Batteries (supplied or optionally available)

You can use the following batteries with this CD-player:

- normal batteries type **LR6**, **UM3** or **AA** (preferably Philips), or
- alkaline batteries type **LR6**, **UM3** or **AA** (preferably Philips).

Notes:— Old and new or different types of batteries should not be combined.

— Remove batteries if they are empty or if the player is not going to be used for a long time.

Inserting batteries

- 1 Push OPEN ► to open the CD lid.
- 2 Open the battery compartment and insert either 2 normal or alkaline batteries, or the rechargeable NiMH battery AY3362 (if supplied).

Battery indication

The approximate power level of your batteries is shown in the display.

🔋 Battery full

🔋 Battery two-thirds full

🔋 Battery one-third full

🔋 Battery dead or empty. When the batteries are dead or empty, the symbol 🔋 flashes, **BATT** is displayed, and the beep tone sounds repeatedly.

Average playing time of batteries under normal conditions

Battery type	ESP on	Power Save
Normal	5 hours	6 hours
Alkaline	16 hours	20 hours
Rechargeable ECO-PLUS NiMH battery	7 hours	9 hours

Batteries contain chemical substances, so they should be disposed of properly.

This set complies with the radio interference requirements of the European Union.

INSTRUCTION FOR USE

POWER SUPPLY / GENERAL INFORMATION

ECO-PLUS NiMH battery information (for versions supplied with the rechargeable ECO-PLUS NiMH battery AY 3362)

Recharging works only on players supplied with the rechargeable ECO-PLUS NiMH battery AY 3362.

Recharging the ECO-PLUS NiMH battery on board

- 1 Insert the rechargeable ECO-PLUS NiMH battery AY 3362.
- 2 Connect the mains adapter to the 4.5V DC socket of the player and then to the wall socket.
→  is pulsing.

- Recharging stops after a maximum of 7 hours, or when you start playback.

- 3 When the battery is fully recharged,  and **FULL** appears in the display.

Notes:

- It is normal for the batteries to become warm during recharging.
- If the batteries become too warm, recharging will be interrupted for approximately 30 minutes and **HE** is displayed.
- To ensure proper recharging on board, take care that contacts are clean.
- Use only the ECO-PLUS NiMH battery AY 3362.

Handling instructions

- Recharging already charged or half-charged batteries will shorten their lifetime. We therefore recommend that you let the rechargeable ECO-PLUS NiMH battery run till it is completely empty before you recharge it.
- To avoid a short circuit, do not let the battery touch any metal object.
- If the battery becomes empty soon after recharging, then either its contacts are dirty or it has reached the end of its lifetime.

Mains adapter (supplied or optionally available)

Use only the AY 3170 adapter (4.5 V / 300 mA direct current, positive pole to the center pin). Any other product may damage the player.

- 1 Make sure the local voltage corresponds to the power adapter's voltage.
- 2 Connect the power adapter to the 4.5V DC socket of the player and to the wall socket.

Note: Always disconnect the adapter when you are not using it.

Belt Clip (not on all versions)

- 1 To attach the belt clip to the CD-player, position the shaped grip (found on the back of the belt clip) so that it fits into the belt clip hole of the CD-player.
- 2 Turn the clip to **LOCK** as indicated on the set.
- 3 To detach, gently lift the belt clip and turn to **RELEASE** as indicated on the set.

Environmental information

- All redundant packing material has been omitted. We have done our utmost to make the packaging easily separable into two mono materials: cardboard (box) and polyethylene (bags, protective foam sheet).
- Your set consists of materials which can be recycled if disassembled by a specialized company. Please observe the local regulations regarding the disposal of packing materials, exhausted batteries and old equipment.

GENERAL INFORMATION

CD player and CD handling

- Do not touch the lens (A) of the CD player.
- Do not expose the unit, batteries or CDs to humidity, rain, sand or excessive heat (caused by heating equipment or direct sunlight).
- You can clean the CD player with a soft, slightly dampened, lint-free cloth. Do not use any cleaning agents as they may have a corrosive effect.
- To clean the CD, wipe it in a straight line from the center toward the edge using a soft, lint-free cloth. A cleaning agent may damage the disc! Never write on a CD or attach a sticker to it.
- The lens may cloud over when the unit is moved suddenly from cold to warm surroundings. Playing a CD is not possible then. Leave the CD player in a warm environment until the moisture has evaporated.
- Active mobile phones in the vicinity of the CD player may cause malfunctions.
- Avoid dropping the unit as this may cause damage.

Headphones HE205

- Connect the supplied headphones to the LINE OUT/ socket of the player.

Note: LINE OUT/ can also be used for connecting this set to your HiFi system. To adjust the sound and volume, use the controls on the connected audio equipment and on the CD player.

IMPORTANT!

Hearing safety: Do not play your headphones at a high volume. Hearing experts advise that continuous use at high volume can permanently damage your hearing.

Traffic safety: Do not use headphones while driving a vehicle. It may create a hazard and it is illegal in many countries. Even if your headphones are an open-air type designed to let you hear outside sounds, do not turn up the volume so high that you cannot hear what is going on around you.

In-car use (connections supplied or optionally available)

Only use the AY 3545 (4822 219 10033) or AY 3548 (3140 118 71890) car voltage converter (4.5 V DC, positive pole to the centre pin) and the AY 3501 car adapter cassette. Any other product may damage the set.

- 1 Put the set on a horizontal, vibration-free and stable surface. Make sure it is in a safe place, where the set is neither a danger nor an obstacle to the driver and the passengers.
 - 2 Plug the voltage converter into the cigarette lighter socket (**only for 12 V car battery, negative grounding**), then connect the wired end with 4.5V DC input socket on the set.
 - 3 If necessary, clean the cigarette lighter socket to obtain a good electrical contact.
 - 4 Turn down the volume and connect the adapter cassette plug to LINE OUT/ on the set.
 - 5 Carefully insert the adapter cassette into the car radio's cassette compartment.
 - 6 Make sure the cord does not hinder your driving.
 - 7 Decrease the volume on the set if necessary. Start playback on the set and adjust the sound with the car radio controls.
- **Always remove the voltage converter from the cigarette lighter socket when the set is not in use.**

Note: If your car radio has a **LINE IN** socket, it is better to use it for the car radio connection instead of the adapter cassette. Connect the signal lead to this **LINE IN** socket and to LINE OUT/ on the set.

INSTRUCTION FOR USE

CD PLAY

Playing a CD

This CD-player can play all kinds of **Audio Discs** such as CD-Recordables and CD-Rewritables. Do not try to play a CD-ROM, CDi, VCD, DVD or computer CD.

- 1 Push the OPEN ► slider to open the player.
- 2 Insert an audio CD, printed side up, by pressing the CD onto the hub.
- 3 Close the player by pressing the lid down.
- 4 Press ►|| to switch the player on and start playback.
 - The current track number and elapsed playing time are displayed.
- You can pause playback by pressing ►||.
 - The time at which playback was paused starts flashing.
- You can continue playback by pressing ►|| again.
- 5 Press ■ to stop playback.
 - The total number of tracks and the total playing time of the CD are displayed.
- 6 Press ■ again to switch the player off.
- To remove the CD, hold it by its edge and press the hub gently while lifting the CD.

Note: If there is no activity, the set will automatically switch off after a while to save energy.

Playback information

- If a CD-Recordable (CD-R) or a CD-Rewritable (CD-RW) is not recorded properly, **NO DISC** is displayed, indicating that the CD has not been finalized. In that case, use FINALIZE on your CD recorder to complete the recording.
- When playing a CD-Rewritable (CD-RW), please note that it takes 3–15 seconds after pressing ►|| for sound reproduction to start.
- Playback will stop if you open the CD lid.
- While the CD is read, **1 - -** flashes in the display.

Volume and bass

Volume adjustment

- Adjust the volume by using VOL ▲.

Bass adjustment

- Press DBB to switch the bass enhancement on or off.
 - **DBB** is shown if the bass enhancement is activated.

Remote control (supplied or optionally available)

Use the AY 3768 cord remote control. The buttons on the remote control have the same functions as the corresponding buttons on the set.

- 1 Press ■ twice to switch off the set.
- 2 Firmly connect the remote control to LINE OUT/ on the set.
- 3 Adjust the volume VOL ▲ on the CD player and remote control.

FEATURES

Selecting a track and searching

Selecting a track during playback

- Briefly press ◀◀ or ▶▶ once or several times to skip to the current, previous or next track.
 - Playback continues with the selected track, and the track's number is displayed.

Selecting a track when playback is stopped

- 1 Briefly press ◀◀ or ▶▶ once or several times to select the desired track. The track number is displayed.
- 2 Press ►|| to start CD play.
 - Playback starts with the selected track.

Searching for a passage during playback

- 1 Keep ◀◀ or ▶▶ pressed to find a particular passage in a backward or forward direction.
 - Searching starts while playback continues at low volume. After 2 seconds the search speeds up.
- 2 Release the button when you reach the desired passage.
 - Playback continues from this position.

Notes: – If the player is in **SCAN** mode (see **MODE** chapter), searching is not possible.
– In **shuffle**, **shuffle repeat** all or **repeat** mode (see **MODE** chapter), or while playing a program, searching is only possible within the particular track.

Programming track numbers

You can store up to 30 tracks to play in a program. A single track may be stored more than once in the program.

- 1 While playback is stopped, select a track with ◀◀ or ▶▶.
- 2 Press PROGRAM to store the track.
 - **program** lights up; the track number programmed and **P** with the total number of stored tracks are displayed.
- 3 Select and store all desired tracks in this way.
- 4 Press ►|| to start playback of your selected tracks.
 - **program** is shown and playback starts.

- You can review the program by pressing PROGRAM for more than 2 seconds.
 - The display shows all the stored tracks in sequence.

Notes: – If you press PROGRAM and there is no track selected, **SEL** is displayed.
– If you try to store more than 30 tracks, **FULL** is displayed.

Clearing the program

- While playback is stopped, press ■ to clear program.
 - **SEL** is displayed once, **program** goes off, and the program is cleared.

Note: The program will also be cleared if the power supply is interrupted, or if the CD-player lid is opened, or if the set switches off automatically.

INSTRUCTION FOR USE

FEATURES

Selecting different playing possibilities—MODE

It is possible to play tracks in random order, to repeat a single track or the entire CD, and to play the first few seconds of each track.

- 1 Press MODE during playback as often as required in order to activate one of the following 'modes'. The active mode is shown in the display.

→ **shuffle** : All tracks of the CD are played in random order until all of them have been played once.

→ **shuffle repeat all** : All tracks of the CD are played repeatedly in random order.

→ **repeat** : The current track is played repeatedly.

→ **repeat all** : The entire CD is played repeatedly.

→ **5 C R N** : The first 10 seconds of each of the remaining tracks are played in sequence.

- 2 Playback starts in the chosen mode after 2 seconds.

- To return to normal playback, press MODE repeatedly until the display shows no active modes.

ESP / Power Save Mode

With a conventional portable CD-player you might have experienced that the music stopped e.g. when you were jogging. The **ELECTRONIC SKIP PROTECTION** prevents loss of sound caused by light vibrations and shocks. Continuous playback is ensured. However ESP does not prevent playback interruptions during vigorous running. It also does not protect the unit against any damage caused by dropping! On this set ESP is default on. It is possible to set ESP off and enter the Power Save mode. The Power Save mode helps to extend battery lifetime for longer playback.

- Press MODE for more than 2 seconds.
→ **ESP** disappears. Power save mode is now activated.
- Press MODE again for more than 2 seconds.
→ **ESP** is displayed once

ESP on → Power Save → ESP on

RESUME and HOLD

You can interrupt playback and continue (even after an extended period of time) from the position where playback stopped (RESUME) and you can lock all buttons of the set so that no action will be executed (HOLD). Use the RESUME—HOLD—OFF slider for these functions.

RESUME – continuing from where you have stopped

- 1 Switch the slider to RESUME during playback to activate RESUME.
→ **resume** is shown.

- 2 Press ■ whenever you want to stop playback.

- 3 Press ►|| whenever you want to resume playback.
→ **resume** is shown and playback continues from where you have stopped.

- To deactivate RESUME, switch the slider to OFF.
→ **resume** goes off.

HOLD – locking all buttons

You can lock the buttons of the set by switching the slider to HOLD. Now, when a key is pressed, no action will be executed. This is of use, for example, when transporting the player in a bag. With HOLD activated, you can avoid accidental activation of other functions.

- 1 Switch the slider to HOLD to activate HOLD.
→ All buttons are locked. **HOLD** is shown when you press any button. If the set is switched off, **hold** will be shown only when ►|| is pressed.

- 2 To deactivate HOLD, switch the slider to OFF.

Note: If you deactivate HOLD by switching the slider to RESUME, you will be activating the RESUME function.

TROUBLESHOOTING

Troubleshooting

WARNING: Under no circumstances should you try to repair the set yourself as this will invalidate the warranty. If a fault occurs, first check the points listed, before taking the unit for repair. If you are unable to solve a problem by following these hints, consult your dealer or service center.

The CD player has no power, or playback does not start

- Check that your batteries are not dead or empty, that they are inserted correctly, that the contact pins are clean.
- Your adapter connection may be loose. Connect it securely.
- For in-car use, check that the car ignition is on. Also check player's batteries.

The indication **CD** is displayed

- Check that the CD is clean and correctly inserted (label-side upward).
- If your lens has steamed up, wait a few minutes for this to clear.

The indication **CD-R** is displayed

- CD-RW (CD-R) was not recorded properly. Use FINALIZE on your CD-recorder.

The indication **HOLD** is on and/or there is no reaction to controls

- If HOLD is activated, then deactivate it.
- Electrostatic discharge. Disconnect power or remove batteries for a few seconds.

The CD skips tracks

- The CD is damaged or dirty. Replace or clean the CD.
- RESUME, SHUFFLE or PROGRAM is active. Switch off whichever is on.

Troubleshooting

No sound or bad sound quality.

- PAUSE might be active. Press ►||.
- Loose, wrong or dirty connections. Check and clean connections.
- Volume might not be appropriately adjusted. Adjust the volume.
- Strong magnetic fields. Check player's position and connections. Also keep away from active mobile phones.
- For in-car use, check that the cassette adapter is inserted correctly, that the car cassette player's playback direction is correct (press autoreverse to change), and that the cigarette lighter jack is clean. Allow time for temperature change.

operation.

CAUTION

Use of controls or adjustments or performance of procedures other than herein may result in hazardous radiation exposure or other unsafe

SAFETY & WARNINGS

GB WARNING

All ICs and many other semiconductors are susceptible to electrostatic discharges (ESD). Careless handling during repair can reduce life drastically.
When repairing, make sure that you are connected with the same potential as the mass of the set via a wristband with resistance. Keep components and tools at this potential.

NL WAARSCHUWING

Alle IC's en vele andere halfgeleiders zijn gevoelig voor electrostatische ontladingen (ESD).
Onzorgvuldig behandelen tijdens reparatie kan de levensduur drastisch doen verminderen. Zorg ervoor dat u tijdens reparatie via een polsband met weerstand verbonden bent met hetzelfde potentiaal als de massa van het apparaat.
Houd componenten en hulpmiddelen ook op hetzelfde potentiaal.

F ATTENTION

Tous les IC et beaucoup d'autres semi-conducteurs sont sensibles aux décharges statiques (ESD). Leur longévité pourrait être considérablement écourtée par le fait qu'aucune précaution n'est prise à leur manipulation.
Lors de réparations, s'assurer de bien être relié au même potentiel que la masse de l'appareil et enfilez le bracelet serti d'une résistance de sécurité.
Veiller à ce que les composants ainsi que les outils que l'on utilise soient également à ce potentiel.

D WARNUNG

Alle ICs und viele andere Halbleiter sind empfindlich gegenüber elektrostatischen Entladungen (ESD).
Unvorsichtige Behandlung im Reparaturfall kann die Lebensdauer drastisch reduzieren.
Sorgen Sie dafür, daß Sie im Reparaturfall über ein Pulsarmband mit Widerstand mit dem Massepotential des Gerätes verbunden sind.
Halten Sie Bauteile und Hilfsmittel ebenfalls auf diesem Potential.

I AVVERTIMENTO

Tutti IC e parecchi semi-conduttori sono sensibili alle scariche statiche (ESD).
La loro longevità potrebbe essere fortemente ridotta in caso di non osservazione della più grande cauzione alla loro manipolazione. Durante le riparazioni occorre quindi essere collegato allo stesso potenziale che quello della massa dell'apparecchio tramite un braccialetto a resistenza.
Assicurarsi che i componenti e anche gli utensili con quali si lavora siano anche a questo potenziale.

SERVICE HINTS

REPAIR POSITION COPPERSIDE

To get access to the copperside of the printed board assembly proceed as follows:

- 1.Remove the bottom screws(6x)
- 2.Lift the bottom -cabinet
- 3.Supply the unit via external DC-socket
- 4.Take care that the door switch is closed during measurements

REPAIR POSITION COMPONENTSIDE

To get access to the componentside of the printed board assembly proceed as followed:

- 1.Remove the bottom screws(6x)
- 2.Open the CD-door
- 3.Lift the top-cabinet and put it backwards on the table
- 4.Supply the unit via the external DC-socket
- 5.Take care that the door switch is closed during measurements

DISMANTLING THE CD-DOOR

To dismantle the CD-door proceed as follows:

- 1.Dismantle bottom and printed board/drive assembly
- 2.Disconnect membrane keyboard
(flex-foil connector on copperside of printed board)
- 3.Bend the cabinet rightwards downwards as indicated in the picture above

Remark:Do not use screwdrivers or tools like that.
Sharp edges could damage hinge or cabinet part.

15	A9	O	DRAM address signal 9
16	A0	O	DRAM address signal 0
17	A1	O	DRAM address signal 1
18	A2	O	DRAM address signal 2
19	A3	O	DRAM address signal 3
20	DVSS2	I	Ground for digital circuits
21	DVDD2	I	Power supply for digital circuits
22	SPOUT	O	Spindle motor drive signal output (Absolute value output)
23	TRVP	O	Traverse drive output (+side output)
24	TRVM	O	Traverse drive output (-side output)
25	TRP	O	Traverse drive output (+side output)
26	TRM	O	Traverse drive output (-side output)
27	FOP	O	Focus drive output (+side output)
28	FOM	O	Focus drive output (-side output)
29	IOVDD1	I	I/O power supply
30	TBAL	O	Tracking balance adjustment output
31	FBAL	O	Focus balance adjustment output
32	FE	I	Focus error signal input (Analog input)
33	TE	I	Tracking error signal input (Analog input)
34	RFENV	I	RF envelope signal input (Analog input)
35	OFT	I	Off-track signal input H: Off track
36	NRFDET	I	RF detection signal input L: Detect
37	BDO	I	Dropout signal input H: Dropout
38	LDON	O	Laser ON signal output H: ON
39	ARF	I	RF signal input
40	IREF	I	Reference current input
41	ADPVCC	I	A/D converter reference voltage input (Analog input)
42	DSLIF	O	DSL loop filter
43	DRF	I	DSL bias
44	PLLIF	O	PLL loop filter
45	VCOF	O	Jitter-free VCO loop filter
46	AVDD2	I	Power supply for analog circuits (For DSL, PLL, VCOF, A/D converter, and D/A converter)
47	AVSS2	I	Ground for analog circuits (For DSL, PLL, VCOF, A/D converter, and D/A converter)
48	OUTL	O	L-ch audio output
49	AVSS1	I	Ground for analog circuit (For audio output stage)
50	OUTR	O	R-ch audio output
51	AVDD1	I	Power supply for analog circuits (For audio output stage)
52	FSEL	I	Noise filter for microcontroller interface ON/OFF selection input L: ON H: OFF
53	TMOD1	I	Test input pin Normal: L
54	TMOD2	I	Test input pin Normal: L
55	*FLAG	O	Flag signal output
56	*IPFLAG	O	Interpolation flag signal output H: Interpolation
57	*EXT0	I/O	Expansion I/O port 0
58	*EXT1	I/O	Expansion I/O port 1
59	IOVDD2	I	I/O power supply
60	TX	O	Digital audio interface signal output
61	MCLK	I	Microcontroller command clock signal input (Latches the data at a rising edge)
62	MDATA	I	Microcontroller command data signal input
63	MLD	I	Microcontroller command load signal input L: Load
64	*BLKCK	O	Subcode block clock signal output f=75 Hz (Normal-speed playback)
65	PWMSEL	I/O	PWM output mode selection input L: Direct H: 3-state
66	SMCK	O	4.236-MHz/8.4672-MHz clock signal output
67	DMUTE	I/O	Muting input H: Mute
68	STAT	O	Status signal output
69	NRST	I	Reset input L: Reset

Pin	Name	I/O	Description
70	*SPPOL	O	Spindle motor drive signal output (Polarity output)
71	PMCK	O	88.2-KHz clock signal output
72	*NCLDCK	O	Frame sync signal output f=7.35kHz (Normal-speed playback)
73	*SUBC	O	Subcode serial output
74	*SBCK	I	Subcode serial output clock input
75	NTEST	I	Test input pin Normal: H
76	X2	O	Crystal oscillator output pin f=16.9344 MHz
77	X1	I	Crystal oscillator input pin f=16.9344 MHz
78	DVSS1	I	Ground for digital circuits
79	DVDD1	I	Power supply for digital circuits
80	*EXT2	I	Expansion I/O part 2

AN8789FB– SILICON MONOLITHIC BIPOLAR IC

Pin	Name	Description
1	VSEN	Empty detection input
2	PVCC1	Power supply
3	RESET	Reset output
4	DED	Dead time input
5	OUT	CD/DC converter output
6	FB	Error amplifier output
7	IN	Error amplifier input
8	SPRO	Short-circuit protection input
9	CT	Triangular wave oscillation
10	AREF	1/2 AVDD output
11	CRIP	Ripple rejection capacitor
12	SVCC	Power supply
13	N.C.	Not connected
14	AVDD	Ripple filter output
15	DRVDD	Power supply
16	VREF	1/2 VDCC input
17	INFO	Driver input
18	INTR	Driver input
19	LDON	Driver ON/OFF control
20	INSP	Driver input
21	PC	Driver IN/OFF control
22	INTV	Driver input
23	TRVSTOP	Driver ON/OFF control
24	TR-	Driver output
25	TR+	Driver output
26	FO-	Driver output
27	FO+	Driver output
28	PGND	Ground
29	SP+	Driver output
30	SP-	Driver output
31	TV+	Driver output
32	TV-	Driver output
33	ICONT	Charge current setting
34	MRST	Muting reset output
35	EMP	Empty detection output
36	Vc	Driver supply voltage
37	TB	PWM circuit output
38	CLK	External sync input
39	START	Start oscillation starting input
40	POWER	Power ON/OFF
41	PVCC2	Power supply
42	IOUT	Charging and battery detection
43	SGND	Ground
44	PWMG	PWM loop gain control

MN101C39C-399 - MICROCOMPUTER BLOCK DIAGRAM

PIN DESCRIPTION OF MN101C39C-399

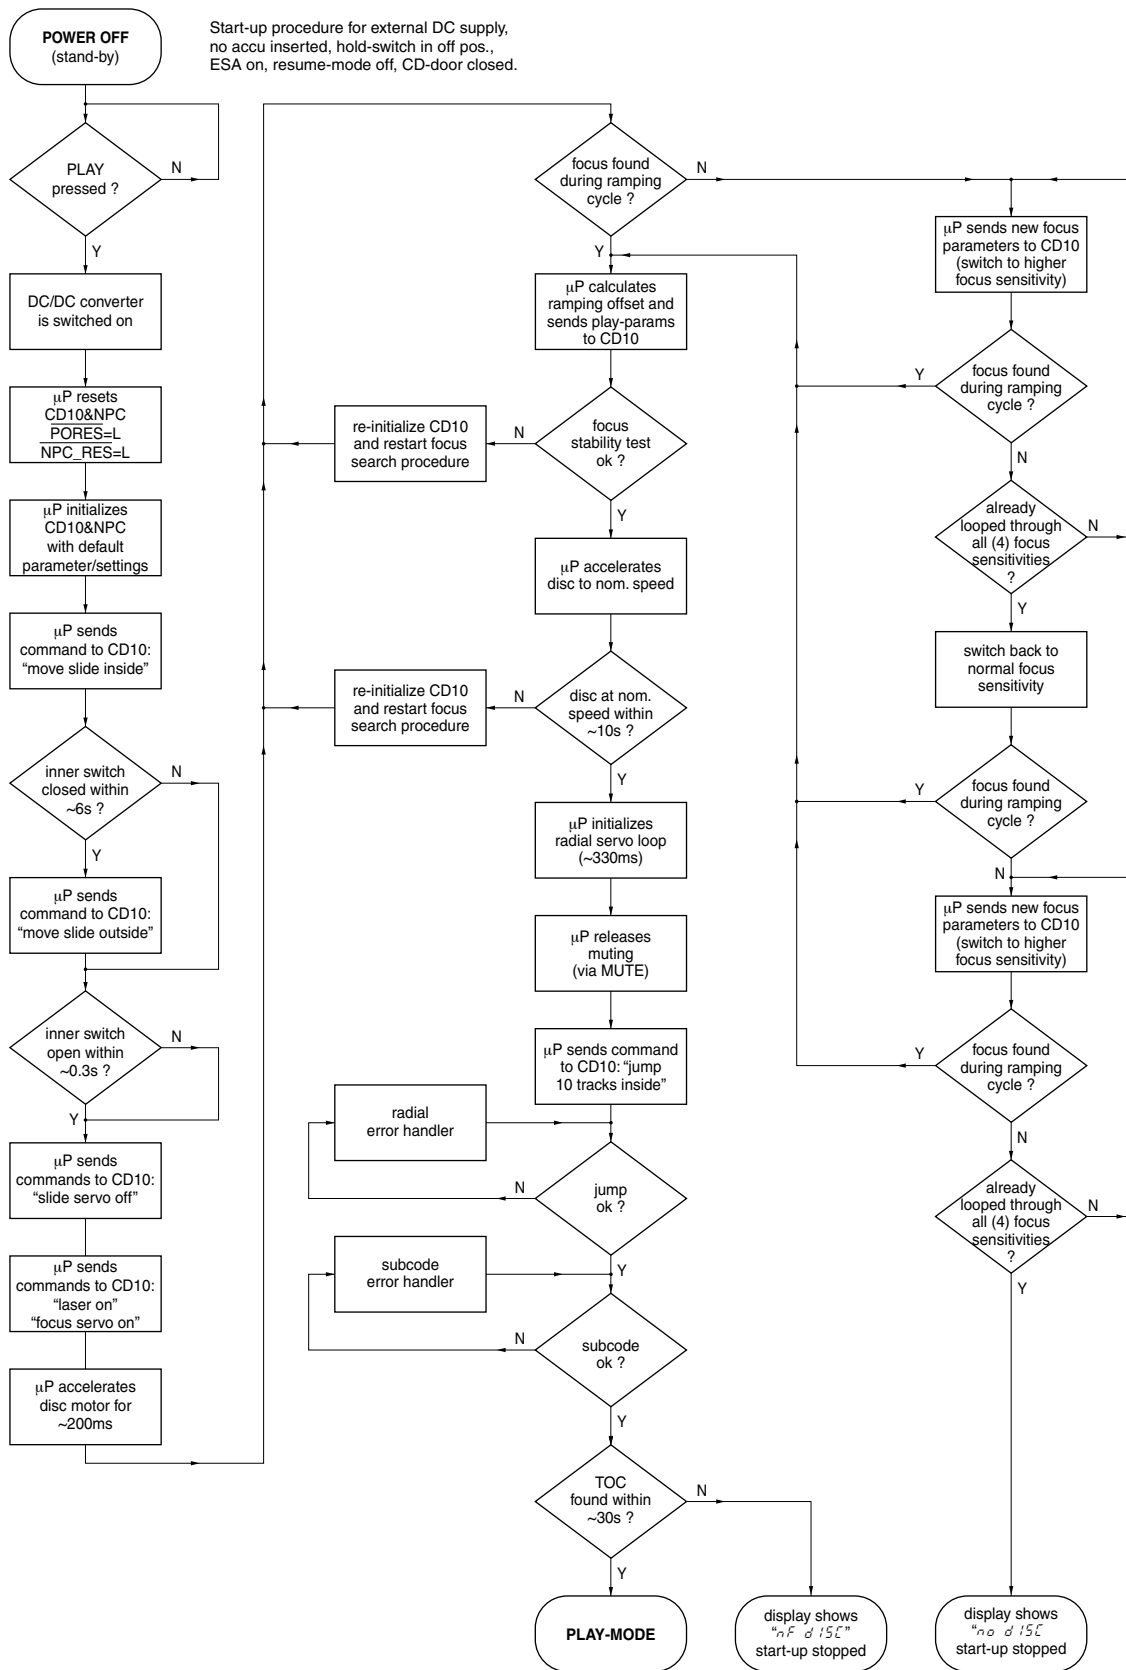

Pin Specification (1/2)

Pins	Special Functions		I/O	Direction Control	Pin Control	Functions Description	
P00	SBO0	TXD	in/out	P0DIR0	P0PLU0	SBO0 : Serial Interface 0 transmission data output	TXD : UART transmission data output
P01	SBI0	RXD	in/out	P0DIR1	P0PLU1	SBI0 : Serial Interface 0 reception data input	RXD : UART reception data input
P02	SBT0		in/out	P0DIR2	P0PLU2	SBT0 : Serial Interface 0 clock I/O	
P03	SBO1		in/out	P0DIR3	P0PLU3	SBO1 : Serial Interface 1 transmission data output	
P04	SBI1		in/out	P0DIR4	P0PLU4	SBI1 : Serial Interface 1 reception data input	
P05	SBT1		in/out	P0DIR5	P0PLU5	SBT1 : Serial Interface 1 clock I/O	
P06	NDK	BUZZER	in/out	P0DIR6	P0PLU6	NDK : Data acknowledgement signal	BUZZER : Buzzer output
P10	RMOUT		in/out	P1DIR0	P1PLU0	RMOUT : Remote control carrier output	
P11			in/out	P1DIR1	P1PLU1		
P12	TM2IO		in/out	P1DIR2	P1PLU2	TM2IO : Timer 2 I/O	
P13	TM3IO		in/out	P1DIR3	P1PLU3	TM3IO : Timer 3 I/O	
P14	TM4IO		in/out	P1DIR4	P1PLU4	TM4IO : Timer 4 I/O	
P20	IRQ0		in	-	P2PLU0	IRQ0 : External interrupt 0	
P21	IRQ1	ACZ	in	-	P2PLU1	IRQ1 : External interrupt 1	ACZ : Zero-cross input
P22	IRQ2		in	-	P2PLU2	IRQ2 : External interrupt 2	
P23	IRQ3		in	-	P2PLU3	IRQ3 : External interrupt 3	
P27	NRST		in	-	-	NRST : Reset	
P40	KEY 0		in/out	P4DIR0	P4PLU0	KEY0 : KEY interrupt input 0	
P41	KEY 1		in/out	P4DIR1	P4PLU1	KEY1 : KEY interrupt input 1	
P42	KEY 2		in/out	P4DIR2	P4PLU2	KEY2 : KEY interrupt input 2	
P43	KEY 3		in/out	P4DIR3	P4PLU3	KEY3 : KEY interrupt input 3	
P44	KEY 4		in/out	P4DIR4	P4PLU4	KEY4 : KEY interrupt input 4	
P45	KEY 5		in/out	P4DIR5	P4PLU5	KEY5 : KEY interrupt input 5	
P46	KEY 6		in/out	P4DIR6	P4PLU6	KEY6 : KEY interrupt input 6	
P47	KEY 7		in/out	P4DIR7	P4PLU7	KEY7 : KEY interrupt input 7	
P50	NWE	LED0	in/out	P5DIR0	P5PLU0	NWE : Write enable signal	LED0 : LED driving pin 0
P51	NRE	LED1	in/out	P5DIR1	P5PLU1	NRE : Read enable signal	LED1 : LED driving pin 1
P52	NCS	LED2	in/out	P5DIR2	P5PLU2	NCS : Chip select signal	LED2 : LED driving pin 2
P53	A16	LED3	in/out	P5DIR3	P5PLU3	A16 : Address output (bp16)	LED3 : LED driving pin 3
		SEG27					SEG27 : LCD segment output 27
P54	A17	LED4	in/out	P5DIR4	P5PLU4	A17 : Address output (bp17)	LED : LED driving pin 4
		SEG26					SEG26 : LCD segment output 26
P60	A0	SEG25	in/out	P6DIR0	P6PLU0	A0 : Address output (bp0)	SEG25 : LCD segment output 25
P61	A1	SEG24	in/out	P6DIR1	P6PLU1	A1 : Address output (bp1)	SEG24 : LCD segment output 24
P62	A2	SEG23	in/out	P6DIR2	P6PLU2	A2 : Address output (bp2)	SEG23 : LCD segment output 23
P63	A3	SEG22	in/out	P6DIR3	P6PLU3	A3 : Address output (bp3)	SEG22 : LCD segment output 22
P64	A4	SEG21	in/out	P6DIR4	P6PLU4	A4 : Address output (bp4)	SEG21 : LCD segment output 21
P65	A5	SEG20	in/out	P6DIR5	P6PLU5	A5 : Address output (bp5)	SEG20 : LCD segment output 20
P66	A6	SEG19	in/out	P6DIR6	P6PLU6	A6 : Address output (bp6)	SEG19 : LCD segment output 19
P67	A7	SEG18	in/out	P6DIR7	P6PLU7	A7 : Address output (bp7)	SEG18 : LCD segment output 18

Pin Specification (2/2)

Pins	Special Functions		I/O	Direction Control	Pin Control	Functions Description	
P70	A8	SEG17 SDO0	in/out	P7DIR0	P7PLUD0	A8 : Address output (bp8)	SEG17 : LCD segment output 17 SDO0 : Synchronous output 0
P71	A9	SEG16 SDO1	in/out	P7DIR1	P7PLUD1	A9 : Address output (bp9)	SEG16 : LCD segment output 16 SDO1 : Synchronous output 1
P72	A10	SEG15 SDO2	in/out	P7DIR2	P7PLUD2	A10 : Address output (bp10)	SEG15 : LCD segment output 15 SDO2 : Synchronous output 2
P73	A11	SEG14 SDO3	in/out	P7DIR3	P7PLUD3	A11 : Address output (bp11)	SEG14 : LCD segment output 14 SDO3 : Synchronous output 3
P74	A12	SEG13 SDO4	in/out	P7DIR4	P7PLUD4	A12 : Address output (bp12)	SEG13 : LCD segment output 13 SDO4 : Synchronous output 4

COM3	COM3		out	-	-		COM3 : LCD common output 3

START-UP PROCEDURE -CHART

SERVICE TEST PROGRAM

1. PRELIMINARY SETUP

- To enter the service test program disconnect the AC/DC adaptor and remove batteries, open the CD-door and hold the buttons "PLAY" & "PREV" depressed while turning power on (i.e. connecting the AC/DC adaptor).
- The display shows the software version of the built-in μP (i.e. "5-25"). Versions are counted from "00" onwards; that means the higher the number the newer the software.
- The program is now in the main menu – various tests can be entered by pressing the corresponding buttons (see flow chart on next page or detailed description of available tests below).
- To exit the service test program press the "STOP" button or disconnect the set from the power source.

2. DISPLAY TEST

Purpose: Check functionality of display and display driver.

- To enter the display test start the service test program and press the "NEXT" button.
- The display shows test pattern1. All segments are activated for finding open circuits (see flow chart on next page).
- To jump to the next pattern press the "NEXT" button.
- The display shows test pattern2. All alternate pins (2, 4, ...) are activated for finding short circuits (see flow chart on next page).
- To jump back to test pattern1 press the "NEXT" button, to exit the display test and return to the main menu press the "STOP" button.

3. KEY TEST

Purpose: Check operation of keys and cord remote control.

- To enter the key test start the service test program and press the "MODE" button.
- The display shows " - - ".
- Hold key depressed and check corresponding key code on the display. Key codes can be found in table1 (see flow chart on next page).
- To exit the key test and return to the main menu press the "STOP" button.

4. PLAYBACK TEST WITH ERROR ANALYSIS

Purpose: Analyze errors that occur during playback and search for intermittent failures.

- To enter the playback test start the service test program and press the "BASS" button.
- To start the error analysis press the "PLAY" button. Note that the playback test can only be entered if the CD-door is closed.
- The set will read the TOC and start playback.

As long as the playback is free of errors the display shows track and time information like in normal play-mode. In case of errors corresponding error codes will be displayed. The meaning of these error codes can be found in table2 (see flow chart on next page).

Note: Errors can either be "fatal" or "non fatal". Fatal errors always stop the playback, non fatal errors only cause a short interruption of the music. Fatal errors are displayed as long as the set is connected to the power source, non fatal errors are displayed until a new error occurs or a button is pressed.

- To stop the playback test disconnect the set from the power source.

5. SERVO TEST

Purpose: Check door switch, inner switch of CD-drive, movement of slide and acceleration of discmotor.

- To enter the servo test start the service test program and press the "PLAY" button.
- The display shows "x y".
"x" indicates state of door switch;
"y" indicates state of inner switch.
x,y = "0" means switch is closed; "1" means switch is open.
- To move slide outside hold the "NEXT" button depressed.
- To move slide inside hold the "PREV" button depressed.
- To accelerate the discmotor clockwise hold the "MODE" button depressed.
- To accelerate the discmotor counter-clockwise hold the "PROG" button depressed.
- To enter the focus test press the "PLAY" button, to exit the servo test and return to the main menu press the "STOP" button.

6. FOCUS TEST

Purpose: Check movement of lens and operation of focus servo for CDDA and CDRW discs.

Since the CDRW reflects much less light than an ordinary CDDA, the gain of the HF-amplifier stage and the sensitivity of the ADC inside the Decoder&Digital Servo IC "CD10" must be adapted accordingly. The gain is switched via the CDRW input of the HF-preamplifier. The ADC-sensitivity is set via software parameters (sent from μP to "CD10"). In total, there are 4 sensitivity modes available: 1 for CDDA and 3 for CDRW. The modes are listed in table3 (see next page). In normal play-mode, the correct focus sensitivity is chosen automatically during start-up (see "Start-up procedure" on previous page). In the service test program, the sensitivity can be chosen manually in order to allow individual measurements in several modes.

- The focus servo loop is switched on and the set starts searching the focus ("focus ramping"). As soon as the focus has been found the focus servo loop is closed and the state of the focus is monitored continuously.
- If the focus is OK the display shows " F x", else " - F x".
"x" indicates the sensitivity mode. Details can be found in table3 (see flow chart on next page).
- To toggle between sensitivity modes press the "BASS" button.
- To move slide outside hold the "NEXT" button depressed.
- To move slide inside hold the "PREV" button depressed.
- To accelerate the discmotor clockwise hold the "MODE" button depressed.
- To accelerate the discmotor counter-clockwise hold the "PROG" button depressed.
- In case the focus is OK the discmotor test can be entered by pressing the "PLAY" button, to exit the focus test and return to the main menu press the "STOP" button.

7. DISCMOTOR TEST

Purpose: Check speed regulation of discmotor.

- The speed regulation is switched on and the discmotor starts rotating. If the speed reaches 75% of the nom. speed the display shows " d", else " - d".
- In parallel also the state of the focus is monitored continuously (display " F x" or " - F x").
- In case the disc speed is OK and the focus is OK the radial test can be entered by pressing the "PLAY" button, to exit the discmotor test and return to the main menu press the "STOP" button.

8. RADIAL TEST

Purpose: Check if radial loop locks and an audio signal is audible at the headphone output.

- The radial servo loop is switched on, mute is released and the audio signal is audible. If the system is on track the display shows " r", else " - r".
- In parallel also the disc speed (display " d" or " - d") and the state of the focus (display " F x" or " - F x") are monitored continuously.
Note: In case of radial errors the audio output is muted and muting is not released automatically when the systems recovers from the error. " - r" remains on the display.
To open mute again press the "NEXT" or "PREV" button.
- To jump 16 tracks outside press the "NEXT" button.
- To jump 16 tracks inside press the "PREV" button.
- To exit the radial test and return to the main menu press the "STOP" button, to exit the service test program disconnect the set from the power source.

Important remark:

In radial test mode data to the DRAM is written at 1.2 times the nominal speed, and read from the DRAM at nominal speed. Because writing is done faster than reading the DRAM gets full after a certain time.

In normal play mode the system would now wait until the DRAM is partly emptied again, jump backwards and resume filling at the last written position. However, in radial test mode the jumps would disturb measurements on the radial servo loop. Therefore this function has been disabled and filling restarts immediately from the current position of the pick-up unit. As a result "jumps" are audible during playback.

SERVICE TEST PROGRAM - FLOW CHART

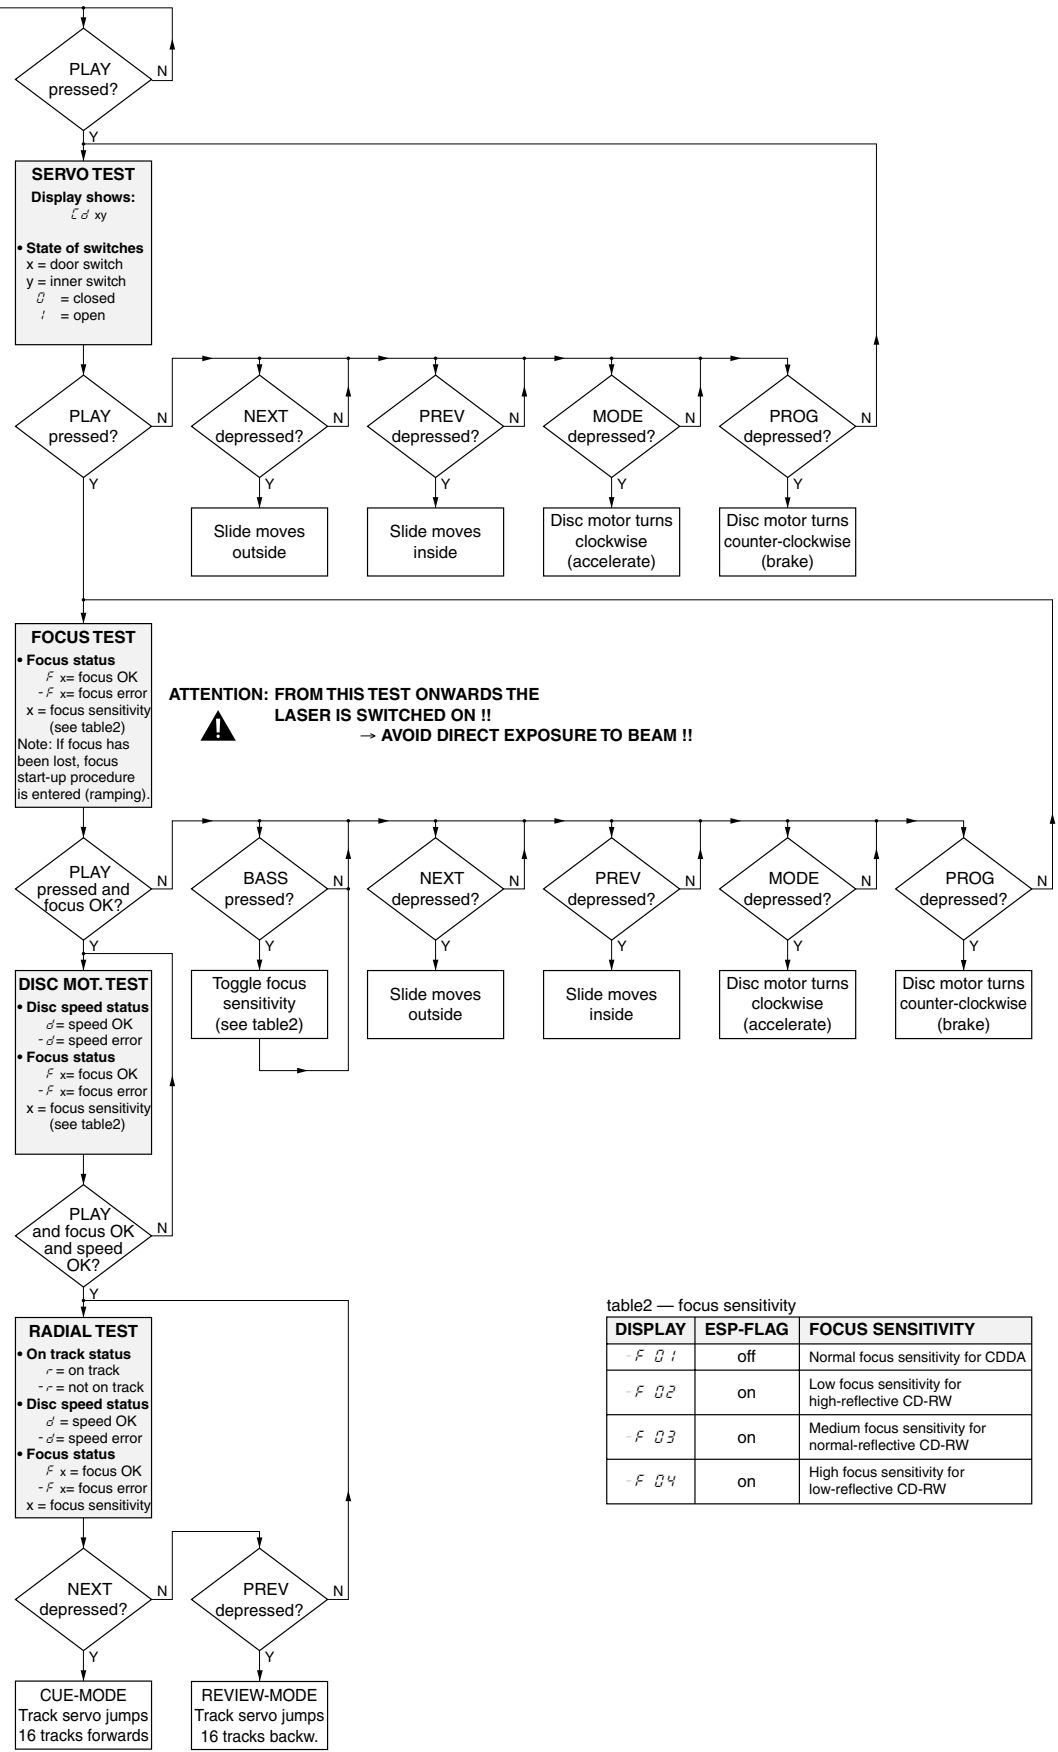

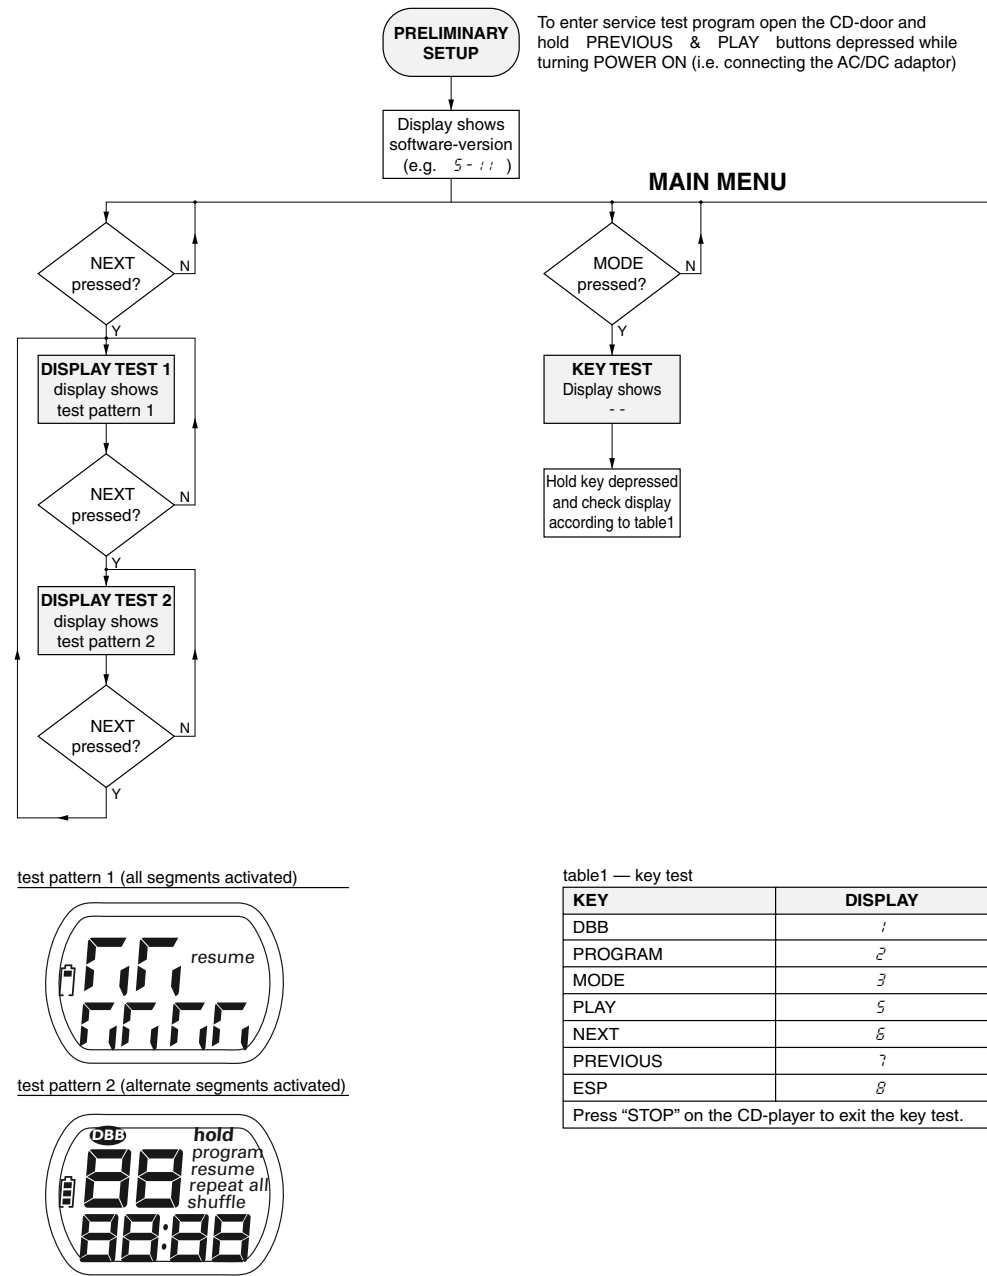

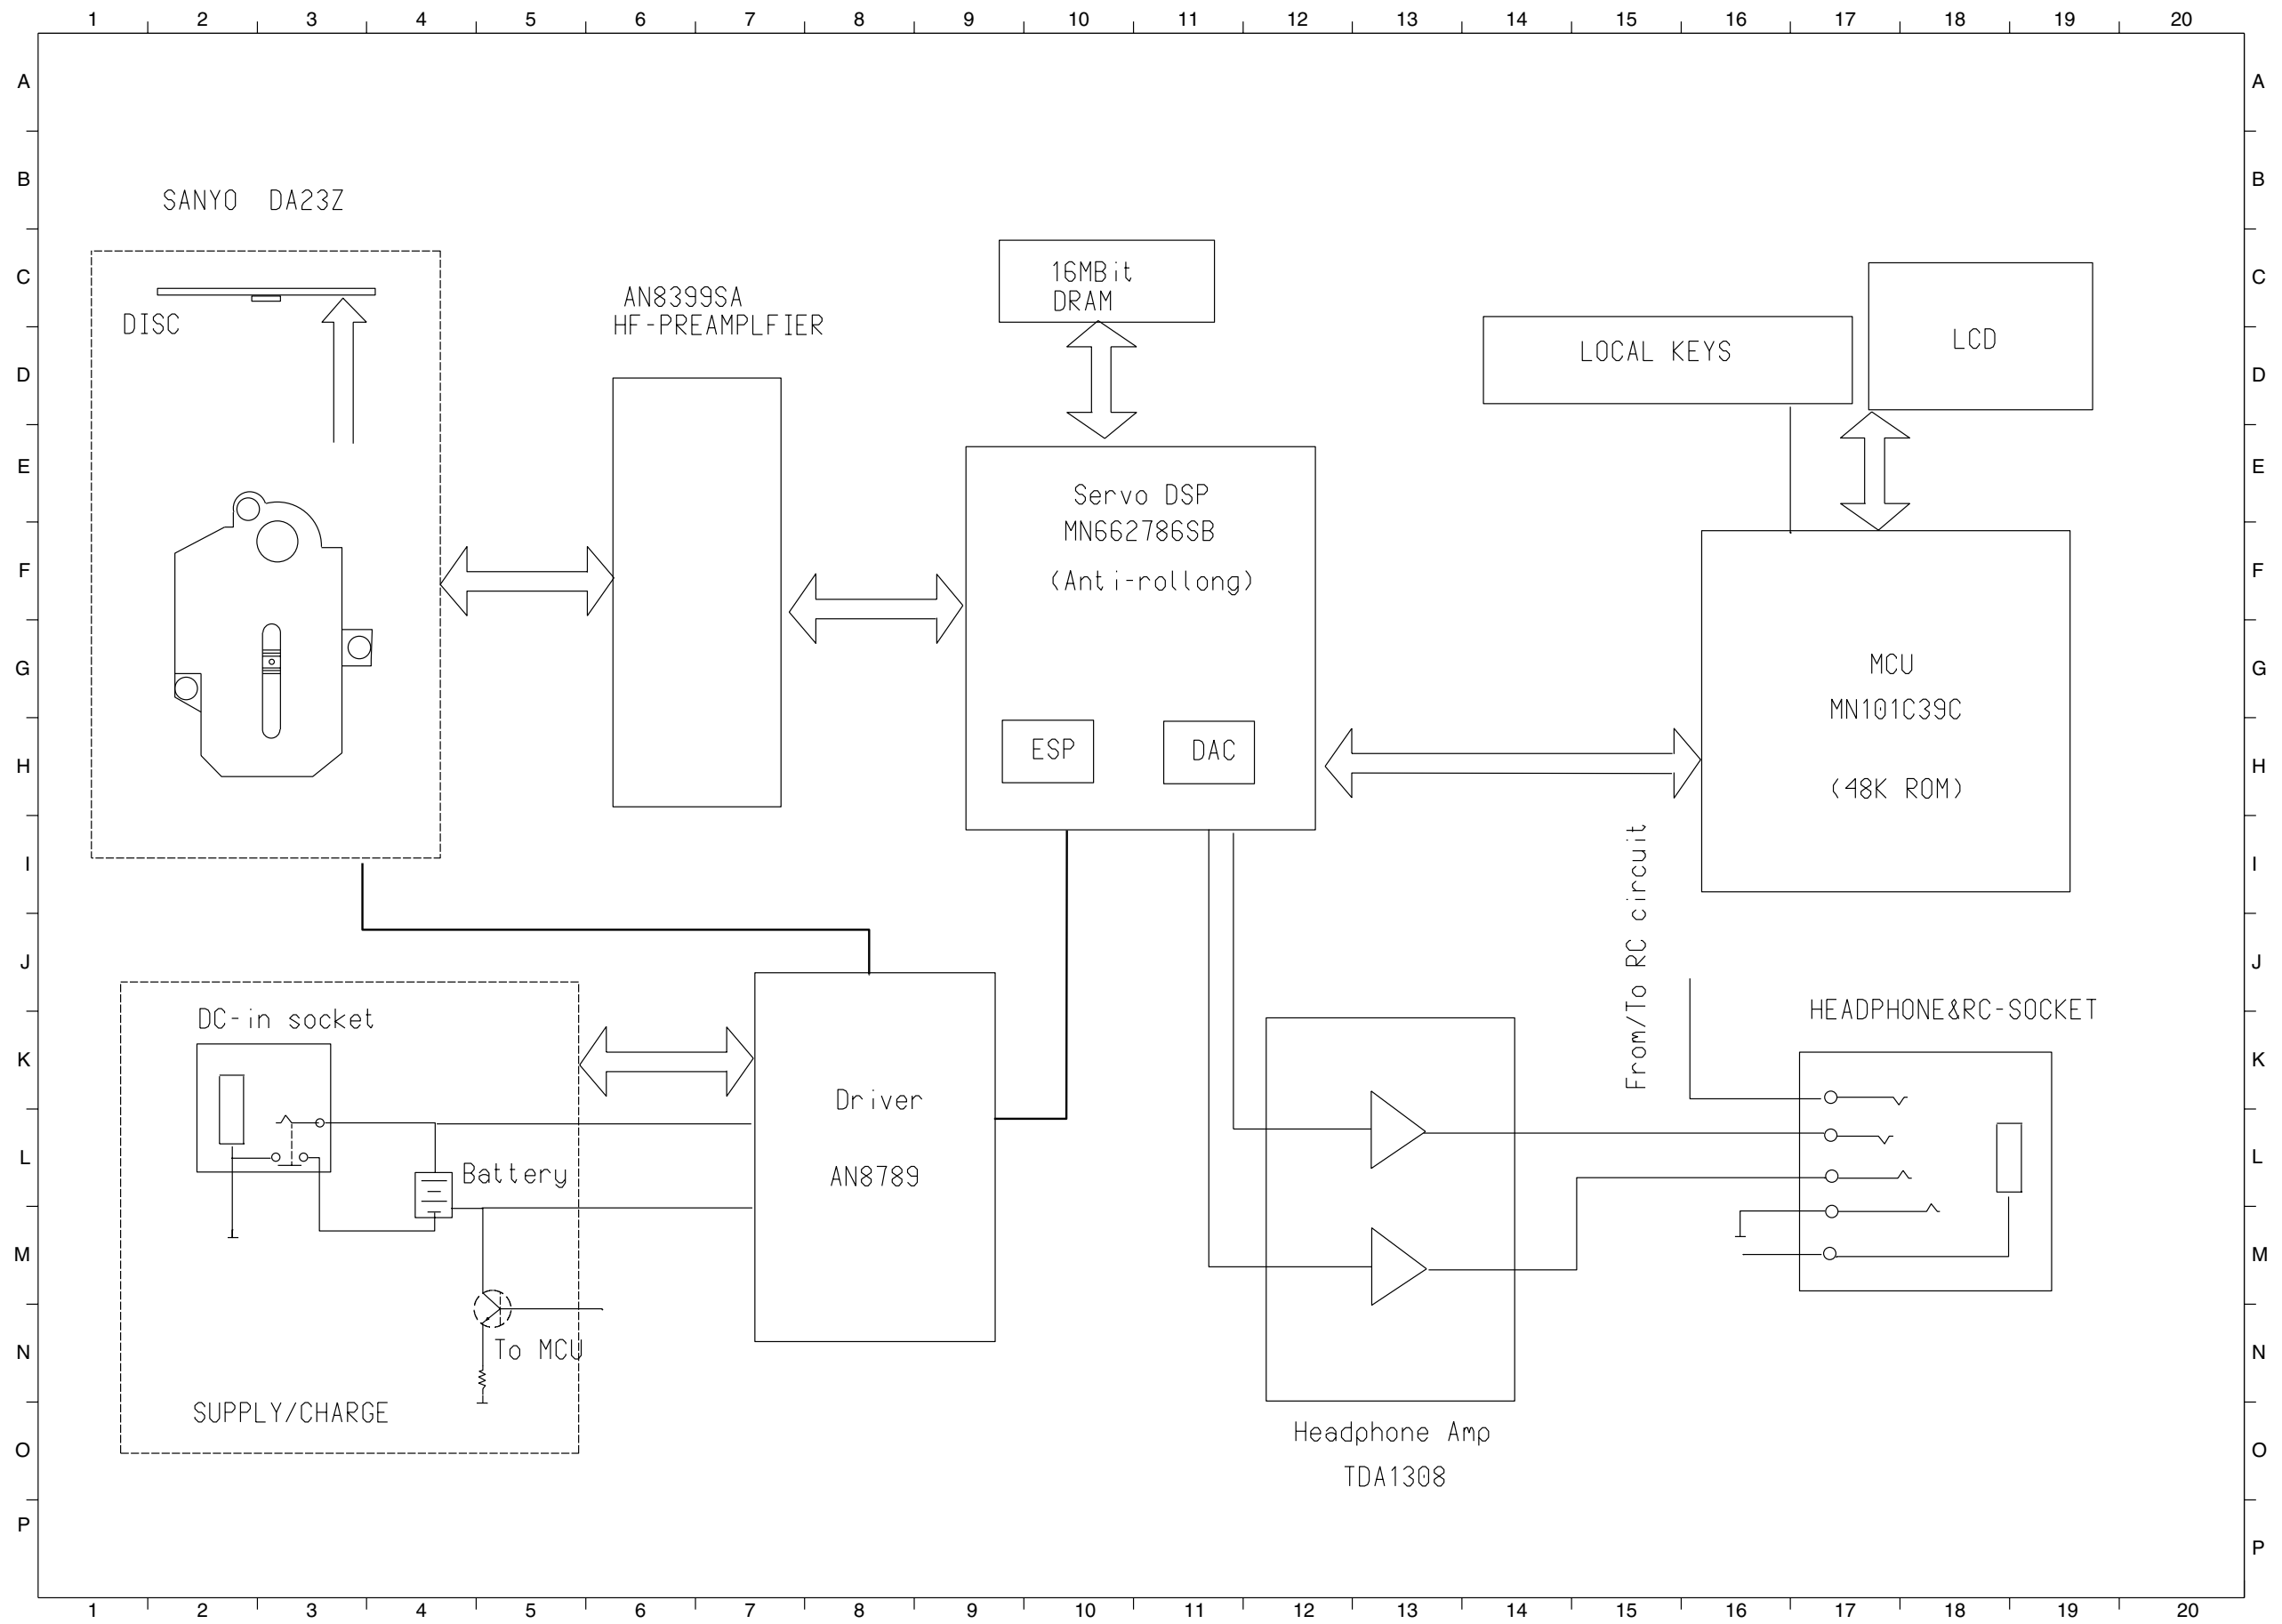

table2 — focus sensitivity

DISPLAY	ESP-FLAG	FOCUS SENSITIVITY
- F 0 1	off	Normal focus sensitivity for CDDA
- F 0 2	on	Low focus sensitivity for high-reflective CD-RW
- F 0 3	on	Medium focus sensitivity for normal-reflective CD-RW
- F 0 4	on	High focus sensitivity for low-reflective CD-RW
