## LOCATION OF PC BOARDS

### VERSION VARIATIONS:

Type /Versions: Features & Board in used:	FWD186			
	/98	/55	/51	
Karaoke	x	x	x	
RDS				
Rotary Encoder (volume control)	x	x	x	
Jog Shuttle	x	x	x	
Voltage Selector	x	x		
Aux Input	x	x	x	
Digital Output	x	x	x	
Headphone Socket	x	x	x	
Line Output	x	x	x	
Standby - FTD Clock Display	x	x	x	
Tuner board - ECO6 System	x	x	x	

# SPECIFICATIONS

## AMPLIFIER SECTION

Output power .....	1200 W PMPO
Stereo mode .....	30 W + 30 W RMS
Frequency Response .....	150 Hz - 18 kHz / ± 3 dB
Signal-to-Noise Ratio.....	> 60dB (A-weighted)
Input Sensitivity	
AUX/TV In .....	500 mV
Output Sensitivity	
Headphone .....	1000 mV ± 2 dB
Line Out .....	450 mV – 550 mV

## TUNER SECTION

Tuning Range .....	FM 87.5 – 108 MHz ( 50 kHz steps)
.....	MW 531 – 1602 kHz (9 kHz steps)
.....	MW 530 – 1710 kHz (10 kHz steps)
26 dB Quieting Sensitivity .....	FM 20 dB
26 dB Quieting Sensitivity .....	MW 3162 mV/m
Image Rejection Radio .....	FM 25dB
.....	MW 28 dB
IF Rejection Ratio .....	FM 60 dB
.....	MW 24 dB
Signal-to-Noise Ratio.....	FM ≥ 55 dB
.....	MW ≥ 35 dB
MW Suppression Ratio.....	FM 30 dB
Harmonic Distortion .....	FM Mono 3 %
.....	FM Stereo 3 %
.....	MW 5 %
Frequency Response .....	
.....	FM180 Hz – 10 kHz / ±6 dB
Stereo Separation .....	FM 26 dB (1 kHz)
Stereo Threshold .....	FM 23.5 dB

## TAPE SECTION

Frequency Response	
Normal tape (type 1) .....	80 – 12500 Hz (8 dB)
Signal-to-Noise Ratio	
Normal tape (type 1) .....	≥ 45 dBA
Wow and flutter .....	≤ 0.3% DIN

## DVD SECTION

Laser Type .....	Semiconductor
Disc Diameter .....	12cm / 8cm
Video Decoding .....	MPEG-2 / MPEG-1
Video DAC .....	10 Bits
Signal System .....	PAL / NTSC
Video Format .....	4:3 / 16:9
Video S/N .....	56 dB (minimum)
Composite Video Output .....	1.0 Vp-p, 75 Ω
S-Video Output .....	Y - 1.0 Vp-p, 75 Ω
.....	C - 0.286 Vp-p, 75 Ω
Audio DAC .....	24 Bits / 96 kHz
Frequency Response .....	4 Hz - 20 kHz (44.1kHz)
.....	4 Hz - 22 kHz (48kHz)
.....	4 Hz - 44 kHz (96kHz)

Digital Output .....	
.....	SPDIF (Sony Philips digital interface) Coaxial
PCM .....	IEC 60958
Dolby Digital/DTS .....	IEC 60958, IEC 61937

## MAIN UNIT

Power Supply Rating .....	110 - 127 / 220 - 240 V
.....	50/60HZ Switchable
Power Consumption	
Active .....	50 W
ECO Power Standby .....	<10 W
Dimensions (W x H x D) .....	265 × 310 × 335 (mm)
Weight .....	3.9 kg

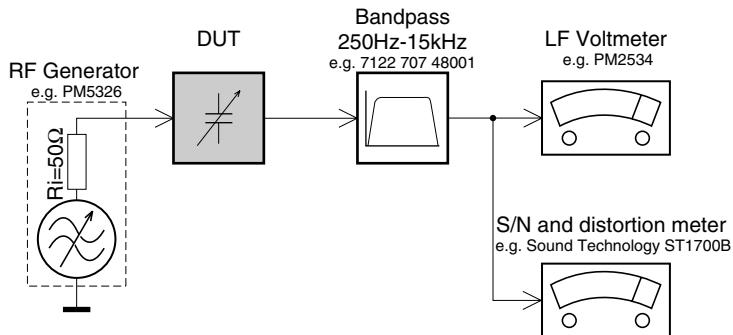

## SPEAKERS

Front speakers	
System .....	3-way, Bass reflex
Impedance .....	4 Ω
Speaker drivers .....	16.5cm woofer, ..... 5cm tweeter
Frequency response .....	50 Hz – 20 kHz
Dimensions (W x H x D) .....	..... 190 × 310 × 207 (mm)
Weight .....	4.8 kg/each

**Specifications and external appearance are subject to change without notice.**

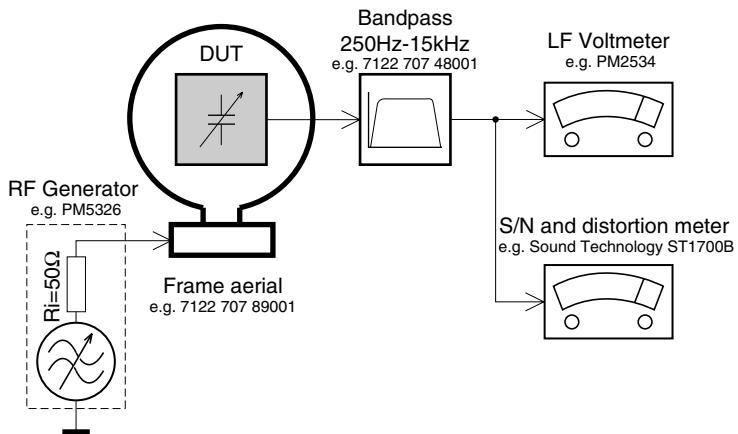

## MEASUREMENT SETUP

### Tuner FM

Use a bandpass filter to eliminate hum (50Hz, 100Hz) and disturbance from the pilottone (19kHz, 38kHz).

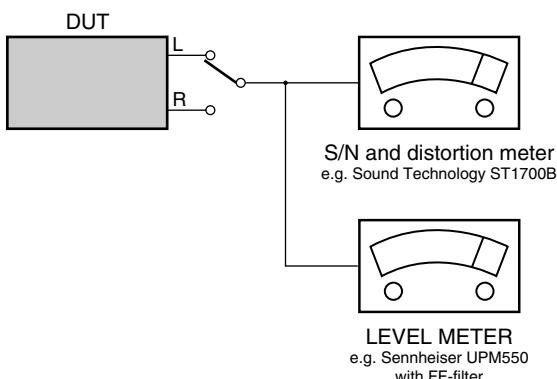

### Tuner AM (MW,LW)

To avoid atmospheric interference all AM-measurements have to be carried out in a Faraday's cage.  
Use a bandpass filter (or at least a high pass filter with 250Hz) to eliminate hum (50Hz, 100Hz).

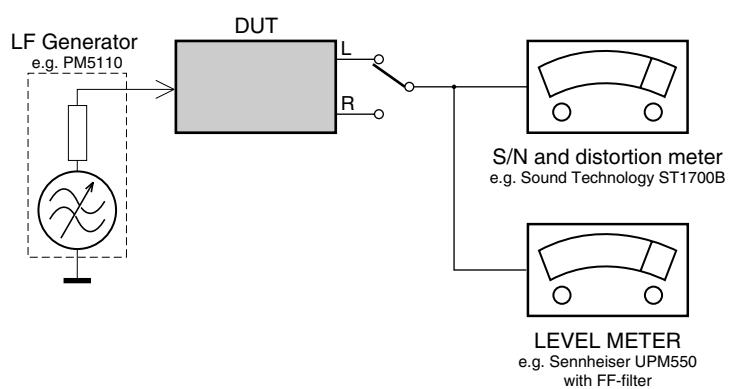

### CD

Use Audio Signal Disc SBC429 4822 397 30184  
(replaces test disc 3)

### Recorder

Use Universal Test Cassette CrO2 SBC419 4822 397 30069  
or Universal Test Cassette Fe SBC420 4822 397 30071

## SERVICE AIDS

### Service Tools:

Universal Torx driver holder .....	4822 395 91019
Torx bit T10 150mm .....	4822 395 50456
Torx driver set T6-T20 .....	4822 395 50145
Torx driver T10 extended .....	4822 395 50423

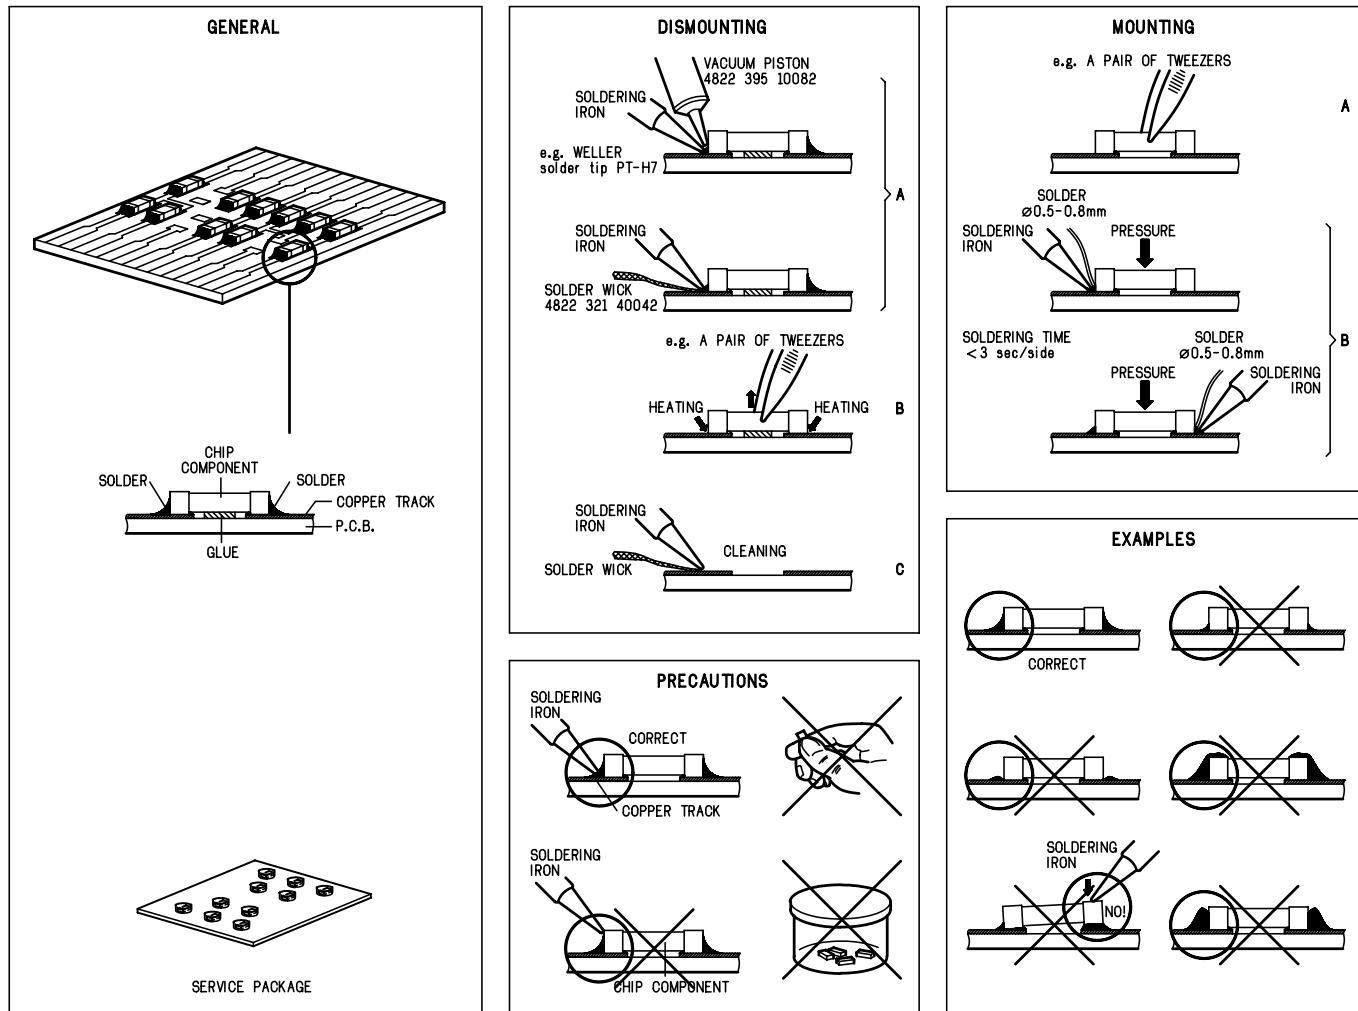

### Compact Disc:

SBC426/426A Test disc 5 + 5A .....	4822 397 30096
SBC442 Audio Burn-in test disc 1kHz .....	4822 397 30155
SBC429 Audio Signals disc .....	4822 397 30184
Dolby Pro-logic Test Disc .....	4822 395 10216

### ESD Equipment:

Anti-static table mat - large 1200x650x1.25mm .....	4822 466 10953
anti-static table mat - small 600x650x1.25mm .....	4822 466 10958
Anti-static wristband .....	4822 395 10223
Connectorbox (1MΩ) .....	4822 395 11307
Extension cable (to connect wristband to conn.box) .....	4822 320 11305
Connecting cable (to connect table mat to conn.box) .....	4822 320 11306
Earth cable (to Connect product to mat or box) .....	4822 320 11308
Complete kit ESD3 (combining all above products) .....	4822 320 10671
Wristband tester .....	4822 344 13999

## HANDLING CHIP COMPONENTS

**GB** WARNING

All ICs and many other semi-conductors are susceptible to electrostatic discharges (ESD). Careless handling during repair can reduce life drastically.

When repairing, make sure that you are connected with the same potential as the mass of the set via a wrist wrap with resistance. Keep components and tools also at this potential.

**ESD****NL** WAARSCHUWING

Alle IC's en vele andere halfgeleiders zijn gevoelig voor electrostatische ontladingen (ESD). Onzorgvuldig behandelen tijdens reparatie kan de levensduur drastisch doen verminderen. Zorg ervoor dat u tijdens reparatie via een polsband met weerstand verbonden bent met hetzelfde potentiaal als de massa van het apparaat. Houd componenten en hulpmiddelen ook op ditzelfde potentiaal.

**F** ATTENTION

Tous les IC et beaucoup d'autres semi-conducteurs sont sensibles aux décharges statiques (ESD). Leur longévité pourrait être considérablement écourtée par le fait qu'aucune précaution n'est prise à leur manipulation. Lors de réparations, s'assurer de bien être relié au même potentiel que la masse de l'appareil et enfiler le bracelet serti d'une résistance de sécurité. Veiller à ce que les composants ainsi que les outils que l'on utilise soient également à ce potentiel.

**D** WARNUNG

Alle ICs und viele andere Halbleiter sind empfindlich gegenüber elektrostatischen Entladungen (ESD). Unsorgfältige Behandlung im Reparaturfall kann die Lebensdauer drastisch reduzieren. Veranlassen Sie, dass Sie im Reparaturfall über ein Pulsarmband mit Widerstand verbunden sind mit dem gleichen Potential wie die Masse des Gerätes. Bauteile und Hilfsmittel auch auf dieses gleiche Potential halten.

**I** AVVERTIMENTO

Tutti IC e parecchi semi-conduttori sono sensibili alle scariche statiche (ESD). La loro longevità potrebbe essere fortemente ridotta in caso di non osservazione della più grande cautela alla loro manipolazione. Durante le riparazioni occorre quindi essere collegato allo stesso potenziale che quello della massa dell'apparecchio tramite un braccialetto a resistenza. Assicurarsi che i componenti e anche gli utensili con quali si lavora siano anche a questo potenziale.

**GB**

Safety regulations require that the set be restored to its original condition and that parts which are identical with those specified, be used.

"Pour votre sécurité, ces documents doivent être utilisés par des spécialistes agréés, seuls habilités à réparer votre appareil en panne".

**NL**

Veiligheidsbepalingen vereisen, dat het apparaat bij reparatie in zijn oorspronkelijke toestand wordt teruggebracht en dat onderdelen, identiek aan de gespecificeerde, worden toegepast.

**F**

Les normes de sécurité exigent que l'appareil soit remis à l'état d'origine et que soient utilisées les pièces de rechange identiques à celles spécifiées.

**D**

Bei jeder Reparatur sind die geltenden Sicherheitsvorschriften zu beachten. Der Original zustand des Geräts darf nicht verändert werden; für Reparaturen sind Original-Ersatzteile zu verwenden.

**I**

Le norme di sicurezza esigono che l'apparecchio venga rimesso nelle condizioni originali e che siano utilizzati i pezzi di ricambio identici a quelli specificati.

"After servicing and before returning set to customer perform a leakage current measurement test from all exposed metal parts to earth ground to assure no shock hazard exist. The leakage current must not exceed 0.5mA."

**GB** Warning !

Invisible laser radiation when open.  
Avoid direct exposure to beam.

**S** Varning !

Osynlig laserstrålning när apparaten är öppnad och spärren är urkopplad. Betrakta ej strålen.

**SF** Varoitus !

Avatussa laitteessa ja suojalukiukseen ohittaa olet alttiina näkymättömälle laserisäteilylle. Älä katso säteeseen!

**DK** Advarse !

Usynlig laserstrålning ved åbning når sikkerhedsafbrydere er ude af funktion. Undgå udsættelse for stråling.

## INFORMATION ABOUT LEAD-FREE SOLDERING

Philips CE is producing lead-free sets from 1.1.2005 onwards.

### IDENTIFICATION:

Regardless of special logo (not always indicated) one must treat all sets from **1 Jan 2005** onwards, according next rules:

### Example S/N:

Bottom line of typeplate gives a 14-digit S/N. Digit 5&6 is the year, digit 7&8 is the week number, so in this case 2005 wk12

So from **0501** onwards = from 1 Jan 2005 onwards

***Important note: In fact also products of year 2004 must be treated in this way as long as you avoid mixing solder-alloys (leaded/ lead-free). So best to always use SAC305 and the higher temperatures belong to this.***

Due to lead-free technology some rules have to be respected by the workshop during a repair:

- Use only lead-free solder alloy Philips SAC305 with order code 0622 149 00106. If lead-free solder-paste is required, please contact the manufacturer of your solder-equipment. In general use of solder-paste within workshops should be avoided because paste is not easy to store and to handle.
- Use only adequate solder tools applicable for lead-free solder alloy. The solder tool must be able
  - To reach at least a solder-temperature of 400°C,
  - To stabilize the adjusted temperature at the solder-tip
  - To exchange solder-tips for different applications.
- Adjust your solder tool so that a temperature around 360°C – 380°C is reached and stabilized at the solder joint. Heating-time of the solder-joint should not exceed ~ 4 sec. Avoid temperatures above 400°C otherwise wear-out of tips will rise drastically and flux-fluid will be destroyed. To avoid wear-out of tips switch off un-used equipment, or reduce heat.
- Mix of lead-free solder alloy / parts with leaded solder alloy / parts is possible but PHILIPS recommends strongly to avoid mixed solder alloy types (leaded and lead-free).  
If one cannot avoid or does not know whether product is lead-free, clean carefully the solder-joint from old solder alloy and re-solder with new solder alloy (SAC305).
- Use only original spare-parts listed in the Service-Manuals. Not listed standard-material (commodities) has to be purchased at external companies.
- Special information for BGA-ICs:
  - always use the 12nc-recognizable soldering temperature profile of the specific BGA (for de-soldering always use the lead-free temperature profile, in case of doubt)
  - lead free BGA-ICs will be delivered in so-called 'dry-packaging' (sealed pack including a silica gel pack) to protect the IC against moisture. After opening, dependent of MSL-level seen on indicator-label in the bag, the BGA-IC possibly still has to be baked dry. (MSL=Moisture Sensitivity Level). This will be communicated via AYS-website.
 Do not re-use BGAs at all.
- For sets produced before 1.1.2005 (except products of 2004), containing leaded solder-alloy and components, all needed spare-parts will be available till the end of the service-period. For repair of such sets nothing changes.
- On our website [www.atyourservice.ce.Philips.com](http://www.atyourservice.ce.Philips.com) you find more information to:
  - \* BGA-de-/soldering (+ baking instructions)
  - \* Heating-profiles of BGAs and other ICs used in Philips-sets

You will find this and more technical information within the "magazine", chapter "workshop news".

For additional questions please contact your local repair-helpdesk.

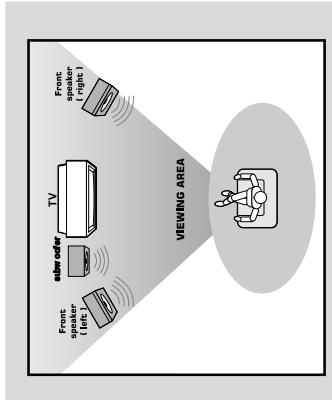

## SERVICE INSTRUCTION

Safety regulations require that after a repair, the set must be returned in its original condition. Pay in particular attention to the following points:

- Route the wire trees correctly and fix them with the mounted cable clamps.
- Check the insulation of the AC Power lead for external damage.
- Check the strain relief of the AC Power cord for proper function.
- Check the electrical DC resistance between the AC Power Plug and the secondary side (only for sets which have a AC Power isolated power supply):
- Unplug the AC Power cord and connect a wire between the two pins of the AC Power plug.
- Set the AC Power switch to the "on" position (keep the AC Power cord unplugged!).
- Measure the resistance value between the pins of the AC Power plug and the metal shielding of the tuner or the aerial connection on the set. The reading should be larger than 4.5 Mohm (For U.S. it should be between 4.2 Mohm and 12 Mohm).
- Switch "off" the set, and remove the wire between the two pins of the AC Power plug.
- Check the cabinet for defects, to avoid touching of any inner parts by the customer.

## Connections

### Step 1: Placing speakers and subwoofer

Place the front left and right speakers at equal distances from the TV set and at an angle of approximately 45 degrees from the listening position.

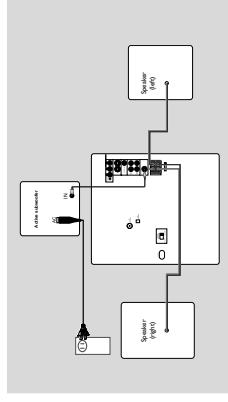

Notes:

- To avoid magnetic interference, do not position the front speakers too close to your TV set.
- Allow adequate ventilation around the DVD Mini Hi-Fi System.

Notes:

- To obtain optimal sound performance, use the supplied speakers.
- Do not connect more than one speaker to any one pair of + - speaker terminals.
- Subwoofer must be active subwoofer.
- Do not connect speakers with an impedance lower than the speakers supplied. Please refer to the SPECIFICATIONS section of this manual.

### Step 2: Connecting speakers and subwoofer

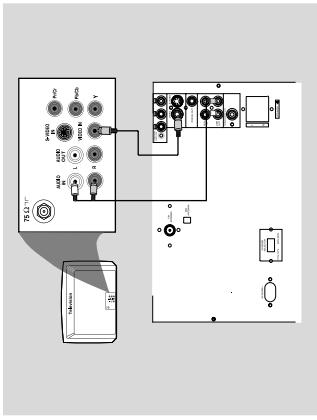

Connect the speaker wires to the SPEAKERS (FRONT) terminals, right speaker to "R" and left speaker to "L", coloured (marked) wire to "+" and black (unmarked) wire to "-". Fully insert the stripped portion of the speaker wire into the terminal as shown.

Connect the subwoofer using subwoofer cable to the SUBWOOFER OUT jack on the DVD Mini Hi-Fi System to active input jack.

Notes:

- For optimal sound performance, use the supplied speakers.
- Do not connect more than one speaker to any one pair of + - speaker terminals.
- Subwoofer must be active subwoofer.
- Do not connect speakers with an impedance lower than the speakers supplied. Please refer to the SPECIFICATIONS section of this manual.

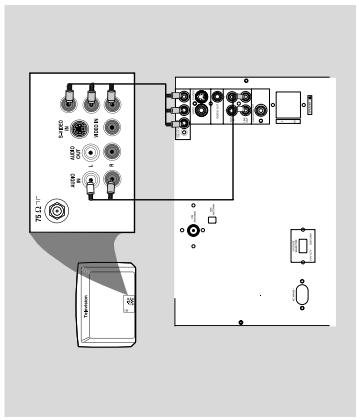

### Step 3: Connecting TV set

Place the front left and right speakers at equal distances from the TV set and at an angle of approximately 45 degrees from the listening position.

Notes:

- To obtain optimal sound performance, use the supplied speakers.
- Do not connect more than one speaker to any one pair of + - speaker terminals.
- Subwoofer must be active subwoofer.
- Do not connect speakers with an impedance lower than the speakers supplied. Please refer to the SPECIFICATIONS section of this manual.

#### Using component Video In jack (Pr Pb Y)

Use the component video cables (red/blue/green) to connect the system's **Pr Pb Y** jacks to the corresponding Component video input jacks (or labeled as  $P_r P_b Y$  or  $YUV$ ) on the TV set.

To listen this system channels through TV, use the audio cables (white/red) to connect **LINe OUT (L/R)** jacks to the corresponding **AUDIO IN** jacks on the TV set.

#### Using Video In jack (CVBS)

Use the composite video cable (yellow) to connect the system's **VIDEO** jack to the video input jack (or labeled as  $A/V$ ,  $V$ ,  $Video$ ,  $l/n$ , Composite or Baseband) on the TV set.

#### Using LINE OUT jack (L/R)

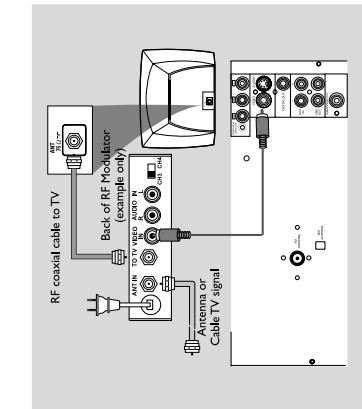

To listen this system channels through TV, use the audio cables (white/red) to connect **LINe OUT (L/R)** jacks to the corresponding **AUDIO IN** jacks on the TV set.

**IMPORTANT!**  
The type plate is located on the rear of the system.  
To avoid overheating of the system, a safety circuit has been built in. Therefore, your system may switch to Standby mode automatically under extreme conditions. If this happens, let the system cool down before reusing it.

Speakers	$\ominus$	$\oplus$
Front Left (L)	Black	White
Front Right (R)	Black	Red

## Connections

## Connections

### Using S-Video IN jack

Use the S-Video cable (not supplied) to connect the system's **S-VIDEO** jack to the S-Video input jack on the TV set.

To listen to system channels through TV, use the audio cables (white/red) to connect **LINE OUT (L/R)** jacks to the corresponding **AUDIO IN** jacks on the TV set.

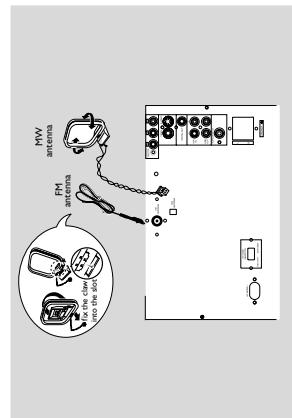

### Using an accessory RF modulator

Use the composite cable (yellow) to connect the system's **VIDEO** jack to the video input jack on the RF modulator.

Use the RF coaxial cable (not supplied) to connect the RF modulator to your TV's RF jack.

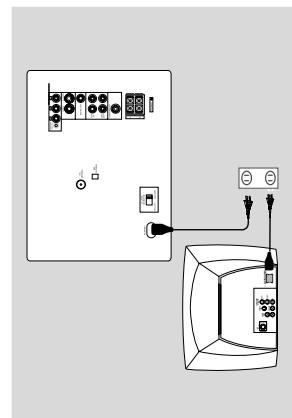

### IMPORTANT!

- If your TV set only has a single Antenna In jack (or labeled as 75 ohm or RF In), you will need a RF modulator in order to view the DVD playback via TV. See your electronics retailer or contact Philips for details on RF modulator availability and operations.

### Step 4: Connecting FM/MW antennas

### Step 5: Connecting the power cord

**After everything is connected properly, plug in the AC power cord to the power outlet.**

Never make or change any connection with the Power switched on.

### On the DVD Mini Hi-Fi System

"AUTO INSTALL - PRESS PL/PLAY" may appear on the display panel. Press **▶** on the front panel to search and store all available radio stations or press **■** to exit.

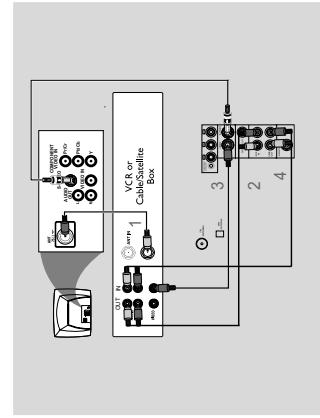

If your system is equipped with a Voltage Selection, set the VOLTAGE SELECTOR to the local power line voltage.

### Notes:

- Adjust the position of the antennas for optimal reception.
- Position the antennas as far as possible from your TV set, VCR or other radiation sources to prevent unwanted interference.

## Connections

### Step 6: Connecting a VCR or cable/satellite box

### Viewing and listening to playback

- 1 Connect the VCR or Cable/Satellite Box to the TV system as shown.
- 2 Connect the system's **AUX IN** jacks to the AUDIO OUT jacks on the VCR or Cable/Satellite box.

Before starting operation, press **AUX** on the remote control to select "AUX" in order to activate the input source.

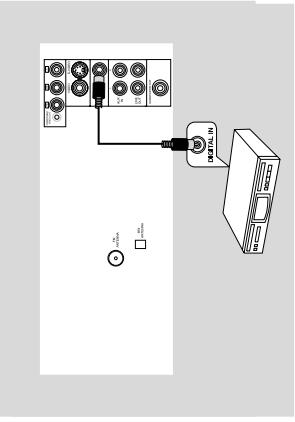

### Using the VCR for recording DVDs

- Some DVDs are copy-protected. You cannot record or dub protected discs using a VCR.
- 1 Connect the system's **VIDEO** jack to the VIDEO IN jack on the VCR.
  - 2 Connect the system's **LINe OUT (RL)** jacks to the AUDIO IN jacks on the VCR. This will allow you to make analog stereo (two channel, right and left) recording.

### To view DVD playback while recording

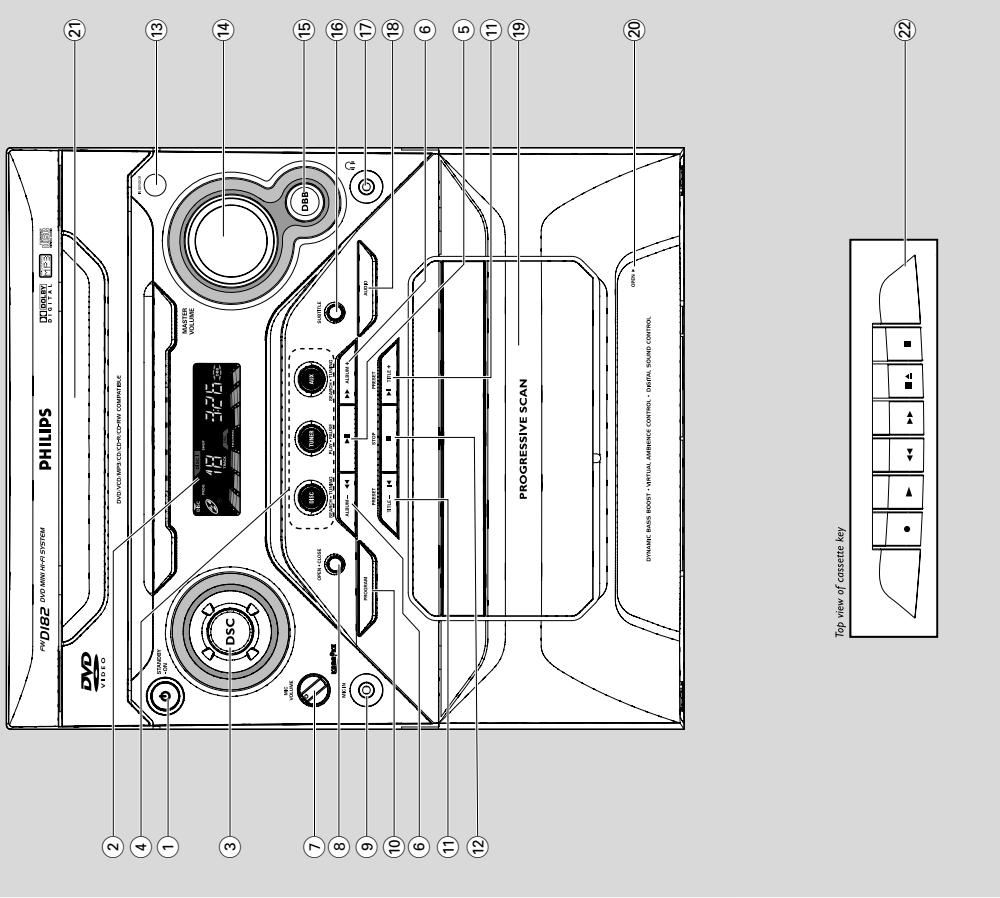

You must connect the system to your TV system using the S-VIDEO (as shown above) or the Component (Pr Pb Y) video connection.

### Step 7: Connecting digital audio equipment

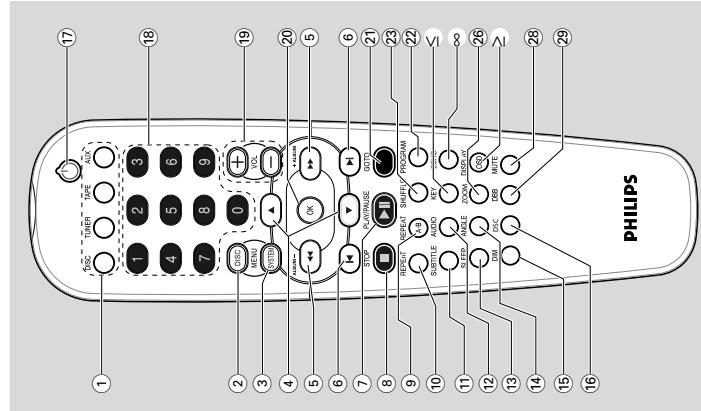

### Recording(digital)

Connect the system's DIGITAL OUT jack to the DIGITAL IN jack on a digital recording device. Before operation, set the DIGITAL OUTPUT according to the audio connection.

## Functional Overview

### Remote control

- in Disc mode, press to fast reverse/forward the disc.
- (6) **◀▶**  
- in Disc mode, press to skip to the previous/next chapter/track.  
- in Tuner mode, to select a preset radio station number
- PLAY/PAUSE ▶II**  
(7)  
- to start or interrupt disc playback.  
- to resume playback from last stop point.
- STOP ■**  
(8)  
- to stop playing the disc.
- REPEAT A-B**  
(9)  
- to repeat a specific section on a disc.
- REPEAT**  
(10)  
- to select variations of continuous playback.
- SUBTITLE**  
(11)  
- to select desired subtitle.
- AUDIO**  
(12)  
- to select the audio channel.
- SLEEP**  
(13)  
- to set the sleep timer function.
- ANGLE**  
(14)  
- to select the angles cyclically.
- DIM**  
(15)  
- to select different brightness for VFD.
- DSC**  
(16)  
- to select various sound effect.
- POWER Ⓜ**  
(17)  
- to switch to standby mode.
- Numeric Keypad (0-9)**  
(18)  
- to enter a track/title number of the disc.  
- to enter a number of preset radio stations.
- VOL +/-**  
(19)  
- adjust the volume level.
- OK**  
(20)  
- to exit or confirm the selection.
- GOTO**  
(21)  
- to go direct to desired title, chapter or time.
- PROGRAM**  
(22)  
- in disc mode, to program favorite tracks.  
- in tuner mode, to program favorite stations.
- SHUFFLE**  
(23)  
- to playback in random mode.

## Functional Overview

### KEY

- to change the tone level to suit your vocal range.

### ECHO

- to adjust the echo level in karaoke mode.  
**ZOOM**  
(26)

- to access the Zoom function.  
**DISPLAY (OSD)**  
(27)

- to view the time, title or chapter information.

### MUTE

- to interrupt or resume sound reproduction.  
**DBB**  
(28)

- to settings to enhance the bass response.  
**STANDBY ON**  
(1)

- to switch the system on or Standby mode.  
**DISPLAY SCREEN**  
(2)

- to view the current status of the system.  
**DSC**  
(3)

- to select various sound effect:

### SOURCE

### DISC

- to select disc tray.

### TUNER

- to select wavebands FM/MW.

### AUX

- to select a connected external source:

### AUX

- to select wavebands FM/MW.

### DISC

- to select a connected external source:

### AUX

- to select wavebands FM/MW.

### DISC

- to select wavebands FM/MW.

### PLAY/PAUSE

- to start or interrupt playback.

### OPEN/CLOSE

- for DISC ..... press to search backward/forward.  
for TUNER ----- to tune to a lower or higher radio frequency.

### MIC VOL.

- to adjust the mixing level for karaoke or microphone recording.

### OPEN CLOSE

- to open or close the disc tray.  
**MIC IN**  
(9)

- to connect microphone jack.  
**PROGRAM**  
(10)

- for DISC ..... to program favorite tracks.

### SYSTEM MENU (disc mode only)

- to enter or exit the disc contents menu.  
- to select movement direction in disc contents menu/system menu bar.

### SHUFFLE

- to tuner mode, to tune to lower or higher radio frequency (◀▶ / ▲▼)

## Preparations

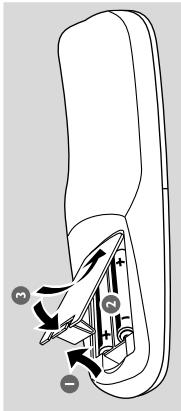

## Preparations

### Step 2: Setting the TV set

#### IMPORTANT!

- Make sure you have completed all the necessary connections.

1 Press **DISC** on the front panel (or press **DISC** on the remote control).

2 Turn on the TV set and set to the correct Video-In channel. You should see the blue Philips DVD background screen on the TV set.

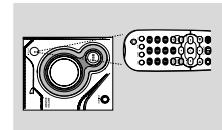

You may go to channel 1 on your TV set, then press the channel down button repeatedly until you see the Video In channel.

Or, you can use the TV remote control to select different video modes.

Or, set TV to channel 3 or 4 if you are using an RF modulator.

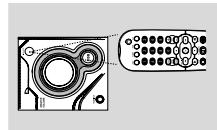

### Selecting the color system that matches your TV set

This DVD Mini Hi-Fi System is compatible with both NTSC and PAL. For the playback of a DVD disc on this DVD Mini Hi-Fi System, the color systems of the DVD, TV set and DVD Mini Hi-Fi System should match.

### Using the remote control to operate the system

- 1 Point the remote control directly at the remote sensor (IR) on the front panel.

- 2 Select the source you wish to control by pressing one of the source select buttons on the remote control (for example TAPE, TUNER).

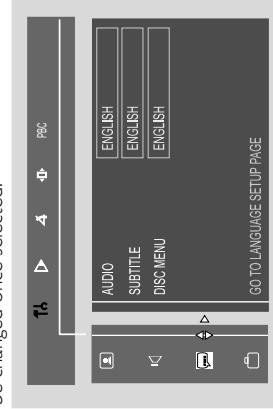

- 3 Then select the desired function (for example **►**, **II**, **◀** or **▲**).

- CAUTION!**
- Remove batteries if they are exhausted or will not be used for a long time.

- Do not use old and new or different types of batteries in combination.
- Batteries contain chemical substances, so they should be disposed of properly.

### Step 3: Setting language preference

You can select your preferred language settings so that this DVD Mini Hi-Fi System will automatically switch to the language for you whenever you load a disc. If the language selected is not available on the disc, the language set by default will be used instead. But the menu language of the DVD Mini Hi-Fi System cannot be changed once selected.

1-12

### Step 3: Setting language preference

1 In disc mode, stop playback and press **SYSTEM MENU**.

2 Select **14** icon and press **▼**.

3 Press **◀** / **▶** / **▲** / **▼** keys on the remote control to toggle through the functions and select your preferred option.

Move to **B** and press **►**.

Move to "TV System" and press **►**.

Move to "TV System" and press **►**.

Press **▲** / **▼** to select a language and press **OK**.

5 Repeat steps **3~4** for other settings.

To remove the menu

Press **SYSTEM MENU**.

### Step 3: Setting language preference

1 In disc mode, stop playback and press **SYSTEM MENU**.

2 Select **14** icon and press **▼**.

3 Press **◀** / **▶** / **▲** / **▼** keys on the remote control to select your preferred option.

Move to **C** and press **►**.

Move to one of the following and press **►**.

- Audio (disc's soundtrack)

- Subtitle (disc's subtitles)

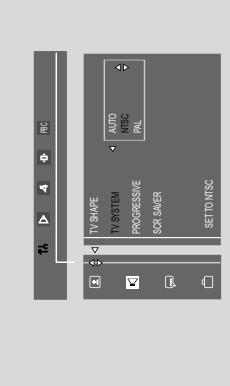

- Disc Menu (on screen menu)

4 Press **▲** / **▼** to select a language and press **OK**.

5 Repeat steps **3~4** for other settings.

To remove the menu

Press **SYSTEM MENU**.

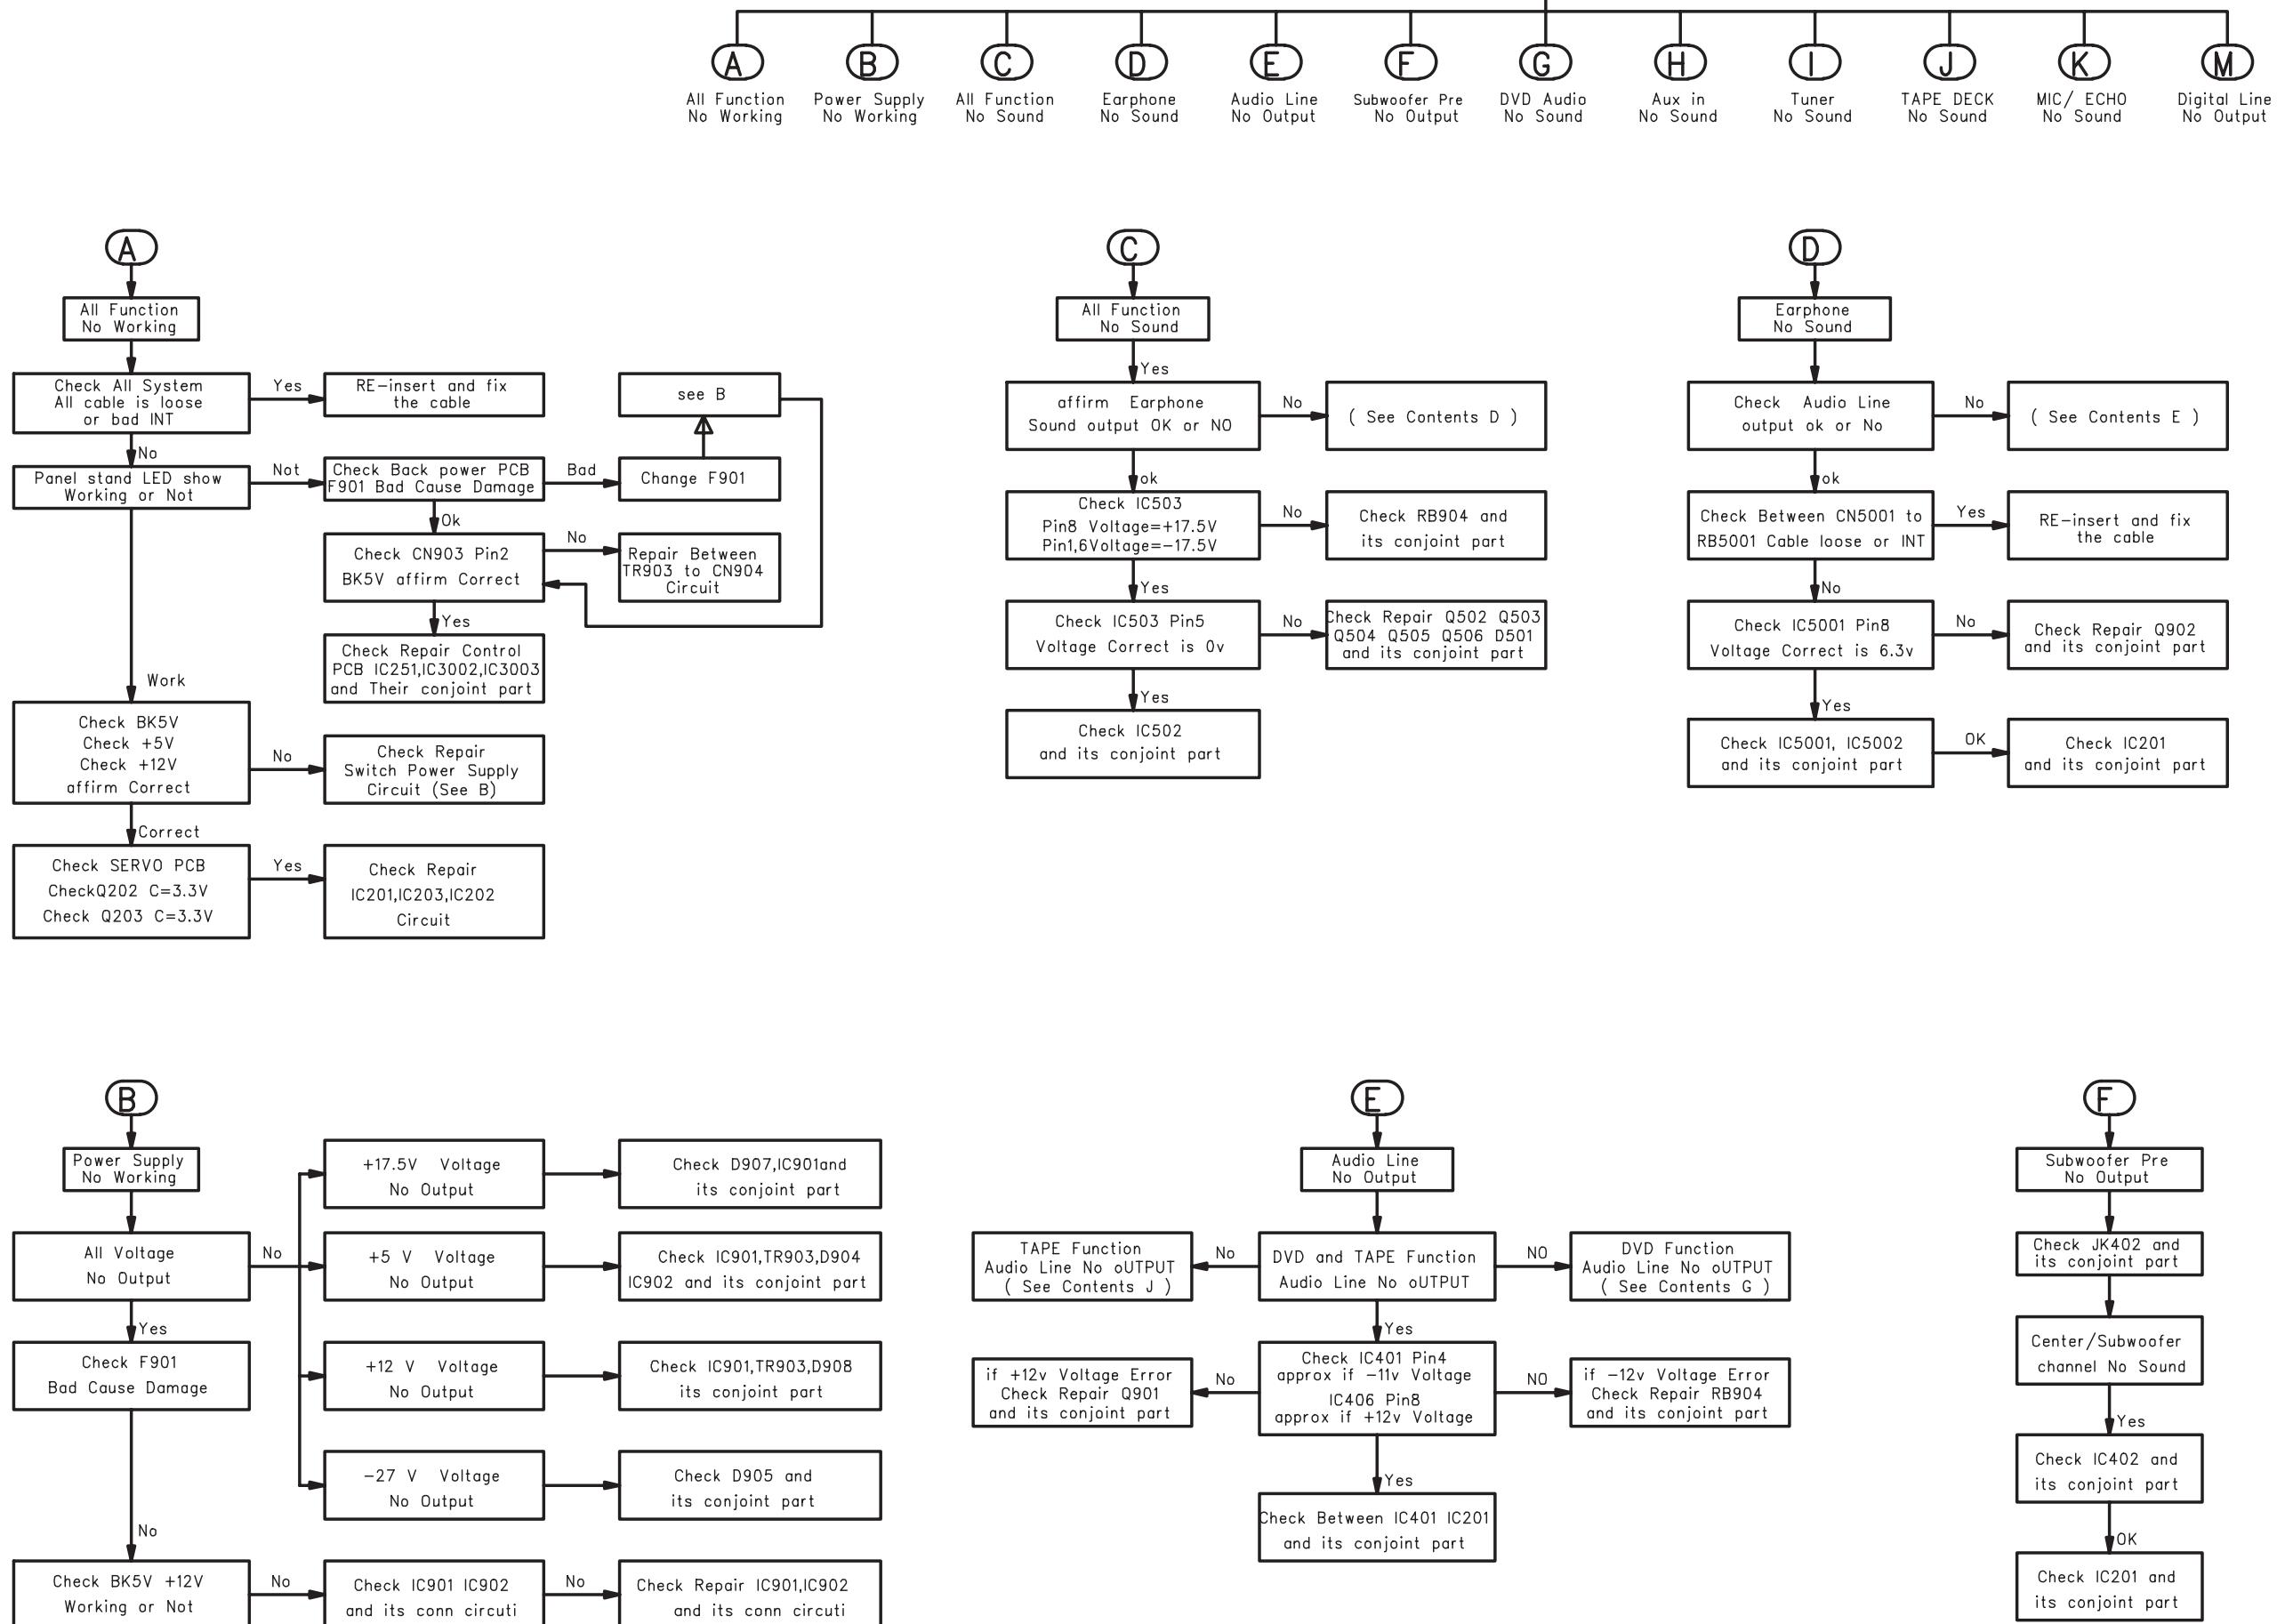

## Troubleshooting

**WARNING**  
Under no circumstances should you try to repair the system yourself, as this will invalidate the warranty. Do not open the system as there is a risk of electric shock.  
If a fault occurs, first check the points listed below before taking the system for repair. If you are unable to remedy a problem by following these hints, consult your dealer or Philips for help.

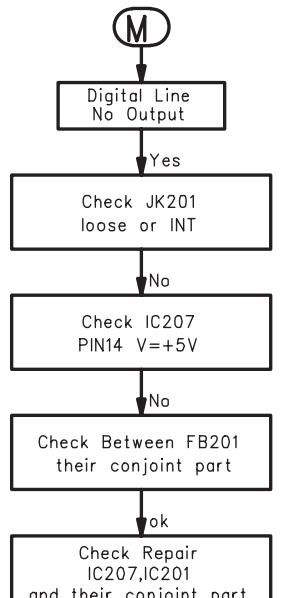

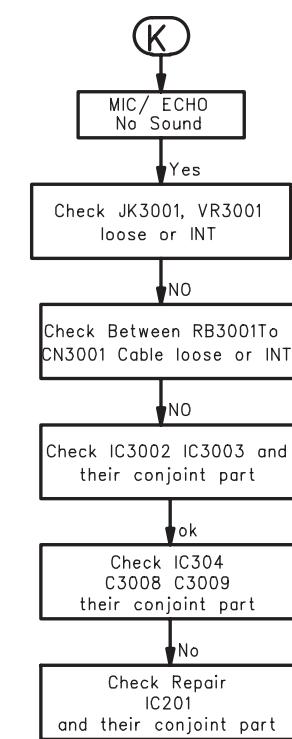

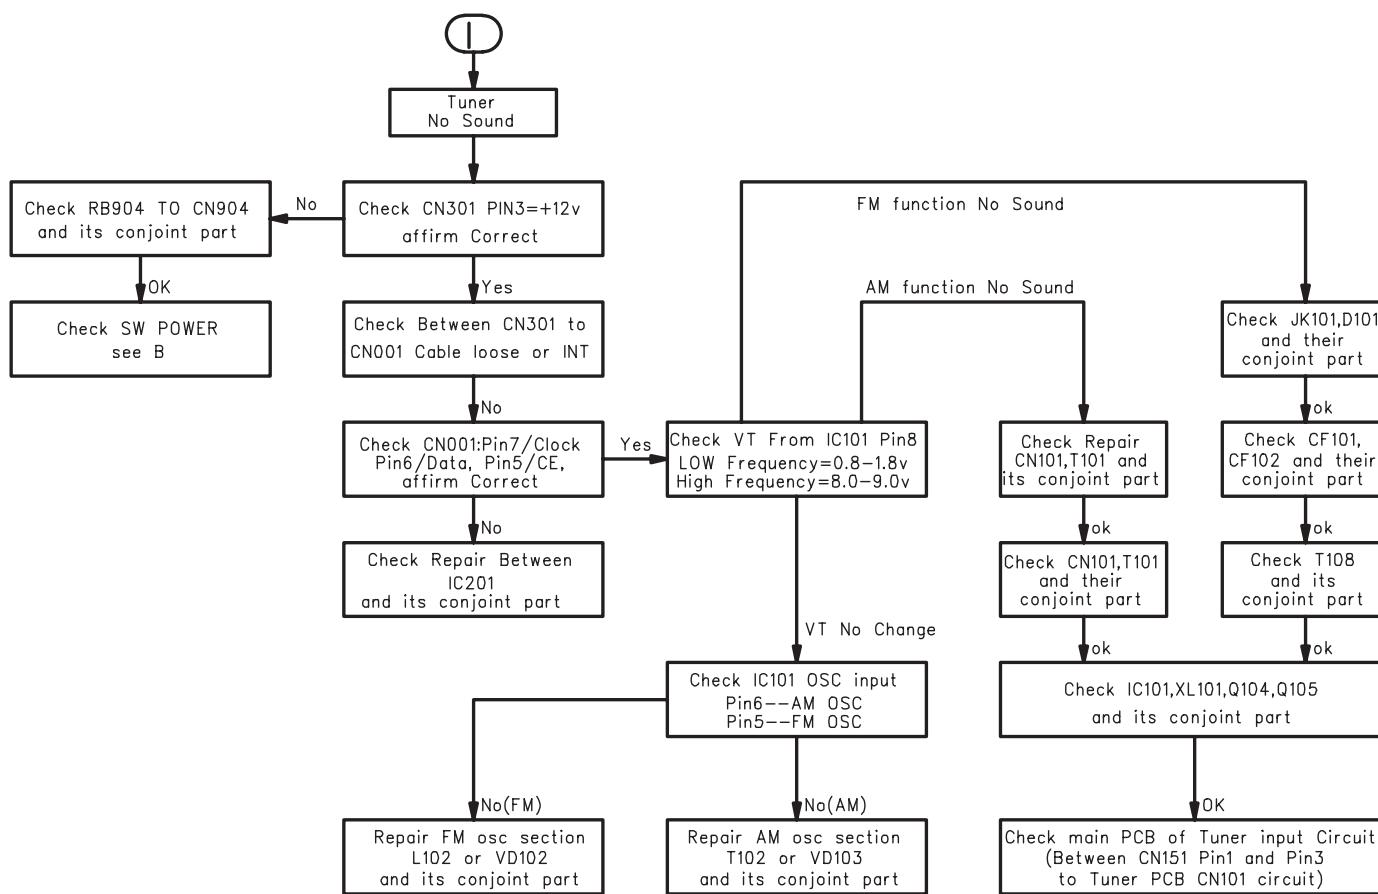

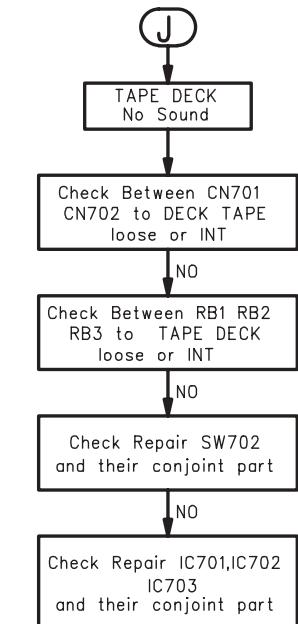

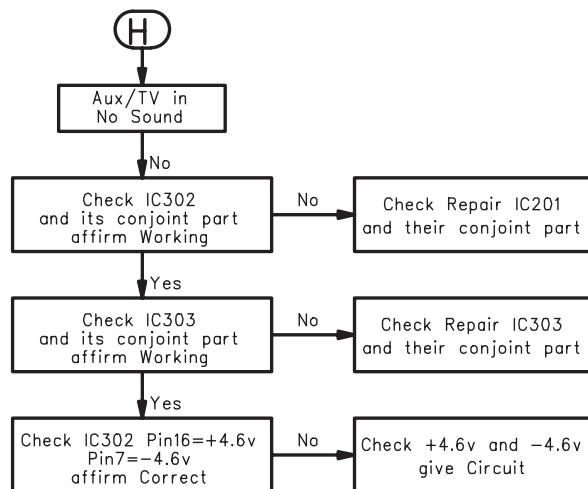

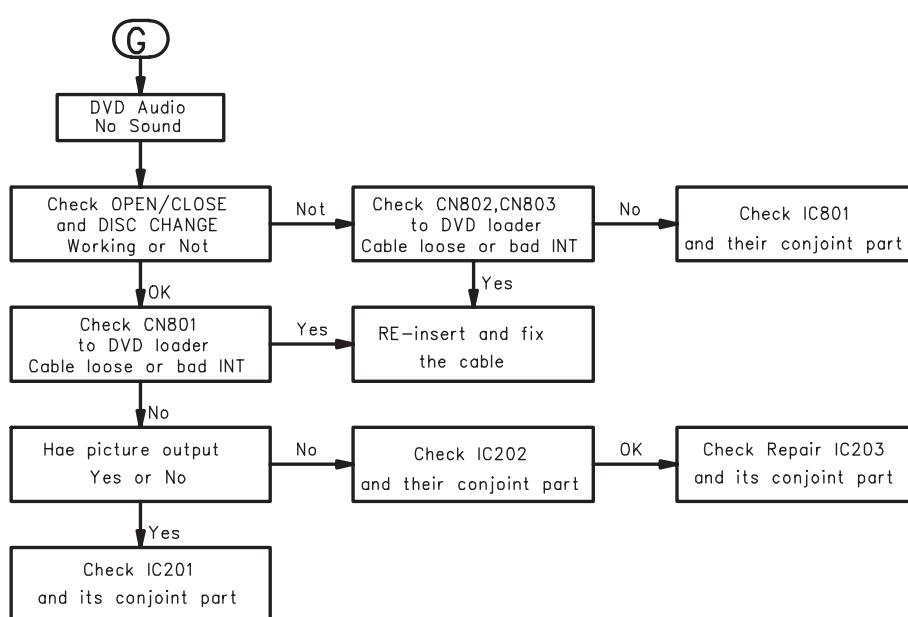

Problem	Solution
<b>The language for the sound or subtitle cannot be changed when playing a DVD.</b>	Multi-language sound or subtitle is not recorded on the DVD. Changing the language for the sound or subtitle is prohibited on the DVD.
<b>No image is output when a function is selected.</b>	Make sure the component is connected correctly Press the correct function button for the input source.
<b>Sound cannot be heard or is of poor quality</b>	Adjust the volume. Disconnect the headphones. Check that the speakers are connected correctly. Check if the stripped speaker wire is clamped. If the system is in pause, slow motion or fast forward/reverse mode, press ►   to resume the normal play mode. Make sure the MP3-CD was recorded within 32-256 kbps bit rate with sampling frequencies at 48 kHz, 44.1 kHz or 32 kHz. If the signal is too weak, adjust the antenna or connect an external antenna for better reception. Increase the distance between the Mini HiFi System and your TV set or VCR. Clean deck parts, see 'Maintenance'. Use only NORMAL tape. Apply a piece of adhesive tape over the missing tab space.
<b>No power.</b>	Check if the AC power cord is properly connected. Check if the disc is inserted upside down. Wait until the moisture condensed at the lens has cleared. Replace or clean the disc, see 'Maintenance'. Use a readable disc or correctly recorded format MP3-CD.
<b>No picture.</b>	Select the appropriate video input mode on the TV set. Check if the TV set is switched on. Check the video connection. Check if the system is securely connected. Sometimes a slight picture distortion may appear. This is not a malfunction. Clean the disc. Connect the system to the S-video input of your TV set. The aspect ratio is fixed on the DVD disc. The aspect ratio may not be changed for some TV systems. Insert a readable disc. Check the disc type, color system and region code. Clean the disc. Place the disc with the playback side down. Press SYSTEM MENU to turn off the setup menu. Cancel the parental control rating function or change the rating level. Moisture has condensed inside the system. Remove the disc and leave the system turned on for about an hour. Disconnect the power plug from the jack, and insert again.
<b>The aspect ratio of the screen cannot be changed even though you have set the TV shape.</b>	Point the remote control at the remote control sensor of the unit. Reduce the distance to the player. Remove any possible obstacles. Replace the batteries with new ones. Check that the batteries are loaded correctly. Press DIM again.
<b>The DVD player does not start playback.</b>	<b>The display is dark.</b>

# REPAIR INSTRUCTIONS (1 of 2)

MAIN UNIT REPAIR CHART

## REPAIR INSTRUCTIONS (2 of 2)

## DISMANTLING INSTRUCTIONS

### Dismantling the DVD Module

- 1) Loosen the 4 screws at top cover , 2 screws at slide Cover and 4 screws at back panel as Figure 1 & 2.
- 2) Loosen the 4 screws at DVD loader bracket as Figure 3.
- 3) Loosen the 4 screws at DVD loader as Figure 4.

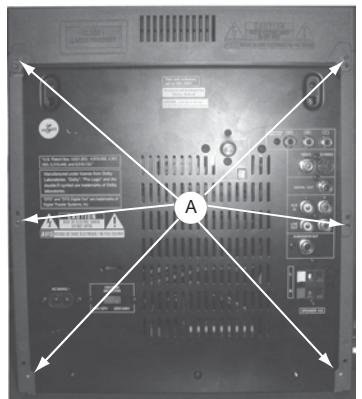

Figure 1

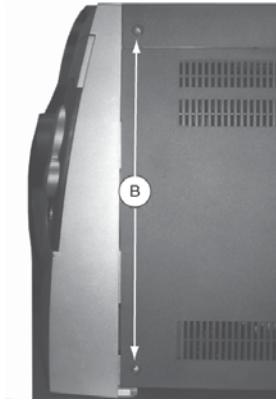

Figure 2

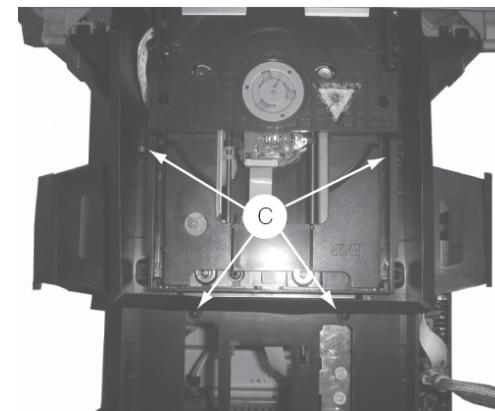

Figure 3

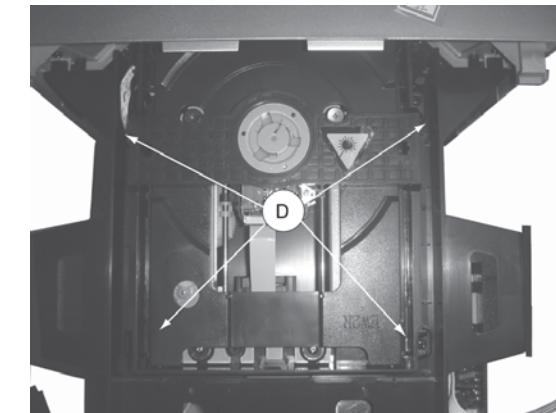

Figure 4

- 4) Push the gear slowly towards the front as shown in figure 5 until the CDC tray starts to move out of the Front Cabinet. The CDC tray is now disengaged and can be pulled out completely.

Figure 5

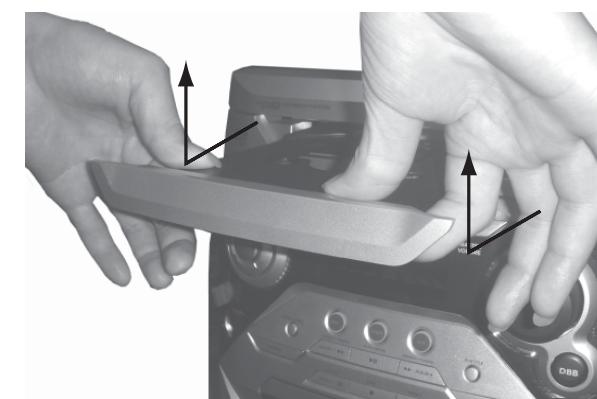

Figure 6

### Dismantling of the Cover Front Display

- 1) Remove the Volume knobs & Mic knob as stated in Dismantling the Cover Front Display in Figure 7 & 8.

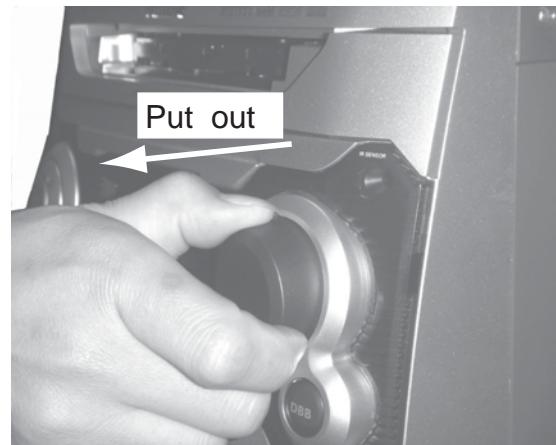

Figure 7

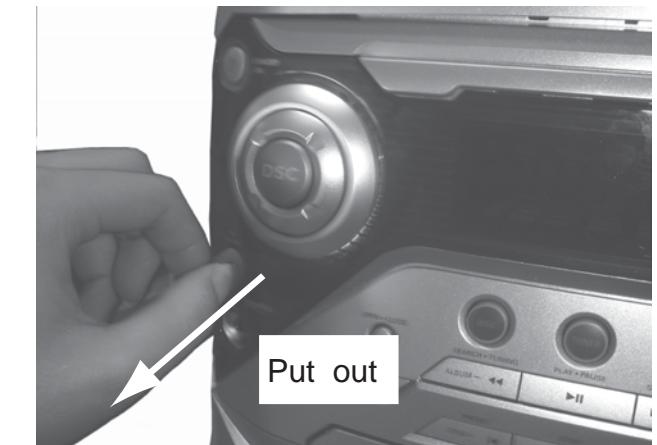

Figure 8

### Dismantling the Main board

- 1) Release 7 screws 'E' to free the Main board from the back panel Assembly as shown in Figure 9.
- 2) Loosen 1 screw 'G' at the side of the set as shown in Figure 10.
- 3) Release 2 screws 'F' on bottom of the cover as shown in Figure 11.

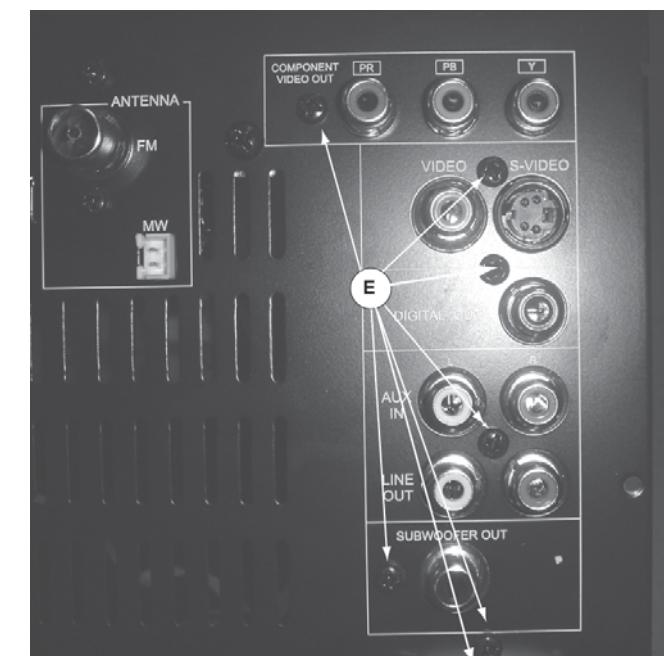

Figure 9

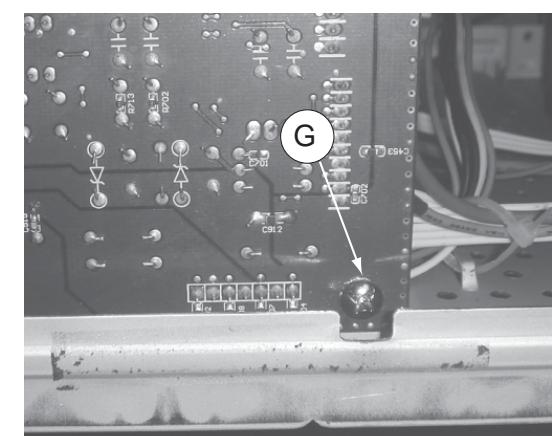

Figure 10

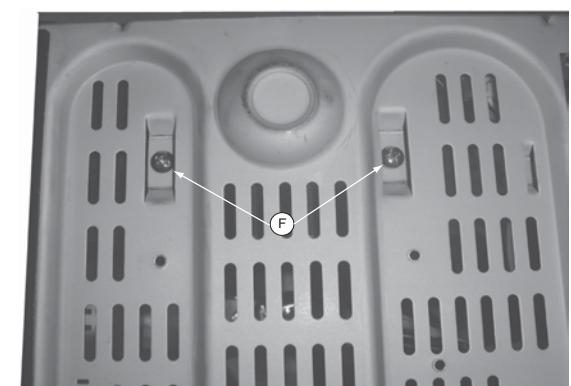

Figure 11

**Dismantling of the Key Board and Cassette module**

- 1) Loosen 13 screws 'H' to remove the KEY board figure 12.

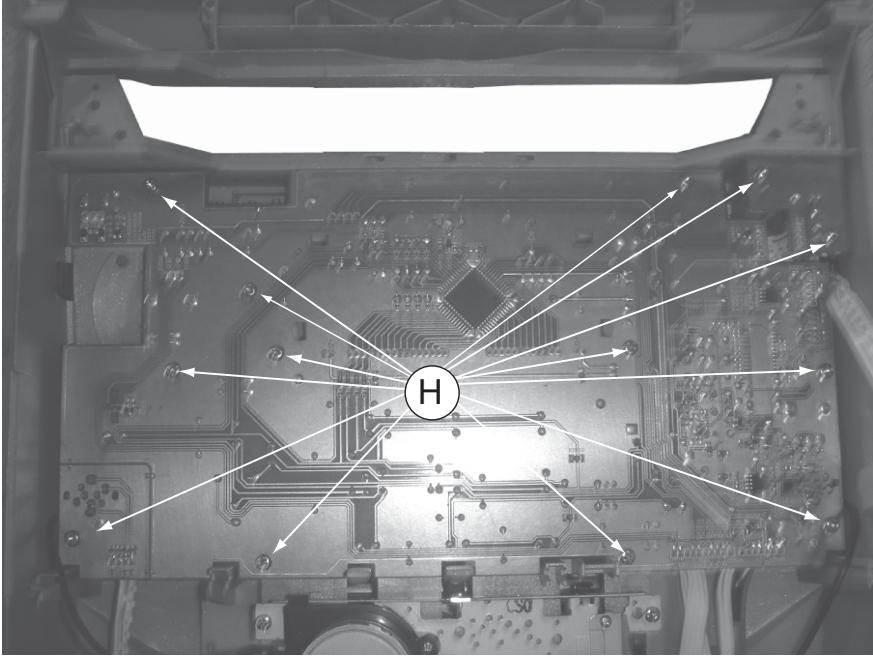

Figure 12

- 4) Loosen 4 screws 'I' to remove the Cassette Module figure 13.

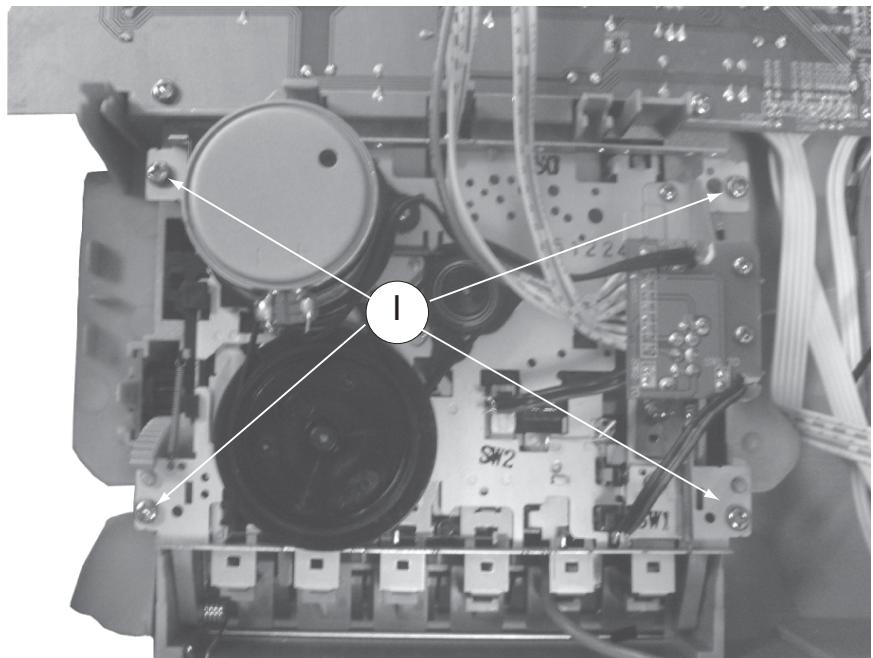

Figure 13

**Dismantling of the Power Board**

- 1) Loosen 4 screws 'J' to remove the Power Board figure 14.

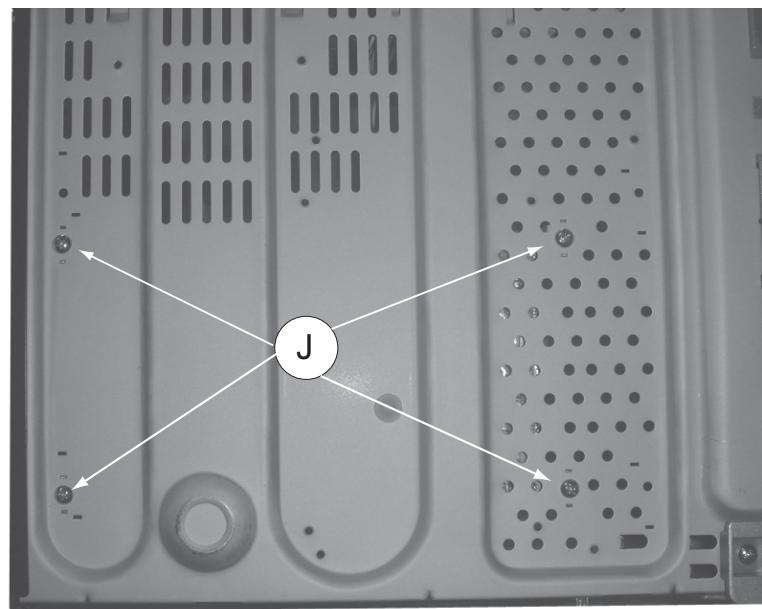

Figure 14

- 2) Remove the catch 'K' using cutter as shown in figure 15.

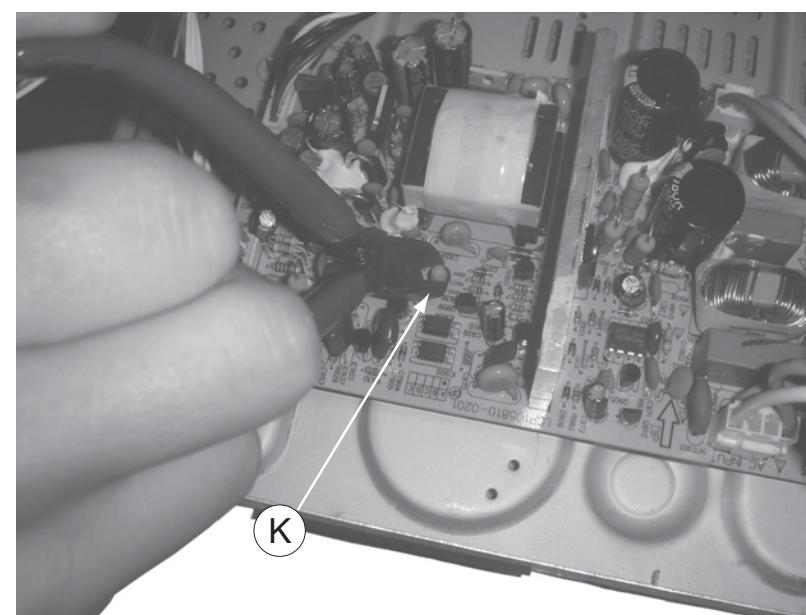

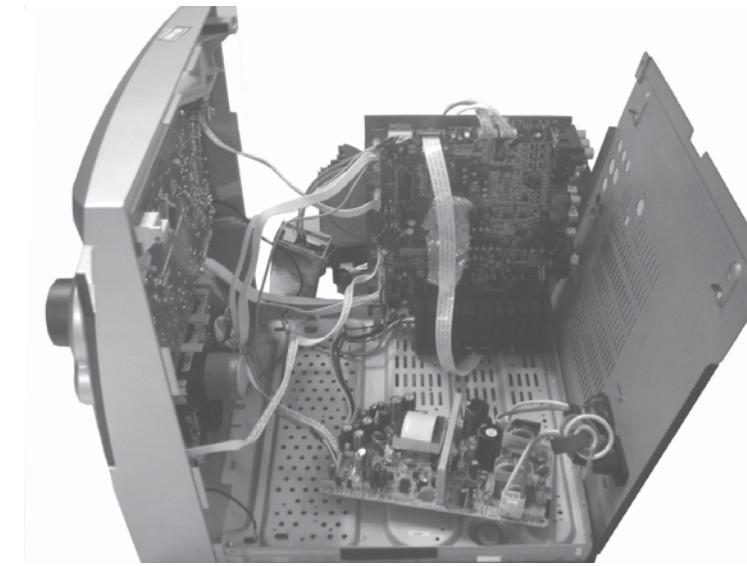

Figure 15

## Service positions

Service position A

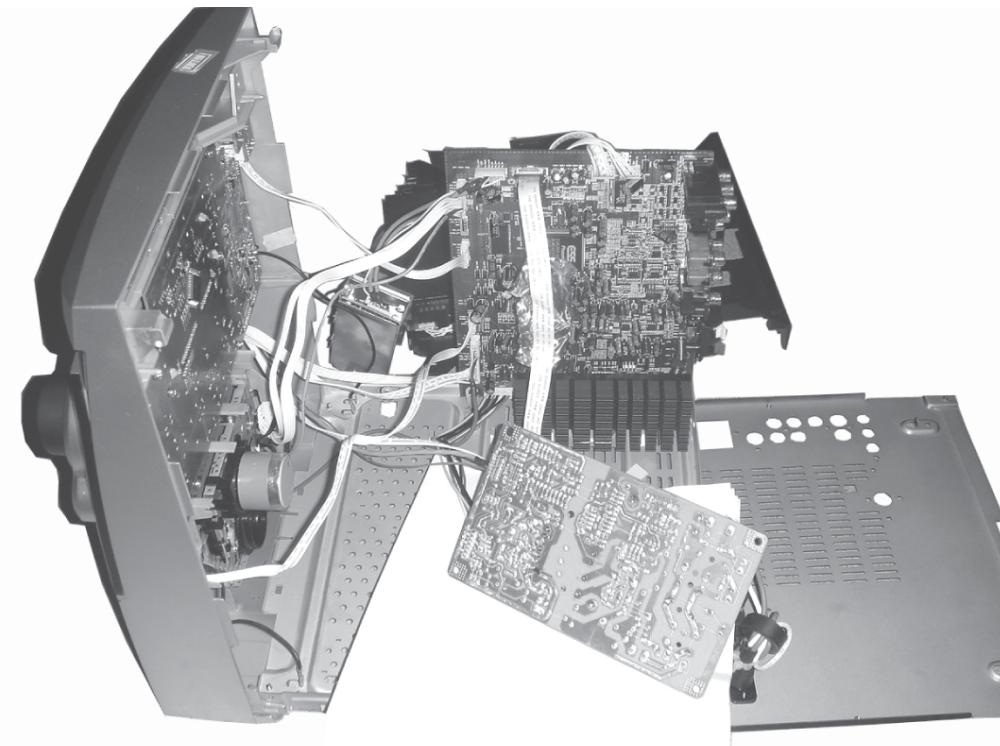

Service position B

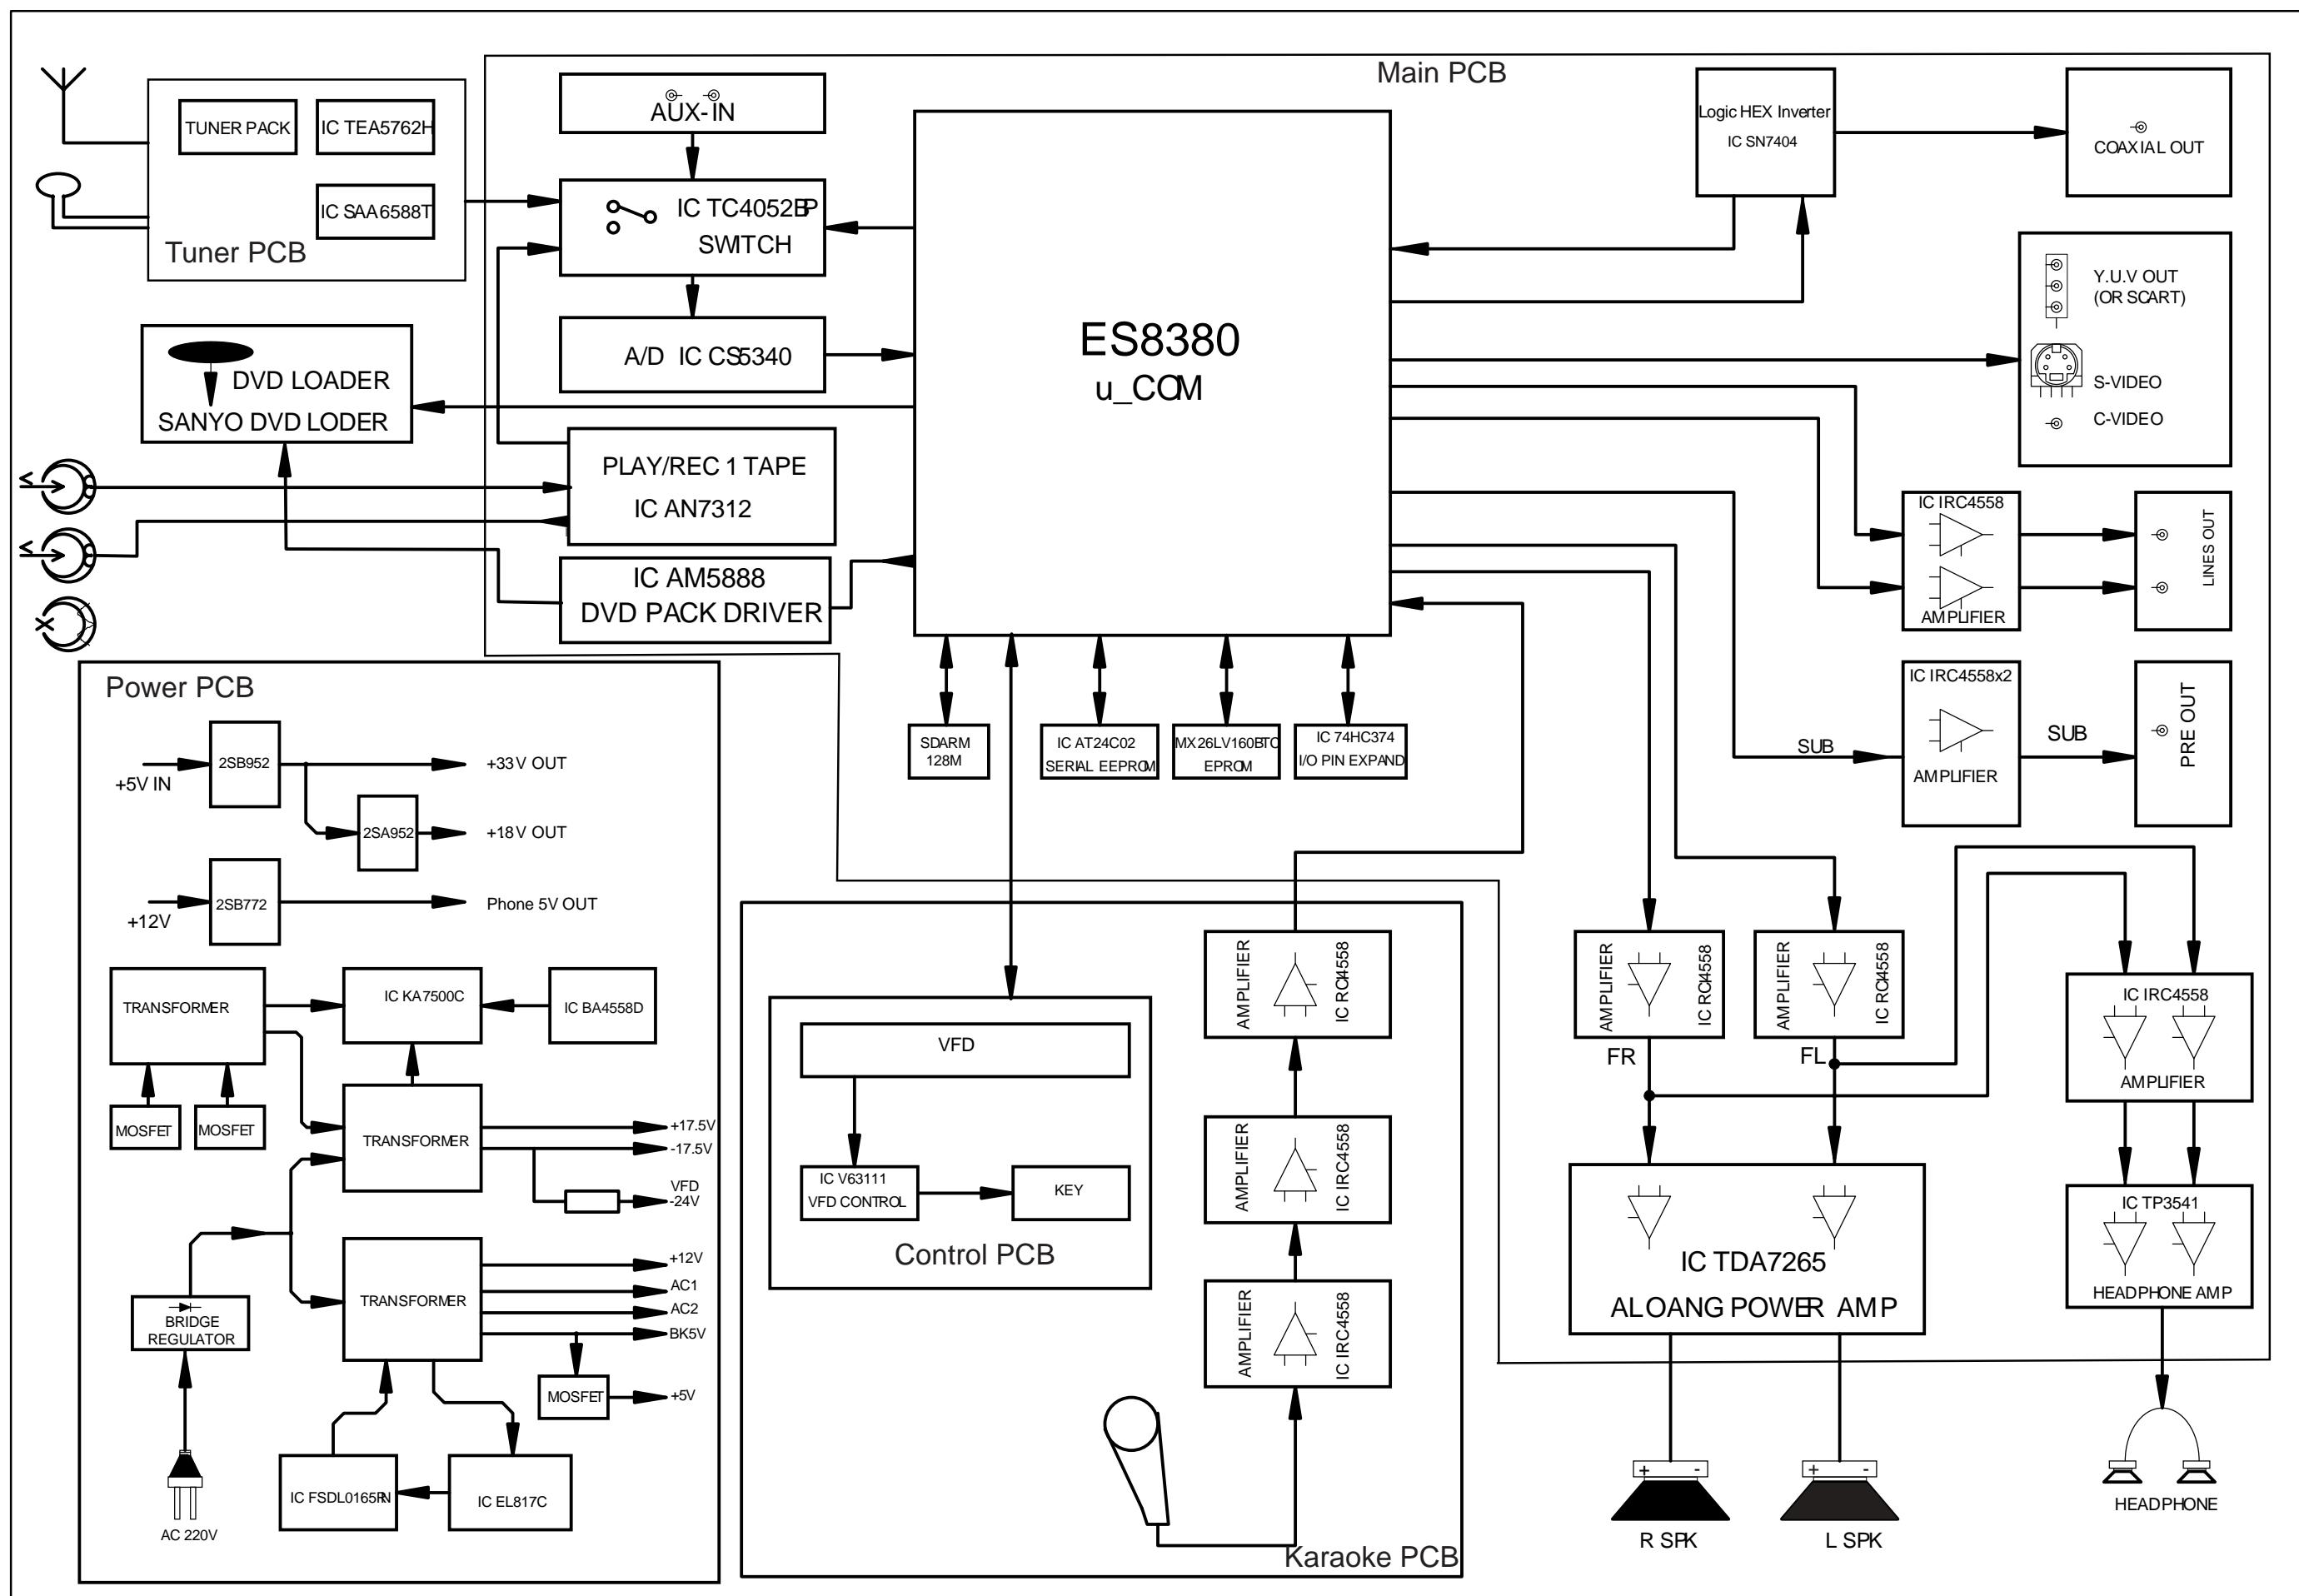

Note: After re-assembly, it is very important to ensure the wires are properly inserted into their respective sockets and routed not to touch or obstruct any moving parts.

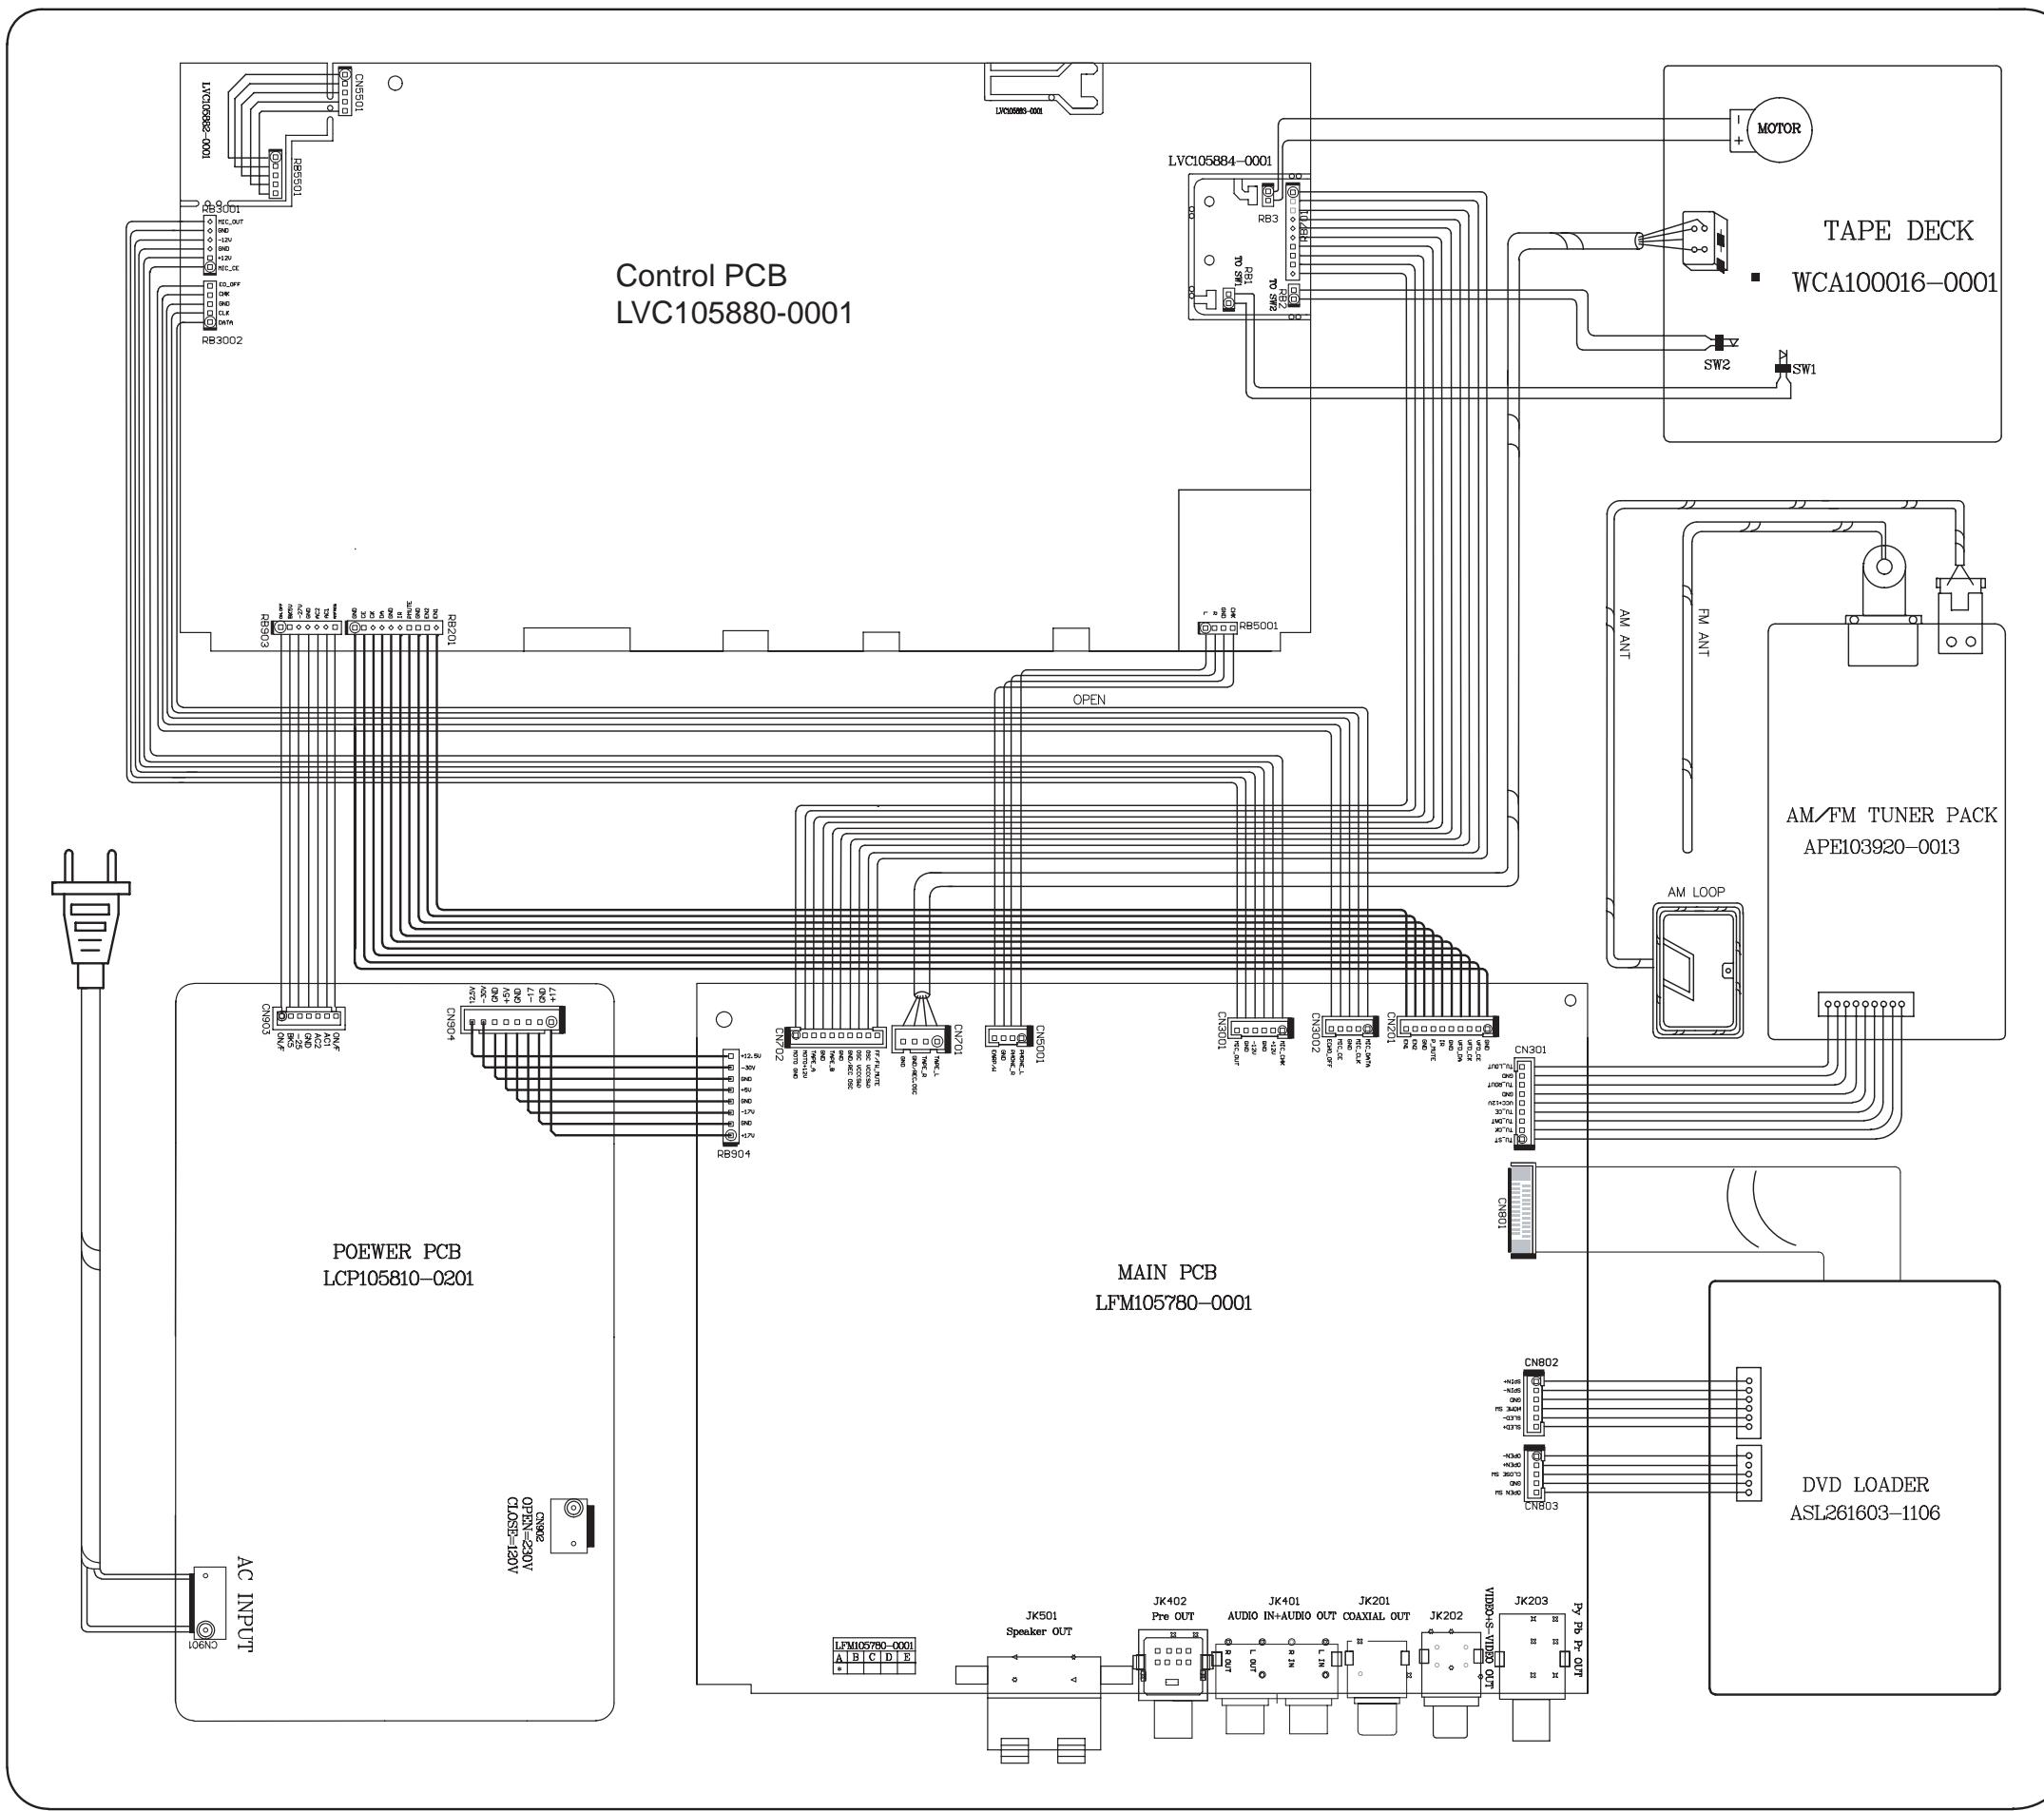

Service position C

# TUNER BOARD

## TABLE OF CONTENTS

Tuner Adjustment Table .....	7-1
Circuit Diagram (/51 ver.) .....	7-2
Circuit Diagram (/98 & /55 ver.).....	7-3
PCB Layout (/51 ver.) .....	7-4
PCB Layout (/98 & /55 ver.) .....	7-5

**Remark:** The module is not intend to be repaired on component level. Circuit Diagrams and Printed Board drawings are published for orientation only. The whole Tuner Board Ass'y can be ordered with 12nc: 9940 000 05309 for /55/98 and 9940 000 05714 for /51.

## TUNER ADJUSTMENT TABLE

Waverange	Input frequency	Input	Tuned to	Adjust	Output	Scope/Voltmeter
<b>VARICAP ALIGNMENT</b>						
<b>FM</b> 87.5 - 108MHz (50kHz grid)			108MHz	check		7.5V ±1V
			87.5MHz	check		1.4V ±0.2V
			1602KHz	check		7.2V ±1V
			531KHz	T005		1.1V ±0.2V
<b>MW</b> 531-1602kHz (9kHz grid) 530-1700kHz (10kHz grid) ( 98/ 55/ 51 )			1700KHz	check		7.2V ±1V
			531Khz	T005		1.1V ±0.2V
<b>FM - RF</b>						
<b>FM</b>	108MHz		106MHz	VC001	MAX	MAX
	87.5MHz	mod=1kHz $\Delta f = \pm 22.5\text{kHz}$	90.1MHz	L001		
<b>AM IF</b>						
<b>AM</b>	450kHz	Connect pin 6 of IC001 (AM Osc.) with short wire to ground (pin 4)	IC001 R220 24 100nF	T001 T002	MAX	
<b>MW</b>				T003		
<b>AM RF</b> <sup>3)</sup>						
<b>MW</b>	1404kHz		1404kHz	VC001	MAX	
	612kHz		612kHz	T006		
	1000kHz		1000kHz	VC001		
	600kHz		600kHz	T006		

Use Service Testprogram. By selecting the TUNER TEST test frequencies will be stored as preset frequencies automatically.

1) If sensitivity of frequency counter is too low adjust to max. channel separation  
(input signal: stereo left 90% + 9%, adjust output on right channel to minimum)

2) RC network serves for damping the IF-filter while  
adjusting the other one.

3) For AM RF adjustments the original frame antenna has to be used!

# DVD LOADER

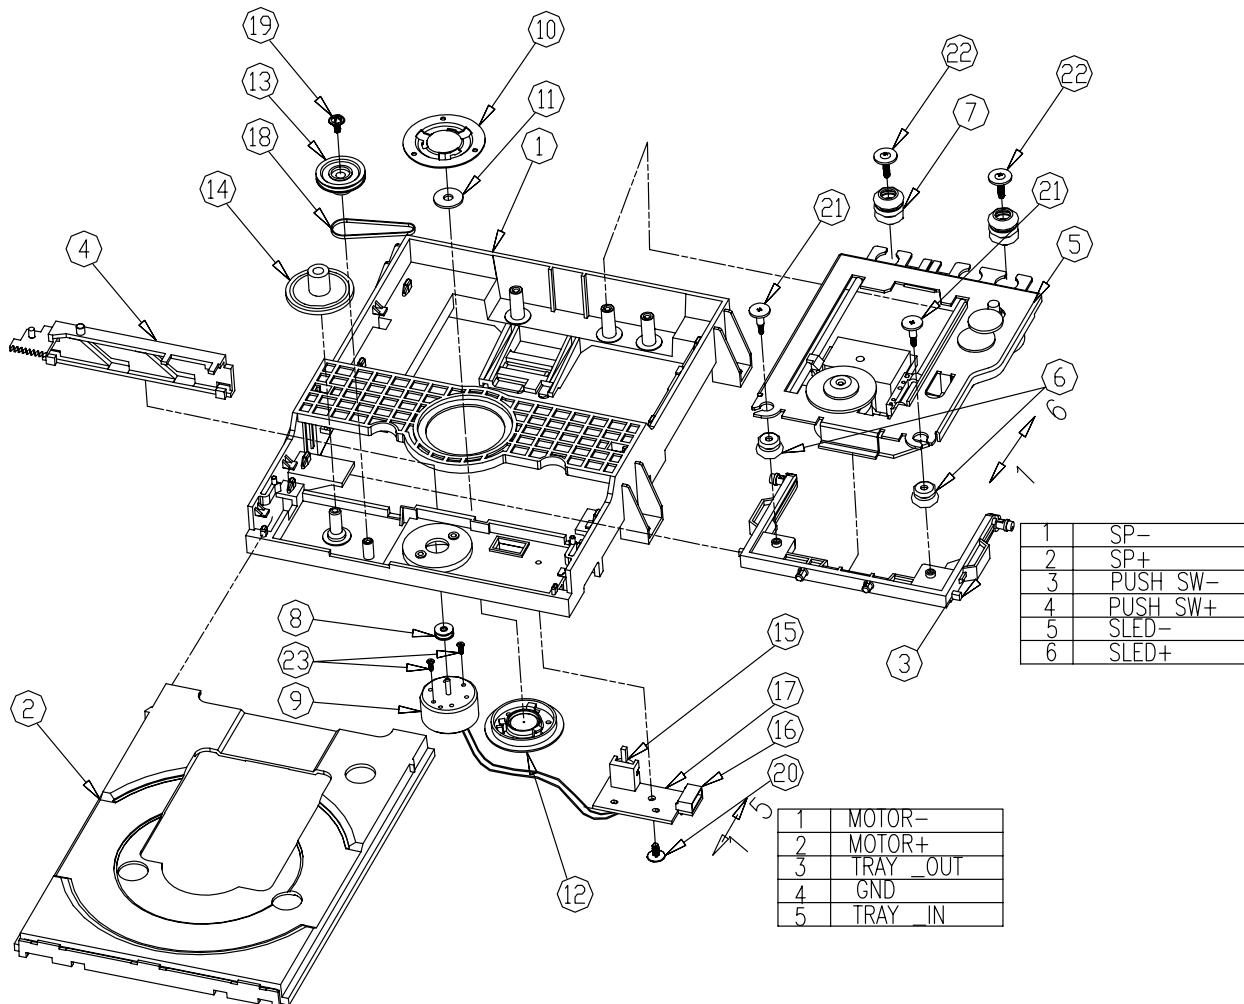

---

It is not recommended for component repair on this Module  
but to replace the whole assembly when it becomes defective.  
Therefore limited service parts list is only for reference.

### SUBWOOFER

Impedance .....	4 Ω
Speaker driver.....	6.5"
Frequency response. ....	30-200 HZ
Dimensions(w x h x d ).....	200 x 310 x 375 (mm)
Weight .....	6.51kg

## MEASUREMENT SETUP

Audio Test Signal

# ESD & SAFETY INSTRUCTION

## GB WARNING

All ICs and many other semi-conductors are susceptible to electrostatic discharges (ESD). Careless handling during repair can reduce life drastically. When repairing, make sure that you are connected with the same potential as the mass of the set via a wrist wrap with resistance. Keep components and tools also at this potential.

## ESD

## F ATTENTION

Tous les IC et beaucoup d'autres semi-conducteurs sont sensibles aux décharges statiques (ESD). Leur longévité pourrait être considérablement écourtée par le fait qu'aucune précaution n'est prise à leur manipulation. Lors de réparations, s'assurer de bien être relié au même potentiel que la masse de l'appareil et enfiler le bracelet serti d'une résistance de sécurité. Veiller à ce que les composants ainsi que les outils que l'on utilise soient également à ce potentiel.

## D WARNUNG

Alle ICs und viele andere Halbleiter sind empfindlich gegenüber elektrostatischen Entladungen (ESD). Unsorgfältige Behandlung im Reparaturfall kan die Lebensdauer drastisch reduzieren. Veranlassen Sie, dass Sie im Reparaturfall über ein Pulsarmband mit Widerstand verbunden sind mit dem gleichen Potential wie die Masse des Gerätes. Bauteile und Hilfsmittel auch auf dieses gleiche Potential halten.

## NL WAARSCHUWING

Alle IC's en vele andere halfgeleiders zijn gevoelig voor electrostatische ontladingen (ESD). Onzorgvuldig behandelen tijdens reparatie kan de levensduur drastisch doen verminderen. Zorg ervoor dat u tijdens reparatie via een polsband met weerstand verbonden bent met hetzelfde potentiaal als de massa van het apparaat. Houd componenten en hulpmiddelen ook op ditzelfde potentiaal.

## I AVVERTIMENTO

Tutti IC e parecchi semi-conduttori sono sensibili alle scariche statiche (ESD). La loro longevità potrebbe essere fortemente ridotta in caso di non osservazione della più grande cauzione alla loro manipolazione. Durante le riparazioni occorre quindi essere collegate allo stesso potenziale che quello della massa dell'apparecchio tramite un braccialetto a resistenza. Assicurarsi che i componenti e anche gli utensili con quali si lavora siano anche a questo potenziale.

## GB

Safety regulations require that the set be restored to its original condition and that parts which are identical with those specified, be used.

"Pour votre sécurité, ces documents doivent être utilisés par des spécialistes agréés, seuls habilités à réparer votre appareil en panne".

## NL

Veiligheidsbepalingen vereisen, dat het apparaat bij reparatie in zijn oorspronkelijke toestand wordt teruggebracht en dat onderdelen, identiek aan de gespecificeerde, worden toegepast.

## F

Les normes de sécurité exigent que l'appareil soit remis à l'état d'origine et que soient utilisées les pièces de rechange identiques à celles spécifiées.

## D

Bei jeder Reparatur sind die geltenden Sicherheitsvorschriften zu beachten. Der Original zustand des Geräts darf nicht verändert werden; für Reparaturen sind Original-Ersatzteile zu verwenden.

## I

Le norme di sicurezza esigono che l'apparecchio venga rimesso nelle condizioni originali e che siano utilizzati i pezzi di ricambio identici a quelli specificati.

"After servicing and before returning set to customer perform a leakage current measurement test from all exposed metal parts to earth ground to assure no shock hazard exist. The leakage current must not exceed 0.5mA."

## DISASSEMBLY INSTRUCTIONS

### *Dismantling the Grill Base & Speaker Driver*

1. Place the Subwoofer Box as shown in the Picture 1 and use a screw driver to force open the Grill Base.

Caution: Take care the surface when take out the Grill Base of Subwoofer

Picture 1

2. Place the Subwoofer Box as shown in the Picture 2 and loosen 4 screws A to remove the Speaker Driver.

Picture 2

### *Dismantling the Front Assembly*

1. Place the Subwoofer Box as shown in the Picture 3 (Bottom view) and use a screw driver to force open the front assembly.

Caution: Do not break the bundle of wires to the front.  
Take care the surface when take out the front panel of subwoofer

**WARNING: THERE IS ONLY A LED BETWEEN FRONT PANEL AND WOOD BOX. IF NOT NECESSARY, PLEASE DO NOT TRY TO OPEN THE FRONT PANEL!!!**

Picture 3

### *Dismantling the Rear assembly*

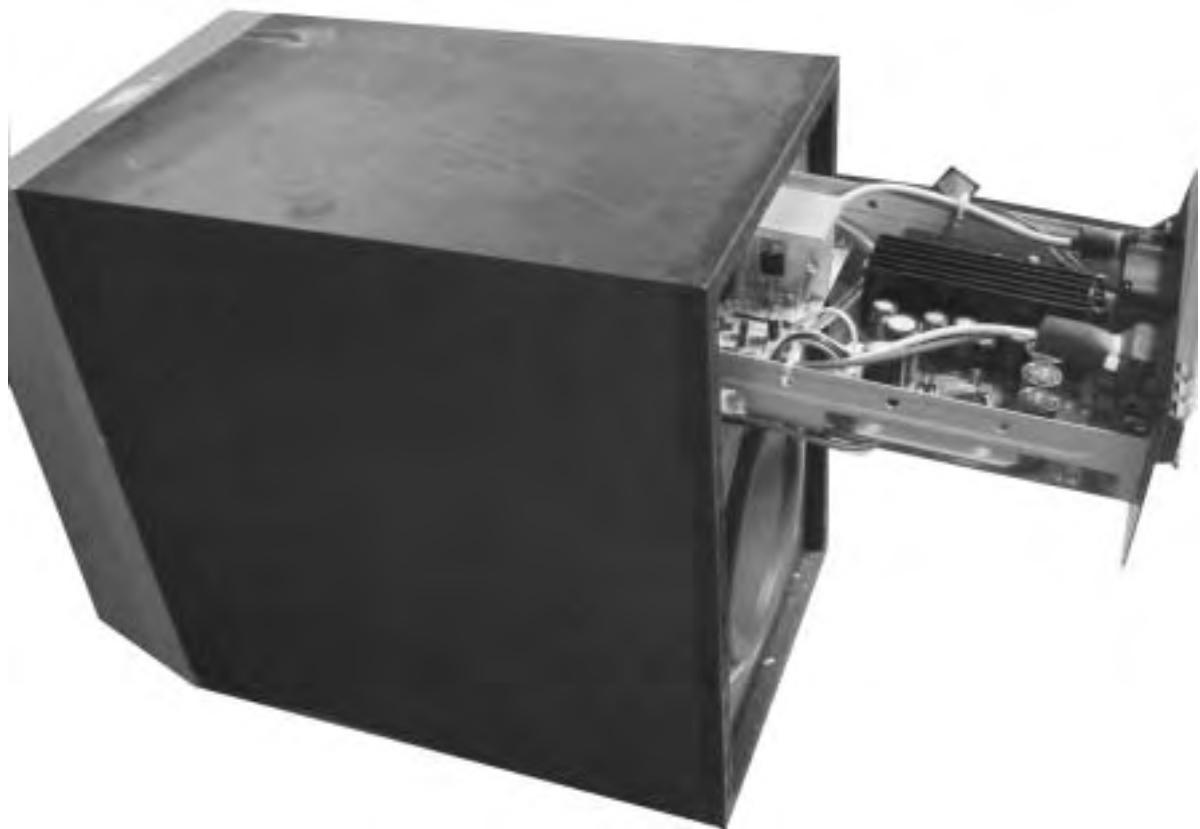

1. Loosen 8 screws B as shown in the Picture 4 (Rear View) to pull out the Printed Circuit Board assembly.

Caution: Do not break the bundle of wires to the front.

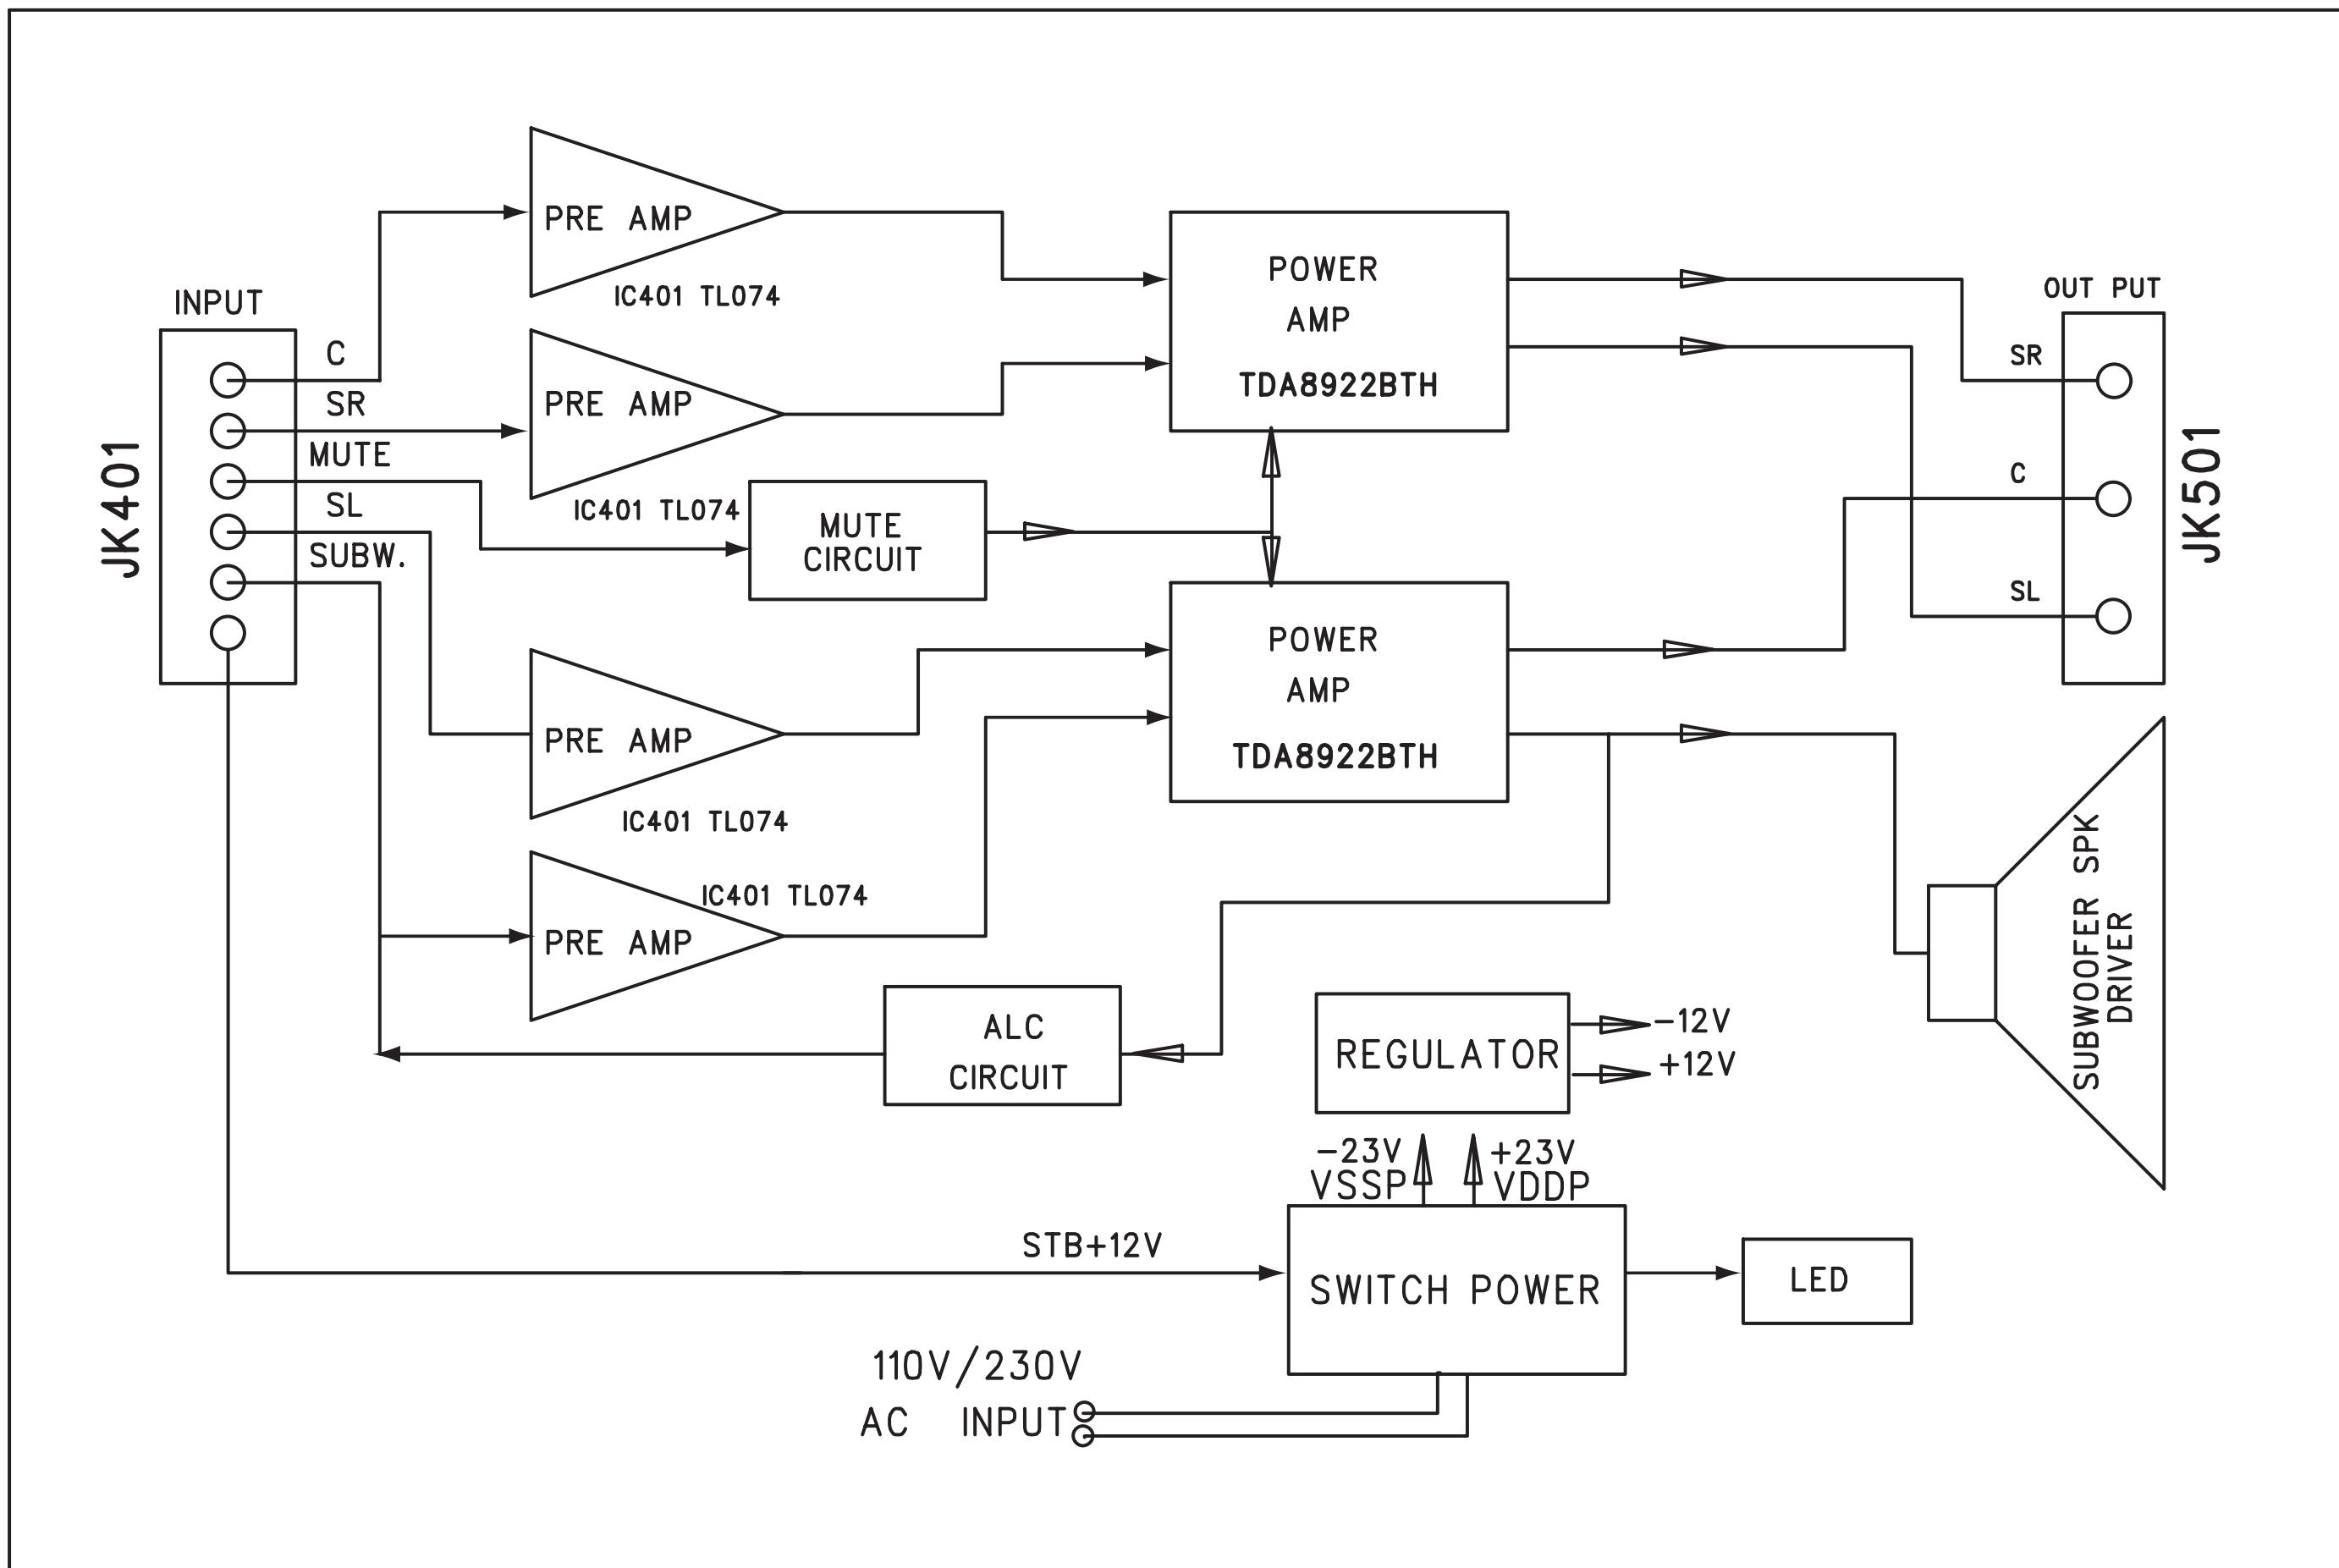

Picture 4
