

## D-N10

This 'miniature' CD player features a sturdy pick-up mechanism, a highly specified 24-bit digital-to-analogue converter operating at 192kHz. SPDIF optical and coaxial digital outputs are provided for connection to external DAC'S for improved sound quality. The D-N10 possesses a sound signature reminiscent of vintage vacuum tube amplifiers – warm yet tonally correct, with capability to retrieve every detail in music recordings as captured by recording engineers.

### SPECIFICATIONS

Item	Value
Harmonic Distortion	0.003% (1kHz)
Frequency Response	20Hz ~ 20kHz
Signal-to-Noise Ratio	100dB
Dynamic Range	95dB
Power Consumption	20W
Dimensions (W x H x D)	307 x 67 x 240 (mm)
Weight	4kg
