

STEREO INTEGRATED AMPLIFIER

MODEL DA-U35

SCHEMATIC DIAGRAM

- NOTE:
- Units of C and R are as follows,
Capacitors : non-symbol μ F
P-symbol pF
Resistors : non-symbol Ω
K-symbol K Ω
M-symbol M Ω
 - All resistors are carbon 1/4W unless otherwise specified.
 - The voltages are values measured under a non-signal condition.

- Δ and ∇ marked components have special characteristics to ensure safety performance of this unit. When replacing any of parts, be sure to use only replacements specified on the parts list.
- Since this schematic shows the basic diagram of the parts of component parts etc. are subject to change without notice for improv
