## LOCATION OF PC BOARDS

## Specifications

---

### AMPLIFIER SECTION

Output power .....	4600 W PMPO
Stereo mode .....	2x175 W RMS
Frequency Response .....	180 Hz - 16 kHz / ± 3 dB
Signal-to-Noise Ratio .....	> 60dB (A-weighted)
Input Sensitivity	
AUX/TV In .....	500 mV
Output Sensitivity	
Headphone .....	1000 mV ± 2dB mV
Line Out .....	450 mV – 550 mV

### TUNER SECTION

Tuning Range .....	
..... FM 87.5 – 108 MHz ( 50 kHz steps)	
..... MW 531 – 1602 kHz (9 kHz steps)	
..... MW 530 – 1710 kHz (10 kHz steps)	
Signal-to-Noise Ratio .....	FM ≥ 55 dB
..... MW ≥ 35 dB	

### TAPE SECTION

Frequency Response	
Normal tape (type 1) .....	125Hz-8 Kz
Signal-to-Noise Ratio	
Normal tape (type 1) .....	≥ 45 dBA
Wow and flutter .....	≤ 0.35%

### DVD SECTION

Laser Type .....	Semiconductor
Disc Diameter .....	12cm / 8cm
Video Decoding .....	MPEG-2 / MPEG-1
Video DAC .....	10 Bits
Signal System .....	PAL / NTSC
Video Format .....	4:3 / 16:9
Video S/N .....	56 dB (minimum)
Composite Video Output .....	1.0 Vp-p, 75 Ω
S-Video Output .....	Y - 0.714 Vp-p, 75 Ω
..... C - 0.286 Vp-p, 75 Ω	
Audio DAC .....	24 Bits / 96 kHz
Frequency Response .....	4 Hz - 20 kHz (44.1kHz)
..... 4 Hz - 22 kHz (48kHz)	
..... 4 Hz - 44 kHz (96kHz)	

### MAIN UNIT

Power Supply Rating .....	110 - 127 / 220 - 240 V
..... 50/60HZ Switchable	
Power Consumption	
Active .....	85 W
Standby .....	< 10 W
Dimensions (w x h x d) .....	265x 310 x 367 (mm)
Weight .....	5.52 kg
Packaging Dimensions (w x h x d) .....	
..... 611.4 x 524 x 522 (mm)	
Gross weight .....	28Kg

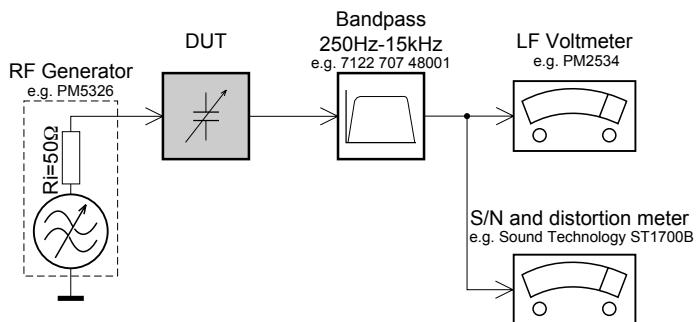

### SPEAKERS

Front speakers	
System .....	3-way, Bass reflex
Impedance .....	2 Ω
Speaker drivers .....	6.5" woofer, 2" tweeter
Frequency response .....	50 Hz – 20 kHz
Dimensions (w x h x d) .....	
..... 234 x 455 x 240 (mm)	
Weight .....	6.52kg/each

Specifications and external appearance are subject to change without notice.

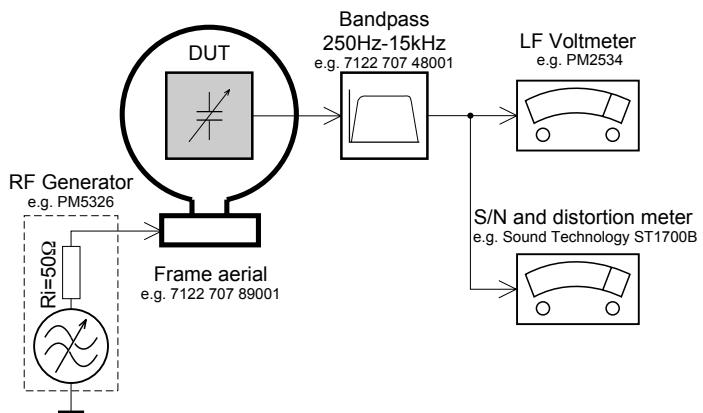

## MEASUREMENT SETUP

### Tuner FM

Use a bandpass filter to eliminate hum (50Hz, 100Hz) and disturbance from the pilottone (19kHz, 38kHz).

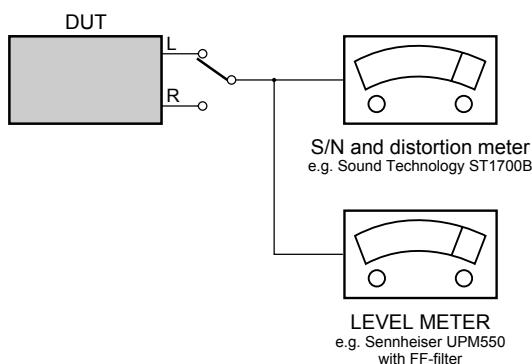

### Tuner AM (MW,LW)

To avoid atmospheric interference all AM-measurements have to be carried out in a Faraday's cage.  
Use a bandpass filter (or at least a high pass filter with 250Hz) to eliminate hum (50Hz, 100Hz).

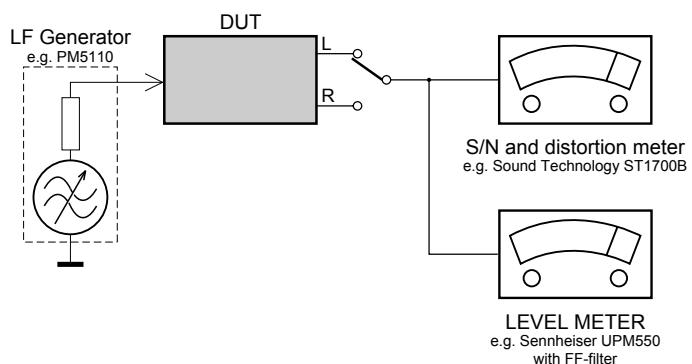

### CD

Use Audio Signal Disc SBC429 4822 397 30184  
(replaces test disc 3)

### Recorder

Use Universal Test Cassette **CrO2** SBC419 4822 397 30069  
or Universal Test Cassette **Fe** SBC420 4822 397 30071

## SERVICE AIDS

### Service Tools:

Universal Torx driver holder .....	4822 395 91019
Torx bit T10 150mm .....	4822 395 50456
Torx driver set T6-T20 .....	4822 395 50145
Torx driver T10 extended .....	4822 395 50423

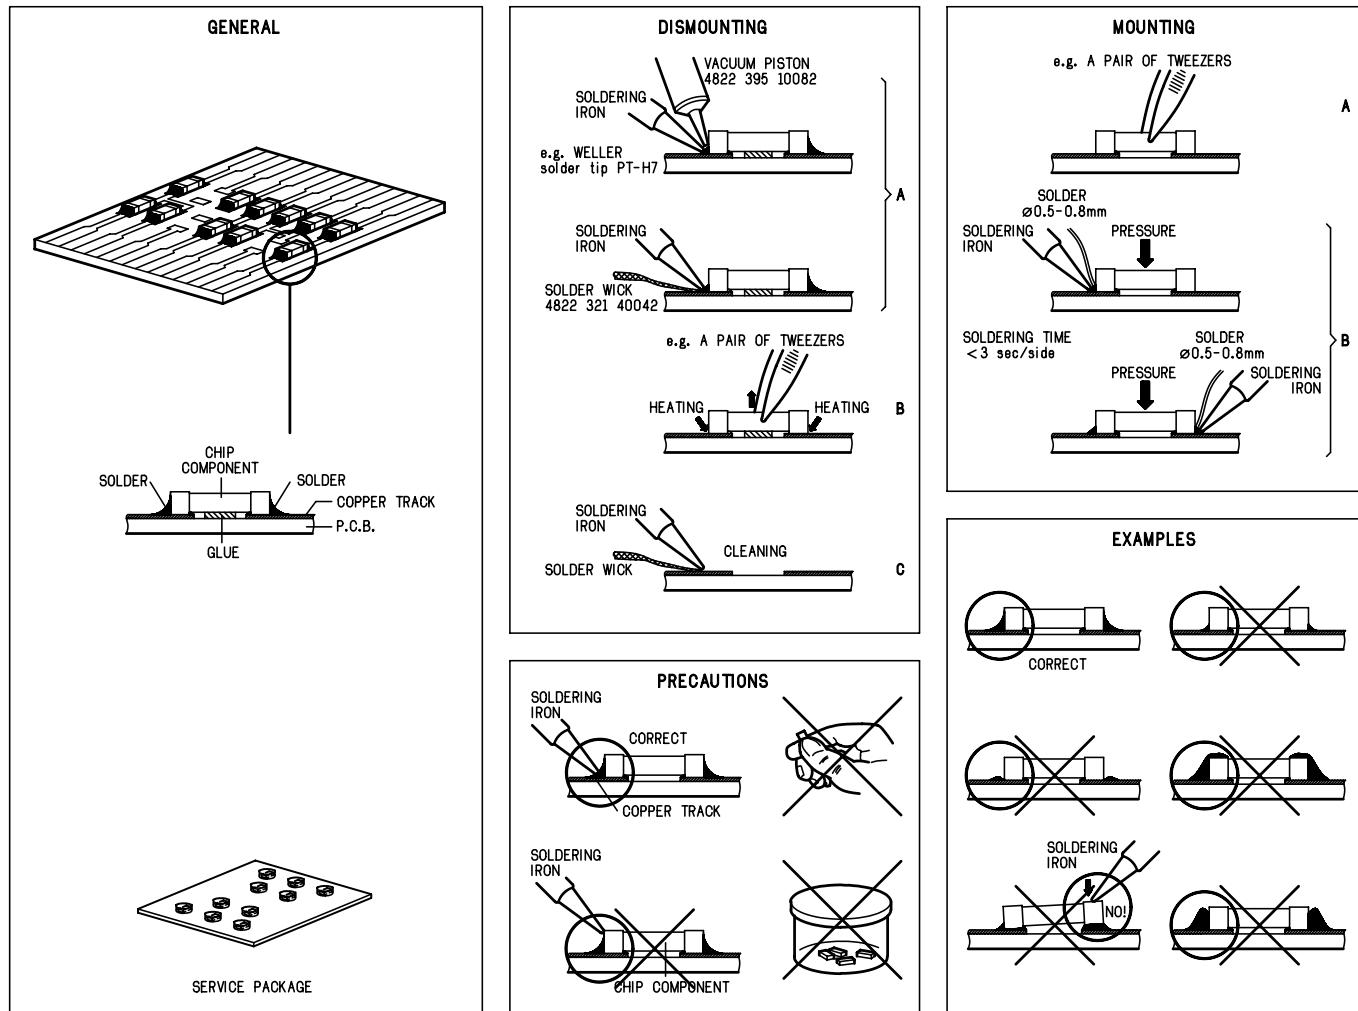

### Compact Disc:

SBC426/426A Test disc 5 + 5A .....	4822 397 30096
SBC442 Audio Burn-in test disc 1kHz .....	4822 397 30155
SBC429 Audio Signals disc .....	4822 397 30184
Dolby Pro-logic Test Disc .....	4822 395 10216

### ESD Equipment:

Anti-static table mat - large 1200x650x1.25mm .....	4822 466 10953
anti-static table mat - small 600x650x1.25mm .....	4822 466 10958
Anti-static wristband .....	4822 395 10223
Connectorbox (1MΩ) .....	4822 395 11307
Extension cable (to connect wristband to conn.box) .....	4822 320 11305
Connecting cable (to connect table mat to conn.box) .....	4822 320 11306
Earth cable (to Connect product to mat or box) .....	4822 320 11308
Complete kit ESD3 (combining all above products) .....	4822 320 10671
Wristband tester .....	4822 344 13999

## HANDLING CHIP COMPONENTS

**GB** WARNING

All ICs and many other semi-conductors are susceptible to electrostatic discharges (ESD). Careless handling during repair can reduce life drastically.

When repairing, make sure that you are connected with the same potential as the mass of the set via a wrist wrap with resistance. Keep components and tools also at this potential.

**ESD****NL** WAARSCHUWING

Alle IC's en vele andere halfgeleiders zijn gevoelig voor electrostatische ontladingen (ESD). Onzorgvuldig behandelen tijdens reparatie kan de levensduur drastisch doen verminderen. Zorg ervoor dat u tijdens reparatie via een polsband met weerstand verbonden bent met hetzelfde potentiaal als de massa van het apparaat. Houd componenten en hulpmiddelen ook op ditzelfde potentiaal.

**F** ATTENTION

Tous les IC et beaucoup d'autres semi-conducteurs sont sensibles aux décharges statiques (ESD). Leur longévité pourrait être considérablement écourtée par le fait qu'aucune précaution n'est prise à leur manipulation. Lors de réparations, s'assurer de bien être relié au même potentiel que la masse de l'appareil et enfiler le bracelet serti d'une résistance de sécurité. Veiller à ce que les composants ainsi que les outils que l'on utilise soient également à ce potentiel.

**D** WARNUNG

Alle ICs und viele andere Halbleiter sind empfindlich gegenüber elektrostatischen Entladungen (ESD). Unsorgfältige Behandlung im Reparaturfall kann die Lebensdauer drastisch reduzieren. Veranlassen Sie, dass Sie im Reparaturfall über ein Pulsarmband mit Widerstand verbunden sind mit dem gleichen Potential wie die Masse des Gerätes. Bauteile und Hilfsmittel auch auf dieses gleiche Potential halten.

**I** AVVERTIMENTO

Tutti IC e parecchi semi-conduttori sono sensibili alle scariche statiche (ESD). La loro longevità potrebbe essere fortemente ridotta in caso di non osservazione della più grande cautela alla loro manipolazione. Durante le riparazioni occorre quindi essere collegato allo stesso potenziale che quello della massa dell'apparecchio tramite un braccialetto a resistenza. Assicurarsi che i componenti e anche gli utensili con quali si lavora siano anche a questo potenziale.

**GB**

Safety regulations require that the set be restored to its original condition and that parts which are identical with those specified, be used.

"Pour votre sécurité, ces documents doivent être utilisés par des spécialistes agréés, seuls habilités à réparer votre appareil en panne".

**NL**

Veiligheidsbepalingen vereisen, dat het apparaat bij reparatie in zijn oorspronkelijke toestand wordt teruggebracht en dat onderdelen, identiek aan de gespecificeerde, worden toegepast.

**F**

Les normes de sécurité exigent que l'appareil soit remis à l'état d'origine et que soient utilisées les pièces de rechange identiques à celles spécifiées.

**D**

Bei jeder Reparatur sind die geltenden Sicherheitsvorschriften zu beachten. Der Original zustand des Geräts darf nicht verändert werden; für Reparaturen sind Original-Ersatzteile zu verwenden.

**I**

Le norme di sicurezza esigono che l'apparecchio venga rimesso nelle condizioni originali e che siano utilizzati i pezzi di ricambio identici a quelli specificati.

"After servicing and before returning set to customer perform a leakage current measurement test from all exposed metal parts to earth ground to assure no shock hazard exist. The leakage current must not exceed 0.5mA."

**GB** Warning !

Invisible laser radiation when open.  
Avoid direct exposure to beam.

**S** Varning !

Osynlig laserstrålning när apparaten är öppnad och spärren är urkopplad. Betrakta ej strålen.

**SF** Varoitus !

Avatussa laitteessa ja suojalukiukseen ohittaa olet alittiina näkymättömälle laserisäteilylle. Älä katso säteeseen!

**DK** Advarse !

Usynlig laserstrålning ved åbning når sikkerhedsafbrydere er ude af funktion. Undgå udsættelse for stråling.

## INFORMATION ABOUT LEAD-FREE SOLDERING

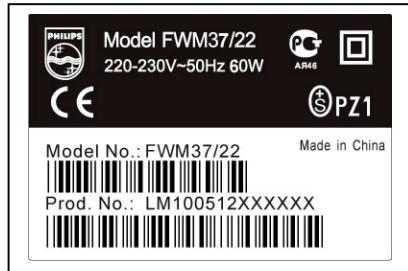

Philips CE is producing lead-free sets from 1.1.2005 onwards.

### IDENTIFICATION:

Regardless of special logo (not always indicated) one must treat all sets from **1 Jan 2005** onwards, according next rules:

### Example S/N:

Bottom line of typeplate gives a 14-digit S/N. Digit 5&6 is the year, digit 7&8 is the week number, so in this case 2005 wk12

So from **0501** onwards = from 1 Jan 2005 onwards

***Important note: In fact also products of year 2004 must be treated in this way as long as you avoid mixing solder-alloys (leaded/ lead-free). So best to always use SAC305 and the higher temperatures belong to this.***

Due to lead-free technology some rules have to be respected by the workshop during a repair:

- Use only lead-free solder alloy Philips SAC305 with order code 0622 149 00106. If lead-free solder-paste is required, please contact the manufacturer of your solder-equipment. In general use of solder-paste within workshops should be avoided because paste is not easy to store and to handle.
- Use only adequate solder tools applicable for lead-free solder alloy. The solder tool must be able
  - To reach at least a solder-temperature of 400°C,
  - To stabilize the adjusted temperature at the solder-tip
  - To exchange solder-tips for different applications.
- Adjust your solder tool so that a temperature around 360°C – 380°C is reached and stabilized at the solder joint. Heating-time of the solder-joint should not exceed ~ 4 sec. Avoid temperatures above 400°C otherwise wear-out of tips will rise drastically and flux-fluid will be destroyed. To avoid wear-out of tips switch off un-used equipment, or reduce heat.
- Mix of lead-free solder alloy / parts with leaded solder alloy / parts is possible but PHILIPS recommends strongly to avoid mixed solder alloy types (leaded and lead-free).
 

If one cannot avoid or does not know whether product is lead-free, clean carefully the solder-joint from old solder alloy and re-solder with new solder alloy (SAC305).
- Use only original spare-parts listed in the Service-Manuals. Not listed standard-material (commodities) has to be purchased at external companies.
- Special information for BGA-ICs:
  - always use the 12nc-recognizable soldering temperature profile of the specific BGA (for de-soldering always use the lead-free temperature profile, in case of doubt)
  - lead free BGA-ICs will be delivered in so-called 'dry-packaging' (sealed pack including a silica gel pack) to protect the IC against moisture. After opening, dependent of MSL-level seen on indicator-label in the bag, the BGA-IC possibly still has to be baked dry. (MSL=Moisture Sensitivity Level). This will be communicated via AYS-website.

Do not re-use BGAs at all.
- For sets produced before 1.1.2005 (except products of 2004), containing leaded solder-alloy and components, all needed spare-parts will be available till the end of the service-period. For repair of such sets nothing changes.
- On our website [www.atyourservice.ce.Philips.com](http://www.atyourservice.ce.Philips.com) you find more information to:
  - \* BGA-de-/soldering (+ baking instructions)
  - \* Heating-profiles of BGAs and other ICs used in Philips-sets

You will find this and more technical information within the "magazine", chapter "workshop news".

For additional questions please contact your local repair-helpdesk.

## SERVICE INSTRUCTION

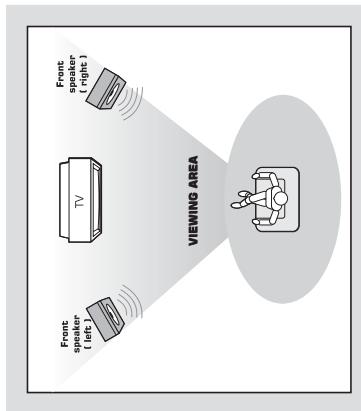

Safety regulations require that after a repair, the set must be returned in its original condition. Pay in particular attention to the following points:

- Route the wire trees correctly and fix them with the mounted cable clamps.
- Check the insulation of the AC Power lead for external damage.
- Check the strain relief of the AC Power cord for proper function.
- Check the electrical DC resistance between the AC Power Plug and the secondary side (only for sets which have a AC Power isolated power supply):
- Unplug the AC Power cord and connect a wire between the two pins of the AC Power plug.
- Set the AC Power switch to the "on" position (keep the AC Power cord unplugged!).
- Measure the resistance value between the pins of the AC Power plug and the metal shielding of the tuner or the aerial connection on the set. The reading should be larger than 4.5 Mohm (For U.S. it should be between 4.2 Mohm and 12 Mohm).
- Switch "off" the set, and remove the wire between the two pins of the AC Power plug.
- Check the cabinet for defects, to avoid touching of any inner parts by the customer.

## Connections

## Connections

### Step 1: Placing speakers

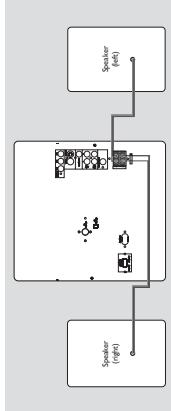

Place the front left and right speakers at equal distances from the TV set and at an angle of approximately 45 degrees from the listening position.

Notes:

- To avoid magnetic interference, do not position the front speakers too close to your TV set.
- Allow adequate ventilation around the DVD Mini Hi-Fi System.

### Step 2: Connecting speakers

Speakers	(-)	(+)
Front Left (L)	Black	White
Front Right (R)	Black	Red

Connect the speaker wires to the SPEAKERS (FRONT) terminals; right speaker to "R" and left speaker to "L", coloured (marked) wire to "+" and black (unmarked) wire to "-". Fully insert the stripped portion of the speaker wire into the terminal as shown.

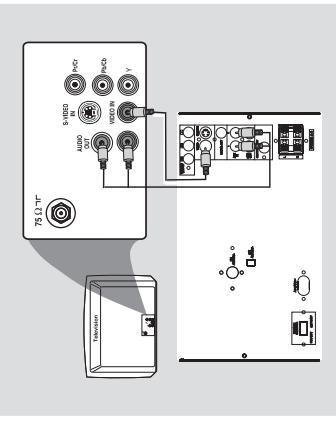

Notes:

- For optimal sound performance, use the supplied speakers.
- Do not connect more than one speaker to any one pair of +/- speaker terminals.
- Do not connect speakers with an impedance lower than the speakers supplied. Please refer to the SPECIFICATIONS section of this manual.

### IMPORTANT! The type plate is located on the rear of the system.

To avoid overheating of the system, a safety circuit has been built in. Therefore, your system may switch to Standby mode automatically under extreme conditions. If this happens, let the system cool down before reusing it.

### Step 3: Connecting TV set

### IMPORTANT!

- You only need to make one video connection from the following options, according to the capabilities of your TV system.

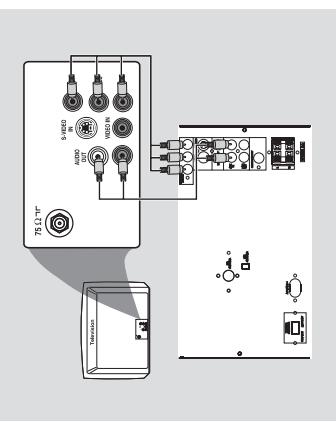

- **S-Video or Component Video** connection provides higher picture quality. These options must be available on your TV set.
- **Connect the system directly to the TV set.**

### Using Video In jack (CVBS)

- Use the composite video cable (yellow) to connect the system's **VIDEO** jack to the video input jack (or labeled as A/V In, Video In, Composite or Baseband) on the TV set.
- To listen to TV channels through this system, use the audio cables (white/red) to connect **AUX IN** jacks to the corresponding AUDIO OUT jacks on the TV set.
- If you are using a Progressive Scan TV set (TV with Progressive Scan or ProScan capability), activate the PROGRESSIVE SCAN function through SYSTEM MENU.

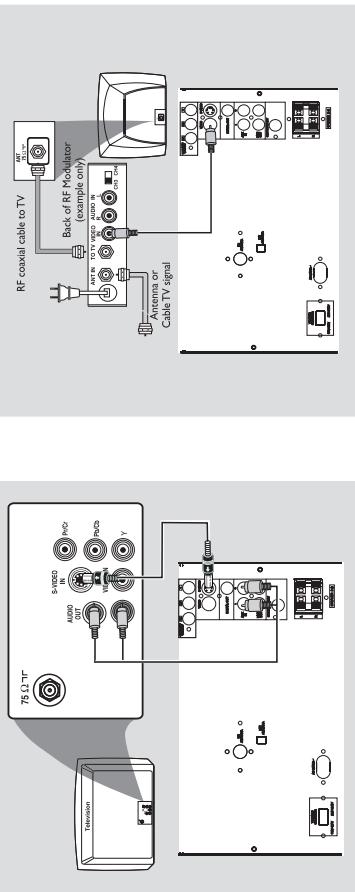

### Using component Video In jack (Pr PbY)

- Use the component video cables (red/blue/green) to connect the system's **Pr PbY** jacks to the corresponding Component video input jacks (or labeled as Pr/Cr Pb/Cb Y or YUV) on the TV set.
- To listen to TV channels through this system, use the audio cables (white/red) to connect **AUX IN** jacks to the corresponding AUDIO OUT jacks on the TV set.
- If you are using a Progressive Scan TV set (TV with Progressive Scan or ProScan capability), deactivate the PROGRESSIVE SCAN function through SYSTEM MENU.

## Connections

## Connections

### Using S-Video In jack

- Use the S-Video cable (not supplied) to connect the system's **S-VIDEO OUT** jack to the S-Video input jack (or labeled as Y/C or S-VHS) on the TV set.
- To listen to TV channels through this system, use the audio cables (white/red) to connect **AUX IN** jacks to the corresponding **AUDIO OUT** jacks on the TV set.

- Deactivate Progressive Scan through **SYSTEM MENU**. Refer to Using the Setup Menu- Using Progressive Scan to improve image quality.
- Use the RF coaxial cable (not supplied) to connect the RF modulator to your TV's RF jack.
- Deactivate Progressive Scan through **SYSTEM MENU**** Refer to Using the Setup Menu- Using Progressive Scan to improve image quality.

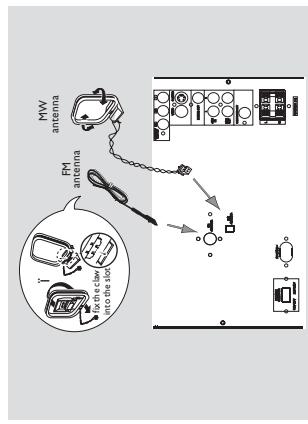

### IMPORTANT!

- If your TV set only has a single **Antenna In** jack (or labeled as 75 ohm or **RF In**), you will need a **RF modulator** in order to view the **DVD** playback via **TV**. See your electronics retailer or contact **Philips** for details on **RF modulator availability and operations**.

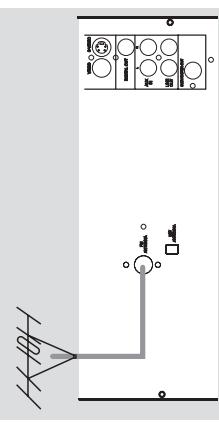

### Using an accessory RF modulator

- Use the composite cable (yellow) to connect the system's **VIDEO** jack to the video input jack on the RF modulator.
- Use the RF coaxial cable (not supplied) to connect the RF modulator to your TV's RF jack.
- Deactivate Progressive Scan through **SYSTEM MENU**** Refer to Using the Setup Menu- Using Progressive Scan to improve image quality.

### Step 4: Connecting FM/MW antennas

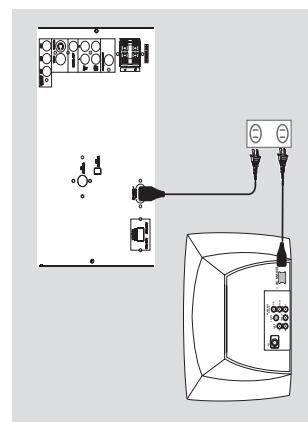

- Connect the supplied MW loop antenna to the **MW** jack. Place the MW loop antenna on a shelf or attach it to a stand or wall.
- Connect the supplied FM antenna to the **FM** jack. Extend the FM antenna and fix its end to the wall.
- For better FM stereo reception, connect an outdoor FM antenna to the **FM ANTENNA** terminal.

### Notes:

- Adjust the position of the antennas for optimal reception.
- Position the antennas as far as possible from your TV set, VCR or other radiation sources to prevent unwanted interference.

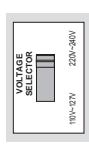

### Step 5: Connecting the power cord

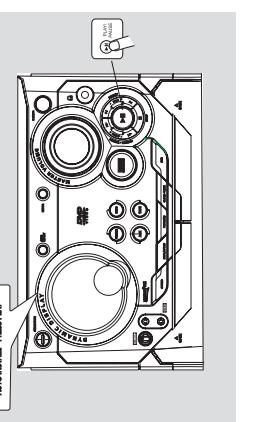

- After everything is connected properly, plug in the **AC power cord** to the **power outlet**.

Never make or change any connection with the power switched on.

- On the DVD Mini Hi-Fi System**  
"AUTO INSTALL-PRESS PLAY" may appear on the display panel. Press **PLAY** on the front panel to search and store all available radio stations or press **■** to exit (See page 36, Tuner Operations- Presetting radio stations).

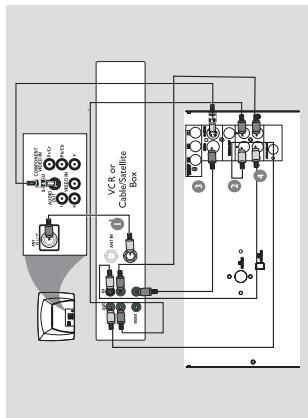

If your system is equipped with a Voltage Selector, set the **VOLTAGE SELECTOR** to the local power line voltage.

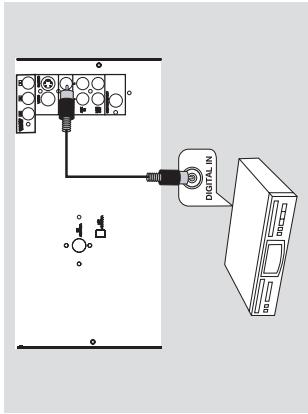

## Connections

### Step 6: Connecting a VCR or cable/satellite box

### Step 7: Connecting digital audio equipment

#### Viewing and listening to playback

- 1 Connect the VCR or Cable/Satellite Box to the TV system as shown.
- 2 Connect the systems AUX IN jacks to the AUDIO OUT jacks on the VCR or Cable/Satellite box.

Before starting operation, press **AUX** on the remote control to select "AUX" in order to activate the input source.

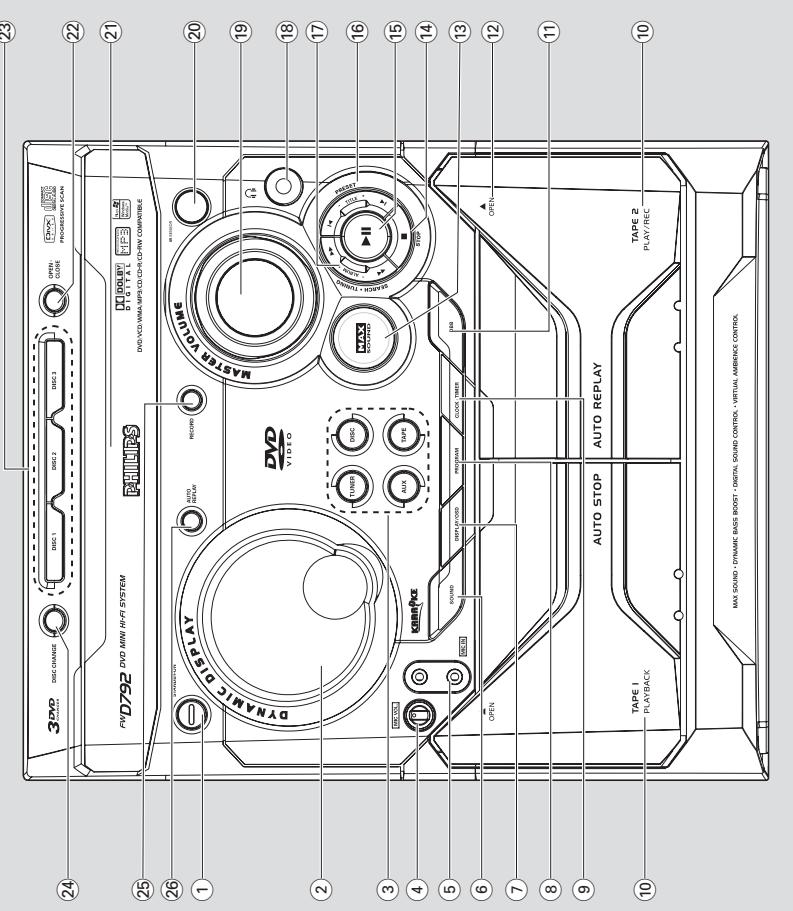

#### Using the VCR for recording DVDs

- 1 Some DVDs are copy-protected. You cannot record or dub protected discs using a VCR.
- 2 Connect the systems **VIDEO** jack to the VIDEO IN jack on the VCR.
- 3 Connect the systems **LINE OUT (R/L)** jacks to the AUDIO IN jacks on the VCR. This will allow you to make analog stereo (two channel, right and left) recording.
- 4 To view **DVD playback while recording** You must connect the system to your TV system using the S-VIDEO (as shown above) or the Component (Pr Pb Y) video connection.

### Step 7: Connecting digital audio equipment

#### Recording (digital)

Connect the system's DIGITAL OUT jack to the DIGITAL IN jack on a digital recording device (DTS-Digital Theater System compatible, with a Dolby Digital decoder, for example).

# FUNCTIONAL OVERVIEW

## Functional Overview

### Controls on the system

- (1) **STANDBY ON**
  - to switch the system on, to Standby mode.
- (2) **DISPLAY SCREEN**
  - to view the current status of the system.
- (3) **SOURCE**
  - to select the following:
  - DISC (DISC 1•2•3)**
  - to select disc tray 1,2 or 3
  - TUNER (BAND)**
  - to select waveband: FM or MW.
  - TAPE (TAPE 1-2)**
  - to select tape deck 1 or 2.
- (4) **AUX**
  - to select a connected external source: TV/CDR, AUX (auxiliary).
- (5) **MIC VOL.**
  - to adjust the mixing level for karaoke or microphone recording.
- (6) **SOUND**
  - to connect microphone jack.
  - to select various sound effect.
- (7) **DISPLAY/OSD**
  - to display disc information during disc playback.
- (8) **PROGRAM**
  - in disc mode, to program favorite tracks.
  - in tuner mode, to program favorite stations.
- (9) **CLOCK/TIMER**
  - to view and set clock/ timer.
- (10) **TAPE DECK 1 / 2**
- (11) **DBB (Dynamic Bass Boost)**
  - to select the desired DBB level (DBB 1, DBB 2, DBB 3 or DBB OFF).
- (12) **▲ OPEN**
  - to open the tape deck door.
- (13) **MAX SOUND**
  - To activate or deactivate MAX sound.
- (14) **STOP ■**
  - for DISC ..... to stop playback or to clear a programme.
  - for DEMO ..... (in Standby mode) to activate/deactivate demonstration.
  - for PLUG&PLAY ... (on the system only) to exit plug&play mode.

### ⑯ (PLAY/Pause) ▶■

- for DISC ..... to start or interrupt playback.
- for TAPE ..... to start playback.
- for PLUG&PLAY ... (on the system only) to initiate plug & play mode.

### ⑯ PREV / PRESET / NEXT ▶■

- (TITLE -/+ ) for DISC ..... to select previous/next title, chapter or track during playback.
- for TUNER ..... to select a preset radio station.
- for CLOCK/TIMER .. to set the hour.

### ⑯ SEARCH+TUNING ▶■ / ▶■

- (ALBUM -/+ ) for DISC ..... to search backward/forward.
- to select previous/next album in MP3/WMA stop mode (with MENU ON).

### ⑯ REPEAT ■

- for TAPE ..... to rewind or fast forward.
- for TUNER ..... to tune to a lower or higher radio frequency.
- for CLOCK/TIMER .. to set the minute.

### ⑯ IR SENSOR

- point the remote control towards this sensor.

### ⑯ DISC TRAYS

- to open or close the disc tray.

### ⑯ DISC1 / DISC2 / DISC3

- to select a disc tray for playback.

### ⑯ DISC CHANGE

- to change disc(s).

### ⑯ RECORD

- to start recording on tape deck 2.

### ⑯ AUTO REPLAY

- In tape mode, to select continuous playback in either REPLAY or PLAY mode only.

### ⑯ STOP ■

- for DISC ..... to stop playback or to clear a programme.
- for DEMO ..... (in Standby mode) to activate/deactivate demonstration.
- for PLUG&PLAY ... (on the system only) to exit plug&play mode.

### ⑯ (Numeric Keypad) (0-9)

- First, select the source you wish to control by pressing one of the source select keys on the remote control (DISC or TUNER, for example).
- Then select the desired function (▶■ , ▶■ or ▶■ for example).

### ⑯ SOURCE

- to select the relevant active mode: DISC1/2/3, TUNER, TAPE1/2 or AUX.

### ⑯ DISC MENU (disc mode only)

- to enter or exit the disc contents menu.

### ⑯ SYSTEM MENU (disc mode only)

- to enter or exit the system menu bar.

### ⑯ (Numeric Keypad) (0-9)

- to enter a track/title number of the disc.

### ⑯ GOTO

- to go direct to desired title, chapter or time.

### ⑯ PROGRAM

- to enter a number of preset radio stations.

### ⑯ VOL +/-

- adjust the volume level.

### ⑯ ECHO

- adjust key control/ECHO level in karaoke mode.

### ⑯ OK

- to exit or confirm the selection.

### ⑯ GOTO

- to go direct to desired title, chapter or time.

### ⑯ PROGRAM

- in Disc mode, to program favorite tracks.

### ⑯ GOTO

- in Tuner mode, to program favorite stations.

### ⑯ SOURCE

- to select the relevant active mode: FM and MW band.

### ⑯ RECORD

- to go direct to desired title, chapter or time.

### ⑯ REPEAT A-B

- to repeat a specific section on a disc.

### ⑯ SUBTITLE

- to select desired subtitle.

### ⑯ AUDIO

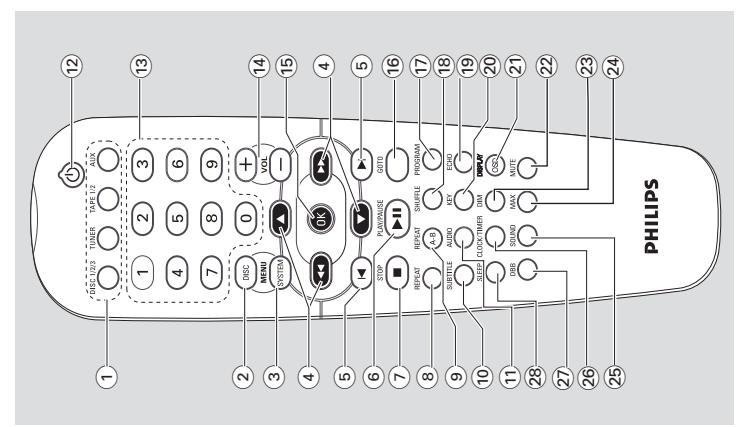

- to select the audio channel.

### ⑯ CUE

- to switch to standby mode.

### ⑯ SHUFFLE

- to play back in random mode.

### Notes:

- First, select the source you wish to control by pressing one of the source select keys on the remote control (DISC or TUNER, for example).
- Then select the desired function (▶■ , ▶■ or ▶■ for example).

### ⑯ SOURCE

- to enter a track/title number of the disc.

### ⑯ GOTO

- to enter a number of preset radio stations.

### ⑯ PROGRAM

- to go direct to desired title, chapter or time.

### ⑯ GOTO

- to go direct to desired title, chapter or time.

### ⑯ SOURCE

- to select the relevant active mode: FM and MW band.

### ⑯ RECORD

- to go direct to desired title, chapter or time.

### ⑯ REPEAT A-B

- to repeat a specific section on a disc.

### ⑯ SUBTITLE

- to select desired subtitle.

### ⑯ AUDIO

- to select the audio channel.

### ⑯ CUE

- to switch to standby mode.

### ⑯ SHUFFLE

- to play back in random mode.

## Functional Overview

## Preparations

### ⑯ ECHO

– to adjust the echo level in karaoke mode.

### ⑯ KEY

– to change the tone level to suit your vocal range.

### ㉑ DISPLAY (OSD)

– to view the time, title or chapter information.

### ㉒ MUTE

– to interrupt or resume sound reproduction.

### ㉓ DIM

– to select different brightness for VFD.

### ㉔ MAX

– To activate or deactivate MAX sound.

### ㉕ SOUND

– to select various sound effect.

### ㉖ CLOCK/TIMER

– to view and set clock/ timer.

### ㉗ DBB (Dynamic Bass Boost)

– to select the desired DBB level (DBB 1, DBB 2, DBB3 or DBB OFF).

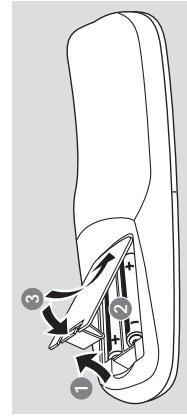

### ㉘ SLEEP

– to set the sleep (auto-off) timer function.

### IMPORTANT!

- Make sure to complete the preparation procedures before operating the system.

### Step 1: Inserting batteries into the remote control

1 Open the battery compartment.

2 Place two batteries (Type R06 or AA) in the compartment with the correct polarity as indicated by "+" and "-" symbols.

3 Close the cover.

### Using the remote control to operate the system

1 Point the remote control directly at the remote sensor (IR) on the front panel.

2 Select the source you wish to control by pressing one of the source select buttons on the remote control (for example TAPE1/2, TUNER).

3 Then select the desired function (for example ►||◀ or ▶|).

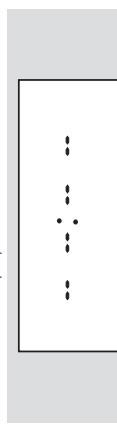

### CAUTION!

- Remove batteries if they are exhausted or will not be used for a long time.
- Do not use old and new or different types of batteries in combination.
- Batteries contain chemical substances, so they should be disposed of properly.

### Step 2: Setting the clock

The clock can be set in either 12-hour or 24-hour mode ("PM 00:00" or "00:00" for example).

- 1 The clock can be set in any source mode.
  - If you have not set the clock, "...:" will be shown on the display.

2 Press and hold **CLOCK/TIMER** until "SELECT" **CLOCK OR TIMER**s displayed.

- Press ▶| or ▷| to change the display to "CLOCK".
- Press **CLOCK/TIMER** again to confirm.

3 Press ▶| or ▷| on the system to set the hours.

- In AUX mode, setting clock using remote control is not possible.

4 Press ▲| or ▼| on the system to set the minutes.

- Press **CLOCK/TIMER** to confirm your setting. The system will store the setting automatically and go back to its previous status.
- The time setting becomes effective.

Note:

- In AUX mode, setting clock using remote control is not possible.

### To exit the setting without storing (in standby mode)

● Press ■ on the system to exit.

- "CANCEL" will appear on the display.

● Press **STANDBY ON** to exit setting mode and go into **POWER ON** mode.

● You can also press **DISC, DISC1~3, DISC CHANGE, OPEN/CLOSE** to exit setting mode and go into disc mode.

- The system will also exit setting mode and go to TUNER, TAPE or AUX mode when you press the corresponding source button.

● When you have set the clock, press •••••••• **TIMER** to view clock. Press **DISPLAY** on the system to toggle between 12-hour and 24-hour modes.

- The time will be displayed for 5 seconds and then go back to its previous status.

## FUNCTIONAL OVERVIEW & PREPARATIONS

# Preparations

## Preparations

- Notes:**
- The clock will be cancelled when the power cord is disconnected or if a power failure occurs.
  - During clock setting, if no button is pressed within 10 seconds, the system will exit the setting mode and go back to its previous status.

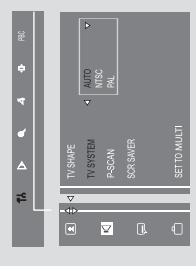

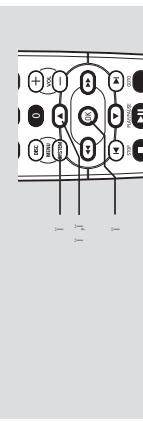

### Step 3: Setting the TV set

- IMPORTANT!**  
- Make sure you have completed all the necessary connections. (See Connections - Connecting TV set)

- 1 Press **DISC (DISC 1~2~3)** on the front panel (or press **DISC 1/2/3** on the remote control).
- 2 Turn on the TV set and set to the correct Video-In channel. You should see the blue Philips DVD background screen on the TV set.  
→ You may go to channel 1 on your TV set, then press the channel down button repeatedly until you see the Video In channel.  
→ Or, you can use the TV remote control to select different video modes.  
→ Or, set TV to channel 3 or 4 if you are using an RF modulator.

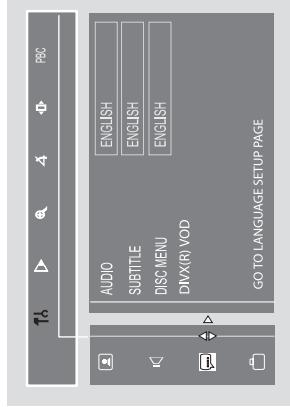

### Selecting the color system that matches your TV set

This DVD Mini Hi-Fi System is compatible with both NTSC and PAL. For the playback of a DVD disc on this DVD Mini Hi-Fi System, the color systems of the DVD TV set and DVD Mini Hi-Fi System should match.

### Step 4: Setting language preference

- You can select your preferred language settings so that this DVD Mini Hi-Fi System will automatically switch to the language for you whenever you load a disc. If the language selected is not available on the disc, the language set by default will be used instead. But the menu language of the DVD Mini Hi-Fi System cannot be changed once selected.

- 1 In disc mode, stop playback and press **SYSTEM MENU**.

- 2 Select **■** icon and press **▼**.
- 3 Press **◀ / ▶ / ▲ / ▼** keys on the remote control to select your preferred option.

- 1 In disc mode, stop playback and press **SYSTEM MENU**.
- 2 Select **■** icon and press **▼**.
- 3 Press **◀ / ▶ / ▲ / ▼** keys on the remote control to select your preferred option.  
→ Move to **■** and press **▶**.  
→ Move to one of the following and press **▶**.
  - Audio (discs soundtrack)
  - Subtitle (discs subtitles)
  - Disc Menu (on screen menu)
- 4 Press **▲ / ▼** to select a language and press **OK**.
- 5 Repeat steps **3~4** for other settings.

**To remove the menu**  
Press **SYSTEM MENU**.

## TROUBLESHOOTING

### Troubleshooting

#### **WARNING**

Under no circumstances should you try to repair the system yourself, as this will invalidate the warranty. Do not open the system as there is a risk of electric shock.

If a fault occurs, first check the points listed below before taking the system for repair. If you are unable to remedy a problem by following these hints, consult your dealer or Philips for help.

#### **Troubleshooting**

Problem	Solution
The language for the sound or subtitle cannot be changed when playing a DVD.	<ul style="list-style-type: none"> <li>✓ Multi-language sound or subtitle is not recorded on the DVD.</li> <li>✓ Changing the language for the sound or subtitle is prohibited on the DVD.</li> <li>✓ Make sure the component is connected correctly.</li> <li>✓ Press the correct function button for the input source.</li> <li>✓ Adjust the volume.</li> <li>✓ Disconnect the headphones.</li> <li>✓ Check that the speakers are connected correctly.</li> <li>✓ Check if the stripped speaker wire is clamped.</li> <li>✓ If the system is in pause, slow motion or fast forward/reverse mode, press <b>►   </b> to resume the normal play mode.</li> <li>✓ Make sure the MP3-CD was recorded within 32-256 kbps bit rate with sampling frequencies at 48 kHz, 44.1 kHz or 32 kHz.</li> <li>✓ If the signal is too weak, adjust the antenna or connect an external antenna for better reception.</li> <li>✓ Increase the distance between the System and your TV set or VCR.</li> <li>✓ Clean deck parts, see "Maintenance".</li> <li>✓ Use only NORMLA! tape.</li> <li>✓ Apply a piece of adhesive tape over the missing tab space.</li> <li>✓ Remove and reconnect the AC power plug and switch on the system again.</li> <li>✓ Check the speaker connections and location.</li> <li>✓ Point the remote control at the remote control sensor of the unit.</li> <li>✓ Reduce the distance to the player.</li> <li>✓ Remove any possible obstacles.</li> <li>✓ Replace the batteries with new ones.</li> <li>✓ Check that the batteries are loaded correctly.</li> </ul>

The timer is not working	<ul style="list-style-type: none"> <li>✓ The system does not respond when the buttons are pressed.</li> </ul>

## System, Region code, Tuner, etc. setting procedure

### 1) System Reset

- Press "SYSTEM" button on R/C. TV show "SETUP"
- Select the menu using the "▼" and "►" button on R/C
- Go feature setup page to do system reset

### 2) Region Code Change

After replacement / repair of the MPEG board, the customer setting and the region code may lost. Changing the Region code will put the player back in the state which it has left the factory.

#### Region Code

1	USA
2	EU
3	AP
4	Australia, NZ, Latam
5	RUSSIA, INDIA
6	CHINA

#### TV System

1	NTSC
2	PAL
3	AUTO

#### Menu/ Audio Subtitle (AS) Language

1	English
2	English
3	English
4	English

#### AFS

001	LX3000D/LX3500D /MRD200
002	MX3600D/MX3800
003	LX3700D/LX3750W
005	MRD210
006	MX3660D
008	FWD573/FWD792/FWD798

#### oem derivative

08

- region code = 1 digit
- tv system = 1 digit
- "as/menu lang" = 1 digit
- "AFS" = "architechture Feature Set" = 3 digits

This field is used to define the architecture / features sets for each product.

- "oem derivative" = 2 digit

This field is use to define the OEM set. This will affect the background display.

### 3) Region code change timer reset

Press below key to reset the timer :

- In DISC source, stop mode and no disc in tray.
- Press R/C "Play -159-PLAY" to reset timer to 25

### 4) Tuner area change

- Press the "OPEN/CLOSE" button to open the set's door
- Press "1" "5" "9" button by using R/C.
- TV Show "TUNER AREA"
- Select the tuner area you want by using the "▼" and "►" button on R/C, then press "OK" to confirm. TV show " TUNER AREA CHANGED"

If you didn't press it in five seconds, the system will remain original status.

AREA	BAND	FREQUENCY (Hz)	STEP(Hz)
A/P (/98)	FM	87.5M	108M
	MW	531K	1602K
		530K	1710K
			10K

Note :-

Please refer to the above different tuner area.

### CAUTION !

This information is confidential and may not be distributed. Only a qualified service person should reprogram the Region Code.

### 5. Video Out Change

- Press "SYSTEM" on R/C button
- Select the menu using the "▼" and "►" button on R/C
- Go picture setup page select Video out item.

### 6. Password Change

- Press "SYSTEM" on R/C button
  - Select the menu using the "▼" and "►" button on R/C
  - Go feature setup page select "PASSWORD". TV show "ENTER CODE". Press 4 times of "STOP" button on R/C.
  - Select "PARENTAL" "8 ADULT" on TV.
  - Enter PASSWORD to "1234".
- \* "1234" is a default password supplied.

### 7. Checking on the Software version

- Open the CD door.
- Press "123" and "OK" on the remote control.
- TV will show the version on screen.

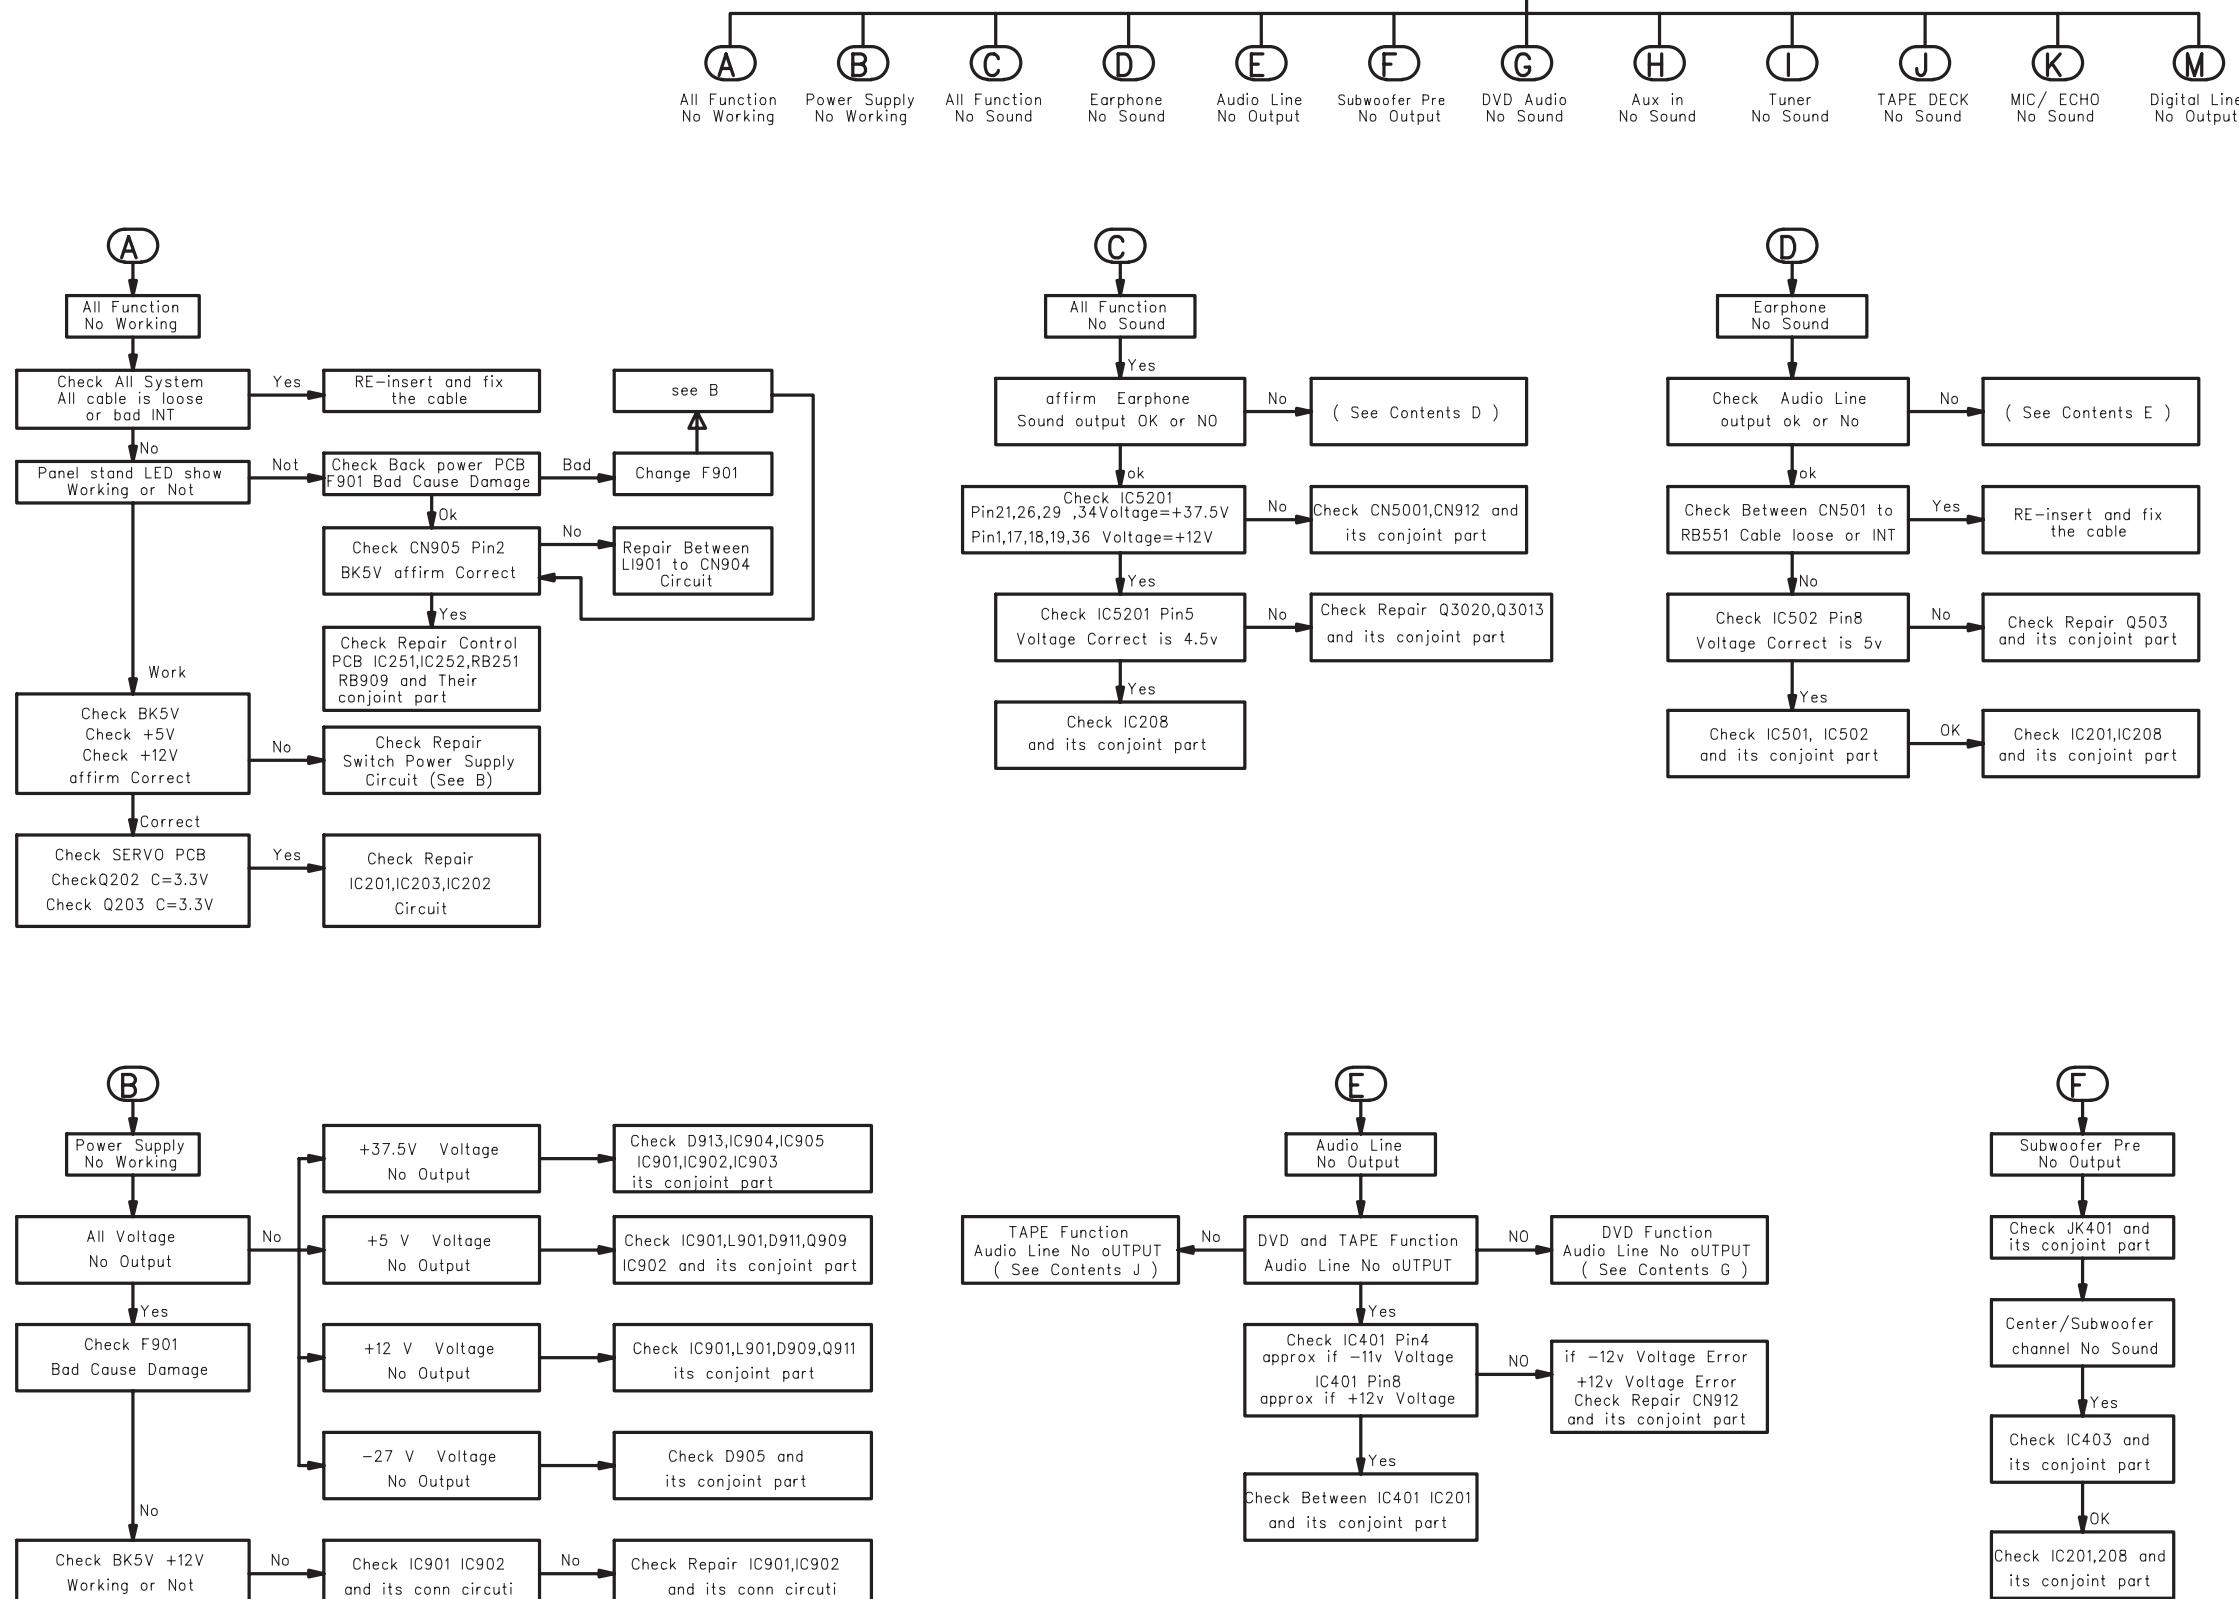

### 8. Upgrading new software

- Open the door, then insert the CD-R program disc.
  - Close the door.
  - TV will show:-
- "disc loading"
  - "bank30.rom"
  - "writing" about 6 seconds.
  - "Done"

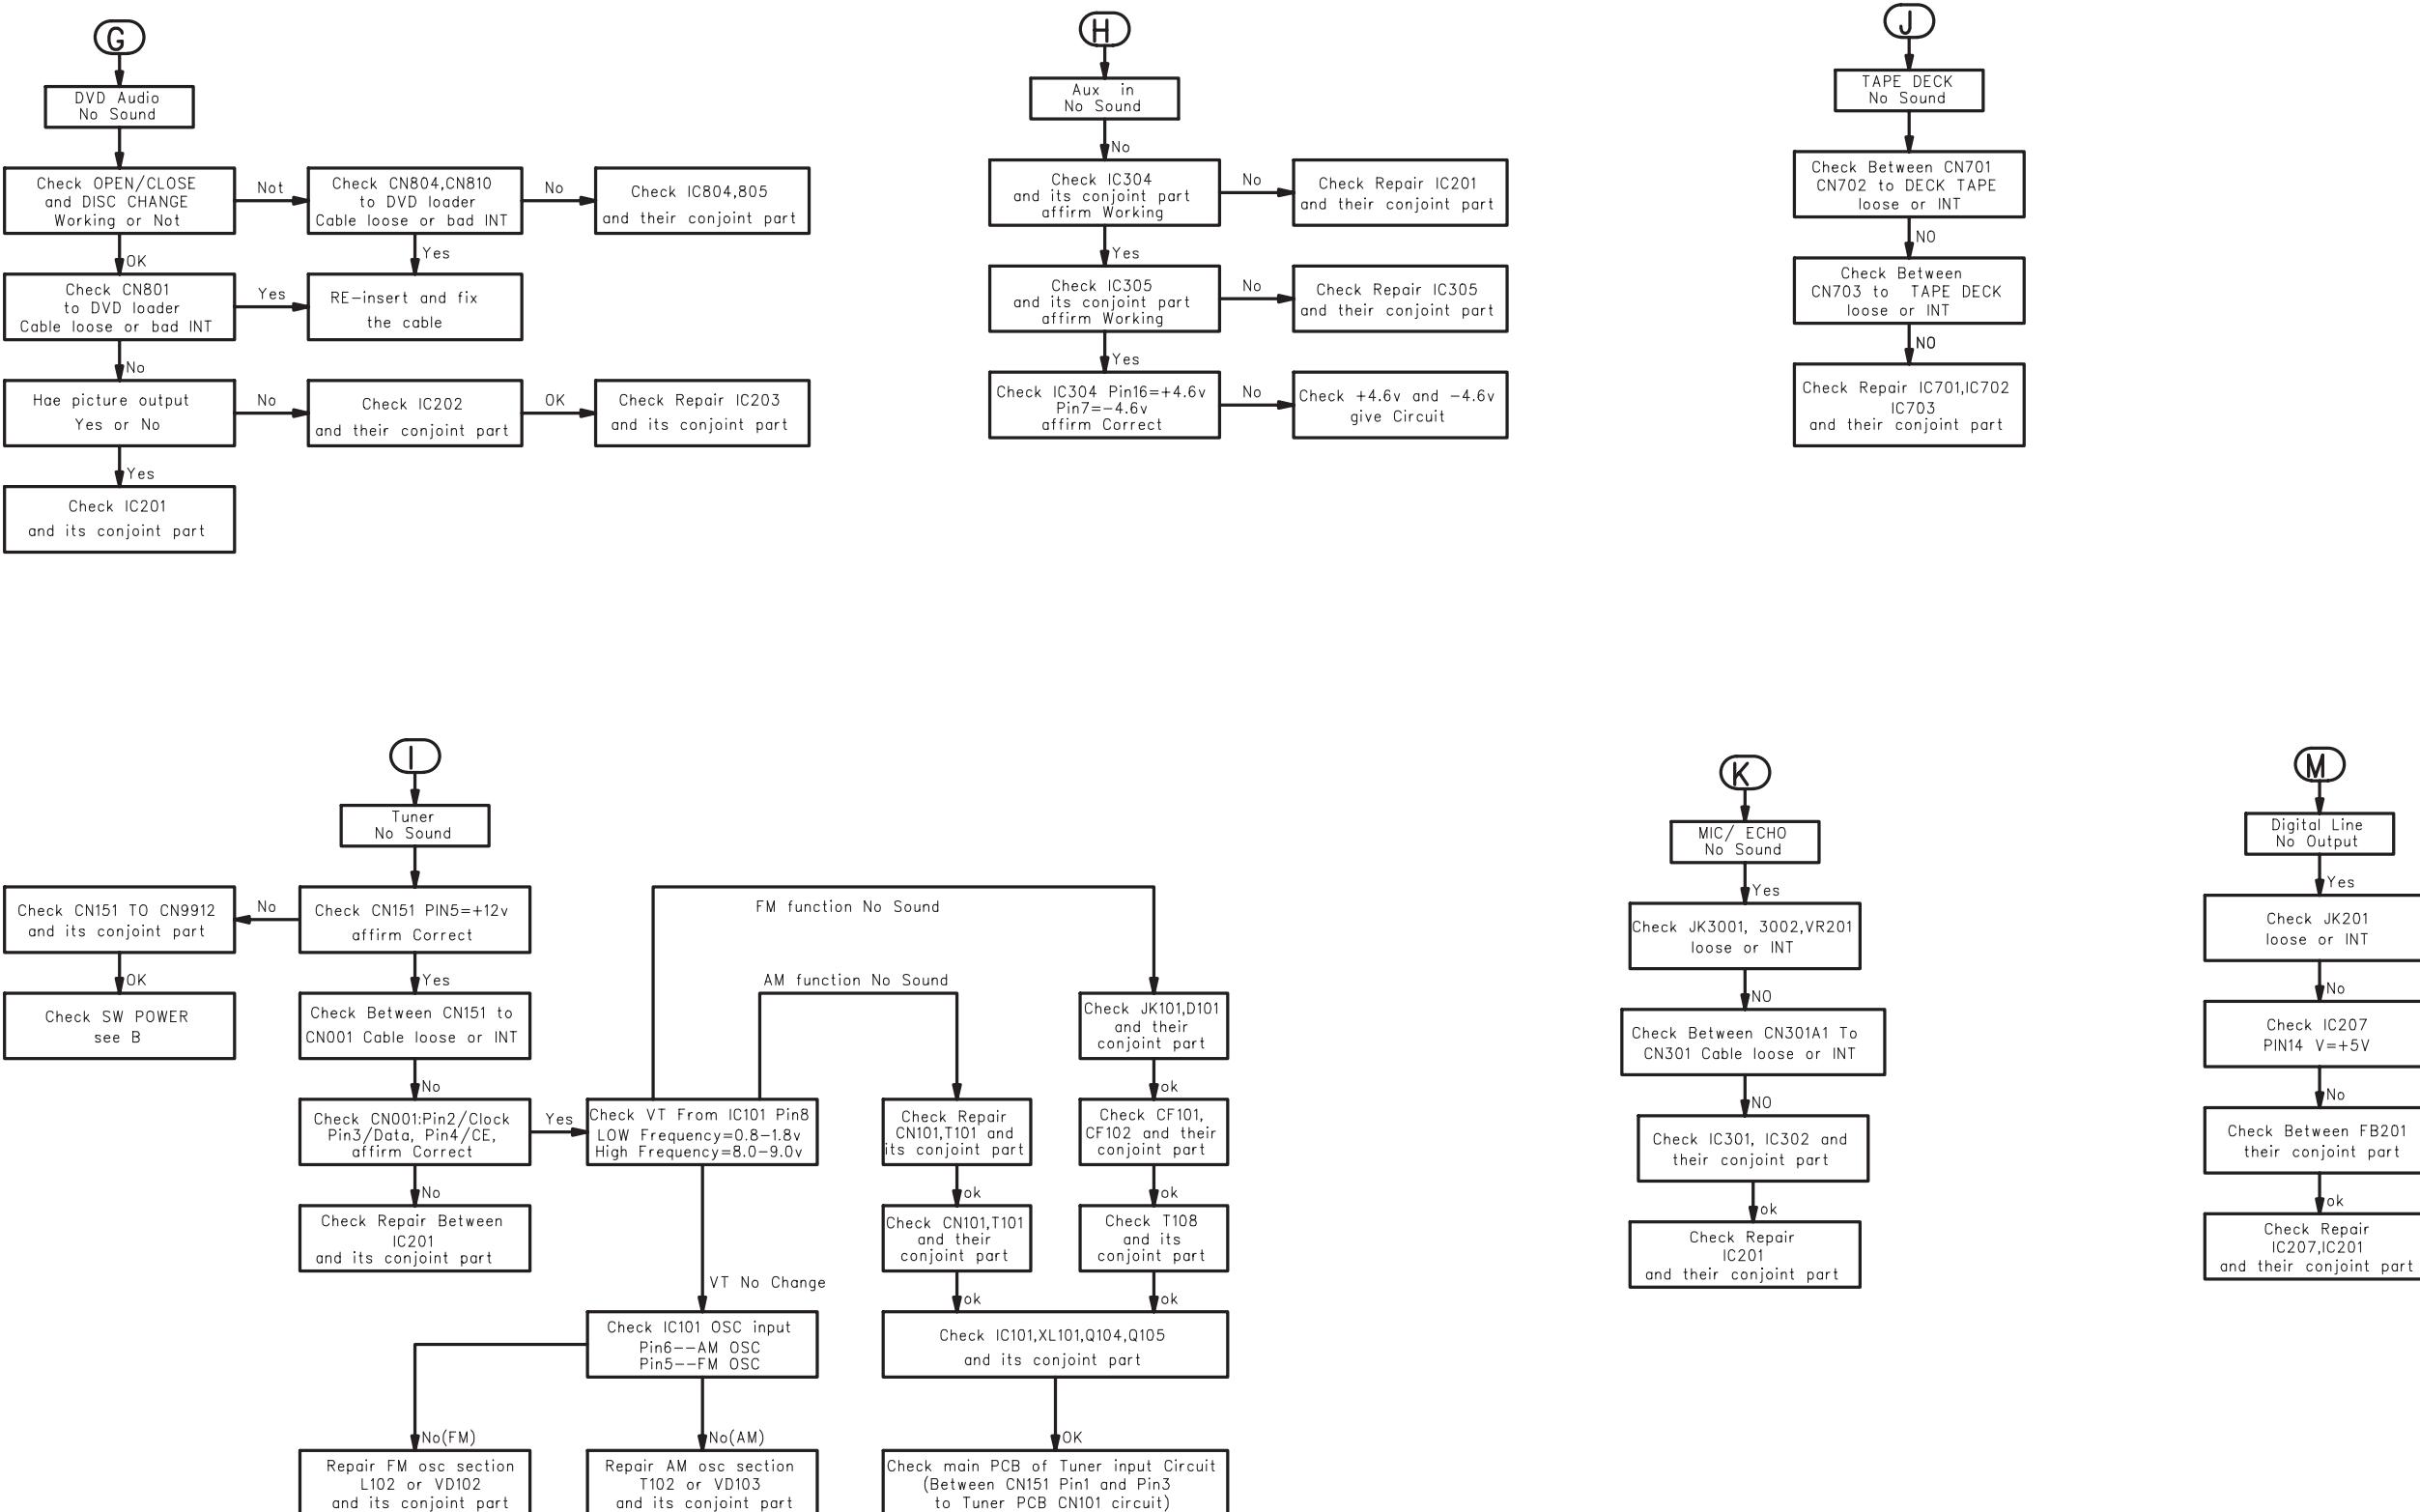

\* The latest upgraded is in version VER\*\*\*\*.

## REPAIR INSTRUCTIONS (1 of 2)

MAIN UNIT REPAIR CHART

## REPAIR INSTRUCTIONS (2 of 2)

## DISMANTLING INSTRUCTIONS

### Dismantling the DVD Module

- 1) Loosen the 4 screws at top cover , 2 screws at slide Cover and 4 screws at back panel as Figure 1 & 2.

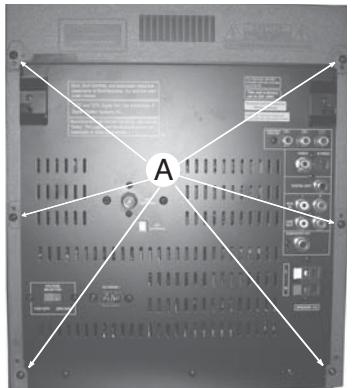

Figure 1

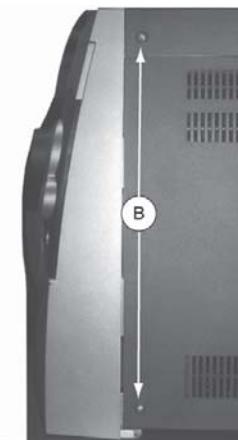

Figure 2

- 2) Push the gear slowly towards the front as shown in figure 3 until the CDC tray starts to move out of the Front Cabinet. The CDC tray is now disengaged and can be pulled out completely.

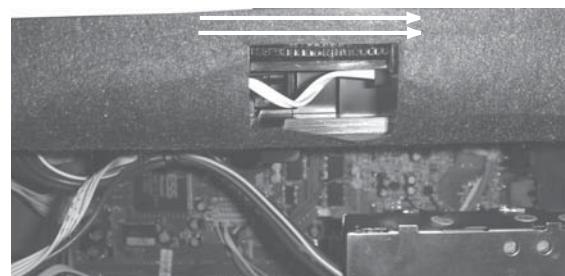

Figure 3

- 3) Remove the Cover Tray as shown in figure 4.

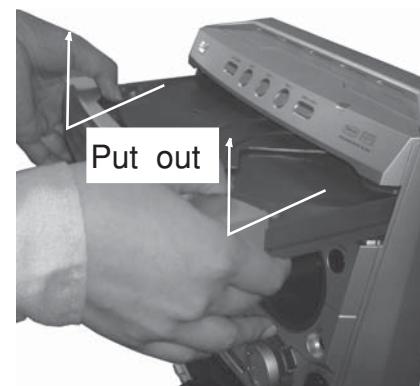

Figure 4

- 4) Loosen the 2 screws at front of DVD loader as Figure 5.

Figure 5

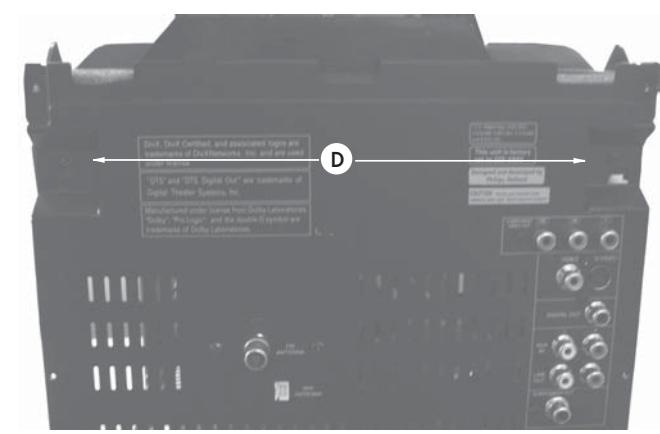

Figure 6

### Dismantling of the Cover Front Display

- 1) Remove the Volume knobs as stated in Dismantling the Cover Front Display in Figure 7.
- 2) Loosen 2 screws at the bottom of front panel.

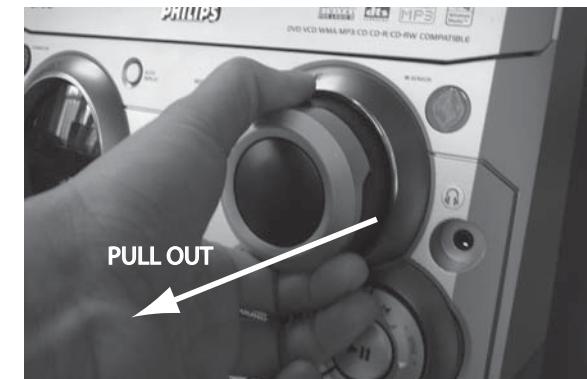

Figure 7

### Dismantling the Main board

- 1) Release 7 screws 'E' to free the Main board from the back panel assembly as shown in Figure 8.
- 2) Loosen 1 screw 'F' at the side of the set as shown in Figure 9.
- 3) Release 2 screws 'G' on the heat sink as shown in Figure 10.

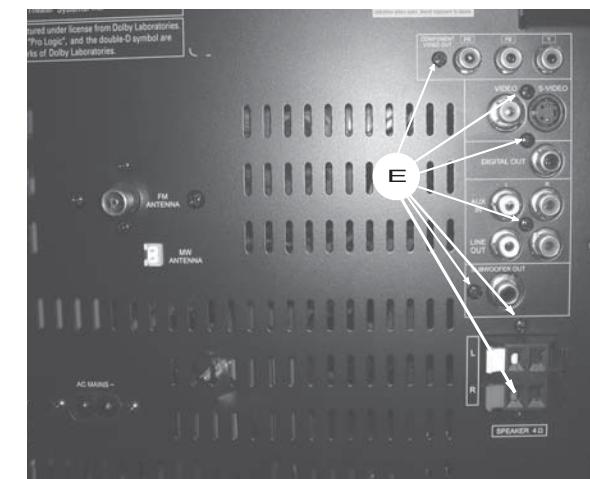

Figure 8

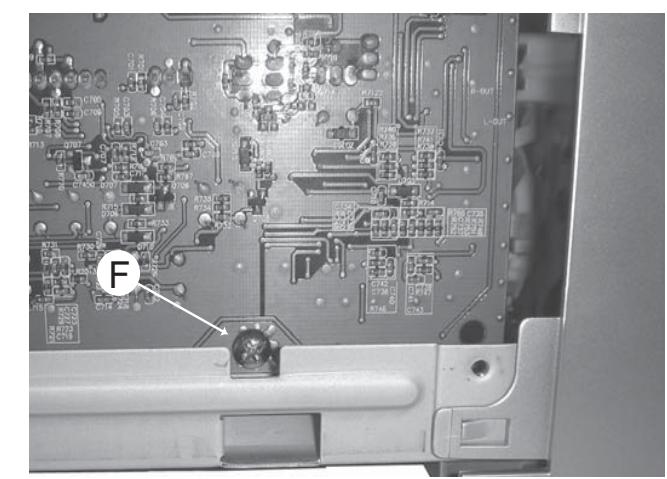

Figure 9

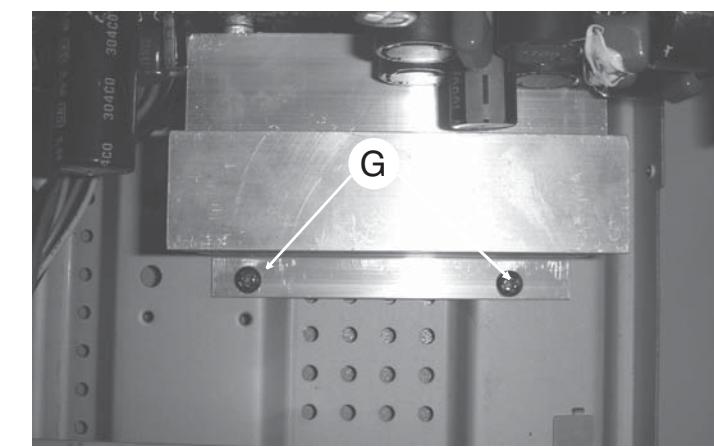

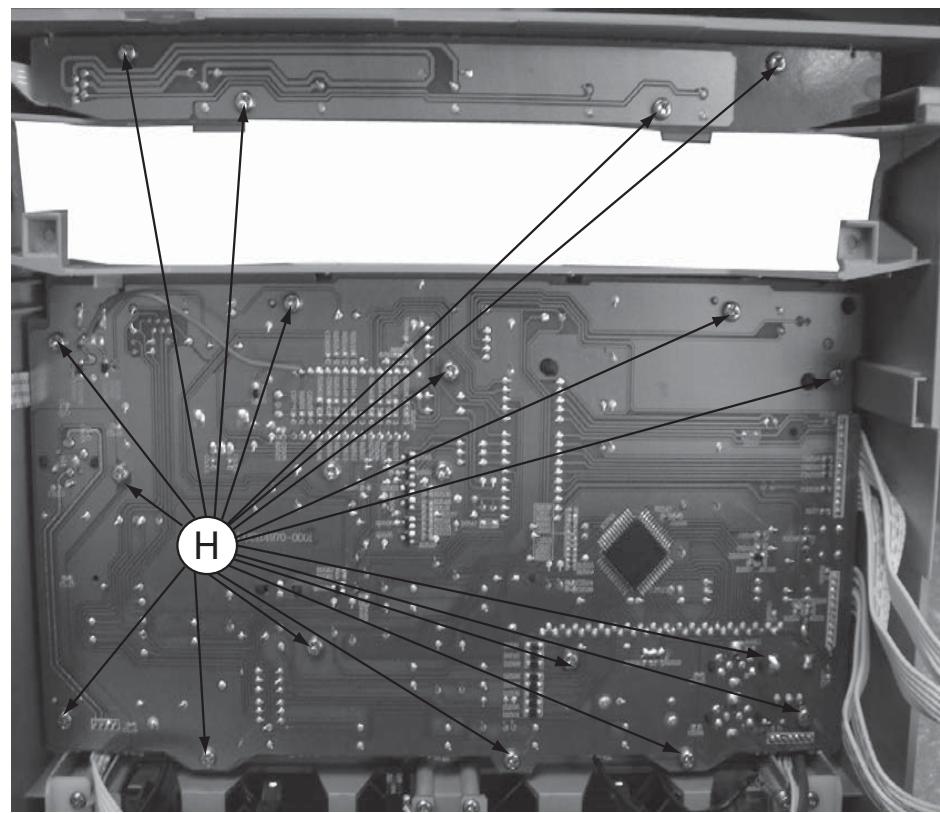

Figure 10

**Dismantling of the Control Board & Cassette Module**

- 1) Loosen 19 screws 'H' to remove the control board figure 11.

- 2) Loosen 4 screws 'I' to remove the Cassette Module figure 12.

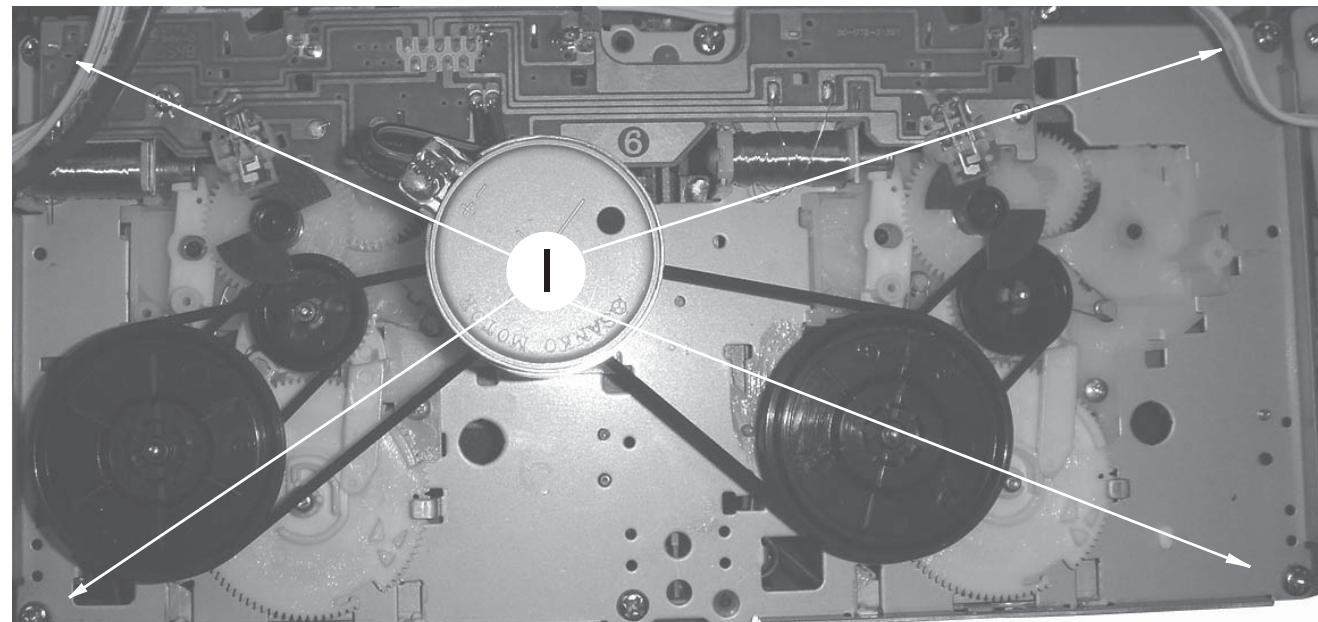

Figure 12

**Dismantling of the Power Board**

- 1) Loosen 4 screws 'J' to remove the Power Board figure 13.

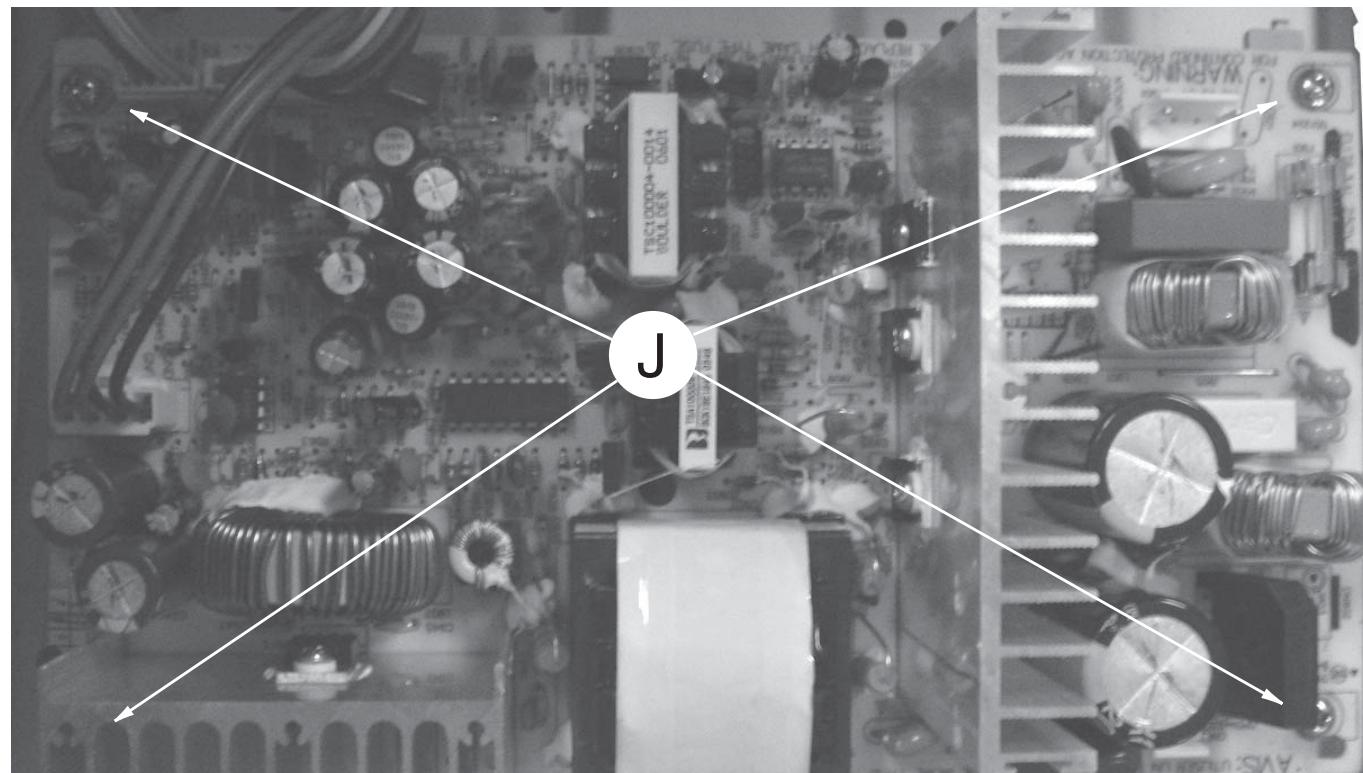

Figure 13

**ELECTRICAL PARTS LIST - MAIN BOARD**

Note: Only these parts mentioned in the list are  
normal service parts.

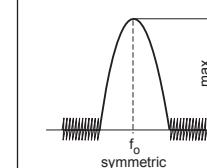

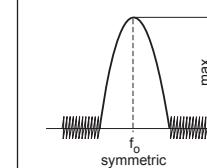

# TUNER BOARD

## TABLE OF CONTENTS

Tuner Adjustment Table .....	7-1
Circuit Diagram .....	7-2
PCB Layout .....	7-3

**Remark:** The module is not intend to be repaired on component level. Circuit Diagrams and Printed Board drawings are published for orientation only. The whole Tuner Board Ass'y can be ordered with 12nc: 9940 000 05366 for /37/55/98.

## TUNER ADJUSTMENT TABLE

Waverange	Input frequency	Input	Tuned to	Adjust	Output	Scope/Voltmeter
<b>VARICAP ALIGNMENT</b>						
<b>FM</b> 87.5 - 108MHz (50kHz grid)			108MHz	check		7.5V ±1V
			87.5MHz	check		1.4V ±0.2V
			1602KHz	check		7.2V ±1V
			531KHz	T005		1.1V ±0.2V
<b>MW</b> 531-1602kHz (9kHz grid) 530-1700kHz (10kHz grid) ( 98/ 55/ 51 )			1700KHz	check		7.2V ±1V
			531KHz	T005		1.1V ±0.2V
<b>FM - RF</b>						
<b>FM</b>	108MHz		106MHz	VC001	MAX	MAX
	87.5MHz	mod=1kHz $\Delta f = \pm 22.5\text{kHz}$	90.1MHz	L001		
<b>AM IF</b>						
<b>AM</b>	450kHz	$\Delta f = \pm 15\text{kHz}$ $V_{RF} = 3\text{mV}$	IC001 R220 24 100nF	T001 T002	MAX	
<b>AM AFC</b> <b>MW</b>	Connect pin 6 of IC001 (AM Osc.) with short wire to ground (pin 4)		$\Delta V = m\text{V}$	T003		
<b>AM RF</b> <sup>3)</sup>						
<b>MW</b>	1404kHz		1404kHz	VC001	MAX	
	612kHz		612kHz	T006		
	1000kHz		1000kHz	VC001		
	600kHz		600kHz	T006		

Use Service Testprogram. By selecting the TUNER TEST test frequencies will be stored as preset frequencies automatically.

1) If sensitivity of frequency counter is too low adjust to max. channel separation  
(input signal: stereo left 90% + 9%, adjust output on right channel to minimum)

2) RC network serves for damping the IF-filter while adjusting the other one.

3) For AM RF adjustments the original frame antenna has to be used!
