080p/24 Hz.

Progressive Mode

Select optimum progressive mode for video material.

[Input source]

DVD	HDP	TV/CBL	SAT	VCR	DVR-1	DVR-2	V.AUX
SOURCE							

[Selectable items] Auto Video1 Video2

This can be set when "i/p Scaler" is set to anything other than "OFF".

Aspect

This sets the aspect ratio when outputting 480i/576i or 480p/576p input signals from the HDMI output connector.

[Input source]

DVD	HDP	TV/CBL	SAT	VCR	DVR-1	DVR-2	V.AUX	NET/USB
TUNER	CD							

[Selectable items] Full Normal

This can be set when "i/p Scaler" is set to anything other than "OFF".

5 Input Mode

Make input mode and decode mode settings for this source.
The selectable input modes depend on the input source and "Assign" setting (page 43, 44).

Input Mode

Set the input mode for this source.

[Input source] **PHONO** (iPod)

[Selectable items] **Analog** EXT. IN

[Input source] **NET/USB**

[Selectable items] **Auto** EXT. IN

[Input source]

DVD HDP TV/CBL SAT VCR DVR-1 DVR-2 V.AUX

TUNER CD

[Selectable items]

Auto HDMI Digital Analog EXT. IN

- When a digital signal is properly input, the "DIG." indicator lights on the display. If the "DIG." indicator does not light, check the digital input connector assignment and the connections.

- The surround mode cannot be set if the input mode is set to "EXT. IN".

Operating from the main unit or main remote control unit

Press the **INPUT MODE** button on the main unit or the **INPUT** button on the main remote control unit.

*1: This can be selected for input sources for which the GUI menu "Assign" setting is set to "HDMI" (page 43). Excluding CD and TUNER.

*2: This can be selected for input sources for which the GUI menu "Assign" setting is set to "Digital" (page 43).

Decode Mode

Set the decode mode for this source.

[Input source]

DVD HDP TV/CBL SAT VCR DVR-1 DVR-2 V.AUX

TUNER CD

[Selectable items] **Auto** PCM DTS

- This can be selected for input sources for which the GUI menu "Assign" setting is set to "HDMI" or "Digital".
- Only set "PCM" and "DTS" when playing the respective signals.

6 Rename

Change the display name for this source.

Names containing up to 8 characters can be input.

[Characters that can be input]

A ~ Z a ~ z 0 ~ 9 ! # % & ' () * + , - . / : ; < = > ? @ [\] (space)

7 Source Level

Corrects the playback level of the selected input source's audio input.

[Variable range] **-12dB** ~ **0dB** ~ **+12dB**

For input sources for which "HDMI" or "Digital" are set at the GUI menu "Assign" setting, the analog input level and digital input level can be set separately.

8 Playback Mode

Make settings for "NET/USB" playback.

[Input source] **NET/USB**

USB Select

Select USB port to use.

[Selectable items] **Front** **Rear**

Match the port to be used and the setting.

Repeat

Make settings for repeat mode.

[Selectable items] **All** **One** **OFF**

Random

Make random mode settings.

[Selectable items] **ON** **OFF**

Direct Play

Set the folder to be played using the **DIRECT PLAY** button on the sub remote control unit.

[Selectable items] **Favorites** **All Music**

9 Still Picture

Make settings for still picture (JPEG) playback.

[Input source] **NET/USB**

Slide Show

Make slideshow settings.

[Selectable items] **ON** **OFF**

Interval

Set the playback time per image.

[Variable range] **5s** ~ **60s**

Surround Mode

HOME THX CINEMA

THX surround sound mode to recreate the authentic sound of movie soundtracks.

Surround Playback of 2-channel Sources

[Selectable items]

DOLBY PLIIx CINEMA DOLBY PLII CINEMA DOLBY PRO LOGIC DOLBY NEO:6 CINEMA

Playing Multi-channel Sources (Dolby Digital, DTS, etc.)

[Selectable items]

HOME THX CINEMA

This mode is for decoding the input signals according to their format and playing THX surround sound.

The display when the HOME THX CINEMA mode is selected depends on the input signal and surround back output playback mode.

	Input signal	Display
Dolby Digital Source	DOLBY DIGITAL (other than 2ch) / DOLBY DIGITAL EX / DOLBY DIGITAL Plus / DOLBY TrueHD	THX SURROUND EX THX Ultra2 Cinema THX Music Mode THX Games Mode THX Cinema PLIIx C + THX

DVD-Audio, SACD	PCM (multi ch) / DSD (multi ch)	THX SURROUND EX THX Ultra2 Cinema THX Music Mode THX Games Mode PLIIx C + THX M CH 5.1 + THX M CH 7.1 + THX

*1: This is displayed when the input signal is "DTS-ES Matrix 6.1" and the AVC-A1HD's "AFDM" setting is set to "ON".

*2: This is displayed when the input signal is "DTS-ES Discrete 6.1".

For details, see page 89.

Operating from the main unit or main remote control unit

Press the **HOME THX CINEMA** button on the main unit or the **THX** button on the main remote control unit.

Standard Playback

This is the standard mode for enjoying surround sound according to the program source.

To select these surround modes pressing the **STANDARD** button on the main unit or press the **STD** button on the main remote control unit. The mode switches each time the button is pressed.

Surround Playback of 2-channel Sources

When using a surround back speaker

[Selectable items] DOLBY PLIIx DTS NEO:6

When not using a surround back speaker

[Selectable items] DOLBY PLII DTS NEO:6

DOLBY PLIIx or DOLBY PLII

:The signals are decoded in DOLBY PLIIx or DOLBY PLII for playback.

Cinema :This mode is suited for movie sources.

Music :This mode is suited for music sources.

Game :This mode is suited for games.

Pro Logic :This is the Pro Logic playback mode. This can be selected when playing with a DOLBY PLII decoder. When this mode is selected, "DOLBY PL" is displayed.

Operating from the main unit

The "Cinema", "Music", or "Game" modes can be directly selected with the **CINEMA**, **MUSIC** or **GAME** button on the main unit.

DTS NEO:6

:The signals are decoded in DTS NEO:6 for playback.

Cinema :This mode is suited for movie sources.

Music :This mode is suited for music sources.

Operating from the main unit

The "Cinema" or "Music" modes can be directly selected with the **CINEMA** button or **MUSIC** button on the main unit.

Select the "Cinema", "Music", "Game" and "Pro Logic" modes at GUI menu "Parameter" - "Audio" - "Surround Parameters" - "Mode" (page 48, 49).

Playing Multi-channel Sources (Dolby Digital, DTS, etc.)

[Selectable items]

STANDARD

This mode is for decoding the input signals according to their format and playing surround sound.

The display when the STANDARD mode is selected depends on the input signal and surround back output playback mode.

Input signal	Display
Dolby Digital Source	DOLBY DIGITAL (other than 2ch) / DOLBY DIGITAL EX
	DOLBY DIGITAL+PLIIx CINEMA
	DOLBY DIGITAL+PLIIx MUSIC
	DOLBY DIGITAL Plus
	DOLBY TrueHD
DTS Surround Source	DTS (5.1ch) / DTS-ES Discrete 6.1 / DTS-ES Matrix 6.1 / DTS 96/24
	DTS SURROUND
	DTS+PLIIx CINEMA
	DTS+PLIIx MUSIC
	DTS+NEO:6
	DTS ES MTRX6.1 (*1)
	DTS ES DSCRT6.1 (*2)
DTS-HD High Resolution Audio	DTS 96/24 (*3)
	DTS-HD HI RES
DTS-HD Master Audio	DTS-HD MSTR
DVD- Audio, SACD	MULTI CH IN
	MULTI IN+PLIIx CINEMA
	MULTI IN+PLIIx MUSIC
	MULTI CH IN 7.1

*1: This is displayed when the input signal is "DTS-ES Matrix 6.1" and the AVC-A1HD's "AFDM" setting is set to "ON".

*2: This is displayed when the input signal is "DTS-ES Discrete 6.1".

*3: This is displayed when the input signal is "DTS 96/24".

For details, see page 89, 90.

Dolby Headphone

The Dolby Headphone mode is set when headphones are connected to the **PHONES** jack while in the STANDARD (DOLBY/DTS SURROUND) mode.

[Selectable items] **DOLBY HEADPHONE**

When RECOUT mode is set to "SOURCE", with this amplifier signals encoded in the Dolby Headphone mode can be output from the recording output terminals and recorded on another recorder (page 63).

DSP Simulation Playback

The desired mode according to the program source and viewing situation can be selected from among 9 DENON original surround modes.

The surround parameters can be adjusted (page 87, 88) to achieve an even more realistic, powerful sound field.

[Selectable items]

7CH STEREO

*1: This mode is for enjoying stereo sound from all speakers.

WIDE SCREEN

: This mode is for enjoying the atmosphere of viewing a movie on a large screen.

SUPER STADIUM

: This mode is suited for viewing sports programs.

ROCK ARENA

: This mode is for enjoying the atmosphere of a live concert in an arena.

JAZZ CLUB

: This mode is for enjoying the atmosphere of a live concert in a jazz club.

CLASSIC CONCERT

: This mode is for appreciating classical concert programs.

MONO MOVIE

*2: This mode is for playing monaural movie sources with surround sound.

VIDEO GAME

: This mode is suited for achieving surround sound with video games.

MATRIX

: This mode lets you add a sense of expansion to stereo music sources.

*1: Can also be set by pressing the **7CH STEREO** button on the main unit. However, the GUI menu is not displayed.

*2: When playing sources recorded in monaural in the MONO MOVIE mode, the sound will be off balance with a single channel (left or right), so input to both channels.

• Press the **DSP SIMULATION** button on the main unit or **SIMU** button on the main remote control unit to switch the surround mode. The mode switches each time the button is pressed.

• Depending on the program source being played, it may not be possible to achieve a satisfactory surround effect. In this case, try other modes to achieve a sound field suited to your tastes.

Stereo Playback

[Selectable items]

STEREO :

This is the mode for playing in stereo. The tone can be adjusted. Sound is output from the front left and right speakers and subwoofer.

When the main unit's **DIRECT/STEREO** button or the main remote control unit's **D/ST** button is pressed, DIRECT mode can be switched to STEREO mode.

Direct Playback

[Selectable items]

DIRECT :

In this mode the signals bypass the tone control circuitry for high quality sound.

The display when the DIRECT mode is selected depends on the input signal.

For multi-channel sources, the display depends on the surround back output's play mode.

Input signal	Display
Analog signal / PCM (2ch) / Dolby Digital source / DTS source / Other 2-channel digital signals	DIRECT
DSD (2ch)	DSD DIRECT (*)
PCM (multi ch)	MULTI CH DIRECT M DIRECT + PLIIx CINEMA M DIRECT + PLIIx MUSIC M DIRECT 7.1
DSD (multi ch)	DSD MULTI DIRECT (*)

* : When DSD signals are converted to PCM signals as set by the audio parameters and speaker settings, "DIRECT" or "MULTI CH DIRECT" is displayed.

For details, see page 90.

Playback in the PURE DIRECT Mode

This is the mode that recreates the original sound most faithfully, providing extremely high quality sound.

Press the **PURE DIRECT** button on the main unit or the **PURE** button on the main remote control unit.

- To cancel, press the **PURE DIRECT** button on the main unit or the **PURE** button on the main remote control unit.
- When in the PURE DIRECT mode, the GUI screen is not displayed and the display on the main unit is turned off.
- If the HDMI input connector is selected, video outputs are output in the PURE DIRECT mode.
- The channel level and surround parameters in the PURE DIRECT mode are the same as in the DIRECT mode.

Parameter

Parameters can be called out directly by pressing the **PARA** button on the main remote control unit.

Audio

Adjust various audio parameters.

● Menu tree ●

Parameter

Audio

- 1 Surround Parameters
- 2 Tone

THX Games Mode **Surround Back OFF**

Decoder

Select this when playing analog, PCM or other 2 channel sources. The signals are converted into multichannel signals using the decoders shown below and played in the Dolby Headphone mode.

□ In the THX mode (for 2-channel sources)

[Selectable items]

PLIIx CINEMA **PLII CINEMA** **Pro Logic** **NEO:6 CINEMA**

□ In the DOLBY HEADPHONE mode

[Selectable items]

PLII CINEMA **PLII MUSIC** **NEO:6 CINEMA**

NEO:6 MUSIC **OFF**

Cinema EQ

Soften the treble range of movie soundtracks for better understanding.

[Selectable items] **ON **OFF****

DRC

Compress dynamic range (difference between loud and soft sounds).

[Selectable items] **Auto **Low** **Middle** **High** **OFF****

This can be set in the Dolby TrueHD mode.

D.COMP

Compress dynamic range (difference between loud and soft sounds).

[Selectable items] **OFF **Low** **Middle** **High****

When playing DTS sources, this is only displayed for compatible software.

LFE

Adjust the low-frequency effects level (LFE).

[Variable range] **-10dB ~ **0dB****

For proper playback of the different program sources, we recommend setting to the values below.

- Dolby Digital sources: "0 dB"
- DTS movie sources: "0 dB"
- DTS music sources: "-10 dB"

Center Image

Assign center channel signal to front left and right channels for wider sound.

[Variable range] **0.0 ~ **0.3** ~ **1.0****

Panorama

Assign front L/R signal also to surround channels, for wider sound.

[Selectable items] **ON **OFF****

Dimension

Shift sound image center to front or rear, to adjust playback balance.

[Variable range] **0 ~ **3** ~ **6****

Center Width

Assign center channel signal to front left and right channels for wider sound.

[Variable range] **0 ~ **3** ~ **7****

Delay Time

Adjust delay time to control sound stage size.

[Variable range] **0ms ~ **30ms** ~ **300ms****

Effect

Switch effect signal for multi-surround speakers on and off.

[Selectable items] **ON **OFF****

Effect Level

Adjust effect signal level.

[Variable range] **1 ~ **10** ~ **15****

Set to a lower level if the positioning and sense of phase of the surround signals seems unnatural.

Room Size

Determine size of acoustic environment.

[Selectable items]

Small **Medium small** **Medium** **Medium large** **Large**

NOTE

"Room Size" does not indicate the size of the room in which sources are played.

AFDM

Auto-select surround mode by source.

This function only works for software containing a special identification signal.

If the software being played is recorded in Dolby Digital EX or DTS-ES, it is played in 6.1-channels. If not, it is played in 5.1-channels.

[Selectable items] **ON** **OFF**

Example : Playing Dolby Digital software (with EX flag)

- When "AFDM" is set to "ON", the surround mode is automatically set to the DOLBY D + PLIIx C mode.
- To play in the DOLBY DIGITAL EX mode, set "AFDM" to "OFF" and "SB CH Out" to "MTRX ON".

Some Dolby Digital EX sources do not include EX flags. If the playback mode does not switch automatically even when "AFDM" is set to "ON", set "SB CH Out" to "MTRX ON" or "PLIIx CINEMA".

SB CH Out (for Multi-channel sources)

Select playback mode for surround back channels.

[Selectable items]

NON MTRX **MTRX ON** **PLIIx CINEMA** *¹ **PLIIx MUSIC** *²
ES MTRX *³ **ES DSCRT** *⁴ **DSCRT ON** **OFF**

*¹: This can be selected when "Surround Back" is set to "2spkrs" at the GUI menu "Manual Setup" – "Speaker Setup" – "Speaker Configuration" setting (page 28).

*²: This can be selected when "Surround Back" is set to "2spkrs" or "1spkr" at the GUI menu "Manual Setup" – "Speaker Setup" – "Speaker Configuration" setting.

*³: This can be selected when playing DTS sources.

*⁴: This can be selected when playing DTS sources including a discrete 6.1-channel signal identification signal.

When using the surround back speaker, you can change the "SB CH Out" setting by pressing the STANDARD button.

SB CH Out (for 2-channel sources)

Determine whether to use surround back speakers.

[Selectable items] **ON** **OFF**

Subwoofer Att.

Attenuate subwoofer level when using EXT. IN input.

[Selectable items] **ON** **OFF**

Set this to "ON" if the subwoofer channel level seems too high when playing Super Audio CD.

Subwoofer

Turn subwoofer output on and off.

[Selectable items] **ON** **OFF**

Default

Resets the settings to the default values.

2 Tone

Adjust the tonal quality of the sound.

Tone Defeat

Turn tone adjustments off.

[Selectable items] **ON** **OFF**

The tone cannot be adjusted when in the DIRECT, PURE DIRECT and HOME THX CINEMA mode.

Bass

Adjust bass for all channels together.

[Variable range] **-6dB ~ +6dB**

Treble

Adjust treble for all channels together.

[Variable range] **-6dB ~ +6dB**

"Bass" and "Treble" can be set when "Tone Defeat" is set to "OFF".

Front

Adjust each front channel tone.

[Selectable items] **Bass** **Treble**

[Variable range] **-6dB ~ +6dB**

Center

Adjust each center channel tone.

[Selectable items] **Bass** **Treble**

[Variable range] **-6dB ~ +6dB**

Surround

Adjust each surround channel tone.

[Selectable items] **Bass** **Treble**

[Variable range] **-6dB ~ +6dB**

Surround Back

Adjust each surround back channel tone.

[Selectable items] **Bass** **Treble**

[Variable range] **-6dB ~ +6dB**

Subwoofer

Adjust each subwoofer channel tone.

[Selectable items] **Bass**

[Variable range] **-6dB ~ +6dB**

This can be set individually for the separate surround mode other than PURE DIRECT, DIRECT and Home THX Cinema mode.

3 Room EQ

Select room equalizer for current environment.

[Selectable items]

- Audyssey** : Optimize frequency response of all speakers.
- Audyssey Byp. L/R** : Optimize frequency response of speakers except front L and R speakers.
- Audyssey Flat** : Optimize frequency response of all speakers to flat response.
- Manual** : Apply frequency response set with "Manual EQ" (page 33).
- OFF** : Turn equalizer off.

Operating from the main unit or main remote control unit

Press the **ROOM EQ** button on the main unit or the **EQ** button on the main remote control.

When "Audyssey" is selected, "AUDYSSEY MULTEQ XT" lights.

When "Audyssey Byp. L/R" or "Audyssey Flat" is selected, or when the auto setup measuring results have changed, "AUDYSSEY" lights.

- "Audyssey", "Audyssey Byp. L/R" and "Audyssey Flat" can be selected after the auto setup procedure has been performed.
- If the settings of the speakers for which "None" has been determined at "Auto Setup" are changed, "Audyssey", "Audyssey Byp. L/R" and "Audyssey Flat" cannot be selected and measurements have to be taken again to include the newly-added speakers.
- When using headphones, "Room EQ" is always set to "OFF".

4 Dynamic EQ

Make Dynamic EQ settings.

[Selectable items] **ON** **OFF****Operating from the main unit**

Press the **DYNAMIC EQ** button.

- "Dynamic EQ" is displayed when selecting "Audyssey", "Audyssey Flat" or "Audyssey Byp.L/R" in the "Room EQ" setup. When set to "ON", the "AUDYSSEY DYNAMIC EQ" indicator is lit.
- When the audio setup measuring results have changed, "AUDYSSEY DYNAMIC EQ" lights.

5 RESTORER

This function restores compressed audio signals to how they were before compression and corrects the sense of volume of the bass and treble to obtain richer playback sound.

[Selectable items]

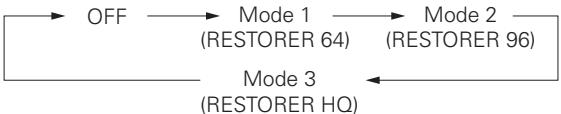

- OFF**
- Mode1** (RESTORER 64)
- Mode2** (RESTORER 96)
- Mode3** (RESTORER HQ)

The default setting for "NET/USB" and "iPod" is "Mode3". All others are set to "OFF".

Operating from the main unit or main remote control unit

During playback, press the **RESTORER** button on the main unit or the **RSTR** button on the main remote control unit.

When set to something other than "OFF", "RESTORER" is displayed.

**About the RESTORER function**

- Such compressed audio formats as MP3, WMA (Windows Media Audio) and MPEG-4 AAC reduce the amount of data by eliminating signal components that are hard for the human ear to hear. The RESTORER function generates the signals eliminated upon compression, restoring the sound to conditions near those of the original sound before compression. It also corrects the sense of volume of the bass to obtain richer sound with compressed audio signals.
- This is displayed on the GUI menu and can be set when the input source is set to "NET/USB", or when analog signals or PCM signals (fs = 44.1/48 kHz) are input.

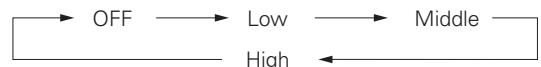

6 Night Mode

Optimized setting for late-night listening.

[Selectable items] **OFF** **Low** **Middle** **High****Operating from the main unit or main remote control unit**

Press the **NIGHT** button on the main unit or the **NGT** button on the main remote control unit.

The "NIGHT" indicator lights when "Low", "Middle" or "High" is selected.

7 Audio Delay

Compensate for mismatched timing between video and audio.

Delay audio.

This sets the delay time for audio signals.

[Variable range] 0ms ~ 200ms

Operating from the main unit or the main remote control unit

* The GUI menu is not displayed when carrying out this setting.

- ① Press the **AUDIO DELAY** button on the main unit or **A. DL** button on the main remote control unit.
- ② Use the $\triangle \square$ button to set.

- This cannot be adjusted when playing in the EXT. IN, DIRECT or STEREO mode (with "Crossover Frequency" set to "FIXED-THX-", "Front" set to "Large", "Tone Defeat" to "ON" and "Room EQ" to "OFF").
- The adjustment range is 0 to 100 ms when the Auto Lipsync Correction function is activated.

Picture Adjust

Adjust the picture quality.

GUI

Menu tree

Parameter

Picture Adjust

- 1 Contrast
- 2 Brightness
- 3 Chroma Level
- 4 Hue
- 5 DNR
- 6 Enhancer
- 7 Sharpness

1 Contrast

Adjust picture contrast.

[Variable range] -6 ~ 0 ~ +6

2 Brightness

Adjust picture brightness.

[Variable range] 0 ~ +12

3 Chroma Level

Adjust picture chroma level (saturation).

[Variable range] -6 ~ 0 ~ +6

4 Hue

Adjust color hue.

[Variable range] -6 ~ 0 ~ +6

5 DNR

Reduces the overall level of noise on the picture.

[Selectable items] OFF Low Middle High

6 Enhancer

Emphasize picture contours.

[Variable range] 0 ~ +12

7 Sharpness

Adjust color definition.

[Variable range] -6 ~ 0 ~ +6

- When the input signal is 1080p the "Picture Adjust" setting will be ineffective.
- Adjusting the "Contrast", "Brightness", "Chroma Level" and "Hue" settings does not affect the HDMI input signal.
- "Hue" can be adjusted for composite video and S-Video signals.
- The adjustment values are stored for the individual input sources.
- "DNR", "Enhancer", and "Sharpness" are each effective with HDMI output. However, they are ineffective with 480i/576i output.

[Items to be checked]

- Surround Mode**: The currently set surround mode is displayed.
- Signal**: The input signal type is displayed.
- fs**: The input signal's sampling frequency is displayed.
- Format**: The number of channels in the input signal (front, surround, LFE) is displayed.
- Offset**: The dialogue normalization correction value is displayed.
- Flag**: "MATRIX" is displayed if the input signal has undergone matrix processing, "DISCRETE" if the input signal has undergone discrete processing.

Dialogue normalization function

Dialogue Normalization (Dial Norm) is a feature of Dolby Digital, which is used to keep the programs at the same average listening level so the user does not have to change the volume control between Dolby Digital programs. When playing back software which has been encoded in Dolby Digital, sometimes you may see a brief message in the front panel display which will read "Dial. Norm X dB" (X being a numeric value). The display is showing how the program level relates with THX calibration level. If you want to play the program at calibrated theatrical levels, you may wish to adjust the volume. For example, if you see the following message: "Dial. Norm + 4 dB" in the front panel display, to keep the overall output level at THX calibrated loudness, just turn down the volume control by 4 dB. However, unlike a movie theater where the playback loudness is preset, you can choose your preferred volume setting for best enjoyment.

Dial. Norm
Offset + 4dB

Playback

Preparations

Turning the Power On

1 Press <POWER>.

The power indicator lights red and the power is set to the standby mode.

2 Press <ON/STANDBY> or [POWER ON].

The power indicator flashes green and the power turns on.

To operate the AVC-A1HD using the main remote control unit, set the remote control unit to the AMP mode (☞ page 67 "Remote Control Unit Operations").

Turning the Power Off

① Press <ON/STANDBY> or [POWER OFF].

The power is set to the standby mode.

② Press <POWER>.

The power indicator turns off, and so does the power.

NOTE

Power continues to be supplied to some of the circuitry even when the power is in the standby mode. When leaving home for long periods of time or when traveling, either press <POWER> to turn off the power, or unplug the power cord from the power outlet.

Operations During Playback

Adjusting the Master Volume

Either turn <MASTER VOLUME> or press [MASTER VOLUME].

Turning Off the Sound Temporarily (Muting)

Press [MUTE].

To cancel, press [MUTE] again. Muting can also be canceled by adjusting the master volume.

Listening with Headphones

Plug the headphones into <PHONES>.

The sound from the speakers and pre-out connectors is automatically cut.

NOTE

Be careful not to set the volume too high when using headphones.

Playing Video and Audio Equipment

Basic Operation

1 Prepare the equipment.

① Load the DVD, CD or other software in the player.

(☞ See the operating instructions of the respective devices.)

② To play a video device, switch the monitor input.

(☞ See the monitor's operating instructions.)

2 To operate using the main remote control unit, set the remote control unit to the AMP mode.

(☞ page 67 "Remote Control Unit Operations")

3 Use SOURCE SELECT to select the input source.

[GUI] : "Source Select" (☞ page 42)

4 Start playback.

(☞ See the operating instructions of the respective devices.)

iPod® Playback

The music on an iPod can be played by using the Control Dock for iPod (ASD-1R, sold separately).

The operation can also be performed using the buttons on the main unit or remote control unit while watching the GUI menus.

 iPod is a trademark of Apple Inc., registered in the U.S. and other countries.

※ The iPod may only be used to copy or play contents that are not copyrighted or contents for which copying or playback is legally permitted for your private use as an individual. Be sure to comply with applicable copyright legislation.

Basic Operation

1 Make the necessary preparations.

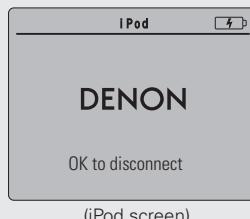

① Set the iPod in the DENON Control Dock for iPod.

( See the Control Dock for iPod's operating instructions.)

② Assign the Control Dock for iPod's input.

[GUI] : "Source Select" – "(input source)" – "Assign" – "iPod dock" ( page 44)

2 Either turn <SOURCE SELECT> or press [iPod] (AMP mode) to select the input source assigned in step 1-② above.

(iPod screen)

※ If the screens above are not displayed, the iPod may not be properly connected. Try connecting again.

[GUI] : "Source Select" – "(input source)" – "Play" ( page 43)

3 To operate using the main remote control unit, set the remote control unit to the iPod mode.

( page 67 "Remote Control Unit Operations")

4 Press [SEARCH] and hold it down for a 2 seconds or more to select the display mode.

To switch between modes, press and hold down the button. When remote mode is active, "Remote" is displayed.

[Display mode]		Browse mode	Remote mode
Display location		Main unit display	iPod display
Playable files	Audio file	<input type="radio"/>	<input type="radio"/>
	Video file	<input checked="" type="radio"/>	<input type="radio"/> *
Active buttons	Remote control unit (AVC-A1HD)	<input type="radio"/>	<input type="radio"/>
	iPod	<input checked="" type="radio"/>	<input type="radio"/>

* : Video may not be output, depending on the combination of ASD-1R and iPod.

- With the default settings, the iPod can be used connected to the VCR (iPod) connector.
- Use the RESTORER mode to expand the low and high frequency components of compressed audio files and achieve a richer sound. The default setting is "Mode3".
- Press <ON/STANDBY> or [POWER OFF] and set the AVC-A1HD's power to the standby mode before disconnecting the iPod. Also switch the input source to one to which the GUI menu "iPod dock" is not assigned before disconnecting the iPod.

NOTE

- Depending on the type of iPod and the software version, some functions may not operate.
- DENON will accept no responsibility whatsoever for any loss of iPod data.

Listening to Music

1 Use $\triangle \nabla$ to select the menu, then press [ENTER] or \triangleright to select the music file to be played.

2 Press [ENTER] or \triangleright .

Playback starts.

To pause

During playback, press [ENTER] or [\blacktriangleright]. Press again to resume playback.

Fast-forwarding or fast-reversing

During playback, either press and hold Δ (to fast-reverse) or ∇ (to fast-forward), or press [\blacktriangleleft] or [\blacktriangleright].

To cue to the beginning of a track

During playback, either press Δ (to cue to the previous track) or ∇ (to cue to the next track), or press [\blacktriangleleft] or [\blacktriangleright].

To stop

During playback, either press and hold [ENTER] or press [■].

Playing repeatedly

Press [CHANNEL -] or [REPEAT] on the sub remote control unit.

[Selectable items] All One OFF

[GUI] : "Source Select" – "(input source)" – "Playback Mode (iPod)" – "Repeat" ( page 43)

Shuffling playback

Press [CHANNEL +] or [RANDOM] on the sub remote control unit.

[Selectable items] Albums Songs OFF

[GUI] : "Source Select" – "(input source)" –
"Playback Mode (iPod)" – "Shuffle" (page 43)

Searching up or down pages

Press [SEARCH], then press △ (down) or ▽ (up).

To cancel, press △▽ or [SEARCH].

To switch between the Browse and Remote modes

Either press and hold [SEARCH].

- The title name, artist name and album name can be checked by pressing <STATUS> during playback.
- On the AVC-A1HD, folder and file names can be displayed as titles. Any characters that cannot be displayed are replaced with “.” (period).
- The time for which the GUI menus are displayed can be set at GUI menu “Manual Setup” – “Option Setup” – “GUI” – “iPod” (page 39).

Viewing Still Pictures or Videos on the iPod

Photo and video data on the iPod can be viewed on the monitor.
(Only for iPod equipped with slideshow or video functions.)

1 Press and hold [SEARCH] to set the Remote mode.

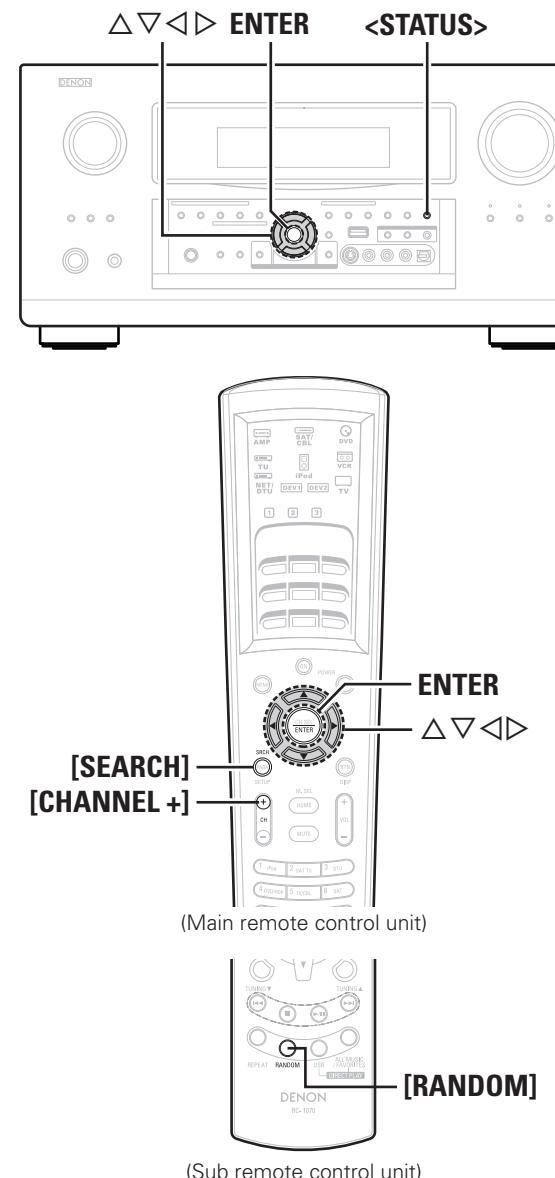

“Remote iPod” is displayed on the AVC-A1HD’s display.

2 Watching the iPod’s screen, use △▽ to select “Photos” or “Videos”.

3 Press ENTER until the image you want to view is displayed.

- “TV Out” at the iPod’s “Slideshow Settings” or “Video Settings” must be set to “On” in order to display the iPod’s photo data or videos on the monitor. For details, see the iPod’s operating instructions.
- When unable to operate by the remote control unit, use the iPod unit.

Playing Network Audio, USB Memory Devices

This procedure can be used to play Internet radio stations or music or still picture (JPEG) files stored on a computer or USB memory device.

□ About the Internet radio function

- Internet radio refers to radio broadcasts distributed over the Internet. Internet radio stations from around the world can be tuned in.
- The AVC-A1HD is equipped with the following Internet radio functions:
 - Stations can be selected by genre and region.
 - Up to 56 Internet radio stations can be preset.
 - Internet radio stations in MP3 and WMA (Windows Media Audio) format can be listened to.
 - Your favorite radio stations can be registered by accessing an exclusive DENON Internet radio URL from a Web browser on a computer.
- ※ The function is managed for individual users, so you must provide your MAC or e-mail address.
Exclusive URL: <http://www.radiodenon.com>
- ※ The radio station database service may be suspended without notice.
- The AVC-A1HD’s Internet radio station list is created using a radio station database service (vTuner). This database service provides a list edited and created for the AVC-A1HD.

□ Media server

This function lets you play music files and playlists (m3u, wpl) stored on a computer (media server) connected to the AVC-A1HD via a network.

With the AVC-A1HD’s network audio playback function, connection to the server is possible using one of the technologies below.

- Windows Media Player Network Sharing Service
- Windows Media DRM10

□ Album art function

When a WMA (Windows Media Audio), MP3 or MPEG-4 AAC file includes album art data, the album art can be displayed while the music files are playing.

For music files in WMA (Windows Media Audio) format, the album art is only played when using Windows Media Player ver. 11.

[Slide show function]

Still picture (JPEG) files stored in folders on a media server can be played as slide shows.

The time for which each picture is displayed can be set.

When still picture (JPEG) files are played on the AVC-A1HD, they are played in the direction in which they are stored in the folder, so store in them in the direction in which you want them to play.

Installing Windows Media Player ver. 11

- ① If Windows XP Service Pack 2 has not yet been installed, either download it free of charge from Microsoft or install it via a Windows update installer.
 - ② Download the latest version of Windows Media Player ver. 11, either directly from Microsoft or using a Windows update installer.
- ※ When using Windows Vista, there is no need to download a new version of Windows Media Player.

USB memory devices

A USB memory device can be connected to the AVC-A1HD's USB port to play music and still picture (JPEG) files stored on the USB memory device.

- Only USB memory devices conforming to mass storage class and MTP (Media Transfer Protocol) standards can be played on the AVC-A1HD.
- The AVC-A1HD is compatible with USB memory devices in "FAT16" or "FAT32" format.

Album art function

When an MP3 music file includes album art data, the album art can be displayed while playing the file.

Slide show function

Still picture (JPEG) files stored on USB memory devices can be played as slide shows.

The time for which each picture is displayed can be set.

When still picture (JPEG) files are played on the AVC-A1HD, they are played in the direction in which they are stored in the folder, so store in them in the direction in which you want them to play.

[Compatible formats]

	Internet radio	Media server*	USB*
WMA (Windows Media Audio)	○	○	○*
MP3 (MPEG-1 Audio Layer-3)	○	○	○
WAV	-	○	○
MPEG-4 AAC	-	○*	○*
FLAC (Free Lossless Audio Codec)	-	○	○
JPEG	-	○	○

A server or server software compatible with distribution in the corresponding formats is required to play music files via a network.

* : Only files that are not protected by copyright can be played on the AVC-A1HD.

Contents downloaded from pay sites on the Internet are copyright protected. Also, files encoded in WMA format when ripped from a CD, etc., on a computer may be copyright protected, depending on the computer's settings.

※ Media server and USB

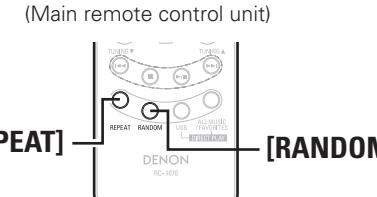

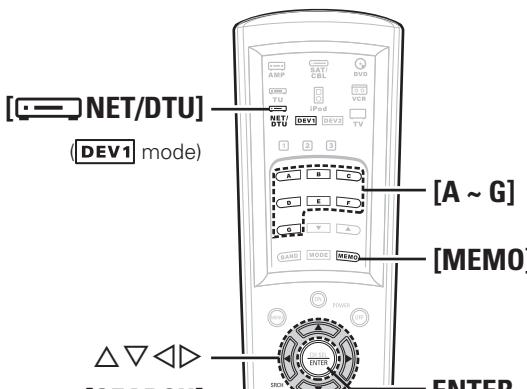

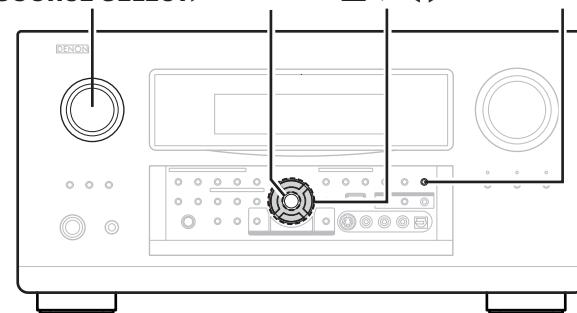

- The AVC-A1HD is compatible with MP3 ID3-Tag (Ver. 2) standards.
- The AVC-A1HD is compatible with WMA META tags.

[Playable formats]

	Sampling frequency	Bit rate	Extension
WMA (Windows Media Audio)	32/44.1/48 kHz	48~192 kbps	.wma
MP3 (MPEG-1 Audio Layer-3)	32/44.1/48 kHz	32~320 kbps	.mp3
WAV	32/44.1/48 kHz	-	.wav
MPEG-4 AAC	32/44.1/48 kHz	16~320 kbps	.aac/.m4a/.mp4
FLAC (Free Lossless Audio Codec)	32/44.1/48 kHz	-	.flac

WAV format Quantization bit rate: 16 bits.

<SOURCE SELECT> ENTER △▽◀▶ <STATUS>

(Main remote control unit)

(Sub remote control unit)

About the button names in these explanations

< > : Buttons on the main unit
 [] : Buttons on the remote control unit

Button name only:

Buttons on the main unit and remote control unit

Basic Operation**1 Make the necessary preparations.**

- ① Check the network environment, then turn on the AVC-A1HD's power. (☞ page 20 "Network Audio")
- ② If settings are required, make the network settings. (☞ page 33 ~ 36 "Network Setup")
- ③ Prepare the computer. (☞ Computer's operating instructions)
Install "Windows Media Player ver. 11".

2 Either turn <SOURCE SELECT> or press [NET/USB] (AMP mode) to select "NET/USB".

[GUI] : "Source Select" – "NET/USB" – "Play"
 (☞ page 43)

3 To operate using the main remote control unit, set the remote control unit to the NET/DTU (DEV1) mode.

(☞ page 67 "Remote Control Unit Operations")

4 Use △▽ to select the menu, then press ENTER or ▷ to select the file you want to play.**5 Press ENTER or ▷.**
Playback starts.**Playing repeatedly**

Press [REPEAT] on the sub remote control unit.

[Selectable items] All One OFF

[GUI] : "Source Select" – "NET/USB" – "Playback Mode" – "Repeat" (☞ page 45)

Playing in random order

Press [RANDOM] on the sub remote control unit.

[Selectable items] ON OFF

[GUI] : "Source Select" – "NET/USB" – "Playback Mode" – "Random" (☞ page 45)

To pauseDuring playback, press **ENTER**.

Press again to resume playback.

To stopDuring the play or pause mode, press and hold **ENTER**.**Searching up or down pages**Press **[SEARCH]**, then press ▲ (down) or ▼ (up).To cancel, press △▽ or **[SEARCH]**.**Searching by first letter** (Character search)

This operation is convenient for choosing items from the menu screens for Internet radio stations or files stored on the computer.

- ① When the menu screen is displayed, press **[SEARCH]** twice.
- ② Use ▲▼ to select the first letter you want to search for.
If there are multiple items starting with the selected letter, they are displayed in alphabetical order.
If it is not possible to search the list, "unsorted list." is displayed.
To cancel, press or △▽ or **[SEARCH]**.

- Use the RESTORER mode to expand the low and high frequency components of compressed audio files and achieve a richer sound. The default setting is "Mode3".
- The time for which the GUI menus are displayed can be set at GUI menu "Manual Setup" – "Option Setup" – "GUI" – "NET/USB" (☞ page 39).
- Use <STATUS> to switch between displaying the title name, artist name or album name.
- The track display order differs with the server specification. When, due to the server specification, track display is not in alphabetical order, character search may not operate correctly.

Listening to Internet Radio

- 1** Use $\Delta \nabla$ to select “Internet Radio”, then press **ENTER** or \triangleright .
- 2** Use $\Delta \nabla$ to select the item you want to play, then press **ENTER** or \triangleright .
The station list is displayed.
- 3** Use $\Delta \nabla$ to select the station, then press **ENTER** or \triangleright .
Playback starts once buffering reaches “100%.”

- There are many Internet radio stations on the Internet, and the quality of the programs they broadcast as well as the bit rate of the tracks varies widely.
- Generally, the higher the bit rate, the higher the sound quality, but depending on the communication lines and server traffic, the music or audio signals being streamed may be interrupted.
- Inversely, lower bit rates mean a lower sound quality but less tendency for the sound to be interrupted.
- “Server Full” or “Connection Down” is displayed if the station is busy or not broadcasting.
- On the AVC-A1HD, folder and file names can be displayed as titles. Any characters that cannot be displayed are replaced with “.” (period).

Recently Played Internet Radio Stations

Recently played internet radio stations can be selected from “Recently Played” in top menu.

- 1** Use $\Delta \nabla$ to select “Recently Played”, then press **ENTER** or \triangleright .
- 2** Use $\Delta \nabla$ to select the item you want to play, then press **ENTER** or \triangleright .

NOTE

Up to 20 stations stored in “Recently Played”

Presetting Internet Radio Stations

Preset Internet radio stations can be selected directly.

- 1** While the Internet radio station you want to preset is playing, press **[MEMO]**.
- 2** Use $\Delta \nabla$ to select “Preset”, then press **ENTER**.
- 3** Press **[A ~ G]**, then press **[1 ~ 8]** to select the desired preset number.
The Internet radio station is now preset.

NOTE

If registered at a number that has already been preset, the previously registered setting is cleared.

Listening to Preset Internet Radio Stations

Press **[A ~ G]**, then press **[1 ~ 8]**.

The AVC-A1HD automatically connects to the Internet and playback begins.

Registering Internet Radio Stations as Your Favorites

Favorites are listed at the top of the menu screen, so when a station is registered as a favorite it can be tuned in easily.

- 1** Press **[MEMO]** while the Internet radio station you want to register is playing.
- 2** Use $\Delta \nabla$ to select “Favorites”, then press **ENTER**.
- 3** Press \triangleleft to select “Yes”.
The Internet radio station is registered.
If you do not want to register it, press \triangleright .

Listening to Internet Radio Stations Registered in Your Favorites

- 1** Use $\Delta \nabla$ to select “Favorites”, then press **ENTER** or \triangleright .

- 2** Use $\Delta \nabla$ to select the Internet radio station, then press **ENTER** or \triangleright .

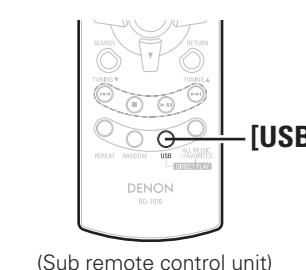

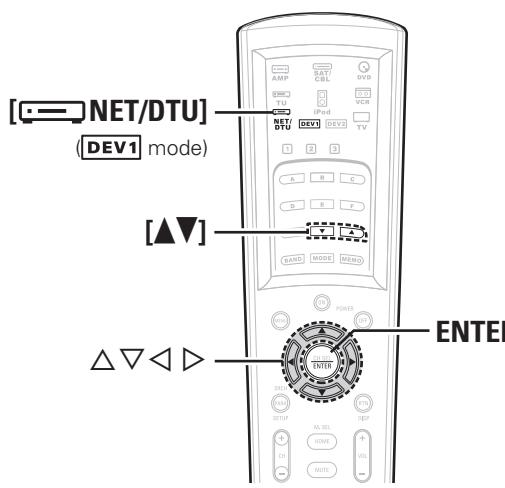

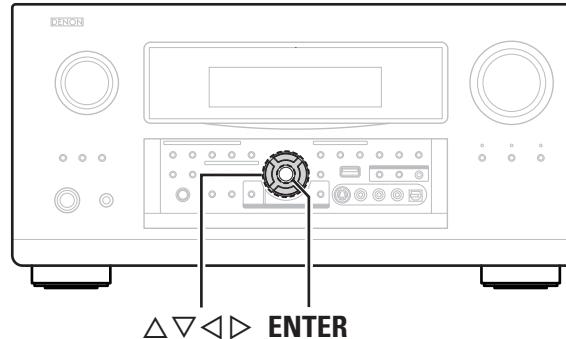

The AVC-A1HD automatically connects to the Internet and playback begins.

Clearing Internet Radio Stations from Your Favorites

- 1** Use $\Delta \nabla$ to select “Favorites”, then press **ENTER** or \triangleright .

- 2** Use $\Delta \nabla$ to select the Internet radio station you want to clear, then press **[MEMO]**.

- 3** Press \triangleleft to select “Delete”.
The selected Internet radio station is cleared.
To cancel the operation without clearing the station, press \triangleright .

(Sub remote control unit)

About the button names in these explanations

- < > : Buttons on the main unit
- [] : Buttons on the remote control unit

Button name only:

Buttons on the main unit and remote control unit

Playing Files Stored on a Computer

Use this procedure to play music files, image files or playlists.

- 1** Use $\triangle \nabla$ to select “Media Server”, then press **ENTER** or \triangleright .
- 2** Use $\triangle \nabla$ to select the host name of the computer on which the music file you want to play is located, then press **ENTER** or \triangleright .
- 3** Use $\triangle \nabla$ to select the search item or folder, then press **ENTER** or \triangleright .
- 4** Use $\triangle \nabla$ to select the file, then press **ENTER** or \triangleright .
Playback starts once buffering reaches “100%.”

Selecting tracks

During playback, either press Δ (previous track) or ∇ (next track).

- When playing still picture (JPEG) files, files can also be selected using the operation described below.
During playback, either press [▲] (previous file) or [▼] (next file).
- Connections to the required system and specific settings must be made in order to play music files (page 20).
- Before starting, you must launch the computer’s server software and set the files as server contents. For details, see the operating instructions of your server software.
- Depending on the size of the still picture (JPEG) file, some time may be required for the file to be displayed.

Playing files that have been Preset or Registered in Your Favorites

Files can be preset, registered in your favorites and played using the same operations as for Internet radio stations.

NOTE

- Presettings are erased by overwriting them.
- When the operation described below is performed, the media server’s database is updated and it may no longer be possible to play preset or favorite music files.
 - When you quit the media server and then restart it.
 - When music files are deleted or added on the media server.

Playing Files Stored on USB Memory Devices

Only USB memory devices conforming to mass storage class and MTP (Media Transfer Protocol) standards can be played on the AVC-A1HD.

Basic Operation

- 1** Make the necessary preparations.
 - Set the USB port to be used.

GUI : “Source Select” – “NET/USB” – “Playback Mode” – “USB Select” (page 45)

 - Connect the USB memory device to the set USB port.
- 2** Use $\triangle \nabla$ to select “USB”, then press **ENTER** or \triangleright .
- 3** Use $\triangle \nabla$ to select the search item or folder, then press **ENTER** or \triangleright .
- 4** Use $\triangle \nabla$ to select the file, then press **ENTER** or \triangleright .
Playback starts once buffering reaches “100%.”

- By default, the front panel’s USB port will be used.
- Depending on the size of the still picture (JPEG) file, some time may be required for the file to be displayed.

Selecting tracks

During playback, either press Δ (previous track) or ∇ (next track).

- When playing still picture (JPEG) files, tracks can also be selected using the operation described below.
- During playback, either press **[▲]** (previous file) or **[▼]** (next file).
- If the USB memory device is divided into multiple partitions, only the top partition can be selected.
- The AVC-A1HD is compatible with MP3 files conforming to "MPEG-1 Audio Layer-3" standards.
- When **[USB]** is pressed, playback starts from the first track on the USB memory device.

NOTE

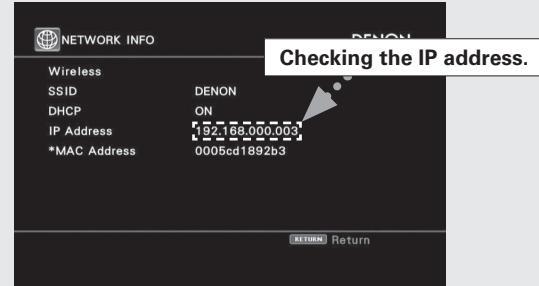

- The AVC-A1HD is equipped with two USB ports, one each on the front and rear panels. It is not possible to use the set with USB memory devices connected to both the ports at the same time. Select the USB port you want to use at the "Source Select" – "NET/USB" – "Playback Mode" – "USB Select" menu.
- DENON will accept no responsibility whatsoever for any loss or damage to data on USB memory devices when using the USB memory device connected to the AVC-A1HD.
- USB memory devices will not work via a USB hub.
- DENON does not guarantee that all USB memory devices will operate or receive power. When using a USB connection type portable hard disk of the type for which power can be supplied by connecting an AC adapter, we recommend using the AC adapter.
- It is not possible to connect and use a computer via the AVC-A1HD's USB port using a USB cable.
- The AVC-A1HD is not compatible with the iPod shuffle.

Operating the AVC-A1HD Using a Browser (Web control)

This function lets you operate the AVC-A1HD using Internet Explorer.

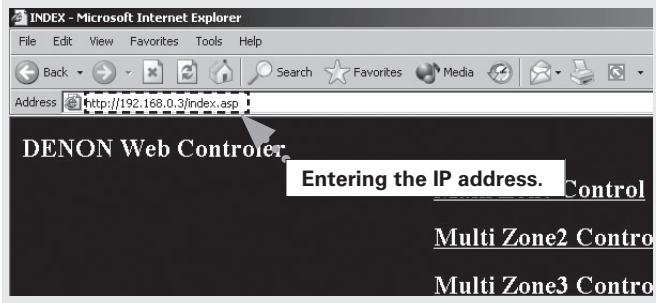

1 Switch "OFF" the "Power Saving" setting under "Manual Setup" – "Network Setup" – "Other" on the GUI menu (☞ page 36).

2 Check the AVC-A1HD's IP address with "Manual Setup" – "Network Setup" – "Network Information" on the GUI menu (☞ page 36).

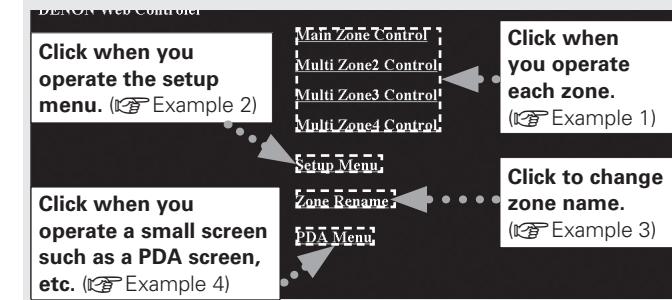

3 Enter the AVC-A1HD IP address in Internet Explorer's address box.

For example, if the IP address of AVC-A1HD is "192.168.0.3", enter "http://192.168.0.3".

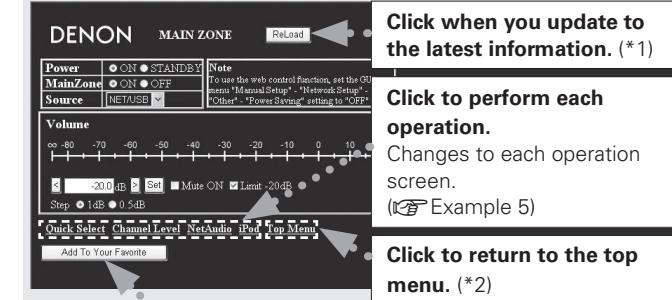

4 When the top menu is displayed, click on the menu you want to operate.

5 Operate.

[Example 1] Main zone control screen

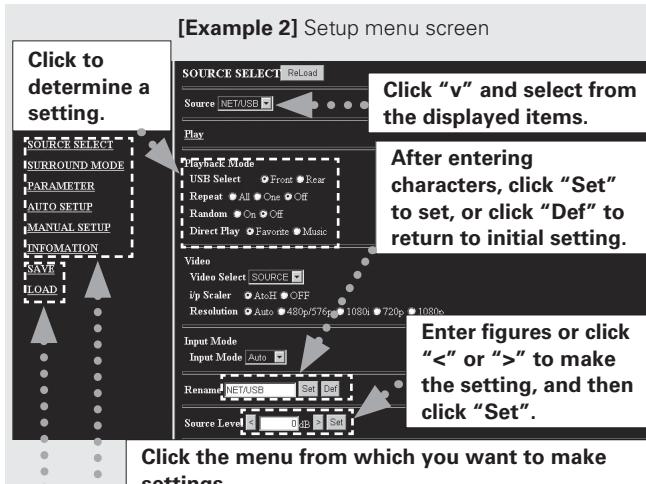

Click to add a setting to the "Favorites" in your browser. (*3)

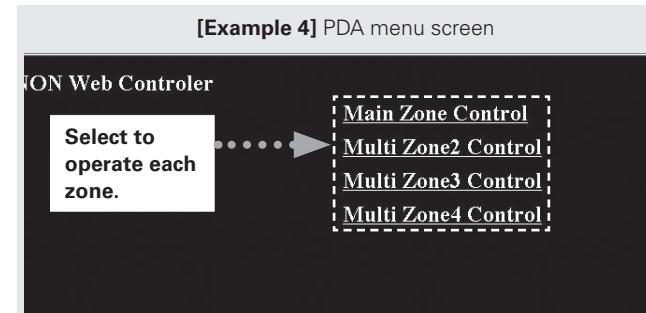

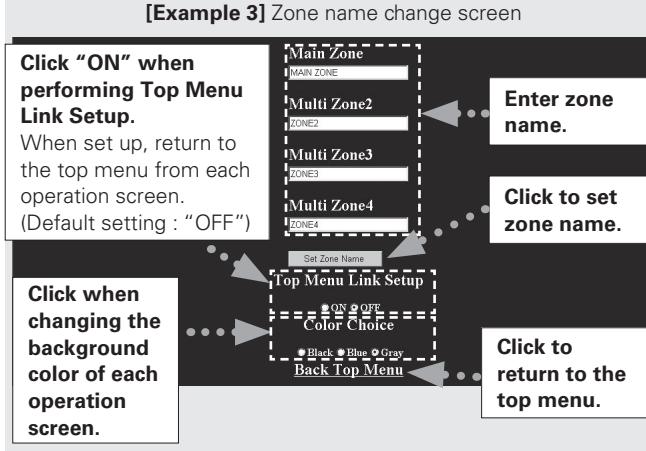

*1 : Normally, there is a change to the latest information each time you operate. When operated from the main unit, click because the screen is not updated.

*2 : Displayed when setting "Top Menu Link Setup" to "ON" in [Example 3].

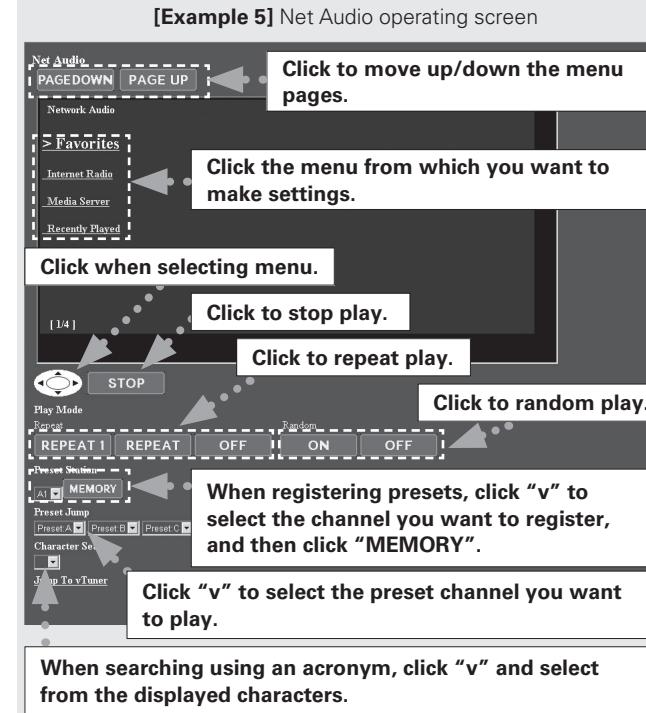

*3 : To avoid mistakenly performing menu operations of a zone you are not operating, we recommend that you register the setting contents for each zone under Favorites in your browser.

Click "SAVE" when you want to save settings, and click "LOAD" when you want to call settings.
Becomes each operation screen.

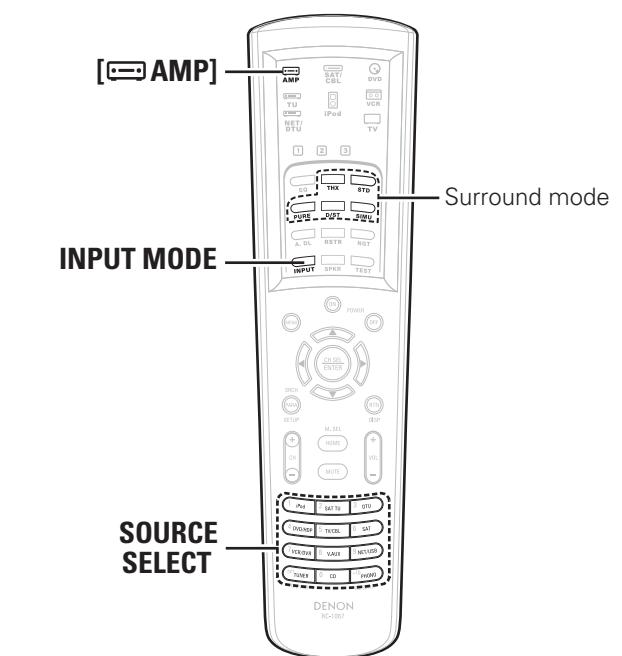

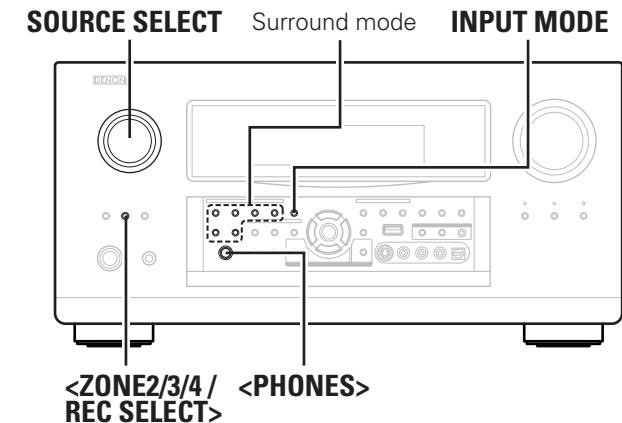

NOTE
You cannot change setup menu operations and zone name on the PDA menu screen.

NOTE

- To perform web control, you must connect a web control device such as a PC to the same network as the AVC-A1HD.
- With web control, some network settings, etc., cannot be set.
- When updating firmware, settings made by the web controller may be reset.

Other Operations and Functions

Other Operations

Playing Super Audio CD

1 Assign “DENON LINK” with the “Digital” setting or assign “HDMI” with the “HDMI” setting (☞ page 43).

2 Either turn <SOURCE SELECT> or press [SOURCE SELECT] to select the input source assigned in step 1. The “DLINK” or “HDMI” indicator lights on the display.

3 Select “AUTO” for the INPUT MODE (☞ page 45).

4 Select the surround mode (☞ page 46 ~ 48).
We recommend playing in the DIRECT mode.

5 Start playing the Super Audio CD.
The “DSD” indicator lights on the display.

For operating instructions, refer to the respective equipment’s operating instructions.

- When playing DSD signals in the DIRECT or PURE DIRECT mode, the DSD signals are converted as such into analog signals. When playing in other surround modes, the DSD signals are first converted into PCM format, then into analog signals.
- “DSD DIRECT” is shown on the display when playing DSD 2-channel signals in the DIRECT mode. “DSD MULTI DIRECT” is shown on the display when playing DSD multi-channel signals in the DIRECT mode.
- The DSD signal may not be output depending on the equipment that is connected. For further details, refer to the user manual for the equipment being used.

Recording on an External Device (REC OUT mode)

You can listen to one program source while recording a different program source.

1 Press <ZONE2/3/4 / REC SELECT>. “ZONE3 SOURCE” is shown on the display.

2 Turn <SOURCE SELECT> until “RECOUT SOURCE” is displayed.

The “REC” indicator lights.

3 Turn <SOURCE SELECT> to choose the input source to be recorded.

4 Play the program source.

For operating instructions, refer to the respective equipment’s operating instructions.

5 Start recording.

For operating instructions, refer to the respective equipment’s operating instructions.

- To cancel, press <ZONE2/3/4 / REC SELECT>, then turn <SOURCE SELECT> until “ZONE3 SOURCE” is displayed.
- Make a test recording before starting the actual recording.
- Signals are only output to the analog REC OUT connectors when the digital signals input to the digital input connectors (OPTICAL/COAXIAL) are PCM (2-channel) signals.
- Digital audio signals input to the DENON LINK or HDMI connectors are not output to the REC OUT connectors, so connect using the OPTICAL or COAXIAL connectors.
- Sources selected with the REC OUT mode are output from ZONE3 as well.
- In the REC OUT mode, the remote control unit’s ZONE3 mode buttons cannot be operated.
- When the “Digital Out” setting is set to “ZONE4 Select”, the OPTICAL4 output connector becomes the ZONE4 output. When using for recording, set to “Rec Select”.
- The network audio signals (Internet radio, media server, USB) are not output if they are copyright-protected.

NOTE

- Recordings you make are for your personal enjoyment and should not be used for other purposes without permission of the copyright holder.
- When “DENON LINK” is assigned at the GUI menu “Assign” setting, the PCM signals, network audio signals (Internet radio, media server and USB), input from the digital input connectors cannot be output from the analog REC OUT connectors.
- Input sources for which “Delete” is selected at “Source Delete” cannot be selected.

Dolby Headphone recording

When REC OUT mode is set to “SOURCE”, with the AVC-A1HD it is possible to output signals encoded in the Dolby Headphone mode from the recording output terminal and record them on a separate recorder.

1 The Dolby Headphone play mode is set when headphones are connected to <PHONES> during playback in the STANDARD (DOLBY/DTS Surround mode).

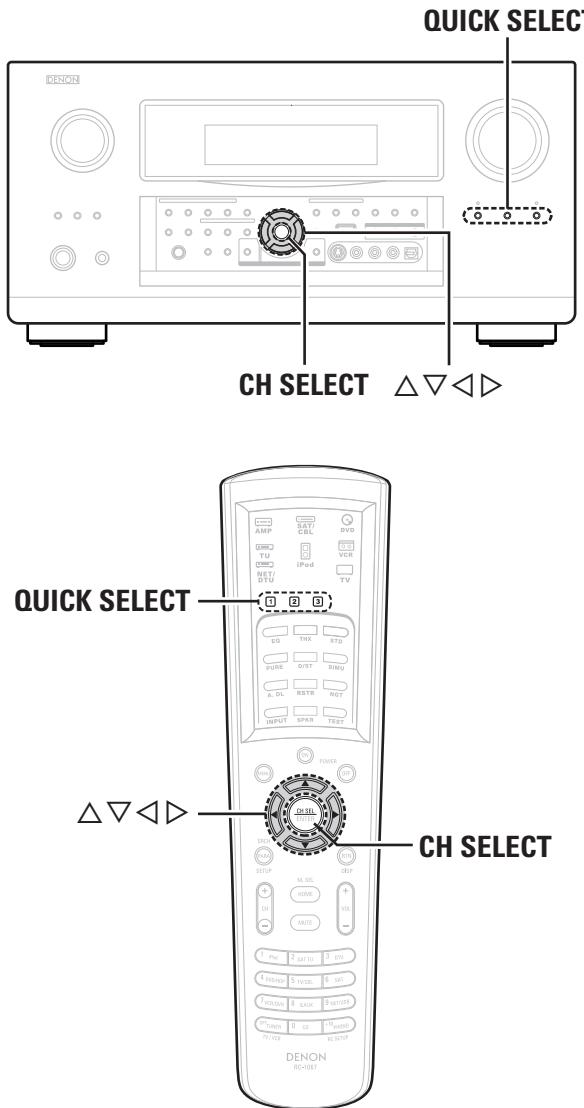

When this is done, signals encoded in the Dolby Headphone mode are automatically output from the recording output terminals (analog and digital) and can be recorded.

2 Select the parameters and set the desired mode.

Start recording.
Refer to the “Dolby Headphone” (☞ page 47).

NOTE

Do not disconnect the headphones during recording.

About the button names in these explanations

< > : Buttons on the main unit

Button name only:

Buttons on the main unit and remote control unit

Convenient Functions

HDMI Control Function

When connecting the AVC-A1HD to a television or player compatible with the HDMI control function, the following operations are possible.

- Turn power ON/OFF (Synchronize with television)
- Switch to sound output equipment (TV and AVC-A1HD)
- Adjust volume
- Switch input source

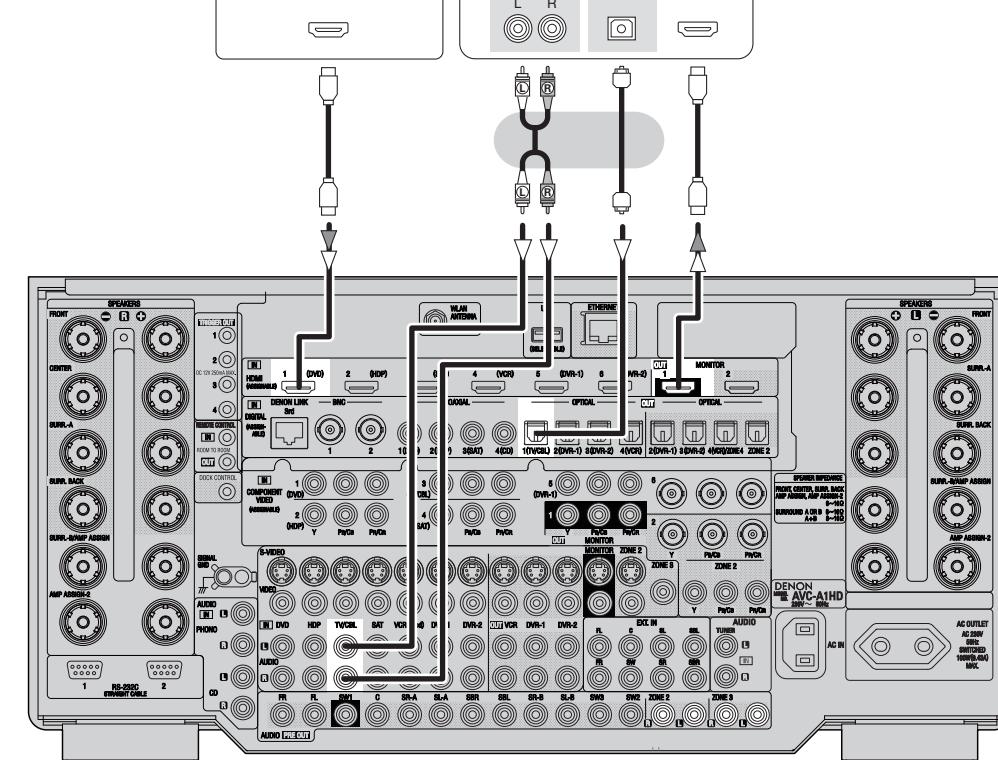

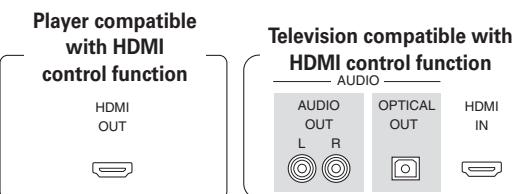

When using these functions set as follows: GUI menu "Manual Setup" – "HDMI Setup" – "HDMI Control" (page 31).

NOTE

When using the HDMI control function, do not assign HDMI input to "TV/CBL" by setting "Source Select" – "(input source)" – "Assign" in the GUI menu.

Connections

Operations

1 Connect the HDMI to the AVC-A1HD with equipment compatible with the HDMI control function.

2 Put the power on for all the equipment connected to the HDMI.

3 Check the settings for all the equipment connected to the HDMI and make HDMI available to them.

※ Please consult the operating instructions for the connected equipment to check the settings.

※ Steps 1~3 do not have to be repeated once started.

※ Carryout steps 2 and 3 should any of the equipment be plugged out.

4 Switch the television input to the HDMI connected to the AVC-A1HD.

5 Switch the AVC-A1HD input to the HDMI input source and check if the picture from the player is ok.

6 Put the television power on standby and check if the AVC-A1HD goes into standby.

If the AVC-A1HD does not work please check the following.

- Is the GUI menu "Manual Setup" – "HDMI Setup" – "HDMI Control" – "Control" (☞ page 31) set to "ON"?
- Is the GUI menu "Manual Setup" – "HDMI Setup" – "HDMI Control" – "Control Monitor" (☞ page 31) set for the monitor output connected to television?
- Is the GUI menu "Manual Setup" – "HDMI Setup" – "HDMI Control" – "Power Off Control" (☞ page 31) set to "ON"?
- Is the control function used for the television HDMI properly set? (Check the television operating instructions for details.)
- Should any of the operations below be performed, the interlocking function may be reset, in which case, repeat step's 2 and 3.
 - GUI menu "Source Select" – "Assign" – "HDMI" (☞ page 43) setting has changed
 - There is a change to the connection between the equipment and the HDMI, or an increase in equipment.
 - AVC-A1HD GUI menu "Manual Setup" – "HDMI Setup" – "Monitor Out" (☞ page 31) is changed.

Channel Level

You can adjust the channel level either according to the playback sources or to suit your taste, as described below.

1 Press **CH SELECT**.

2 Use $\triangle\triangledown$ or **CH SELECT** to select the speaker.
The speaker that can be set switches each time one of the buttons is pressed.

3 Use $\triangle\triangleright$ to adjust the volume.

※ "OFF" can be set by pressing \triangle when the subwoofer's volume is set to -12 dB.

Fader Function

This function lets you adjust (fade) the sound from all the front or rear speakers at once.

1 Press **CH SELECT**.

2 Press $\triangle\triangledown$ or **CH SELECT** to select "Fader".

3 Use $\triangle\triangleright$ to adjust the volume of the speakers.
(\triangle : front, \triangleright : rear)

- The fader function does not affect the subwoofer.
- The fader can be adjusted until the volume of the speaker adjusted to the lowest value is -12 dB.

Quick Select Function

With this function, the currently playing input source, input mode, surround mode, room EQ settings and volume can be stored in the memory.

1 Set the input source, input mode, surround mode, room EQ settings and volume to the conditions you want to store.

2 Press and hold the desired **QUICK SELECT**.
Keep pressing the button until the quick select indicator lights.

[Quick Select Defaults]

	Input Source	Volume
Quick Select 1	DVD	-40 dB
Quick Select 2	TV/CBL	-40 dB
Quick Select 3	VCR	-40 dB

- To call out the settings, press **QUICK SELECT** at which the desired settings were stored.
- The Quick Select name can be changed (☞ page 39).

NOTE

Input sources stored with the quick select function cannot be selected if they have been deleted at GUI menu "Manual Setup" – "Option Setup" – "Source Delete" (☞ page 38). In this case, store them again.

Personal Memory Plus Function

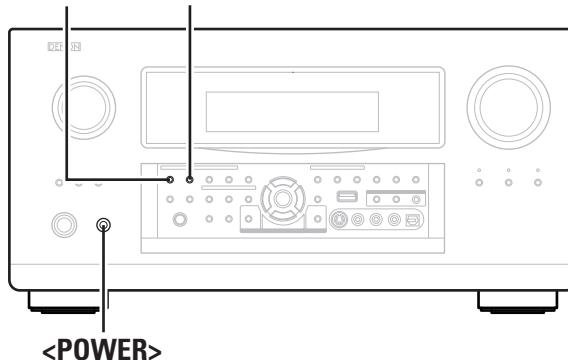

This function sets the settings (input mode, surround mode, HDMI output mode, Picture Adjust, Audio Delay etc.) last selected for the individual input sources.

When you switch to an input source, the settings are automatically set to the ones that were set the last time that input source was used.

The surround parameters, tone control, room EQ settings and the volumes of the different speakers are stored for the individual surround modes.

<STANDARD> <HOME THX CINEMA>

About the button names in these explanations

< > : Buttons on the main unit
[] : Buttons on the remote control unit

Button name only:

Buttons on the main unit and remote control unit

Last Function Memory

This stores the settings as they were directly before the standby mode was set.
When the power is turned back on, the settings are restored to as they were directly before the standby mode was set.

Backup Memory

The various settings are backed up for about 1 week, even if the power is turned off or the power cord is disconnected.

Resetting the Microprocessor

Perform this procedure if the display is abnormal or if operations cannot be performed.

All settings are reset when the microcomputer is reset.

1 Turn off the power using <POWER>.

2 Press <POWER> while simultaneously pressing <STANDARD> and <HOME THX CINEMA>.

3 Once the display starts flashing at intervals of about 1 second, release the two buttons.

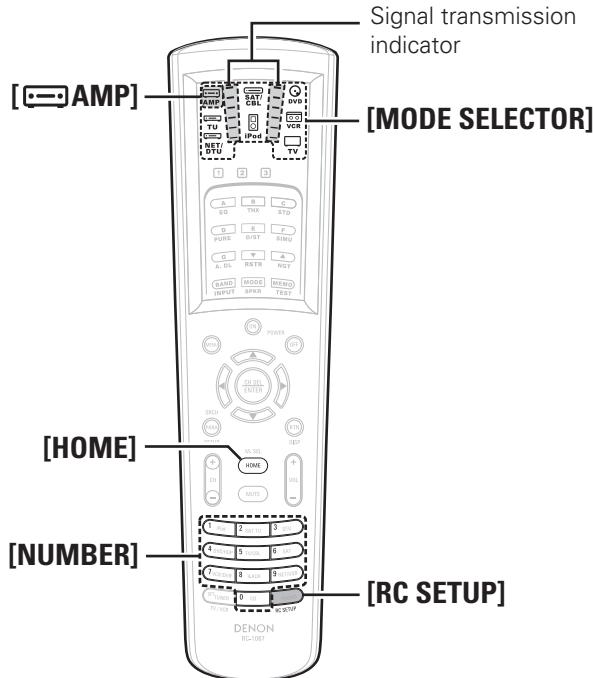

If in step 3 the display does not flash at intervals of about 1 second, start over from step 1.

Remote Control Unit Operations

Main Remote Control Unit

- On the main remote control unit, the display switches according to the device being operated and the mode.
- In modes other than iPod, the mode switches between "DEV1" and "DEV2" each time the [MODE SELECTOR] is pressed.
- In the AMP, NET/DTU ([DEV1]) and iPod modes, when the remote ID is set, the AVC-A1HD can be used independently even in an environment containing multiple DENON amplifiers.

Depending on the model and year of manufacture of your equipment, some buttons may not operate.

NOTE

The device mode ("DEV1" or "DEV2") cannot be changed while the setting is being made.

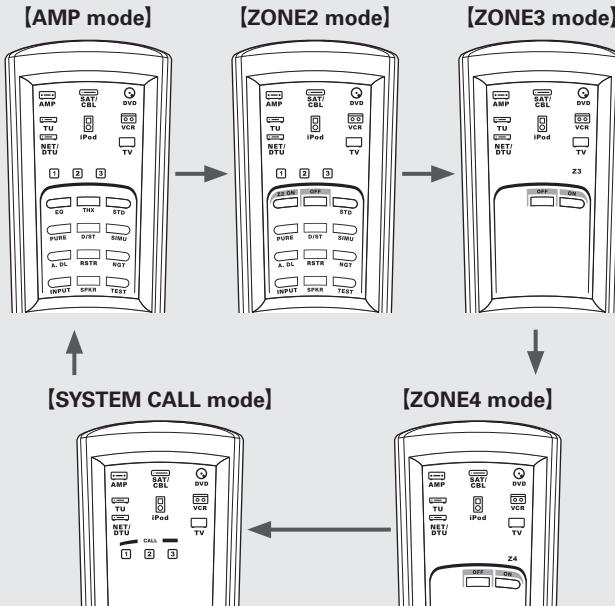

Operating DENON Audio Components

- Press [MODE SELECTOR] for the component to be operated.

The indicator for the component to be operated flashes.

: AMP / ZONE2 / ZONE3 / ZONE4 / SYSTEM CALL	: iPod
: TUNER (FM/AM)	: DVD player (recorder) / CD player (recorder)
: NETWORK/USB / DIGITAL TUNER	: VCR /TAPE
: Satellite Receiver / Cable TV	: TV

※ The mode switches each time [AMP] is pressed.

- Operate the component.

※ For details, refer to the component's operating instructions.

[HOME] is used to return to the AMP mode (AMP, ZONE2, ZONE3, ZONE4 or SYSTEM CALL) when in any mode other than AMP.

Presetting

The included main remote control unit can be preset to operate devices of various brands.

- Press [MODE SELECTOR] for the device you want to preset.

- Press and hold in [RC SETUP] for at least 3 seconds.

The signal transmission indicator flashes twice.

- Press [NUMBER] and input the 5-digit number of the brand of the component to be preset. The numbers are shown in the Preset Code Table (☞ End of this manual).

When the code is registered, the signal transmission indicator flashes twice.

When the preset code is transmitted, the mode indicator for the component to which that code belongs flashes.

※ The input mode is canceled if no button is operated for 10 seconds.

Some brands have more than one preset code. If the component does not operate, try inputting a different code.

Operating Preset Components

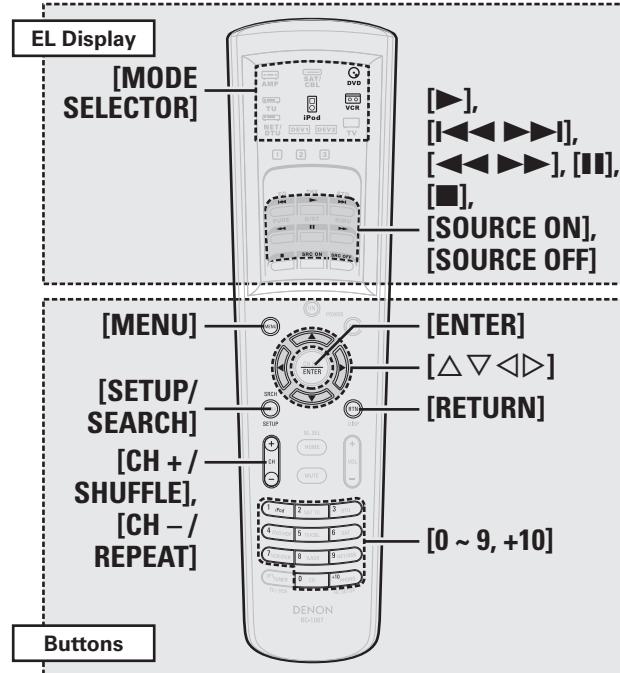

- Press [MODE SELECTOR] for the component to be operated.

The mode indicator of the device to be operated flashes.

- Operate the component.

※ For details, refer to the component's operating instructions.

Setting the Remote ID

When using multiple DENON AV receivers in the same room, make this setting so that only the desired AV receiver operates.

- 1 Press [AMP] to set the main remote control unit to the AMP mode.**
- 2 Press and hold in [RC SETUP] for at least 3 seconds.**
The signal transmission indicator flashes twice.
- 3 Refer to the table at the right, and use [NUMBER] to input the 5-digit number corresponding to the remote ID to be changed.**
The signal transmission indicator flashes twice.
- 4 Press [iPod] or [NET/DTU] to select the mode to be set.**
- 5 Repeat steps 2 to 4 to set the remote IDs for all modes.**

MODE SELECTOR Remote ID	AMP (MAIN)	iPod	NET/DTU
	1 (Default)	81001	72815
2	82001	72816	62837
3	83001	72817	62838
4	84001	72818	62839

NOTE

- When changing a setting, be sure to set the same remote ID as the AVC-A1HD's (page 40).
- When changing the AMP mode's remote ID, also change the "iPod" and "NET/DTU" remote ID at the same time.

Learning Function

If your AV devices are of a brand other than DENON or if they cannot be operated with the preset memory function, their remote control signals can be transferred to stored in the AVC-A1HD's main remote control unit.

- 1 Press [MODE SELECTOR] for the device you want to set.**
- 2 Press and hold in [RC SETUP] for at least 3 seconds.**
The signal transmission indicator flashes twice.
- 3 Press [9], [7] and [5], in that order.**
The signal transmission indicator flashes twice and the learning mode is set.
- 4 Press the button to be set.**
The main remote control unit's display turns off.
※ If a button that cannot be learned is pressed, the signal transmission indicator lights but the signal is not learned.
- 5 Point the main remote control units directly at each other and press and hold the button on the other device's remote control unit that you want to learn.**
Once learning is completed normally, the display lights and the signal transmission indicator flashes twice.
- 6 Press and hold in [RC SETUP] for at least 3 seconds.**
The signal transmission indicator flashes twice and the setting is completed.

Other device's remote control unit

AVC-A1HD's main remote control unit (RC-1067)

- ※ If you want to learn other buttons, repeat steps 4 and 5.
- ※ The mode can be switched by pressing [MODE SELECTOR].
- ※ The signal transmission indicator lights once for a long time if learning was not possible

- With some remote control units, the signals cannot be learned or the device will not operate properly even when the signals have been learned. In this case, use the device's own remote control unit.
- Learned buttons have priority over the preset memory. If you no longer need the learned setting, reset the learning function (page 72).

NOTE

- [HOME]** cannot be learned.
- Do not learn any remote control signals at **[RC SETUP]**.
- The AMP, ZONE2, ZONE3, ZONE4 and SYSTEM CALL modes cannot be learned.

System Call Function

This function lets you register a series of operations at a single button.

For example, the amplifier can be turned on, the input source selected, the monitor's power turned on, the source device's power turned on and the play mode set all by pressing a single button.

Up to 32 signals each can be registered at **[SYSTEM CALL]** (1, 2 or 3).

Registering

- Press **[MODE SELECTOR]** for the device you want to register.
- Press and hold in **[RC SETUP]** for at least 3 seconds.
The signal transmission indicator flashes twice.
- Press **[9], [7] and [8]**, in that order.
The signal transmission indicator flashes twice and the system call registration mode is set.
- Press **[SYSTEM CALL]** (1, 2 or 3) at which you want to register the signals.

5 Press the buttons you want to register in the same sequence as the operations you want to perform.

The signal transmission indicator lights when a button is pressed.

Example : Press **[POWER ON]**.

↓

Press **[MODE SELECTOR] - [DVD]**.

↓

Press **[▶]**.

※ The mode can be switched by pressing **[MODE SELECTOR]**.

※ Perform the registration procedure for all the buttons you want to register.

6 Press and hold in **[RC SETUP]** for at least 3 seconds.

The signal transmission indicator flashes twice and the setting is completed.

Calling out

1 Press **[AMP]**, to select "SYSTEM CALL".

2 Press **[SYSTEM CALL]** (1, 2 or 3) at which the signals were registered.

The registered signals are transmitted in the registered sequence.

Punch Through Function

CD, DVD or VCR mode buttons can be stored at unused TV or SAT/CBL mode buttons.

For example, when DVD mode buttons are assigned to the TV mode, the DVD mode operations can be performed while in the TV mode.

1 Press **[MODE SELECTOR]** for the device you want to punch through (CD, DVD or VCR).

2 Press and hold in **[RC SETUP]** for at least 3 seconds.
The signal transmission indicator flashes twice.

3 Press **[9], [8] and [4]**, in that order.

The signal transmission indicator flashes twice and the punch through setting mode is set.

4 Press **[MODE SELECTOR]** for the device you want to punch through (CD, DVD or VCR).

5 Press the button you want to punch through (**▶**, **■**, **◀◀**, **▶▶** or **II**).

6 Press **[MODE SELECTOR]** for the equipment (TV or SAT/CBL) you want to set to punch-through.

7 Press and hold in **[RC SETUP]** for at least 3 seconds.
The signal transmission indicator flashes twice and the setting is completed.

Setting the Time the Backlight Stays Lit

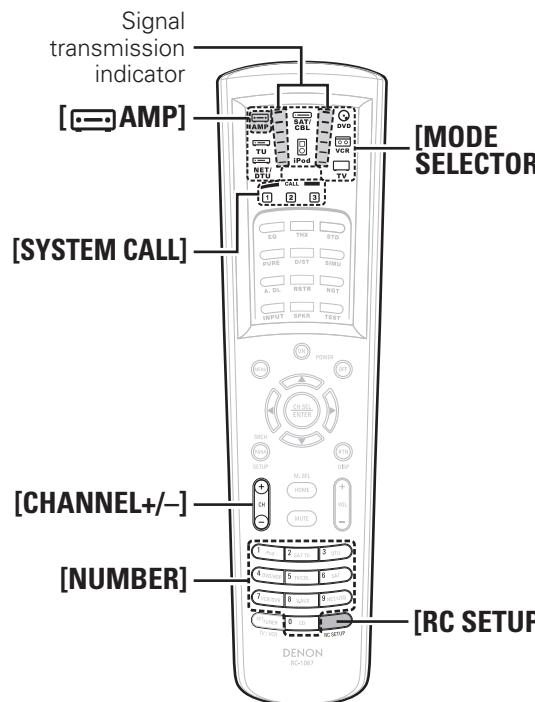

1 Press and hold in **[RC SETUP]** for at least 3 seconds.
The signal transmission indicator flashes twice.

2 Press **[9], [7] and [3]**, in that order.
The signal transmission indicator flashes twice and the backlight on time setting mode is set.

3 Set the light on time.

The signal transmission indicator flashes twice.

[Settable times] : **[1]** : 5 sec.
[2] : 10 sec. (Default)
[3] : 15 sec.
[4] : 20 sec.
[5] : 25 sec.

Adjusting the Backlight's Brightness

The display's brightness can be adjusted in 5 steps.
(Default: Step 3)

- 1** Press and hold in [RC SETUP] for at least 3 seconds.
The signal transmission indicator flashes twice.
- 2** Press [CHANNEL +] or [CHANNEL -].
The display gets one step brighter when [+] is pressed.
The display gets one step darker when [-] is pressed.
- 3** Press [RC SETUP] to complete the setting.

Resetting the Main Remote Control Unit

Learning Function

[Resetting button by button]

- 1** Press [MODE SELECTOR] for the device you want to reset.
- 2** Press and hold in [RC SETUP] for at least 3 seconds.
The signal transmission indicator flashes twice.
- 3** Press [9], [7] and [6], in that order.
The signal transmission indicator flashes twice.
- 4** Press the button you want to reset twice.
The signal transmission indicator flashes twice.

[Resetting by device mode]

- 1** Press [MODE SELECTOR] for the device you want to reset.
- 2** Press and hold in [RC SETUP] for at least 3 seconds.
The signal transmission indicator flashes twice.
- 3** Press [9], [7] and [6], in that order.
The signal transmission indicator flashes twice.
- 4** Press [MODE SELECTOR] for the device you want to reset twice.
The signal transmission indicator flashes twice.

System call function

- 1** Press and hold in [RC SETUP] for at least 3 seconds.
The signal transmission indicator flashes twice.
- 2** Press [9], [7] and [8], in that order.
The signal transmission indicator flashes twice.
- 3** Press [SYSTEM CALL] (1, 2 or 3) you want to reset.
- 4** Press and hold in [RC SETUP] for at least 3 seconds.
The signal transmission indicator flashes twice.

Punch-through function

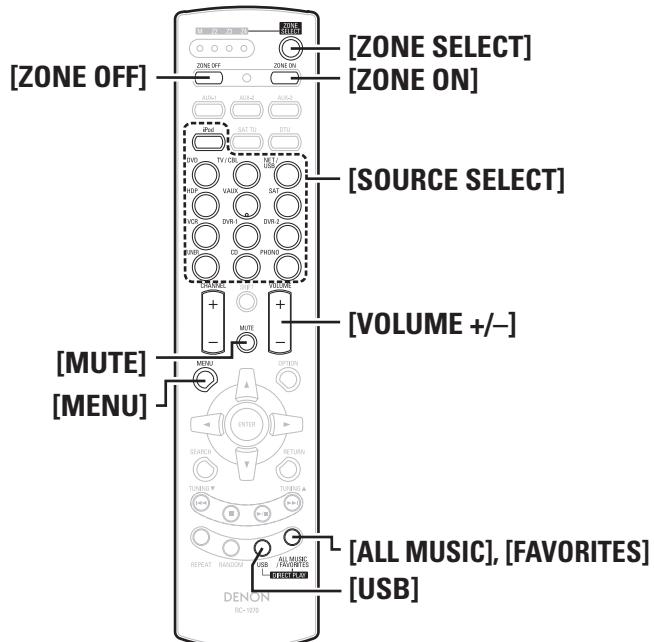

- 1** Press [MODE SELECTOR] for the device you want to reset (TV or SAT/CBL).
- 2** Press and hold in [RC SETUP] for at least 3 seconds.
The signal transmission indicator flashes twice.
- 3** Press [9], [8] and [4], in that order.
The signal transmission indicator flashes twice.
- 4** Press and hold in [RC SETUP] for at least 3 seconds.
The signal transmission indicator flashes twice.

All settings

- 1** Press and hold in [RC SETUP] for at least 3 seconds.
The signal transmission indicator flashes twice.
- 2** Press [9], [8] and [1], in that order.
The signal transmission indicator flashes 4 times.
All the settings are restored to their defaults.

Sub Remote Control Unit Operations

- The sub remote control unit is equipped with frequently used buttons, so it can be used for simple remote control unit operations.
- The sub remote control unit can also be used for multi-zone, so you can use it to control the AVC-A1HD from other rooms.
- The operations listed below can be performed with the sub remote control unit.
 - Switching the input source
 - Adjusting the volume
 - iPod operations
 - NET/USB direct play
 - GUI menu and ZONE2 on-screen display operations
 - Zone power on/off
- It is not possible to operate devices other than the amplifier.

Functions of Buttons by Component

Switching Zones

Use this procedure to select the zone to be operated by the sub remote control unit.

1 Press [ZONE SELECT].

The currently selected multi-zone indicator lights.

2 While the multi-zone indicator is light, press [ZONE SELECT] to select the zone to be operated.

The currently selected multi-zone indicator lights.

Setting the Zone for Which the Sub Remote Control Unit is Used (ZONE SELECT LOCK Mode)

We recommend always using the sub remote control unit for the same room. When this is done, the unit can be set so that the zone does not switch when buttons are operated.

1 Use the tip of a pen to press [ADVANCED SETUP].

All the multi-zone indicators light.

2 Select the multi-zone to be set.

The selected multi-zone indicator lights.

①To set to "MAIN ZONE" : Press [REPEAT].

②To set to "ZONE2" : Press [RANDOM].

③To set to "ZONE3" : Press [USB].

④To set to "ZONE4" : Press [ALL MUSIC/FAVORITES].

3 Use the tip of a pen to press [ADVANCED SETUP].

The multi-zone indicator turns off.

To Cancel

1 Use the tip of a pen to press [ADVANCED SETUP].

The currently selected multi-zone indicator lights.

2 Press [ZONE SELECT].

All the multi-zone indicators light.

3 Use the tip of a pen to press [ADVANCED SETUP].

The multi-zone indicator turns off.

Resetting the Settings

While pressing [ZONE OFF], press [ADVANCED SETUP] with the tip of a pen.

All the multi-zone indicators flash 4 times, then all the settings are restored to their defaults.

Setting the Remote ID

When using multiple DENON AV receivers in the same room, make this setting so that no AV receiver other than the desired one operates.

1 While pressing [MENU], press [ADVANCED SETUP] with the tip of a pen.

The multi-zone indicator corresponding to the currently selected remote ID flashes.

2 Select the remote ID to be set.

①To set to 1 : Press [REPEAT].

The "M" indicator flashes.

②To set to 2 : Press [RANDOM].

The "Z2" indicator flashes.

③To set to 3 : Press [USB].

The "Z3" indicator flashes.

④To set to 4 : Press [ALL MUSIC/FAVORITES].

The "Z4" indicator flashes.

3 While pressing [MENU], press [ADVANCED SETUP] with the tip of a pen.

The multi-zone indicator turns off.

NOTE

When changing a setting, be sure to set the same remote ID as the AVC-A1HD's (page 40).

Amp Assign / Multi-Zone Connections and Operations

The AVC-A1HD is compatible with the following types of playback:

- **Multi-zone playback (ZONE2 & ZONE3)**
- **Bi-amp playback (front speaker)**
- **Bi-wiring playback (front speaker)**

NOTE

- For bi-amp and bi-wiring playback, use speakers compatible with that type of connection.
- When conducting bi-amp or bi-wiring playback, remove the short-circuiting boards (or wires) from the speaker terminals.

Multi-Zone Settings with the Amp Assign Function

The amp assign function lets you assign the amplifiers for the different channels built into the AVC-A1HD to the speaker outputs for the different zones.

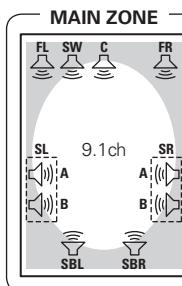

Select the desired playback environment from among "Setting 1" to "Setting 8", then set the corresponding "Amp Assign" mode at GUI menu "Manual Setup" – "Option Setup" – "Amp Assign" (page 38).

Connect the speakers as described at "Speaker connections".

With "Setting 5" to "Setting 7", it is possible to switch the Amp Assign mode between the 7.1 / 9.1-channel mode and the multi-zone mode without changing the speaker connections.

Setting 1: ● 9.1-channel playback

Amp Assign mode:
→ Normal (Default)

※ The above is an example of the selectable channels when "Stereo" is set for the ZONE2 and ZONE3 channel setting.

If "Mono" is selected, "Z2 (MONO)" and "Z3 (MONO)" are displayed.

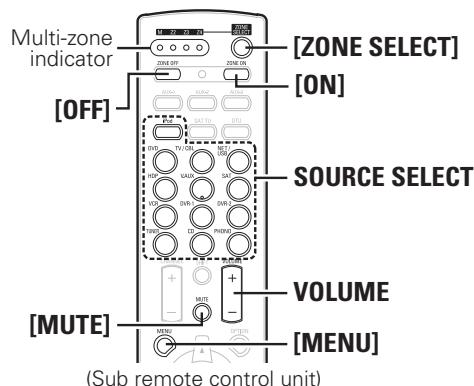

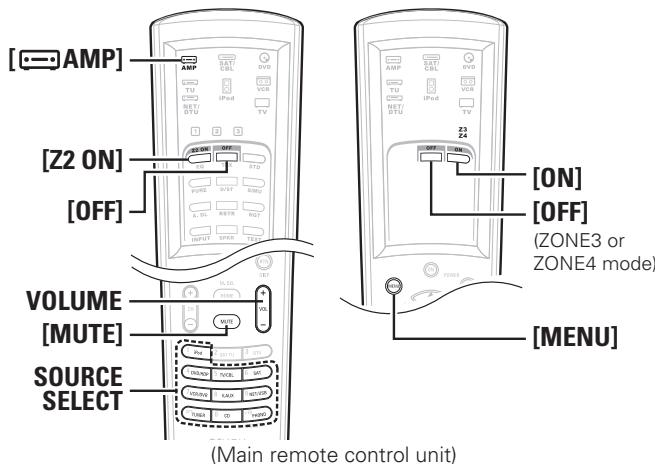

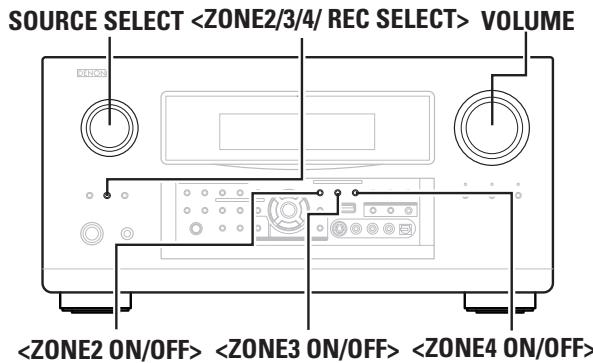

Multi-Zone Connections

- For ZONE2, it is necessary to set in sequence with the signal connected to either the power amplifier or bit stream amps. The amp should be the power amplifier in the case of ZONE3, and the bit-stream for ZONE4.
- If the signal inputted to ZONE2 is analog, change to PCM(2-channel) signal, and output it from ZONE2 optical output connectors.

	Connectors for audio output	Audio signals	Connectors for video output
ZONE2	ZONE2 PRE OUT	Stereo	ZONE2 VIDEO OUT, ZONE2 S-VIDEO OUT, ZONE2 COMPONENT VIDEO OUT
	ZONE2 OPTICAL OUT	Bit-stream	
ZONE3	ZONE3 PRE OUT	Stereo	ZONE3 VIDEO OUT
ZONE4	ZONE4 OPTICAL4 OUT	Bit-stream	-

- When only using one speaker for ZONE2 or ZONE3, set to "Mono". In this case, the ZONE2 (ZONE3) monaural output is output from the ZONE2 (ZONE3) pre-out L and R connectors, so connect as desired.
- Separate power amplifiers are needed for ZONE2 and ZONE3.

About the button names in these explanations

< > : Buttons on the main unit
[] : Buttons on the remote control unit

Button name only:
Buttons on the main unit and remote control unit

Multi-Zone Operations

Turning the Power On and Off

[Operation on the main unit]

Press <ZONE2 ON/OFF>, <ZONE3 ON/OFF> or <ZONE4 ON/OFF> for the zone to be operated.

When the power turns on, the multi-zone indicator lights on the display.

[Operation on the remote control unit]

In the zone mode you want to operate, press [ON] or [OFF].

Selecting the Input Source

[Operation on the main unit]

- ① Press <ZONE2/3/4/ REC SELECT> and select the zone to be adjusted.
- ② Turn <SOURCE SELECT>.

[Operation on the remote control unit]

In the zone mode you want to operate, press [SOURCE SELECT].

Adjusting the Volume

[Operation on the main unit]

- ① Press <ZONE2/3/4/ REC SELECT> and select the zone to be adjusted.
- ② Turn <VOLUME> to adjust.

[Operation on the remote control unit]

In the zone mode whose volume you want to adjust, press [VOLUME].

[Variable range] --- -70dB ~ -40dB ~ 18dB

- The volume can be adjusted when GUI menu "Manual Setup" – "Zone Setup" – "(select the zone)" – "Volume Level" is set to "Variable". The volume can be increased up to the value set at GUI menu "Manual Setup" – "Zone Setup" – "(select the zone)" – "Volume Limit" (page 37).
- The volume for ZONE2 and ZONE3 can be adjusted with the remote control unit.

Turning off the Sound Temporarily

In the zone mode for which you want to mute the sound, press [MUTE].

The sound is reduced to the level set at GUI menu "Manual Setup" – "Zone Setup" – "(select the zone)" – "Mute Level" (page 37).

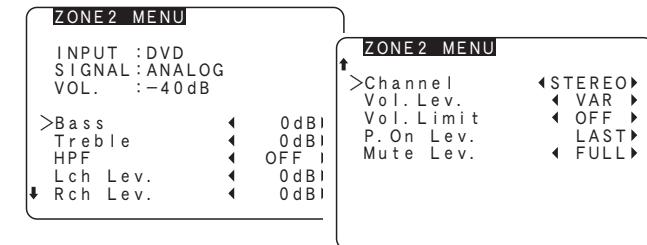

To cancel, either adjust the volume or press [MUTE] again.

The setting is canceled when the zone's power is turned off.

- The source selected for ZONE3 is also output from the recording output connectors.

- When the [MENU] is selected, it is possible to carryout "Zone Setup" looking at the on-screen display in ZONE2. Also, when the "OSD" is set as "ZONE2/ZONE3", the on-screen display comes on the ZONE2 monitor when ZONE3 has been operated so it is possible to operate it looking at this.

NOTE

- When connected to the component video output connectors, the on-screen display is not displayed.
- The digital signal from the digital input connectors (OPTICAL/COAXIAL) are output to the analog audio connectors in ZONE2 and ZONE3 in the case of PCM (2-channel) signals only.
- Digital audio signals input from the DENON LINK or HDMI connectors cannot be played in multi-zone.
- The digital output (OPTICAL) from ZONE2 and ZONE4 cannot be copyrighted network signals (internet radio, media server, and USB).
- When certain digital signals are being input, noise may be output from the ZONE2 and ZONE3 audio output connectors.

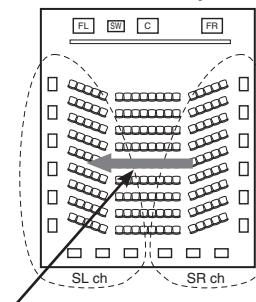

Other Information

About Speaker Installation

Surround back speakers

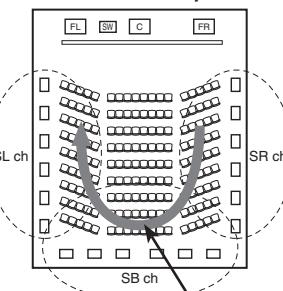

The THX Surround EX format adds new "Surround Back" (SB) channels to the conventional 5.1 channel system. This makes it easy to achieve sound positioned directly behind the listener, something that was previously difficult with sources designed for conventional multi surround speakers. In addition, the acoustic image extending between the sides and the rear is narrowed, thus greatly improving the expression of the surround signals for sounds moving from the sides to the back and from the front to the point directly behind the listening position.

Change of positioning and acoustic image with 5.1-channel systems

Movement of acoustic image from SR to SL

Change of positioning and acoustic image with 6.1-channel systems

Movement of acoustic image from SR to SB to SL

In addition to sources recorded in 6.1-channels, the surround effect of conventional 2- to 5.1-channel sources can also be enhanced.

Speaker(s) for one or two channels are required in order to achieve a THX Surround EX system with the AVC-A1HD. Adding these, however, allows you to achieve stronger surround effects not only with sources recorded in THX Surround EX, but also with conventional 2- to 5.1 channel sources. The WIDE SCREEN mode is a mode for achieving surround sound with up to 7.1 channels using surround back speakers, for sources recorded in conventional Dolby Surround as well as Dolby Digital 5.1 channel and DTS Surround 5.1 channel sources. Furthermore, all the DENON original surround modes (page 47 "DSP Simulation Playback") are compatible with 7.1 channel playback, so you can enjoy 7.1 channel sound with any signal source.

Number of surround back speakers

With THX Surround EX, the surround back channel consists of one channel of playback signals, but we recommend using two speakers. The modes that use the new ASA technology from THX (page 85) are most effective when using two monopole type surround back speakers placed close together.

Using two speakers results in a smoother blend with the sound of the surround channels and better sound positioning of the surround back channel when listening from a position other than the center.

Placement of the surround left and right channels when using surround back speakers

Using surround back speakers greatly improves the positioning of the sound at the rear. Because of this, the surround left and right channels play an important role in achieving a smooth transition of the acoustic image from the front to the back. As shown on the diagram above, in a movie theater the surround signals are also produced from diagonally in front of the listeners, creating an acoustic image as if the sound were floating in space.

To achieve these effects, we recommend placing the speakers for the surround left and right channels slightly more towards the front than with conventional surround systems. Doing so sometimes increases the surround effect when playing conventional 5.1 channel sources in the THX Surround EX mode. Check the surround effects of the various modes before selecting the surround mode.

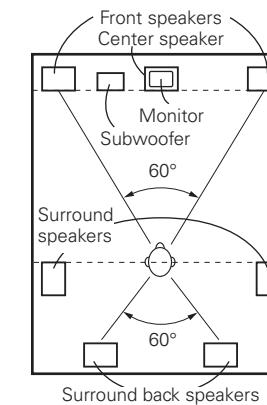

Examples of speaker layouts

Below we introduce examples of speaker layouts. Refer to these to arrange your speakers according to their type and how you want to use them.

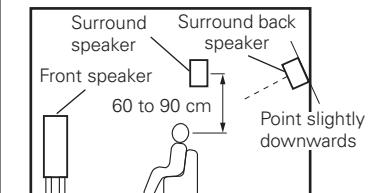

[1] For THX surround EX systems (Using surround back speakers)

① When mainly playing movies

Recommended when your surround speakers are single or 2-way speakers.

[As seen from above]

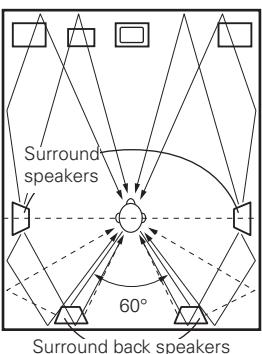

[As seen from the side]

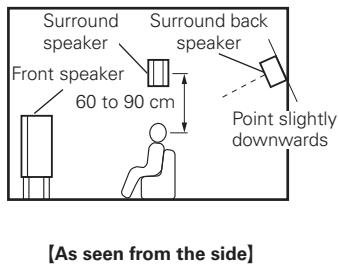

② Setting for primarily watching movies using diffusion type speakers for the surround speakers

For the greatest sense of surround sound envelopment, diffuse radiation speakers such as bipolar (THX) types, or dipolar types, provide a wider dispersion than is possible to obtain from a direct radiating speaker (monopolar). Place these speakers at either side of the prime listening position, mounted above ear level.

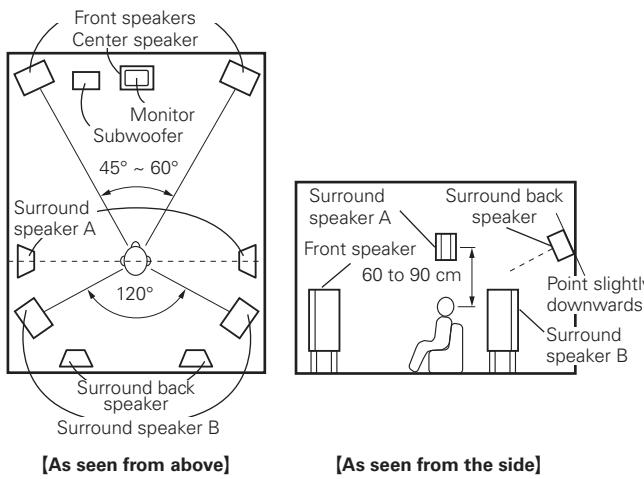

Path of the surround sound from the speakers to the listening position

[As seen from above]

[As seen from the side]

[As seen from above]

[As seen from the side]

③ When playing movies and music

To activate the appropriate speakers for movies and music, we suggest that during setup, choose Dolby Digital/DTS with THX and Surround Speakers A (the bipolar or dipolar speakers mounted at the sides of the listening position).

Choose Dolby Digital/DTS without THX and Surround Speakers B (the direct radiating speakers mounted at the rear corners of the listening room). Then, by simply activating the THX function (used during movie playback), the Surround A speakers are automatically activated. For multi-channel music listening (Dolby Digital or DTS music programs), turn off the THX enhancements by touching the THX button on the remote control, and the Surround B speakers will be automatically activated.

Example: Movie sources (Dolby, DTS Surround, etc.)

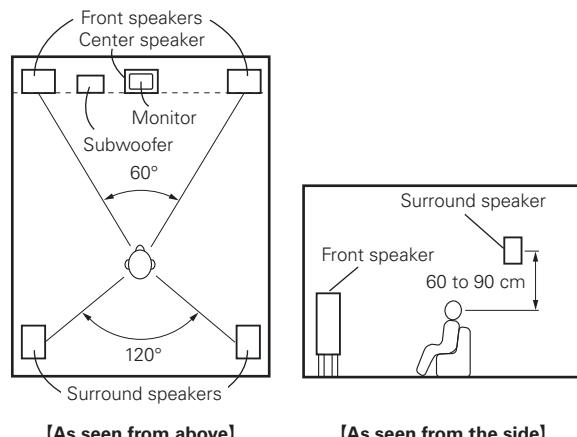

“THX” or “THX Cinema” mode ... Speakers A

Music sources (DVD video, DTS CD, etc.)

“Dolby/DTS Surround” ... Speakers B

The speakers can be switched at the touch of a button by turning HOMETHX CINEMA on when playing movies and off when playing multi-channel music.

② When not using surround back speakers

[As seen from above]

[As seen from the side]

Surround

The AVC-A1HD is equipped with a digital signal processing circuit that lets you play program sources in the surround mode to achieve the same sense of presence as in a movie theater.

Dolby Surround

Dolby Digital

Dolby Digital is a multichannel digital signal format developed by Dolby Laboratories.

A total of 5.1-channels are played: 3 front channels (“FL”, “FR” and “C”), 2 surround channels (“SL” and “SR”) and the “LFE” channel for low frequencies.

Because of this, there is no crosstalk between channels and a realistic sound field with a “three-dimensional” feeling (sense of distance, movement and positioning) is achieved.

A real, overpowering sense of presence is achieved when playing movie sources in AV rooms as well.

Dolby Digital Plus

Dolby Digital Plus is an improved Dolby Digital signal format that is compatible with up to 7.1-channels of discrete digital sound and also improves sound quality thanks to extra data bit rate performance. It is upwardly compatible with conventional Dolby Digital, so it offers greater flexibility in response to the source signal and the conditions of the playback equipment.

Dolby TrueHD

Dolby TrueHD is a high definition audio technology developed by Dolby Laboratories, using lossless coding technology to faithfully reproduce the sound of the studio master.

This format is compatible with a maximum sampling frequency of 96 kHz and up to 7.1-channels, so it is used for applications particularly prioritizing sound quality.

Dolby Pro Logic II

Dolby Pro Logic II is a matrix decoding technology developed by Dolby Laboratories.

Regular music such as that on CDs is encoded into 5-channels to achieve an excellent surround effect.

The surround channel signals are converted into stereo and full band signals (with a frequency response of 20 Hz to 20 kHz or greater) to create a "three-dimensional" sound image offering a rich sense of presence for all stereo sources.

Dolby Pro Logic IIx

Dolby Pro Logic IIx is a further improved version of the Dolby Pro Logic II matrix decoding technology.

Audio signals recorded in 2-channels are decoded to achieve a natural sound with up to 7.1-channels.

There are 3 modes: "Music" suited for playing music, "Cinema" suited for playing movies, and "Game" which is optimized for playing games.

Dolby Headphone

This is a three-dimensional sound technology developed jointly by Dolby Laboratories and Lake Technology Ltd. of Australia for achieving surround sound using regular headphones.

Previously, when using headphones all the sounds resonated inside the head and it was uncomfortable to listen with headphones for long periods of time. Dolby Headphone simulates speaker playback in a room and places the sound at the front or the sides, outside the head, to achieve a powerful sound like the sound of movie or home theaters. This technology is mainly for multichannel audio/video equipment with Dolby Digital or Dolby Pro Logic Surround decoding functions and works with a high performance digital signal processing (DSP) chip. Dolby Headphone is effective not only for multichannel sources but also for stereo programs.

On the AVC-A1HD, it is possible to output signals encoded in the Dolby Headphone mode from the recording output terminal and record them on a separate recorder.

* Sources recorded in Dolby Surround

Sources recorded in Dolby Surround are indicated with the following logo marks.

Dolby Surround support mark : 

Manufactured under license from Dolby Laboratories.

"Dolby," "Pro Logic" and the double-D symbol are trademarks of Dolby Laboratories.

DTS Surround

DTS Digital Surround

DTS Digital Surround is the standard digital surround format of DTS, Inc., compatible with a sampling frequency of 44.1 or 48 kHz and up to 5.1-channels of digital discrete surround sound.

DTS-HD High Resolution Audio

DTS-HD High Resolution Audio is an improved version of the conventional DTS, DTS-ES and DTS 96/24 signals formats, compatible with sampling frequencies of 96 or 48 kHz and up to 7.1-channels of discrete digital sound. High data bit rate performance provides high quality sound. This format is fully compatible with conventional products, including conventional DTS digital surround 5.1-channel data.

DTS-HD Master Audio

DTS-HD Master Audio is DTS, Inc's lossless audio format compatible with up to 96 kHz/7.1-channels. The lossless audio coding technology faithfully reproduces the sound of the studio master. It is fully compatible with conventional products, including conventional DTS digital surround 5.1-channel data.

DTS-ES™ Discrete 6.1

DTS-ESTM Discrete 6.1 is a 6.1-channel discrete digital audio format adding a surround back (SB) channel to the DTS digital surround sound. Decoding of conventional 5.1-channel audio signals is also possible according to the decoder.

DTS-ES™ Matrix 6.1

DTS-ESTM Matrix 6.1 is a 6.1-channel discrete digital audio format inserting a surround back (SB) channel to the DTS digital surround sound through matrix encoding. Decoding of conventional 5.1-channel audio signals is also possible according to the decoder.

DTS NEO:6™ Surround

DTS NEO:6™ is a matrix decoding technology for achieving 6.1-channel surround playback with 2-channel sources. It includes "DTS NEO:6 CINEMA" suited for playing movies and "DTS NEO:6 MUSIC" suited for playing music.

DTS 96/24

DTS 96/24 is a digital audio format enabling high sound quality playback in 5.1-channels with a sampling frequency of 96 kHz and 24 bit quantization on DVD-Video.

Manufactured under license under U.S. Patent #'s: 5,451,942; 5,956,674; 5,974,380; 5,978,762; 6,226,616; 6,487,535 & other U.S. and worldwide patents issued & pending. DTS is a registered trademark and the DTS logos, Symbol, DTS-HD and DTS-HD Master Audio are trademarks of DTS, Inc. © 1996-2007 DTS, Inc. All Rights Reserved.

Home THX Cinema Surround

THX is an exclusive set of standards and technologies established by the world-renowned film production company, Lucasfilm Ltd. THX grew from George Lucas' personal desire to make your experience of the film soundtrack, in both movie theaters and in your home theater, as faithful as possible to what the director intended.

Movie soundtracks are mixed in special movie theaters called dubbing stages and are designed to be played back in movie theaters with similar equipment and conditions. The soundtrack created for movie theaters is then transferred directly onto Laserdisc, VHS tape, DVD, etc., and is not changed for playback in a small home theater environment.

THX engineers developed patented technologies to accurately translate the sound from the movie theater environment into the home, correcting the tonal and spatial errors that occur. On the AVC-A1HD, when the HomeTHX Cinema mode is on, THX post-processing is automatically added after the Dolby Pro Logic, Dolby Digital or DTS decoder:

Re-EQ™ (Re-Equalization)

The tonal balance of a film soundtrack will be excessively bright and harsh when played back over audio equipment in the home because film soundtracks are designed to be played back in large movie theaters using very different professional equipment. Re-Equalization restores the correct tonal balance for listening to a movie soundtrack in a normal home environment.

Timbre Matching™

The human ear changes our perception of a sound depending on the direction from which the sound is coming. In a movie theater, there is an array of surround speakers so that the surround information is all around you. In a home theater, only two speakers located to the side of your head are used. The Timbre Matching feature filters the information going to the surround speakers so that they more closely match the tonal characteristics of the sound coming from the front speakers. This ensures seamless panning between the front and surround speakers.

Adaptive Decorrelation™

In a movie theater, a large number of surround speakers help create an enveloping surround sound experience, while in a home theater there are usually only two speakers. This can make the surround speakers sound like headphones that lack spaciousness and envelopment. The surround sounds will also collapse into the closest speaker as you move away from the middle seating position. Adaptive Decorrelation slightly changes one surround channel's time and phase relationship with respect to the other surround channel. This expands the listening position and creates—with only two speakers—the same spacious surround experience as in a movie theater.

THX Ultra2™

Before any home theater component can be THX Ultra2 certified, it must incorporate all the features above and also pass a rigorous series of quality and performance tests. Only then can a product feature the THX Ultra2 logo, which is your guarantee that the Home Theater products you purchase will give you superb performance for many years to come. THX Ultra2 requirements cover every aspect of the product including power amplifier performance, pre-amplifier performance and operation, as well as hundreds of other parameters in both the digital and analog domain.

In addition to improvements to the power amplifier with respect to previous THX Ultra standards, three surround modes have been added: the THX Ultra2 Cinema mode, THX Music Mode and THX Games Mode.

THX Ultra2 Cinema

THX Ultra2 Cinema mode plays 5.1 movies using all 8 speakers giving you the best possible movie watching experience. In this mode, new THX processing blends the side surround speakers and back surround speakers providing the optimal mix of ambient and directional surround sounds.

DTS-ES (Matrix and 6.1 Discrete) and Dolby Digital Surround EX encoded soundtracks will be automatically detected in Ultra2 Cinema mode if the appropriate flag has been encoded.

Some Dolby Digital Surround EX soundtracks are missing the digital flag that allows automatic switching. If you know that the movie that you are watching is encoded in Surround EX, you can manually select the THX Surround EX playback mode, otherwise THX Ultra2 Cinema mode will apply processing to provide optimum replay.

THX Music Mode

For the replay of 5.1 multi-channel music the THX Music Mode should be selected. In this mode new THX processing is applied to the surround channels of all 5.1 encoded music sources such as DTS and Dolby Digital to provide a wide stable rear soundstage.

THX Games Mode

For the replay of stereo and multi-channel game audio the THX Games Mode should be selected. In this mode THX ASA processing is applied to the surround channels of all 5.1 and 2.0 encoded game sources such as analog, PCM, DTS and Dolby Digital. This accurately places all game audio surround information, providing a full 360 degree playback environment. THX Games Mode is unique as it gives you a smooth transition of audio in all points of the surround field.

ASA (Advanced Speaker Array)

ASA is a proprietary THX technology which processes the sound fed to 2 side and 2 back surround speakers to provide the optimal surround sound experience. When you set up your home theater system using all eight speaker outputs (Left, Center, Right, Surround Right, Surround Back Right, Surround Back Left, Surround Left and Subwoofer) placing the two Surround Back speakers close together facing the front of the room as shown in the diagram will provide the largest sweet spot. If for practical reasons you have to place the Surround Back speakers apart, you will need to go THX Audio Set-up screen and choose the setting that most closely corresponds to the speaker spacing, which will re-optimize the surround sound-field.

ASA is used in three new modes; THX Ultra2 Cinema, THX Music Mode and THX Games Mode.

Boundary Gain Compensation

If your chosen listening room layout (for practical or aesthetic reasons) results in the most of the listeners being close to the rear wall, the resulting bass level can be sufficiently reinforced by the boundary that the overall sound quality becomes "boomy." THX Ultra2 receivers and controllers contain the BGC (Boundary Gain Compensation) feature to provide an improved bass balance. BGC can be selected by choosing "THX Ultra2 Subwoofer-Yes" from the "Boundary Gain Compensation" section of the THX Audio setup menu.

THX and Ultra2 are trademarks of THX Ltd. THX may be registered in some jurisdictions. All rights reserved. Surround EX is a trademark of Dolby Laboratories. Used with permission.

THX™ Surround EX™

In 1999, a new surround system was launched simultaneously with the release of the movie "Star Wars Episode I". "Dolby Digital Surround EX" is a new movie sound track that greatly enhances the sense of spatial expression and the positioning of the surround channel sound. The result is 360 degrees of movement and moving sound effects that seem to pass right over the listener's head. This system was developed jointly by THX and Dolby Laboratories, fusing THX's idea of improving spatial expression and achieving a uniform 360 degree sound positioning with Dolby Laboratories' matrix encoding technology. Emphasis was placed on compatibility with the existing system Dolby Digital 5.1 channel, and the new "surround back (SB) channel" was added to achieve improvements over the conventional 5.1 channel system in terms of the positioning of the sound at the rear, the acoustic image of sound moving from the two sides to the back as well as sound moving from the front to the center rear with the multi surround speaker systems used in movie theaters, thereby enabling various types of surround sound. The surround back channel signal is a matrix-encoded signal inserted into both the Dolby Digital SL (surround left) and SR (surround right) channels. Upon playback, the signals are decoded by a high precision digital matrix decoder within the Dolby Digital decoder into the SL, SR and SB channels and output as 6.1 channels of signals. With the AVC-A1HD, the signals further undergo Home THX Cinema processing to achieve a THX Surround EX system. Even without the proper environment for playing the SB channel, Dolby Digital Surround EX signals are 100% compatible with existing 5.1 channel playback systems, so they can be played as such. In this case, the SB channel signal is produced as a monaural signal from both the SL and SR channels, so none of the signal components are missing. The effects specific to THX Surround EX (the sense of spatial expression and the positioning of the sound), however, are the same as with conventional 5.1 channel surround systems.

Audyssey

Audyssey MultEQ® XT

Audyssey MultEQ® XT is the first technology to properly measure sound information throughout a listening area, then combine this information to accurately represent the acoustical problems in the room. Based on these measurements, MultEQ XT calculates an equalization solution that corrects for both time and frequency response problems in every seat. Audyssey MultEQ XT not only corrects frequency response problem in a large listening area but also performs a fully automated surround system setup.

For a detailed description, see page 25.

Audyssey Dynamic EQ™

Audyssey Dynamic EQ solves the problem of deteriorating sound quality as volume is decreased by taking into account human perception and room acoustics. Dynamic EQ selects the best possible frequency response and surround levels moment-by-moment as volume is changed. The result is bass response, tonal balance and surround impression that remain constant despite changes in volume. This is the first technology to combine information from incoming source levels with actual output sound levels in the room, a pre-requisite for delivering a loudness correction solution. Audyssey Dynamic EQ works in tandem with Audyssey MultEQ to provide well-balanced sound for every listener at any volume level.

Manufactured under license from Audyssey Laboratories. U.S. and foreign patents pending. Audyssey MultEQ® XT is a registered trademark of Audyssey Laboratories. Dynamic EQ™ is a trademark of Audyssey Laboratories.

For more information, visit www.audyssey.com.

HDCD®

(High Definition Compatible Digital®)

HDCD® is an encoding/decoding technology that greatly reduces the distortion that occurs upon digital recording while maintaining compatibility with the conventional CD format, thus expanding the dynamic range and achieving a high resolution.

Conventional CDs and HDCD compatible CDs are identified automatically to select the optimum digital processing.

HDCD®, **HDCD**®, **High Definition Compatible Digital**® and **Microsoft**® are either registered trademarks or trademarks of Microsoft Corporation, Inc. in the United States and/or other countries. **HDCD** system manufactured under license from Microsoft Corporation, Inc. This product is covered by one or more of the following: In the USA: 5,479,168, 5,638,074, 5,640,161, 5,808,574, 5,838,274, 5,854,600, 5,864,311, 5,872,531, and in Australia: 669114. Other patents pending.

DENON LINK

DENON LINK is a unique digital, balanced transfer type interface developed by DENON. It offers high speed, high quality transfer of digital audio data with low signal loss. It can be used together with DENON DVD players equipped with a special DENON LINK connector using a single cable to enable playback with high sound quality.

It allows digital transfer of the 192 kHz/24 bit 2-channel digital signals of DVD-Audio discs, PCM multi-channel signals, etc. Full-spec digital transfer of the audio contents of Super Audio CD is possible by connecting a player equipped for DENON LINK 3rd Edition.

Advanced AL24 Processing Multi channel

Equipped with "Advanced AL24 Processing" time axis region information volume expansion

In addition to the existing "AL24 Processing Plus" bit expansion technology, DENON has also developed "Advanced AL24 Processing" that dramatically improves information volume in the time axis region using high-speed signal detection and processing technology. In addition to expanding original 16-bit digital data to 24 bits, "Advanced AL24 Processing" uses data interpolation along the time axis or up-converted sampling to achieve natural interpolation without losing the original data. A digital filter is used to further expand adaptability and perform optimum filtering calculations for ringing-free pulse response, pulsive music data and attack sounds.

This results in the reproduction of such spatial information as the delicate nuances in the music, the positions of the performers, and the breadth, height, and depth of the concert hall. "Advanced AL24 Processing" is conducted for all channels and modes other than DSD DIRECT.

HDMI

(High-Definition Multimedia Interface)

HDMI is a digital interface standard for next generation TVs based on DVI (Digital Visual Interface) standards and optimized for use in consumer equipment.

Non-compressed digital video and multi-channel audio signals are transmitted with a single connection.

HDMI is also compatible with HDCP (High-bandwidth Digital Contents Protection), a technology for protecting copyrights that encrypts digital video signals in the same was as with DVI.

Deep Color

Eliminates on-screen color banding, for smooth tonal transitions and subtle gradations between colors.

Enables increased contrast ratio.

Can represent many times more shades of gray between black and white.

At 30-bit pixel depth, a four times improvement would be the minimum, and the typical improvement would be eight times or more.

xvYCC

Next-generation "xvYCC" color space supports 1.8 times as many colors as existing HDTV signals.

Lets HDTVs display colors more accurately.

Enables displays with natural, vivid colors.

Lip Sync

Because consumer electronics devices are using increasingly complex digital signal processing to enhance the clarity and detail of the content, synchronization of video and audio in user devices has become a greater challenge and could potentially require complex end-user adjustments. HDMI 1.3 incorporates an automatic video/audio syncing capability that allows devices to perform this synchronization automatically with total accuracy.

"HDMI", "HDMI logo" and "High-Definition Multimedia Interface" are trademarks or registered trademarks of HDMI Licensing LLC.

About Networks

Windows Media Player Ver.11

This is a media player distributed free of charge by Microsoft Corporation.

It can be used to play playlists created with Windows Media Player Ver. 11 as well as files in such formats as WMA, DRM WMA, MP3 and WAV.

vTuner

This is a free online contents server for Internet radio. Note that usage fees are included in upgrade costs.

For inquiries about this service, visit the vTuner site below.

vTuner website: <http://www.radiodemon.com>

This product is protected by certain intellectual property rights of Nothing Else Matters Software and BridgeCo. Use or distribution of such technology outside of this product is prohibited without a license from Nothing Else Matters Software and BridgeCo or an authorized subsidiary.

DLNA

- DLNA and DLNA CERTIFIED are trademarks and/or service marks of Digital Living Network Alliance.
- Some contents may not be compatible with other DLNA CERTIFIED™ products.

Windows Media DRM

A copyright-protected technology developed by Microsoft.

- Windows Vista and the Windows logo are trademarks of the Microsoft group of companies.
- The PlaysForSure logo, Windows Media and the Windows logo are trademarks or registered trademarks of Microsoft Corporation in the United States and/or other countries.
- Content providers are using the digital rights management technology for Windows Media contained in this device (WM-DRM) to protect the integrity of their content (Secure Content) so that their intellectual property, including copyright, in such content is not misappropriated. This device uses WM-DRM software to play Secure Content (WM-DRM Software). If the security of the WM-DRM Software in this device has been compromised, owners of Secure Content (Secure Content Owners) may request that Microsoft revoke the WM-DRM Software's right to acquire new licenses to copy, display and/or play Secure Content. Revocation does not alter the WM-DRM Software's ability to play unprotected content. A list of revoked WM-DRM Software is sent to your device whenever you download a license for Secure Content from the Internet or from a PC. Microsoft may, in conjunction with such license, also download revocation list onto your device on behalf of Secure Content Owners.

About Wireless LAN

Wi-Fi®

Wi-Fi Certification assures tested and proven interoperability by the Wi-Fi Alliance, a group certifying interoperability among wireless LAN devices.

IEEE 802.11b

This is one wireless LAN standard set by the 802 working group that establishes LAN technology standards at the IEEE (Institute of Electrical and Electronics Engineers) of the United States. It uses the 2.4 GHz band usable freely without a radio frequency license (ISM band), enabling communications at a maximum speed of 11 Mbps.

The value indicated above is the maximum theoretical value for the wireless LAN standard, and does not indicate the actual data transfer rate.

IEEE 802.11g

This is another wireless LAN standard set by the 802 working group that establishes LAN technology standards at the IEEE (Institute of Electrical and Electronics Engineers) of the United States, and is compatible with IEEE 802.11b. It also uses the 2.4 GHz band, but enables communications at a maximum speed of 54 Mbps.

The value indicated above is the maximum theoretical value for the wireless LAN standard, and does not indicate the actual data transfer rate.

Infrastructure Communications

"Infrastructure Communications" refers to networks using wireless LAN access points.

This function can be used to connect to the Internet or a wired LAN via a wireless LAN access point. Wireless LAN access points include wireless broadband routers.

Ad-hoc Communications

Signal transfer through wireless interconnection of computers is referred to as "ad hoc communications". With such ad hoc communications there is no connection to the Internet. Ad hoc communications are suited for establishing simple temporary networks.

Network Names (SSID: Security Set Identifier)

When forming wireless LAN networks, groups are formed to prevent interference, data theft, etc. This grouping is done by "SSID" or "Security Set Identifiers". For further security, a WEP key is set and signal transfer is not possible unless the SSID and WEP key match.

WEP Key (Network Key)

This is key information used for encrypting data when conducting data transfer. On the AVC-A1HD, the same WEP key is used for data encryption and decryption, so the same WEP key must be set on both devices in order for communications to be established between them.

Getting Started	Connections	Setup	Playback	Remote Control	Multi-Zone	Information	Troubleshooting
-----------------	-------------	-------	----------	----------------	------------	-------------	-----------------

WPA (Wi-Fi Protected Access)

This is a security standard established by the Wi-Fi Alliance. In addition to the conventional SSID (network name) and WEP key (network key), it also uses a user identification function and encrypting protocol for stronger security.

WPA2 (Wi-Fi Protected Access 2)

This is a new version of the WPA established by the Wi-Fi Alliance, compatible with more secure AES encryption.

WPA-PSK/WPA2-PSK (Pre-shared Key)

This is a simple authentication system for mutual authentication when a preset character string matches on the wireless LAN access point and client.

Passphrase

This refers to the code key used for WPA-PSK/WPA2-PSK authentication, a WPA authentication method.

TKIP (Temporal Key Integrity Protocol)

This is a network key used for WPA. The encryption algorithm is RC4, the same as for WEP, but the security level is increased by changing the network key used for encryption for each packet.

AES (Advanced Encryption Standard)

This is a next generation standard encryption method replacing the current DES and 3DES, and because of its high security it is expected to be applied widely to wireless LANs in the future. It uses the "Rijndael" algorithm developed by two Belgian cryptographers to divide the data into blocks of fixed lengths and encrypt each block. It supports data lengths of 128, 192 and 256 bits and key lengths of 128, 192 and 256 bits as well, offering extremely high encryption security.

Information

Troubleshooting

- The MAIN ZONE video conversion function is compatible with the following formats: NTSC, PAL, SECAM, NTSC4.43, PAL -N, PAL -M and PAL -60.
- When SECAM signals of video input are up-converted, the signals are output in PAL format from the S-Video connector.
- If the input signal is a component 1080p signal, up-converting to HDMI is not possible.
- The GUI menu display cannot be superimposed when xvYCC signals and component 1080p signal, computer's resolution (e.g. VGA) are input.

Troubleshooting

If a problem should arise, first check the following:

- If a problem should arise, first check the following:

 1. Are the connections correct?
 2. Is the set being operated as described in the owner's manual?
 3. Are the other components operating properly?

If this unit does not operate properly, check the items listed in the table below. Should the problem persist, there may be a malfunction.

In this case, disconnect the power immediately and contact your store of purchase.

[General]

Symptom	Cause	Countermeasure	Page
Power does not turn on, or turns off directly after it was turned on.	<ul style="list-style-type: none"> Connection of the power cord is faulty. 	<ul style="list-style-type: none"> Check that the power plug is securely inserted into the AVC-A1HD's AC inlet and the wall power outlet. 	22
No sound is produced from speakers.	<ul style="list-style-type: none"> Connection with the input devices or connection of the speaker cables is faulty. Device you want to play and set input source do not match. Master volume is turned too low. Mute mode is set. Headphones are connected. No digital signals are being input. The connectors to which the digital inputs are assigned and the settable input modes do not match. 	<ul style="list-style-type: none"> Check the connections. Select an appropriate input source. Adjust the master volume to an appropriate level. Cancel the mute mode. Disconnect the headphones. Select an input source for which the digital input setting has been made. Set the input mode. 	10 42 54 54 54 42 ~ 44 45
Display is off.	<ul style="list-style-type: none"> The "Dimmer" setting is set to "OFF". The PURE DIRECT mode is set. 	<ul style="list-style-type: none"> Set to something other than "OFF". Set a surround mode other than the PURE DIRECT mode. 	40 48
"DOLBY DIGITAL" indicator does not appear on display.	DVD player's digital audio output setting is not proper.	Check the DVD player's audio output setting. For details, read the DVD player's operating instructions.	-

Symptom	Cause	Countermeasure	Page
Power turns off suddenly and power indicator flashes red.	<ul style="list-style-type: none"> Protection circuit activated due to rise of internal temperature. Core wires of two speakers are touching each other or a core wire is sticking out of the terminal and touching the set's rear panel, activating the protection circuit. Speakers with an impedance other than specified are being used. Set is damaged. 	<ul style="list-style-type: none"> Turn off the power, wait for the set to fully cool down, then turn the power back on. Place the set in a well-ventilated place. First unplug the power cord, then twist the core wires tightly or terminate the speaker cables, then reconnect. Use speakers with the specified impedance. Turn off the power and contact a DENON service center. 	11 11 11 11 —

[Remote Control Unit]

Symptom	Cause	Countermeasure	Page
Set does not work properly when remote control unit operated.	<ul style="list-style-type: none"> Batteries are worn. You are operating outside of the specified range. Obstacle between main unit and remote control unit. The batteries are not inserted in the proper direction, as indicated by the polarity marks in the battery compartment. The set's remote control sensor is exposed to strong light (direct sunlight, inverter type fluorescent bulb light, etc.). The remote ID of the main unit and remote control unit do not match. 	<ul style="list-style-type: none"> Replace with new batteries. Operate within the specified range. Remove the obstacle. Insert the batteries in the proper direction, following the polarity marks in the battery compartment. Move the set to a place in which the remote control sensor will not be exposed to strong light. Set the same remote IDs for the main unit and remote control unit. 	3, 4 4 — 3, 4 4 40, 70, 75

[Wireless LAN]

Symptom	Cause	Countermeasure	Page
Cannot connect to network.	<ul style="list-style-type: none"> The settings of the SSID and network key (WEP) are incorrect. The reception is poor and the signals cannot be received. There are multiple networks and the usable channels overlap. 	<ul style="list-style-type: none"> Match the network settings with the AVC-A1HD's settings. Shorten the distance from the wireless LAN's access point, remove any obstacles and otherwise improve visibility, then try reconnecting. Also install away from microwave ovens and the access points of other networks. Set the access point's channel settings away from the channels used for other networks. Alternatively, connect using a network cable. 	34 ~ 36 – –
Played sound is interrupted or sound cannot be played.	<ul style="list-style-type: none"> There are multiple networks and the usable channels overlap. 	<ul style="list-style-type: none"> Set the access point's channel settings away from the channels used for other networks. Alternatively, connect using a network cable. 	–

Specifications

■ Audio section

- Power amplifier
- Rated output:

Front:

150 W + 150 W (8 Ω/ohms, 20 Hz ~ 20 kHz with 0.05 % T.H.D.)
170 W + 170 W (6 Ω/ohms, 1 kHz with 0.7 % T.H.D.)

Center:

150 W (8 Ω/ohms, 20 Hz ~ 20 kHz with 0.05 % T.H.D.)
170 W (6 Ω/ohms, 1 kHz with 0.7 % T.H.D.)

Surround (A + B):

150 W + 150 W (8 Ω/ohms, 20 Hz ~ 20 kHz with 0.05 % T.H.D.)
170 W + 170 W (6 Ω/ohms, 1 kHz with 0.7 % T.H.D.)
Surround back:
150 W + 150 W (8 Ω/ohms, 20 Hz ~ 20 kHz with 0.05 % T.H.D.)
170 W + 170 W (6 Ω/ohms, 1 kHz with 0.7 % T.H.D.)

Dynamic power:

200 W x 2ch (8 Ω/ohms)

340 W x 2ch (4 Ω/ohms)

Front, Center, Surround back 6 ~ 16 Ω/ohms

Surround: A or B 6 ~ 16 Ω/ohms

A + B 8 ~ 16 Ω/ohms

• Analog

Input sensitivity / Input impedance:

200 mV / 47 kΩ/kohms

Frequency response:

10 Hz ~ 100 kHz +1, -3 dB (DIRECT mode)

S/N:

102 dB (IHF-A weighted, DIRECT mode)

Distortion:

0.005 % (20 Hz ~ 20 kHz) (DIRECT mode)

Rated output:

1.2 V

• Digital

D/A output:

Rated output — 2 V (at 0 dB playback)

Total harmonic distortion — 0.005 % (1 kHz, at 0 dB)

Dynamic range — 110 dB

Format — Digital audio interface

Digital input:

• Phono equalizer (PHONO input — REC OUT)

Input sensitivity:

2.5 mV

RIAA deviation:

±1 dB (20 Hz to 20 kHz)

S/N:

74 dB (A weighting, with 5 mV input)

Rated output:

150 mV

Distortion factor:

0.03 % (1 kHz, 3 V)

■ Wireless LAN

- Network type (wireless LAN standards)** : Conforming to IEEE 802.11b
 Conforming to IEEE 802.11g
 (Conforming to Wi-Fi®)*
- Transfer rate:** DS-SS: 11 / 5.5 / 2 / 1 Mbps (Automatic switching)
 OFDM: 54 / 48 / 36 / 24 / 18 / 12 / 9 / 6 Mbps (Automatic switching)
- Security:** SSID (Network name)
 WEP key (network key) (64/128 bits)
 WPA-PSK (TKIP/AES)
 WPA2-PSK (TKIP/AES)
- Used frequency range:** 2,412 MHz ~ 2,472 MHz
No. of channels: Conforming to IEEE 802.11b : 13ch (DS-SS) (Of which 1 channel used)
 Conforming to IEEE 802.11g : 13ch (OFDM) (Of which 1 channel used)

■ General

- Power supply:** AC 230 V, 50 Hz
Power consumption: 630 W
 0.3 W (Standby)
- Maximum external dimensions:** 434 (W) x 217 (H) x 500 (D) mm
Weight: 29 kg

■ Main remote control unit (RC-1067)

- Batteries:** LR6/AA Type (two batteries)
Maximum external dimensions: 63 (W) x 238 (H) x 31 (D) mm
Weight: 190 g (including batteries)

■ Sub remote control unit (RC-1070)

- Batteries:** R03/AAA Type (two batteries)
Maximum external dimensions: 49 (W) x 220 (H) x 24.5 (D) mm
Weight: 114 g (including batteries)

* : Wi-Fi® conformity indicates tested and proven interoperability by the "Wi-Fi Alliance," a group certifying interoperability among wireless LAN devices.
