# HANDLING CHIP COMPONENTS

## © WARNING

All ICs and many other semiconductors are susceptible to electrostatic discharges (ESD). Careless handling during repair can reduce life drastically. When repairing, make sure that you are connected with the same potential as the mass of the set via a wristband with resistance. Keep components and tools at this potential.

## f ATTENTION

Tous les IC et beaucoup d'autres semi-conducteurs sont sensibles aux décharges statiques (ESD). Leur longévité pourrait être considérablement écourtée par le fait qu'aucune précaution n'est prise à leur manipulation. Lors de réparations, s'assurer de bien être relié au même potentiel que la masse de l'appareil et enfile le bracelet sorti d'une résistance de sécurité. Veiller à ce que les composants ainsi que les outils que l'on utilise soient également à ce potentiel.

## ©

Safety regulations require that the set be restored to its original condition and that parts which are identical with those specified be used.

Safety components are marked by the symbol

## f

Les normes de sécurité exigent que l'appareil soit remis à l'état d'origine et que soient utilisées les pièces de rechange identiques à celles spécifiées.

Les composants de sécurité sont marqués

## d WARNING

Alle ICs und viele andere Halbleiter sind empfindlich gegenüber elektrostatischen Entladungen (ESD). Unsorgfältige Behandlung im Reparaturfall kann die Lebensdauer drastisch reduzieren. Sorgen Sie dafür, daß Sie im Reparaturfall über ein Pulsschleife mit Widerstand mit dem Massepotential des Gerätes verbunden sind. Halten Sie Bauteile und Hilfsmittel ebenfalls auf diesem Potential.

## SAFETY

## d

Bei jeder Reparatur sind die geltenden Sicherheitsvorschriften zu beachten. Der Originalzustand des Gerätes darf nicht verändert werden. Für Reparaturen sind Originalersatzteile zu verwenden. Sicherheitsbauteile sind durch das Symbol markiert.

© **DANGER:** Invisible laser radiation when open.  
AVOID DIRECT EXPOSURE TO BEAM.

## S Warning !

Osynlig laserstrålning när apparaten är öppnad och spärren är urkopplad. Betrakta ej strålen.

## N Advarsel !

Usynlig laserstrålning ved åbning når sikkerhedsafbrydere er ude af funktion. Undgå udsættelse for stråling.

**CLASS 1  
LASER PRODUCT**

## ©

After servicing and before returning the set to customer perform a leakage current measurement test from all exposed metal parts to earth ground, to assure no shock hazard exists.

The leakage current must not exceed 0.5mA.

## f

"Pour votre sécurité, ces documents doivent être utilisés par des spécialistes agréés, seuls habilités à réparer votre appareil en panne".

## TECHNICAL SPECIFICATIONS

### GENERAL

Mains voltage	-/00 : 220 - 230 V
	-/17 : 120v
Mains frequency	-/00 : 50 Hz
	-/17 : 60 Hz
Battery	mains : 4.5 V
Power consumption	max. : 17 W
	standby : 3.4 W
Dimension (W x H x D)	: 170 x 190 x 190 mm
Weight	: 2.1 Kg

### TUNER - AM SECTION

Tuning range	MW : 526.5 – 1606.5 kHz
	-/17 : 520 - 1722 kHz
IF frequency	: 468 kHz ± 3 kHz
Sensitivity	MW : 69 dB $\mu$ V/m at 26dB S/N
Selectivity	W : 20 dB
IF rejection	MW : 28 dB
Image rejection	MW : 32 dB

### COMPACT DISC

Frequency response	: 125 Hz - 10 kHz
S/N ratio	: 60 dB
Channel difference	1 kHz : 2 dB
Channel crosstalk	1 kHz : 40 dB
Laser wavelength	: 780 ± 20 nm
Laser light power	: < 0.5 mW

### AMPLIFIER

Output power	mains : 2 x 0.8 W
Speaker impedance	: 2 x 8 ohm
Frequency response	: 100 Hz - 10 kHz (±4dB)

### TUNER - FM SECTION

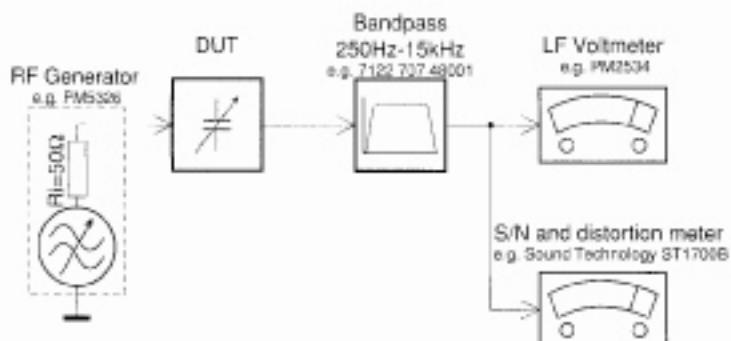

Tuning range	: 87.5 - 108 MHz
IF frequency	: 10.7 MHz ± 0.3 MHz
Sensitivity	: 3 $\mu$ V at 26dB S/N
Selectivity	: 24 dB at 300kHz
IF rejection	: 55 dB
Image rejection	: 26 dB

### SERVICE TOOLS

<b>Audio signal disc SBC 429.....</b>	4822 397 30184
<b>Playability test disc SBC 444.....</b>	4822 397 30245
<b>Test disc 5 (disc without errors ) +</b>	
<b>Test disc 5A (disc with dropout errors, black spots and fingerprints)</b>	
SBC 426/426A.....	4822 397 30096
<b>Burn in test disc (65 min. 1kHz signal at -30 dB level without "pause").....</b>	4822 397 30155
<b>Universal test cassette Fe SBC 420 .....</b>	4822 397 30071

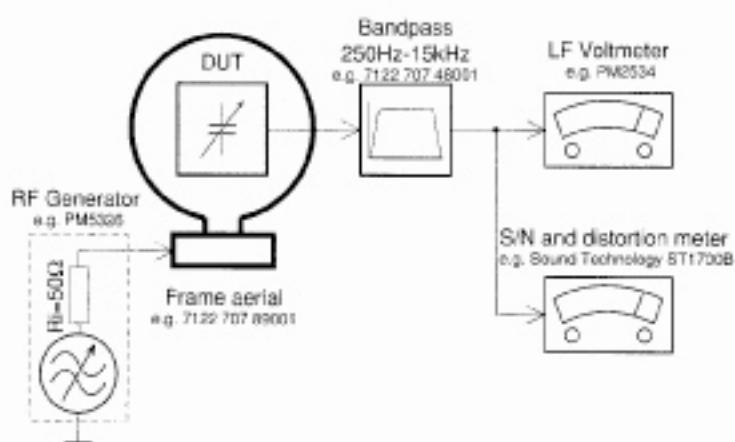

## SERVICE MEASUREMENTS

### Tuner FM

Use a bandpass filter to eliminate hum (50Hz, 100Hz) and disturbance from the pilot tone (19kHz, 38kHz).

### Tuner AM (MW,LW)

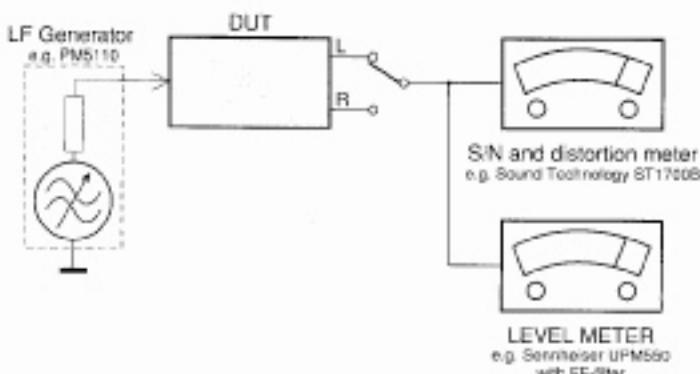

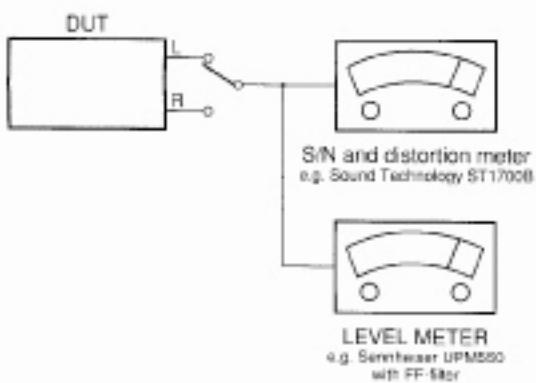

To avoid atmospheric interference all AM-measurements have to be carried out in a Faraday's cage.  
Use a bandpass filter (or at least a high pass filter with 250Hz) to eliminate hum (50Hz, 100Hz).

### CD

Use Audio Signal Disc SBC429 4822 397 30184  
(replaces test disc 3)

### RECORDER

Use Universal Test Cassette Fe SBC420 4822 397 30071

# CONNECTIONS AND CONTROLS

## CONTROLS

### •CD PLAYER

- 1 STOP 9**  
 - stops CD playback;  
 - stops sleep function in CD mode;

- 2 PLAY/PAUSE 2;**  
 - stops the active CD alarm for 24 hours;

- 3 SEARCH , §**  
 - starts/ pauses CD playback;  
 - skips CD tracks/ searches for a particular passage.

### •GENERAL

- 4 SLEEP**  
 - activates and adjusts the sleep time.

- 5 REPEAT ALARM/ BRIGHTNESS CONTROL**  
 - changes the brightness of the display illumination;

- 6 WEEKEND-SLEEPER**  
 - switches off the alarm for a 9 minute period;

- stops sleep function in CD, buzzer or radio mode.

### 6 WEEKEND-SLEEPER

- deactivates alarm 1 and/or 2 for the weekend.

### 7 Display

- shows the clock/ alarm time and status of the set.

### 8 ALARM 1 MODE/ OFF or ALARM 2 MODE/ OFF

- sets/ reviews/ switches off alarm 1 or 2.

### •RADIO

### 9 ON/ OFF

- switches the radio on/ off;

- stops sleep function in radio mode;

- stops the active radio alarm for 24 hours.

### •SETTING TIMES

### ! ALARM 1, ALARM 2, TIME

- @ 7, 8  
 - sets the respective alarm or clock time

### # VOLUME \$, 3

- adjusts the sound level.

### § Frequency indicator

- shows the radio frequency of your selected waveband

## % SET DAY

- sets the day for weekend sleeper activation.
- ^ 24 HR RESET

- stops the active buzzer, radio or CD alarms for 24 hours.
- & LIFT TO OPEN

- opens/ closes CD door.
- \* TUNING

- tunes to a radio station.
- ( Pigtail

- aerial to improve FM reception.
- ) Mains lead

- for AC mains supply.

The type plate is located on the bottom of the set.

## CAUTION

- Use of controls or adjustments or performance of procedures other than herein may result in hazardous radiation exposure or other unsafe operation.

## INSTALLATION

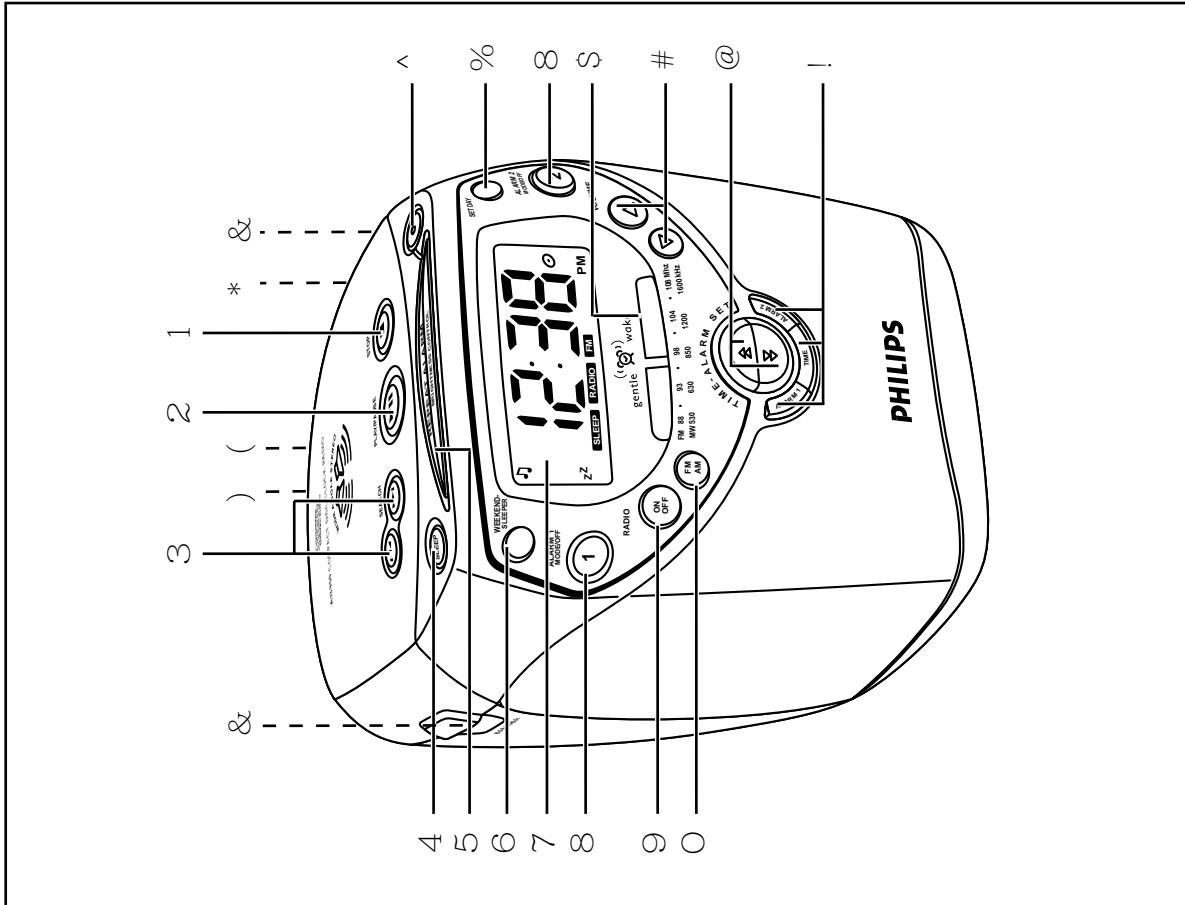

### Mains Supply and Demo mode

- 1 Check if the power voltage, shown on the type plate on the bottom of the set, corresponds to your local mains supply. If it does not, consult your dealer or service centre.

- 2 Connect the mains plug into the wall socket. The mains supply is now switched on and the display will show the PHILIPS demo mode.  
 TM PH.ILIPS scrolls across the display continuously.

- Press any control (with the exception of REPEAT ALARM/ BRIGHTNESS CONTROL on the set) to exit the demo mode.
- 3 To disconnect the set completely from the mains supply, withdraw the mains plug from the wall socket.

## Standby power consumption (clock mode).....3 W

# INSTRUCTIONS FOR USE

## SETTING THE DAY

The memory backup conveniently allows your day, alarm and clock time settings to be stored for up to 3 minutes when there is a mains interruption e.g. AC mains failure.

- The complete CD clock radio and illumination will be switched off. As soon as the mains supply returns, the display will indicate the correct time.
- If mains supply returns after 3 minutes, the display will show the PHILIPS demo mode and you will need to re-enter the day, alarm and clock times.

### 1 Press **SET DAY**.

- While the day display is shown, press **SET DAY** again once, or more to select the day numbered from **DAY 1-7** (Monday-Sunday);
- The display will revert to show the clock time.

## BASIC FEATURES

### Illumination brightness

- Press **REPEAT ALARM/BRIGHTNESS CONTROL** once or more.
- The brightness of the display will change in this sequence:

**LOW** + **MEDIUM** + **BRIGHT** + **LOW**...

### 2 While the day display is shown, press **SET DAY** again once, or more to select the day numbered from **DAY 1-7** (Monday-Sunday);

- The display will revert to show the clock time.
- To open the CD door, lift at the edge marked **LIFT TO OPEN**.
- Insert a CD with the printed side facing up, and close the door.
- Press **PLAY/PAUSE 2**; to start playback.

## CD PLAYBACK

- The CD indicator - and the total number of tracks are shown, followed by the first track number before returning to clock time.
- door is shown if you have not closed the CD door/open the CD door during playback.
- noCd** is shown if no CD has been inserted/inserted incorrectly

- **nFCd** is shown if the CDR(W) is non-finalized

- **Err** indicates a general error in operation of the set.

## VOLUME

Press **VOLUME S** or **3** to adjust the volume level.

The volume level **UO**: is indicated as a number from **0-32**.

## SETTING THE CLOCK AND ALARM TIMES

The time is displayed using the 24 hour clock.

- Press **TIME**, **ALARM 1** or **ALARM 2** briefly until the respective clock or alarm time display flashes.
- Press and hold down **7**, **8** to adjust both the hours and minutes.
- By pressing **7** or **8** respectively, the time increases/decreases rapidly and continuously from minutes to hours. Release **7** or **8** when you have reached the correct setting.
  - If you need to adjust the time slowly, minute by minute, press **7** or **8** briefly and repeatedly.
- Press **TIME**, **ALARM 1** or **ALARM 2** to confirm your respective time setting.

### 1 Press **SET DAY**.

- While the day display is shown, press **SET DAY** again once, or more to select the day numbered from **DAY 1-7** (Monday-Sunday);
- The display will revert to show the clock time.
- To open the CD door, lift at the edge marked **LIFT TO OPEN**.
- Insert a CD with the printed side facing up, and close the door.
- Press **PLAY/PAUSE 2**; to start playback.

## CD PLAYBACK

- The CD indicator - and the total number of tracks are shown, followed by the first track number before returning to clock time.
- door is shown if you have not closed the CD door/open the CD door during playback.
- noCd** is shown if no CD has been inserted/inserted incorrectly

- **nFCd** is shown if the CDR(W) is non-finalized

- **Err** indicates a general error in operation of the set.

## VOLUME

Press **VOLUME S** or **3** to adjust the volume level.

The volume level **UO**: is indicated as a number from **0-32**.

## SETTING THE CLOCK AND ALARM TIMES

The time is displayed using the 24 hour clock.

- Press **TIME**, **ALARM 1** or **ALARM 2** briefly until the respective clock or alarm time display flashes.
- Press and hold down **7**, **8** to adjust both the hours and minutes.
- By pressing **7** or **8** respectively, the time increases/decreases rapidly and continuously from minutes to hours. Release **7** or **8** when you have reached the correct setting.
  - If you need to adjust the time slowly, minute by minute, press **7** or **8** briefly and repeatedly.
- Press **TIME**, **ALARM 1** or **ALARM 2** to confirm your respective time setting.

## SETTING THE ALARM OPTIONS

### General

Two different alarm times, **ALARM 1** or **2** can be set in the CD, radio or buzzer modes. This can be useful when for example you need to be woken up at a different time during the week and at the weekend.

- Remember to first set the DAY, clock and alarm time functions correctly!
- Make sure your selected alarm symbol is shown.

### Viewing the Alarm Mode Options

Select your choice of alarm mode by pressing **ALARM 1** or **ALARM 2 MODE/OFF** once or more to find your respective mode.

- The alarm mode display sequence is shown:
  - **Lo:OO** – default volume level for start of gentle wake alarm
  - **H1:16** – default maximum volume level for gentle wake alarm
- Followed by the 3 different alarms:
  - (buzzer) **AL**, or
  - (radio) **tL**, or
  - CD mode with CD and a track number **1-99**.

- Read the following chapters to adjust or select the respective modes.

### Adjusting the Gentle Wake Volume

A sure way of getting up in the mornings, the **gentle wake** volume for the alarm begins from gentle volume e.g. **Lo:OO** (low) and gradually increases to a higher volume e.g. **H1:11**.

- The default volume range is **Lo:OO** and **H1:16**. If you wish to change the default volume for the buzzer, radio or CD alarm:

### 1 In the standby mode, press **ALARM 1 MODE/OFF** or **ALARM 2 MODE/OFF** once.

- As soon as **Lo:OO** appears, press **7** or **8** once or more to adjust the starting volume of your alarm.
- To set the maximum volume for your alarm, press **ALARM 1 MODE/OFF** or **ALARM 2 MODE/OFF** again to change to the **H1:16** display.

- As soon as **H1:16** appears, press **7** or **8** until you reach the desired volume level (**10-32**).

### Notes:

- The **H1** volume is always greater or equal to the

## MEMORY BACKUP

The memory backup conveniently allows your day, alarm and clock time settings to be stored for up to 3 minutes when there is a mains interruption e.g. AC mains failure.

- The complete CD clock radio and illumination will be switched off. As soon as the mains supply returns, the display will indicate the correct time.
- If mains supply returns after 3 minutes, the display will show the PHILIPS demo mode and you will need to re-enter the day, alarm and clock times.

### 1 Press **SET DAY**.

- While the day display is shown, press **SET DAY** again once, or more to select the day numbered from **DAY 1-7** (Monday-Sunday);
- The display will revert to show the clock time.
- To open the CD door, lift at the edge marked **LIFT TO OPEN**.
- Insert a CD with the printed side facing up, and close the door.
- Press **PLAY/PAUSE 2**; to start playback.

## CD PLAYBACK

- The CD indicator - and the total number of tracks are shown, followed by the first track number before returning to clock time.
- door is shown if you have not closed the CD door/open the CD door during playback.
- noCd** is shown if no CD has been inserted/inserted incorrectly

- **nFCd** is shown if the CDR(W) is non-finalized

- **Err** indicates a general error in operation of the set.

## VOLUME

Press **VOLUME S** or **3** to adjust the volume level.

The volume level **UO**: is indicated as a number from **0-32**.

## SETTING THE CLOCK AND ALARM TIMES

The time is displayed using the 24 hour clock.

- Press **TIME**, **ALARM 1** or **ALARM 2** briefly until the respective clock or alarm time display flashes.
- Press and hold down **7**, **8** to adjust both the hours and minutes.
- By pressing **7** or **8** respectively, the time increases/decreases rapidly and continuously from minutes to hours. Release **7** or **8** when you have reached the correct setting.
  - If you need to adjust the time slowly, minute by minute, press **7** or **8** briefly and repeatedly.
- Press **TIME**, **ALARM 1** or **ALARM 2** to confirm your respective time setting.

# INSTRUCTIONS FOR USE

- **L<sub>0</sub>** volume: e.g. L<sub>0</sub>:15, H<sub>1</sub>:19  
e.g. L<sub>0</sub>:12, H<sub>1</sub>:12
- The starting volume is L<sub>0</sub>:00, with a possible low volume range 00-32, and the maximum volume is H<sub>1</sub>:32, with a possible high volume range 10-32.
- The gentle wake volume settings do not affect normal CD and radio playback volume level.
- It is not possible to review the gentle wake volume range during the active alarm call as pressing **ALARM 1 MODE/OFF** or **ALARM 2 MODE/OFF** cancels the alarm completely.
- During the alarm call, if you press **7** or **8** the high volume stops increasing immediately.

**L<sub>0</sub>** volume: e.g. L<sub>0</sub>:15, H<sub>1</sub>:19  
e.g. L<sub>0</sub>:12, H<sub>1</sub>:12

- The starting volume is L<sub>0</sub>:00, with a possible low volume range 00-32, and the maximum volume is H<sub>1</sub>:32, with a possible high volume range 10-32.
- The gentle wake volume settings do not affect normal CD and radio playback volume level.
- It is not possible to review the gentle wake volume range during the active alarm call as pressing **ALARM 1 MODE/OFF** or **ALARM 2 MODE/OFF** cancels the alarm completely.
- During the alarm call, if you press **7** or **8** the high volume stops increasing immediately.

## Selecting Buzzer or Radio Alarm

- Press **ALARM 1 MODE/OFF** or **ALARM 2 MODE/OFF** repeatedly until the (buzzer) **K** AL or (radio) **M** t u display is shown.

### Note:

If you have selected the radio alarm **m** t u, make sure you have tuned properly to a station.

## CD Alarm Mode: Selecting a CD track

You can program and select a CD track number between 1-99, when the set is in the standby or radio playback mode.

However, if the track number programmed does not exist on your CD, the CD will start playback from the first track during the alarm call.

- 1 Insert a CD into the CD compartment.

- 2 Press **ALARM 1 MODE/OFF** or **ALARM 2 MODE/OFF** repeatedly until the CD and track number display is shown.

See figure 3.

- 3 As soon as the CD alarm display appears, press **7** or **8** until the desired track number is shown.

™ The display returns to standby clock time.

- 4 To review your programmed track number, press **ALARM 1 MODE/OFF** or **ALARM 2 MODE/OFF** again repeatedly until the CD alarm display is shown.

**Note:** To repeat if desired up to an hour.

### Notes:

- The selected alarm mode **k**, **m**, or **o** indicators will flash throughout the repeat alarm duration.
- If you are using the CD alarm mode, CD playback resumes at the point interrupted by the repeat alarm.
- During the CD alarm, CD playback continues for up to an hour unless you cancel/ reset the alarm.

## WEEKEND-SLEEPER

This feature deactivates the alarm every Saturday and Sunday and resumes the alarm function Monday to Friday. Make sure, however, that you have set the day first.

## SWITCHING OFF THE ALARM

There are three ways of switching off the alarm.

Unless you cancel the alarm completely, the **24 HOUR ALARM RESET** will be automatically selected after 59 minutes, from the time your alarm time first goes off.

## 24 HOUR ALARM RESET

If you want the alarm mode to be stopped immediately but also wish to retain the same alarm setting for the following day:

- Press from 3 possible options according to your selected alarm:
  - a **24 HR RESET** to switch off the buzzer, radio or CD alarms
  - b **STOP 9** CD alarm only
  - c **ON/OFF** radio alarm only.

™ You will hear a beep tone confirming 24 hour reset activation.

## CANCELING THE ALARM COMPLETELY

To cancel the set alarm time before it goes off, or during the alarm call:

- Press **ALARM 1 MODE/OFF** or **ALARM 2 MODE/OFF** once or more until the selected alarm indicator disappears from the display.
- ™ If you cancel the alarm during the alarm call, you will also hear a beep tone confirming the alarm has been cancelled.

See figure 3.

- 3 As soon as the CD alarm display appears, press **7** or **8** until the desired track number is shown.

™ The display returns to standby clock time.

- 4 To review your programmed track number, press **ALARM 1 MODE/OFF** or **ALARM 2 MODE/OFF** again repeatedly until the CD alarm display is shown.

**Note:**

- The selected alarm mode **k**, **m**, or **o** indicators will flash throughout the repeat alarm duration.
- If you are using the CD alarm mode, CD playback resumes at the point interrupted by the repeat alarm.
- During the CD alarm, CD playback continues for up to an hour unless you cancel/ reset the alarm.

## MAINTENANCE

### General (See figure 6)

- If you do not intend to use the CD clock radio for a long time, withdraw the power plug from the wall outlet.
- Do not expose the set or CDs to humidity, rain, sand or excessive heat caused by heating equipment or direct sunlight.
- To clean the set, use a soft, slightly dampened chamois leather. Do not use any cleaning agents containing alcohol, ammonia, benzene or abrasives as these may harm the housing.

### CD player and CD handling

- See chapter on SETTING THE DAY
- 1 Press **WEEKEND-SLEEPER** once or more until **ZZ** appears for one or both alarms.
- 2 To cancel the weekend-sleep function repeat step 1 until **ZZ** disappears from the display. See figure 4.
- Always shut the CD door to keep the CD compartment dust-free. To clean, dust the compartment with a soft dry cloth.
- To take a CD out of its box, press the centre spindle while lifting the CD. Always pick up the CD by the edge and replace the CD in its box after use to avoid scratching and dust.
- To clean the CD, wipe in a straight line from the centre towards the edge using a soft, lint-free cloth. Do not use cleaning agents as they may damage the disc.
- Never write on a CD or attach any stickers to it.

### Environmental information

All unnecessary packaging material has been omitted to make the packaging easy to separate into three materials: cardboard (box), expandable polystyrene (buffer), polyethylene (bags, protective foam). Your set consists of materials which can be recycled if disassembled by a specialized company. Please observe local regulations on the disposal of packing materials and old equipment.

# INSTRUCTIONS FOR USE

## TROUBLESHOOTING

If a fault occurs, first check the points listed below before taking the set for repair.  
If you are unable to remedy a problem by following these hints, consult your dealer or service centre

## **WARNING:**

Do not open the set as there is a risk of electric shock!

Under no circumstances should you try to repair the set yourself, as this will invalidate the guarantee.

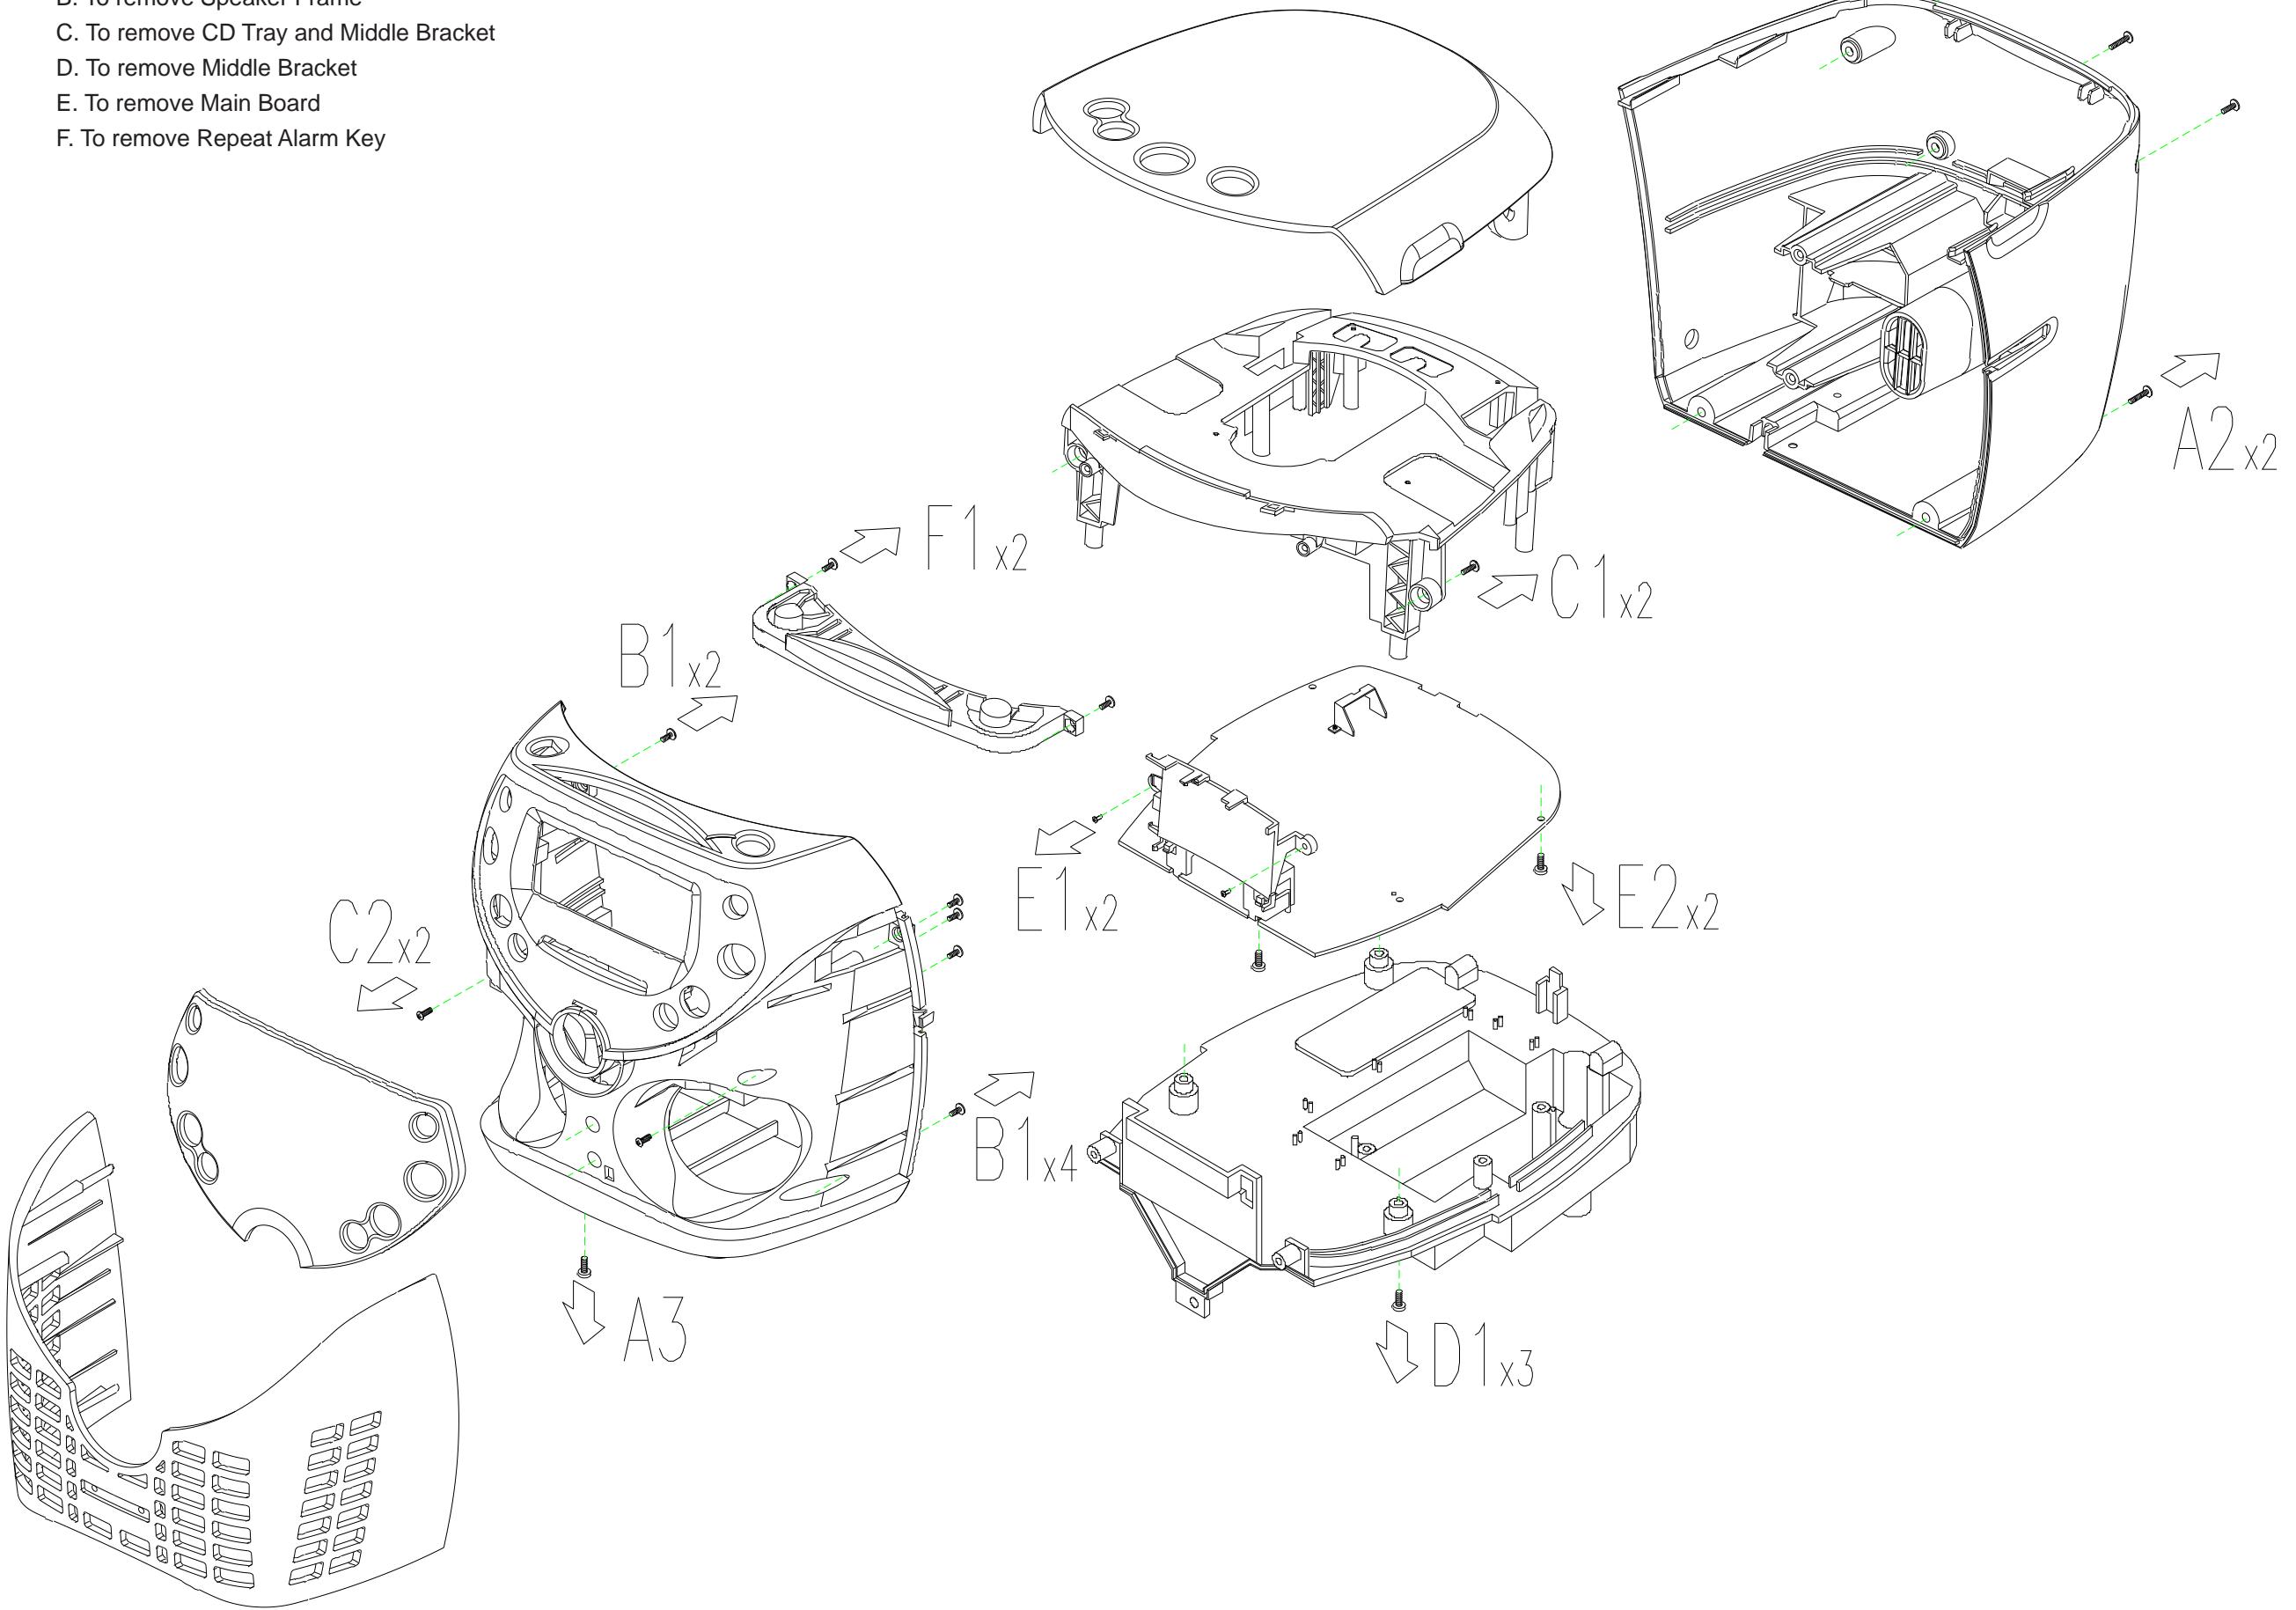

Problem	•RADIO
Possible Cause	Occasional crackling sound during FM broadcast
Remedy	Weak signal - Extend pigtail fully
No sound	Continuous crackling/ hiss disturbance during AM (MW) broadcast
Volume not adjusted	Electrical interference from TVs, computers, fluorescent lamps, etc. - Move set away from other electrical equipment
Adjust the volume	
No reaction to any operation of the buttons	•ALARM
Electrostatic discharge	The alarm does not function
- Disconnect the set from the power supply and reconnect the set after 5 minutes	Alarm time not set - See chapter on SETTING THE CLOCK AND ALARM TIMES
CD playback does not work	Alarm mode not selected - See chapter on SETTING THE ALARM OPTIONS
CD badly scratched or dirty	Volume too low for radio/ CD/ buzzer alarm mode. - See chapter on Adjusting the Gentle wake volume
Replace/ clean CD	
Laser lens steamed up	•WEEKEND-SLEEPER
- Wait until lens has acclimatized	WEEKEND-SLEEPER does not function Day selection not set/ incorrect - See chapter on SETTING THE DAY
Laser lens dirty	
- Clean lens by playing a CD lens cleaning disc	WEEKEND-SLEEPER not set - Set WEEKEND-SLEEPER
CD-R(W) is non-finalized	This product complies with the radio interference requirements of the European Union.
- Use a finalized CD-R(W)

## CD SERVICE TEST PROGRAM

- \* STOP button pressed in any step returns to begin of Service Testprogram.
- \* To leave Service Testprogram switch mode switch to off-position.
- \* Door switch is ignored → CD door can be opened.
- \* Volume up/down buttons function independently of the service testprogram.

fig. 1

**Abbreviations and Pin-description of CD Ics**
**SERVO PROCESSOR SAA7325H**

<b>SYMBOL</b>	<b>PIN</b>	<b>DESCRIPTION</b>
HFREF	1	comparator common mode input
HFIN	2	comparator signal input
ISLICE	3	current feedback output from data slicer
$V_{SSA1}$	4 <sup>(1)</sup>	analog ground 1
$V_{DDA1}$	5 <sup>(1)</sup>	analog supply voltage 1
$I_{ref}$	6	reference current output pin
$V_{RIN}$	7	reference voltage for servo ADC's
D1	8	unipolar current input (central diode signal input)
D2	9	unipolar current input (central diode signal input)
D3	10	unipolar current input (central diode signal input)
D4	11	unipolar current input (central diode signal input)
R1	12	unipolar current input (satellite diode signal input)
R2	13	unipolar current input (satellite diode signal input)
$V_{SSA2}$	14 <sup>(1)</sup>	analog ground 2
CROUT	15	crystal/resonator output
CRIN	16	crystal/resonator input
$V_{DDA2}$	17 <sup>(1)</sup>	analog supply voltage 2
LN	18	DAC left channel differential output - negative
LP	19	DAC left channel differential output - positive
$V_{neg}$	20	DAC negative reference input
$V_{pos}$	21	DAC positive reference input
RN	22	DAC right channel differential output - negative
RP	23	DAC right channel differential output - positive
SELPLL	24	selects whether internal clock multiplier PLL is used
TEST1	25	test control input 1; this pin should be tied LOW
CL16	26	16.9344 MHz system clock output
DATA	27	serial d4(1)ata output (3-state)
WCLK	28	word clock output (3-state)
SCLK	29	serial bit clock output (3-state)
EF	30	C2 error flag output (3-state)
TEST2	31	test control input 2; this pin should be tied LOW
KILL	32	kill output (programmable; open-drain)
$V_{SSD1}$	33 <sup>(1)</sup>	digital ground 2
V2/V3	34	versatile I/O: input versatile pin 2 or output versatile pin 3 (open-drain)
WCLI	35	word clock iutput (for data loopback to DAC)
SDI	36	serial data input (for data loopback to DAC)
SCLI	37	serial bit clock input (for data loopback to DAC)
<u>RESET</u>	38	power-on reset input (active LOW)
SDA	39	microcontroller interface data I/O line (open-drain output)
SCL	40	microcontroller interface clock line input

**Abbreviations and Pin-description of CD Ics**
**SERVO PROCESSOR SAA7325H**

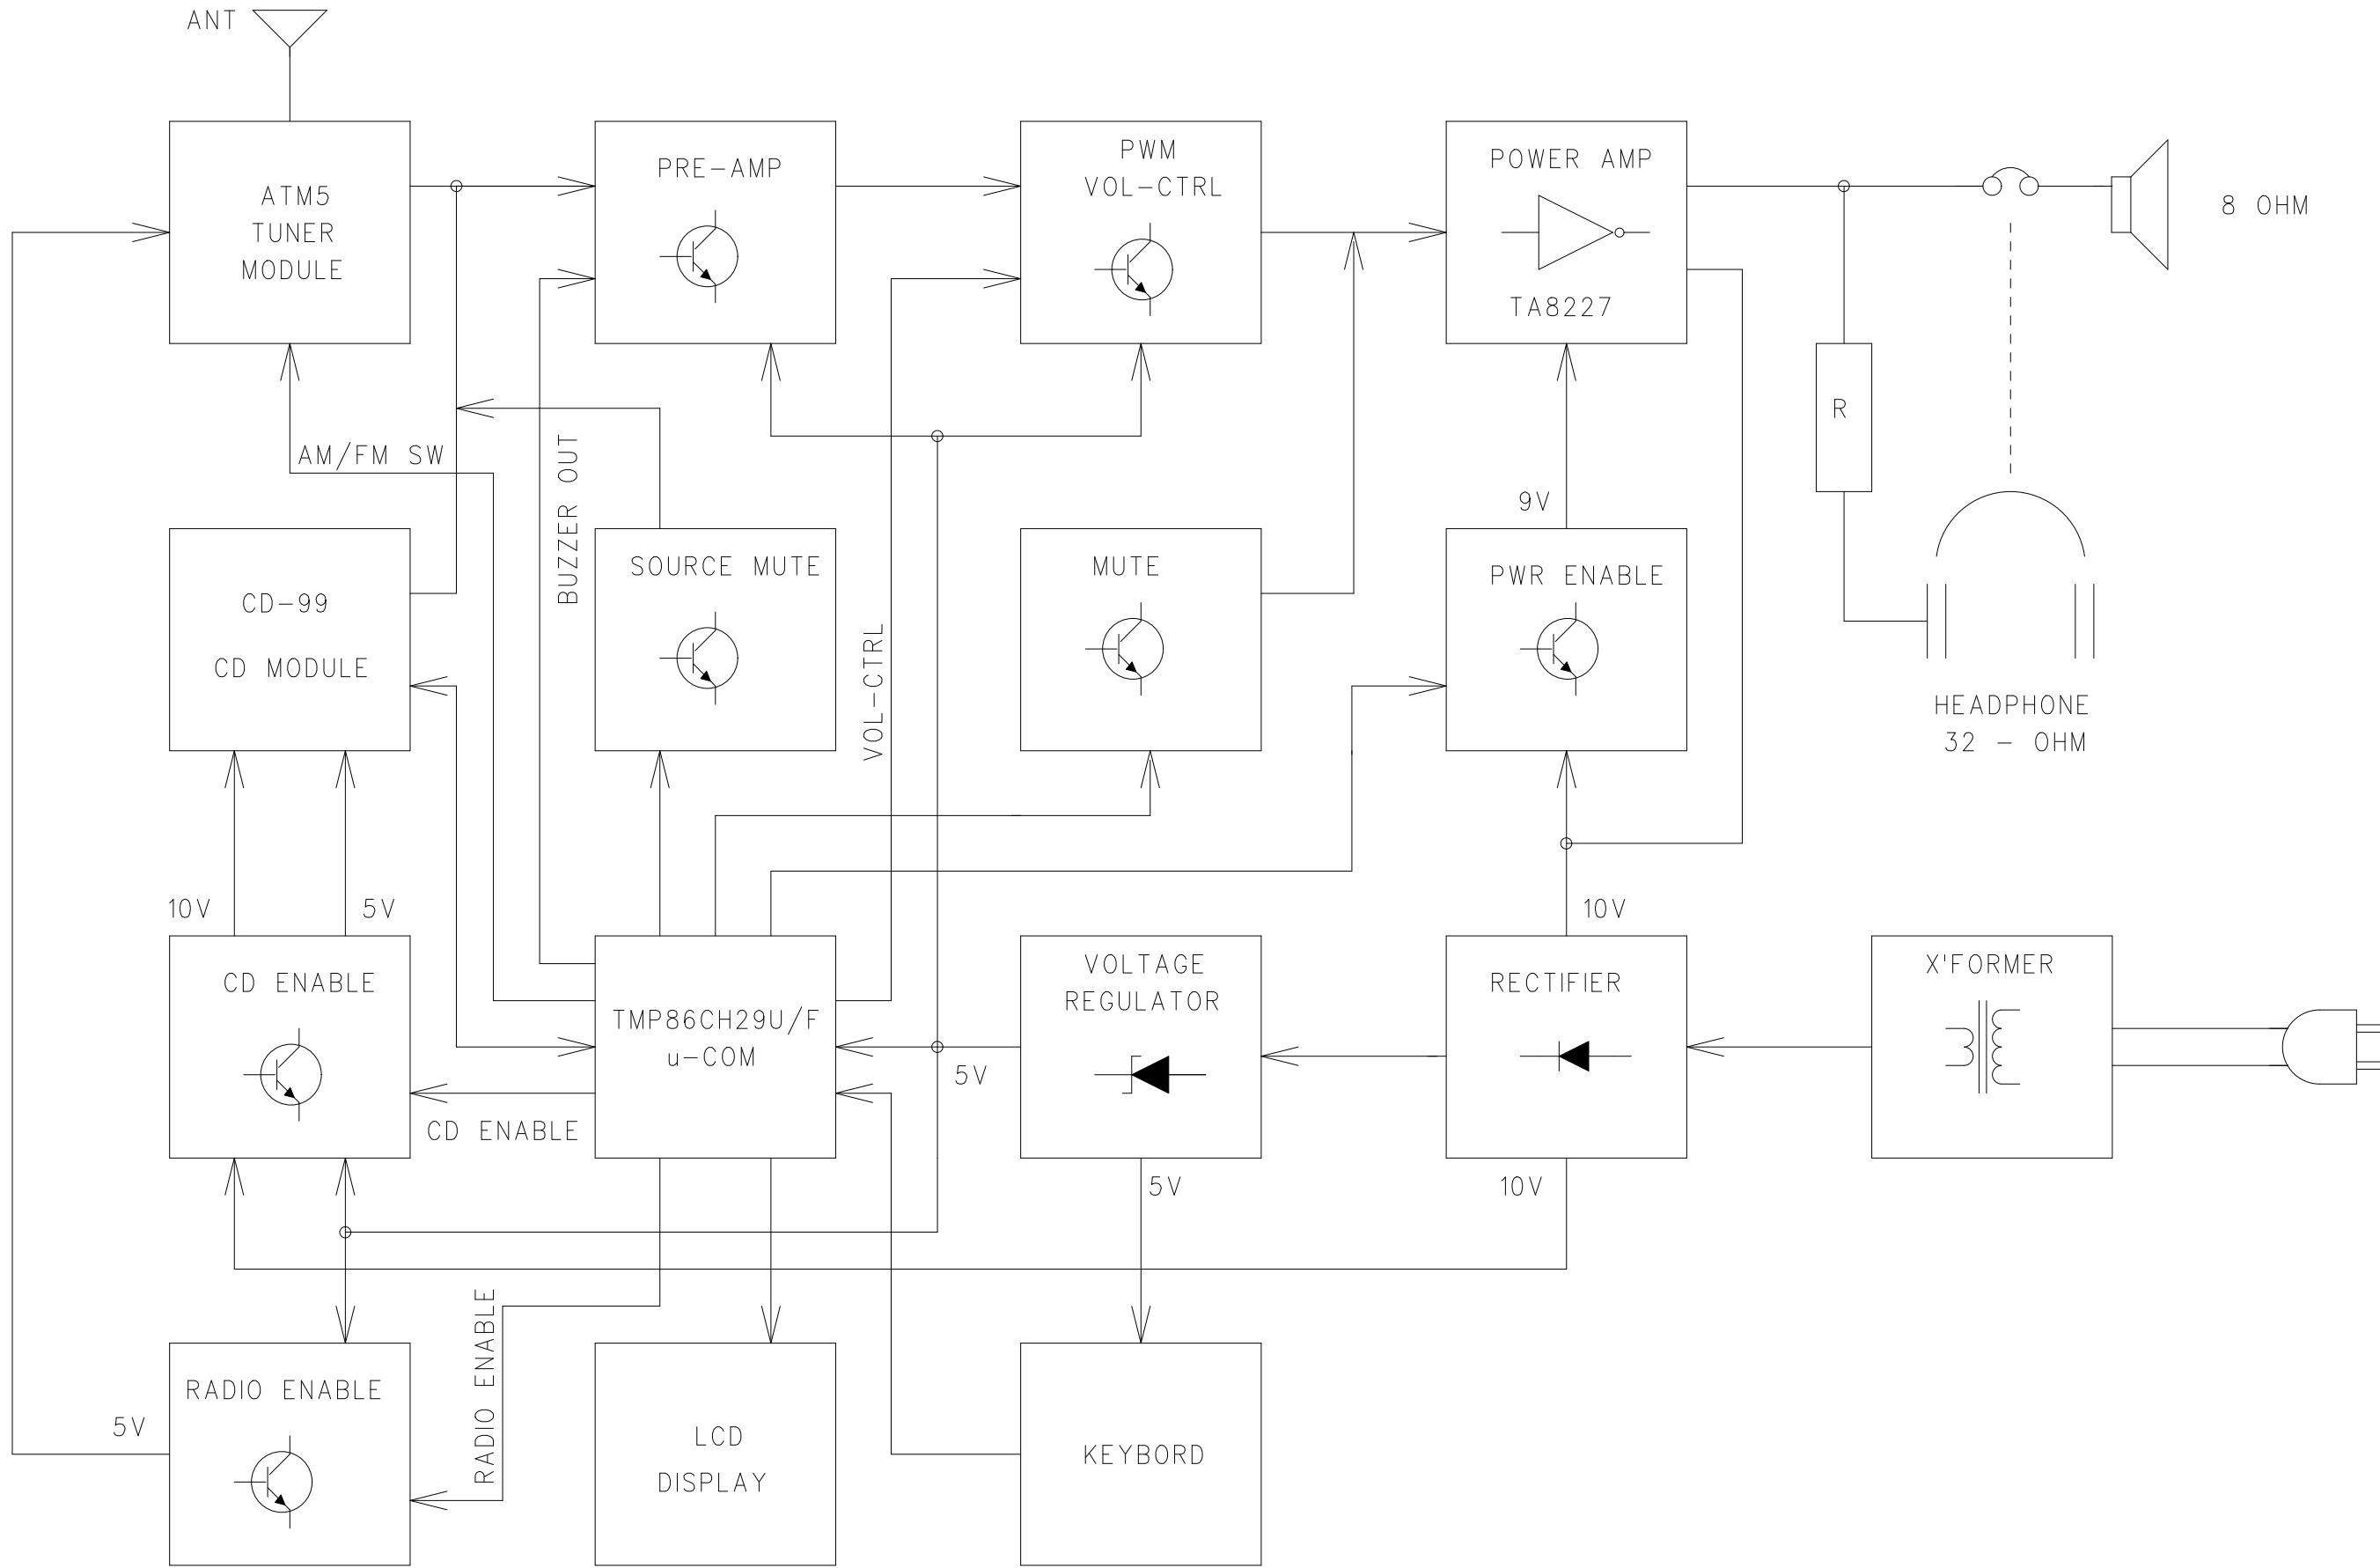

<b>SYMBOL</b>	<b>PIN</b>	<b>DESCRIPTION</b>
RAB	41	microcontroller interface R/W and load control line input (4-wire bus mode)
SILD	42	microcontroller interface $\bar{R}/W$ and load control line input (4-wire bus mode)
STATUS	43	servo interrupt request line/decoder status register output (open-drain)
TEST3	44	test control input 3; this pin should be tied LOW
RCK	45	subcode clock input
SUB	46	P-to-W subcode bits output (3-state)
SFSY	47	subcode frame sync output (3-state)
SBSY	48	subcode block sync output (3-state)
CL11/4	49	11.2896 MHz or 4.2336 MHz (for microcontroller) clock output
$V_{SSD2}$	50 <sup>(1)</sup>	digital ground 3
DOBM	51	bi-phase mark output (externally buffered; 3-state)

FO	55	focus actuator output
SL	56	sledge control output
$V_{DDD2(C)}$	57 <sup>(1)</sup>	digital supply voltage 3 for core
$V_{SSD3}$	58 <sup>(1)</sup>	digital ground 4
MOTO1	59	motor output 1; versatile (3-state)
MOTO2	60	motor output 2; versatile (3-state)
V4	61	versatile output pin 4
V5	62	versatile output pin 5
V1	63	versatile intput pin 1
LDON	64	laser drive on output (open-drain)

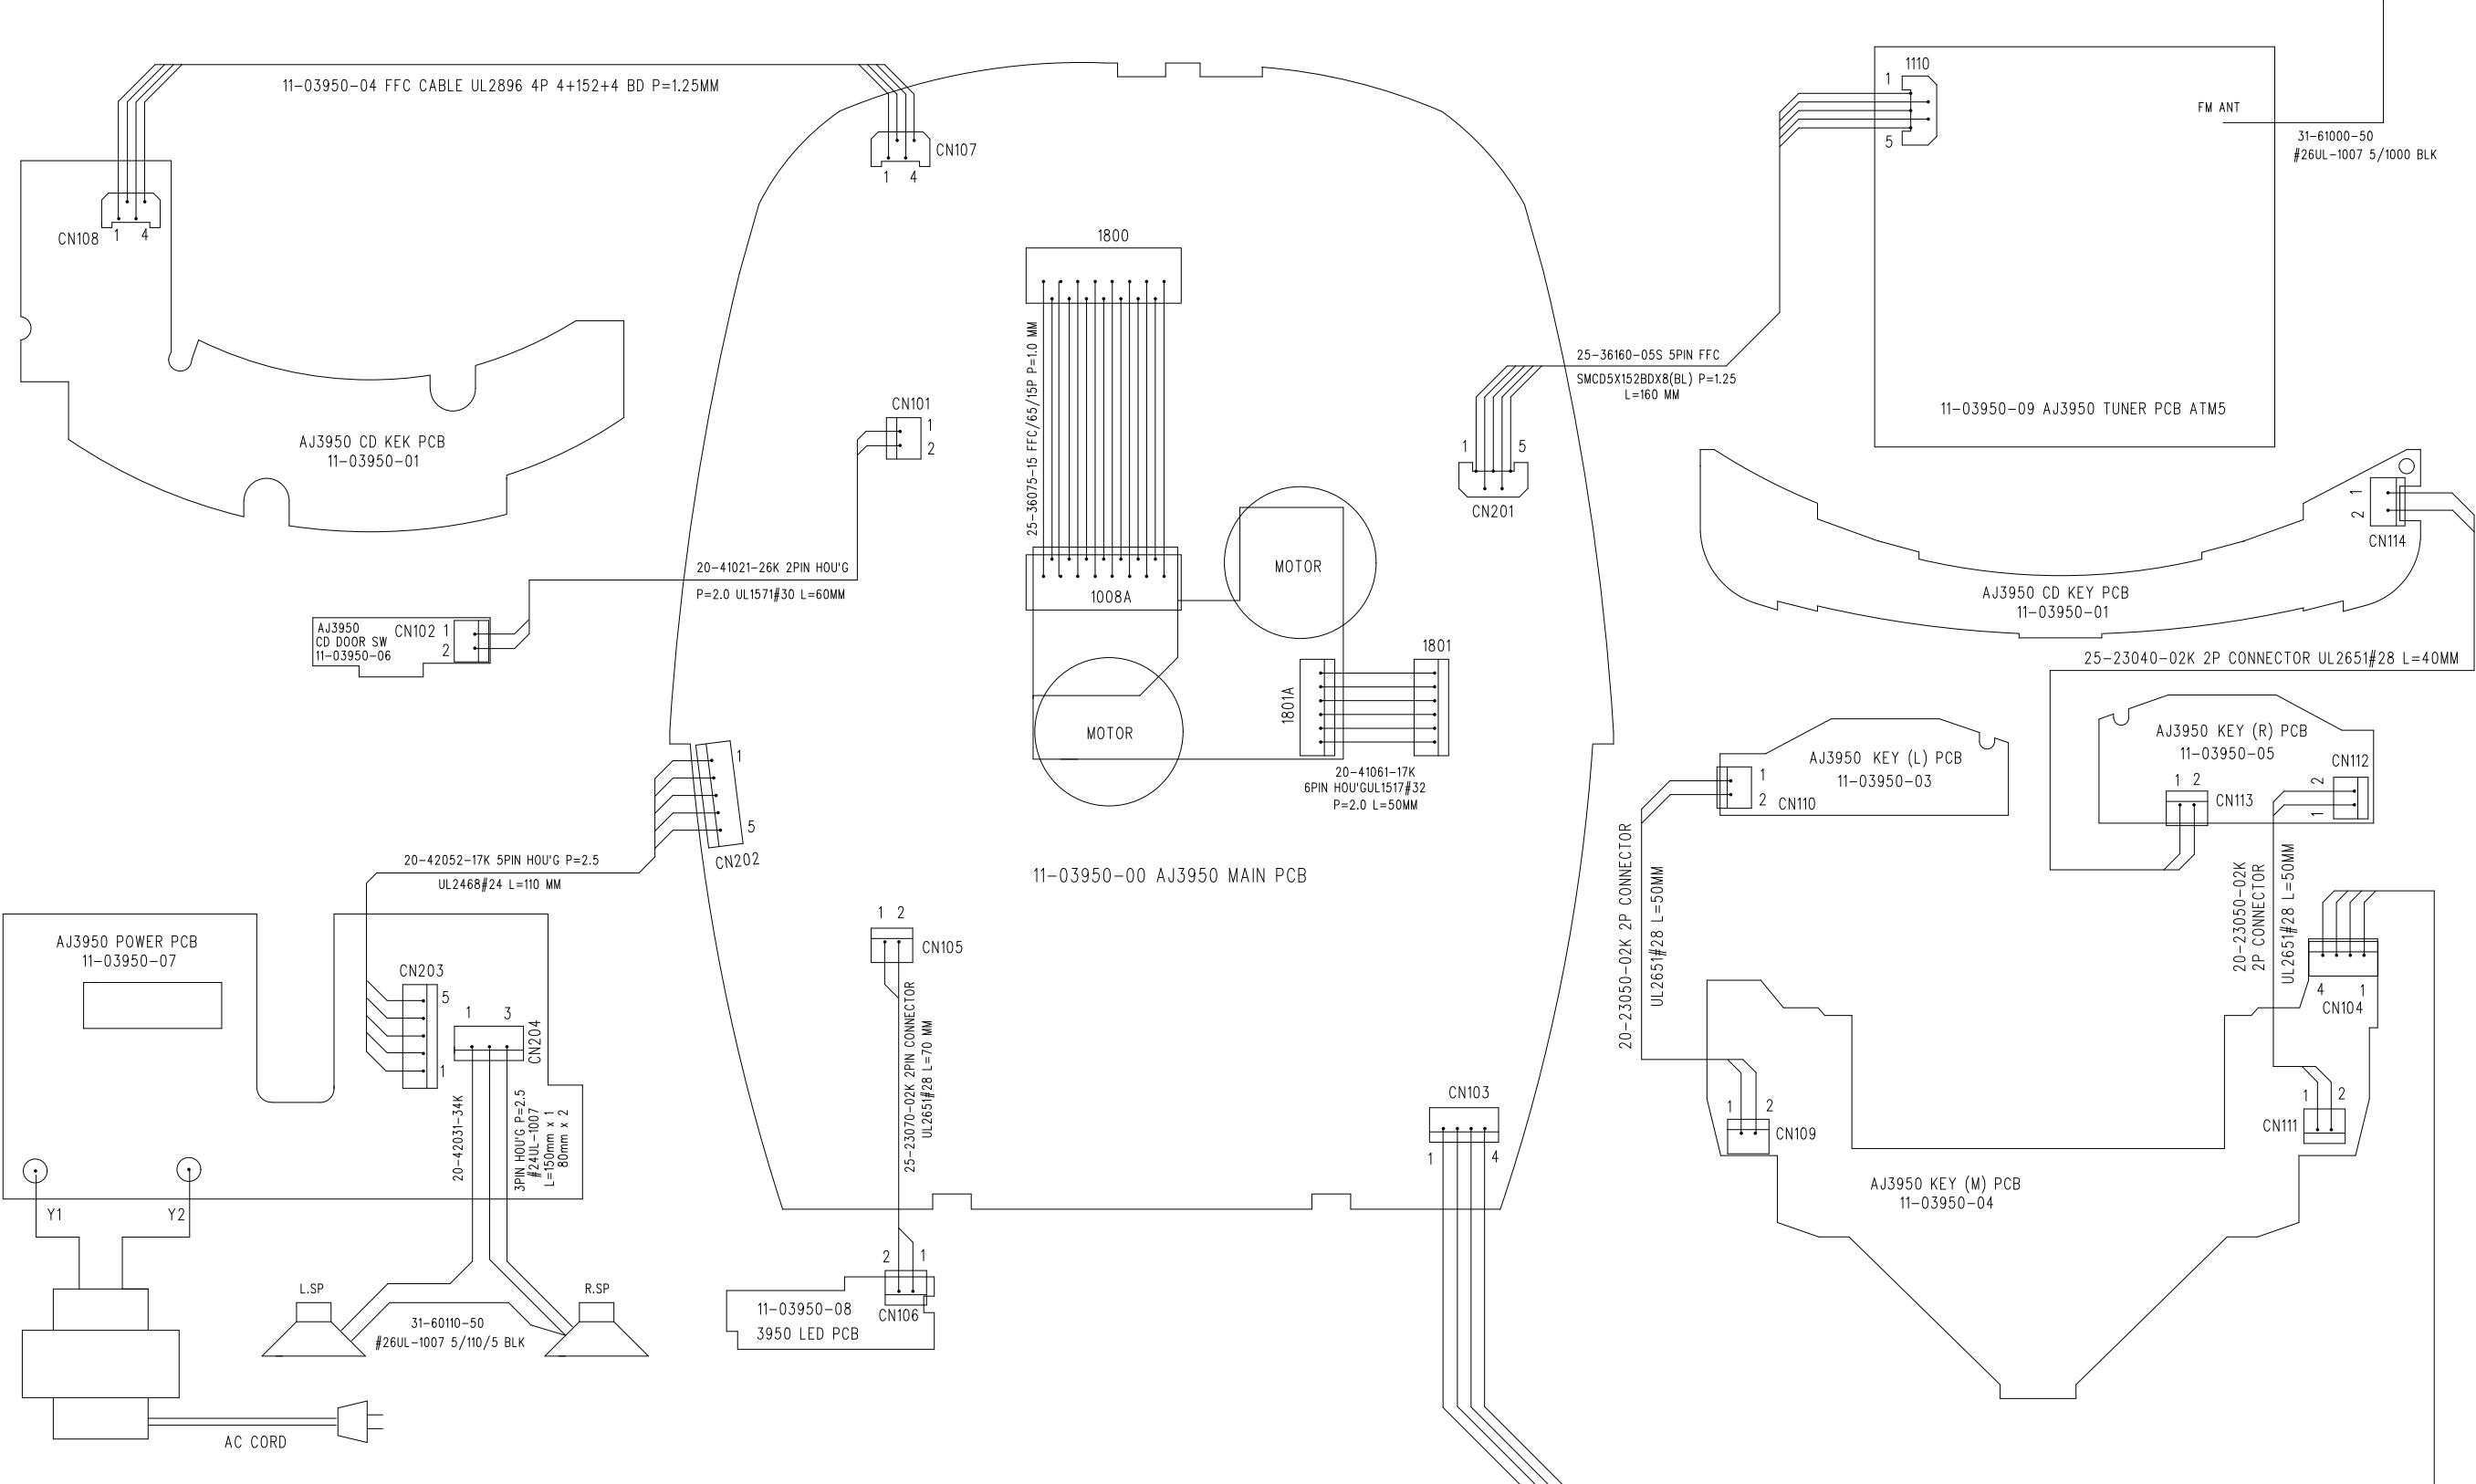

Note : All supply pins must be connected to the same external power supply voltage.

**TUNER ADJUSTMENT TABLE**

Waverange	Input Frequency	Input	Set tuned to	Adjust	Measure on	Scope / Counter
<b>OSCILLATOR</b>						
FM 87,5 - 108 MHz	87,35 MHz	A	lower band end	5104	1 or 2	
	108,25 MHz	A	upper band end	2106 C1		
<b>MW</b>						
525 - 1607 kHz (530 - 1710 kHz) <sup>1)</sup>	512 kHz (520 kHz)	C	lower band end	5105	1 or 2	
	1635 kHz (1730 kHz)	C	upper band end	2106 C3		
<b>FM - RF</b>						
FM 87,5 - 108 MHz	87,5 MHz	A	87,5 MHz	5101	1 or 2	
	108 MHz	A	108 MHz	2106 C2		
<b>VCO</b>						
FM	98 MHz	A	98 MHz	3101	3	
	continuous wave V_RF = 1 mV					
<b>AM - IF</b>						
AM	468 kHz connect pin 24 of IC 7101 (AM Osc) with short wire to ground	C	IC 7101 10 220R    100nF see remark 2) IC 7101 14 220R    100nF	5106 5108	1 or 2	
<b>AM - RF</b>						
MW	560 kHz 1500 kHz	B	560 kHz 1500 kHz	5111 2106 C4	1 or 2	
	Δf = ±30kHz V_RF as low as possible					

repeat

<sup>1)</sup> for USA /17<sup>2)</sup> RC-network serves for damping the IF-filter while adjusting the other one.

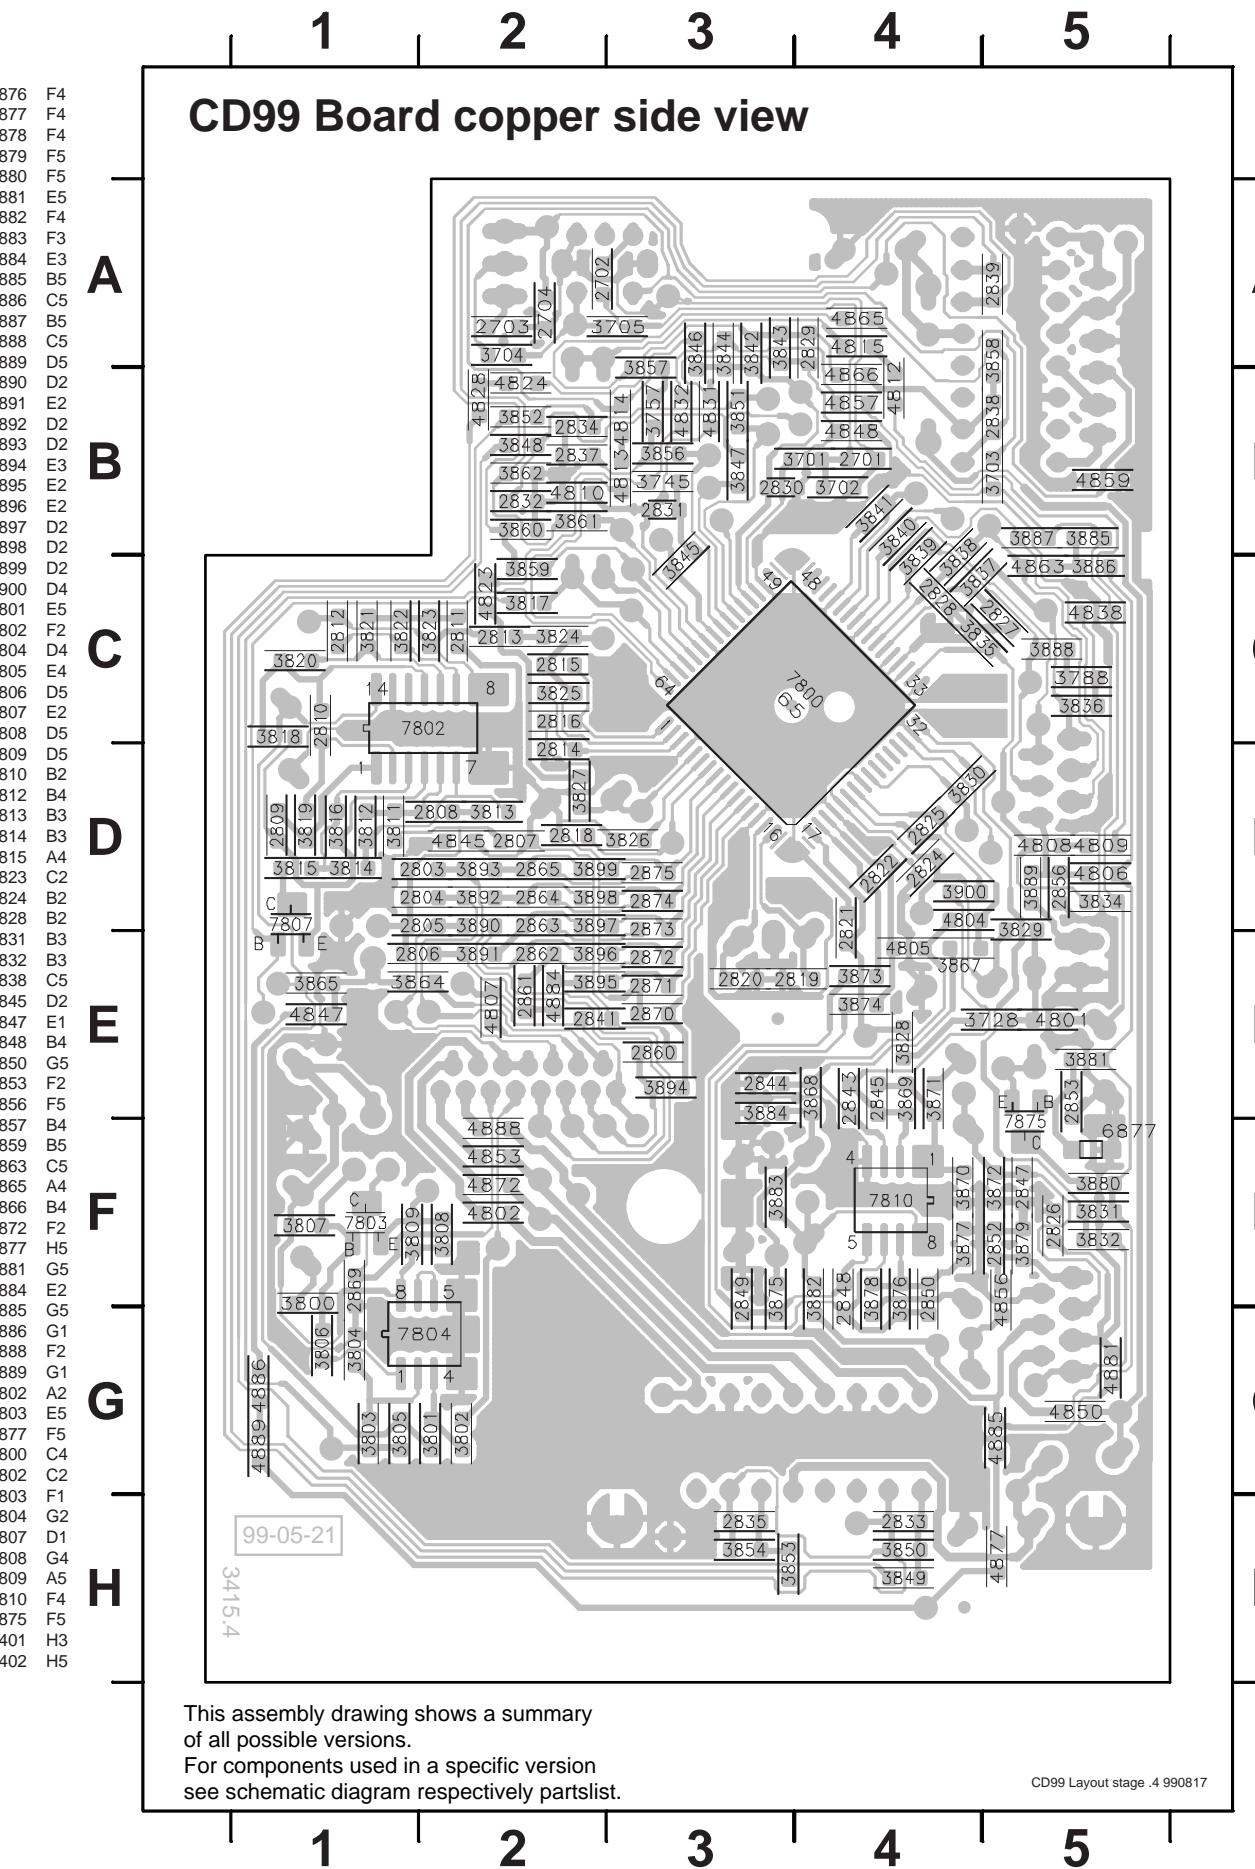

CD99 DA11 - LAYOUT DIAGRAM

This assembly drawing shows a summary of all possible versions.

For components used in a specific version  
see schematic diagram respectively partslist.
