Diagnosis which uses extension wire method	2-27	Parts list	3-1~27

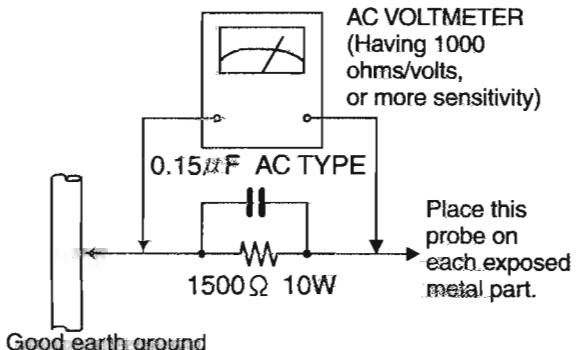

Safety Precautions

1. This design of this product contains special hardware and many circuits and components specially for safety purposes. For continued protection, no changes should be made to the original design unless authorized in writing by the manufacturer. Replacement parts must be identical to those used in the original circuits. Services should be performed by qualified personnel only.
2. Alterations of the design or circuitry of the product should not be made. Any design alterations of the product should not be made. Any design alterations or additions will void the manufacturer's warranty and will further relieve the manufacturer of responsibility for personal injury or property damage resulting therefrom.
3. Many electrical and mechanical parts in the products have special safety-related characteristics. These characteristics are often not evident from visual inspection nor can the protection afforded by them necessarily be obtained by using replacement components rated for higher voltage, wattage, etc. Replacement parts which have these special safety characteristics are identified in the Parts List of Service Manual. Electrical components having such features are identified by shading on the schematics and by (Δ) on the Parts List in the Service Manual. The use of a substitute replacement which does not have the same safety characteristics as the recommended replacement parts shown in the Parts List of Service Manual may create shock, fire, or other hazards.
4. The leads in the products are routed and dressed with ties, clamps, tubings, barriers and the like to be separated from live parts, high temperature parts, moving parts and/or sharp edges for the prevention of electric shock and fire hazard. When service is required, the original lead routing and dress should be observed, and it should be confirmed that they have been returned to normal, after re-assembling.
5. Leakage current check (Electrical shock hazard testing)

After re-assembling the product, always perform an isolation check on the exposed metal parts of the product (antenna terminals, knobs, metal cabinet, screw heads, headphone jack, control shafts, etc.) to be sure the product is safe to operate without danger of electrical shock. Do not use a line isolation transformer during this check.

 - Plug the AC line cord directly into the AC outlet. Using a "Leakage Current Tester", measure the leakage current from each exposed metal parts of the cabinet, particularly any exposed metal part having a return path to the chassis, to a known good earth ground. Any leakage current must not exceed 0.5mA AC (r.m.s.)
 - Alternate check method

Plug the AC line cord directly into the AC outlet. Use an AC voltmeter having 1,000 ohms per volt or more sensitivity in the following manner. Connect a $1,500\Omega$ 10W resistor paralleled by a $0.15\mu F$ AC-type capacitor between an exposed metal part and a known good earth ground. Measure the AC voltage across the resistor with the AC voltmeter. Move the resistor connection to each exposed metal part, particularly any exposed metal part having a return path to the chassis, and measure the AC voltage across the resistor. Now, reverse the plug in the AC outlet and repeat each measurement. Voltage measured any must not exceed 0.75 V AC (r.m.s.). This corresponds to 0.5 mA AC (r.m.s.).

Warning

1. This equipment has been designed and manufactured to meet international safety standards.
2. It is the legal responsibility of the repairer to ensure that these safety standards are maintained.
3. Repairs must be made in accordance with the relevant safety standards.
4. It is essential that safety critical components are replaced by approved parts.
5. If mains voltage selector is provided, check setting for local voltage.

CAUTION Burrs formed during molding may be left over on some parts of the chassis. Therefore, pay attention to such burrs in the case of performing repair of this system.

Important for laser products

1.CLASS 1 LASER PRODUCT

2.DANGER : Invisible laser radiation when open and interlock failed or defeated. Avoid direct exposure to beam.

3.CAUTION : There are no serviceable parts inside the Laser Unit. Do not disassemble the Laser Unit. Replace the complete Laser Unit if it malfunctions.

4.CAUTION : The compact disc player uses invisible laser radiation and is equipped with safety switches which prevent emission of radiation when the drawer is open and the safety interlocks have failed or are defeated. It is dangerous to defeat the safety switches.

5.CAUTION : If safety switches malfunction, the laser is able to function.

6.CAUTION : Use of controls, adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

CAUTION Please use enough caution not to see the beam directly or touch it in case of an adjustment or operation check.

WARNING : Osynlig laserstrålning är denna del är öppnad och spärren är urkopplad. Betrakta ej strålen.

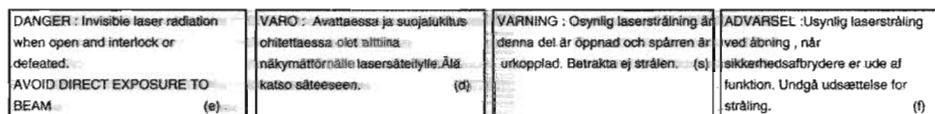

VARO : Avattaessa ja suojaalukitus ohittetaessa olet alittiin näkymättömälle lasersäteilylle. Älä katso sääteeseen.

ADVARSEL : Usynlig laserstråling ved åbning , når sikkerhedsafbrydere er ude af funktion. Undgå udsættelse for stråling.

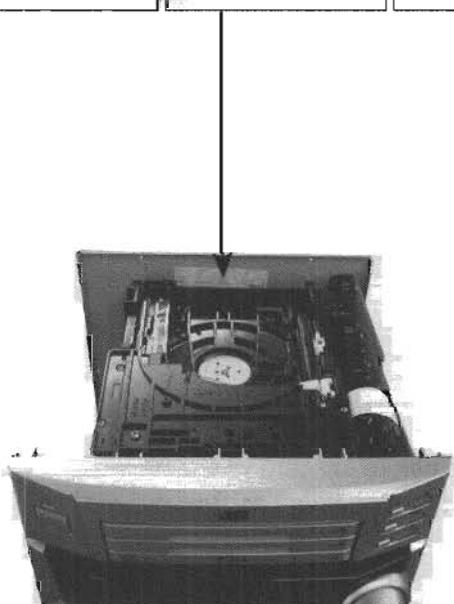

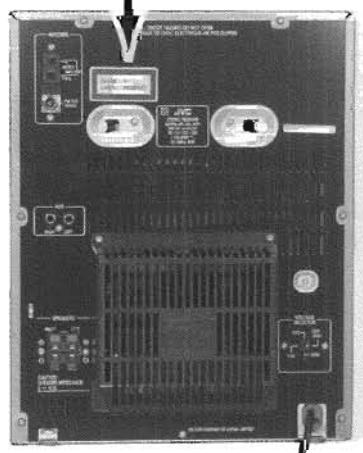

ADVARSEL : Usynlig laserstråling ved åpning,når sikkerhetsbryteren er avslott. unngå utsettelse for stråling.

REPRODUCTION AND POSITION OF LABELS

WARNING LABEL

CLASS 1
LASER PRODUCT

Preventing static electricity

1. Grounding to prevent damage by static electricity

Electrostatic discharge (ESD), which occurs when static electricity stored in the body, fabric, etc. is discharged, can destroy the laser diode in the traverse unit (optical pickup). Take care to prevent this when performing repairs.

2. About the earth processing for the destruction prevention by static electricity

In the equipment which uses optical pick-up (laser diode), optical pick-up is destroyed by the static electricity of the work environment.

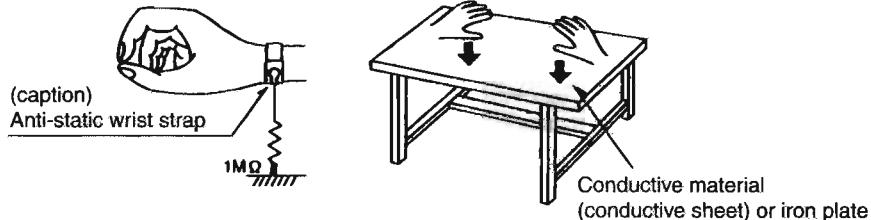

Be careful to use proper grounding in the area where repairs are being performed.

2-1 Ground the workbench

Ground the workbench by laying conductive material (such as a conductive sheet) or an iron plate over it before placing the traverse unit (optical pickup) on it.

2-2 Ground yourself

Use an anti-static wrist strap to release any static electricity built up in your body.

3. Handling the optical pickup

1. In order to maintain quality during transport and before installation, both sides of the laser diode on the replacement optical pickup are shorted. After replacement, return the shorted parts to their original condition. (Refer to the text.)

2. Do not use a tester to check the condition of the laser diode in the optical pickup. The tester's internal power source can easily destroy the laser diode.

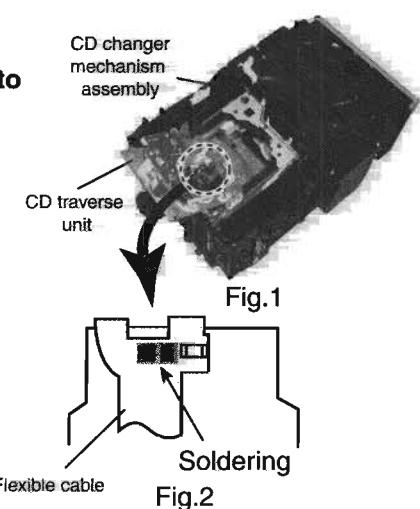

4. Handling the traverse unit (optical pickup)

1. Do not subject the traverse unit (optical pickup) to strong shocks, as it is a sensitive, complex unit.
2. Cut off the shorted part of the flexible cable using nippers, etc. after replacing the optical pickup. For specific details, refer to the replacement procedure in the text. Remove the anti-static pin when replacing the traverse unit. Be careful not to take too long a time when attaching it to the connector.
3. Handle the flexible cable carefully as it may break when subjected to strong force.
4. It is not possible to adjust the semi-fixed resistor that adjusts the laser power. Do not turn it.

Attention when traverse unit is decomposed

*Please refer to "Disassembly method" in the text for pick-up and how to detach the CD traverse mechanism.

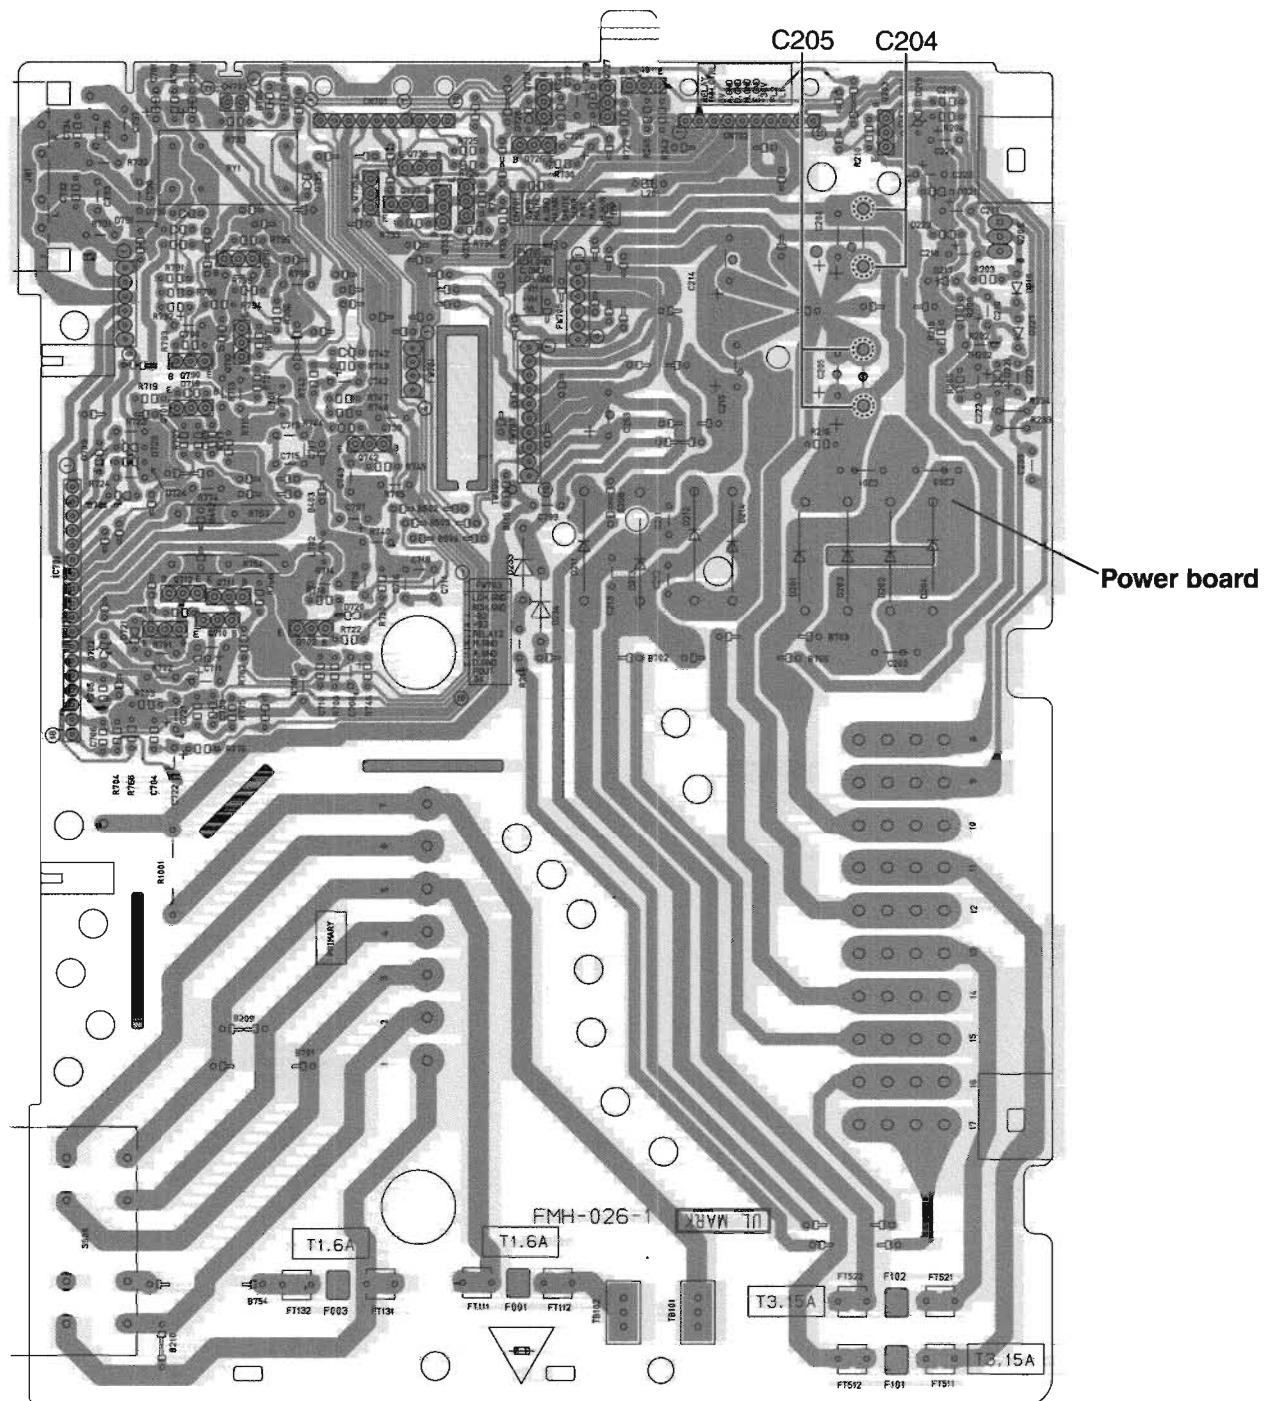

1. Remove the disk stopper and T. bracket on the CD changer mechanism assembly.
2. Disconnect the harness from connector on the CD motor board.
3. CD traverse unit is put up as shown in Fig.1.
4. Solder is put up before the card wire is removed from connector CN601 on the CD servo control board as shown in Fig. 2.
(When the wire is removed without putting up solder, the CD pick-up assembly might destroy.)
5. Please remove solder after connecting the card wire with CN601 when you install picking up in the substrate.

Precautions at disassembling and parts replacement

This model is charged with electricity on the power board even if the power cord is unplugged. Therefore, always discharge electricity in accordance with the steps given below before starting disassembling of the unit and/or replacement of parts.

1. While referring to the disassembling steps, remove the metal cover and the CD changer mechanism.
2. Set electrical resistances of 1kohm, 1/4W to the places between the + and - terminals of the respective condensers C204 and C205 on the power board, and discharge electricity for 4 ~ 5 seconds.

Instructions

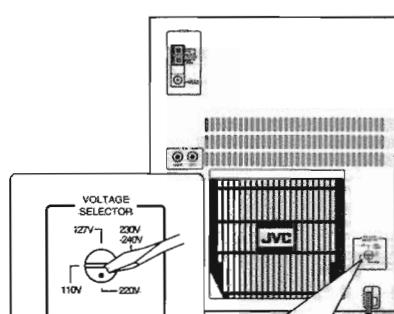

Mains (AC) Line Instruction (not applicable for Europe, U.S.A., Canada, Australia, and U.K.)

Instrucción sobre la línea de la red (CA) (no aplicable para Europa, EE.UU., Canadá, Australia, ni el Reino Unido)

Instrução sobre a tensão da rede eléctrica (CA) (não aplicável para a Europa, os E.U.A., o Canadá, a Austrália e o Reino Unido)

主 (AC) 電源線路說明 (不適用於歐洲、美國、加拿大、澳洲及英國型號)

توصيات خط التيار الكهربائي الرئيسي (المترد) (لا تتنطبق على أوروبا والولايات المتحدة الأمريكية وكندا وأستراليا والمملكة المتحدة)

IMPORTANT for mains (AC) line
BEFORE PLUGGING IN, do check that your mains (AC) line voltage corresponds with the position of the voltage selector switch provided on the outside of this equipment, and, if different, move the voltage selector switch, to prevent from damage or risk of insulation shock.

IMPORTANTE para la linea de la red (CA)
ANTES DE ENCHUFAR EL APARATO, compruebe si la tensión de la red coincide con la posición del selector de tensión situado en la parte exterior del equipo, y si es diferente, mueva el selector de tensión para evitar el riesgo de incendios/descargas eléctricas.

IMPORTANT para a ligação à tensão de rede (CA)
ANTES DE LIGAR O APARELHO A UMA TOMADA DA REDE, verifique se a tensão de rede CA corresponde à posição do seletor de voltagem localizado na parte externa desse equipamento. Caso não corresponda, responda o seletor de voltagem a fim de evitar avanços ou riscos de incêndio e choque elétrico.

Avisos, precauciones y otras notas
Advertências, precauções e outras notas
警告, 注意及其他須知事項
تحذيرات، تنبيهات وآخرين

Caution — On switch!
Disconnect the mains plug to shut the power off completely. The on switch in any position does not disconnect the mains line. The power can be remote controlled.

注意—电源开关！
拔掉电源插头以切断电源。电源开关在任何位置都不能切断电源。只能通过遥控器控制。

Precaución — Interruptor (ON).
Desconectar el cable de alimentación para desactivar la alimentación totalmente. Cuálquier que sea la posición de ajuste del interruptor (ON), la alimentación no es cortada completamente. La alimentación puede ser controlada remotamente.

تحذير—钮子开关。
拔掉电源插头以切断电源。电源开关在任何位置都不能切断电源。只能通过遥控器控制。

Precaução — Interruptor (ON).
Desconectar o cabo de alimentação para desligar a alimentação por completo. Qualquer que seja a posição de ajuste do interruptor (ON), a alimentação não é completamente cortada. A alimentação pode ser controlada remotamente.

تحذير—钮子开关。
拔掉电源插头以切断电源。电源开关在任何位置都不能切断电源。只能通过遥控器控制。

CAUTION
To reduce the risk of electrical shock, fire, etc.:
1. Do not remove screws, covers or cabinet.
2. Do not expose this appliance to rain or moisture.

PRECAUCIÓN
Para reducir riesgos de choques eléctricos, incendio, etc.:
1. No extraiga los tornillos, cubiertas ni la caja.
2. No exponga este aparato a la lluvia o a la humedad.

PRECAUÇÃO
Para reduzir riscos de choques elétricos, incêndio, etc.:
1. Não remova parafusos, tampas ou demonte a caixa.
2. Não exponha este aparelho à chuva nem à umidade.

警告
为了防止触电、火灾等危险：
1. 请勿擅自拆卸机壳、盖板或零件。
2. 切勿将本机放置于雨中或潮湿环境中。

تحذير
لتجنب التفريغ، الصدمة الكهربائية، الحرائق، إلخ.
1. لا تقم بفك الغطاء أو الأغطية في الماء.
2. لا تضع جهاز التلفزيون في الماء.

Caution: Proper Ventilation
To avoid risk of electric shock and fire, and to prevent damage, locate the apparatus as follows:

- Front: No obstructions and open spacing.
- 2 Sides/ Top/ Back: No obstructions should be placed in the areas shown by the dimensions below.
- Bottom: Place on the level surface. Maintain an adequate air path for ventilation by placing on stand with a height of 10 cm or more.

Precaución: el aparato debe estar bien ventilado
Para evitar posibles riesgos de descargas eléctricas e incendios y prevenir cualquier posible daño, coloque el aparato del modo siguiente:

- Parte delantera: No ponga nada delante, deje el espacio libre.
- Laterales/ parte superior/ parte trasera: No se deben colocar nada en las áreas y las distancias que se detallan a continuación.

3 Parte inferior: Coloque el aparato sobre una superficie recta. Debe haber buena circulación de aire; para esto, coloque el aparato sobre una base a una altura mínima de 10 cm.

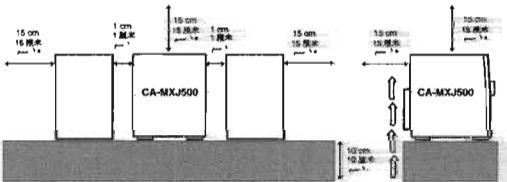

Precaução: Ventilação adequada
Para evitar riscos de choques elétricos e incêndios, e prevenir avarias, instale o aparelho como segue:

- Parte frontal: Sem obstruções e espaços abertos.
- Partes laterais/Tampa/Posterior: Nenhuma obstrução deverá ser colocada entre as áreas cujas dimensões são indicadas abaixo.
- Parte inferior: Instale-o sobre uma superfície plana. Deverá ter mantido espaço suficiente para a ventilação se este for instalado numa posição que tenha uma altura de 10 cm ou mais.

告白：正確通風

为了避免发生觸電和火警的危險，及防止本機受損，請將本機如下放置：

- 前面： 沒有障礙物及地方空曠。
 - 側面／頂面／背面： 在圖中所示範圍中，不能放置任何障礙物。
 - 底部： 放置在一個離 10 厘米或以上的臺上，以保持足夠的通風道。
- تحذير: التهوية المصححة**
لتجنب مخاطر صدمات كهربائية وأخطار الحرارة ومنع حصول تلف وضرر للمجهز، راجع المجهز كما يلي:
- الجهة الأمامية: يجب أن لا يعيق مسافك عرضة ويبقى ان تكون المسافة مترافقاً أيام العمل.
 - الجهة الظهرية - التغطية الأمامية / الخلفية / الخفيفة: يجب عدم وضع عائق في المسافة المبينة بالشكل أدناه.
 - الجهة السفلية: يجب وضع الجهاز على سطح مستوٍ. اترك مسافة كافية من أجل التهوية بواسطة ووضع الجهاز على حامل يرتكض 10 سم أو أكثر.

23. DANGER: 機器開啓時會有不可見雷射光線外洩。請勿嘗試自行維修。
24. CAUTION: 機器開啓時會有不可見雷射光線外洩。請勿嘗試自行維修。

25. DANGER: 機器開啓時會有不可見雷射光線外洩。請勿嘗試自行維修。
26. CAUTION: 機器開啓時會有不可見雷射光線外洩。請勿嘗試自行維修。

- G-4 -

Introduction

English

We would like to thank you for purchasing one of our JVC products.
Before operating this unit, read this manual carefully and thoroughly to obtain the best possible performance from your unit, and retain this manual for future reference.

About This Manual

This manual is organized as follows:

- The manual mainly explains operations using the buttons and controls on the unit. You can also use the buttons on the remote control if they have the same or similar names (or marks) as those on the unit.
- If operation using the remote control is different from that using the unit, it is then explained.

- Basic common information that is the same for many functions is grouped in one place, and is not repeated in each procedure. For instance, we do not repeat the information about turning on/off the unit, setting the volume, changing the sound effects, and others, which are explained in the section "Common Operations" on pages 9 to 11.
- The following marks are used in this manual:

Gives you warnings and cautions to prevent damage or risk of fire/electric shock.

Also gives you information which is not good for obtaining the best possible performance from the unit.

Gives you information and hints you had better know.

Precautions

Installation

- Install in a place which is level, dry and neither too hot nor too cold -- between 5°C (41°F) and 35°C (95°F).
- Install the unit in a location with adequate ventilation to prevent internal heat build-up in the unit.
- Leave sufficient distance between the unit and the TV.
- Keep the speakers away from the TV to avoid interference with TV.

DO NOT install the unit in a location near heat sources, or in a place subject to direct sunlight, excessive dust or vibration.

Getting Started

Unpacking

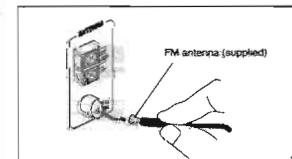

After unpacking, check to be sure that you have all the following items.
The number in the parentheses indicates the quantity of the pieces supplied.

- AM/FM antenna (1)
- FM antenna (1)
- Remote control (1)
- Batteries (2)
- AC plug adaptor except for Argentina: (1)

If any is missing, consult your dealer immediately.

Connecting Antennas

FM antenna

1 Attach the FM antenna to the FM 75 Ω COAXIAL terminal.

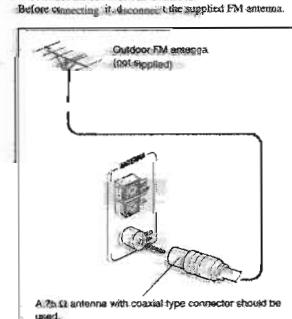

2 Extend the FM antenna.

3 Fasten it up in the position which gives you the best reception, then fix it on the wall, etc.

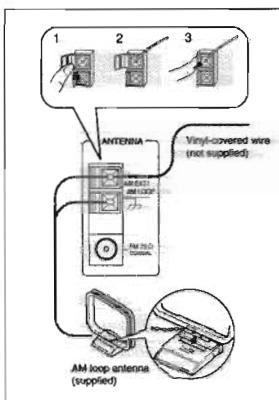

About the supplied FM antenna

The FM antenna supplied with this unit can be used as temporary antenna. If reception is poor, you can connect outdoor FM antenna.

To connect an outdoor FM antenna

- 6 -

**AM antenna**

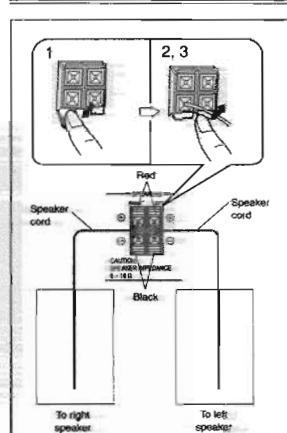

- 1 Connect the AM loop antenna to the AM LOOP terminals as illustrated.

- 2 Turn the AM loop antenna until you have the best reception.

To connect an outdoor AM antenna

When reception is poor, connect a single vinyl-covered wire to the AM EXT terminal and extend it horizontally. (The AM loop antenna must remain connected.)

notes
For better reception of both FM and AM.
• Make sure the antenna conductors do not touch any other terminals and connecting cords.
• Keep the antenna away from metallic parts of the unit, connecting cords, and the AC power cord.

Connecting Speakers

- 1 Press and hold the clamp of the speaker terminal on the rear of the unit.

- 2 Insert the end of the speaker cord into the terminal.
Match the polarity (color) of the speaker terminals: \oplus to \oplus and \ominus to \ominus .

- 3 Release the finger from the clamp.

IMPORTANT: Use only speakers with the same speaker impedance as indicated by the speaker terminals on the rear of the unit.

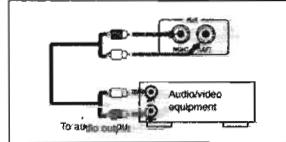

Connecting Other Equipment

You can connect both analog and digital equipment.

- notes**
• DO NOT connect any equipment while the power is on.
• DO NOT plug in any equipment until all connections are complete.

To connect an analog component

Be sure that the plugs of the audio cords are color-coded: White plugs and jacks are for left audio signals, and red ones for right audio signals.

NOW, you can plug in the unit and other connected equipment FINALLY!

When connecting the AC power cord into a wall outlet, the unit automatically starts display demonstration.

- If the wall outlet does not match the AC plug, use the supplied AC plug adaptor (except for Argentina).

To stop the display demonstration, press any button on the unit or on the remote control.

To start the display demonstration manually
Press and hold DEMO for more than 2 seconds.

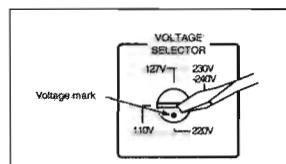

To stop the demonstration, press any button.

For playing the other equipment through this unit, connect between the audio output jacks on the other equipment and AUX jacks by using audio cords (not supplied).

Adjusting the Voltage Selector

Before plugging in the unit, set the correct voltage for your area with the voltage selector on the rear of the unit.

Use a screwdriver to rotate the voltage selector so the voltage marker the voltage mark is pointing at is the same as the voltage where you are plugging in the unit. (See the back cover page.)

- notes**
• DO NOT plug in before setting the voltage selector on the rear of the unit and all connection procedures are complete.

- 8 -

Common Operations

Continued

Turning On and Off the Power

To turn on the unit, press $\text{ON}/\text{STANDBY}$ so that the STANDBY lamp goes off.

The Powered Rolling Panel opens automatically.

To turn off the unit (on standby), press $\text{ON}/\text{STANDBY}$ again so that the STANDBY lamp lights up.

The Powered Rolling Panel also closes. A little power is always consumed even while the unit is on standby.

To switch off the power supply completely, unplug the AC power cord from the AC outlet.

notes
When you unplug the AC power cord or if a power failure occurs
The clock loses its setting and is reset to "0:00." You need to set the clock again.

Setting the Clock

Before operating the unit any further, first set the clock built in this unit.

On the unit ONLY:

- 1 Press **PANEL OPEN/CLOSE**.

The unit turned on and the Powered Rolling Panel opens automatically.

- 2 Press **CLOCK/TIMER**.

The hour digits start flashing on the display.

- 3 Press $\text{◀} \text{▶}$ to adjust the hour, then press **SET**.

If you want to correct the hour after pressing **SET**, press **CANCEL**. The hour digits start flashing again.

- 4 Press $\text{◀} \text{▶}$ to adjust the minute, then press **SET**.

CLOCK OK

To check the clock time

Press DISPLAY while playing any source.
Each time you press the button, the source indication and the clock time alternate on the display.

To adjust the clock again

If you have adjusted the clock before, you need to press CLOCK/TIMER repeatedly until the clock setting mode is selected.

- Each time you press the button, the clock/timer setting mode changes as follows:

(The hour digits are blank.)

If there is a power failure
The clock loses its setting and is reset to "0:00." You need to set the clock again.

Setting the AM Tuner Interval Spacing

Some countries space AM stations 9 kHz apart, and some countries use 10 kHz spacing.

On the unit ONLY:

You can only change the AM tuner interval spacing while tuning into an AM station.

Press $\text{ON}/\text{STANDBY}$ while holding down BAND .

- Each time you press the button, the AM tuner interval spacing alternates between 9.0 kHz and 10 kHz.

Selecting the Sources

To listen to the FM/AM broadcasts, press FM/AM. (See page 12.)

To play back CDs, press CD $\text{▶} \text{I} \text{II}$. (See pages 13-15.)

To play back tapes, press TAPE $\text{◀} \text{▶}$. (See page 16.)

To select the external equipment as the source, press AUX.

When you press the play button for a particular source (FM/AM, CD $\text{▶} \text{I} \text{II}$, AUX, and TAPE $\text{◀} \text{▶}$), the unit turns on, and the Powered Rolling Panel opens automatically (and the unit starts playing the source it is ready—CONPU PLAY CONTROL).

Adjusting the Volume

You can adjust the volume level only while the unit is turned on.

Turn the VOLUME control clockwise to increase the volume or counter-clockwise to decrease it.

- The volume level can be adjusted in 32 steps (MUTE, VOL 1—VOL 30, and MAX).

When using the remote control, press VOLUME + to increase the volume or press VOLUME - to decrease it.

notes

For private listening
Connect a pair of headphones to the PHONES jack. No sound comes out of the speakers. Be sure to turn down the volume before connecting or putting on headphones.

notes
DO NOT turn off (on standby) the unit with the volume set to an extremely high level; otherwise, a sudden burst of sound can damage your hearing, speakers and/or headphones when you turn on the unit or start playing any source next time.
REMEMBER you cannot adjust the volume level while the unit is on standby.

To turn down the volume level temporarily

Press FADE MUTING on the remote control.

The volume level gradually decreases to "MIN."

To restore the sound, press the button again.

To cancel the Active Bass Extension, turn the control counter-clockwise until "BASS OFF" appears.

Reinforcing the Bass Sound

The ACTIVE BASS EX. (extension) LEVEL control provided for this unit can maintain the richness and fullness of the bass sound while listening to any source at low volume.

This function only affects the playback sound, but does not affect your recording.

Turn the ACTIVE BASS EX. LEVEL control clockwise to increase the bass sound or counter-clockwise to decrease it.

- The bass sound level can be adjusted in 4 steps (BASS 1—BASS 3, and MAX).

BASS indicator always lights up when the unit is on.

When using the remote control, press ACTIVE BASS EX. + to increase the bass sound level or press ACTIVE BASS EX. - to decrease it.

To cancel the Active Bass Extension, turn the control counter-clockwise until "BASS OFF" appears.

Selecting the Sound Modes

You can select one of the 6 preset sound modes (3 surround modes and 3 SEA—Sound Effect/amplifier—modes). This function only affects the playback sound, but does not affect your recording.

To select the sound modes, press SOUND MODE until the sound mode you want appears on the display. The SOUND MODE indicator also lights up on the display.

SOUND MODE

• Each time you press the button, the sound modes change as follows:

MX-J500

English

Surround modes *

- D.CLUB: Increases resonance and bass.
- HALL: Adds depth and enhance to the sound.
- STADIUM: Adds clarity and spreads the sound, like in an outdoor stadium.

SEA (Sound Effect Amplifier) modes:

- ROCK: Boosts low and high frequency. Good for acoustic music.
- POP: Good for vocal music.
- CLASSIC: Good for classical music.

Manual modes:

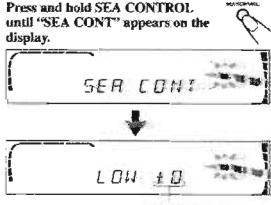

- MANUAL 1/2/3: Your individual mode stored in memory. See "Creating Your Own Sound Mode — Manual Mode".

- OFF: Cancels the sound mode.
- Surround elements are added to the SEA elements to create a better-feeling in your room.
- When one of these modes is selected, the SOUND MODE indicator lights up as .

While one of the SEA modes including manual modes (SEA elements without surround elements is selected), it lights up as .

The SOUND MODE indicator also lights up.

- There is a time limit in doing the following steps. If the setting is canceled before you finish, start from step 1 again.
- If you want to add the surround elements in your SEA pattern, select one of the surround modes (D.CLUB, HALL, or STADIUM) before starting the procedure below.
- On the unit ONLY:**
- Press and hold SEA CONTROL until "SEA CONT" appears on the display.

- 11 -

2 Adjust the SEA pattern.

1 Press  or  to select the frequency range to adjust (LOW, MID, HIGH).

2 Press  or  to adjust the level (-3 to +3) of the selected frequency range.

3 Repeat steps 1) and 2) to adjust the level of the other frequency ranges.

3 Press SEA CONTROL again.

The SOUND MODE indicator also lights up.

4 Press or to select one of the MANUAL 1, 2, and 3 modes which you want to store the SEA pattern.

5 Press SEA CONTROL again.

The SOUND MODE indicator also lights up.

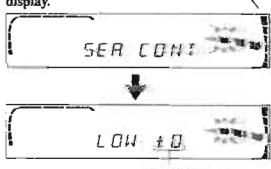

Creating Your Own Sound Mode — Manual Mode

You can change SEA pattern to suit your preference. These changed settings can be stored in the MANUAL 1, 2, and 3 modes.

- There is a time limit in doing the following steps. If the setting is canceled before you finish, start from step 1 again.
- If you want to add the surround elements in your SEA pattern, select one of the surround modes (D.CLUB, HALL, or STADIUM) before starting the procedure below.

On the unit ONLY:

- Press and hold SEA CONTROL until "SEA CONT" appears on the display.

- 11 -

Playing Back CDs

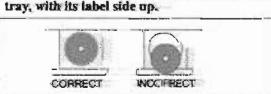

English

Loading CDs

On the unit ONLY:

- Press  for the disc tray (CD1 to 3) you want to load a CD onto. The unit automatically turns on and the disc tray comes out. The Powered Rolling Panel also opens automatically.

- Place a disc correctly on the circle of the disc tray, with its label side up.

- When using a CD single (8-cm), place it on the inner circle of the disc tray.

- Press the same  as you have pressed in step 1. The disc tray closes, and the corresponding disc indicator (CD1 to CD3) lights up on the display.

- Repeat steps 1 to 3 to place other CDs.

-  When loading more than one CD continuously: When you press  for the next tray you want to place another CD onto first, disc tray automatically closes and then the next tray comes out.

-  About the disc indicators: Each disc indicator corresponds with the disc tray of the same number.

- Disc number 
- Disc indicator Disc marker

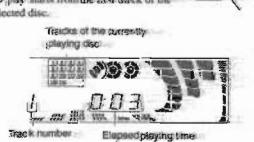

- The disc marker lights up for the disc number you have selected. The disc indicator flashes while the corresponding CD is being played.
- The disc indicator goes off when no switch is detected that has no CD on the corresponding disc tray.

Playing Back the Entire Discs — Continuous Play

You can play CDs continuously.

1 Load CDs.

- Press one of the disc number buttons (CD1, CD2, and CD3) for the disc you want to play. CD play starts from the first track of the selected disc.

- Pressing CD  instead of the disc number button starts playing back if a CD is on the trays.

To stop during play, press .

To remove the disc, press  for the corresponding disc tray.

 CD playback sequence: When 3 CDs are loaded on the disc trays, they are played in the following sequence:

- When CD1 is pressed: CD1  CD2  CD3 (item repeat)
- When CD2 is pressed: CD2  CD3  CD1 (item repeat)
- When CD3 is pressed: CD3  CD1  CD2 (item repeat)
- When only 2 CDs are loaded, they are played in the same order, but the disc tray without a CD is skipped.

Basic CD Operations

While playing a CD, you can do the following operations:

To exchange CDs during playback of another: Press  for the corresponding CD not playing; we already comment to eject and exchange the CD.

To play exchange CDs during play: The current play will stop until all CDs you have exchanged are played.

To stop play for a moment: Press CD .

While pausing, the elapsed playing time flashes on the display.

To resume play: Press CD .

- 13 -

Listening to FM and AM Broadcasts

English

Tuning in a Station

1 Press FM/AM.

The unit automatically turns on and tunes in the previously tuned station (either FM or AM). The Powered Rolling Panel automatically opens.

- Each time you press the button, the band alternates between FM and AM.

2 Start searching for stations.

On the unit:

Press and hold TUNING  /  for more than 1 second.

On the remote control:

Press and hold  /  for more than 1 second.

The unit starts searching for stations and stops when a station of sufficient signal strength is tuned in. If a program is broadcast in stereo, the STEREO indicator lights up.

To stop during searching, press TUNING  / .

 When you press TUNING  /  briefly and repeatedly, the frequency changes step by step.

To change the FM reception mode

When an FM stereo broadcast is held to receive or mono, press FM MODE on the remote control so that the MONO indicator lights up on the display. Reception improves.

To restore the stereo effect, press FM MODE again so that the MONO indicator goes off.

In this stereo mode, you can hear stereo sounds when a program is broadcast in stereo.

Presetting Stations

1 Press FM/AM.

The unit automatically turns on and tunes in the previously tuned station (either FM or AM). The Powered Rolling Panel automatically opens.

- Each time you press the button, the band alternates between FM and AM.

2 Select a preset number.

On the unit:

Press PRESET  / .

On the remote control:

Press the number buttons.

For preset number 5, press 5.

For preset number 15, press +10, then 5.

For preset number 20, press +10, then 10.

For preset number 25, press +10, +10, then 5.

For preset number 30, press +10, +10, then 10.

To locate a particular point in a track

During play, press and hold  / .

- Each time you press the button, CD play mode changes as follows:

Program Play Random Play Continuous Play

To go to another track

Press  /  repeatedly before during playback.

 When using the remote control, press and hold  / .

 If you press and hold  /  before playing, you can change the tracks continuously.

Program Play

You can arrange the order in which the tracks play before you start playing. You can program up to 32 tracks.

- To use Random play (see page 1-5) for Program play, press REPEAT after starting Program play.

1 Load CDs.

 If the current playing source is not the CD player, press CD .

While playing, then  to the next step.

2 Press PROGRAM/RANDOM repeatedly until "PROGRAM" appears on the display.

 If a program has been stored in memory, the program is called "PROGRAM".

3 Press one of the disc number buttons (CD1, CD2, and CD3) to select the disc number you want to play.

 Track number

 Disc number Program step number

 You can change the tracks continuously.

4 Select a track from the CD selected in the above step.

On the unit:

Press  /  to select the track number, then press SET.

 If you have used the number buttons, press  /  again.

On the remote control:

Press the number buttons.

- For how to use the number buttons, see "To go to another track directly using the number buttons" described to the left.

  go to another track directly using the number buttons described to the left.

 go to another track directly using the number buttons described to the left.

To check the program contents

Before playing, you can check the program contents by pressing \ll / \gg or $\ll\ll$ / $\gg\gg$ on the remote control.

- $\gg\gg$: Shows the programmed tracks in the programmed order.
- $\ll\ll$: Shows them in the reverse order.

To modify the program

Before playing, you can erase the programmed tracks shown on the display by pressing CANCEL.

- Each time you press the button, the programmed track shown on the display is erased from the program.

To add tracks in the program before play, simply select the track numbers you want to add by following step 4 of the programming procedure on page 14.

To erase the entire program before or after play, press \ll / \gg . "PROGRAM" appears on the display.

- Ejecting a CD will also erase the track numbers programmed from the ejected CD.

If you try to program a 33rd track, "FULL" will appear on the display.

If your entry is ignored. You have tried to program a track from an empty tray, or a track number that does not exist on the CD (for example, selecting track 14 on a CD that only has 12 tracks). Such entries are ignored.

Playing at Random — Random Play

The tracks of all loaded CDs will play at random.

- To use Repeat play for Random play, press REPEAT after starting Random play.

1 Load CDs.

- If the current playing source is not the CD player, press \ll / \gg , then \ll before going to the next step.

2 Press PROGRAM/RANDOM repeatedly until "RANDOM" appears on the display.**RANDOM**

- Each time you press the button, CD play mode changes as follows:

Program Play — Random Play

3 Press CD $\gg\gg$.

The tracks are played at random. Random play ends when all the tracks are played once.

To skip the currently playing track, press $\gg\gg$ (or $\ll\ll$ / $\gg\gg$ on the remote control).

To stop during play, press \ll .

- Random play also stops when one of the disc trays is opened.

To exit from Random play mode, press PROGRAM/RANDOM repeatedly again before or after play so that the unit enters another play mode.

Even if you press $\gg\gg$ (or $\ll\ll$ / $\gg\gg$) on the remote control) You can go back to the previous tracks during Random play.

Repeating Tracks or CDs — Repeat Play

You can have all the CDs, the program or the individual track currently playing repeat as many times as you like.

To repeat play, press REPEAT during or before playback. To use Repeat play for Program play and Random play, press the button after starting...

- Each time you press the button, Repeat play mode changes as follows, and the following indicator lights up on the display:

REPEAT ALL — REPEAT 1CD
Cancelled — REPEAT 1

REPEAT ALL: Repeats all the tracks on all the CDs (continuously or at random), or all the tracks in the program.

REPEAT 1CD: Repeats all the tracks on one CD.

REPEAT 1: Repeats one track on one CD.

* REPEAT 1CD is not used for Program play and Random play.

To cancel Repeat play, press REPEAT repeatedly until the REPEAT indicator (REPEAT ALL, REPEAT 1CD, or REPEAT 1) goes off from the display.

* Repeat play is also canceled when you select Program play or Random play.

Prohibiting Disc Ejection — Tray Lock

You can prohibit CD ejection from the unit and can lock CDs.

- This operation is possible only using the buttons on the unit.

To prohibit disc ejection, press Δ for any disc tray while holding \ll . (If there is any disc tray open, close it first.) "LOCKED" appears for a while, and the loaded CDs are locked.

To cancel the prohibition and unlock the CDs, press Δ for any disc tray while holding \ll . "UNLOCKED" appears for a while, and the loaded CDs are unlocked.

If you try to eject CDs

"LOCKED" appears to inform you that the Tray Lock is in use.

— 15 —

**Recording****IMPORTANT:**

- It may be unlawful to record or play back copyrighted material without the consent of the copyright owner.
- The recording level is automatically set correctly, so it is not affected by the VOLUME control and the ACTIVE BASS EX. LEVEL control. Thus, during recording you can adjust the sound you are actually listening to without affecting the recording level.
- While recording, you can hear sound modes through the speakers or headphones. However, the sound is recorded without these effects (see page 10).
- If recordings you make have excessive noise or static, the unit may be too close to a TV. Increase the distance between the TV and the unit.
- You can use type I and II tapes for recording.

To protect your recording

Cassette have two small tabs on the back to prevent unexpected erasure or recording.

To protect your recording, remove these tabs.

To re-record on a protected tape, cover the holes with adhesive tape.

When using type II tape, be careful not to cover the holes used to detect the tape type.

To keep the best recording and playback sound quality

If the heads, capstans, and pinch rollers of the cassette decks become dirty, the following will occur:

- Impaired sound quality

- Discontinuous sound

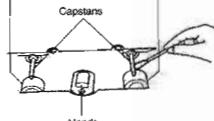

- Fading

- Incomplete erasure

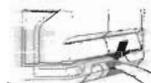

- Difficulty in recording

To clean the heads, capstans, and pinch rollers

Use a cotton swab moistened with alcohol.

**To demagnetize the heads**

Turn off the unit, and use a head demagnetizer (available at electronics and record shops).

Recording a Tape on Deck B**1 Press EJECT Δ for the deck B.****2 Put in a recordable cassette, with the exposed part of the tape down.****3 Close the cassette holder gently.****4 Check the tape direction of deck B.**

- If the tape direction is not correct, press TAPE \ll then \gg to change the tape direction.

5 Start playing the source — FM, AM, CD player, deck A, or auxiliary equipment connected to AUX JACKS.

- When the source is CD, you can also use CD Direct Recording (see page 18) and Auto Edit Recording (see page 19).

- If the source is deck A, you can also use the dubbing method. (See "Dubbing Tapes" on page 18.)

- * See "To record an AM station — Beat Cut" on page 18.

6 Start recording.**On the unit:****Press REC START/STOP.****On the remote control:****Press and hold REC START/STOP for more than 1 second.**

The REC (recording) indicator lights up on the display and recording starts.

To stop during recording, press REC START/STOP again or \ll .

To remove the cassette, press EJECT Δ for deck B.

To record on both sides — Reverse Mode

- Press REVERSE MODE so that the Reverse Mode indicator lights up as $\ll\gg$.

- When using the Reverse Mode for recording, start recording in the forward (\gg) direction first. Otherwise, recording will stop when recording is done only on one side (reverse) of the tape.

- To cancel Reverse Mode, press the button again so that the Reverse Mode indicator lights up as \gg .

Playing Back Tapes

You can play back type I, type II, and type IV tapes without changing any settings.

Playing Back a Tape**1 Press EJECT (Δ) for the deck you want to use.**

For Deck B

2 Put a cassette in, with the exposed part of the tape down.**3 Close the cassette holder gently.**

If you put cassettes for both decks A and B, the last deck you have put a cassette into is selected.

To operate the other deck, press TAPE A/B.

4 Press TAPE \ll or \gg .

The tape play starts and the tape direction indicator (\ll or \gg) starts flashing slowly to indicate the tape running direction.

- Each time you press the button, the tape direction changes...

\ll : plays the front side.

\gg : plays the reverse side.

When the tape play is done, the deck automatically stops if the Reverse Mode is not on. (See "To play both sides repeatedly — Reverse Mode".)

To stop during play, press \ll .

To operate the other deck, press TAPE A/B, then TAPE \ll .

To fast wind to the left or to the right, press \ll or \gg (or $\ll\ll$ or $\gg\gg$ on the remote control) while the tape is not running.

The tape direction indicator (\ll or \gg) starts flashing quickly on the display.

To remove the cassette, press Δ for deck A or EJECT Δ for deck B.

To play both sides repeatedly — Reverse Mode

Reverse Mode works for both decks at the same time. When it is in use, the tape automatically reverses at the end of a side and the unit starts playing the other side of the tape, and repeats the same process.

To use Reverse Mode, press REVERSE MODE so that the Reverse Mode indicator on the display lights up like $\ll\gg$.

To cancel Reverse Mode, press the button again so that the Reverse Mode indicator on the display lights up like \gg .

Locating the Beginning of a Song — Music Scan

You can use Music Scan to locate the beginning of a song. Music Scan searches for blank portions that usually separate recorded songs, then plays the next song.

To find the beginning of the current song

During play, press \ll or \gg (or $\ll\ll$ or $\gg\gg$ on the remote control) in the opposite direction to the tape play.

The tape direction indicator of the opposite direction to the tape play starts flashing slowly.

Searching stops automatically at the beginning of the current song, and the next song starts automatically.

To find the beginning of the next song

During play, press \ll or \gg (or $\ll\ll$ or $\gg\gg$ on the remote control) in the same direction as the tape play.

The tape direction indicator of the same direction as the tape play starts flashing slowly and quickly alternately.

Searching stops automatically at the beginning of the next song, and the next song starts automatically.

The use of the C-120 or thinner tape is not recommended, since characteristic deterioration may occur and this tape easily jams in the pinch rollers and the caps.

— 16 —

CD Direct Recording

Everything on the CD goes onto the tape in the order it is on the CD, or according to the order you have made for Program play.

1 Put a recordable cassette into deck B.**2 Place a disc correctly on the circle of the disc tray, with its label side up.****3 Press one of the disc number buttons (CD1 to CD3) to select the disc, then \ll .****4 Press CD REC START.**

"CD REC" appears, and the REC (recording) indicator lights up on the display.

Deck B starts recording and the CD player starts playing.

When the recording is done, "CD REC FINISHED" appears on the display, and the CD player and deck B stop.

To stop during CD Direct Recording, press \ll or REC STOP/STOP.**To record on both sides — Reverse Mode**

Press REVERSE MODE so that the Reverse Mode indicator lights up as $\ll\gg$.

* When using the Reverse Mode for CD Direct Recording, start recording in the forward (\gg) direction first. When the tape reaches its end while recording a song in the forward direction (\gg), the last song will be recorded at the beginning of the reverse side (\ll).

If you start recording on the reverse side (\ll), recording will stop when recording is done only on one side (reverse) of the tape.

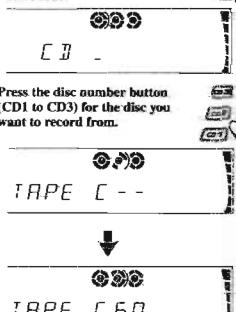

To cancel Reverse Mode, press the button again so that the Reverse Mode indicator lights up as \gg .

Auto Edit Recording

By using Auto Edit Recording, you can record the CD tracks to the tape. Auto Edit Recording makes a program by selecting the CD tracks in numerical order. However, to prevent the end of the last track on the front side from being cut off, the last track is selected so as to fit on the remaining tape length.

On the unit ONLY:

- Load CDs.
- If the current playing source is not the CD player, press **CD** **II**, then **II** before going to the next step.

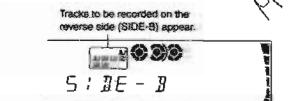

2 Press EDIT.

- Press the disc number button (CD1 to CD3) for the disc you want to record from.

The optimum tape length for the disc appears.

To change the tape length manually

If the tape length selected is not satisfactory, you can change the tape length by pressing **<>** or **<>**. You can select the tape length among the following — 40, 46, 50, 54, 60, 64, 70, 74, 80, 84, and 90.

4 Press SET.

- Each time you press the button, the tracks to be recorded on the front side (SIDE-A) and on the reverse side (SIDE-B) alternate.

5 Put a recordable cassette of appropriate length into deck B.

- Press REVERSE MODE so that the Reverse Mode Indicator lights up (C).
- Without turning on the Reverse Mode (C), recording will stop when the front side of the tape is recorded.

7 Press CD REC START.

- The REC (recording) indicator lights up on the display. Deck B starts recording then; about 10 seconds later, the CD player starts playing. When the recording is done, "CD REC FINISHED" appears on the display, and the CD player and deck B stop.
- If a tape has not been rewound, deck B will rewind the tape before it starts recording.
 - A 10-second blank portion is automatically created at the beginning of each side of the tape.

To stop during Auto Edit Recording

Press **II** or REC START/TOP so that a 4-second blank portion is created on the recorded tape. (Remember a 4-second blank is important when using Music Scan — see page 16.)

To cancel Auto Edit Recording

Press CANCEL before or after play.

- Pressing one of the following buttons will also cancel Auto Edit Recording — **II**, REC START/STOP, and PROGRAM/RANDOM.

Using the Microphones

You can enjoy singing along (Karaoke) and microphone mixing by using two microphones.

- The MIC LEVEL control adjustment is valid for both microphones connected the MIC 1 and MIC 2 jacks.

IMPORTANT:

- Always set the MIC LEVEL to MIN when connecting or disconnecting the microphone(s).
- When you do not use the microphone, keep the microphone unconnected.

If howling or squealing (feedback) occurs while using the microphones, take the following actions to prevent these noises.

- Adjust the MIC LEVEL and VOLUME controls.
- Avoid pointing the microphone(s) towards an speaker.
- When two microphones are connected, turn off the On/Off switch of the unused microphone.

If you use the following sources as the playing source for Vocal Masking, you cannot get the satisfactory results.

- Radio programs — a radio signal is not as reliable as the signals coming from a tape or CD.
- Monaural sources.
- Poorly damped spaces.
- Sources recorded with drums, strong bass, a chorus, or only a few instruments.

Singing Along

Vocal Masking
Vocal Masking reduces the lead vocal of the playing source, and allows you to replace it by singing into the microphone in the music plays.

1 Rotate the MIC LEVEL to MIN.

- Connect the microphone(s) (not supplied) by plugging it into the MIC 1 and/or MIC 2 jacks.

2 Press VOCAL MASKING on the remote control.

- The mask indicator (F) lights up on the display.

3 Start playing the source — CD, tape or other connected component.**4 Rotate the MIC LEVEL and VOLUME controls as you sing into the microphone(s).**

- By pressing REC START/STOP, you can record your singing along if you want. (For more details, see page 17.)

Microphone mixing

When you sing along with multiplex tapes or CDs, follow the procedure below.

On the unit ONLY:**1 Rotate the MIC LEVEL to MIN.**

- Connect the microphone(s) (not supplied) by plugging it into the MIC 1 and/or MIC 2 jacks.

2 Start playing the source — CD, tape or other connected component.**3 Rotate the MIC LEVEL and VOLUME controls as you sing into the microphone(s).**

- By pressing REC START/STOP, you can record your singing along if you want. (For more details, see page 17.)

To use microphone only

Without any background sound, you can use your microphone(s), and record it if you want.

- Rotate the MIC LEVEL to MIN.
- Connect the microphone(s) (not supplied) by plugging it into the MIC 1 and/or MIC 2 jacks.
- Press **CD** **II**, then **II**. No background sound will be heard.
- Rotate the MIC LEVEL and VOLUME controls as you sing or speak into the microphone(s).

Using the Timers

There are three timers available — Recording Timer, Daily Timer, and Sleep Timer.

Before using the timers, you need to set the clock built in the unit. (See page 9.)

Using Daily Timer

With Daily Timer, you can wake to your favorite movie or radio program.

How Daily Timer actually works

The unit automatically turns on, sets the volume level to the preset level, and starts playing the specified source when the on-time comes. (The **D** indicator flashes just before the on-time, and continues flashing while the timer is operating). Then, when the off-time comes ("OFF" is just before the off-time), the unit automatically turns off (stands by). The timer setting remains in memory until you change it.

- There is some limit in doing the following steps. If the setting is canceled before you finish, start from step 1 again.
- If you have a stable timer while setting timer, press CANCEL. (However, this does not always work. If CANCEL does not work, press CLOCK/TIMER repeatedly and start from step 1 again.)

Before you start...

- When using a CD as the source to play, make sure there is a CD on the selected disc number tray.
- When using a tape as the source to play —
 - Make sure that a tape is in the deck whose deck indicator (A or B) is lit on the display.
 - Make sure that the tape direction is correct.
- When using the external component as the source to play, set the timer equipped with the external component at the same time.

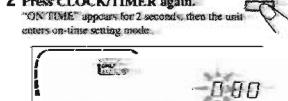

On the unit ONLY:

- Press CLOCK/TIMER until "DAILY" appears on the display. The DAILY (Daily Timer) indicator also starts flashing on the display.

- Each time you press the button, the timer setting mode changes as follows:

DAILY — ON TIME — REC
Cancelled — Clock — ON TIME setting.

(See page 9.)

2 Press CLOCK/TIMER again.**3 Set the on-time you want the unit to turn on.**

- Press **<>** or **<>** to set the hour, then press SET.
- Press **<>** or **<>** to set the minute, then press SET.
- "OFF TIME" appears for 2 seconds, then the unit enters off-time setting mode.

4 Set the off-time you want the unit to turn off (on standby).

- Press **<>** or **<>** to set the hour, then press SET.
- Press **<>** or **<>** to set the minute, then press SET.
- The unit enters source setting mode.

5 Press **<> or **<>** to select the source to play, then press SET.**

- Each time you press **<>** or **<>**, the source changes as follows:

TUNER FM — TUNER AM —
AUX — TAPE — CD

TUNER FM: tunes into a specified preset FM station — go to step 6.

TUNER AM: tunes into a specified preset AM station — go to step 6.

CD: played from a specified track of a specified CD — go to step 6.

TAPE: plays tape deck A or B — go to step 7.

AUX: plays an external source — go to step 7.

External source — go to step 7.

6 When selecting "CD" —

- Press **<>** or **<>** to select the disc number, then press SET.
- Press **<>** or **<>** to set the track number, then press SET.
- The unit enters volume setting mode.

When selecting "TUNER FM" or "TUNER AM"

- Press **<>** or **<>** to select a preset station number, then press SET.
- The unit enters volume setting mode.

7 Press **<> or **<>** to set the volume level.**

- You can select the volume level from among the following: "VOL 1" — "VOL 2" — "VOL 3" — "VOL 4" — "VOL 5".
- If you select "VOL 5", the volume is set to the last level when the timer has been turned off.

**8 Press SET to complete the Daily Timer setting.**

The DAILY (Daily Timer) indicator stops flashing and remains lit. The settings you have done are shown on the display in sequence.

9 Press **II to turn off the unit (on standby) if you have set the Daily Timer with the unit turned on.**

To turn on or off Daily Timer after its setting is done

- Press CLOCK/TIMER repeatedly until "DAILY" appears on the display.

- To turn off the Daily Timer, press CANCEL. The DAILY (Daily Timer) indicator goes off from the display. "OFF" appears for a while. The Daily Timer is canceled, but the setting for the Daily Timer remains in memory.

To turn on the Daily Timer, press **CLOCK/TIMER**.

The DAILY (Daily Timer) indicator lights up on the display. The settings you have done are shown on the display in sequence for your confirmation.

If the date is turned on when the timer-on time comes, "DAILY" does not work.

Using Recording Timer

With Recording Timer, you can make a tape of a radio broadcast automatically.

How Recording Timer actually works

The unit automatically turns on, tunes into the specified station, sets the volume level to "MIN", and starts recording using the radio wave names (the **R** indicator flashes just before the on-time, and continues flashing while the timer is operating). Then, when the off-time comes ("OFF" appears just before the off-time), the unit automatically turns off (stands by).

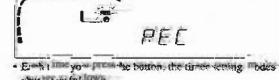

The timer setting remains in memory until you change it.

- There is a size limit in doing the following steps. If the setting is canceled before you finish, start from step 1 again.

- If you have made a suitable grille setting the timer, press CANCEL. However, this does not always work. If CANCEL does not work, press CLOCK/TIMER repeatedly and start from step 1 again.

On the unit ONLY:**1 Put a recordable cassette into deck B.**

- Press CLOCK/TIMER until "REC" appears on the display. The REC (Recording) indicator also starts flashing on the display.

**3 Press CLOCK/TIMER again.**

- "DAILY" appears for 3 seconds, then the timer-on time comes.

4 Set the on-time you want the unit to turn on.

- Press $\leftarrow\rightarrow$ or $\uparrow\downarrow$ to set the hour, then press SET.
 - Press $\leftarrow\rightarrow$ or $\uparrow\downarrow$ to set the minute, then press SET.
- "OFF TIME" appears for 2 seconds, then the unit enters off-time setting mode.

5 Set the off-time you want the unit to turn off (on standby).

- Press $\leftarrow\rightarrow$ or $\uparrow\downarrow$ to set the hour, then press SET.
 - Press $\leftarrow\rightarrow$ or $\uparrow\downarrow$ to set the minute, then press SET.
- The unit enters preset station selecting mode.

6 Select the preset station.

- Press $\leftarrow\rightarrow$ or $\uparrow\downarrow$ to select the band ("TUNER FM" or "TUNER AM"), then press SET.
- Press $\leftarrow\rightarrow$ or $\uparrow\downarrow$ to select a preset channel number, then press SET. The REC (Recording Timer) indicator stops flashing and remains lit. The settings you have done are shown on the display in sequence.

7 Press O/F to turn off the unit (on standby) if necessary.

If you want to listen to another source while recording, press REC START/STOP to stop recording. Without stopping it, you cannot change the source.

To turn on or off Recording Timer after its setting is done**1 Press CLOCK/TIMER repeatedly until "REC" appears on the display.**

To turn off the Recording Timer, press CANCEL. The REC (Recording Timer) indicator goes off from the display. The Recording Timer is canceled, but the setting for the Recording Timer remains in memory.

To turn on the Recording Timer, press SET. The REC (Recording Timer) indicator lights up on the display. The settings you have done are shown on the display in sequence for your confirmation.

Using Sleep Timer

With Sleep Timer, you can fall asleep to music. You can set Sleep Timer when the unit is turned on.

**How Sleep Timer actually works**

The unit automatically turns off after the specified time length passes.

On the remote control ONLY:**1 Press SLEEP.**

- The time length until the shut-off time appears and the SLEEP indicator starts flashing on the display.
- Each time you press the button, the time length changes as follows:

10 → 20 → 30 → 60 → 90 → 120
Cancelled

2 Wait for about 5 seconds after specifying the time length.

The SLEEP indicator stops flashing and remains lit.

To check the remaining time until the shut-off time, press SLEEP once so that the remaining time until the shut-off time appears for about 5 seconds.

To change the shut-off time, press SLEEP repeatedly until the desired time length appears on the display.

To cancel the setting, press SLEEP repeatedly so that the SLEEP indicator goes off.

Sleep Timer is also canceled when you turn off the unit.

Timer Priority

Since each timer can be set separately, you may wonder what happens if the setting for these timers overlaps. Here are examples.

• Recording Timer has priority over Daily Timer and Sleep Timer.

If Daily Timer is set to come on while Recording Timer is operating, Daily Timer will not come on at all.

If Recording Timer is set to come on while Sleep Timer is operating, Sleep Timer will not work (the SLEEP indicator does not go off).

- 23 -

Maintenance

To get the best performance of the unit, keep your discs, tapes, and mechanism clean.

Handling discs

- Remove the disc from its case by holding it at the edge while pressing the center hole lightly.
- Do not touch the shiny surface of the disc, or bend the disc.
- Put the disc back in its case after use to prevent warping.

- Be careful not to scratch the surface of the disc when placing it back in its case.
- Avoid exposure to direct sunlight, temperature extremes, and moisture.

- To clean the disc:
Wipe the disc with a soft cloth in a straight line from center to edge.

DO NOT use any solvent — such as conventional record cleaner, spray, thinner, or benzene — to clean the disc.

Handling cassette tapes

- If the tape is loose in its cassette, take up the slack by inserting a pencil in one of the reels and rotating.
- If the tape is loose, it may get stretched, torn, or caught in the cassette.

- Be careful not to touch the tape surface.

- Avoid the following places to store the tape:
 - In dusty places.
 - In direct sunlight or heat.
 - In moist areas.
 - Near a magnet.

CD**CD**

MX-J500

-MEMO-

Disassembly method

<Main body>

■ Removing the metal cover

(See Fig.1 to 3)

1. Remove the six screws **A** attaching the metal cover on the back of the body.
2. Remove the two screws **B** attaching the metal cover on both sides of the body.
3. Remove the metal cover from the body by lifting the rear part of the cover.

ATTENTION: Do not break the front panel tab fitted to the metal cover.

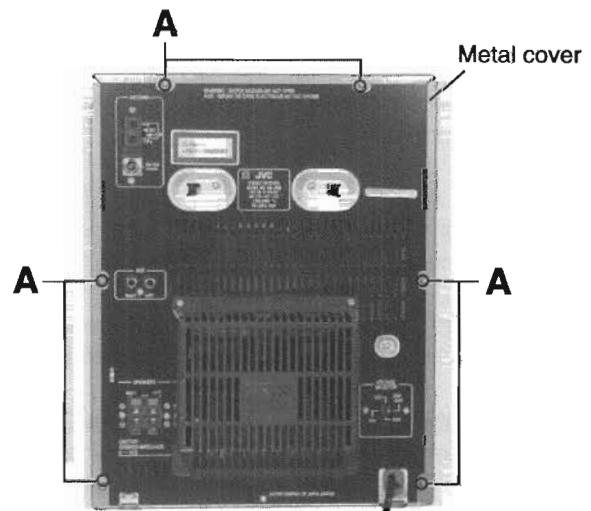

Fig.1

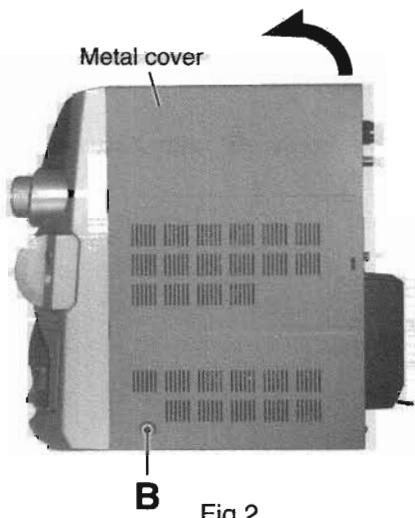

Fig.2

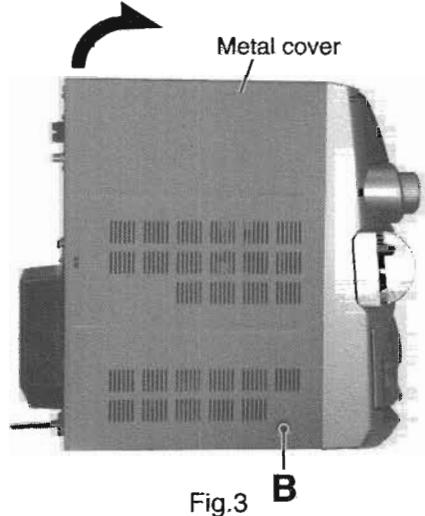

Fig.3

■ Removing the CD changer mechanism assembly (See Fig.4 to 6)

- Prior to performing the following procedure, remove the metal cover.

- For the card wire connecting the CD changer mechanism board and the main board, disconnect it from connector CN868 on the main board.
- Remove the two screws **C** attaching the CD changer mechanism assembly on both sides of the body.
- Remove the two screws **D** attaching the CD changer mechanism assembly to the rear panel. Remove the screw **E** attaching the AUX terminal on the back of the body.
- Pull the top of rear panel and the front panel assembly outward respectively, then remove the CD changer mechanism assembly by lifting the rear part of the assembly.
- Remove the screw **E'** attaching the Digital out terminal. (Only ver. A)

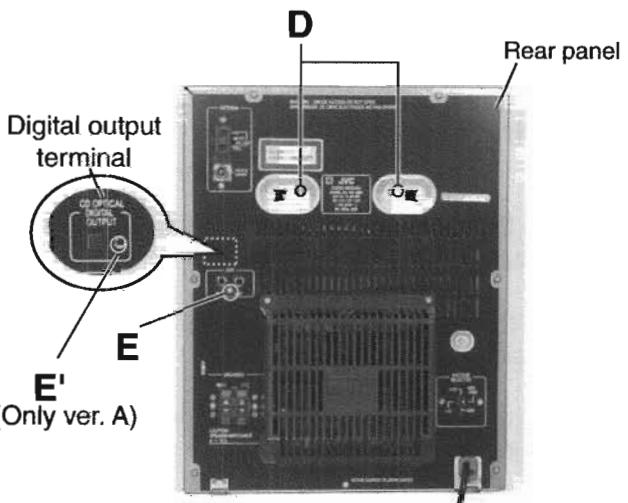

Fig.4

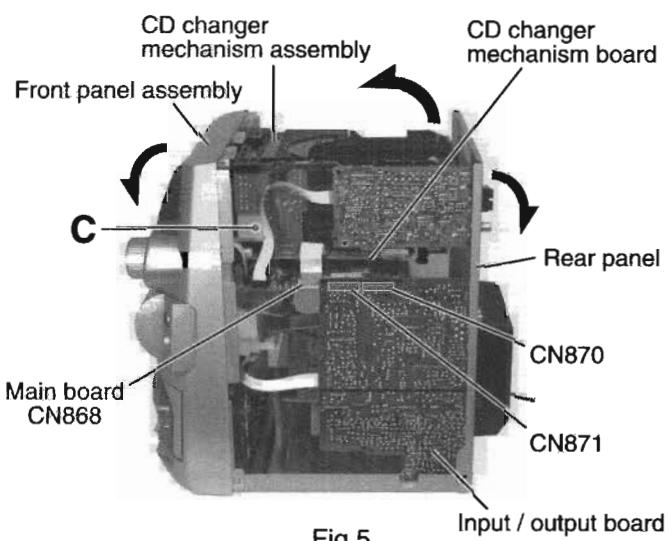

Fig.5

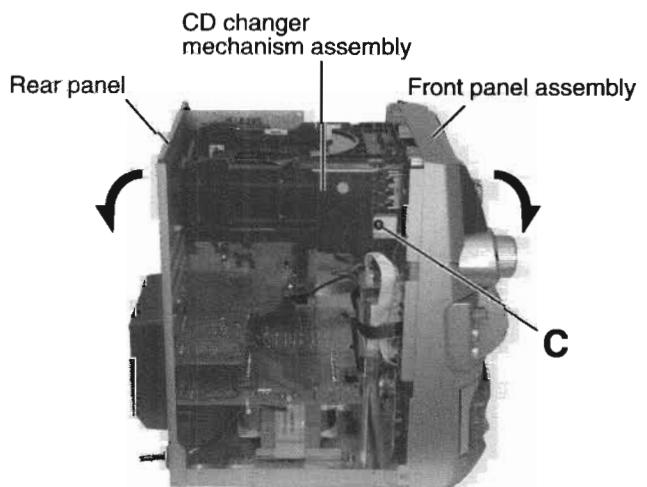

Fig.6

■ Removing the front panel assembly (See Fig.7 to 9)

- Prior to performing the following procedure, remove the metal cover and the CD changer mechanism assembly.

- Disconnect the card wire from connector CN865 on the main board.
- Disconnect the card wire from connector CN315 on the input / output board.
- Disconnect the harness from connector CN912 on the input / output board.
- Disconnect the harness from connector CN901 on the relay board on the back of the front panel assembly.
- Disconnect connector CN870 and CN871 on the input/output board from the main board respectively.
- Remove the four screws **F** attaching the front panel assembly on the bottom of the body.
- Release the two joints **a** and **b** on the lower part of the sides using a screwdriver, and remove the front panel assembly toward the front.

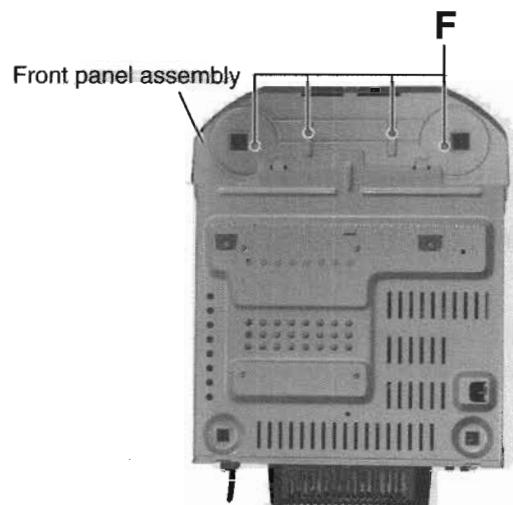

Fig.7

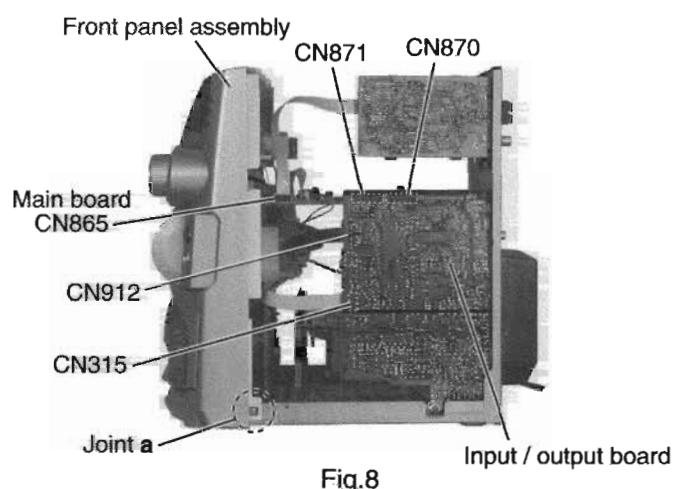

Fig.8

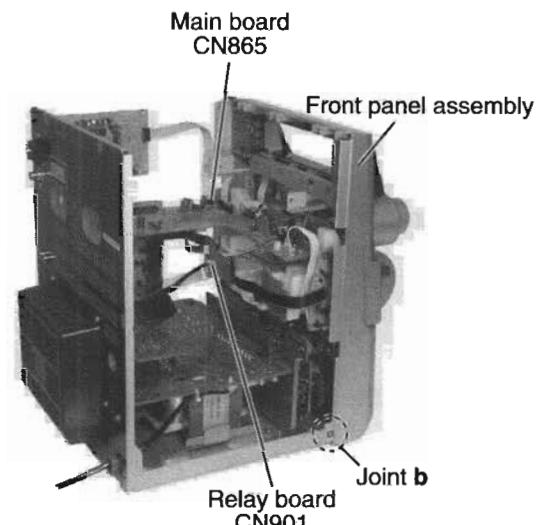

Fig.9

<Front panel assembly>

■ Removing the Microphone terminal board assembly (See Fig.10 and 11)

1. Pull out the MIC volume knob from the front side.
2. Remove the screw **H** attaching earth wire.
3. Remove the two screws **G** attaching the microphone terminal board assembly.

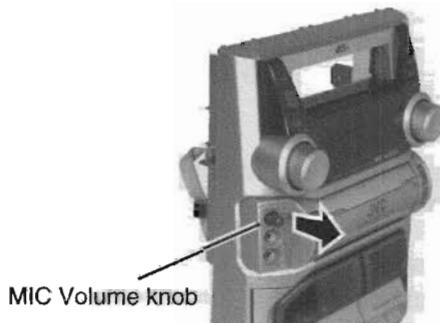

Fig.10

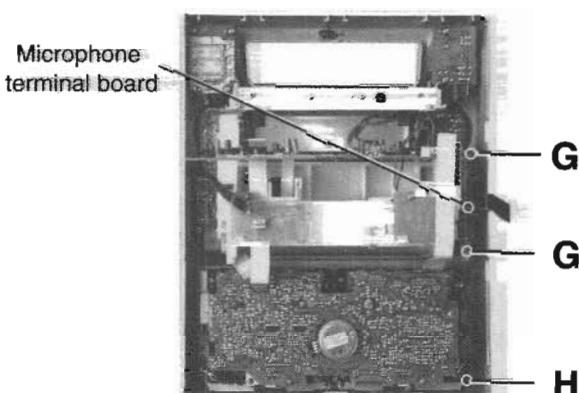

Fig.11

■ Removing the rolling panel assembly (See Fig.12 and 13)

1. Disconnect the harness from connector CN900 on the relay board on the back of the rolling panel assembly.
2. Disconnect the harness from connector CN862, CN863, CN850, CN851 and CN815 on the main board respectively. Disconnect the card wire from connector CN880 on the main board.
3. Disconnect the card wire from connector CN869 and the harness from CN883 and CN884 on the main board respectively.
4. Remove the four screws **I** attaching the rolling panel assembly.

ATTENTION: For the harness which should be connected to connector CN869, CN883 and CN884 on the main board, get them through the slots under the rolling panel when reattaching the rolling panel assembly to the front panel (Refer to Fig.13)

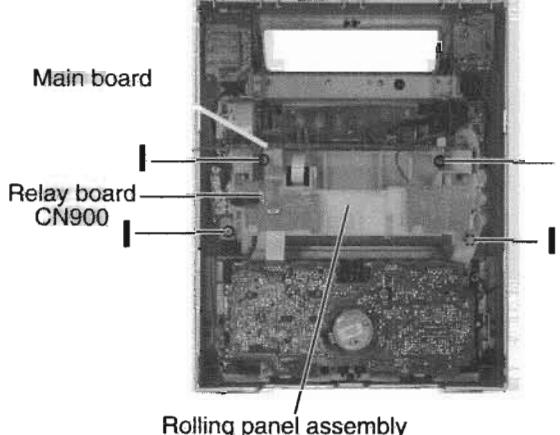

Fig.12

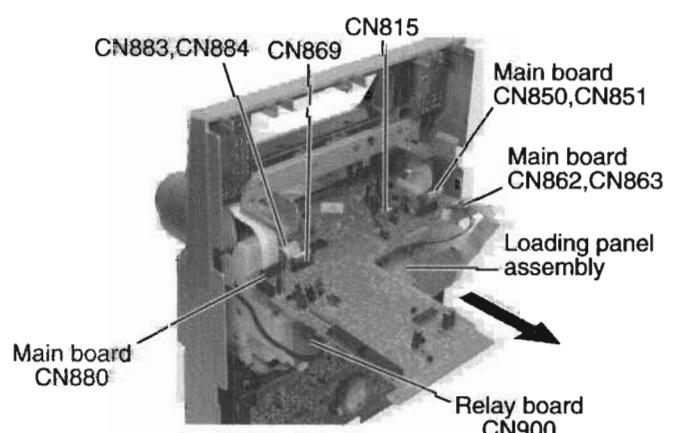

Fig.13

■ Removing the main board

(See Fig.14 and 15)

- Prior to performing the following procedure, remove the front panel assembly, the microphone terminal board and the rolling panel assembly.
- Disconnect the harness from connector CN867 on the main board.
 - Disconnect the card wire from connector CN879 on the main board (Before pulling out the card wire, stand the part **c** of CN879 as shown in Fig.15).
 - Remove the two screws **J** attaching the main board.

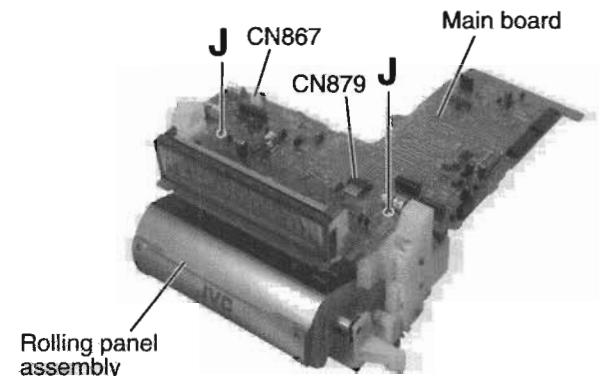

Fig.14

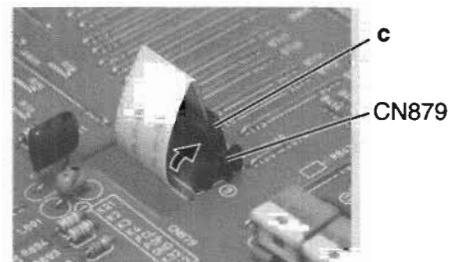

Fig.15

■ Removing the cassette mechanism assembly (See Fig.16)

- Prior to performing the following procedure, remove the front panel assembly.
- Disconnect the card wire from connector CN306 on the cassette mechanism board.
 - Remove the eight screws **K** and **K'** attaching the cassette mechanism assembly.

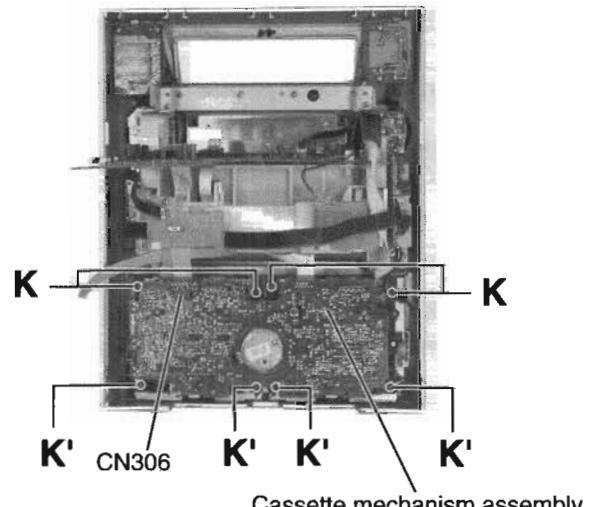

Fig.16

■ Removing the boards in the front panel assembly (See Fig.17 to 18)

- Prior to performing the following procedure, remove the front panel assembly and the rolling panel assembly.

— Function board1 (See Fig.17) —

- Remove the two screws **L** attaching the function board 1.

— Function board2 (See Fig.17) —

- Remove the two screws **M** attaching the function board 2.

— Bass-level regulator board (See Fig.18) —

- Pull out the level knob on the front side of the front panel assembly and remove the nut attaching the bass-level regulator board.
- Release the two joints **d**. Unsolder FW951 on the bass-level regulator board and disconnect the harness connected to the power switch.

— Main volume & headphone board (See Fig.18) —

- Pull out the volume knob on the front side of the front panel assembly and remove the nut attaching the main volume & headphone board.
- Remove the two screws **N** attaching the main volume & headphone board on the back of the front panel assembly and release the two joints **e**.
- Unsolder FW850 on the main volume & headphone board and disconnect the harness connected to the eject switch board.
- Remove the screw **K'** attaching the earth terminal extending from the main volume & headphone board.

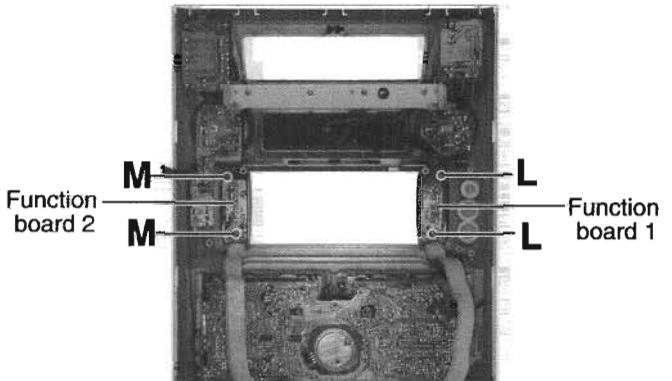

Fig.17

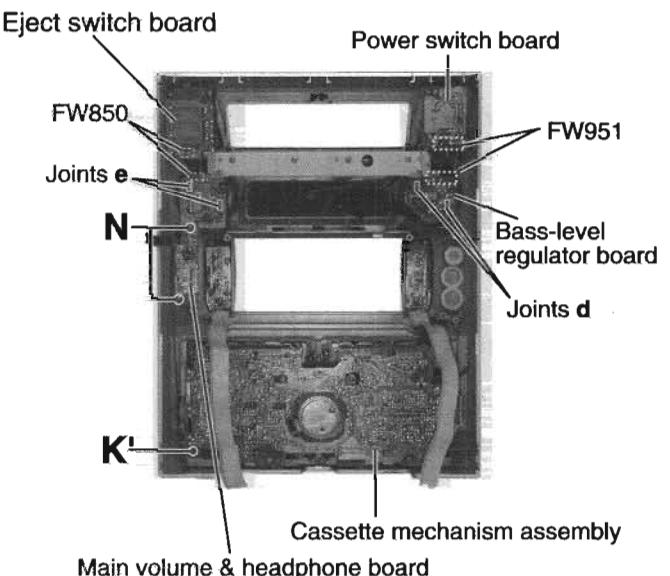

Fig.18

— Power switch board (See Fig.19) —

1. Remove the two screws **O** attaching the power switch board. Unsolder FW951 on the power switch board and disconnect the harness extending to the bass-level regulator board.

— Eject switch board (See Fig.19) —

1. Remove the four screws **P** attaching the eject switch board. Unsolder FW850 on the eject switch board and disconnect the harness extending to the main volume & headphone board.

— Remote control port board (See Fig.19) —

1. Remove the screw **Q** attaching the remote control port board.

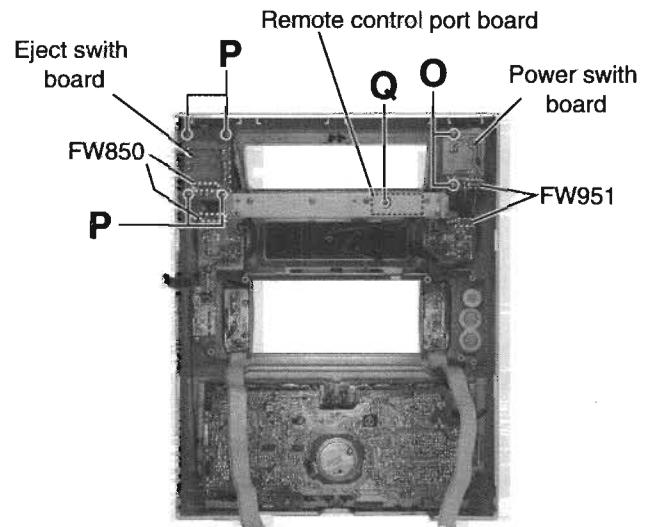

Fig.19

■ Removing the relay board and fixing board (See Fig.20)

- Prior to performing the following procedure, remove the metal cover.

※ There is no need to remove the front panel assembly.

1. Disconnect the harness from connector CN900 and CN901 on the relay board on the back of the loading panel assembly.
2. Remove the screw **R** attaching the relay board. Release the tab **f** and remove the relay board from the groove **g**.
3. Remove the screw **R'** attaching the fixing board and remove the fixing board from the groove **h**.

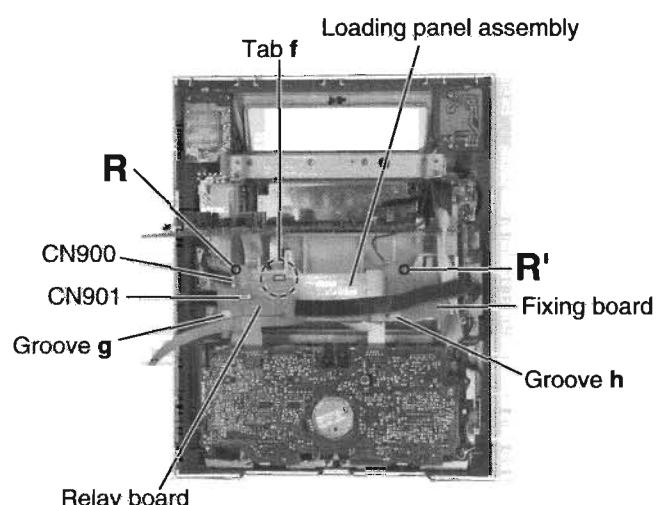

Fig.20

<Rear panel assembly>

■ Removing the tuner board

(See Fig.21 and 22)

- Prior to performing the following procedure, remove the metal cover.
- Remove the two plastic rivets attaching the joint board, and remove the joint board.
 - Disconnect the card wire from connector CN1 on the tuner board.
 - Remove the two screws **S** attaching the tuner board on the back of the body.

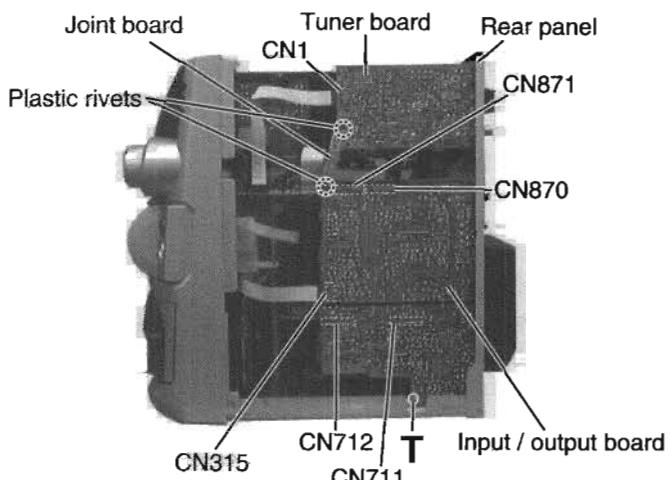

Fig.21

■ Removing the input / output board

(See Fig.21 and 22)

- Prior to performing the following procedure, remove the metal cover.
- Remove the two plastic rivets attaching the joint board, and remove the joint board.
 - Disconnect the card wire from connector CN315 on the input / output board.
 - Remove the screw **T** attaching the input / output board on the lower right side of the body.
 - Remove the screw **E** attaching the AUX terminal board on the back of the body.
 - Remove the screw **E'** attaching the digital output terminal. (Only Ver. A)
 - Disconnect connector CN870, CN871, CN711 and CN712 on the input / output board by pulling out them outward. Remove the input / output board from the body.

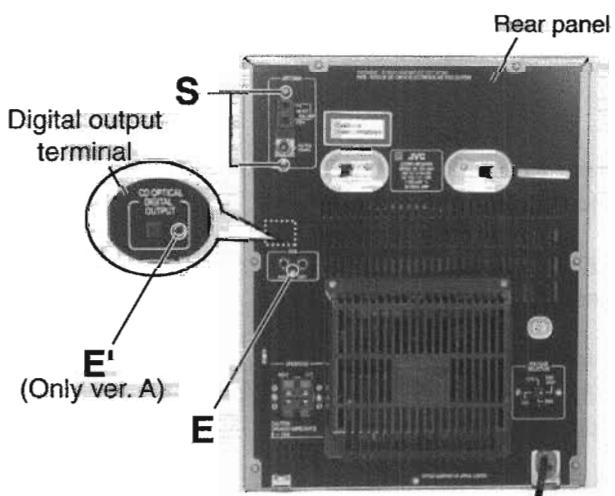

Fig.22

■ Removing the rear cover / rear panel (See Fig.23 to 26)

- Prior to performing the following procedure, remove the metal cover and the CD changer mechanism assembly.

※ There is no need to remove the front panel assembly.

- Remove the two screws **U** attaching the rear cover on the back of the body.
- Remove the screw **E** attaching the AUX terminal board and the rear panel on the back of the body.
- Remove the screw **E'** attaching the digital output terminal. (Only Ver. A)
- Remove the seven screws **V** attaching the heat sink and the preamplifier board to the rear panel on the back of the body.
- Remove the two screws **W** attaching the voltage selector on the back at the body.
- Remove the screw **X** attaching the rear panel to the base chassis on the back of the body.
- Release the two joints **i** and **j** on the rear panel bottom using a screwdriver, and detach the rear panel backward.
- Remove the tuner board in case of necessity (Refer to Fig.21 and 22).

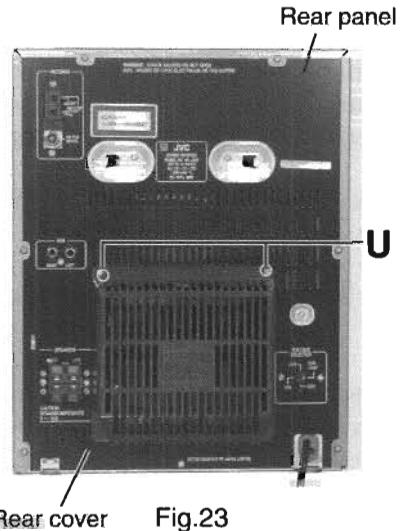

Fig.23

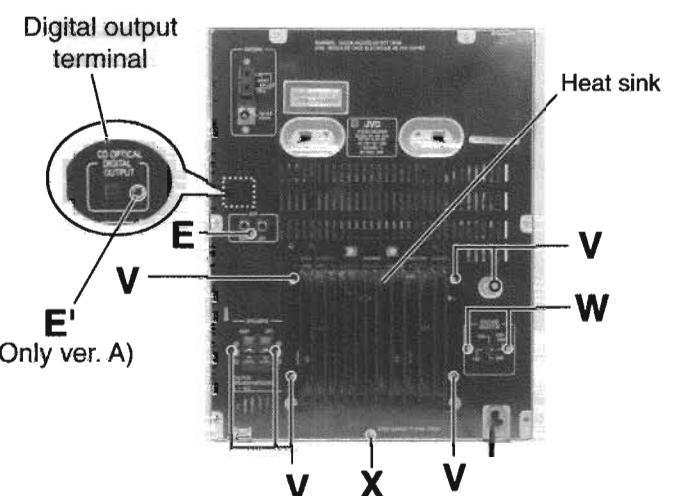

Fig.24

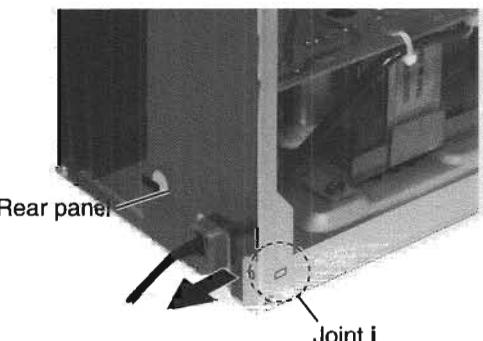

Fig.25

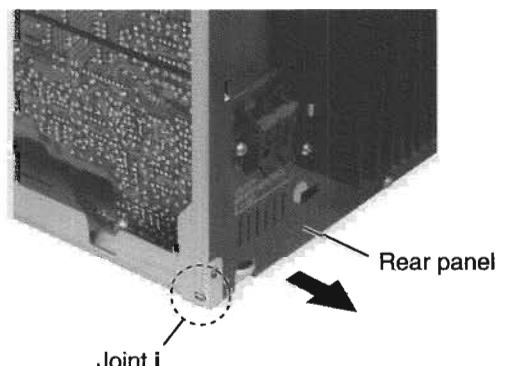

Fig.26

■ Removing the pre-amplifier board / heat sink (See Fig.27 to 29)

- Prior to performing the following procedure, remove the metal cover, the CD changer mechanism assembly and the rear cover / rear panel.

※ There is no need to remove the front panel assembly.

1. Remove the input / output board (Refer to Fig.21 and 22).
2. Disconnect the harness from connector CN901 on the relay board on the back of the rolling panel assembly.
3. Disconnect the harness from connector CN713 on the pre-amplifier board.
4. Remove the two screws **Y** attaching the heat sink to the power & main amplifier board on the back of the body.
5. Remove the two screws **Z** attaching the amplifier board to the heat sink and detach them with the heat sink bracket.

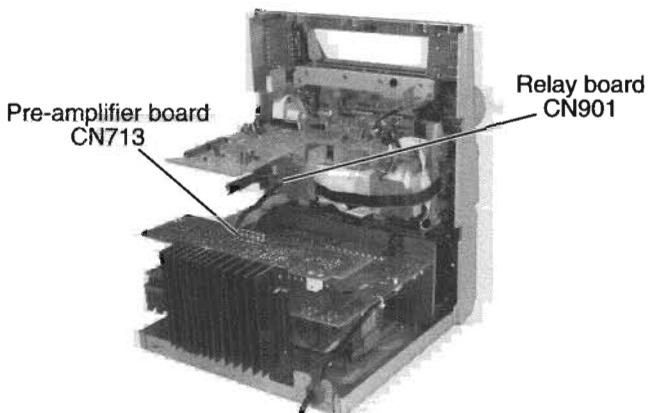

Fig.27

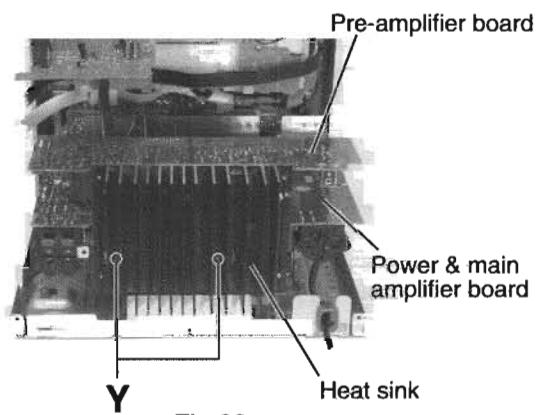

Fig.28

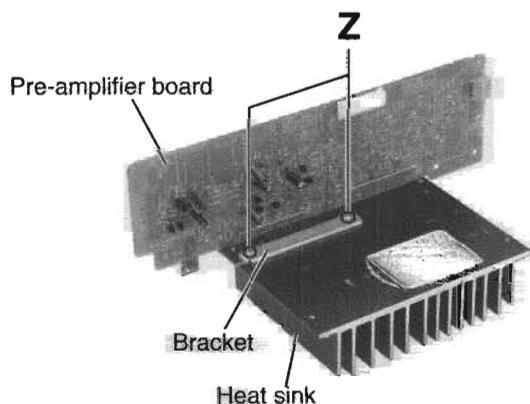

Fig.29

■Removing the power & main amplifier board (See Fig.30 and 31)

- Prior to performing the following procedure, remove the metal cover, the CD changer mechanism assembly, the rear cover / rear panel, the input & output board / pre-amplifier board.

- Remove the four screws **A** attaching the transf. on the power & main amplifier board through the upper side slots.
- Remove the two plastic rivets fixing the power & main amplifier board.
- Remove the cord stopper by pushing it upward.
- Cut off the bands **k** and **l** fixing the power cord and unsolder the soldered part on the power & main amplifier board.

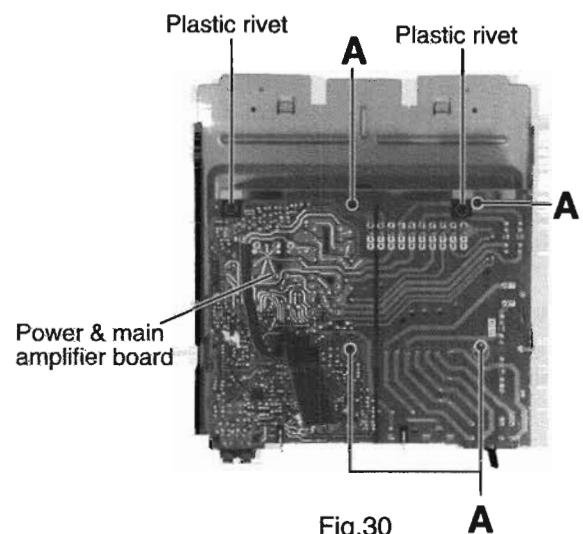

Fig.30

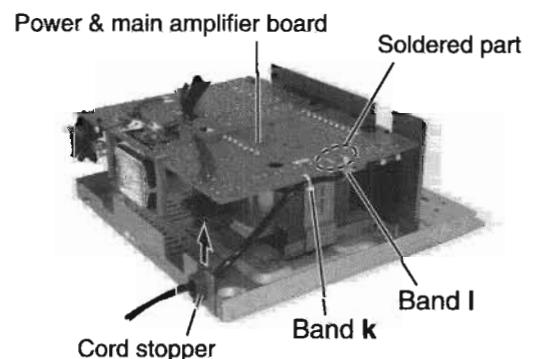

Fig.31

<Loading panel assembly>

■ Removing the multi-control assembly (See Fig.32 to 34)

- Prior to performing the following procedure, remove the loading panel assembly.

 - Remove the two screws **B** attaching the multi-control assembly on both sides.
 - Remove the multi-control assembly outward while pushing the right and left hooks fixing multi-control assembly outward.

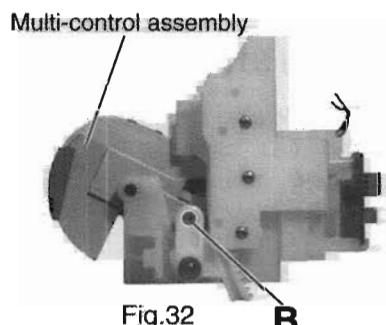

Fig.32

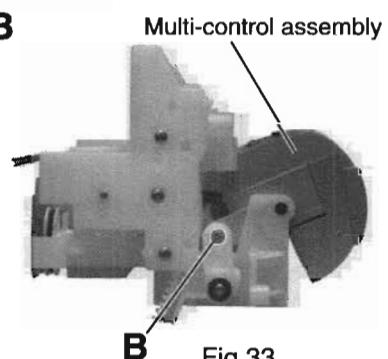

Fig.33

■ Removing the multi-control board (See Fig.35 to 37)

- Prior to performing the following procedure, remove the loading panel assembly and the multi-control assembly.

 - Remove the four screws **C** attaching the cover and the bracket.
 - Pull out the right and left panel holders outward by releasing the tabs **m** outward.
 - Remove the cover and the bracket.
 - Remove the four screws **D** attaching the multi-control board.

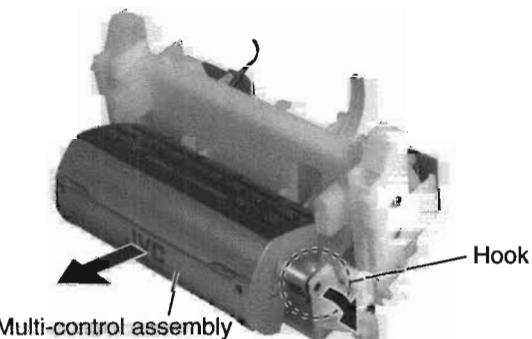

Fig.34

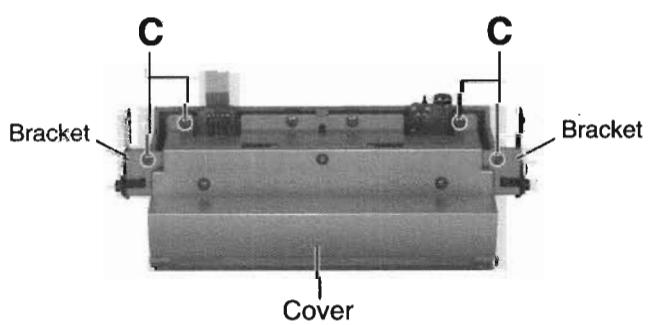

Fig.35

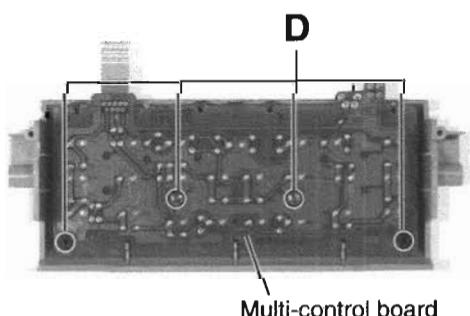

Fig.37

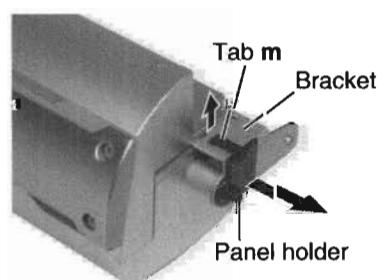

Fig.36

■ Removing the drive motor assembly (See Fig.38 to 40)

- Prior to performing the following procedure, remove the loading panel assembly and the multicontrol assembly.

- Remove the relay board / fixing board (Refer to Fig.20).
- Remove the two screws **E** attaching the motor bracket and remove the motor lead staple **n**.
- Remove the two screws **F** attaching the shaft bracket.
- Remove the motor belt.
- Remove the shaft assembly upward while pulling the keep plates **o** on both sides of the shaft assembly outward.
- Remove the drive motor upward.

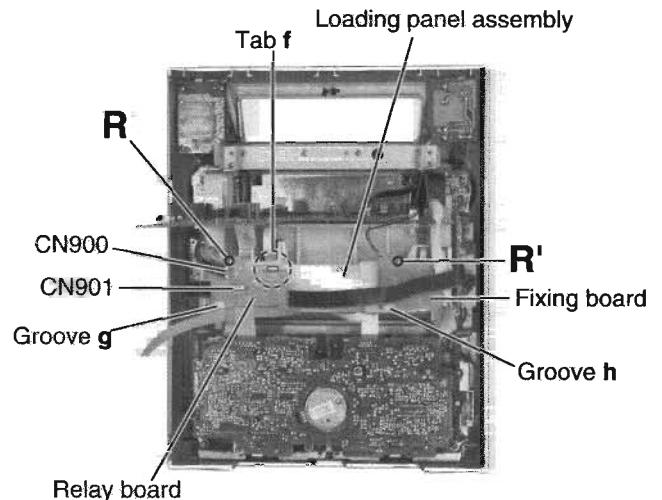

Fig.20

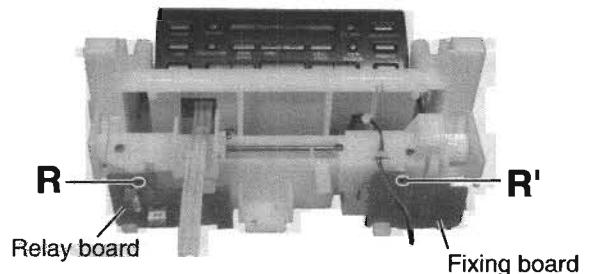

Fig.38

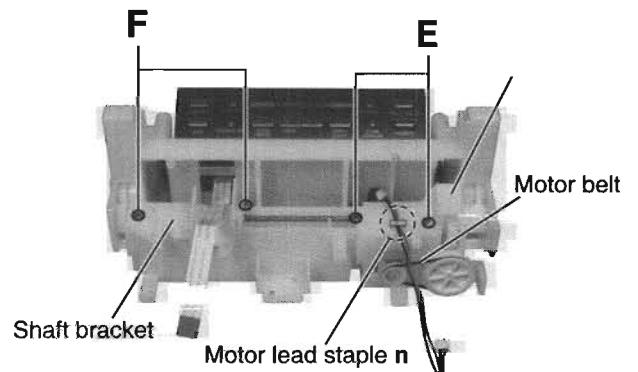

Fig.39

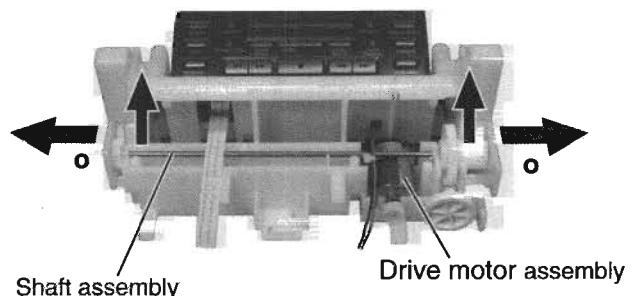

Fig.40

<<CD Changer Mechanism Type:VC3 Section>>

**■ Removing the CD Servo control board
(See Fig.1)**

1. Remove the metal cover.
2. Remove the CD changer mechanism assembly.
3. From bottom side the CD changer mechanism assembly, remove the two screws **A** retaining the CD servo control board.
4. Absorb the four soldered positions "a" of the right and left motors with a soldering absorber.
5. Pull out the earth wire on the CD changer mechanism assembly.
6. The two screws **B** is removed and C.B.holder is detached.
7. Disconnect the connector CN854 on the CD servo control board.
8. Disconnect the card wire CN601 and the connector CN801 on the CD servo control board.

**■ Removing the CD tray assembly
(See Fig.2~4)**

1. Remove the front panel assembly.
2. Remove the CD changer mechanism assembly.
3. Remove the CD Servo control board.
4. Remove the screw **C** retaining the lod stopper.
5. From the T.bracket section "b" and clamper base section "c", remove both of the edges fixing the rod(See Fig.2 and 3).
6. Remove the screw **D** retaining the disc stopper
(See Fig.3).
7. Remove the three screws **E** retaining the T.bracket
(See Fig.3).
8. Remove the screw **F** retaining the clamper assembly
(See Fig.3).
9. From the left side face of the chassis assembly, remove the one screw **G** retaining both of the return spring and lock lever(See Fig.4).
10. By removing the pawl at the section "d" fixing the return spring, dismount the return spring(See Fig.4).
11. Remove the three lock levers(See Fig.4).

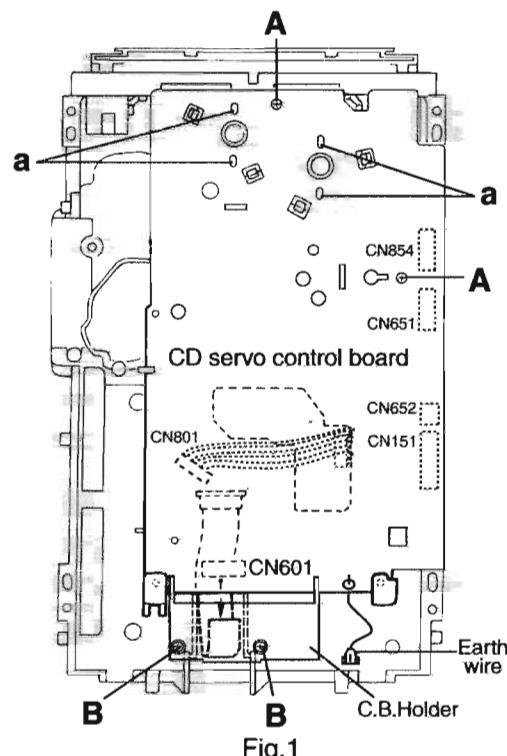

Fig.1

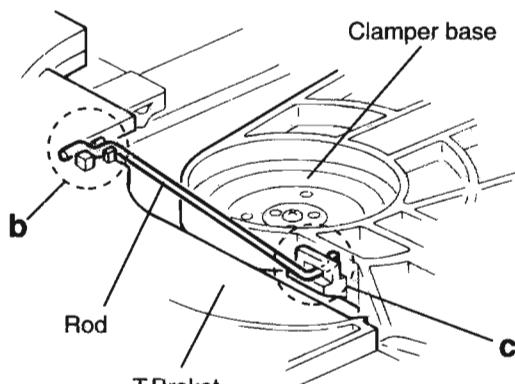

Fig.2

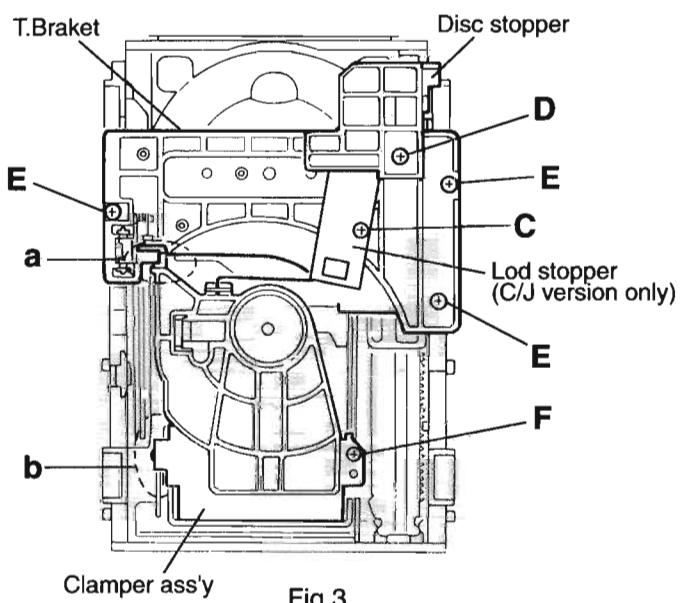

Fig.3

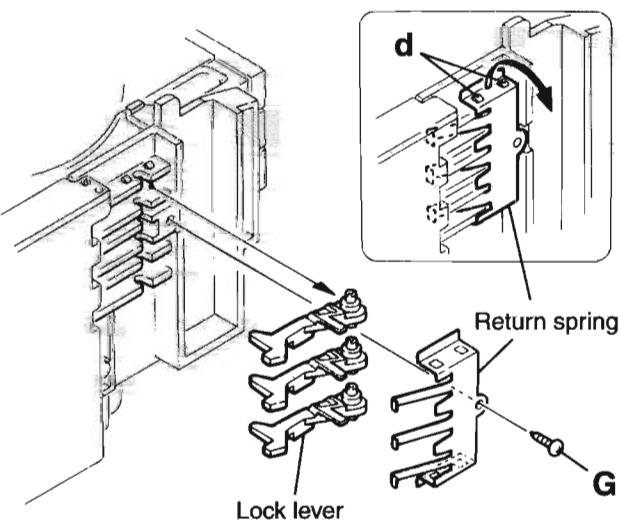

Fig.4

11. Check whether the lifter unit stopper has been caught into the hole at the section "e" of CD tray assembly as shown in Fig.5.
 12. Make sure that the driver unit elevator is positioned as shown in Fig.6 from to the second or fifth hole on the left side face of the CD changer mechanism assembly.
- [Caution]** In case the driver unit elevator is not at above position, set the elevator to the position as shown in Fig.7 by manually turning the pulley gear as shown in Fig.8.
13. Manually turn the motor pulley in the clockwise direction until the lifter unit stopper is lowered from the section "e" of CD tray assembly(See Fig.8).
 14. Pull out all of the three stages of CD tray assembly in the arrow direction "f" until these stages stop (See Fig.6).
 15. At the position where the CD tray assembly has stopped, pull out the CD tray assembly while pressing the two pawls "g and g'" on the back side of CD tray assembly(See Fig.9). In this case, it is easy to pull out the assembly when it is pulled out first from the stage CD tray assembly.

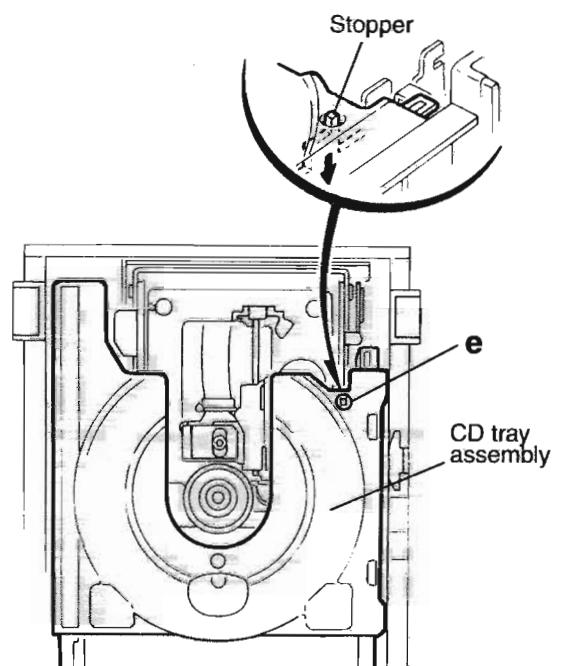

Fig.5

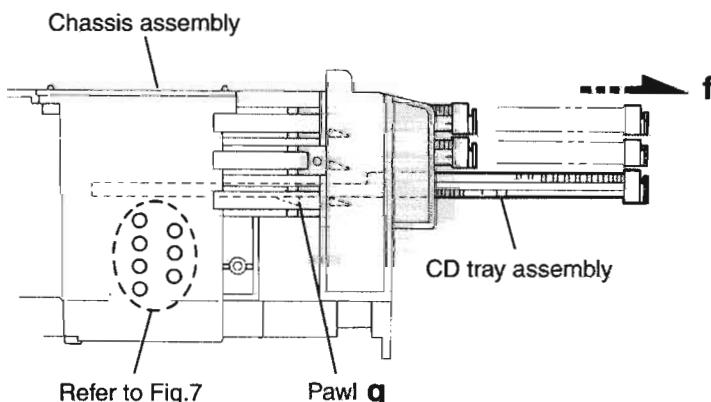

Fig.6

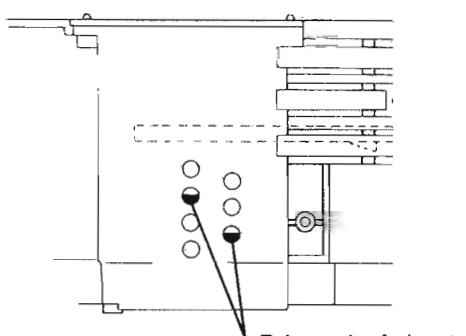

Fig.7

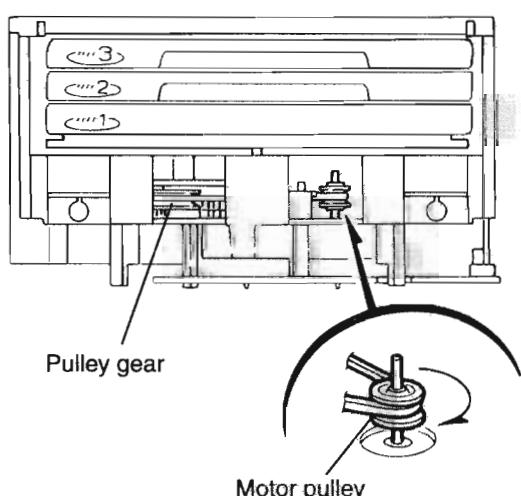

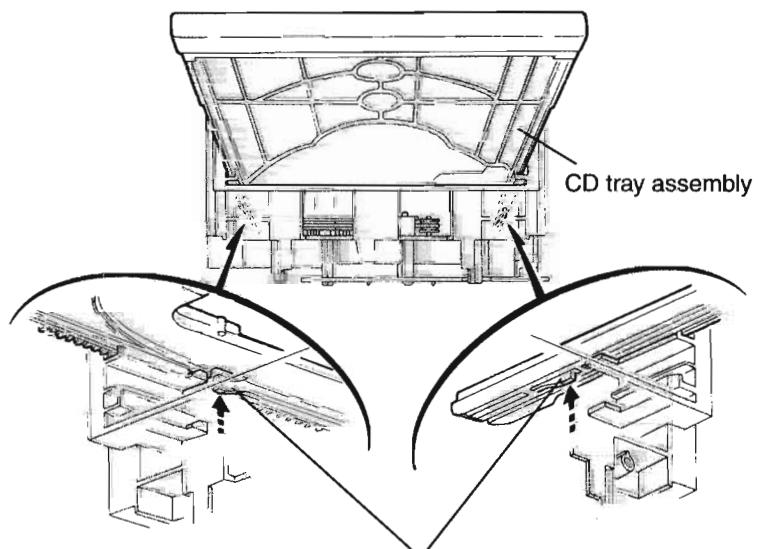

Fig.8

Pawl g, g'
Fig.9

■ Removing the CD loading mechanism assembly(See Fig.10)

1. While turning the cams R1 and R2 assembly in the arrow direction "h", align the shaft "i" of the CD loading mechanism assembly to the position shown in Fig.10.
2. Remove the four screws **H** retaining the CD loading mechanism assembly.

■ Removing the CD traverse mechanism (See Fig.11 and 12)

1. For dismounting only the CD traverse mechanism without removing the CD loading mechanism assembly, align the shaft "j" of the CD loading mechanism assembly to the position shown Fig.11 while turning the cam R1 and R2 assembly in the arrow direction "k".
2. By raising the CD loading mechanism assembly in the arrow direction "l", remove the assembly from the lifter unit

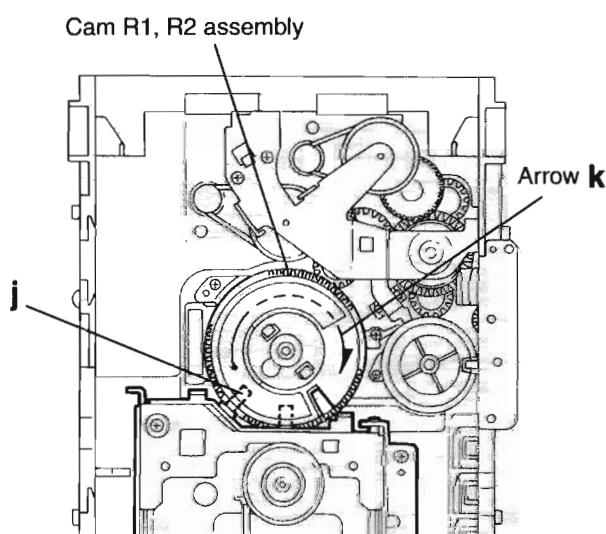

Fig.11

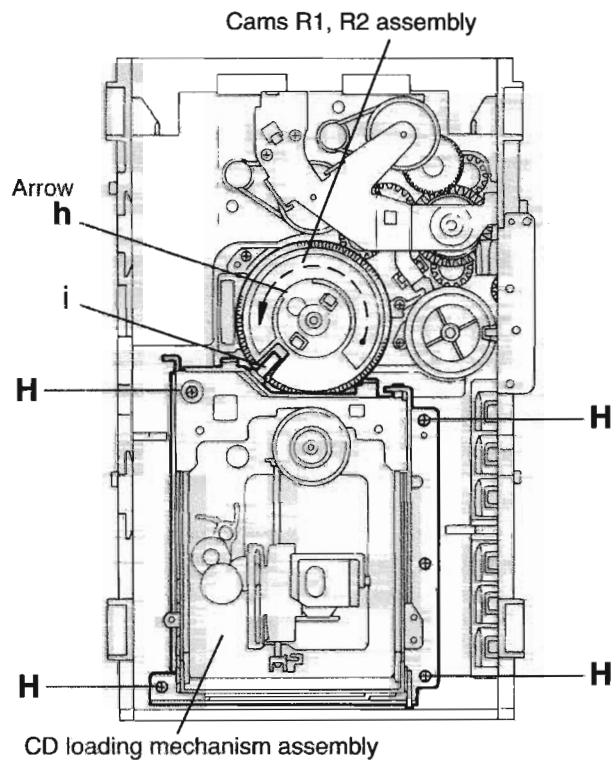

Fig.10

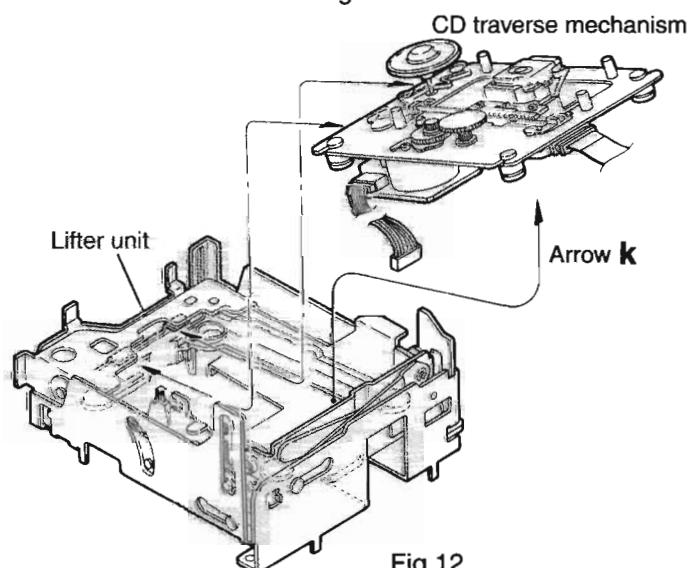

Fig.12

■ Removing the CD pick unit (See Fig.13)

1. Move the cam gear in the arrow direction "m". Then, the CD pickup unit will be moved in the arrow direction "n".
2. According to the above step, shift the CD pickup unit to the center position.
3. While pressing the stopper retaining the shaft in the arrow direction "o", pull out the shaft in the arrow direction "p".
4. After dismounting the shaft from the CD pickup unit, remove the CD pickup unit

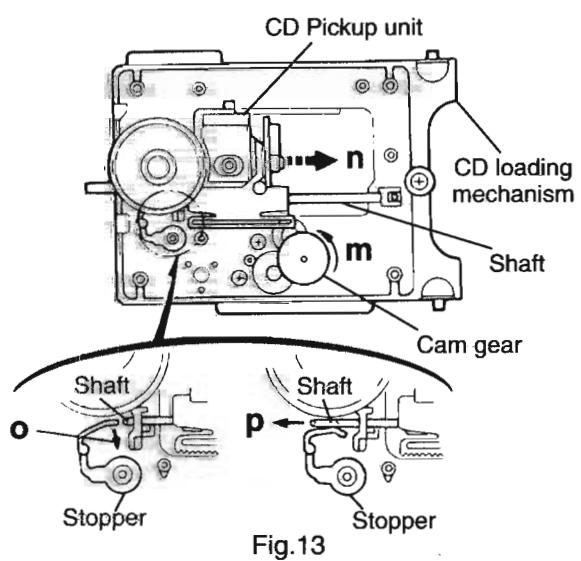

Fig.13

■ Removing the cam unit

(See Fig.14 ~17)

1. Remove the CD loading mechanism assembly.
2. While turning the cam gear "q", align the pawl "r" position of the drive unit to the notch position(Fig.16) on the cam gear "q".
3. Pull out the drive unit and cylinder gear(See Fig.17).
4. While turning the cam gear "q", align the pawl "s" position of the select lever to the notch position(Fig.18) on the cam gear "q".
5. Remove the four screws **J** retaining the cam unit(cam gear "q" and cams R1/R2 assembly)(See Fig.18).

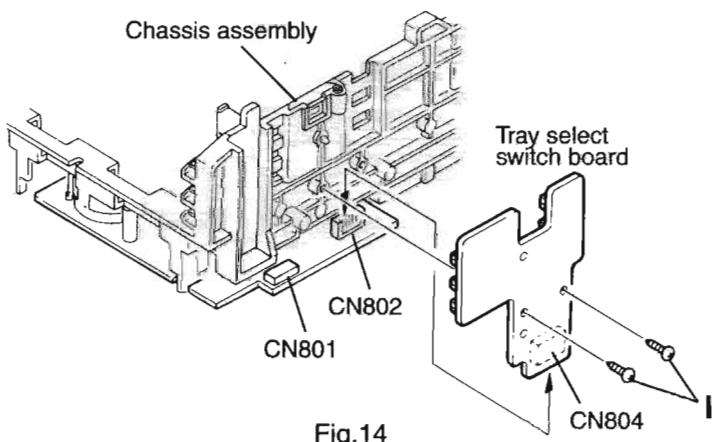

Fig.14

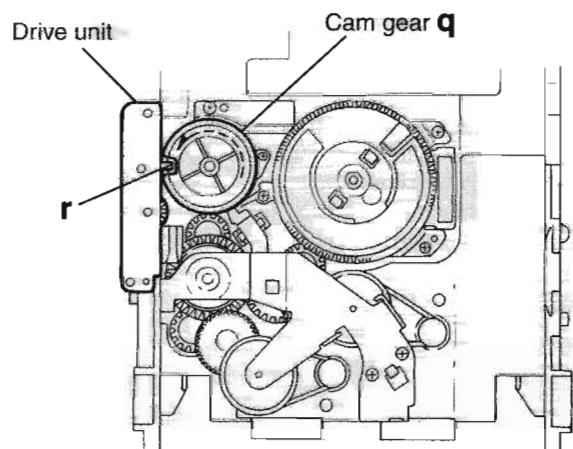

Fig.15

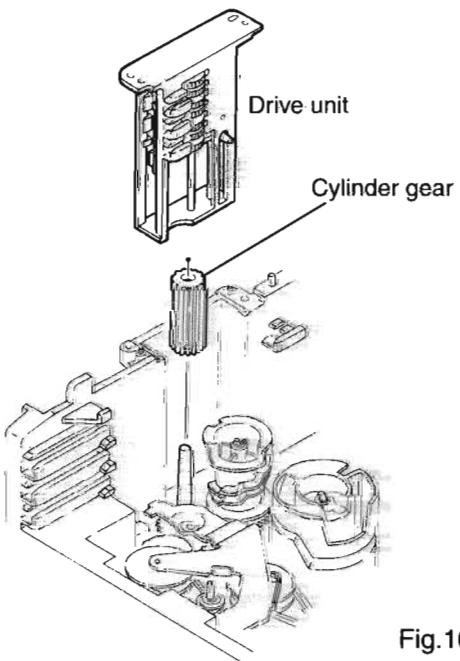

Fig.16

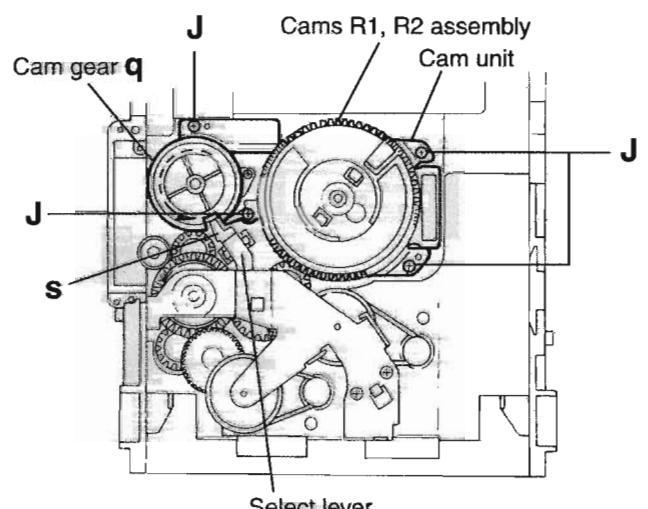

Fig.17

■ Removing the actuator motor and belt (See Fig.18~21)

1. Remove the two screws **K** retaining the gear bracket
(See Fig.19).
2. While pressing the pawl "t" fixing the gear bracket in the arrow direction, remove the gear bracket
(See Fig.19).
3. From the notch "u section" on the chassis assembly
fixing the edge of gear bracket, remove and take out the
gear bracket(See Fig. 20).
4. Remove the belts respectively from the right and left
actuator motor pulleys and pulley gears(See Fig. 19).
5. After turning over the chassis assembly, remove the
actuator motor while spreading the four pawls "v"
fixing the right and left actuator motors in the arrow
direction(See Fig. 21).

[Note] When the chassis assembly is turned over under the conditions wherein the gear bracket and belt have been removed, then the pulley gear as well as the gear, etc. constituting the gear unit can possibly be separated to pieces. In such a case, assemble these parts by referring to the assembly and configuration diagram in Fig. 22.

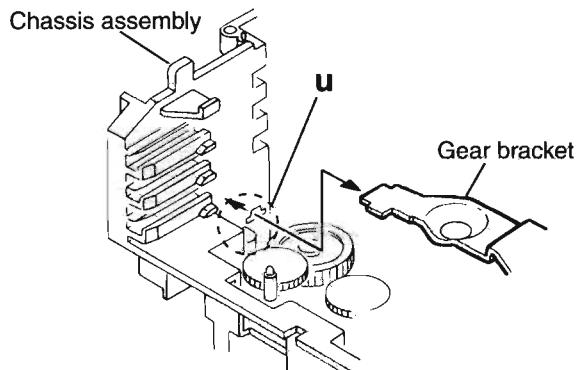

Fig.19

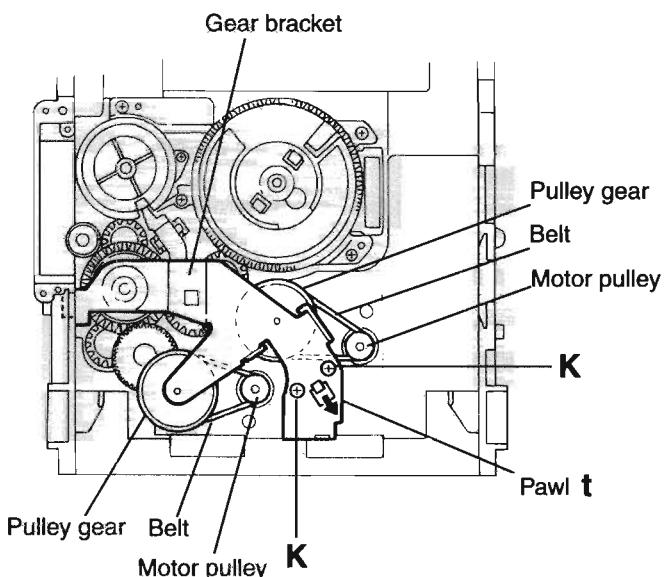

Fig.18

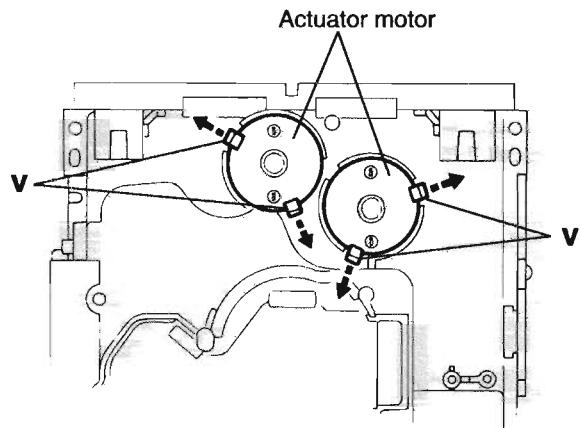

Fig.20

Assembly and Configuration Diagram

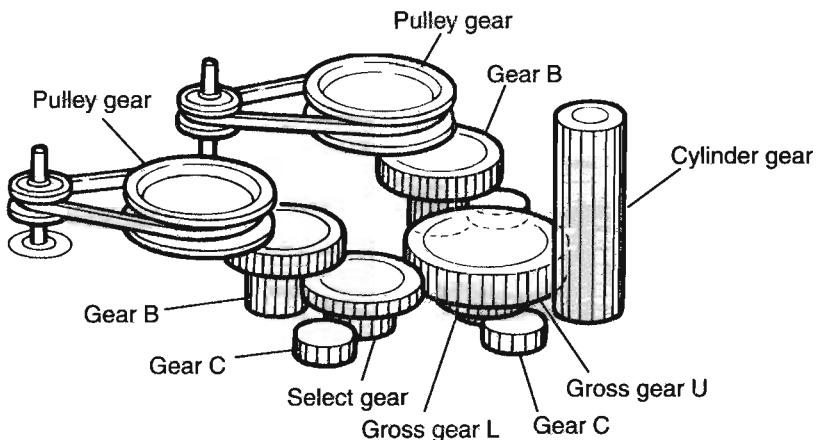

Fig.21

■ Removing the cams R1/R2 assembly and cam gear q(See Fig.22)

1. Remove the slit washer fixing the cams R1 and R2 assembly.
2. By removing the two pawls "w" fixing the cam R1, separate R2 from R1.
3. Remove the slit washer fixing the cam gear "q".
4. Pull out the cam gear "q" from the C.G. base assembly.

■ Removing the C.G. base assembly (See Fig.22 and 23)

Remove the three screws **L** retaining the C.G. base assembly.

[Caution] To reassemble the cylinder gear, etc. with the cam unit (cam gear and cans R1/R2 assembly), gear unit and drive unit, align the position of the pawl "x" on the drive unit to that of the notch on the cam gear "q". Then, make sure that the gear unit is engaged by turning the cam gear "q" (See Fig. 24).

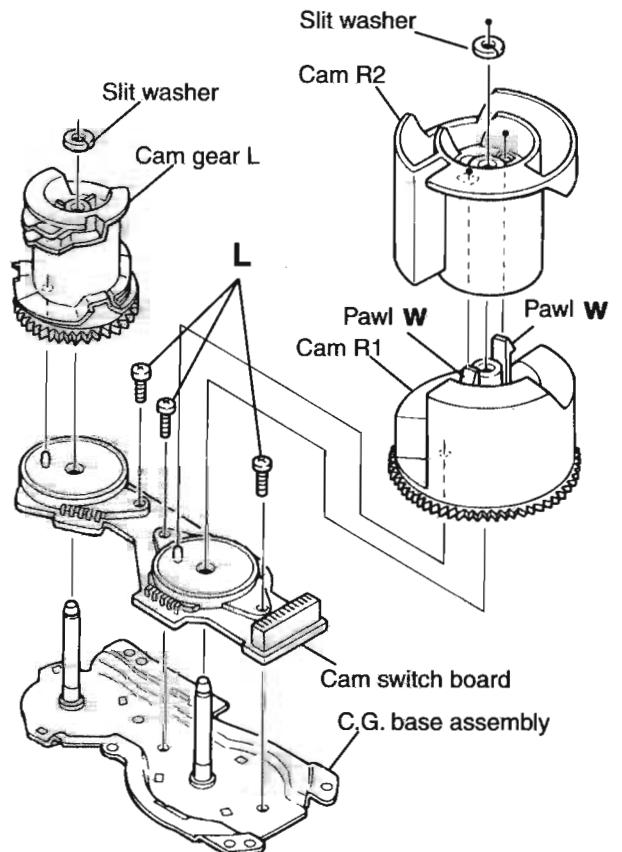

Fig.22

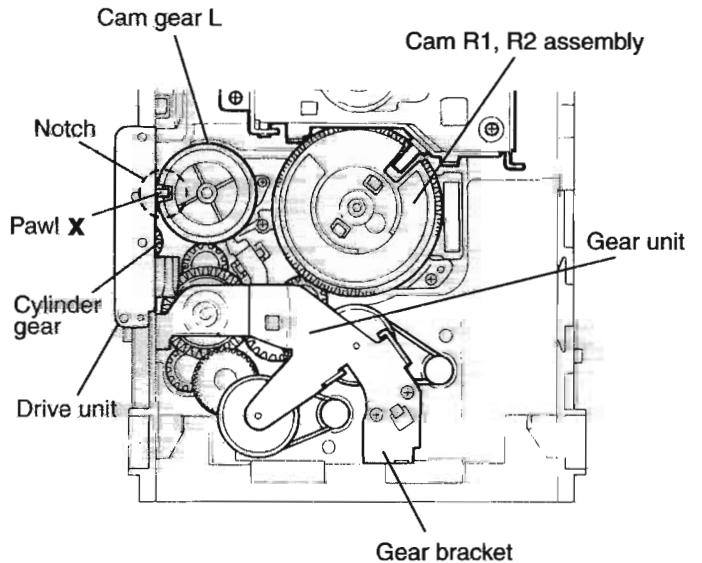

Fig.23

< Cassette mechanism section >

■ Removing the playback, recording and eraser heads (See Fig.1~3)

1. While shifting the trigger arms seen on the right side of the head mount in the arrow direction, turn the flywheel R in counterclockwise direction until the head mount has gone out with a click (See Fig. 1).
2. When the flywheel R is rotated in counterclockwise direction, the playback head will be turned in counterclockwise direction from the position in Fig.2 to that in Fig.3.
3. At this position, disconnect the flexible P.C.board (outgoing from the playback head) from the connector CN301 on the head amp. and mechanism control P.C. board.
4. After dismounting the FPC holder, remove the flexible P.C.board.
5. Remove the flexible P.C.board from the chassis base.
6. Remove the spring "a" from behind the playback head.
7. Loosen the reversing azimuth screw retaining the playback head.
8. Take out the playback head from the front of the head mount.
9. The recording and eraser heads should also be removed similarly according to Steps 1~8 above.

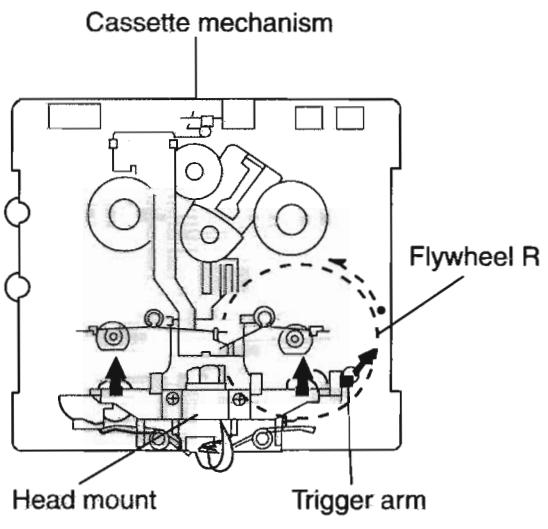

Fig.1 (Mechanism A side)

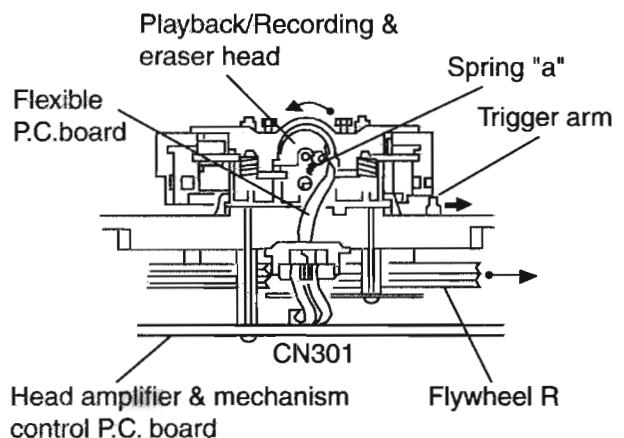

Fig.2 (Mechanism A side)

● Reassembling the playback, recording and eraser heads (See Fig.2,3)

1. Reassemble the playback head from the front of the head mount to the position as shown in Fig.3.
2. Fix the reversing azimuth screw.
3. Set the spring a from behind the playback head.
4. Attach the flexible P.C.board to the chassis base, and fix it with the FPC holder as shown in Fig.3.
5. The recording and eraser heads should also be reassembled similarly according to Steps 1~4 above.

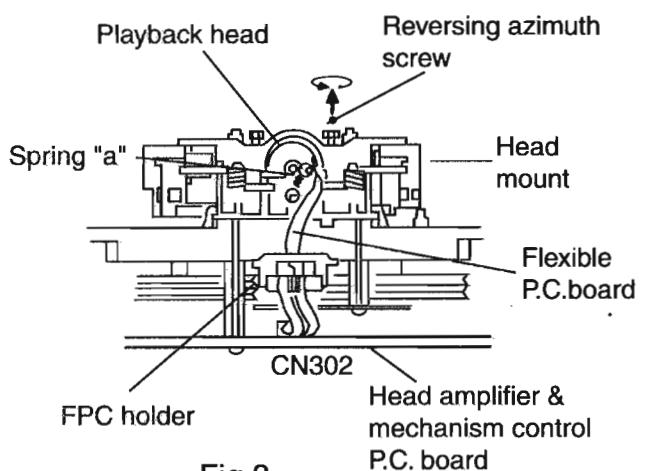

Fig.3 (Mechanism B side)

■ Removing the head amp.and mechanism control P.C.board (See Fig. 4)

1. Remove the cassette mechanism assembly.
2. After turning over the cassette mechanism assembly, remove the five screws "A" retaining the head amp. and mechanism control P.C. board
3. Disconnect the connectors CN303 and CN304 on the P.C. Board and the connectors CN1 on both the right and left side reel pulse P.C. Boards.
4. When necessary, remove the 4pin parallel wire soldered to the main motor

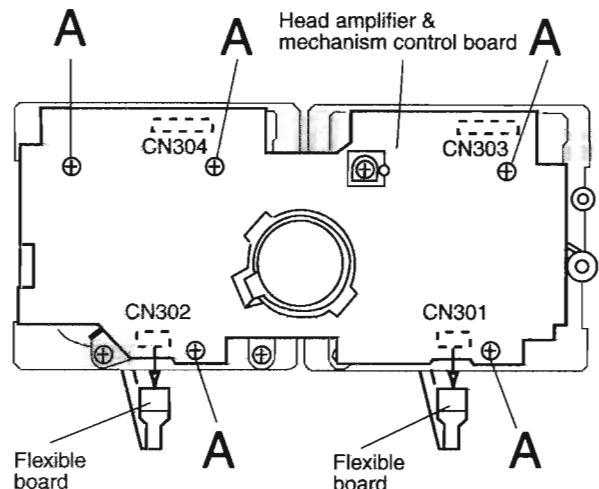

Fig.4

■ Removing the capstan motor assembly

1. Remove the six screws "B" retaining capstan motor assembly (See Fig. 5).
2. While raising the capstan motor, remove the capstan belts A and B respectively from the motor pulley (See Fig. 6).

Caution 1: Be sure to handle the capstan belts so carefully that these belts will not be stained by grease and other foreign matter. Moreover, these belts should be hand while referring to the capstan belt hanging method.

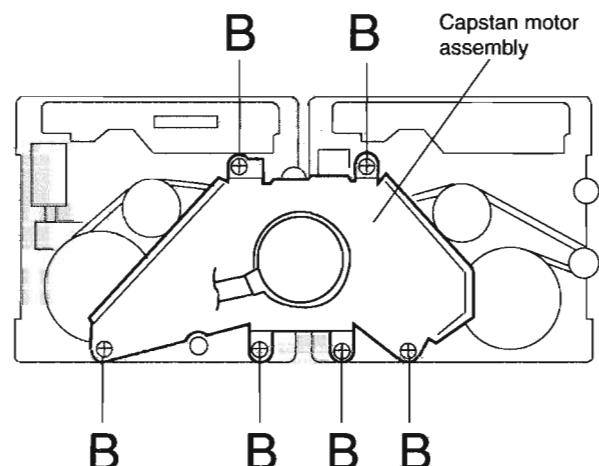

Fig.5

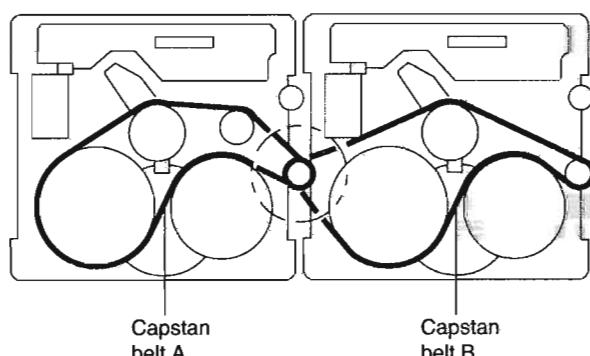

Fig.7

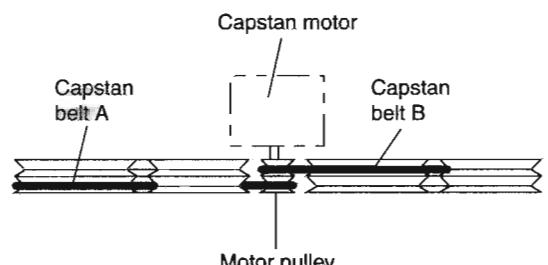

Fig.6

■ Removing the capstan motor (See Fig. 8)

From the joint bracket, remove the two screws "C" retaining the capstan motor.

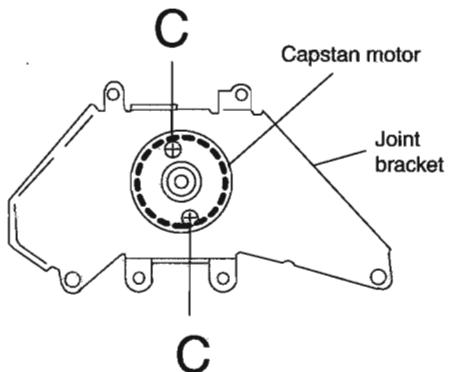

Fig.8

■ Removing the flywheel (See Fig. 9,10)

1. Remove the head amp. and mechanism control P.C.Board.
2. Remove the capstan motor assembly.
3. After turning over the cassette mechanism, remove the slit washers "a" and "b" fixing the capstan shafts R and L, and pull out the flywheels R and L respectively from behind the cassette mechanism.

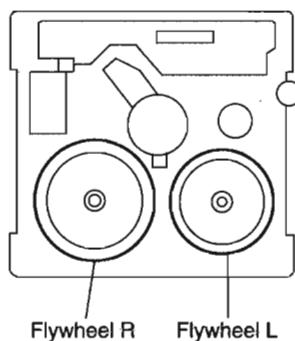

Fig.10

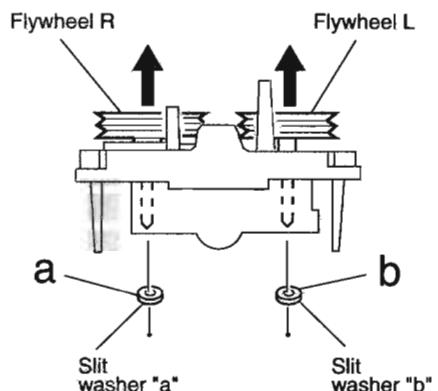

Fig.9

■ Removing the reel pulse P.C.board and solenoid (See Fig. 11)

1. Remove the five pawls (c,d,e,f,g) retaining the reel pulse P.C.Board.
2. From the surface of the reel pulse P.C.Board parts, remove the two pawls "h" and "i" retaining the solenoid.

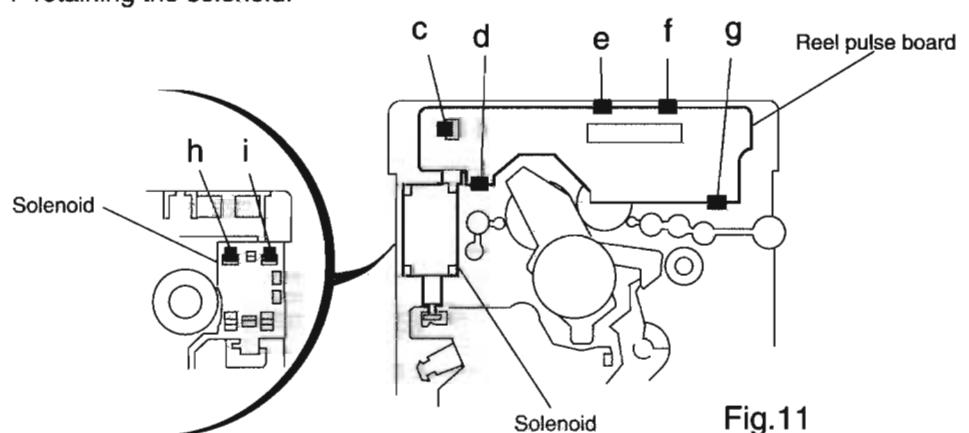

Fig.11

Adjustment method

Measurement instruments required for adjustment

1. Low frequency oscillator,
This oscillator should have a capacity to output 0dBs to 600ohm at an oscillation frequency of 50Hz-20kHz.
2. Attenuator impedance : 600ohm
3. Electronic voltmeter
4. Frequency counter
5. Wow flutter meter
6. Test tape
VTT712 : For Tape speed and wow flutter (3kHz)
VTT724 : For Reference level (1kHz)
TMT7036 : For Head angle(10kHz),Play back frequency characteristics(1kHz),and dubbing frequency characteristics(63,1,10kHz)
Because of frequency-mixed tape with 63,1k,10k and 14kHz(250nWb/m -24dB).
Use this tape together with a filter.
7. Blank tape
TAPE I: AC-225, TAPE II: AC-514
8. Torque gauge : For play and back tension
Forward ; TW2111A, Reverse ; TW2121A
Fast Forward and Rewind ; TW2231A
9. Test disc
: CTS-1000(12cm),GRG-1211(8cm)
10. Jitter meter

Measurement conditions

Power supply voltage
AC220V(50Hz) :UP model
AC240V(50Hz) : A model
AC110V/127V/220V/230~240V(50Hz/60Hz):
U, US, UX, UY, UT model

Measurement
output terminal : Speaker out
:TP101(Mesuring for TUNER/DECK/CD)
:Dummy load 6ohm

Radio input signal

AM modulation frequency : 400Hz
Modulation factor : 30%
FM modulation frequency : 400Hz
Frequency displacement : 22.5kHz

Frequency Range

AM	531kHz~1710kHz	except UX, A
	531kHz~1602kHz	only UX
	522kHz~1629kHz	only A
FM	87.5MHz~108MHz	

Standard measurement positions of volume and switch

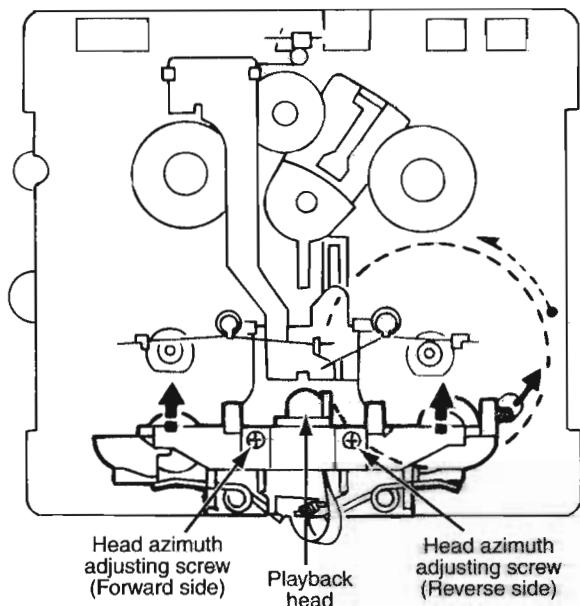

Power : Standby (Light STANDBY Indicator)
S,A,BASS : OFF
Sound mode : OFF
Main VOL. : 0 Minimum
Traverse mecha set position : Disc 1
MIC MIX VOL : MAX
ECHO : OFF

Precautions for measurement

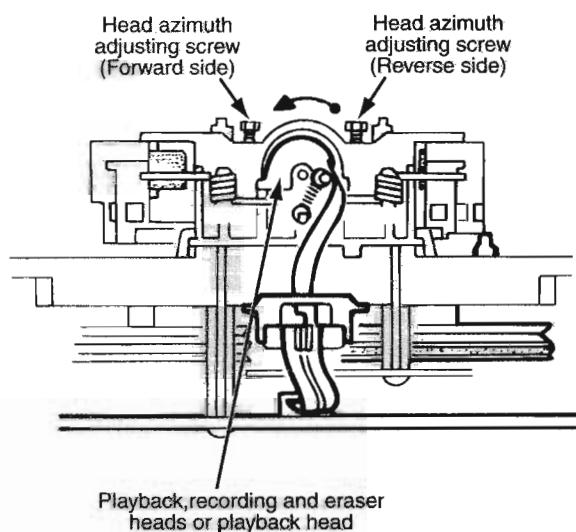

1. Apply 30pF and 33kohm to the IF sweeper output side and 0.082μF and 100kohm in series to the sweeper input side.
2. The IF sweeper output level should be made as low as possible within the adjustable range.
3. Since the IF sweeper is a fixed device, there is no need to adjust this sweeper.
4. Since a ceramic oscillator is used, there is no need to perform any MPX adjustment.
5. Since a fixed coil is used, there is no need to adjust the FM tracking.
6. The input and output earth systems are separated.
In case of simultaneously measuring the voltage in both of the input and output systems with an electronic voltmeter for two channels, therefore, the earth should be connected particularly.
7. In the case of BTL connection amplifier, the minus terminal of speaker is not for earthing. Therefore, be sure not to connect any other earth terminal to this terminal. This system is of an OTL system.

■ Arrangement of adjusting positions

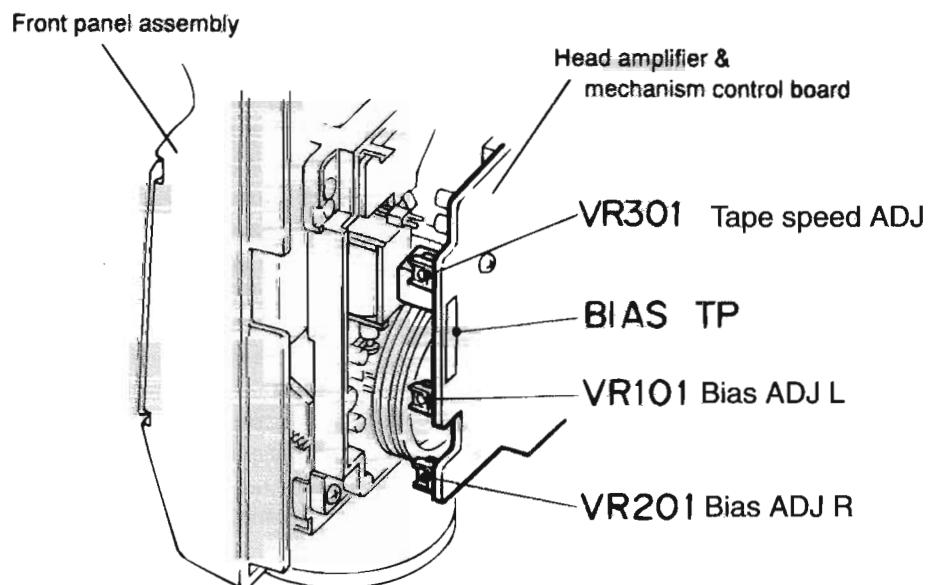

Cassette mechanism section (Mechanism A section)

Cassette mechanism section (Back side)

Cassette Mechanism Unit Section

■ Tape recorder section

Items	Measurement conditions	Measurement method	Standard values	Adjusting positions
Confirmation of head angle	Test tape :TMT7036(10kHz) Measurement output terminal :Speaker terminal Speaker R (Load resistor:3Ω) :Headphone terminal	1.Playback the test tape TMT7036(10kHz). 2.With the playback mechanism or recording & playback mechanism, adjust the head azimuth screw so that the forward and reverse output levels become maximum. After adjustment, lock the head azimuth at least by half a turn. 3.In either case, this adjustment should be performed in both the forward and reverse directions with the head azimuth screw.	Maximum output	Adjust the head azimuth screw only when the head has been changed.
Confirmation of tape speed	Test tape :VTT712(3kHz) or TMT7036(3kHz) Measurement output terminal :Headphone terminal	<Constant speed> Adjust VR301 so that the frequency counter reading becomes 3,000Hz±60Hz when playing back the test tape VTT712(3kHz) with the playback mechanism or playback and recording mechanism after ending forward winding of the tape.	Tape speed of decks (A and B) :3,000Hz ±60Hz	VR301

■ Reference values for confirmation items

Items	Measurement conditions	Measurement method	Standard values	Adjusting positions
Double tape speed	Test tape :TMT7036(10kHz) Measurement output terminal :Speaker terminal Speaker R (Load resistance:3Ω) measurement output terminal :Headphone terminal	After setting to the double speed motor, confirm that the frequency counter reading becomes 4,800+400/-300Hz when the test tape VTT712 (3kHz) has been play back with the playback mechanism.	4,800+400/-300Hz	Playback mechanism side
Difference between the forward and reverse speed. P.mecha and R/P mecha speed		When the test tape VTT712(3kHz) has been played back with the playback mechanism or recording and playback mechanism at the beginning of forward winding, the frequency counter reading of the difference between both of the mechanisms should be 6.0Hz or less.	60Hz or less	Both the playback and recording & playback mechanism
Wow & flutter	Test tape :TMT7036(10kHz) Measurement output terminal :Headphone terminal	When the test tape VTT712(3kHz) has been played back with the playback mechanism or recording and playback mechanism at the beginning of forward winding the frequency counter reading of wow & flutter should be 0.25% or less(WRMS).	within 0.25% JIS(WTD)	Both the playback and recording & playback mechanism

■ Electrical performance

Items	Measurement conditions	Measurement method	Standard values	Adjusting positions
Adjustment of recording bias current (Reference value)	*Mode : Forward or reverse mode *Recording mode *Test tape :AC-514 and AC-225 Measurement output terminal :Both recording and headphone terminals	1.With the recording and playback mechanism, load the test tapes(AC-514 to TYP II and AC-225 to TYP I),and set the mechanism to the recording and pausing conditions in advance. 2.After connecting 100Ω in series to the recorder head,measure the bias current with a valve voltmeter at both of the terminals. 3.After resetting the [PAUSE] mode,start recording. At this time,adjust VR101 for LcH and VR201 for RcH so that the recording bias current values become $4.0\mu A$ (TYP I) and $4.20\mu A$ (TYP II).	AC-225 : $4.20\mu A$ AC-514 : $4.0\mu A$	LcH :VR101 RcH :VR201
Adjustment of recording and playback frequency characteristics	Reference frequency :1kHz and 10kHz (REF:-20dB) Test tape :TYP II AC-514 Measurement input terminal :OSC IN	1.With the recording and playback mechanism,load the test tape(AC-514 to TYP II),and set the mechanism to the recording and pausing condition in advance. 2.While repetitively inputting the reference frequency signal of 1kHz and 10kHz from OSC IN, record and playback the test tape. 3.While recording and playing back the test tape in TYP II ,adjust VR101 for LcH and VR201 for RcH so that the output deviation between 1kHz and 10kHz becomes $-1dB\pm2dB$.	Output deviation between 1kHz and 10kHz : $-1dB\pm2dB$	LcH :VR101 RcH :VR201

■ Reference values for electrical function confirmation items

Items	Measurement conditions	Measurement method	Standard values	Adjusting positions
Recording bias frequency	*Recording and playback side forward or reverse *Test tape :TYP II AC-514 *Measurement terminal BIAS TP on P.C.board	1.While changing over to and from BIAS 1 and 2, confirm that the frequency is changed. 2.With the recording and playback mechanism. load the test tape (AC-514 to TYP II),and set the mechanism to the recording and pausing conditions in advance. 3.Confirm that the BIAS TP frequency on the P.C.board is $100kHz\pm6kHz$.	100kHz +9kHz -7kHz	
Eraser current (Reference value)	*Recording and playback side forward or reverse *Recording mode *Test tape :AC-514 and AC-225 Measurement terminal Both of the eraser head	1.With the recording and playback mechanism, load the test tapes(AC-514 to TYP II and AC-225 to TYP I),and set the mechanism to the recording and pausing condition in advance. 2.After setting to the recording conditions,connect $1M\Omega$ in series to the eraser head on the recording and playback mechanism side,and measure the eraser current from both of the eraser terminal.	TYP II : $120mA$ TYP I : $75mA$	

Diagnosis which uses extension wire method

System control P.C.board

1. Remove the metal cover and CD changer mechanism.
2. Remove the front panel assembly.
3. Once screw A is removed, and relay board is removed.
4. As shown in fig.1, place the front panel assembly after opening it outward using the right side of the front panel as an axis.
5. The extension wire is connected with CN870 & CN871 on the INPUT/OUTPUT board and CN860 & CN861 on the main board.

Extension wire parts No.

QUQ412-4020CJ	FLAT WIRE
JIG-MXJ500	CONNECTOR Board x 2

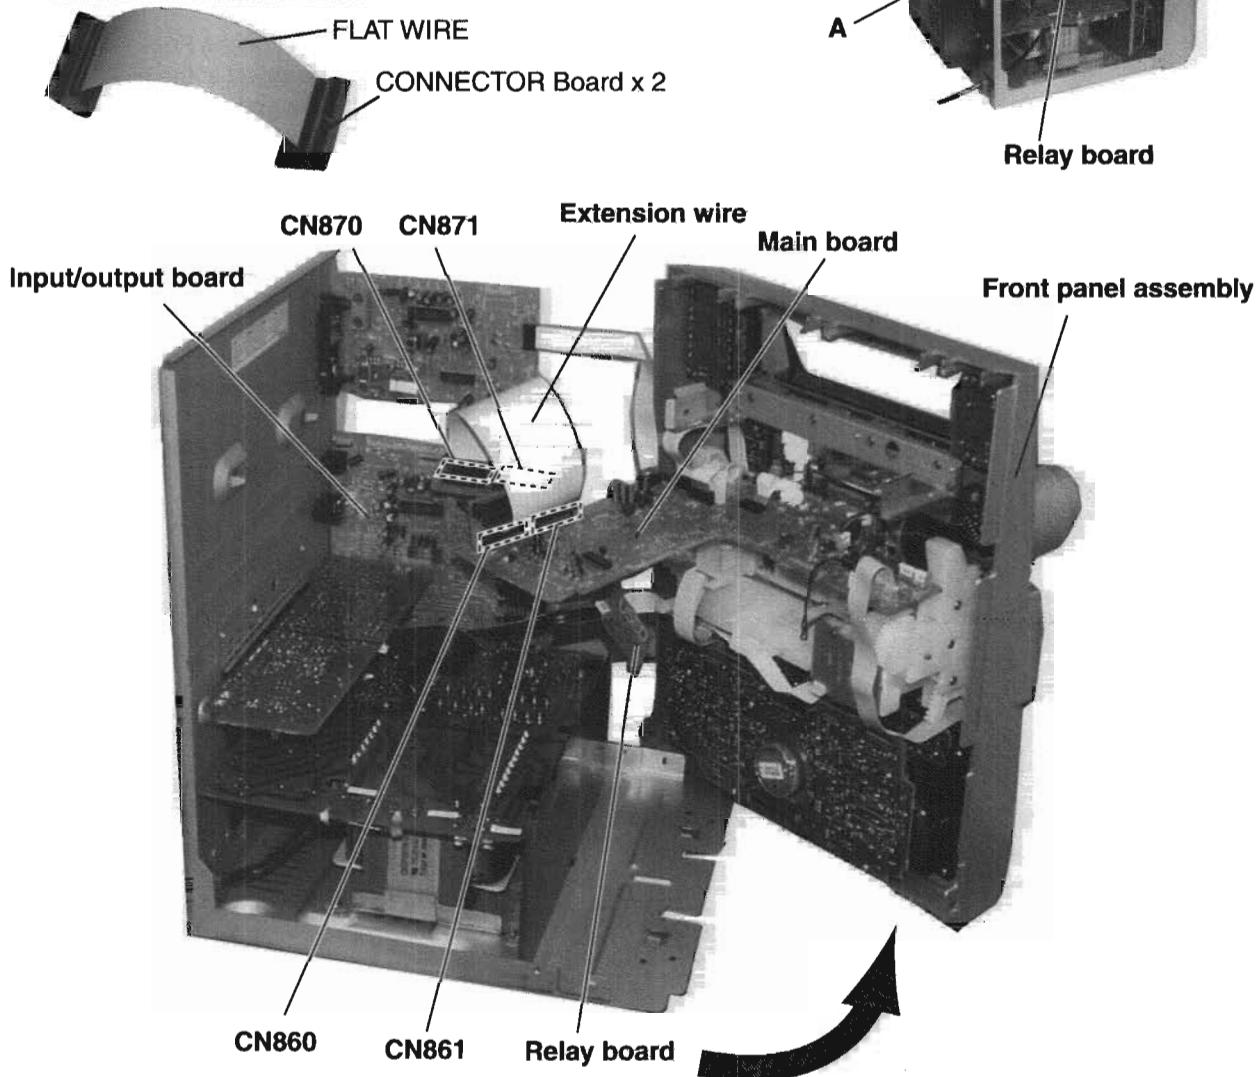

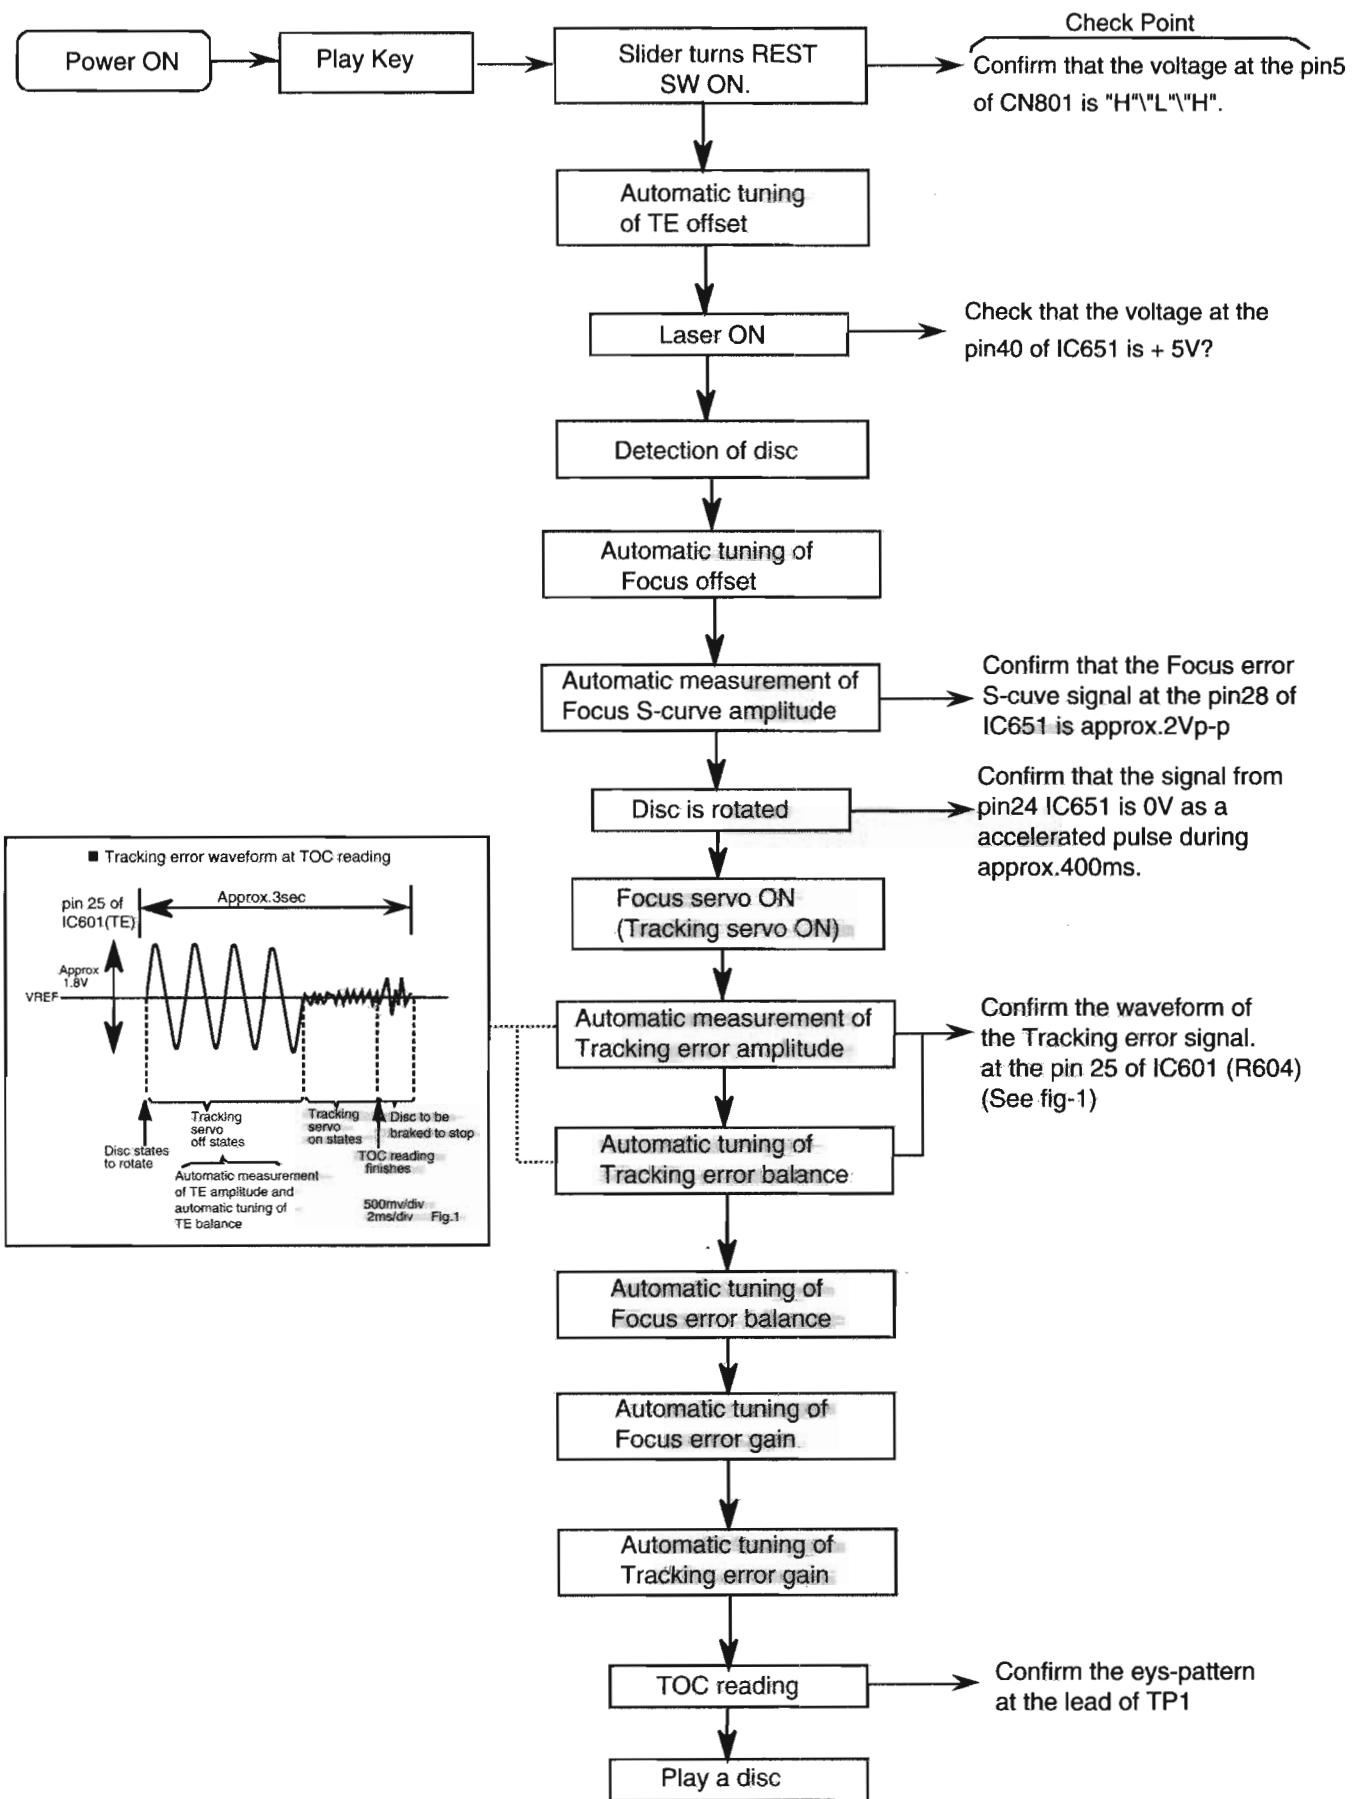

Fig.1

Flow of functional operation until TOC read

Maintenance of laser pickup Replacement of laser pickup

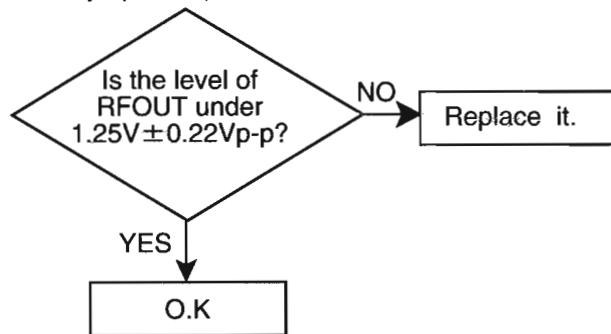

(1) Cleaning the pick up lens

Before you replace the pick up, please try to clean the lens with a alcohol soaked cotton swab.

(2) Life of the laser diode

When the life of the laser diode has expired, the following symptoms will appear.

1. The level of RF output (EFM output:amplitude of eye pattern) will below.

Turn off the power switch and,disconnect the power cord from the ac outlet.

Replace the pickup with a normal one.(Refer to "Pickup Removal" on the previous page)

Plug the power cord in, and turn the power on. At this time, check that the laser emits for about 3seconds and the objective lens moves up and down.
Note: Do not observe the laser beam directly.

Play a disc.

Check the eye-pattern at TP1.

Finish.

- (3) Semi-fixed resistor on the APC PC board The semi-fixed resistor on the APC printed circuit board which is attached to the pickup is used to adjust the laser power. Since this adjustment should be performed to match the characteristics of the whole optical block, do not touch the semi-fixed resistor.

If the laser power is lower than the specified value, the laser diode is almost worn out, and the laser pickup should be replaced.

If the semi-fixed resistor is adjusted while the pickup is functioning normally, the laser pickup may be damaged due to excessive current.

MODEL MX-J500

SHEET NUMBER	MODEL NUMBERS TO BE APPLIED	CIRCUITS DESCRIPTION
1 / 9	MX-J500	. PRIMARY WITH MAINS TRANSFORMER
2 / 9	MX-J500	. DC REGULATORS/AUDIO OUTPUT
3 / 9	MX-J500	. EXTERNAL INPUT. SOURCE SELECTOR SWITCH
4 / 9	MX-J500	. TUNER RF/IF/FM MULTIPLEX (ONLY FOR U. UP. US. UT. UX. UY)
5 / 9	MX-J500	. TUNER RF/IF/FM MULTIPLEX (ONLY FOR A)
6 / 9	MX-J500	. FL DISPLAY. SYSTEM CONTROL LSI. USER CONTROL KEYS
7 / 9	MX-J500	. TAPE DECK MECHANISM CONTROL . TAPE CIRCUITS SUCH AS PRE-AMP AND BIAS
8 / 9	MX-J550	. CD SERVO AND CD SYSTEM CONTROL . CD CHANGER MECHANISM CONTROL
9 / 9	MX-J500	. MIC-AMP. ECHO CIRCUIT (ONLY FOR U. UP. US. UT. UX. UY)

Parts are safety assurance parts.

When replacing those parts make sure to use the specified.

■ Power amplifier & regulator section

NOTES

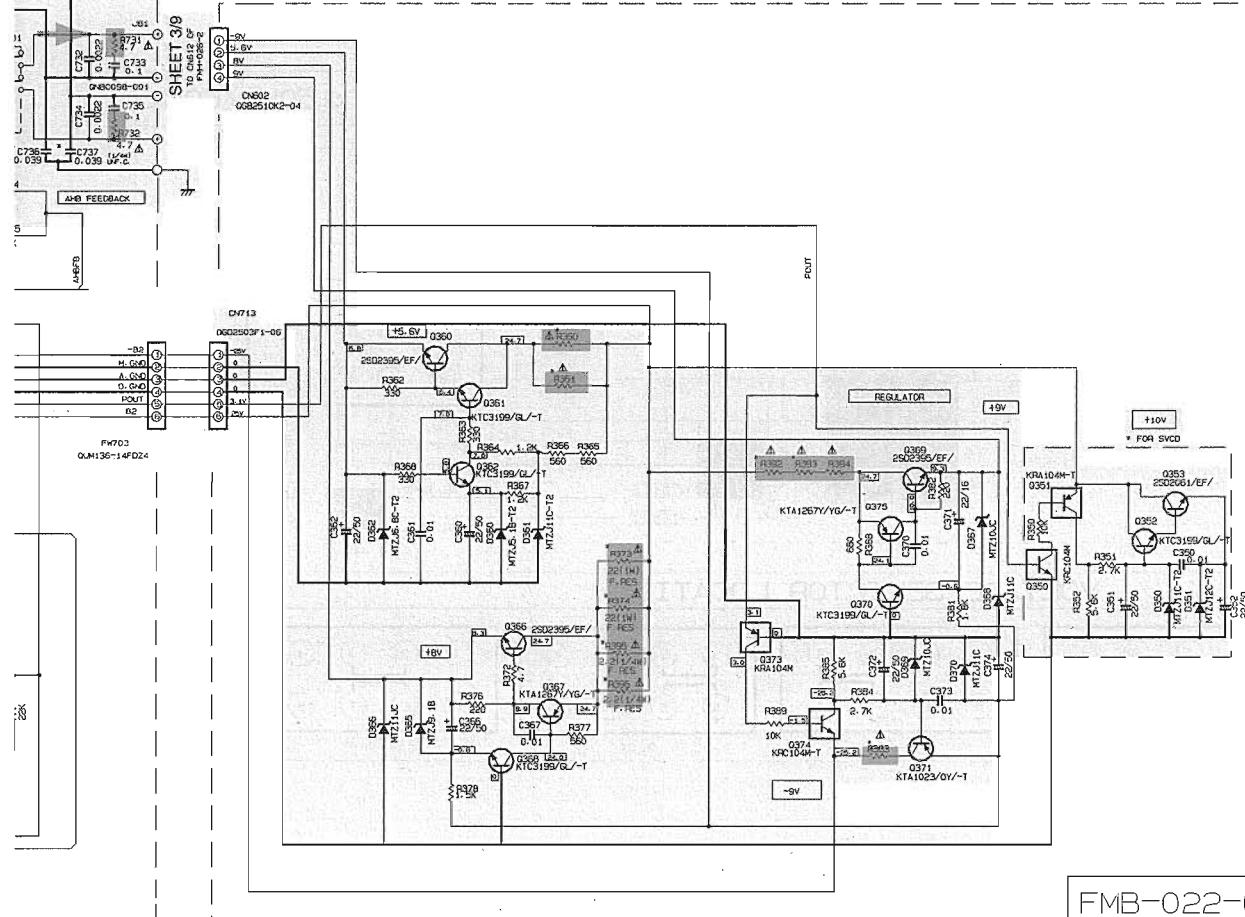

1. VOLTAGES ARE DETERMINED WITH A DIGITAL VOLTMETER OR OSCILLOSCOPE WITHOUT INPUT SIGNAL CONDITION — AUTOMATIC MODE, VOL. MIN., BASS OFF

2. UNLESS OTHERWISE SPECIFIED
RESISTORS ARE 1/4 WATT CARBON RESISTORS.
ALL RESISTANCE VALUES ARE IN OHMS (Ω).
ALL CAPACITANCE VALUES ARE IN FARADS (F).
ALL CAPACITANCE VALUES ARE IN MICROFARADS (MF).
ALL INDUCTANCE VALUES ARE IN HENRYS.
ALL CAPACITANCE VALUES ARE IN MICROHENRYS.
ALL DIODES ARE 1N5413.

SHEET 6/

NOTES

1. VOLTAGES ARE DC-MEASURED WITH A DIGITAL VOLT METER.
 2. ALL RESISTORS ARE 1/8W ±5% METAL GLAZE RESISTOR.
 3. ALL RESISTANCE VALUES ARE IN OHM(B).
 4. ALL CAPACITANCE VALUES ARE IN =F(P=PF).
 5. ALL E. CAPACITORS ARE SHOWN IN THE FORM OF CAPACITANCE (A.F) RATED VOLTAGE (V).
 6. SI DIODES (IN) ARE ALL 1SS133-T THAT CAN BE CHANGED TO SIMILAR DIODE SUCH AS MA165 OR HSS104J.
 7. PARTS NO. OF TRANSISTORS ARE AS FOLLOWS.
Q1 2SC2814/A-X/5-X Q2-Q3 2SC2412K/R-X
Q4-Q5 DT141KA-Y/X

B. INSIDE OF DIGITAL TRANSISTORS ARE SHOWN AS FOLLOWS.

SHEET 2/2

→ TUNER signal

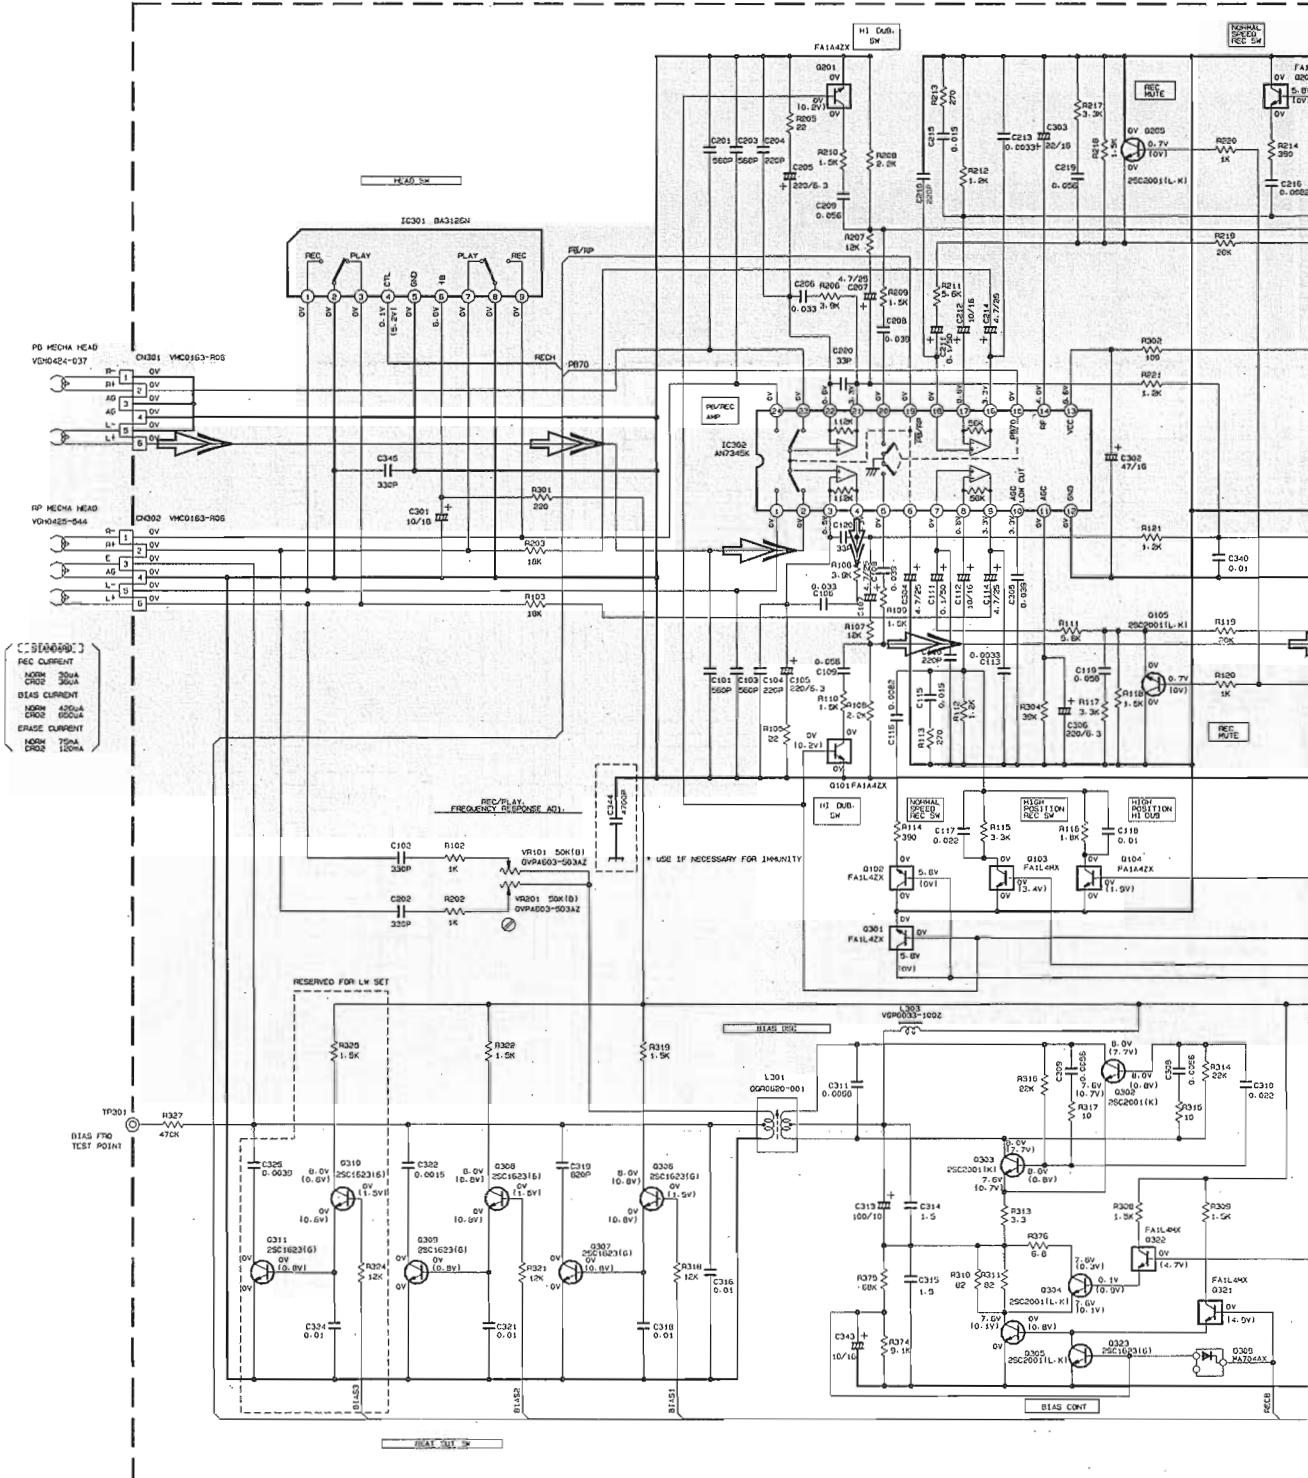

→ CD signal

NOTES

- 1. VOLTAGES ARE DC-MEASURED WITH A DIGITAL VOLT METER OR OSCILLOSCOPE WITHOUT INPUT SIGNAL CONDITION --- AUX MODE VOL MIN BIAS OFF
- 2. UNLESS OTHERWISE SPECIFIED:
 - RESISTORS ARE 1/4 WATT CARBON RESISTORS.
 - RESISTOR VALUES ARE IN OHM'S.
 - ALL CAPACITORS ARE CERAMIC CAPACITOR OR MYLAR CAPACITOR.
 - ALL CAPACITANCE VALUES ARE IN μF OR PF .
 - ALL DIODES ARE SCHOTTKY DIODES.
 - ALL E-CAPACITORS ARE SHOWN IN THE FORM OF CAPACITANCE (μF)/RATED VOLTAGE (V).
 - ALL DIODES ARE 1N5813A.

SHEET 6/9

■ Head amplifier & mechanism control section

NOTES

- VOLTAGES ARE DC-MEASURED WITH A DIGITAL VOLT METER OR OSCILLOSCOPE WITHOUT INPUT SIGNAL. (! IS INVERT MODE)
- UNLESS OTHERWISE SPECIFIED
- ALL RESISTANCE VALUES ARE IN Ω (MΩ).
- ALL CAPACITORS ARE CERAMIC CAPACITOR.
- ALL CAPACITANCE VALUES ARE IN μF (μFD).
- ALL INDUCTANCE VALUES ARE IN μH (μHm - μH).
- ALL E. CAPACITORS ARE SHOWN IN THE FORM OF CAPACITANCE (μF)/RATED VOLTAGE (V).
- PPLYPCYLNE CAPACITOR

Grease point

Grease	★ =JC-525 ■ =FL-7750 ▲ =UD-24 △ =UD-24H2 ● =LX-1349B ◎ =MOBIL-1
--------	--

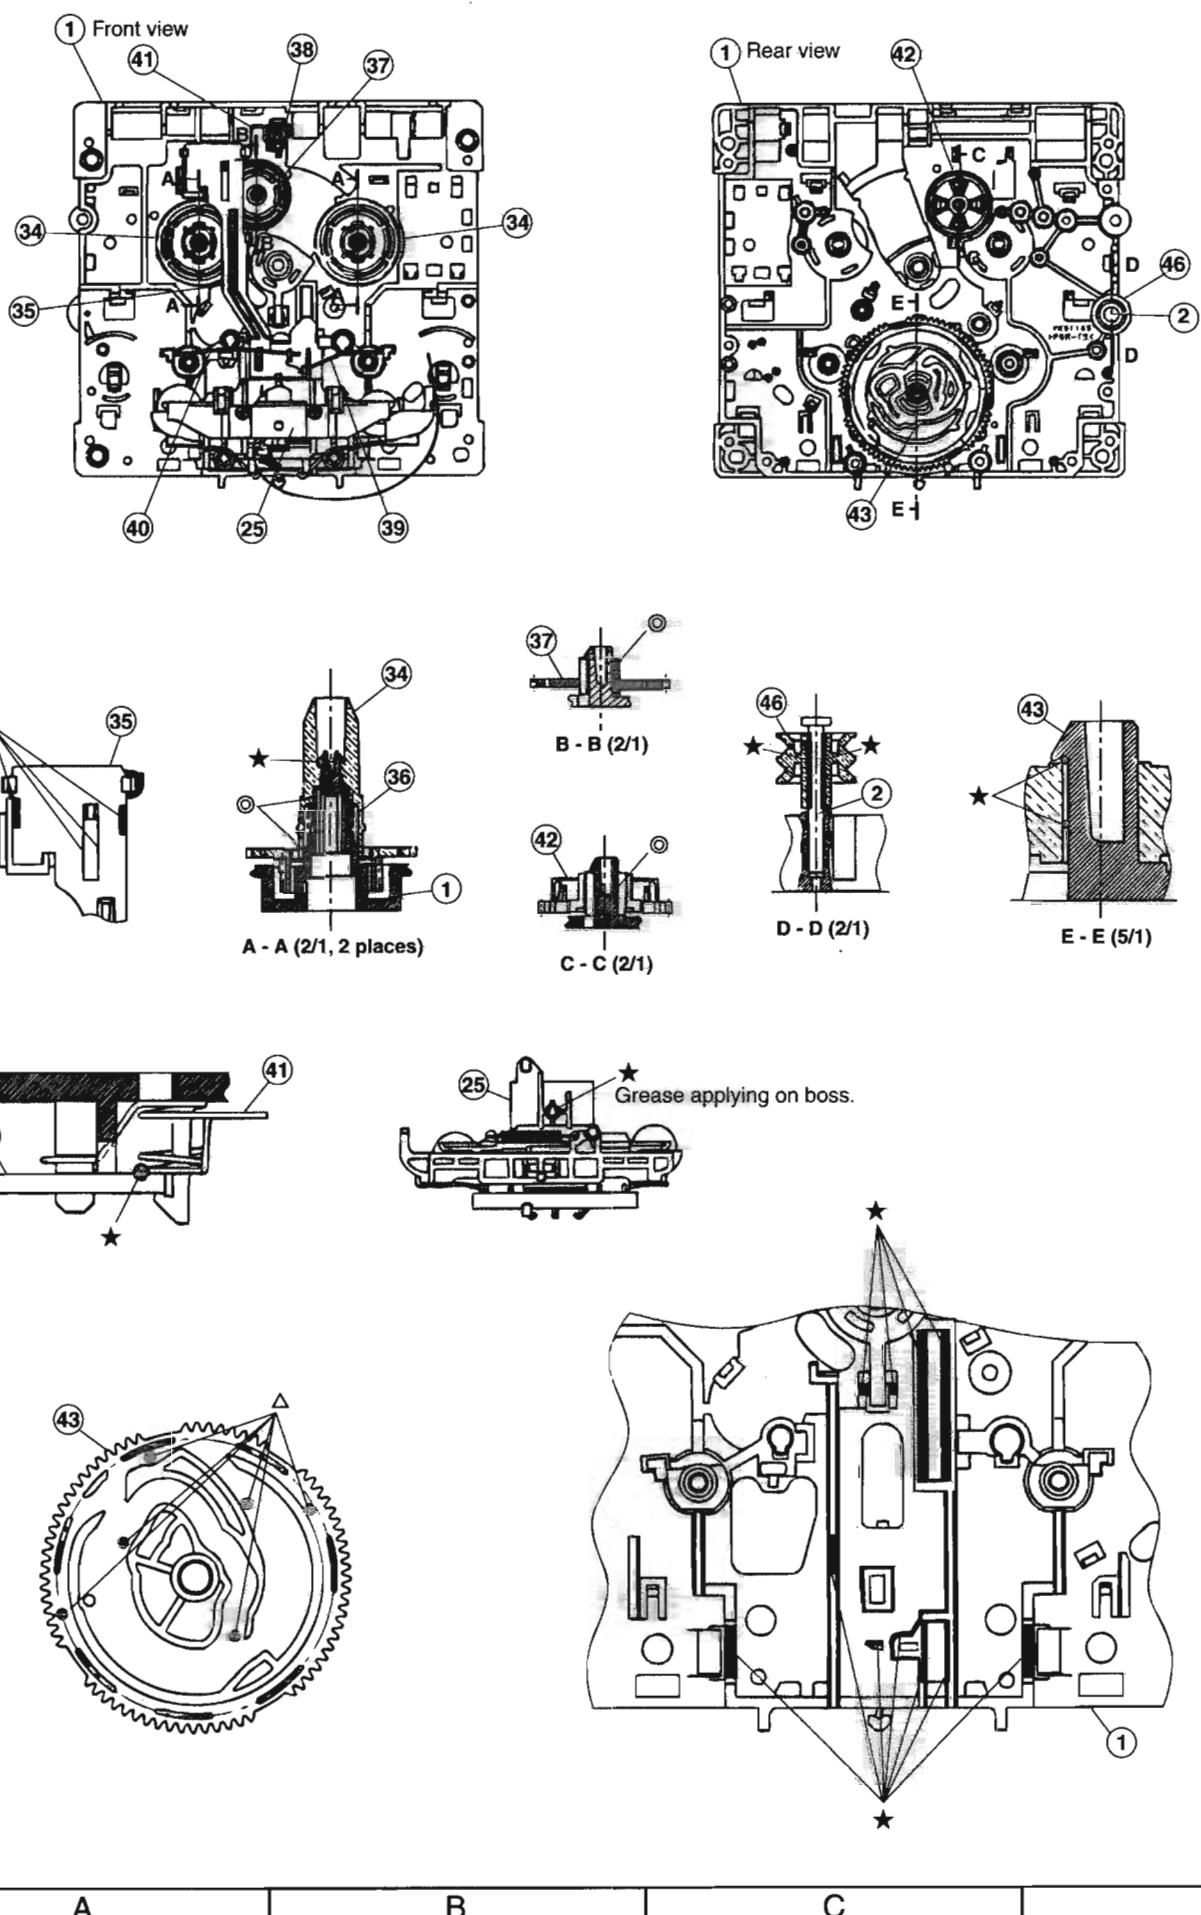

Should be applied to the rack of dir.lever fully.

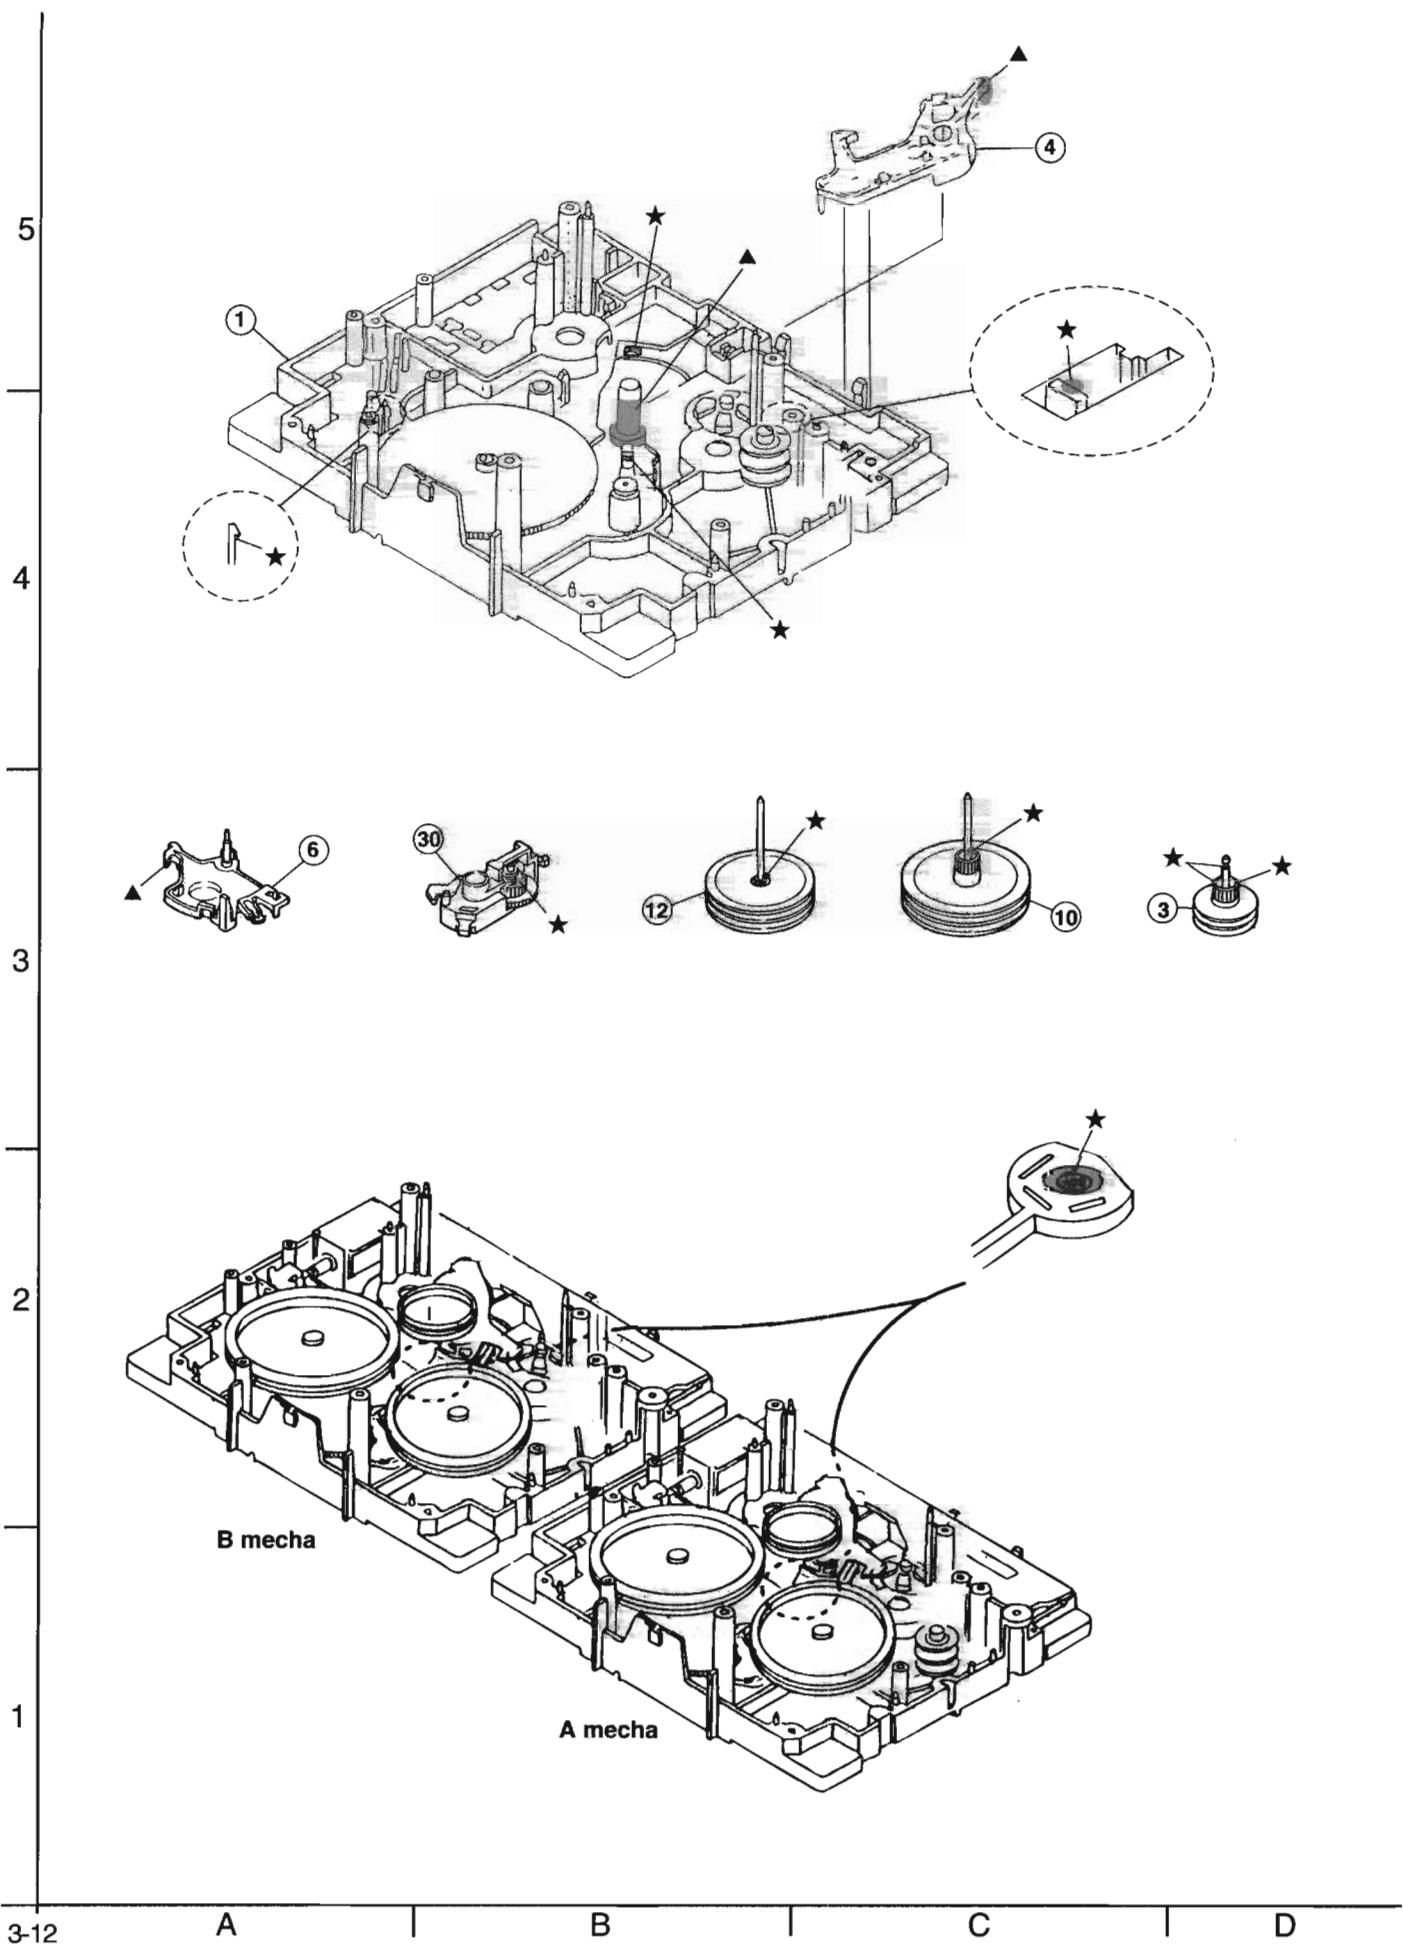

Apply oil to the shaft of pinch roller on both sides before assembly.

★ Between direction lever and head mount base.
