RX-880VBK

## Safety Precautions

1. The design of this product contains special hardware and many circuits and components specially for safety purposes. For continued protection, no changes should be made to the original design unless authorized in writing by the manufacturer. Replacement parts must be identical to those used in the original circuits. Services should be performed by qualified personnel only.
2. Alterations of the design or circuitry of the product should not be made. Any design alterations of the product should not be made. Any design alterations or additions will void the manufacturer's warranty and will further relieve the manufacture of responsibility for personal injury or property damage resulting therefrom.
3. Many electrical and mechanical parts in the products have special safety-related characteristics. These characteristics are often not evident from visual inspection nor can the protection afforded by them necessarily be obtained by using replacement components rated for higher voltage, wattage, etc. Replacement parts which have these special safety characteristics are identified in the Parts List of Service Manual. Electrical components having such features are identified by shading on the schematics and by ( $\Delta$ ) on the Parts List in the Service Manual. The use of a substitute replacement which does not have the same safety characteristics as the recommended replacement parts shown in the Parts List of Service Manual may create shock, fire, or other hazards.
4. The leads in the products are routed and dressed with ties, clamps, tubings, barriers and the like to be separated from live parts, high temperature parts, moving parts and/or sharp edges for the prevention of electric shock and fire hazard. When service is required, the original lead routing and dress should be observed, and it should be confirmed that they have been returned to normal, after re-assembling.

5. Leakage current check (Electrical shock hazard testing)

After re-assembling the product, always perform an isolation check on the exposed metal parts of the product (antenna terminals, knobs, metal cabinet, screw heads, headphone jack, control shafts, etc.) to be sure the product is safe to operate without danger of electrical shock.

Do not use a line isolation transformer during this check.

- Plug the AC line cord directly into the AC outlet. Using a "Leakage Current Tester", measure the leakage current from each exposed metal parts of the cabinet, particularly any exposed metal part having a return path to the chassis, to a known good earth ground. Any leakage current must not exceed 0.5mA AC (r.m.s.).

- Alternate check method

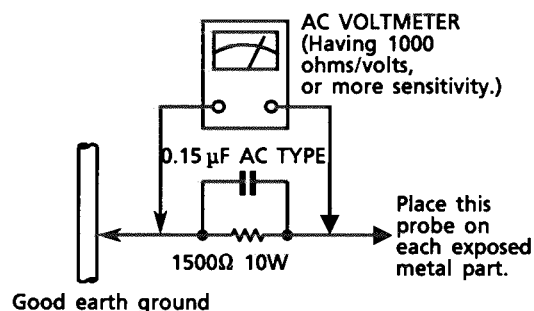

Plug the AC line cord directly into the AC outlet. Use an AC voltmeter having, 1,000 ohms per volt or more sensitivity in the following manner. Connect a 1,500 $\Omega$  10 W resistor paralleled by a 0.15  $\mu$ F AC-type capacitor between an exposed metal part and a known good earth ground.

Measure the AC voltage across the resistor with the AC voltmeter.

Move the resistor connection to each exposed metal part, particularly any exposed metal part having a return path to the chassis, and measure the AC voltage across the resistor.

Now, reverse the plug in the AC outlet and repeat each measurement. Any voltage measured must not exceed 0.75 V AC (r.m.s.).

This corresponds to 0.5 mA AC (r.m.s.).

## Warning

1. This equipment has been designed and manufactured to meet international safety standards.
2. It is the legal responsibility of the repairer to ensure that these safety standards are maintained.
3. Repairs must be made in accordance with the relevant safety standards.
4. It is essential that safety critical components are replaced by approved parts.
5. If mains voltage selector is provided, check setting for local voltage.

# Instruction Book

## Getting Started

This section explains how to connect stereo components and speakers to the receiver, and how to connect the power supply.

## Before Installation

### General

- Be sure your hands are dry.
- Turn the power off to all components.
- Read the manuals supplied with the components you are going to connect.

### Locations

- Install the receiver in a location that is level and protected from moisture.
- The temperature around the receiver must be between 23° and 104° F (-5° and 40° C).
- Make sure there is good ventilation around the receiver. Poor ventilation could cause overheating and damage the receiver.

### Handling the receiver

- Do not insert any metal object into the receiver.
- Do not disassemble the receiver or remove screws, covers, or cabinet.
- Do not expose the receiver to rain or moisture.

## Checking the Supplied Accessories

Check to be sure you have all of the following items, which are supplied with the receiver.

The number in the parenthesis indicates the quantity of the pieces supplied.

- Remote Control (1)
- Batteries (2)
- AM Loop Antenna (1)
- FM Wire Antenna (1)

If anything is missing, contact your dealer immediately.

## About this manual

This manual explains how to use RX-818VBK and RX-880VBK. These models are identical except the following.

Function	Model	RX-818VBK	RX-880VBK	Reference page
REAR OUT jacks		No	Yes	Page 6
PARTIAL ON-SCREEN Superimpose		No	Yes	Page 32
		No	Yes	Below*

Yes: The model is equipped with the function.  
No: The model is not equipped with the function.

### \* What is Superimpose ?

This function is equipped only for RX-880VBK, and allows you to see the on-screen displays over the pictures shown on the TV screen. So, you can use the on-screen displays such as Menus, Visual Confirmation, and PARTIAL ON-SCREEN while watching TV or video sources.  
This function cannot be turned off.

This mark indicates that you can also use the Menus to do the same operations.  
Actual operations using the Menus are explained on pages indicated next to the marks.

The following functions are available only using the Menus.

- Using "TRANSPARENT" to erase the grey background around the Menu items (see page 32)
- Using "AUTO DEMO START" to see the demonstration of the Menu operations (see page 32)
- For RX-880VBK only: Using "PARTIAL ON-SCREEN" to show what you are doing on the bottom of the TV screen (see page 32)

## Connecting the FM and AM Antennas

**FM Antenna Connections**

If reception is poor, connect the outside antenna. Before attaching a 75-ohm coaxial cable (the kind with a round wire going to an outside antenna), disconnect the supplied FM wire antenna.

### How to strip the 75-ohm coaxial cable and connect it to the FM terminals

1. Strip back the outside covering of the 75-ohm coaxial cable to expose the braided metallic mesh.
2. Pull the mesh back and twist it into a single connector, as shown in the illustration above.
3. Strip the insulation about 7/16 inches (10 mm) back from the central wire.
4. Insert the twisted mesh and the central wire to the FM terminals, as shown in the illustration above.

## AM Antenna Connections

**Turn the loop until you have the best reception.**

Snap the tabs on the loop into the slots of the base to assemble the AM loop.

When using the Remote Control, check to see if its remote control mode selector is set to the correct position:

**Note:** Make sure the antenna conductors do not touch any other terminals, connecting cords and power cord. This could cause poor reception.

If reception is poor, connect an outdoor single vinyl-covered wire to the AM EXT terminal. (Keep the AM loop antenna connected.)

## Connecting the Speakers

You can connect the following speakers:

- Two sets of front speakers to produce normal stereo sound.
- One set of rear speakers to enjoy the surround effect.
- One center speaker to produce more effective surround effect (to make human voices outstanding).
- One subwoofer speaker to enhance the bass.

For each speaker, connect one end of the speaker signal cable (not supplied) to the speaker terminal on the rear panel and the other end to the speaker. For connecting a subwoofer, see page 6.

1. Open each terminal.
2. Insert the end of the speaker signal cable as shown (be sure to remove the insulation at the end of each wire first).
3. Close the terminals to clamp the speaker signal cables firmly in place.
4. Connect the black (-) and red (+) terminals on the rear panel to the black (-) and red (+) terminals marked on the speakers.

**CAUTION:**  
Use speakers with the SPEAKER IMPEDANCE indicated by the speaker terminals.

## Connecting the front speakers

Connect the front speakers to the FRONT SPEAKERS terminals and set the SPEAKER LOAD SELECTOR.

**Notes:**

- To obtain the best possible output power from the receiver, and to prevent the receiver from being overheated, the receiver has the SPEAKER LOAD SELECTOR on its rear which should be set to match the impedance of the connected speakers.
- Set this selector according to the indications by the FRONT SPEAKERS terminals on the rear.
- When you connect two pairs of the speakers to the FRONT SPEAKERS terminals, use the speakers having the impedance within the same range.

## Connecting the rear and center speakers

Connect rear speakers to the REAR SPEAKERS terminals, and a center speaker to the CENTER SPEAKER terminals.

**Note:**

When you connect rear speakers, make sure that both left and right speakers are connected; otherwise, no sound will come out of the rear speakers.

## Increasing the power for the rear speakers (only for RX-880VBK)

You can use a separate power amplifier to reinforce sounds through the rear speakers.

1. Connect the input jacks of the power amplifier to the REAR OUT jacks on the rear panel.
2. Connect the rear speakers to the speaker terminals of the power amplifier.

## Enhancing the bass

You can enhance the bass by connecting a subwoofer using a cable with RCA pin plugs. To connect a subwoofer, you also need a separate power amplifier.

1. Connect the input jack of the power amplifier to the SUB WOOFER OUT jack on the rear panel.
2. Connect a subwoofer speaker to the speaker terminal of the power amplifier.

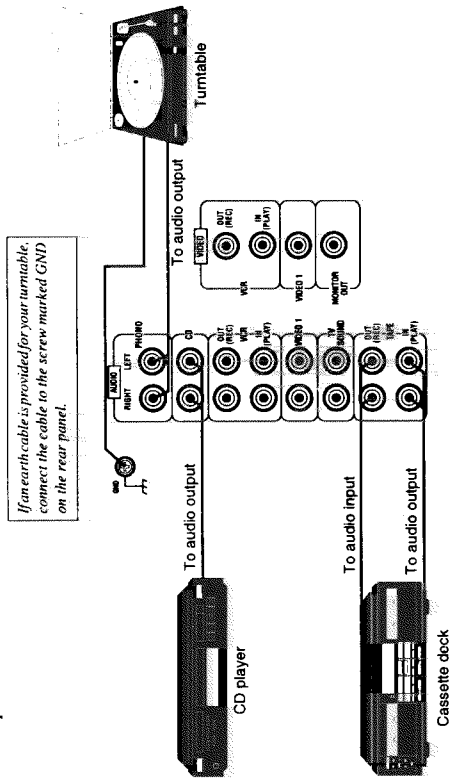

Connecting Audio/Video Components

You can connect the other audio/video components to the receiver using cables with RCA pin plugs.

**Notes:**

- Both plugs and jacks are color-coded; the red ones are for right audio signals, the white ones for left audio signals, and yellow ones for video signals.
- Any turntables incorporating a small-output cartridge such as an MC (moving coil type) must be connected to this receiver through a commercial head amplifier or step-up transformer. Direct connection may result in insufficient volume.

Audio component connections

Video component connections

Connecting Audio Components for the COMPU LINK-3 Remote Control System

The COMPU LINK-3 remote control system allows you to control other JVC audio components from the receiver or vice versa. To use this system, connect your JVC audio components and the receiver with the cable (monaural mini-plug) supplied with those components.

If your audio component has two COMPU LINK-3 SYNCHRO jacks, you can use either one. If it has only one COMPU LINK-3 SYNCHRO jack, connect it so that it is the last item in the series of components. (For example, the turntable or CD player in the diagram below)

**Notes:**

- The COMPU LINK-3 remote control system is the upgraded version of the COMPU LINK-1 and COMPU LINK-2. Even if your component has the COMPU LINK-1 or COMPU LINK-2 jacks, you can still connect it in the COMPU LINK-3 remote control system, but some functions may not work correctly.
- For more information about the COMPU LINK-3 (-1 and -2) remote control system, see page 33.

Connecting Video Components for the AV COMPU LINK Remote Control System

The AV COMPU LINK remote control system allows you to control other JVC video components from the receiver or vice versa. To use this system, connect your JVC video component and the receiver with the cable (monaural mini-plug) supplied with those components) and the cable with RCA pin plugs (and with S-video plug).

**Notes:**

- 1. Connect your TV to the jack marked TV.
- 2. Connect your VCR to either one of the remaining two jacks.

3. Connect the receiver, VCR, and TV as follows using the cables with RCA pin plug (and with S-video plug). See also page 7.

**CAUTION:**  
The AV COMPU LINK remote control system cannot control the video components connected to the VIDEO 1 and VIDEO 2 jacks on the receiver. Use only the video component connected to the VCR jacks.

**Notes:**

- Some VCRs use the AV COMPU LINK jacks for the SWAP editing. However, you cannot use both the AV COMPU LINK remote control and the SWAP editing at the same time. For the SWAP editing, see the manual supplied with the VCR.
- For more information about the AV COMPU LINK remote control system, see page 34.

## Basic Operations

These AC outlets are “switched” outlets. So when the receiver is off (that is, in standby mode), power is not supplied through these outlets. By turning the receiver on and off, you can turn the connected components on and off at the same time.

**Note:**  
Do not use the AC outlets on the rear of the receiver to supply power to the components in the **COMPU LINK** remote control system; otherwise, the **COMPU LINK** remote control system may not work correctly.

**CAUTION:** Do not plug the components to the AC outlets on the rear if their total power consumption is greater than indicated by the AC outlets.

## Connecting the Power Cord

Before plugging the receiver into an AC outlet, make sure that all connections have been made. When the power cord is connected, the **STANDBY** indicator above the **POWER** button lights up.

**Keep** the power cord away from the connecting cables for the TV, VCR, and antenna. The power cord may cause noise or screen interference. We recommend that you use a coaxial cable to connect the antenna, since it is well-shielded against interference.

**Notes:**

- A small amount of power is always consumed even in standby mode. To switch off the power completely, unplug the power cord from the AC outlet.
- If the power cord is unplugged or a power failure occurs, preset settings will be erased in a few days.

**CAUTIONS:**

- Do not touch the power cord with wet hands.
- Do not pull on the power cord to unplug the unit. When unplugging the unit, always grasp the plug itself so as not to damage the cord.

### Putting Batteries in the Remote Control

Before using the remote control, put two supplied batteries first. When using the remote control, aim the remote control directly at the remote sensor on the receiver.

1. On the back of the remote control, remove the cover as illustrated.
2. Insert batteries. Make sure to observe the proper polarity: (+) to (+) and (-) to (-).
3. Replace the cover in.

If the range or effectiveness of the remote control decreases, replace the batteries. Use two R03 (UM-4)/AAA (24F) type dry-cell batteries.

**CAUTIONS:**

- Follow these precautions to avoid leaking or cracking cells:
  - Place batteries in the remote control so they match the polarity indicated: (+) to (+) and (–) to (–).
  - Use the correct type of batteries. Batteries that look similar may differ in voltage.
  - Always replace both batteries at the same time.
  - Do not expose batteries to heat or flame.

## Basic Operations

The following operations are commonly used when you play any sound source:

## IMPORTANT

When using the Remote Control, check to see if its remote control mode selector is set to the correct position:

To operate audio system, TVs, and VCRs, set it to the "AUDIO/TV/VCR" position.

To operate CATV converters and satellite tuners, set it to the "CATV/SAT" position.

### Turning the Power On and Off

**To turn on the power**, press the **POWER** button on the front panel or the **AUDIO POWER** button on the remote control.

The STANDBY indicator turns off. The name of the current source appears on the display.

On the front panel

Diagram of a power supply unit. A rectangular box contains the word "IAPPE" written vertically. To the right of the box is a control knob labeled "VOLUME". Below the knob is a horizontal scale with markings at 0, 10, and 100. A dashed line connects the knob to the 100 mark. To the left of the box, a line labeled "Current source" points to the box. To the right of the box, a line points to the "VOLUME" knob. A label "Volume level is also shown here whenever the power is on" is positioned to the right of the knob.

To turn off the power, press the POWER button or the AUDIO POWER button again.

The STANDBY indicator turns on.

## Selecting the Source to Play

**You need to select the source before you start playing any source.**

**On the front panel:**

Turn the SOURCE SELECTOR so that the desired source name appears on the display (at the same time the arrow (▲) on the display points the source).

**Selected source  
name appears**

VCR	View the video component connected to the VCR jacks.
VIDEO 1	View the video component connected to the VIDEO 1 jacks.
VIDEO 2	View the video component connected to the VIDEO 2 jacks.
TV SOUND	Listen to TV broadcasts.
TUNER	Listen to FM or AM broadcasts.
PHONO	Listen to records.
CD	Listen to CDs.
TAPE	Listen to cassette tapes.

**From the remote control:**

**Press the desired source selecting buttons.**

VCR	View the video component connected to the VCR jacks.
VIDEO 1	View the video component connected to the VIDEO 1 jacks.
VIDEO 2	View the video component connected to the VIDEO 2 jacks.
TV SOUND	Listen to TV broadcasts.
FM/AM*	Listen to FM or AM broadcasts.
PHONO*	Listen to records.
CD*	Listen to CDs.
TAPE*	Listen to cassette tapes.

**Note:** When you press one of the source selecting buttons marked above with an asterisk (\*), the receiver automatically turns on.

Selecting the Front Speakers

When you have connected two sets of the front speakers, you can select which to use. Pressing in the SPEAKERS 1 or SPEAKERS 2 button on the front panel activates the respective set of the speakers.

- To use the speakers connected to the FRONT SPEAKERS ① terminals, press in the SPEAKERS 1 button (⬇️ON), and press out the SPEAKERS 2 button (⬆️OFF).
- To use the speakers connected to the FRONT SPEAKERS ② terminals, press in the SPEAKERS 2 button (⬆️ON), and press out the SPEAKERS 1 button (⬇️OFF).
- To use both sets of the speakers, press in both the SPEAKERS 1 and 2 buttons (⬇️ON).
- To use neither set of the speakers, press out both the SPEAKERS 1 and 2 buttons (⬆️OFF).

**Note:**  
When only one set of the speakers is connected to either the FRONT SPEAKERS ① or ② terminals, do not press in both SPEAKERS 1 and 2 buttons (⬇️ON). If you do, no sound comes out of the front speakers.

See also  
page 27.

Adjusting the Volume

When you turn on the power or change the volume level, the volume level is shown on the display.

- On the front panel:**  
To increase the volume, turn the MASTER VOLUME control clockwise.  
To decrease the volume, turn the MASTER VOLUME control counterclockwise.

- From the remote control:**  
To increase the volume, press the VOLUME + button.  
To decrease the volume, press the VOLUME - button.

From the remote control

**CAUTION:**  
Always set the volume level to the minimum before starting any source. If the volume level is left turned up, the sudden blast of sound energy can permanently damage your hearing and/or ruin your speakers.

Adjusting the Front Speaker Output Balance

If the sounds you hear from the right and left front speakers are unequal, you can adjust the speaker output balance with the BALANCE control on the front panel.

- To decrease the left channel sound, turn the BALANCE control clockwise.  
To decrease the right channel sound, turn the BALANCE control counterclockwise.

Listening at Low Volume (Loudness)

Human ears are not sensitive to bass at low volume. To compensate for this, the loudness function automatically boosts the bass level as you lower the volume.

- To use the loudness function, press the LOUDNESS button on the front panel. The LOUDNESS indicator lights up on the display.
- To turn the function off, press the LOUDNESS button again. The LOUDNESS indicator goes off.

Muting the Sound

You can easily turn off the volume by pressing the MUTE button.

To mute the sound through all speakers and headphones connected, press the MUTE button so that the indicator on the front panel turns on. ("MUTE" also appears on the display.)

To cancel the mute, press the MUTE button again so that the indicator turns off. When you turn the MASTER VOLUME control or press the VOLUME +/- button, mute is also canceled.

Listening with Headphones

A standard pair of headphones can be connected to the PHONES jack on the front panel.

To listen with only headphones, press out both the SPEAKERS 1 and 2 buttons (⬆️OFF).

**CAUTION:**  
Be sure to turn down the volume before connecting or putting on headphones, as high volume can damage both the headphones and your hearing.

Recording a Source

You can record any source playing through the receiver to the cassette deck connected to the TAPE jacks, and the VCR connected to the VCR jacks at the same time. While recording, you can listen to the selected sound source at whatever sound level you like, without affecting the sound levels of the recording.

**Note:**  
The output volume level, SEA modes, DAP modes and surround modes will not affect the recording.

## Receiving Radio Broadcasts

You can browse through all the stations or use the preset function to go immediately to a particular station.

**FM/AM**

then

**ENTER**

**See also page 28.**

### Tuning in Stations Manually

1. **Select TUNER as the source to play and choose the band.**  
On the front panel:  

☐ Turn the **SOURCE SELECTOR** to select **TUNER**.  
The last received station is tuned in.

☐ Press the **FM/AM** button.  
Each time you press the button, the band (FM and AM) alternates.

**From the remote control:**  
Press the **FM/AM** button.  
The last received station is tuned in.  
Each time you press the button, the band (FM and AM) alternates.

**Note:**  
If you do not see a preset channel number on the display, the receiver is already in the manual tuning mode, so skip Step 2 below.
2. **Press the PRESET/TUNING button on the front panel to set the tuning mode to the manual tuning.**  
When the manual tuning is selected, the preset channel number disappears from the display.  
Each time you press the button, the manual tuning and preset tuning modes alternate.
3. **Turn the TUNER CONTROL on the front panel clockwise or counterclockwise.**  
Turning it clockwise increases the frequency.  
Turning it counterclockwise decreases the frequency.

**Notes:**

- When you turn the **TUNER CONTROL** fast, the frequency keeps changing until you turn the **TUNER CONTROL** again or a station is tuned in.
- When a station of sufficient signal strength is tuned in, the **TUNED** indicator lights up on the display.  
When an FM stereo program is received, the **STEREO** indicator also lights up.

**FM/AM**

then

**PRESET/TUNING**

**See also page 28.**

### Using the Preset Tuning

Once a station is assigned to a channel number, the station can be quickly tuned. You can preset up to 40 stations, either AM, FM, or a mixture of both, at random.

### Storing stations into memory

- You can preset the stations you want into memory by following the presetting method below.
1. **Tune in the station you want to preset (see above).**
  2. **Press the ENTER button on the front panel.**  
"CH- ——" appears on the display for 5 seconds.
  3. **Select a channel number within the 5 seconds.**  
On the front panel:  
Turn the **TUNER CONTROL**.  
From the remote control:  
Press the 10 keys to select a channel number.  
Examples: For channel number 5, press 5. For channel number 15, press +10 then 5.  
For channel number 20, press +10 then 10.
- Note:**  
When you use the 10 keys on the remote control, be sure that they are activated for tuner, not for the CD and others. (See page 35.)

On the front panel

From the remote control

4. **Press the ENTER button again while the selected channel number is flashing on the display.**  
The selected channel number stops flashing, and the station is assigned to the selected channel number.

#### To erase a stored station

Storing a new station on a used number erases the previously stored one.

#### CAUTION:

Preset stations may be erased when power is cut off to the receiver, as when it is unplugged from the AC outlet or a power failure occurs. If the preset stations are lost, simply store the stations again using the above procedure.

### Tuning in a preset station

- On the front panel:**
1. **Turn the SOURCE SELECTOR to select TUNER.**
- Note:**  
If you see a preset channel number on the display, the receiver is already in the preset tuning mode, so skip Step 2 below.
2. **Press the PRESET/TUNING button to set the tuning mode to the preset tuning.**  
When the preset tuning is selected, a preset channel number appears on the display.  
Each time you press the button, the manual tuning and preset tuning modes alternate.
  3. **Turn the TUNER CONTROL to select a preset channel number.**  
Turning it clockwise changes preset channels in increasing order.  
Turning it counterclockwise changes preset channels in decreasing order.

#### From the remote control:

1. **Press the FM/AM button.**  
The last received station is tuned in.
  2. **Press the 10 keys to select a preset channel number.**  
Examples: For channel number 5, press 5. For channel number 15, press +10 then 5.  
For channel number 20, press +10 then 10.
- Note:**  
When you use the 10 keys on the remote control, be sure that they are activated for tuner, not for the CD and others. (See page 35.)

### Selecting the FM Reception Mode

You can change the FM reception mode so that reception will be improved.

#### When an FM stereo broadcast is hard to receive or noisy

Press the **FM MODE/MUTE** button either on the front panel or on the remote control.  
The **MUTE** AUTO indicator goes off on the display. Reception will be improved although you will lose the stereo effect. In this mode, you will hear noise while tuning into the stations.

#### Note:

When you use the **FM MODE/MUTE** button on the remote control, be sure that 10 keys are activated for tuner, not for the CD and others. (See page 35.)

#### To restore the stereo effect

Press the **FM MODE/MUTE** button again so that the **MUTE** AUTO indicator lights up on the display.  
In this mode, when a program is broadcast in stereo, you will hear stereo sound; when in monaural, you will hear monaural sounds. This mode is also useful to suppress static noise between stations.

Using the SEA Modes

The SEA (Sound Effect Amplifier) modes give you control of the way your music sounds.

**Note:**  
The SEA modes cannot be used for recording.

See also  
page 29.

Selecting Your Favorite SEA Mode

Selecting the SEA mode

On the front panel:

Press the SEA MODE button repeatedly until the SEA mode you want appears on the display. When you press the button for the first time, the SEA indicator lights up and the previously selected SEA mode comes into effect. Each time you press the button then, the SEA modes change as follows:

On the front panel

1. Press the SOUND CONTROL. Pressing this button activates the 10 keys for adjusting the sounds.

2. Press the SEA MODE button repeatedly until the SEA mode you want appears on the display. When you press the button for the first time, the SEA indicator lights up and the previously selected SEA mode comes into effect. Each time you press the button then, the SEA modes change as follows:

From the remote control

ROCK:	Gives a heavy sound. Both high and low frequencies are boosted.
MUSICAL:	Enhance the mid-frequency range human voice is mostly made up of.
MOVIE:	Adds breath to sounds so you feel like you are in a movie theater.
COUNTRY:	Enhances the high-frequency range so that instruments such as a violin and banjo sound outstanding.
JAZZ:	Gives a feeling of a live atmosphere. Good for acoustic music.
USERMODE:	Your original SEA mode (see page 17).
SEA OFF:	No SEA mode is applied (see below).

Canceling the SEA mode

On the front panel:

Press the SEA MODE button repeatedly until "SEA OFF" appears on the display. The SEA indicator also turns off.

On the front panel

From the remote control:

1. Press the SOUND CONTROL. Pressing this button activates the 10 keys for adjusting the sounds.

2. Press the SEA MODE button repeatedly until "SEA OFF" appears on the display. The SEA indicator also turns off.

From the remote control

Assigning Names to Preset Stations

You can assign a name of up to five characters to each preset station (from preset channel number 1 to 20). When a preset station is tuned in, its assigned name will appear on the display.

On the front panel only:

1. Tune in a preset station (preset channel number 1 to 20). See page 14 for details.

2. Press the CHARACTER button on the front panel. The first character position starts flashing.

3. Turn the TUNER CONTROL to select the first character. You can use characters listed below.

4. When the character you want appears, press the CHARACTER button. The next character position starts flashing.

5. Repeat Steps 3 and 4 to enter up to five characters.

6. Press the ENTER button after you have assigned a name.

To erase the input characters  
Insert blanks using the same procedure described above. When using the Menu, you can erase them more easily. (See page 29.)

You can adjust the SEA modes as you like and store your setting into memory. If you do not want to store your setting, but rather want to adjust a SEA mode temporarily, skip Step 3 below.

1. Select the SEA mode you want to adjust.

On the front panel:

On the front panel

From the remote control:

From the remote control

2. Adjust the SEA mode.

On the front panel only:

Press the left or right SEA CONTROL button (+/-) on the front panel to change the frequency ranges to adjust.

Press the upper or lower SEA CONTROL button (+/-) to change the level.

**Note:**  
When using the SEA CONTROL buttons (+/-), make sure that the SEA indicator on the front panel is turned on. If not, press the CURSOR MODE button once so that these buttons can be used for adjusting the SEA modes.

3. Store the setting.

On the front panel only:

Press the MEMORY button so that your setting is stored into USERMODE.

To erase a stored setting

Storing a new setting into USERMODE erases the previously stored one.

## Using the Digital Surround Processor

The built-in digital surround processor provides two groups of programs — DAP (Digital Acoustic Processor) modes and surround modes (Dolby Surround<sup>®</sup> and JVC Theater Surround). You cannot use the DAP mode and surround mode at the same time. When you turn on the DAP mode, the surround mode is turned off (if it has been on), and vice versa.

Notes:

- The digital surround processor has no effect on monaural sources.
- The digital surround processor cannot be used for recording.

What can the digital surround processor do?

The sound heard in a concert hall or a movie theater consists of direct sound and indirect sound: early reflections and reflections from behind. The reflected sounds are always delayed by the distances of the ceiling and walls from the listener. These reflections are some of the most important elements of the acoustic surround. So, what the digital surround processor does is to reproduce these elements in your listening room.

To use the digital surround processor, you need to connect rear speakers (and a center speaker) as well as the front speakers.

• Manufactured under license from Dolby Laboratories Licensing Corporation. Additionally licensed under Canadian patent number 1,037,877. "Dolby," "Pro Logic," and the double-D symbol are trademarks of Dolby Laboratories Licensing Corporation.

Speaker arrangements for the DAP modes and surround modes

The following illustrations show how to obtain the optimum sound environment for various DAP modes and surround modes. Try to find the speaker direction and location to create the optimum sound field.

**CASE 1** When you add a center speaker and rear speakers:

**In this case:**  
1. Select "PROLOGIC" or "THEATER1" or "THEATER2".  
2. Select "WIDE" or "NORMAL" for the center mode.  
See page 21 to 23 for more details.

**CASE 2** When you add only rear speakers (without a center speaker):

**In this case:**  
1. Select "PROLOGIC" or "THEATER1" or "THEATER2".  
2. Select "PHANTOM" for the center mode.  
See page 21 to 23 for more details.  
(You can also use this speaker arrangement for the DAP modes—excluding "Headphones". See pages 19 and 20.)

**CASE 3** When you add only a center speaker (without rear speakers):

**In this case:**  
1. Select "3chLOGIC".  
2. Select "WIDE" or "NORMAL" for the center mode.  
See page 21 to 23 for more details.

See also  
page 30.

Preparing for the DAP Modes

You can use five DAP modes — "Dance Club, Live Club, Hall, Pavilion, and Headphones." These modes (except "Headphones") require rear speakers, but do not require a center speaker to enlarge the sound field. Among the DAP modes, "Headphones" is very special. It can create the same stereo sound as you listen through the speakers in air while listening to a source using headphones. So, you can feel as if you were not using the headphones and listening to music in a certain room.

Only when using the Menu, you can adjust the room size — it affects the effect of "Headphones." To adjust the room size, see page 30.

Preparation method for the DAP modes

Once you have set the DAP modes, you can use the same adjustment every time you want to enjoy the DAP mode you want. The receiver memorizes these adjustments for each mode. You need the remote control to complete the entire adjustment process of the DAP modes (even though some steps can be done using the buttons on the front panel).

To use the DAP modes, see "Using the DAP Modes" on page 20.

From the remote control:

1. Press the **SOUND CONTROL**. Pressing this button activates the 10 keys for adjusting the sounds.
2. Press the **DAP MODE** button repeatedly until the DAP mode you want appears on the display. When you press the button for the first time, the DAP indicator lights up and the previously selected DAP mode comes into effect. Each time you press the button then, the DAP modes change as follows:

Dance CLUB	Gives a throbbing bass beat.
Live CLUB	Gives the feeling of a live music club with the low ceiling.
HALL	Gives clear vocal and the feeling of a concert hall.
PAVILION	Gives the spacious feeling of a pavilion with the high ceiling.
HeadPHONES*	Gives a spacious stereo effect when listening with headphones.
DAP OFF	No DAP mode is applied.

Note:

\* When you select H PHONES, the H PHONE indicator also lights up on the display.

3. For the DAP modes other than H PHONES:

Press the REAR buttons (+/-) repeatedly to set the output levels of the rear speakers.

Notes:

- You can adjust the sound level in 1 dB step within the range of  $\pm 10$  dB. The sound level of the left and right rear speakers will be identical.
- You can also use the REAR LEVEL buttons (+/-) on the front panel. However, when using the REAR LEVEL buttons (+/-), make sure that the DAP/SURROUND indicator is turned on. If not, press the CURSOR MODE button once so that these buttons can be used for adjusting the output level of the rear speakers.

4. For the DAP modes other than H PHONES:

Press the **EFFECT** buttons (+/-) repeatedly to select the effect depth among 5 preset levels. Pressing **EFFECT +** repeatedly increases the effect depth ("EFFECT-1" to "EFFECT-5"). Pressing **EFFECT -** repeatedly decreases the effect depth ("EFFECT-5" to "EFFECT-1").

For H PHONES:

You can adjust the effect — room size — of the H PHONES only by using the Menu (see page 30).

Using the DAP Modes

On the front panel:

Press the **DAP MODE** button repeatedly until the DAP mode you want appears on the display. When you press the button for the first time, the DAP indicator lights up and the previously selected DAP mode comes into effect. Each time you press the button then, the DAP modes change as follows:

On the front panel

From the remote control:

1. Press the **SOUND CONTROL**. Pressing this button activates the 10 keys for adjusting the sounds.

2. Press the **DAP MODE** button repeatedly until the DAP mode you want appears on the display. When you press the button for the first time, the DAP indicator lights up and the previously selected DAP mode comes into effect. Each time you press the button then, the DAP modes change as follows:

From the remote control

To cancel the DAP mode, press the DAP MODE button repeatedly (after pressing the SOUND CONTROL button when using the remote control) until "DAP OFF" appears on the display. The DAP indicator turns off.

page 30  
and 31. —

## Preparing for the Surround Modes

You can enjoy two types of surround modes — Dolby Surround and JVC's Theater Surround.

### On Dolby Surround

The Dolby Surround has been developed to reproduce the important elements of the acoustic surround at home.

To watch the soundtracks of video software bearing the mark  which includes the same encoded surround information as found in Dolby Stereo films, the receiver can provide you with 2 Dolby Surround modes (Dolby Pro Logic and Dolby 3ch Logic).

**Dolby Pro Logic:** Select this mode when optional rear speakers (and a center speaker) are connected.

**Dolby 3ch Logic:** Select this mode when a center speaker is connected without rear speakers.

### On JVC's Theater (1 and 2) Surround

In order to reproduce a more realistic sound field in your listening room while playing soundtracks of video software bearing the mark , JVC's Theater Surround has been designed to give you clearer vocals and to create the feeling of being there. The sound is reproduced through the front speakers, rear speakers, and center speaker.

## Preparation method for the surround modes

Once you have set the surround modes, you can use the same adjustment every time you want to enjoy the surround you want. The receiver memorizes surround adjustments for each mode.

To use the surround modes, see "Using the Surround Modes" on page 24.

### 1. Select the surround mode you want.

On the front panel:

On the front panel

From the remote control

From the remote control only:  
Press the DELAY button repeatedly.  
(If you have not yet pressed the SOUND CONTROL button, press the SOUND CONTROL button before pressing the DELAY button.)  
Each time you press the DELAY button, the delay time changes among 4 levels as follows:  
DELAY-1 — DELAY-2 — DELAY-3 — DELAY-4

### 2. Select a center mode.

On the front panel only:

Press the CENTER MODE button.  
Each time you press the CENTER MODE button, the center modes change as follows:

WIDE — NORMAL — OFF — PHANTOM

WIDE	Select this mode when the size of the center speaker is the same as that of the front speakers.
NORMAL	Select this mode when the size of the center speaker is smaller than that of the front speakers.
PHANTOM	Select this mode when you don't use a center speaker. (Center channel signals are output through the front speakers.)
OFF	Select this mode to shut off the output of the center channel signal.

Note:

When you have selected 3CH LOGIC, you cannot select PHANTOM.

### 3. Set the delay time of the delayed sound.

From the remote control only:

Press the DELAY button repeatedly.  
(If you have not yet pressed the SOUND CONTROL button, press the SOUND CONTROL button before pressing the DELAY button.)  
Each time you press the DELAY button, the delay time changes among 4 levels as follows:

DELAY-1 — DELAY-2 — DELAY-3 — DELAY-4

DELAY-1	When your distance to the rear speakers is greater than that to the front speakers.
DELAY-2	When your distance to the rear speakers is almost equal to that to the front speakers.
DELAY-3	When your distance to the rear speakers is a little less than that to the front speakers.
DELAY-4	When your distance to the rear speakers is much less than that to the front speakers.

Note:

When you have selected 3CH LOGIC, you cannot adjust the delay time.

### 4. Start checking speaker output balance.

From the remote control only:

Press the TEST button.  
When you press the button, "TEST" starts flashing and a test tone comes out of speakers in the following order:

Left front speaker — Center speaker — Right front speaker — Rear speakers

Notes:

- No test tone comes out of the rear speakers when you have selected 3CH LOGIC.
- No test tone comes out of the center speaker when you select PHANTOM or OFF for the center mode.

To be continued to the next page

On the front panel

From the remote control

From the remote control

From the remote control

## 5. Set the output levels of the center and the rear speakers.

On the front panel:

Press the upper or lower CENTER LEVEL button (+/-) repeatedly to set the sound level of the center speaker.

Press the left or right REAR LEVEL button (+/-) repeatedly to set the sound level of the rear speakers.

From the remote control:

Press the CNTR buttons (+/-) repeatedly to set the sound level of the center speaker.

Press the REAR button (+/-) repeatedly to set the sound level of the rear speakers.

Notes:

- When you use the CENTER LEVEL buttons (+/-) or REAR LEVEL buttons (+/-), make sure that the DAPSURROUND indicator is turned on. If not, press the CURSOR MODE button once so that these buttons can be used for adjusting the output level of the center/rear speakers.
- You can adjust these levels in 1 dB step within the range of  $\pm 10$  dB. The sound levels of the left and right rear speakers will be identical.
- You cannot set the sound level of the rear speakers when you have selected 3CH LOGIC.
- You cannot set the sound level of the center speaker when you select PHANTOM or OFF for the center mode.

## 6. Finish checking speaker output balance.

From the remote control only:

Press the TEST button again.

The test tone stops.

## 7. Only for JVC's Theater Surround:

Select the effect depth among 5 preset levels.

From the remote control only:

Pressing EFFECT + repeatedly increases the effect depth ("EFFECT-1" to "EFFECT-5").

Pressing EFFECT - repeatedly decreases the effect depth ("EFFECT-5" to "EFFECT-1").

Note:

When you have selected Dolby Surround modes, you cannot select the effect depth.

## Using the Surround Modes

On the front panel:

- Press the SURROUND MODE button repeatedly until the surround mode you want appears on the display.

When you press the button for the first time, the SURROUND indicator lights up and the previously selected surround mode comes into effect. Each time you press the button then, the surround modes change as follows:

- Play a sound source which was processed with Dolby Surround and is labeled with

To cancel the surround mode, press the SURROUND MODE button repeatedly until "SURR OFF" appears on the display.

The SURROUND indicator turns off.

From the remote control:

- Press the SOUND CONTROL.

Pressing this button activates the 10 keys for adjusting the sounds.

- Press the SURR MODE button repeatedly until the surround mode you want appears on the display.

When you press the button for the first time, the SURROUND indicator lights up and the previously selected surround mode comes into effect. Each time you press the button then, the surround modes change as follows:

- Play a sound source which was processed with Dolby Surround and is labeled with

To cancel the surround mode, press the SURR MODE button repeatedly (after pressing the SOUND CONTROL button when using the remote control) until "SURR OFF" appears on the display.

The SURROUND indicator turns off.

## Making dialogues in movies softer or clearer

By using the CENTER TONE control you can adjust the level of mid-frequency range, which the human voice is mostly made up of.

To make dialogues clearer, turn the CENTER TONE control toward SHARP.

To make them softer, turn the CENTER TONE control toward SOFT.

When set to the FLAT position, no adjustment is applied.

Note:

The CENTER TONE control can be used only for the surround modes; however, it cannot be used when sounds do not come out of the center speaker.

The receiver has some other features like the CSRP function, the Sleep Timer and the Visual Confirmation. By using these useful features your audio/video life will be much improved.

### Using the CSRP Function

The optimum sound settings differ for each playing source. So, you have to change settings each time you select a different source.

The JVC's CSRP (COMPU LINK Source-Related Preset) function is used to assign and store different sound settings for each different playing source. By using this function, you don't have to change the settings every time you change the source. The stored settings for the newly selected source are automatically recalled.

The following can be stored for each source:

- Volume level (see page 11)
- Loudness (see page 12)
- SEA modes (see page 16)
- DAP mode settings (see page 19)
- Surround mode settings (see page 21)

#### Note:

If the source is FM or AM, the CSRP function works only when one of the preset channels from 1 — 20 is tuned in. You can assign a different setting for each preset channel.

#### To store the sound settings by using the CSRP function

1. Press the CSRP button.

The CSRP indicator lights up on the display.

2. Select the sound effects listed above while the CSRP indicator is lit on the display.

#### To recall the sound settings

Whenever the CSRP indicator is lit on the display, the settings for the currently selected source is always recalled.

To cancel the CSRP function, press the CSRP button so that the CSRP indicator goes off from the display. (Even though the CSRP function is canceled, recalled sound effects remains active.)

On the front panel

From the remote control

### Using the Sleep Timer

Using the Sleep Timer, you can fall asleep to music and know the receiver will turn off by itself rather than play all night.

#### To set the Sleep Timer

Press the SLEEP button on the remote control repeatedly.

The SLEEP indicator lights up and the shut-off time appears on the display.

Each time you press the button, the shut-off time on the display changes as follows:

The receiver will turn off after the time you have set.

#### To check or change the time remaining until the shut-off time

Press the SLEEP button once. The remaining time is displayed in minutes.

If you press the button repeatedly, you can change the shut-off time.

#### To cancel the Sleep Timer

Press the SLEEP button repeatedly until the SLEEP indicator goes off.

### Using the Visual Confirmation

See also  
page 31.

When you press a certain button or turn a control knob on the front panel, you can see what you are doing, by showing the Menus (see pages 27 to 32) on the TV screen.

To use this function, you need to connect the TV to the MONITOR OUT jack on the rear panel (see page 7), and set the TV's input mode to the proper position to which the receiver is connected.

When the TV's input mode is for TV, you cannot see the on-screen display.

#### To activate the Visual Confirmation

Press the VISUAL CONFIRMATION button on the front panel so that the VISUAL CONFIRMATION indicator lights up on the display.

#### EXAMPLES:

When you turn the SOURCE SELECTOR:

The SOURCE SELECT Menu appears for about 5 seconds.

When you press the FM/AM button:

If the tuning mode is "manual":  
The TUNER BAND/TUNING Menu appears for about 5 seconds.

If the tuning mode is "preset":

The TUNER PRESET CH. Menu appears for about 5 seconds.

#### To cancel the Visual Confirmation

Press the VISUAL CONFIRMATION button again so that the VISUAL CONFIRMATION indicator goes off.

## Using the On-Screen Display to Control the Receiver

You can use the Menus on the TV screen to control the receiver.

To use this function, you need to connect the TV to the MONITOR OUT jack on the rear panel (see page 7), and set the TV's input mode to the proper position to which the receiver is connected. When the TV's input mode is for TV, you cannot see the on-screen display.

### CAUTION:

When you use the Menus, make sure that you have connected a TV and operate the Menus while watching the on-screen displays on the TV.

### Note:

Menus screens used in the following explanations are of those with the "TRANSPARENT" function set to "ON." If you used the Menu with this function "OFF," the Menu screens you see are slightly different—they will have the grey background around the Menu items. (See page 32.)

## Basic Procedures

1. Press any of the cursor buttons (Δ, ∇, ◀, ▶) or the MENU SET button. The MAIN MENU (see On-Screen 1) appears on the TV screen.

2. Press the cursor buttons (Δ, ∇) to move **CF** to the Sub-Menu you want to set, then press the MENU SET button. The Sub-Menu you want appears.

3. Press the cursor buttons (Δ, ∇, ◀, ▶) to move **CF** to the item you want to set. Δ, ∇: Move **CF** up and down. ◀, ▶: Move **CF** to the left and right.

4. Press the cursor buttons (◀, ▶) to change the setting for the selected item.

5. When you finish, press the MENU EXIT button. The Menu disappears from the TV screen.

To go back to the MAIN MENU (or previous Menus) any time while using the Menus Press the cursor buttons (Δ, ∇, ◀, ▶) to move **CF** to RETURN, then press the MENU SET button.

To go to the next screens Press the cursor buttons (Δ, ∇, ◀, ▶) to move **CF** to NEXT, then press the MENU SET button.

On-Screen 1

## Adjusting the volume (see also page 11)

1. Press any of the cursor buttons (Δ, ∇, ◀, ▶) or the MENU SET button. The MAIN MENU appears on the TV screen.

2. Press the cursor buttons (Δ, ∇) to move **CF** to "VOLUME". See On-Screen 2.

3. Press the cursor buttons (◀, ▶) to adjust the volume.

4. When you finish, press the MENU EXIT button. The Menu disappears from the TV screen.

On-Screen 2

## Selecting the source (see also page 10)

1. Press any of the cursor buttons (Δ, ∇, ◀, ▶) or the MENU SET button. The MAIN MENU appears on the TV screen.

2. Press the MENU SET button. The SOURCE SELECT Menu (see On-Screen 3) appears.

3. Press the cursor buttons (Δ, ∇, ◀, ▶) to move **CF** to the source you want to play, then press the MENU SET button.

4. When you finish, press the MENU EXIT button. The Menu disappears from the TV screen.

On-Screen 3

## Tuning into stations and storing into memory (see also page 13)

1. Press any of the cursor buttons (Δ, ∇, ◀, ▶) or the MENU SET button. The MAIN MENU appears on the TV screen.

2. Press the cursor buttons (Δ, ∇) to move **CF** to "TUNER", then press the MENU SET button. The TUNER PRESET CH. Menu (see On-Screen 4) appears.

On-Screen 4

3. Press the cursor buttons (Δ, ∇, ◀, ▶) to move **CF** to "TUNING", then press the MENU SET button. The TUNER BAND/TUNING Menu (see On-Screen 5) appears.

On-Screen 5

4. Press the cursor buttons (◀, ▶) to select either "FM" or "AM".

5. Press the cursor buttons (Δ, ∇) to move **CF** to "TUNING".

6. Press the cursor buttons (◀, ▶) to tune in the stations.

7. Press the cursor buttons (Δ, ∇) to move **CF** to "MEMORY", then press the MENU SET button. The PRESET CH. MEMORY Menu (see On-Screen 6) appears.

On-Screen 6

8. Press the cursor buttons (Δ, ∇) to move **CF** to select a preset channel number, then press the MENU SET button. See On-Screen 7.

On-Screen 7

To go to the next (or previous) screens, move **CF** to " " (or " " ), then press the MENU SET button repeatedly.

9. Press the cursor buttons (Δ, ∇, ◀, ▶) to move **CF** to "FINISH", then press the MENU SET button. The TUNER BAND/TUNING Menu appears again.

To cancel presetting the station, move **CF** to "CANCEL", then press the MENU SET button.

10. Repeat steps 4 to 9 until you preset all stations you want.

11. When you finish, press the MENU EXIT button. The Menu disappears from the TV screen.

## Tuning in a preset station (see also page 14)

1. Press any of the cursor buttons (Δ, ∇, ◀, ▶) or the MENU SET button. The MAIN MENU appears on the TV screen.

2. Press the cursor buttons (Δ, ∇) to move **CF** to "TUNER", then press the MENU SET button. The TUNER PRESET CH. Menu (see On-Screen 8) appears.

3. Press the cursor buttons (Δ, ∇) to move **CF** to the preset station you want, then press the MENU SET button.

To go to the next (or previous) screens, move **CF** to " " (or " " ), then press the MENU SET button repeatedly.

4. When you finish, press the MENU EXIT button. The Menu disappears from the TV screen.

On-Screen 8

### Assigning names to preset stations (see also page 15)

1. Press any of the cursor buttons (Δ, ∇, ◀, ▶) or the MENU SET button.  
The MAIN MENU appears on the TV screen.

On-Screen 9

2. Press the cursor buttons (Δ, ∇) to move ◀ to "TUNER", then press the MENU SET button.  
The TUNER PRESET CH. Menu (see On-Screen 9) appears.

3. Press the cursor buttons (Δ, ∇) to move ◀ to a preset station you want, then press the MENU SET button.

To go to the next (or previous) screens, move ◀ to "◀" (or "▶") then press the MENU SET button repeatedly.

4. Press the cursor buttons (Δ, ∇) to move ◀ to "CHARACTER", then press the MENU SET button.

The CHARACTER INPUT Menu (see On-Screen 10) appears.

5. Press the cursor buttons (Δ, ∇, ◀, ▶) to assign a name to the preset channel.

Δ, ∇: Selects the characters.

◀, ▶: Move the character input position to the left or right.

To erase the name, move ◀ to "CLEAR", then press the MENU SET button.

6. Press the cursor button (▶) to move ◀ to "FINISH", then press the MENU SET button.  
The TUNER PRESET CH. Menu appears again.

To cancel the assignment, move ◀ to "CANCEL", then press the MENU SET button.

7. Repeat steps 3 to 6 until you assign names to other preset stations you want.

8. When you finish, press the MENU EXIT button.  
The Menu disappears from the TV screen.

On-Screen 10

### Selecting your favorite SEA mode (see also page 16)

1. Press any of the cursor buttons (Δ, ∇, ◀, ▶) or the MENU SET button.  
The MAIN MENU appears on the TV screen.

2. Press the cursor buttons (Δ, ∇) to move ◀ to "SEA", then press the MENU SET button.  
The SEA MODE Menu (see On-Screen 11) appears.

3. Press the cursor buttons (Δ, ∇) to move ◀ to the SEA mode you want, then press the MENU SET button.

4. When you finish, press the MENU EXIT button.  
The Menu disappears from the TV screen.

On-Screen 11

### Creating your own SEA mode (see also page 17)

1. Select the SEA mode using the above procedures (Steps 1 to 3).

2. Press the cursor buttons (Δ, ∇) to move ◀ to "SEA ADJUST", then press the MENU SET button.

The SEA MANUAL CONTROL Menu (see On-Screen 12) for the SEA mode you have selected appears.

3. Press the cursor buttons (Δ, ∇, ◀, ▶) to adjust the SEA mode as you want.

◀, ▶: Select the frequency ranges.

Δ, ∇: Adjust the frequency levels.

4. Press the cursor button (▶) to move ◀ to "FINISH", then press the MENU SET button.  
The adjustment is memorized in USER MODE and the SEA MODE Menu appears again.

To cancel the adjustment, move ◀ to "CANCEL", then press the MENU SET button.

5. When you finish, press the MENU EXIT button.  
The Menu disappears from the TV screen.

On-Screen 12

### Using the DAP modes (see also page 20)

1. Press any of the cursor buttons (Δ, ∇, ◀, ▶) or the MENU SET button.  
The MAIN MENU appears on the TV screen.

2. Press the cursor buttons (Δ, ∇) to move ◀ to "DAP", then press the MENU SET button.

3. The DAP MODE Menu (see On-Screen 13) appears.

4. Press the cursor buttons (Δ, ∇, ◀, ▶) to move ◀ to the DAP mode you want, then press the MENU SET button.

5. When you finish, press the MENU EXIT button.  
The Menu disappears from the TV screen.

On-Screen 13

### Preparing for the DAP modes (see also page 19)

You can adjust "DANCE CLUB, LIVE CLUB, HALL, and PAVILION" without using the Menus; however, you can adjust "HEAD PHONES" only using the Menus.

1. Select the DAP mode using the above procedures (steps 1 to 3).
2. Press the cursor buttons (Δ, ∇, ◀, ▶) to move ◀ to "PARAMETER", then press the MENU SET button.

The Parameter Setting Menu for the DAP mode you have selected appears.

Example: For HEAD PHONES

Example: For DANCE CLUB

3. Press the cursor buttons (Δ, ∇, ◀, ▶) to adjust the parameters you want.

Δ, ∇: Selects the parameters

◀, ▶: Adjust the parameters

For "HEADPHONES":

Selecting the higher number for ROOM SIZE makes you feel as if you were in a larger room.

For other modes, see the pages referred above.

4. When you finish, press the MENU EXIT button.

The Menu disappears from the TV screen.

### Using the surround modes (see also page 24)

1. Press any of the cursor buttons (Δ, ∇, ◀, ▶) or the MENU SET button.  
The MAIN MENU appears on the TV screen.

2. Press the cursor buttons (Δ, ∇) to move ◀ to "SURROUND", then press the MENU SET button.

The SURROUND MODE Menu (see On-Screen 14) appears.

3. Press the cursor buttons (Δ, ∇, ◀, ▶) to move ◀ to the surround mode you want, then press the MENU SET button.

4. When you finish, press the MENU EXIT button.  
The Menu disappears from the TV screen.

On-Screen 14

# **Preparing for the surround modes (see also page 21)**

1. Select the surround mode using the above procedures (steps 1 to 3).

2. Press the cursor buttons (Δ, ▽, ◀, ▶) to move **CF** to "PARAMETER", then press the MENU SET button.

The Parameter Setting Menu for the surround mode you have selected appears.

Example: For PRO LOGIC  
Δ, ▽: Selects the parameters  
◀, ▶: Adjust the parameters  
For more details, see the pages referred above.

4. When you finish, press the MENU EXIT button.  
The Menu disappears from the TV screen.

## **Using the Sleep Timer (see also page 25)**

1. Press any of the cursor buttons (Δ, ▽, ◀, ▶) or the MENU SET button.  
The MAIN MENU appears on the TV screen.

2. Press the cursor buttons (Δ, ▽) to move **CF** to "OTHER SETTINGS", then press the MENU SET button.

The OTHER SETTINGS Menu appears.

For RX-818VBK

3. Press the cursor buttons (◀, ▶) to select off-time.
4. When you finish, press the MENU EXIT button.  
The Menu disappears from the TV screen.

## **Using the Visual Confirmation (see also page 26)**

1. Press any of the cursor buttons (Δ, ▽, ◀, ▶) or the MENU SET button.  
The MAIN MENU appears on the TV screen.

2. Press the cursor buttons (Δ, ▽) to move **CF** to "OTHER SETTINGS", then press the MENU SET button.

The OTHER SETTINGS Menu appears.

3. Press the cursor buttons (Δ, ▽) to move **CF** to "VISUAL CONFIRMATION".

For RX-880VBK

4. Press the cursor buttons (◀, ▶) to switch on or off the Visual Confirmation.
5. When you finish, press the MENU EXIT button.  
The Menu disappears from the TV screen.

# **Setting the grey background around the Menu items on the TV screen**

You can put or erase the grey background around the Menu items according to your preference. This setting is possible only using the Menus.

1. Press any of the cursor buttons (Δ, ▽, ◀, ▶) or the MENU SET button.  
The MAIN MENU appears on the TV screen.

2. Press the cursor buttons (Δ, ▽) to move **CF** to "OTHER SETTINGS", then press the MENU SET button.

The OTHER SETTINGS Menu appears.

3. Press the cursor buttons (Δ, ▽) to move **CF** to "TRANSPARENT".

For RX-818VBK

For RX-880VBK

4. Press the cursor buttons (◀, ▶) to set it "ON" or "OFF".

ON: to erase the grey background.

OFF: to put the grey background.

5. When you finish, press the MENU EXIT button.  
The Menu disappears from the TV screen.

## **Using the Partial On-Screen function (only for RX-880VBK)**

This is convenient when you use RX-880VBK while watching video sources. Some operations you do, listed to the left, will be shown on the bottom of the TV screen. This setting is possible only using the Menus.

1. Press any of the cursor buttons (Δ, ▽, ◀, ▶) or the MENU SET button.  
The MAIN MENU appears on the TV screen.

2. Press the cursor buttons (Δ, ▽) to move **CF** to "OTHER SETTINGS", then press the MENU SET button.

The OTHER SETTINGS Menu appears.

3. Press the cursor buttons (Δ, ▽) to move **CF** to "PARTIAL ON-SCREEN".  
See On-Screen 15.

4. Press the cursor buttons (◀, ▶) to set it "ON" or "OFF".

ON: to show what you do on the TV.

OFF: not to show what you do on the TV.

5. When you finish, press the MENU EXIT button.  
The Menu disappears from the TV screen.

On-Screen 15

## **Using the demonstration**

You can see the demonstration of Menu operation. This is possible only using the Menus.

1. Press any of the cursor buttons (Δ, ▽, ◀, ▶) or the MENU SET button.  
The MAIN MENU appears on the TV screen.

2. Press the cursor buttons (Δ, ▽) to move **CF** to "OTHER SETTINGS", then press the MENU SET button.

The OTHER SETTINGS Menu appears.

3. Press the cursor buttons (Δ, ▽) to move **CF** to "AUTO DEMO START", then press the MENU SET button.

For RX-818VBK

For RX-880VBK

4. When you finish, press the MENU EXIT button.  
The Menu disappears from the TV screen, and the demonstration stops.

The COMPU LINK remote control system allows you to operate JVC audio components through the remote sensor on the receiver.

To use this remote control system, you need to connect JVC audio components through the COMPU LINK-3 SYNCHRO jacks (see page 8) in addition to the connections using cables with RCA pin plugs (see page 7). This remote control system allows you to use four functions listed below.

Refer also to the manuals supplied with your audio components.

#### ■ Remote Control through the Remote Sensor on the Receiver

You can control all components through the remote sensor on the receiver using this remote control. For details, see page 35.

#### Note:

*Aim the remote control directly at the remote sensor on the receiver.*

#### ■ Automatic Source Selection

When you press the play (▶) button on a connected component or on its own remote control, the receiver automatically turns on and changes the source to the component. On the other hand, if you select a new source on the receiver or the remote control, the selected component begins playing immediately.

In both cases, the previously selected source continues playing without sound for a few seconds.

#### ■ Automatic Power On/Off (only possible with the COMPU LINK-3 connection)

Both the CD player and cassette deck turn on and off along with the receiver.

When you turn on the receiver, the CD player or cassette deck will turn on automatically, depending on which component has been previously selected.

When you turn off the receiver, both the CD player and cassette deck will turn off.

#### ■ Synchronized Recording

Synchronized recording means the cassette deck starts recording as soon as a CD or a record begins playing.

To use synchronized recording, follow these steps:

1. Put a tape in the cassette deck, and a disc in the CD player (or a record on the turntable).
2. Press the record (●) button and the pause (⏏) button on the cassette deck at the same time.

This puts the cassette deck into recording pause.

#### Note:

*If you do not press the record (●) button and pause (⏏) button at the same time, the synchronized recording feature will not operate.*

#### 3 Press the play (▶) button on the CD player or on the turntable.

The source changes on the receiver, and as soon as play starts, the cassette deck starts recording. When the play ends, the cassette deck enters recording pause, and stops about 4 seconds later.

#### Notes:

- During synchronized recording, the selected source cannot be changed.
- If your CD player is playing in program mode, a 4-second blank is recorded between tracks so that the music scan feature of your cassette deck can be used on the recorded tape.
- If the power of any component is shut off during synchronized recording, the COMPU LINK remote control system may not operate properly. In this case, you must start again from the beginning.

## AV COMPU LINK

The AV COMPU LINK remote control system allows you to operate JVC video components through the receiver.

To use this remote control system, you need to connect JVC video components through the AV COMPU LINK jacks in addition to the connections using cables with RCA pin plugs (see pages 7 and 8). However, this remote control system cannot control video components connected to the VIDEO 1 and VIDEO 2 jacks. So, when you connect the VCR you want to operate using the AV COMPU LINK remote control system, connect it to the VCR jacks.

This remote control system allows you to use four functions listed below.

Refer also to the manuals supplied with your video components.

#### ■ Remote Control of the TV through the Remote Sensor on the Receiver

You can control the TV through the remote sensor on the receiver using this remote control. For details, see page 36.

#### Note:

*Aim the remote control directly at the remote sensor on the receiver when operating the TV. (However, to operate the VCR, always aim the remote control directly at the remote sensor on the VCR.)*

#### ■ One-Touch Video Play

Simply by inserting a video cassette without its safety tab into the VCR, you can enjoy the video playback without setting other switches manually.

The receiver automatically turns on and changes the source to the VCR.

The TV automatically turns on and changes the input mode to the position you can view the VCR playback. When you insert a video cassette with its safety tab, press the play (▶) button on the VCR or on the remote control. So, you can get the same result.

#### Note:

*When you connect an S-VHS VCR as described on page 8, you cannot see the on-screen displays (such as Visual Confirmation and Menus) since the AV COMPU LINK Remote Control System automatically changes the TV' input mode to "Video input 1" when you operate the S-VHS VCR.*

*If you do not mind stopping watching the video, you can then show the on-screen displays after changing the TV' input mode to the position (Video input 2) the receiver is connected to.*

#### ■ Automatic Selection of TV's Input Mode

When you select TV SOUND as the source to play on the receiver, the TV automatically changes the input mode to the TV tuner so that you can watch TV.

On the other hand, when you select any other source other than TV SOUND as the source to play on the receiver, the TV automatically changes the input mode to the video input.

#### Note:

*When you select TV SOUND as the source on the receiver, you cannot see the on-screen displays (such as Visual Confirmation and Menus) since the AV COMPU LINK Remote Control System automatically changes the TV' input mode to the TV tuner.*

*If you do not mind stopping listening to the TV sounds, you can then show the on-screen displays after changing the TV' input mode to the position (Video input 2) the receiver is connected to.*

#### ■ Automatic Power On/Off

Both the TV and the VCR turn on and off along with the receiver.

When you turn on the receiver:

- If the previously selected source is VCR, the TV and VCR will turn on automatically.
- If the previously selected source is VIDEO 1, VIDEO 2 or TV SOUND, only the TV will turn on automatically.

When you turn off the receiver, both the TV and VCR will turn off.

#### Note:

*If you turn off the receiver while recording on the VCR, the VCR will not turn off, but continue recording.*

## Using the Remote Control for Operating JVC's Audio/Video Components

You can operate JVC's audio and video components with this receiver's remote control, since control signals for JVC components are preset in the remote control.

To operate these components with the remote control, first select a source with the source selecting buttons on the remote control. Then, operate that source using the remote control.

### Notes:

- If you use the buttons on the front panel or the Menu to choose a source, the remote control will not operate that source. To operate a source with the remote control, the source must be selected using buttons on the remote control.
- Check to see if its remote control mode selector is set to the correct position. To operate audio system, TVs, and VCRs, set it to the "AUDIO/TV/VCR" position.
- Refer also to the manuals supplied with your components.

### IMPORTANT:

- To operate JVC's audio components using this remote control:
- You need to connect JVC audio components through the COMPU LINK-3 SYNCHRO jacks (see page 8) in addition to the connections using cables with RCA pin plugs (see page 7).
- Aim the remote control directly at the remote sensor on the receiver.

### Tuner

After pressing the FM/AM button (with the remote control mode selector set to the "AUDIO/TV/VCR" position), you can perform the following operations:

**FM/AM:** Alternates between FM and AM.  
**1 — 10, +10:** Selects a preset channel number directly.  
To select channel number 5, press 5. For channel number 15, press +10, then 5. For channel number 20, press +10, then 10.

### FM MODE/MUTE:

Changes the FM reception mode.

### Sound control section (Amplifier)

After pressing the SOUND CONTROL button (with the remote control mode selector set to the "AUDIO/TV/VCR" position), you can perform the following operations:

**SEA MODE:** Changes the SEA modes.

**DAP MODE:** Changes the DAP modes.

**SURR MODE:** Changes the surround modes.

**CNTR +/-:** Changes the center modes for surround modes.

**REAR +/-:** Changes the rear speaker output level for DAP and surround modes.

**EFFECT +/-:** Changes the effect level for DAP and surround modes.

**DELAY:** Changes the delay time for surround modes.

**TEST:** Checks the speaker output level for surround.

### CD player

After pressing the CD button or the CD TRACK button (with the remote control mode selector set to the "AUDIO/TV/VCR" position), you can perform the following operations on a CD player:

**PLAY:**

Starts playing.

◀▶ Returns to the beginning of the current (or previous) track.

▶▶ Skips to the beginning of the next track.

STOP: Stops playing.

PAUSE: Pauses playing. To release it, press the PLAY button.

**1 — 10, +10:** Selects a track number directly.

To select track number 5, press 5. For track number 15, press +10, then 5. For track number 20, press +10, then 10.

### CD player-changer

After pressing the CD DISC button (with the remote control mode selector set to the "AUDIO/TV/VCR" position), you can perform the following operations on a CD player-changer:

**PLAY:**

Starts playing.

◀▶ Returns to the beginning of the current (or previous) track.

▶▶ Skips to the beginning of the next track.

STOP: Stops playing.

PAUSE: Pauses playing. To release it, press the PLAY button.

**1 — 6, 7/P:** Select the number of a disc installed in a CD player-changer.

After pressing the CD TRACK button:

**1 — 10, +10:** Selects a track number directly.

To select track number 5, press 5. For track number 15, press +10, then 5. For track number 20, press +10, then 10.

### Note:

- If you have the CD player-changer XL-MC100C and XL-MC100M, 1 — 6 buttons function as the DISC SKIP button.
- Press 2, 4, or 6 to skip to the next disc.
- Press 1, 3, or 5 to skip back to the previous disc.

### Turntable

After pressing the PHONO button (with the remote control mode selector set to the "AUDIO/TV/VCR" position), you can perform the following operations on a turntable:

**PLAY:**

Starts playing.

**STOP:** Stops playing.

### Cassette deck

After pressing the TAPE or TAPE CONTROL button (with the remote control mode selector set to the "AUDIO/TV/VCR" position), you can perform the following operations on a cassette deck:

**PLAY:**

Starts playing.

**REW:** First rewinds the tape from right to left.

**FF:** First rewinds the tape from left to right.

**STOP:** Stops operations.

**PAUSE:** Pauses playing or recording temporarily. To release it, press the PLAY button.

Press this button with the PLAY button to start recording.

**REC:** Press this button with the PAUSE button to enter recording pause (standby).

### Note:

You can use either the TAPE button or the TAPE CONTROL button to activate the buttons listed above. If you press the TAPE button, the playing source also changes to "TAPE." On the other hand, if you press the TAPE CONTROL button, the playing source does not change to "TAPE."

### VCR

After pressing the VCR button or the VCR CONTROL button (with the remote control mode selector set to the "AUDIO/TV/VCR" position), you can perform the following operations on the VCR:

**PLAY:**

Starts playing.

**REW:** Rewinds a tape.

**FF:** Fast winds a tape.

**STOP:** Stops operations.

**PAUSE:** Pauses playing or recording temporarily. To release it, press the PLAY button.

Press this button with the PLAY button to start recording.

**REC:** Press this button with the PAUSE button to enter recording pause (standby).

Changes the channels on the VCR.

**CHANNEL +/-:**

1 — 9, 0: Selects the channels on the VCR.

### Notes:

- You can use either the VCR button or the VCR CONTROL button to activate the buttons listed above. If you press the VCR button, the playing source also changes to "VCR." On the other hand, if you press the VCR CONTROL button, the playing source does not change to "VCR."
- You can also turn the VCR on and off by pressing the VCR POWER button on the remote control.

### TV

After pressing the TV SOUND button (with the remote control mode selector set to the "AUDIO/TV/VCR" position), you can perform the following operations on a TV:

**CHANNEL +/-:**

Changes the channels.

**TV VOLUME +/-:**

Adjusts the volume.

**1 — 9, 0, 100+:**

Selects the channels.

**TV/VIDEO:** Sets the input mode (either TV or VIDEO).

**RETURN:** Alternates between the previously selected channel and the current channel.

### Note:

You can also turn the TV on and off by pressing the TV/CATV/SAT POWER button on the remote control.

### CAUTION:

If you press the cursor buttons (Δ, ∇, ◀, ▶) or the MENU SET button, the Menu setting, for example volume level or surround setting, will change though you have not connected a TV to the receiver. When you use the Menus, make sure that you have connected a TV and operate the Menus while watching the on-screen displays on the TV.

## Operating Other Manufacturers' VCR, TV, CATV Converter, and Satellite Tuners

This remote control supplied with the receiver can transmit control signals for other manufacturers' VCRs, TVs and CATV converters. By changing the transmittable signals from preset ones to the other manufacturers', you can operate the other manufacturer's components using this remote control.

When operating the other manufacturers' components, refer also to the manuals supplied with them. To operate these components with the remote control, first you need to set the manufacturer's code each for VCR, TV, CATV converters, and satellite tuner.

### IMPORTANT

When using the Remote Control, check to see if its remote control mode selector is set to the correct position:  
To operate audio system, TVs, and VCRs, set it to the "AUDIO/TV/VCR" position.  
To operate CATV converters and satellite tuners, set it to the "CATV/SAT" position.

### To change the transmittable signals for operating another manufacturer's TV

1. Set the remote control mode selector to the "AUDIO/TV/VCR" position.
2. Press and hold the TV/CATV/SAT POWER button until you finish the following procedures.
3. Press and hold the TV SOUND button.
4. Enter the manufacturer's code (three digits) using buttons 1 - 9, and 0. See the lists on page 39 to find the code.

### 5. Release the TV/CATV/SAT POWER button.

The following buttons can be used for operating the TV (with the remote control mode selector set to the "AUDIO/TV/VCR" position):

TV/CATV/SAT POWER: Turns on and off TV.

After pressing the TV SOUND button you can perform the following operations on the TV:

CHANNEL +/-: Changes the channels.

TV VOLUME +/-: Adjusts the volume.

1 - 10, 0, +10: Selects the TV channels.

+10 button will function as the ENTER button if your TV requires pressing the ENTER button after selecting a channel number.

TV/VIDEO: Sets the input mode (either TV or VIDEO).

### Note:

Refer also to the manual supplied with your TV.

6. Try to operate your TV by pressing the TV/CATV/SAT POWER button. When your TV turns on or off, you have entered the correct code.

7. If there are more than one code listed for your brand of TV, try each one until the correct one is entered.

### To change the transmittable signals for operating another manufacturer's CATV converter or satellite tuner

1. Set the remote control mode selector to the "CATV/SAT" position.
2. Press and hold the TV/CATV/SAT POWER button until you finish the following procedures.
3. Press and hold the TV SOUND button.
4. Enter the manufacturer's code (three digits) using buttons 1 - 9, and 0. See the lists on page 40 to find the code.

### 5. Release the TV/CATV/SAT POWER button.

After setting the remote control mode selector to the "CATV/SAT" position, you can perform the following operations on the CATV converter or on the satellite tuner:

TV/CATV/SAT POWER: Turns on and off CATV converter or satellite tuner.

CHANNEL +/-: Changes the channels.

1 - 10, 0, +10: Selects the channels.

+10 button will function as the ENTER button if your CATV converter or satellite tuner requires pressing the ENTER button after selecting a channel number.

### Note:

Refer also to the manual supplied with your CATV converter or satellite tuner.

6. Try to operate your CATV converter or satellite tuner by pressing the TV/CATV/SAT POWER button. When it turns on or off, you have entered the correct code.

7. If there are more than one code listed for your brand of CATV converter, try each one until the correct one is entered.

### To change the transmittable signals for operating another manufacturer's VCR

1. Set the remote control mode selector to the "AUDIO/TV/VCR" position.
2. Press and hold the VCR POWER button until you finish the following procedures.
3. Press and hold the VCR button.
4. Enter the manufacturer's code (three digits) using buttons 1 - 9, and 0. See the lists on page 41 to find the code.

### 5. Release the VCR POWER button.

The following buttons can be used for operating the VCR:

VCR POWER: Turns on and off VCR.

After pressing the VCR button or the VCR CONTROL button (with the remote control mode selector set to the "AUDIO/TV/VCR" position), you can perform the following operations on the VCR:

CHANNEL +/-: Changes the channels on the VCR.

1 - 10, 0, +10: Selects the channels on the VCR.

+10 button will function as the ENTER button if your VCR requires pressing the ENTER button after selecting a channel number.

PLAY: Starts playback.

STOP: Stops operations.

PAUSE: Pauses.

REW: Rewinds a tape.

FF: First winds a tape.

REC: Starts recording or enters recording pause.

### Notes:

- You can use either the VCR button or the VCR CONTROL button to activate the buttons listed above. If you press the VCR button, the playing source also changes to "VCR." On the other hand, if you press the VCR CONTROL button, the playing source does not change to "VCR."
- Refer also to the manual supplied with your VCR.

6. Try to operate your VCR by pressing the VCR POWER button. When your VCR turns on or off, you have entered the correct code.

7. If there are more than one code listed for your brand of VCR, try each one until the correct one is entered.

## Troubleshooting

Use this chart to help you solve daily operational problems. If there is any problem you cannot solve, contact your JVC service center.

PROBLEM	POSSIBLE CAUSE	SOLUTION
The display does not light up.	The power cord is not plugged in.	Plug the power cord into an AC outlet.
No sound from speakers.	Speaker signal cables are not connected.	Check speaker wiring and reconnect if necessary.
	The SPEAKERS 1 and 2 buttons are not set correctly.	Press the SPEAKERS 1 and 2 buttons in or out correctly.
	An incorrect source is selected.	Select the correct source.
	Mute is activated.	Press the MUTE button so that the indicator goes off.
Sound from one speaker only.	Speaker signal cables are not connected properly.	Check speaker wiring and reconnect if necessary.
	The BALANCE control is set to one extreme.	Adjust the BALANCE control properly.
Continuous hiss or buzzing during FM reception.	Incoming signal is too weak.	Connect an outside FM antenna or contact your dealer.
	The station is too far away.	Select a new station.
	An incorrect antenna is used.	Check with your dealer to be sure you have a correct antenna.
	Antennas are not connected properly.	Check connections.
Occasional cracking noise during FM reception.	Ignition noise from automobiles.	Move the antenna farther from automobile traffic.
No colors on the on-screen display.	The color system of the connected TV is not NTSC.	Connect an NTSC TV.
Howling during record playing.	Your turntable is too close to speakers.	Move speakers away from the turntable.
Remote control does not work.	The remote control mode selector is not set correctly.	Set the selector correctly either to the "AUDIO/TV/VCR" position or to "CATV/SAT" position.
	There is an obstruction in front of the remote sensor on the receiver.	Remove the obstruction.
	Batteries are weak.	Replace batteries.

Specifications

Amplifier

Output Power	At Stereo operation	120 watts per channel, min. RMS, both channels driven into 8 ohms, 20 Hz to 20 kHz with no more than 0.02% total harmonic distortion.
	At Surround operation Front Channels	100 watts per channel, min. RMS, driven into 8 ohms at 1 kHz with no more than 0.8% total harmonic distortion.
	Center channel	100 watts, min. RMS, driven into 8 ohms at 1 kHz, with no more than 0.8% total harmonic distortion.
	Rear channels	100 watts, min. RMS, driven into 8 ohms at 1 kHz, with no more than 0.8% total harmonic distortion.
Total Harmonic Distortion (8 ohms, 1 kHz)		0.02 %* at 120 watts output (* Measured by JVC Audio Analysis System)
Audio Input Sensitivity/ Impedance (1 kHz)	PHONO (MM) CD, TAPE, TV SOUND, VCR, VIDEO 1, VIDEO 2	2.5 mV/47 k ohms 230 mV/47 k ohms
Audio Output Level	TAPE, VCR	230 mV
Signal-to-Noise Ratio (*66 IHF/78 IHF)	PHONO CD, TAPE, TV SOUND, VCR, VIDEO 1, VIDEO 2	70 dB/78 dB (at REC OUT) 91 dB/80 dB
Frequency Response (8 ohms)	PHONO CD, TAPE, TV SOUND, VCR VIDEO 1, VIDEO 2	20 Hz to 20 kHz (±0.5 dB) 10 Hz to 30 kHz (±1 dB)
RIAA Phono Equalization		±0.5 dB (20 Hz to 20 kHz)
LOUDNESS Control (Volume Control at -40 dB)		+6 ±1 dB at 100 Hz +4 ±1 dB at 10 kHz
S.E.A. Control Range	Center Frequencies	100 Hz, 1 kHz, 10 kHz ±10 dB ±2 dB

Video

Video Input Sensitivity/ Impedance	VCR, VIDEO 1, VIDEO 2	1 Vp-p/75 ohms
Synchronization		Negative
Signal-to-Noise Ratio		45 dB
On-Screen Color System		NTSC

FM tuner (IHF)

Tuning Range	87.5 MHz to 108.0 MHz
Usable Sensitivity	10.8 dBf (0.95 µV/75 ohms)
50 dB Quieting Sensitivity	16.3 dBf (1.8 µV/75 ohms) 38.3 dBf (22.5 µV/75 ohms)
Signal-to-Noise Ratio (IHF-A weighted)	80 dB at 85 dBf 73 dB at 85 dBf
Total Harmonic Distortion	0.15 % at 1 kHz 0.2 % at 1 kHz
Stereo Separation at REC OUT	40 dB at 1 kHz
Capture Ratio	1.5 dB at 85 dBf
Alternate Channel Selectivity	60 dB (±400 kHz)
Frequency Response	30 Hz to 15 kHz (±0.5 dB, -3 dB)

AM tuner

Tuning Range	530 kHz to 1,710 kHz
Usable Sensitivity	300 µV/m 30µV
Signal-to-Noise Ratio	50 dB (100mV/m)

General

Power Requirements	AC 120V , 60 Hz
Power Consumption	300 watts/400 V A 5 watts (in standby mode)
Dimensions (W x H x D)	17 3/16 x 6 3/16 x 15 3/4 inches (435 x 156 x 396 mm)
Mass	29.1 lbs (13.2 kg)

42	OSD SYNC	I	VIDEO SYNCH. signal from IC221	84		--	GND

## ■ LC72131M (IC121) : PLL Synthesizer

### 1. Terminal Layout

XIN	1	20	XOUT
CE	2	19	V <sub>SS</sub>
TDATA	3	18	LPF OUT
CK	4	17	LPF IN
IFDATA	5	16	PD
FM	6	15	V <sub>DD</sub>
MW	7	14	FM OSC
LW	8	13	AM OSC
AUTO/MONO	9	12	IF REQ
POWER	10	11	FM/AM IF

### 2. Block Diagram

### 3. Pin Functions

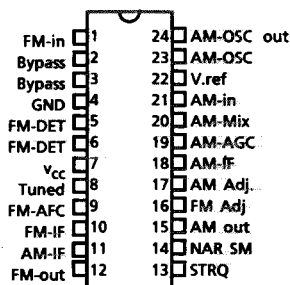

Pin No.	Symbol	I/O	Functions	Pin No.	Symbol	I/O	Functions
1	X in	I	Crystal oscillator (7.2MHz).	11	FM/AM IF	I	Universal counter input
2	CE	I	Fix the chip enable to "H" when inputting (DI) and outputting (DO) the serial data.	12	IF REQ	O	Output the "IF-signal request" to IC102
3	TDATA	I	Receive the control data from the controller (IC201).	13	AM IN	I	Input the local oscillator signal of AM.
4	CK	I	This clock is used to synchronize data when transmitting the data of DI and DO.	14	FM IN	I	Input the local oscillator signal of FM.
5	IFDATA	O	Transmit the data from LC72131M to the controller which is synchronized with CK.	15	V <sub>DD</sub>	—	This is a terminal of power supply.
6	FM	O	It is "L" on FM mode.	16	PD	O	PLL charge pump output : When the local oscillator signal frequency is higher than the reference frequency high level signals will output. When it is lower than the reference frequency, low level signals will output. When it is same as reference frequency signals, it will be floating.
7	MW	O	It is "L" on MW mode.	17	LPF IN	I	Transistor used for the PLL active low-pass filter
8	LW	O	It is "L" on LW mode.	18	LPF OUT	O	Transistor used for the PLL active low-pass filter
9	AUTO/MONO	O	It is "L" on monaural, "H" on auto.	19	V <sub>SS</sub>	—	Connected to GND
10	POWER	O	Regulator control signal PON "H", STANDBY "L"	20	X out	O	Crystal oscillator (7.2MHz).

■ LA1266A (IC104) : FM AM IF AMP & detector

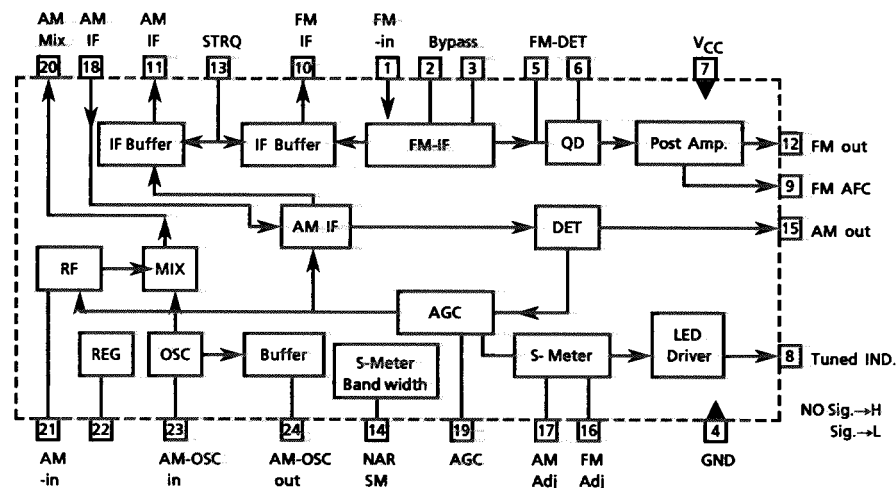

## 1. The main function descriptions

- (1) Amplify and detect of FM intermodulation frequencies.
- (2) It has local oscillator and mixer for AM, and amplify the AM-IF signal.

## 2. Top View

### 3. Block Diagram

#### 4. Pin Function Description

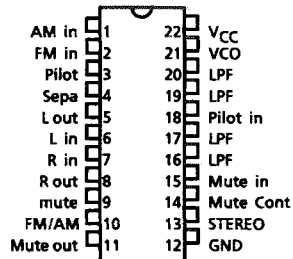

Pin No.	Symbol	I/O	Functions and Operations
1	FM in	I	This is an input terminal of FM IF Signal.
2, 3	Bypass	–	Bypass of FM IF Amp.
4	GND	–	This is the device ground terminal.
5, 6	FM DET	–	FM detect transformer.
7	V <sub>CC</sub>	–	This is the power supply terminal.
8	Tuned	O	When the set is tuning, this terminal become "L".
9	FM AFC	O	This is an output terminal of voltage for FM - AFC.
10	FM IF out	O	When the IF REQ signal of IC251(LC7218) applies to pin13, the signal of FM IF outputs.
11	AM IF out	O	When the IF REQ signal of IC251(LC7218) applies to pin13, the signal of AM IF outputs.
12	FM out	O	FM detection output.
13	STRQ	I	The IF-signals come out from pin10 (FM-IF) or pin11 (AM-IF) while this terminal goes to "High".
14	NAR SM	–	Control the Band-width of AM signal meter.
15	AM out	O	AM detection output.
16	FM Adj	–	For adjust the stop level (or mute level) of FM.
17	AM Adj	–	For adjust the stop level (or mute level) of AM.
18	AM-IF	I	Input of AM IF Signal.
19	AM-AGC	I	This is an AGC voltage Input terminal for AM.
20	AM-MIX	O	This is an output terminal for AM mixer.
21	AM-IN	I	This is an input terminal for AM RF Signal.
22	V.REF	–	Control the Band-width of FM signal meter.
23	AM-OSC	–	This is a terminal of AM Local oscillation circuit.
24	AM-OSC out	O	AM Local Oscillation Signal output.

## ■ LA3401 (IC105) : FM MPX Detector

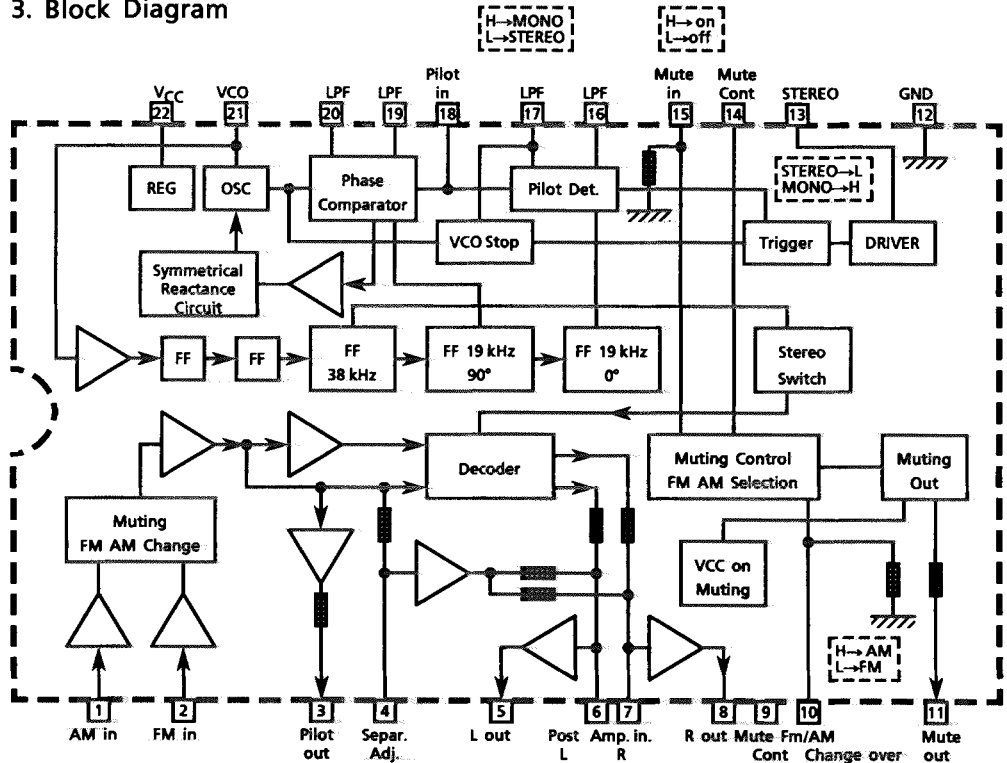

### 1. The main function descriptions

- (1) Detect the FM Multiplex Signal (Stereo signal).
- (2) When receiving FM Stereo Signal, it outputs the signal for indicator.
- (3) AM / FM Audio Amplifier.

### 2. Terminal Layout

### 3. Block Diagram

### 4. Pin Function Description

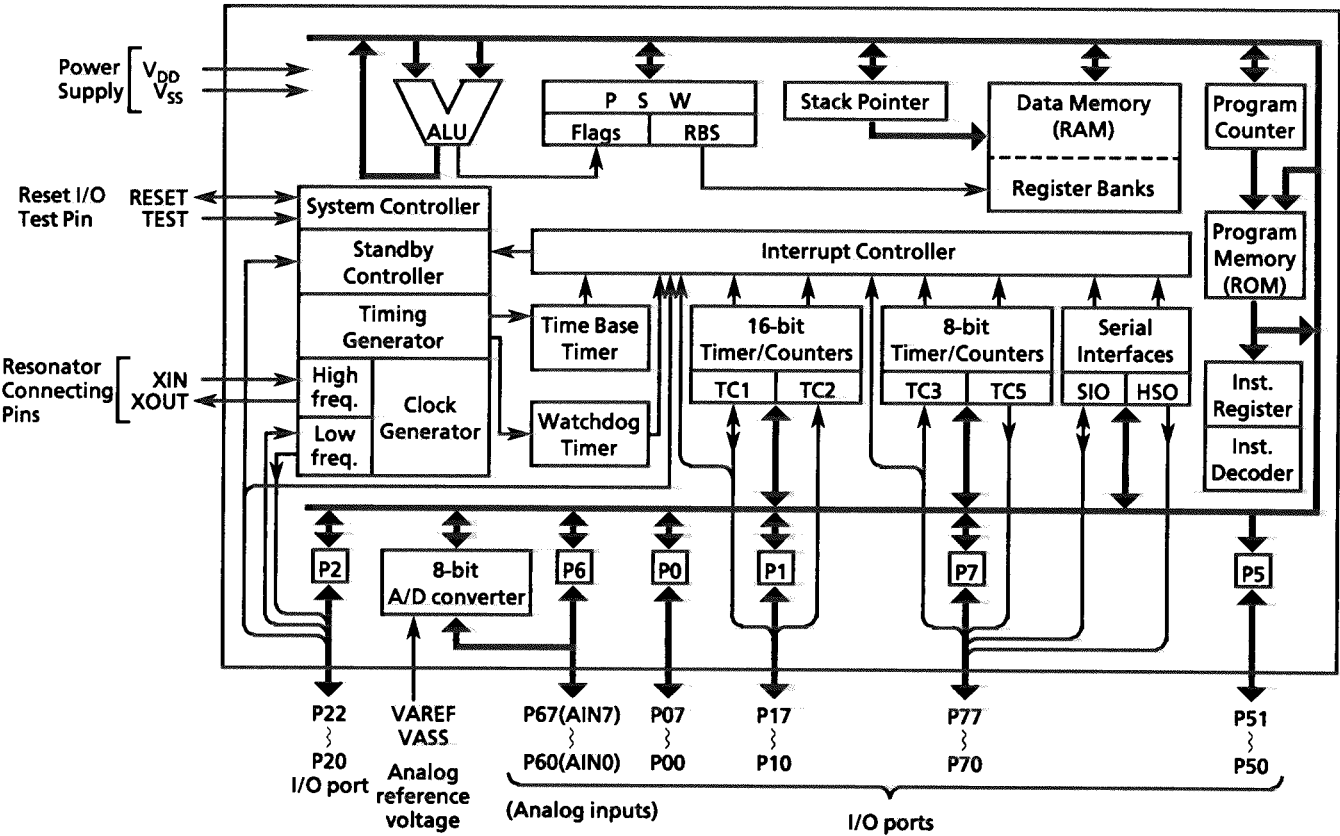

Pin No.	Symbol	I/O	Functions and Operations
1	AM in	I	This is an input terminal for AM detection signal.
2	FM in	I	This is an input terminal for FM detection signal.
3	Pilot out	O	Output of MPX pilot signal (Connect to Pin18).
4	Sepa. Adj.	—	Separation adjustment.
5	L. out	O	Left channel signal output.
6	L	O	Reversal output of Pin5.
7	R	O	Reversal output of Pin8.
8	R out	O	Right channel signal output
9	Mute Cont	—	The mute time is controlled by the connected capacitor when turning the power switch on.
10	FM / AM	I	Change over the FM / AM input. "H" : AM, "L" : FM
11	Mute out	—	Not use
12	GND	—	Ground terminal.
13	Stereo	O	Stereo indicator output. Stereo : "L", Mono : "H"
14	Mute Cont	—	The mute time is controlled by the connected capacitor when changing over the FM / AM .
15	Mute in	I	Mute signal input. "H" : Mute on, "L" : Mute off.
16	LPF	—	Low pass filter of pilot detector.
17	LPF	—	While this terminal goes to "H", the VCO stop.
18	Pilot in	I	Pilot input.
19	LPF	—	Low-pass filter of PLL.
20	LPF	—	Low-pass filter of PLL.
21	VCO	I	Voltage controlled oscillator terminal.
22	V <sub>CC</sub>	—	Power supply.

■ TMP87C847U-4195 (IC096) : CMOS 8-bit Microcontroller

1. Terminal Layout

2. Block Diagram

3. Pin Functions

Pin No.	Symbol	I/O	Functions
1	P73 (SCK)	I	Serial clock input from IC401
2	P72 (PWM/PDO)	I/O	Not used
3	P71 (INT4)	I/O	Not used
4	P70 (INT3/TC3)	I/O	Not used
5	P07 (ACK)	I	Acknowledge signal input from IC081
6	P06 (IFCD)	O	Command/data switching signal to IC081

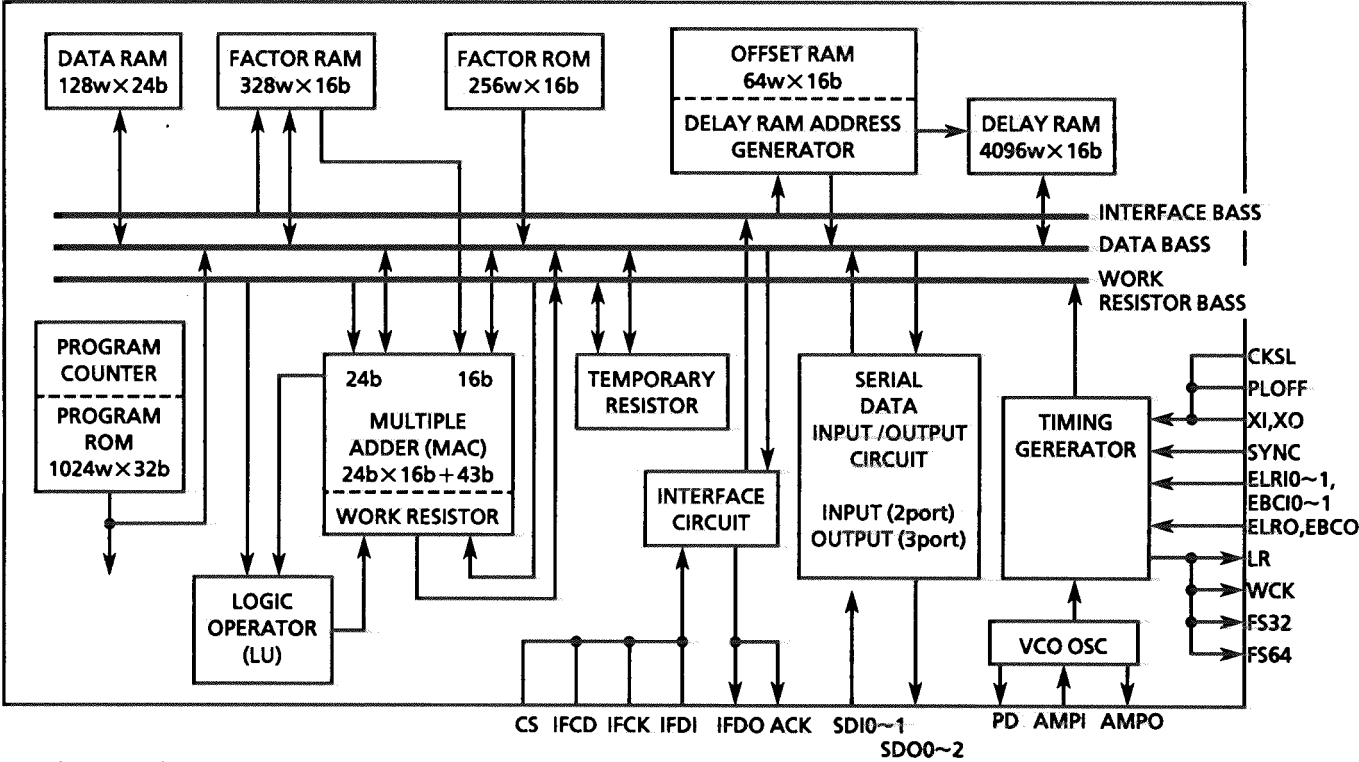

Pin No.	Symbol	I/O	Functions
7	P05 ( $\overline{\text{CS}}$ )	O	Chip select signal output to IC081
8	P04 ( $\overline{\text{RST}}$ )	O	Reset signal output to IC081
9	P03 (TEST0)	I	Test terminal, generally it is used as "L"
10	P02 (TB2)	I	Test terminal, generally it is used as "L"
11	P01 (TB1)	I	Test terminal, generally it is used as "L"
12	P00 (TB0)	I	Test terminal, generally it is used as "L"
13	TEST	I	Test pin for out-going test. Be tied to low
14	$\overline{\text{RESET}}$	I	Reset signal input or watchdog timer output/address-trap-reset output/system-clock-reset output
15	XIN	I	Resonator connecting pins for high-frequency clock. For inputting external clock, XIN is used and XOUT is opened
16	XOUT	O	Not used
17	V <sub>SS</sub>	--	GND
18	VAREF	--	Analog reference voltage
19~26	P60 (AIN0)~ P67 (AIN7)	I/O	Not used
27	P50	O	Not used
28	P51 (MUTE)	O	Mute signal output
29	P10 (INT0)	I/O	Not used
30	P11 ( $\overline{\text{REQ}}$ )	I	External interrupt request signal from IC401
31	P12 ( $\overline{\text{BUSY}}$ )	O	Busy output to IC401
32	P13 (DVO)	I/O	Not used
33	P14 (PPG)	I/O	Not used
34	P15 (VOL STB)	O	Volume strobe signal output for write data to IC341
35	P16 (VOL SI)	O	Volume serial data signal output to IC341
36	P17 (VOL CK)	O	Volume clock output for data transfer to IC341
37	P20 (INT5/STOP)	I/O	Not used
38	P21 (XTIN)	I/O	Not used
39	P22 (XTOUT)	I/O	Not used
40	V <sub>DD</sub>	--	Power supply (5V)
41	P77 (IFDI)	O	Serial data output to IC081
42	P76 (IFCK)	O	Shift clock output to IC081
43	P75 (SO)	I/O	Not used
44	P74 (SI)	I	Serial data input from IC401

■ TC9332F-010 (IC081) : Audio digital signal processor

2. Block Diagram

3. Pin Functions

Pin No.	Symbol	I/O	Functions
1~3	TP8~TP6	O	Test data output, Generally it is used as open
4	V <sub>DD</sub>	--	Power supply
5	V <sub>SS</sub>	--	GND
6~11	TP5~TP0	O	Test data output. Generally it is used as open
12	V <sub>SSR</sub>	--	GND for inner delay RAM (DLRAM)
13	V <sub>DDR</sub>	--	Power supply for inner delay RAM (DLRAM) (5V)
14	V <sub>SS</sub>	--	GND
15	SDO2	O	Not used
16	SDO1	O	Serial data output to IC061

Pin No.	Symbol	I/O	Functions
17	SDO0	O	Serial data output to IC041
18	SDI1	I	Not used
19	SDI0	I	Serial data input from IC021
20	LR	O	LR clock output (1fs)
21	WCK	O	Word clock output (2fs)
22	F532	O	Bit clock output (32fs)
23	F564	O	Bit clock output (64fs)
24	EBC0	I	Bit clock input. Shift clock input for SDO 0/1/2 data output
25	EBC11	I	Bit clock input. Shift clock input for SDI 0/1 data input
26	EBC10	I	Bit clock input. Shift clock input for SDI 0/1 data input
27	ELRO	I	LR clock input for SDO 0/1/2 data output
28	ELR11	I	LR clock input for SDI 0/1 data input
29	ELR10	I	LR clock input for SDI 0/1 data input
30	SYNC	I	Synchronizing signal input. SYNC signal edge sets program counter "0" forcefully. The microprocessor controls the polarity
31	V <sub>DD</sub>	—	Power supply (5V)
32	XI	I	X'tal oscillation terminal
33	XO	O	X'tal oscillation terminal
34	VSS	—	GND
35	CKSL	I	Oscillation clock switching terminal L:384fs, H:512fs
36	PLOFF	I	Oscillation mode switching terminal for 'Xtal and VCO. Built-in VCO oscillation mode in "L" and 'Xtal oscillation mode in "H"
37	PD	O	Phase comparison data output
38	VSSA	—	Analog GND
39	AMPO	O	Amplifier output for L.P.F
40	AMPI	I	Amplifier input for L.P.F
41	VDDA	—	Analog Power supply (5V)
42~44	TES0~TES2	I	Test terminal, Generally it is transmitted from $\mu$ -com when cs is lactive
45	$\overline{\text{RST}}$	I	Reset signal input from IC096
46	$\overline{\text{CS}}$	I	Chip select signal input from IC096
47	IFCD	I	It selects command or data input mode from IC096. It recognizes the command in "H" and the data in "L"
48	IFDI	I	$\mu$ -com data input. Firstly, LSB of data and command are received from IC096.
49	IFDO	O	Data output of data bass. LSB of data bus data is transmitted to $\mu$ -com
50	IFCK	I	Shift clock input form IC096
51	$\overline{\text{ACK}}$	O	Acknowledge signal output for IC096. Acknowledge signal is output when command and data's parity are OK
52	VSS	—	GND
53~60	TP16~TP9	O	Test data output. Generally, it is used as open

■ IC551 : LC7522 (Variable Resistor for SEA Control )

(3) Pin Functions

Pin No.	Pin Name	Functions
1	V <sub>DD</sub>	Power supply +7V for audio signal
18	V <sub>SS</sub>	Ground .
14	V <sub>EE</sub>	Power supply -7V for audio signal.
15	V <sub>CC</sub>	Power supply +5V
2,27	IN 1	Audio signal input
3, 26	IN 2	The inversion signal of the operational amplifier inputs to IN 1 normally. The non-inversion signal of the operational amplifier inputs to IN 2 normally.
16	DI	Data input from the CPU.      Schmitt inverter type
17	CLK	Clock signal input from the CPU.      Schmitt inverter type
4~10 19~25	f1~f7	For connect to band-pass filter. f1~f7x2 ( Left and Right )
11	TEST 1	Not use
12	TEST 2	Not use
13	S	Chip Select
28	NC	Not use

### 3. Pin Functions

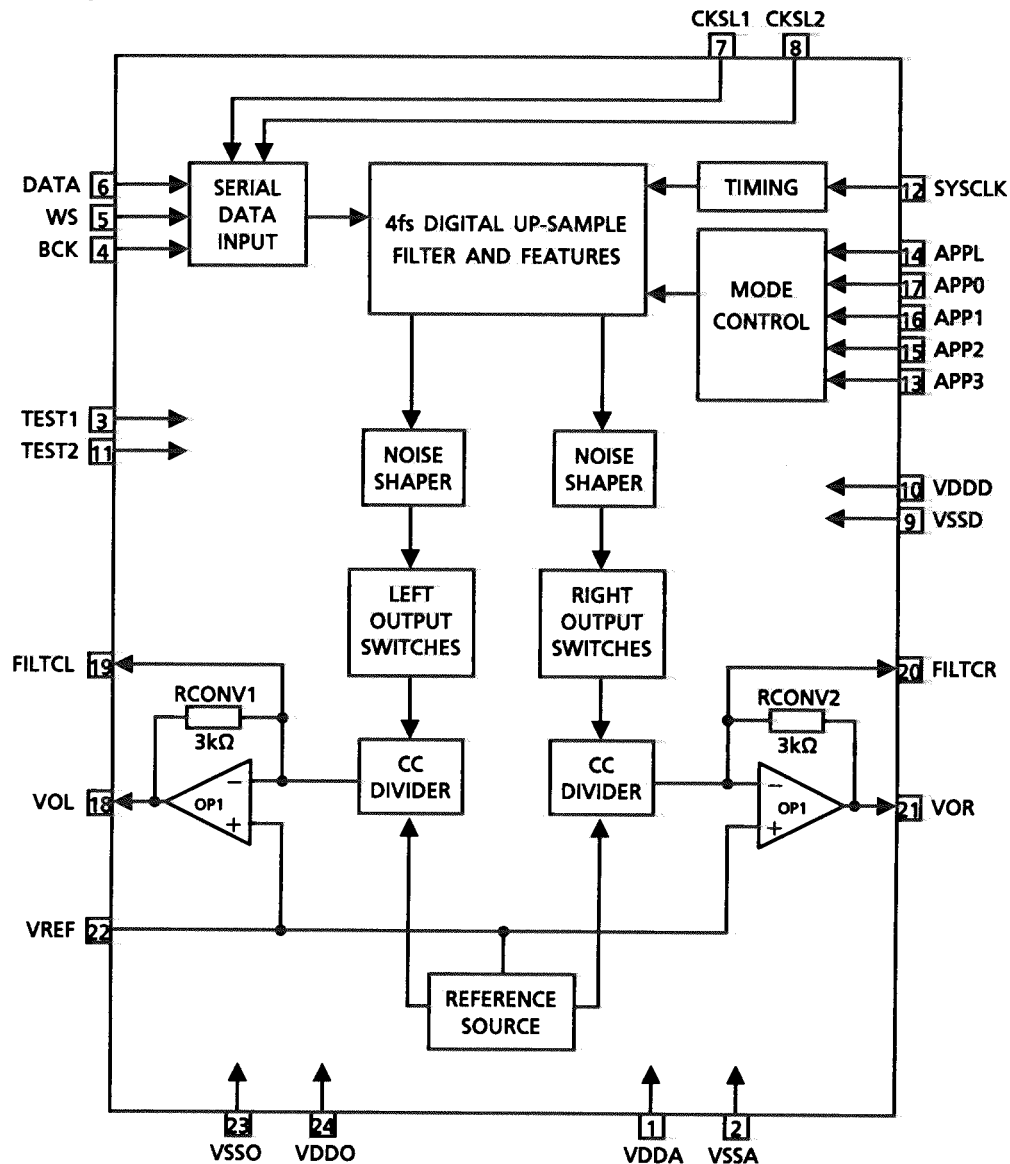

Pin No.	Symbol	I/O	Functions
1	SFOR	I	Input for selecting serial interface output format. HIGH=Format 1 LOW=Format 2
2	STDB	I	Input for selecting STANDBY mode HIGH=Normal operation LOW=STANDBY (Low power consumption)
3	OVLD	O	Overload indication output. This pin indicates whether the internal digital signal is within 1dB of maximum. In STANDBY mode this output is in high impedance
4	CKIN	I	System clock input from IC093
5	VDD	—	Supply for the digital section (5V)
6	VSS	—	Ground supply for the digital section
7	SDO	O	Serial interface data output to IC081. In STANDBY mode this output is in high impedance
8	SWS	I/O	Serial interface word select signal. This pin is the word select input to the serial interface.
9	SCK	I/O	Serial interface clock. This pin is the input for the external bit clock.
10	TEST1	I	Test input 1. This pin should be left open circuit
11	HPEN	I	High pass filter enable input. (HPEN HIGH=enabled). If unconnected this pin defaults HIGH
12	TESETB	I	Test input 2. This pin should be left open circuit
13	VSSA	—	Ground supply for the analogue section
14	IREF	—	Current reference mode
15	VREFR	—	VDDA/2 reference generator for the right channel analog section
16	BIR	I	Buffer op-amp inverting input for right channel
17	BOR	O	Buffer op-amp output for right channel
18	VDACN	I	Negative 1 bit DAC reference voltage input, normally connected to 0V
19	VDACP	I	Positive 1 bit DAC reference voltage input, normally connected to 5V
20	BOL	O	Buffer op-amp output for left channel
21	BIL	I	Buffer op-amp inverting input for left channel
22	VREFL	—	VDDA/2 reference generator for the left channel analog section
23	VDDA	—	Supply for the analog section (5V)
24	SLAVE	I	Input for selecting serial interface operating mode MASTER/SLAVE HIGH=SLAVE, LOW=MASTER If unconnected the pin will default LOW

## 3. Pin Functions

Pin No.	Symbol	I/O	Functions
1	VDDA	--	Analog supply voltage (5V)
2	VSSA	--	Analog ground
3	TEST1	--	Test input 1 ; pin should be connected to ground
4	BCK	I	Bit clock input from IC081
5	WS	I	Word select input from IC081
6	DATA	I	Data input from IC081
7	CKSL1	I	Format selection 1
8	CKSL2	I	Format selection 2
9	VSSD	--	Digital ground
10	VDDD	--	Digital supply voltage (5V)
11	TEST2	--	Test input 2 ; pin should be connected to ground
12	SYSCLK	I	System clock 256fs input from IC093
13	APP3	I	Application mode 3 input
14	APPL	I	Application mode selection input
15	APP2	I	Application mode 2 input
16	APP1	I	Application mode 1 input
17	APP0	I	Application mode 0 input
18	VOL	O	Left channel output
19	FILTCL	O	Capacitor for left channel first-order filter function, should be connected between pins 19 and 18
20	FILTCR	O	Capacitor for right channel first-order filter function, should be connected between pins 20 and 21
21	VOR	O	Right channel output
22	VREF	--	Internal reference voltage for output channels (0.5 VDDO typ.)
23	VSSO	--	Operationnal amplifier ground
24	VDDO	--	Operationnal amplifier supply voltage (5V)

These segments pattern  
are connected to 11G.

The segment pattern of  
13G to 16G is same as above.

## Disassembly Procedures

### (1) Removing the top cover

1. Remove 4 screws ① fastening both sides of top cover, and 3 screws ② fastening the rear side.
2. Remove the top cover.

### (2) Removing the Bottom Cover

1. Remove 14 screws ③ and ③".
2. Remove the bottom cover.

※ The screw ③" which secures the bottom cover is also used for ground.  
It is necessary to ground before checking after the bottom cover is removed.

① ... E61660-004

② ... E73273-003

③, ③" .... SBSG3008CC

### (3) Removing the Front Panel Assembly

1. Removing the top cover.
2. Remove 3 screws ③ fastening top of the front panel, and 4 screws ④ fastening bottom of it.
3. Remove the Center tone knob and Balance knob.
4. Remove the front panel disconnecting some wires. (CN401,CN413,CN512,CN513)

TOP SIDE

BOTTOM SIDE

### (4) Removing the Front P.C. Board

1. Removing the top cover.
2. Removing the front panel assembly.
3. Remove 9 screws ⑤.
4. Remove the Master volume knob, tuner control knob and source selector knob.
5. Remove 2 nut fastening the rotary encoder.
6. Remove a nut fastening the Master volume.
7. Remove the front P.C. Board.

### (5) Removing the Rear Panel

1. Removing the top cover.
2. Remove 19 screws ⑥, ⑥" and 2 screws ④.
3. Remove 2 screws ③ fastening bottom sides of rear panel.
4. Take it out.

※ 4pcs. of screw ⑥" which secure the rear panel are also used for ground.  
Installing of those screws is required before checking.

⑥, ⑥" E73273-003

③ SBSG3008CC

④ SDSG3008M

⑤ SDSF2608Z

## (6) Removing the Power Transistor

1. Remove the top cover and bottom cover.
2. Unsolder the broken transistor.
3. Remove the some screws ⑥ fastening it.
4. Remove it.

⑥ .. E73525-003

## ADJUSTMENT PROCEDURES

### ■ Tuner section

### Tuning range

Area	Range	
	MW (kHz)	FM (MHz)
the U.S.A., Canada	530~1710	87.5MHz~108MHz

### (1) Tuning Voltage

Confirm the voltages in the table at TP101.

#### FM Tuning voltage (Unit : V)

Area	Frequency	
	87.5MHz	108MHz
the U.S.A., Canada,	1.6±1.0	8.0±2.0

#### AM Tuning voltage (Unit : V)

Area	Frequency (MW)						
	522KHz	530KHz	531KHz	1600KHz	1602KHz	1629KHz	1710KHz
the U.S.A., Canada	—	1.0 > 0.5	—	—	—	—	8.0±0.8

### (2) FM Center meter

Receive a broadcast by using the function of 'AUTO STOP'.

Adjust T105 (Detector coil) so that the voltage at TP102 becomes 0±1.5mV.

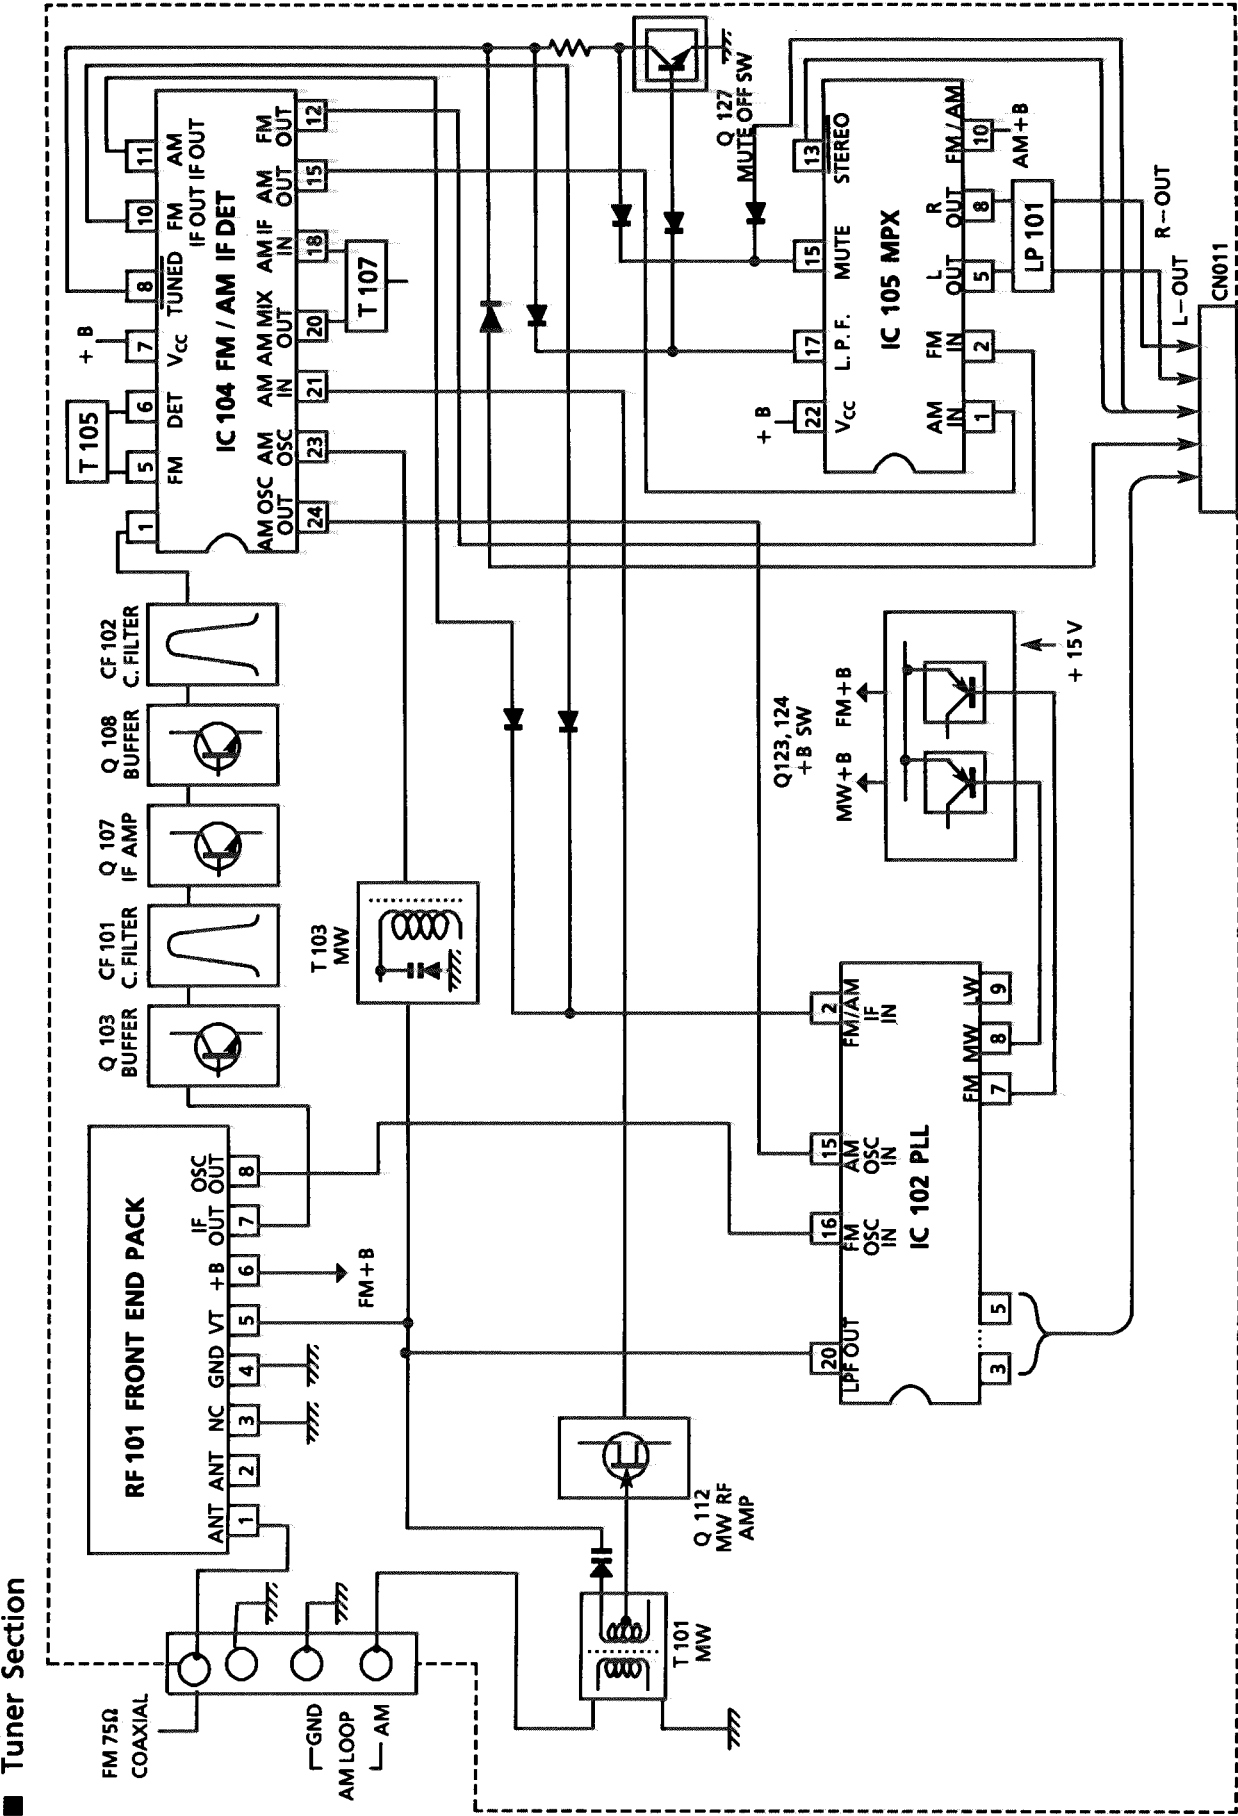

## ■ Power Amplifier section

## ■ Idling current

- (1) Set the volume control to minimum during this adjustment. Set DAP and surround mode "OFF". And set speaker load selector "HIGH".
- (2) Turn R791 and R792 fully counterclockwise to warm up before adjustment.  
If the heatsink is already warm from previous use the correct adjustment can not be made.
- (3) Connect a DC voltmeter to R773 resistor's leads for left channel, or to R774 for right channel.
- (4) Adjust R773 for left channel, or R774 for right channel, so that the DC voltmeter becomes 1mV~10mV.
