SERVICE AIDS

Service Tools:

Universal Torx driver holder	4822 395 91019
Torx bit T10 150mm	4822 395 50456
Torx driver set T6-T20	4822 395 50145
Torx driver T10 extended	4822 395 50423

Compact Disc:

SBC426/426A Test disc 5 + 5A	4822 397 30096
SBC442 Audio Burn-in test disc 1kHz	4822 397 30155
SBC429 Audio Signals disc	4822 397 30184
Dolby Pro-logic Test Disc	4822 395 10216

WARNING

All ICs and many other semi-conductors are susceptible to electrostatic discharges (ESD). Careless handling during repair can reduce life drastically.

When repairing, make sure that you are connected with the same potential as the mass of the set via a wrist wrap with resistance. Keep components and tools also at this potential.

ESD

Safety regulations require that the set be restored to its original condition and that parts which are identical with those specified, be used

Safety components are marked by the symbol Δ .

INFORMATION ABOUT LEAD-FREE SOLDERING

Philips CE is producing lead-free sets from 1.1.2005 onwards.

IDENTIFICATION:

Regardless of special logo (not always indicated) one must treat all sets from 1 Jan 2005 onwards, according next rules:

- On our website www.atyourservice.ce.Philips.com you find more information to:
 - * BGA-de-/soldering (+ baking instructions)
 - * Heating-profiles of BGAs and other ICs used in Philips-sets
 - * Lead free

You will find this and more technical information within the "magazine", chapter "workshop news".

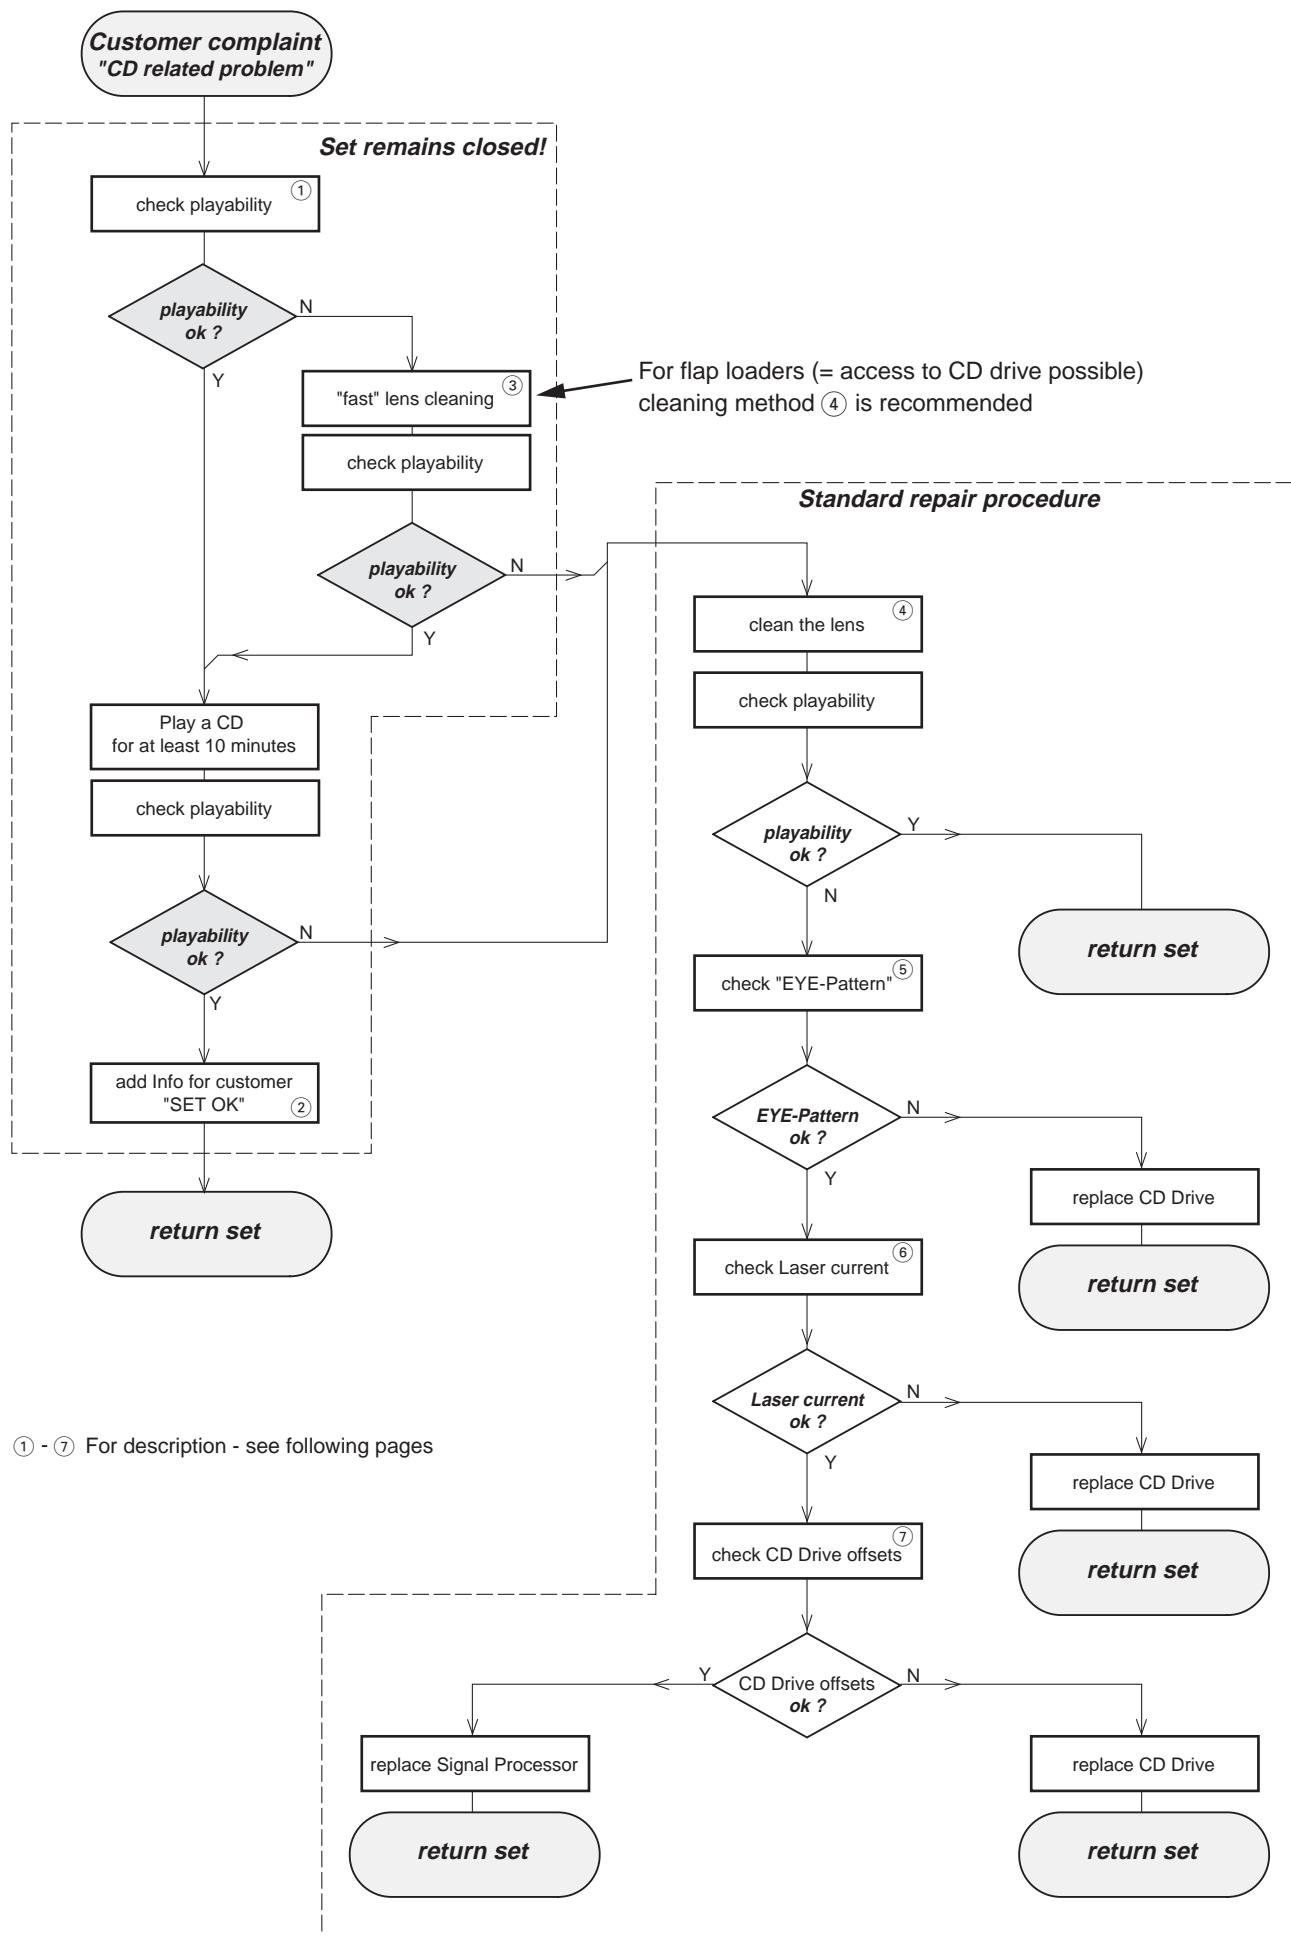

For additional questions please contact your local repair-helpdesk.

SERVICE INSTRUCTION

Safety regulations require that after a repair, the set must be returned in its original condition. Pay in particular attention to the following points:

- Route the wire trees correctly and fix them with the mounted cable clamps.
- Check the insulation of the AC Power lead for external damage.
- Check the strain relief of the AC Power cord for proper function.
- Check the electrical DC resistance between the AC Power Plug and the secondary side (only for sets which have a AC Power isolated power supply):
- 1. Unplug the AC Power cord and connect a wire between the two pins of the AC Power plug.
- 2. Set the AC Power switch to the "on" position (keep the AC Power cord unplugged!).
- 3. Measure the resistance value between the pins of the AC Power plug and the metal shielding of the tuner or the aerial connection on the set. The reading should be larger than 4.5 Mohm (For U.S. it should be between 4.2 Mohm and 12 Mohm).
- 4. Switch "off" the set, and remove the wire between the two pins of the AC Power plug.
- Check the cabinet for defects, to avoid touching of any inner parts by the customer.

CD PLAYABILITY CHECK

① - ⑦ For description - see following pages

CD PLAYABILITY CHECK

(1)

PLAYABILITY CHECK

For sets which are compatible with **CD-RW** discs
use CD-RW Printed Audio Disc 7104 099 96611
TR 3 (Fingerprint)
TR 8 (600 μ Black dot) **maximum at 01:00**

- playback of these two tracks without audible disturbance
playing time for: Fingerprint \geq 10seconds
Black dot from 00:50 to 01:10
- jump forward/backward (search) within a reasonable time

For all other sets
use CD-DA SBC 444A 4822 397 30245
TR 14 (600 μ Black dot) **maximum at 01:15**
TR 19 (Fingerprint)
TR 10 (1000 μ wedge)

- playback of all these tracks without audible disturbance
playing time for: 1000 μ wedge \geq 10seconds
Fingerprint \geq 10seconds
Black dot from 01:05 to 01:25
- jump forward/backward (search) within a reasonable time

(4)

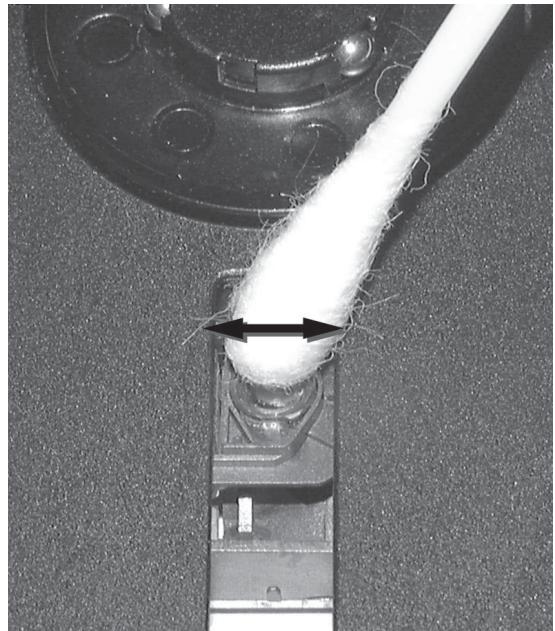

LIQUID LENS CLEANING

Before touching the lens it is advised to clean the surface of the lens by blowing clean air over it.
This to avoid that little particles make scratches on the lens.

Because the material of the lens is synthetic and coated with a special anti-reflectivity layer, cleaning must be done with a non-aggressive cleaning fluid. It is advised to use "Cleaning Solvent B4-No2", available with codenumber 4822 389 10026.

The actuator is a very precise mechanical component and may not be damaged in order to guarantee its full function. Clean the lens gently (don't press too hard) with a soft and clean cotton bud moistened with the special lens cleaner.

The direction of cleaning must be in the way as indicated in the picture below.

(2)

CUSTOMER INFORMATION

It is proposed to add an addendum sheet to the set which informs the customer that the set has been checked carefully - but no fault was found.
The problem was obviously caused by a scratched, dirty or copy-protected CD. In case problems remain, the customer is requested to contact the workshop directly.
The lens cleaning (method ③) should be mentioned in the addendum sheet.

The final wording in national language as well as the printing is under responsibility of the Regional Service Organizations.

(3)

FAST LENS CLEANING (*dry brush*)

Use lens cleaning CD
SBC AC300 9082 100 00043

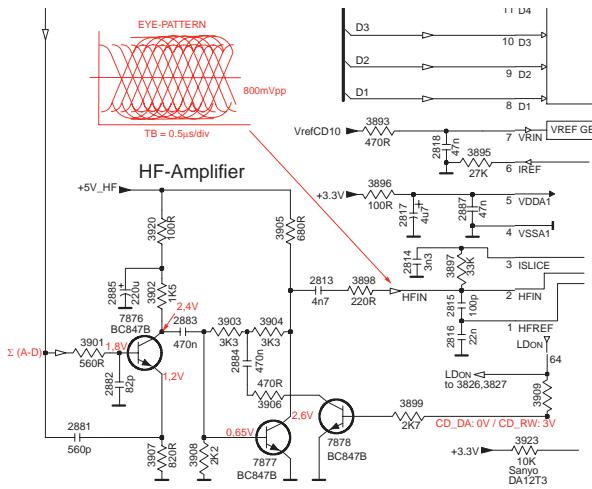

Insert the lens cleaning CD, press PLAY and follow the voice guide's instructions on the CD.

CD PLAYABILITY CHECK

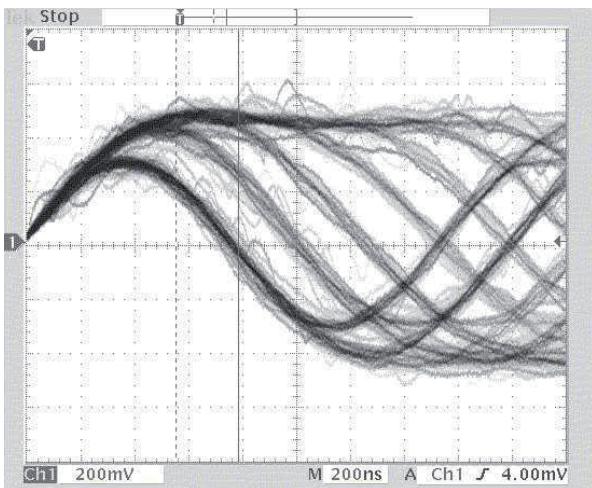

5

EYE-PATTERN SIGNAL – JITTER MEASUREMENT

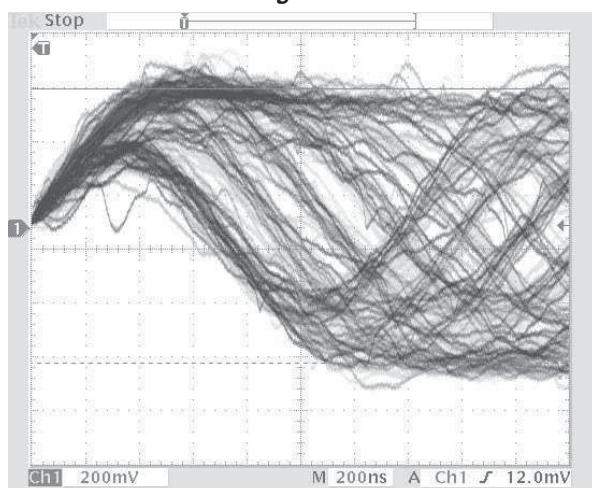

Measure the signal on the input of the Signal processor using an **analog** oscilloscope. Please find the exact measuring point in your Service Manual.

See below examples of the signal. Amplitude should read at least 700mVpp using SBC444A.

good

had

If the oscilloscope shows a signal like the 'bad' one, and/or the amplitude decreases within 1 minute - the CD drive has to be replaced.

6

CD DRIVE – LASER CURRENT MEASUREMENT

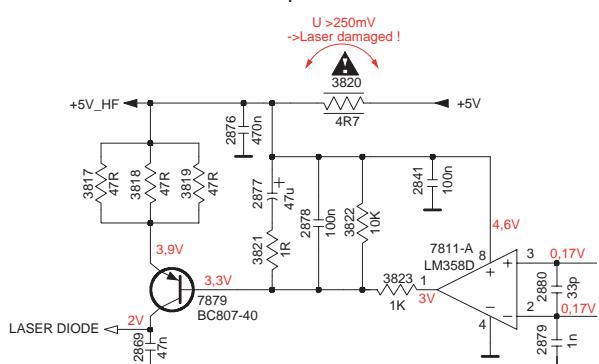

The laser current can be measured as a voltage drop on a resistor. The resistor is marked in every Service Manual. The value depends on the type of CD drive.

	typical value	most probable defect
VAMxxxx	: 150-230mV	\geq 350mV
MCDxx	: 170-230mV	\geq 300mV
DA1x	: 210-250mV	\geq 350mV
DA2x	: 175-200mV	\geq 250mV

Use SBC444A (CD-DA) for measurement.

Use SBC444A (CD-DA) for measurement.

Laser power control

7

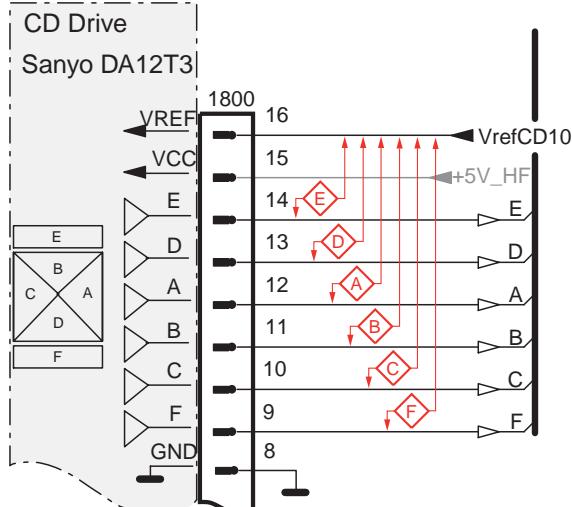

CD DRIVE – OFFSET MEASUREMENT

The photodiodes of the CD-drive may have an offset. These offsets have to be compensated by the signal processor. High offsets can lead to poor playability of some CDs (skipping tracks).

To measure the offset values, start the **Service Test Program** - section “Focus Test” without a CD.

The offsets can be measured with a DC Millivoltmeter directly on the connector (see drawing below). Pin numbering varies from drive to drive.

The values from diode A-D should read $0\pm10\text{mV}$.
Diodes E and F are less critical.

If one of the offsets is higher than $\pm 10\text{mV}$ the CD drive has to be replaced. Otherwise replace the Signal Processor.

TECHNICAL SPECIFICATIONS

AMPLIFIER

Output power	140 W RMS
Signal-to-noise ratio	≥ 60 dBA
Frequency response	150 – 20000 Hz, ± 3 dB
Input sensitivity AUX	0.5 V (max. 2 V)
Impedance loudspeakers	6 Ω
Impedance headphones	32 Ω -1000 Ω

DVD PLAYER

Laser Type	Semiconductor
Disc Diameter	12cm / 8cm
Video Decoding	MPEG-2 / MPEG-1
Video DAC	10 Bits
Signal System	PAL / NTSC
Video Format	4:3 / 16:9
Video S/N.....	56 dB (minimum)
Composite Video Output	1.0 Vp-p, 75 Ω
Audio DAC	24 Bits / 96 kHz
Frequency Response	4 Hz - 20 kHz (44.1kHz) 4 Hz - 22 kHz (48kHz) 4 Hz - 44 kHz (96kHz)
Digital Output SPDIF (Sony Philips digital interface) Coaxial
Number of programmable tracks	20
Signal-to-noise ratio	≥ 60 dBA
Channel separation	≥ 40 dB (1 kHz)
Total harmonic distortion	< 0.1% (1 kHz)

USB PLAYER

USB	12Mb/s,V1.1
..... support MP3 and WMA files	
Number of albums/folders	maximum 99
Number of tracks/titles	maximum 999

TUNER

FM wave range	87.5 – 108 MHz
Sensitivity at 75 Ω	
– mono, 26 dB signal-to-noise ratio	2.8 µV
– stereo, 46 dB signal-to-noise ratio	61.4 µV
Tuning grid	9/10 kHz
Selectivity	≥ 15 dB
Total harmonic distortion.....	≤ 5%
Frequency response	40 – 5000 Hz (-6 dB)
Signal-to-noise-ratio	≥ 58 dBA

SPEAKERS

Front Speakers

Impedance	6 Ω
Sensitivity	80 ± 4dB
Frequency response	150Hz-20kHz
Dimensions	171 (W) × 297 (H) × 89 (D) mm
Weight	1.265 kg/each

Subwoofer

Subwoofer (not magnetically shielded design)	8"
..... 8"	
Impedance	8 Ω
Output power	80 W
Dimensions (w × h × d)	220 mm × 350 mm × 357 mm
Weight	9.66 kg

GENERAL INFORMATION

AC Power	110 – 127 / 220 – 240V; 50/60 Hz Switchable
Dimensions (w × h × d) ..	450 × 335 × 115 (mm)
Weight (with/without speakers)	5.63 / 3.1 kg
Standby power consumption	≤ 4W

Specifications and external appearance are subject to change without notice.

SERVICE TOOLS

Audio signal disc SBC 429.....	4822 397 30184
Playability test disc SBC 444.....	4822 397 30245
Test disc 5 (disc without errors) +	
Test disc 5A (disc with dropout errors, black spots and fingerprints)	
..... SBC 426/426A.....	4822 397 30096
Burn in test disc (65 min. 1kHz signal at -30 dB level without “pause”)	4822 397 30155

Connections

Connections

3 - 1

CONNECTION AND CONTROLS

Step 1: Connecting speakers

- ① Place the main set with the front side facing down on a flat and firm surface.
- ② Connect the two front speaker cables to the **SPEAKERS (6 Ω)** terminals; right speaker to "R" and left speaker to "L".
- ③ Remove the detachable cover at the left bottom of the main set to expose the **CONNECT TO SUBWOOFER** terminal.
- ④ Connect the **CONNECT TO SUBWOOFER** terminal of the main set to the **CONNECT TO MAIN SET** terminal of the subwoofer with the supplied 15-pin D-Sub cable by matching the pins. Fix the two screws on the connectors to ensure firm connection.

To avoid overheating of the system, a safety circuit has been built in. Therefore, your system may switch to Standby mode automatically under extreme conditions. If this happens, let the system cool down before reusing it (not available for all versions).

Note:

- Before installation is finished, it is not recommended to remove the protective plastic film attached to the surface of the front panel to avoid any scratch caused during installation.

IMPORTANT!
- The type plate is located at the rear of the system.
- The voltage selector located at the rear of this system is preset at 220V-240V from the factory. For countries that operate at 110V-127V, please adjust to 110V-127V before you switch on the system.

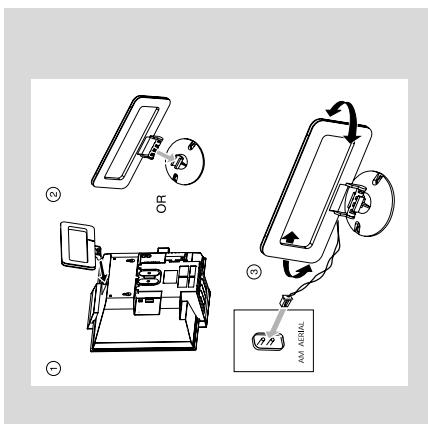

- Before connecting the AC power cord on the rear of the subwoofer to the wall outlet, ensure that all other connections have been made.
- Never make or change any connections with the power switched on.
- High voltage! Do not open. You run the risk of getting an electric shock.
- The machine does not contain any user-serviceable parts.
- Modification of the product could result in hazardous radiation of EMC or other unsafe operation.

Step 2: Antennas Connection

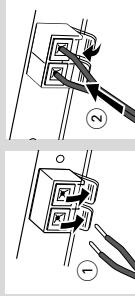

Connect the supplied MW loop antenna and FM antenna to the respective terminals. Adjust the position of the antenna for optimal reception.

MW Antenna

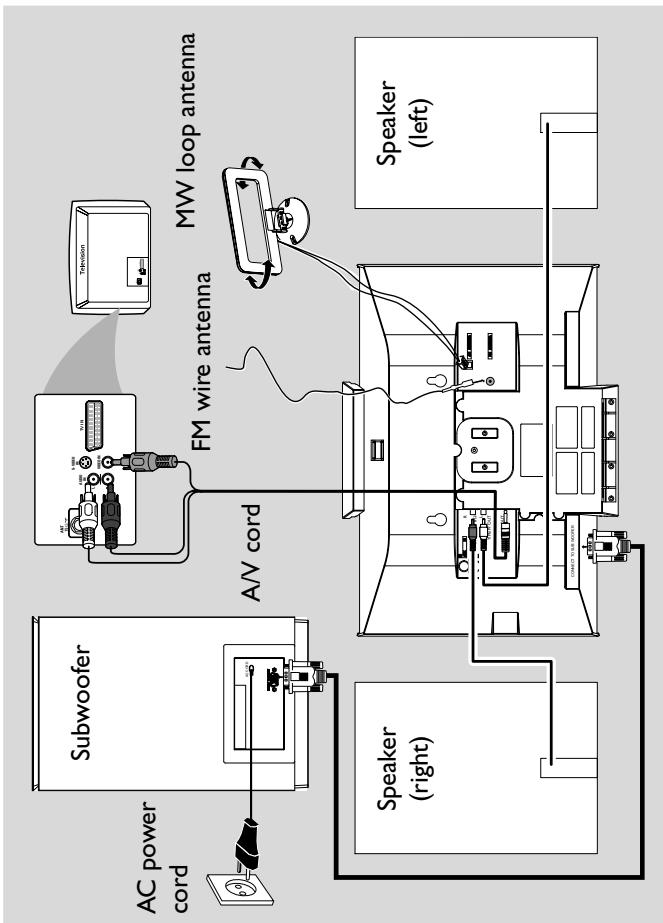

Position the antenna as far as possible from a TV, VCR or other radiation source.

FM Antenna

- For better FM stereo reception, connect an outdoor FM antenna to the FM ANTENNA terminal.

Connections

Connections

CONNECTION AND CONTROLS

Step 3: Connecting TV

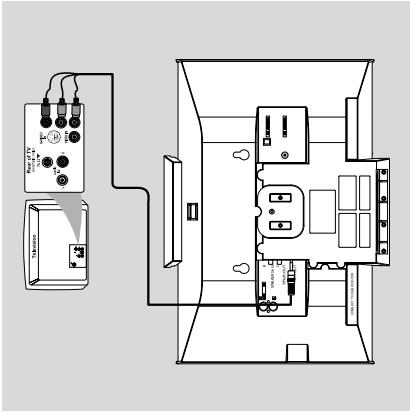

IMPORTANT!

- You only need to make one video connection from the following options, depending on the capabilities of your TV.
- Connect the DVD system directly to the TV.

Using Y Pb Pr OUT jack

IMPORTANT!

- The progressive scan video quality is only possible when using Y Pb Pr, and a progressive scan TV is required.

①

- 1 Use component video cables (red/blue/green) to connect the **COMPONENT VIDEO OUTPUT (Pb/Cr Pb/Cb Y)** jack to the corresponding Component video input jacks (or labeled as Y Pb/Cb Pr/Cr or YUV) on the TV.
- 2 If you are using a Progressive Scan TV (TV must indicate Progressive Scan or ProScan capability), to activate TV Progressive Scan, please refer to your TV user manual. For DVD system Progressive Scan function, see "Preparations-Setting up Progressive Scan feature".

Note:

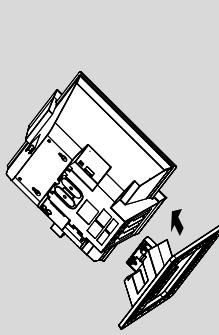

- If your TV does not support Progressive Scan, you will not be able to view the picture.

Step 4: Placing the set and speakers

Mounting instructions.

- With the supplied detachable stands and wall mounting kit, you can either place the main set and speakers on desktop or mount them onto wall. Desktop installation is taken for example here. For how to mount the system onto wall, please refer to **Appendix** and the attached **Wall**.

① Align the side marked **PRESS▼** of the larger-size stand with the slots at the bottom of the main set.

- ② Align the side marked **PRESS▼** of the larger-size stand with the slots at the bottom of the main set.

- 2 Push the stand down into the slots until you hear a click.
- 3 Attach the two smaller-size stands to the speakers in the same way.
- 4 Place the main set and speakers upright on the desktop with the support of the stands.

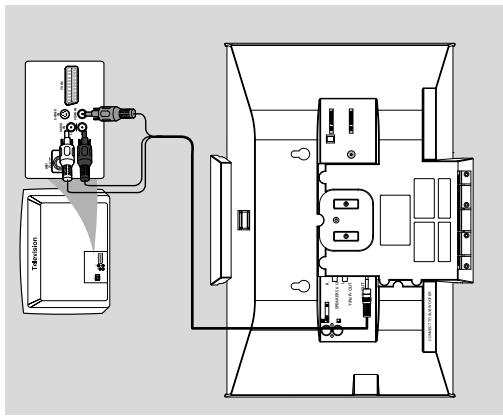

Note:

- To remove the stand from the main set or either speaker, while pressing down **PRESS▼**, pull the stand out from the slots.

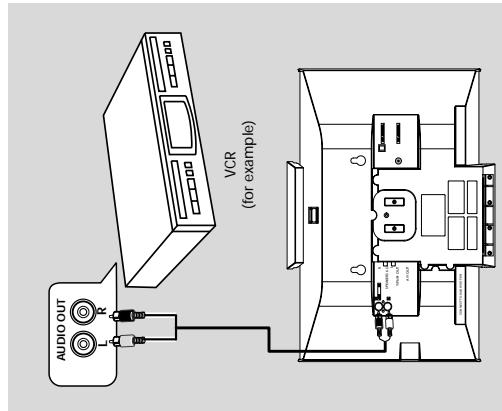

Step 5: Connecting the power cord

- After everything is connected properly, plug in the AC power cord on the rear of the subwoofer to the power outlet.**
- Never make or change any connection with the power switched on.

Using AV OUT jack

- 1 Connect the end of the supplied AV cord with only one connector to the **AV OUT** jack of the DVD system.
- 2 For the other end, connect the video output connector (yellow) to the video input jack (or labeled as A/V In, CVBS, Composite or Baseband) on the TV. To hear the sound of this DVD system through your TV, connect the audio connectors (white/ red) to the audio input jacks on the TV.

Optional: Connecting additional equipment

Listening to the playback of a non-USB device

- Connect the system's **AUX IN (R/L)** jacks to the **AUDIO OUT** jacks on the other audio/visual device (such as a VCR, Laser Disc player or cassette deck) (cable not supplied).
- Before starting operation, press **SOURCE** on the front panel to select AUX or press **AUX** on the remote control in order to activate the input source.

CONNECTION AND CONTROLS

Controls

Connecting a USB device or memory card

IMPORTANT!

- Before connecting the **USB** plug, first slide open the protective cover on the socket.

By connecting a USB mass storage device (including USB flash memory, USB flash players or memory cards) to the Hi-Fi system, you can enjoy the device's stored music through the powerful speakers of Hi-Fi system.

Insert the USB device's USB plug into the socket on the set.

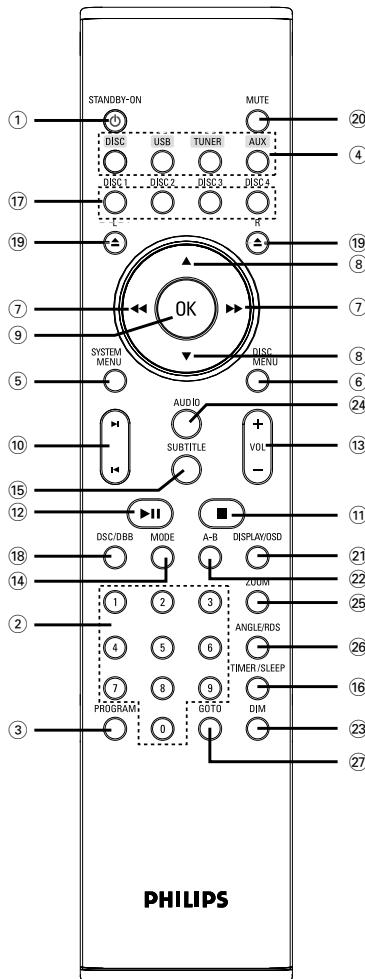

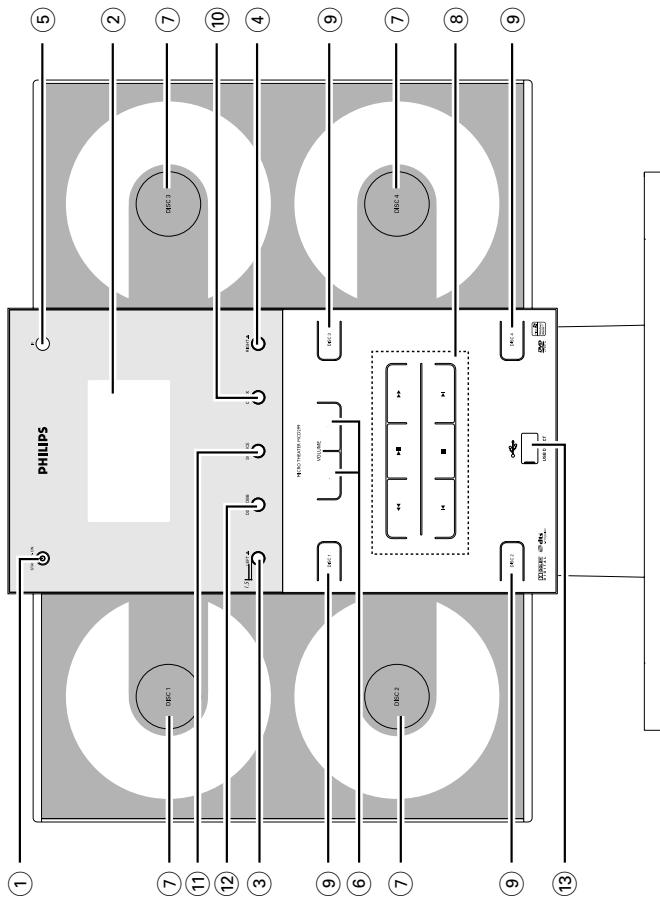

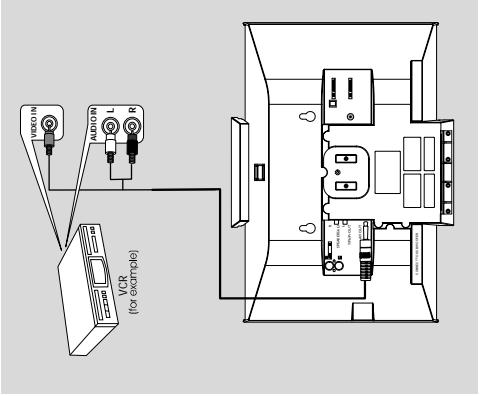

for the devices with **USB cables**:

- 1 Insert one plug of the USB cable (not supplied) to the socket on the set.
- 2 Insert the other plug of the USB cable to the USB output terminal of the USB device.

for the **memory card**:

- 1 Insert the memory card into a card reader (not supplied).
 - 2 Use a USB cable (not supplied) to connect the card reader into the socket on the set.
- 1 Connect the end of the supplied AV cord with only one connector to the **A/V OUT** jack of the DVD system.
- 2 For the other end, connect the video output connector (yellow) to the VIDEO IN jack on the VCR and the audio connectors (white/ red) to the corresponding audio input jacks on the VCR. This will allow you to make analogue stereo (two channel, right and left) recordings.

Using the VCR for recording DVDs

Connections

Controls

Controls

Controls on the system

- (1) **STANDBY-ON** ⏻
— switches the system on or to standby mode.

- (2) **Display screen**
— shows the status of the system.

- (3) **LEFT ▲**
— opens/closes the left disc door.

- (4) **RIGHT ▲**
— opens/closes the right disc door.

- (5) **IR SENSOR**
— remote sensor

- (6) **VOLUME -/+**
— adjusts the volume level.

- (7) **Disc trays**
◀▶/▶▶

- (8) **Mode Selection**
◀▶/▶▶

- for TUNER tunes to a station.
*for DISC/USB fast searches back and forward within a track/disc.

- for Clock/Timer sets the hour.
■ stops disc playback or erases a disc program.

- ▶▶/▶ starts or interrupts playback.
◀▶/▶▶

- for TUNER selects a preset radio station.
for DISC/USB skips to the previous/next Chapter/title/track.

- for Clock/Timer sets the minute.

- (9) **DISC 1/2/3/4**
— selects a disc tray for playback.

- (10) **CLOCK**
— **Standby mode**
— sets the system clock.

- **Playback mode**
— displays the system clock.

- (11) **SOURCE**
— to select the respective sound source : DISC, USB, TUNER (FM/MW) or AUX.

- (12) **DSC•DBB**
— selects different types of preset sound equalizer settings (FLAT, POP, CLASSIC, ROCK, JAZZ).
— enables or disables bass enhancement.

⑬ USB DIRECT

- jack for the external USB mass storage device.

⑭ STANDBY-ON ⏻

- to exit or confirm the selection.

⑮ OK

- to exit or confirm the selection.

⑯ ▶/▶▶

- Disc: skips to the previous/next chapter/title/track.

⑰ STANDBY-ON ⏻

- switches the system on or to standby mode.

⑱ Numeric Keypad (0-9)

- inputs a track/title/chapter number of the disc.

⑲ PROGRAM

- DVD/CD/MP3-CD/USB: enters the program menu.
Picture CD: during playback, to select a slide show mode.

⑳ SOURCE

- to select the respective sound source: DISC, USB, TUNER (FM/MW) or AUX.

㉑ SYSTEM MENU

- (disc mode only)

㉒ DISC MENU

- (disc mode only)

㉓ VOLUME +/-

- DVD/CD: enters or exits the disc contents menu.

㉔ MODE

- selects various repeat modes or the shuffle play mode for a disc.

㉕ SUBTITLE

- selects a subtitle language.

㉖ TIMER/SLEEP

- Standby mode

㉗ DISC 1/2/3/4

- sets time for switching on the system automatically.

㉘ POWER ON

- sets the sleep timer function (auto off).

㉙ DISC 1/2/3/4

- selects a disc tray for playback.

㉚ DSC/DBB

- selects different types of preset sound equalizer settings (FLAT, POP, CLASSIC, ROCK, JAZZ).
— enables or disables bass enhancement.

㉛ L ▲ / R ▲

- opens/closes the left/right disc door.

㉜ MUTE

- to interrupt or resume sound reproduction.

㉝ DISPLAY OSD

- displays information on TV screen during playback.

㉞ A-B

- for VCD/CD/USB: to repeat a specific section within the same track.

㉟ DIM

- selects different levels of brightness for the display screen.

㉟ AUDIO

- for VCD sets Stereo, Mono-Left or Mono-Right sound mode.

㉟ OK

- to exit or confirm the selection.

㉟ ▶/▶▶

- Disc: skips to the previous/next chapter/title/track.

㉟ Tuner

- Tuner: selects a preset radio station.

㉟ Timer

- for clock/timer, to set the minute.

㉟ Disc

- In DISC mode, to stop playback or clear a program.

㉟ ►

- In DISC/USB mode, to start or interrupt playback.

㉟ ►

- In DISC mode, to stop playback or clear a program.

㉟ ►

- In DISC/USB mode, to start or interrupt playback.

㉟ ►

- In DISC mode, to stop playback or clear a program.

㉟ ►

- In DISC/USB mode, to start or interrupt playback.

㉟ ►

- In DISC mode, to stop playback or clear a program.

㉟ ►

- In DISC/USB mode, to start or interrupt playback.

㉟ ►

- In DISC mode, to stop playback or clear a program.

㉟ ►

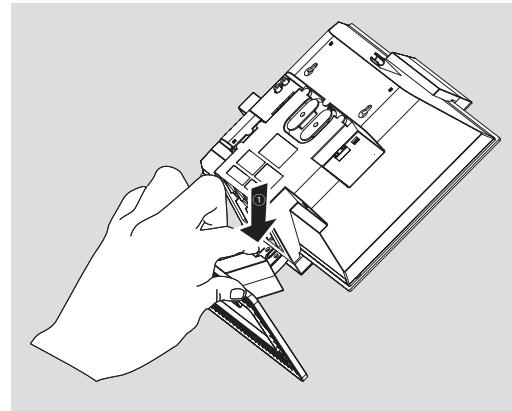

- In DISC/USB mode, to start or interrupt playback.

CONNECTION AND CONTROLS

DISMANTLING INSTRUCTIONS

Detaching the Stands from the Speakers and Main Sets

- 1 To detach the stand from the main unit,
 - a. As shown, hold down **PRESS ▼**
 - b. Move out the stand to detach.

- 2 Detach the speaker stands in the same way as you do the main unit stand.

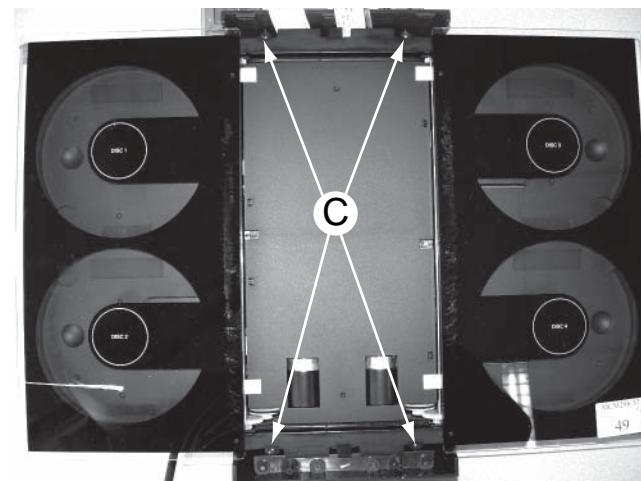

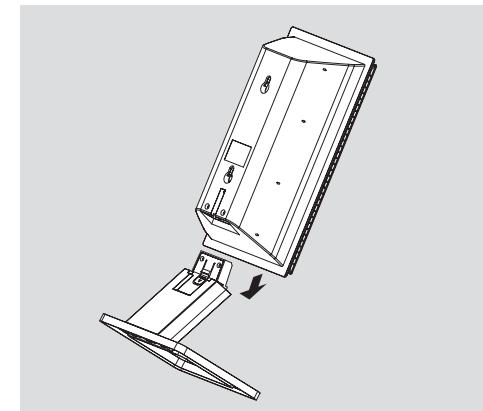

Figure 2

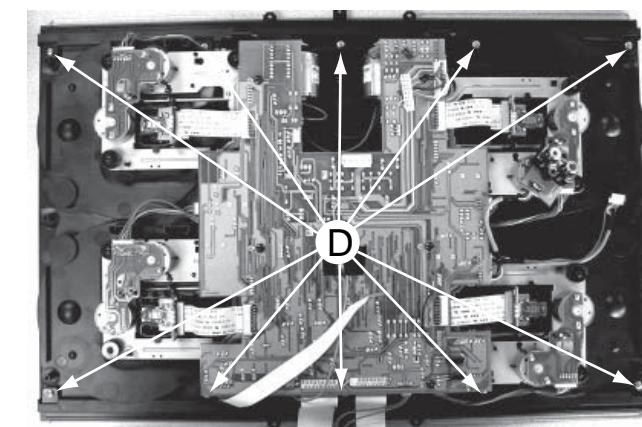

Figure 3

Dismantling of the Front and Rear Panel assembly

- 1) Loosen 4 screws A to remove the Front Panel Ass'y by sliding it out towards the underside before lifting up as shown in Figure 1.
- 2) Loosen 7 screws B and 4 screws C to remove the Rear Panel Ass'y .
 - 7 screws on the rear
 - 2 screws each on the upside & downside as shown in Figure 2.
- 3) Loosen 10 screws D (see Figure 3) to remove the CD Door Track, then remove Left and Right CD Door.
 - 5 screws each on the upper & under side.

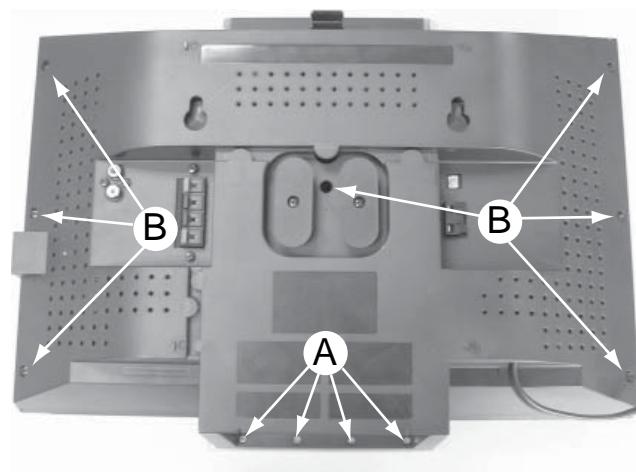

Figure 1

Detaching the Control Panel Ass'y from the Front Panel Ass'y

- 1) Loosen 11 screws E (see Figure 4) to remove the Control Panel Ass'y .

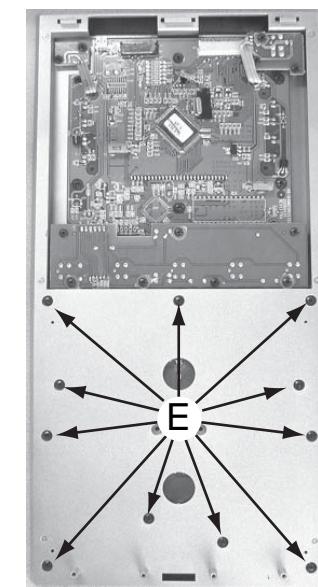

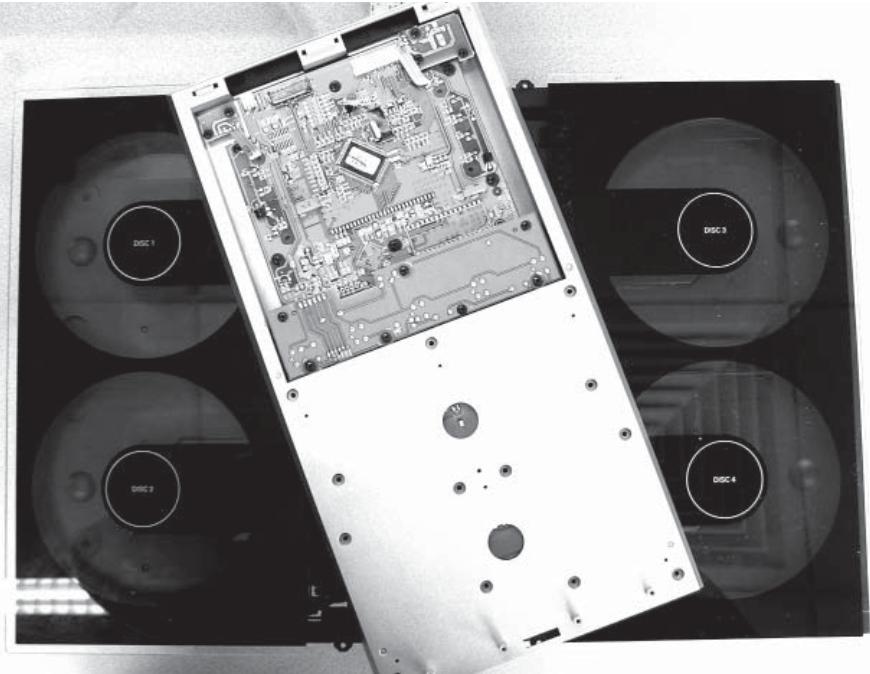

Figure 4

DISMANTLING INSTRUCTIONS

Repair Hints & Service Positions

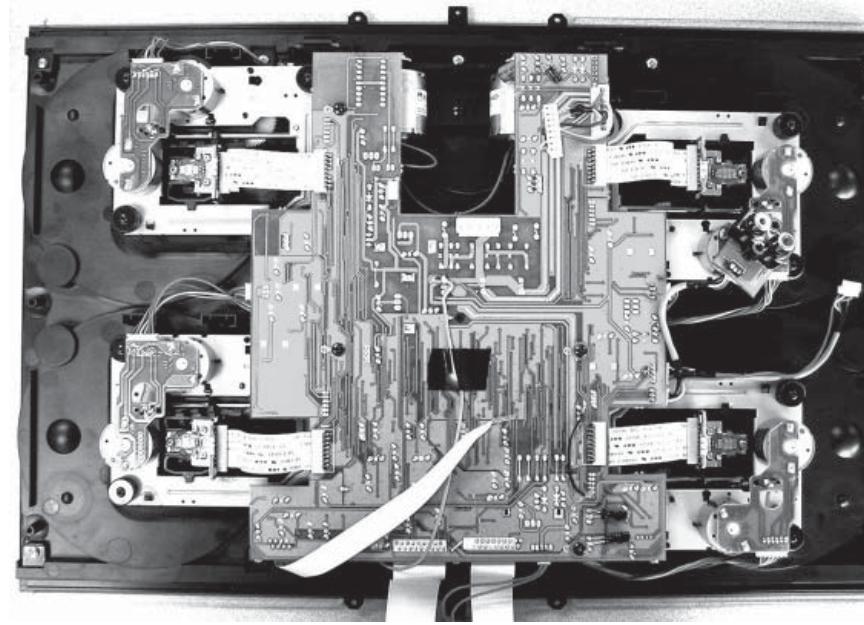

- 1) During repair it is possible to disconnect the Tuner Board and/or CD Module completely unless the fault is suspected to be in that area. This will not affect the performance of the rest of the set.

Service position A

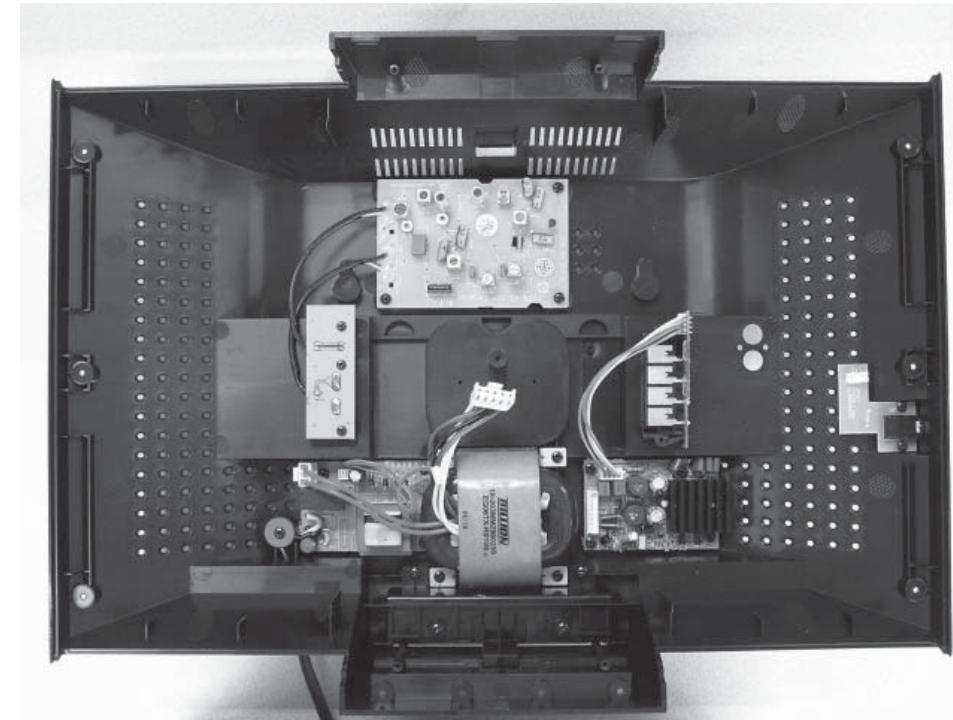

Note: The flex cables are very fragile, care should be taken not to damage them during repair. After repair, be very sure that the flex cables are inserted properly into the flex sockets before encasing, otherwise faults may occur.

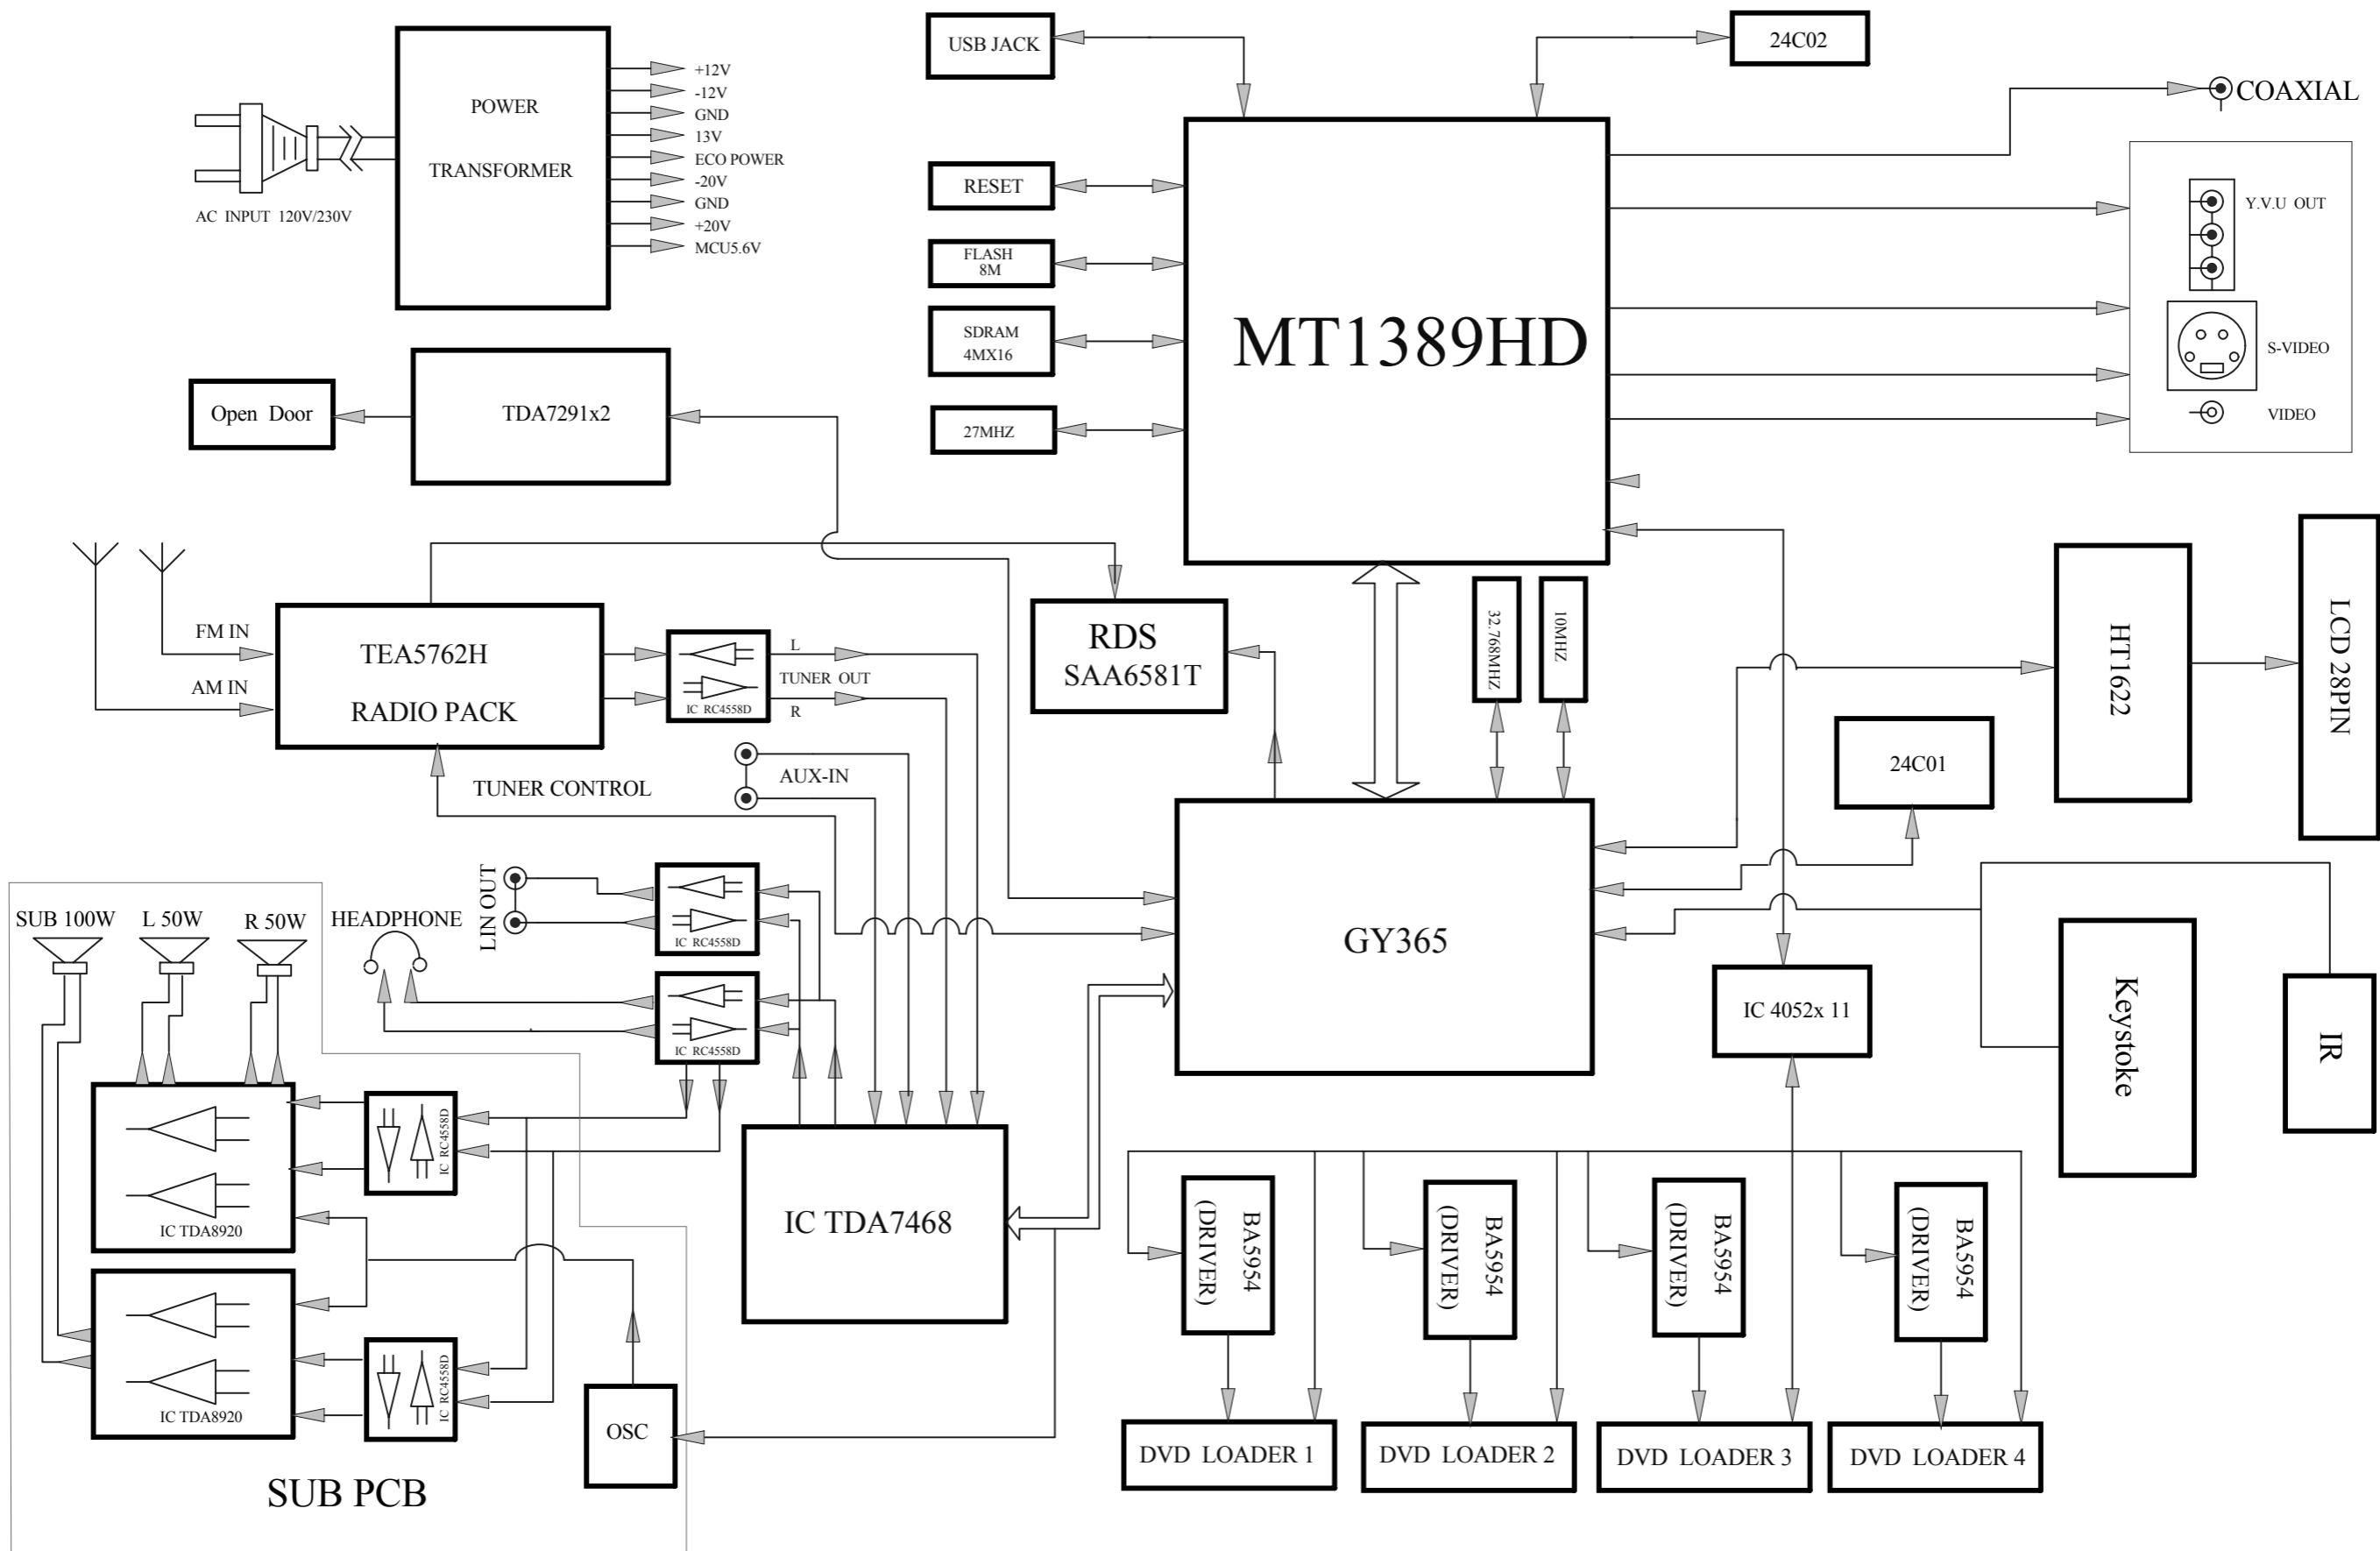

Service position B

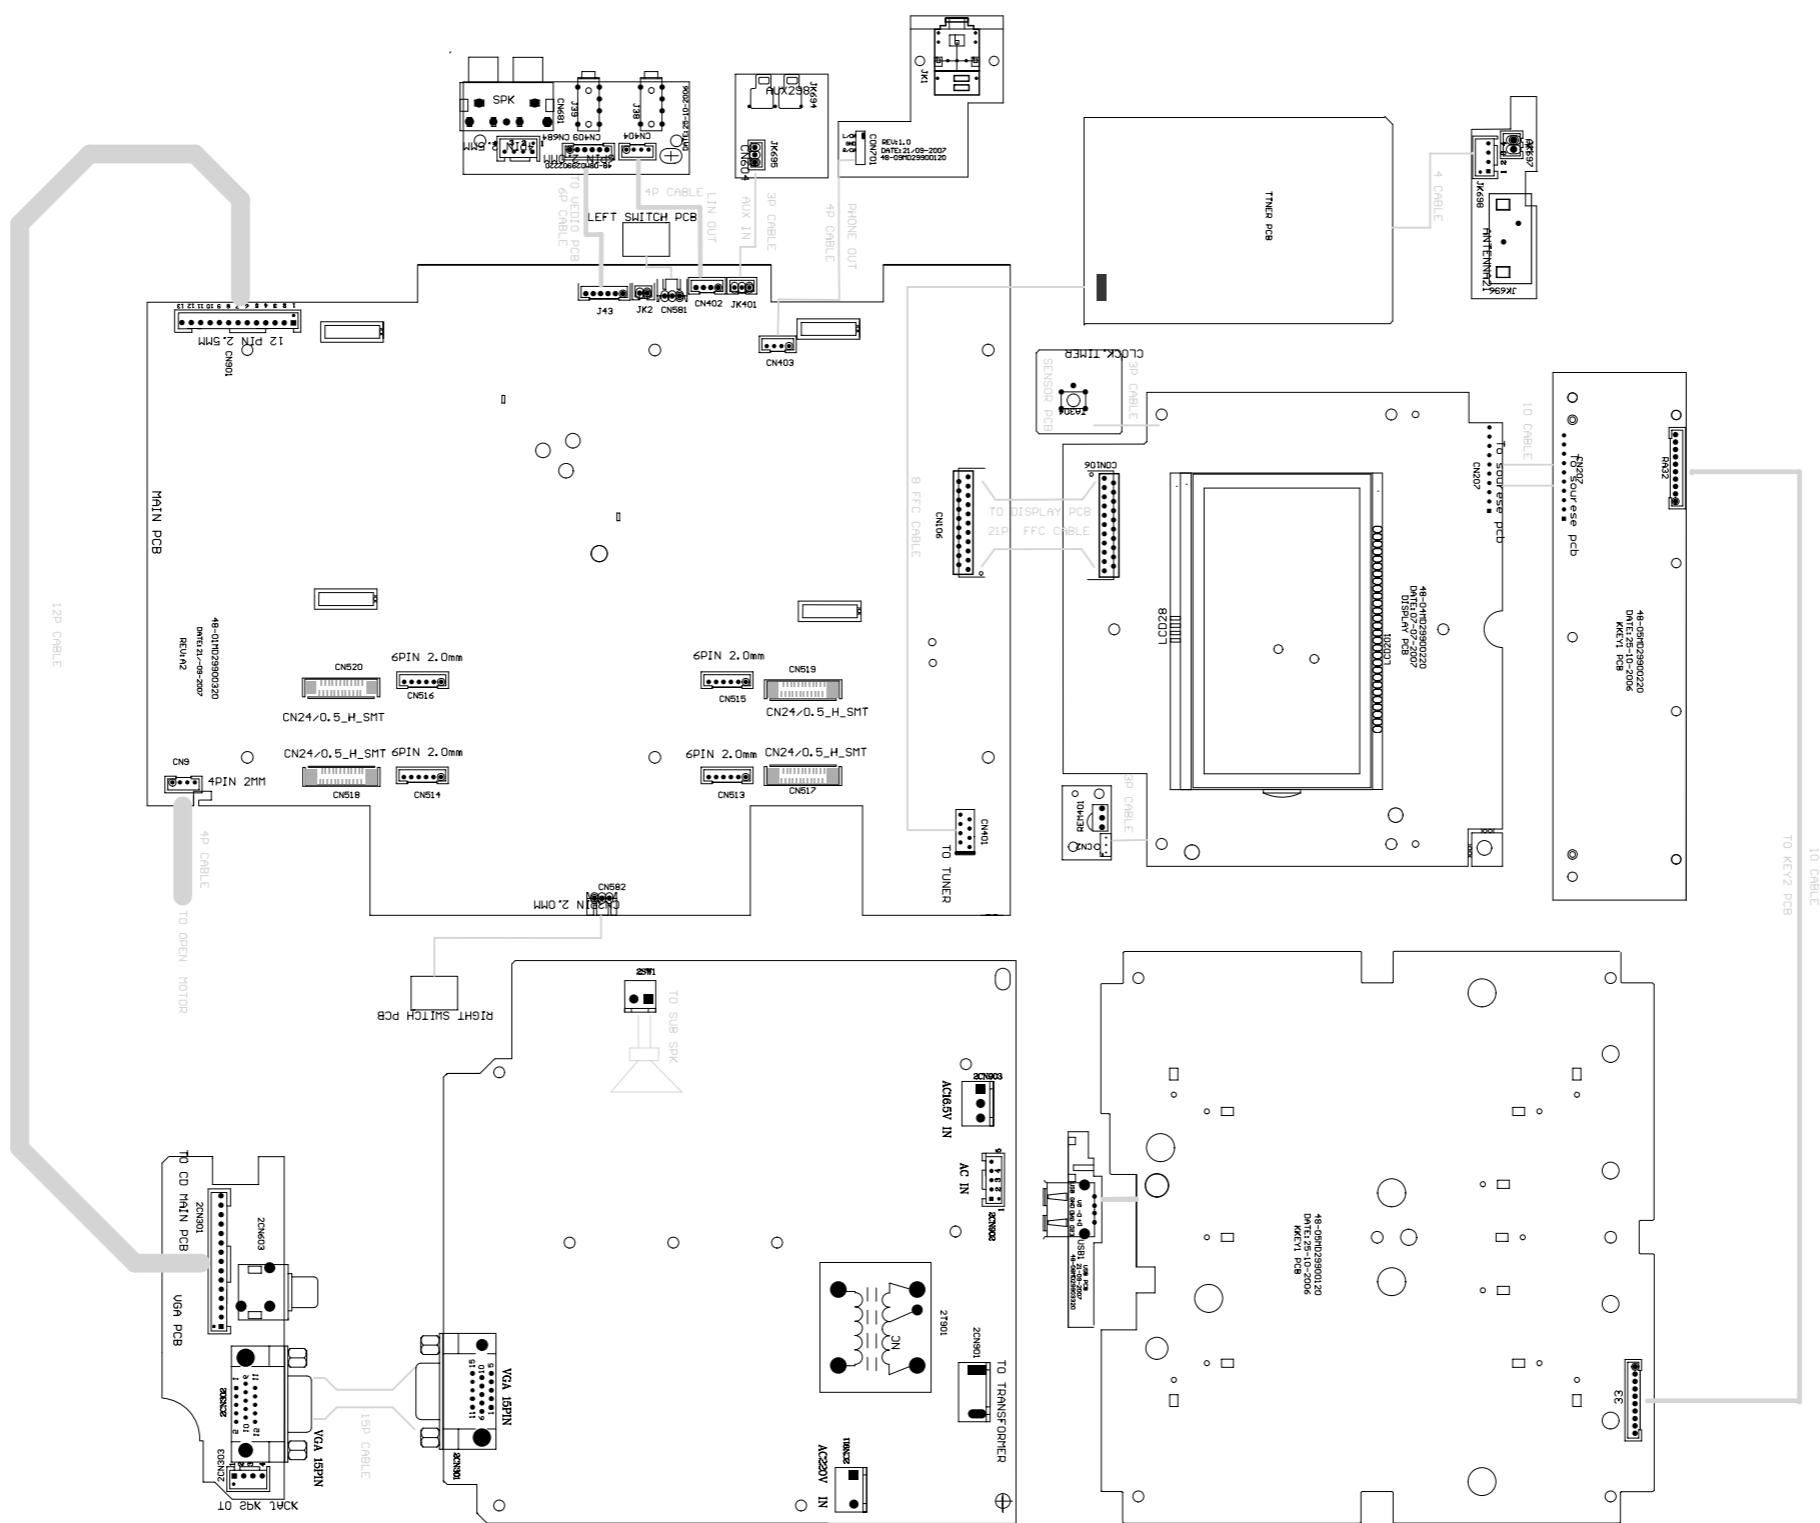

Service position C

			531kHz	check		1.1V ±0.4V	
FM IF							
FM	10.7MHz, 45mV continuous wave	D	IC 7101 mod=1kHz Δf=±22.5kHz	shortcircuit to block AFC 2141	5119	2	0 ± 3 mV DC
FM RF							
FM 87.5 - 108MHz (65.81 - 74, 87.5 - 108MHz)	108MHz	A	108MHz	2155	4	MAX	
	87.5MHz (65.81MHz)	mod=1kHz Δf=±22.5kHz	87.5MHz (65.81MHz)	5131			
VCO							
FM	98MHz, 1mV continuous wave	A	98MHz	3142	3	152kHz ±1kHz ¹⁾	
AM IF							
MW	450kHz connect pin 6 of IC 7101 (AM Osc.) with 3.3kΩ to Vcc	C	IC 7101 36 220R 100nF	5111	5	max. symmetric 	
AM AFC MW		C	IC 7101 40 220R 100nF see remark 2)	5112			
		continuous wave V _{RF} = 2mV		5114	2	0 ± 2 mV DC	
AM RF³⁾							
MW ⁴⁾ FM/MW/LW- and FM/MW-version (9kHz grid) 531 - 1602kHz	1494kHz	B	1494kHz	2106	5	max. symmetric 	
	558kHz		558kHz	5102			
LW	198kHz		198kHz	5103			
MW FM/AM-version, 10kHz grid 530 - 1700kHz	1500kHz		1500kHz	2106			
	560kHz		560kHz	5102			

Use Service Testprogram. By selecting the TUNER TEST test frequencies will be stored as preset frequencies automatically.

1) If sensitivity of frequency counter is too low adjust to max. channel separation (input signal: stereo left 90% + 9%, adjust output on right channel to minimum)

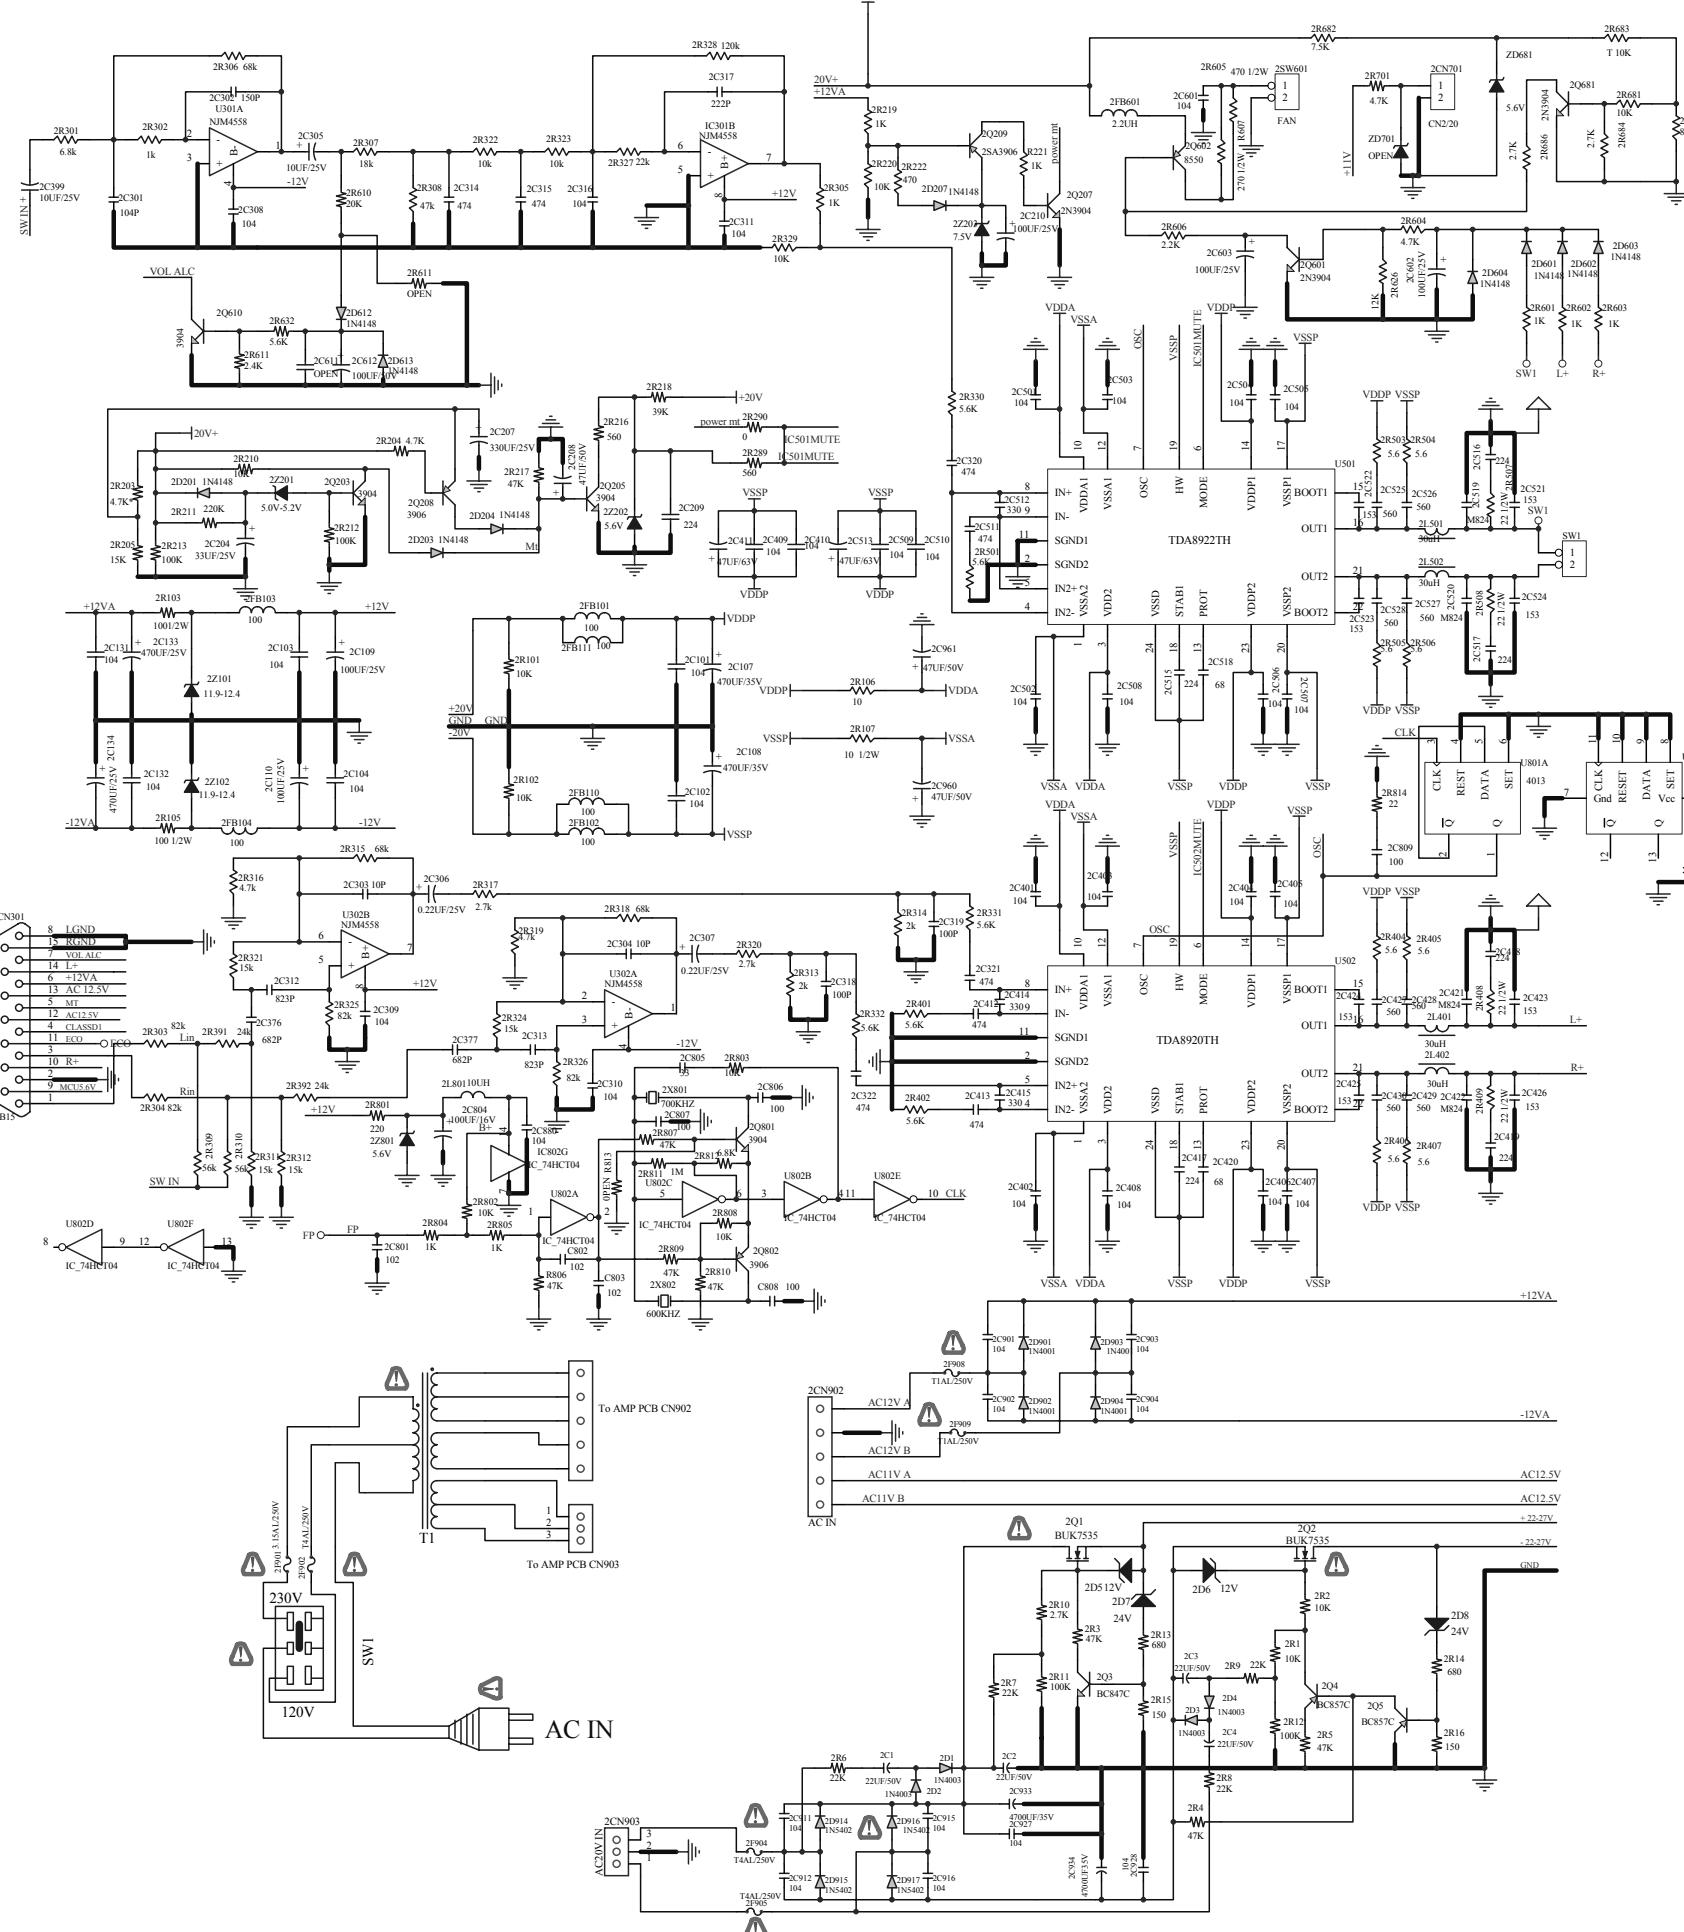

3) For AM RF adjustments the original frame antenna has to be used!

2) RC network serves for damping the IF-filter while adjusting the other one.

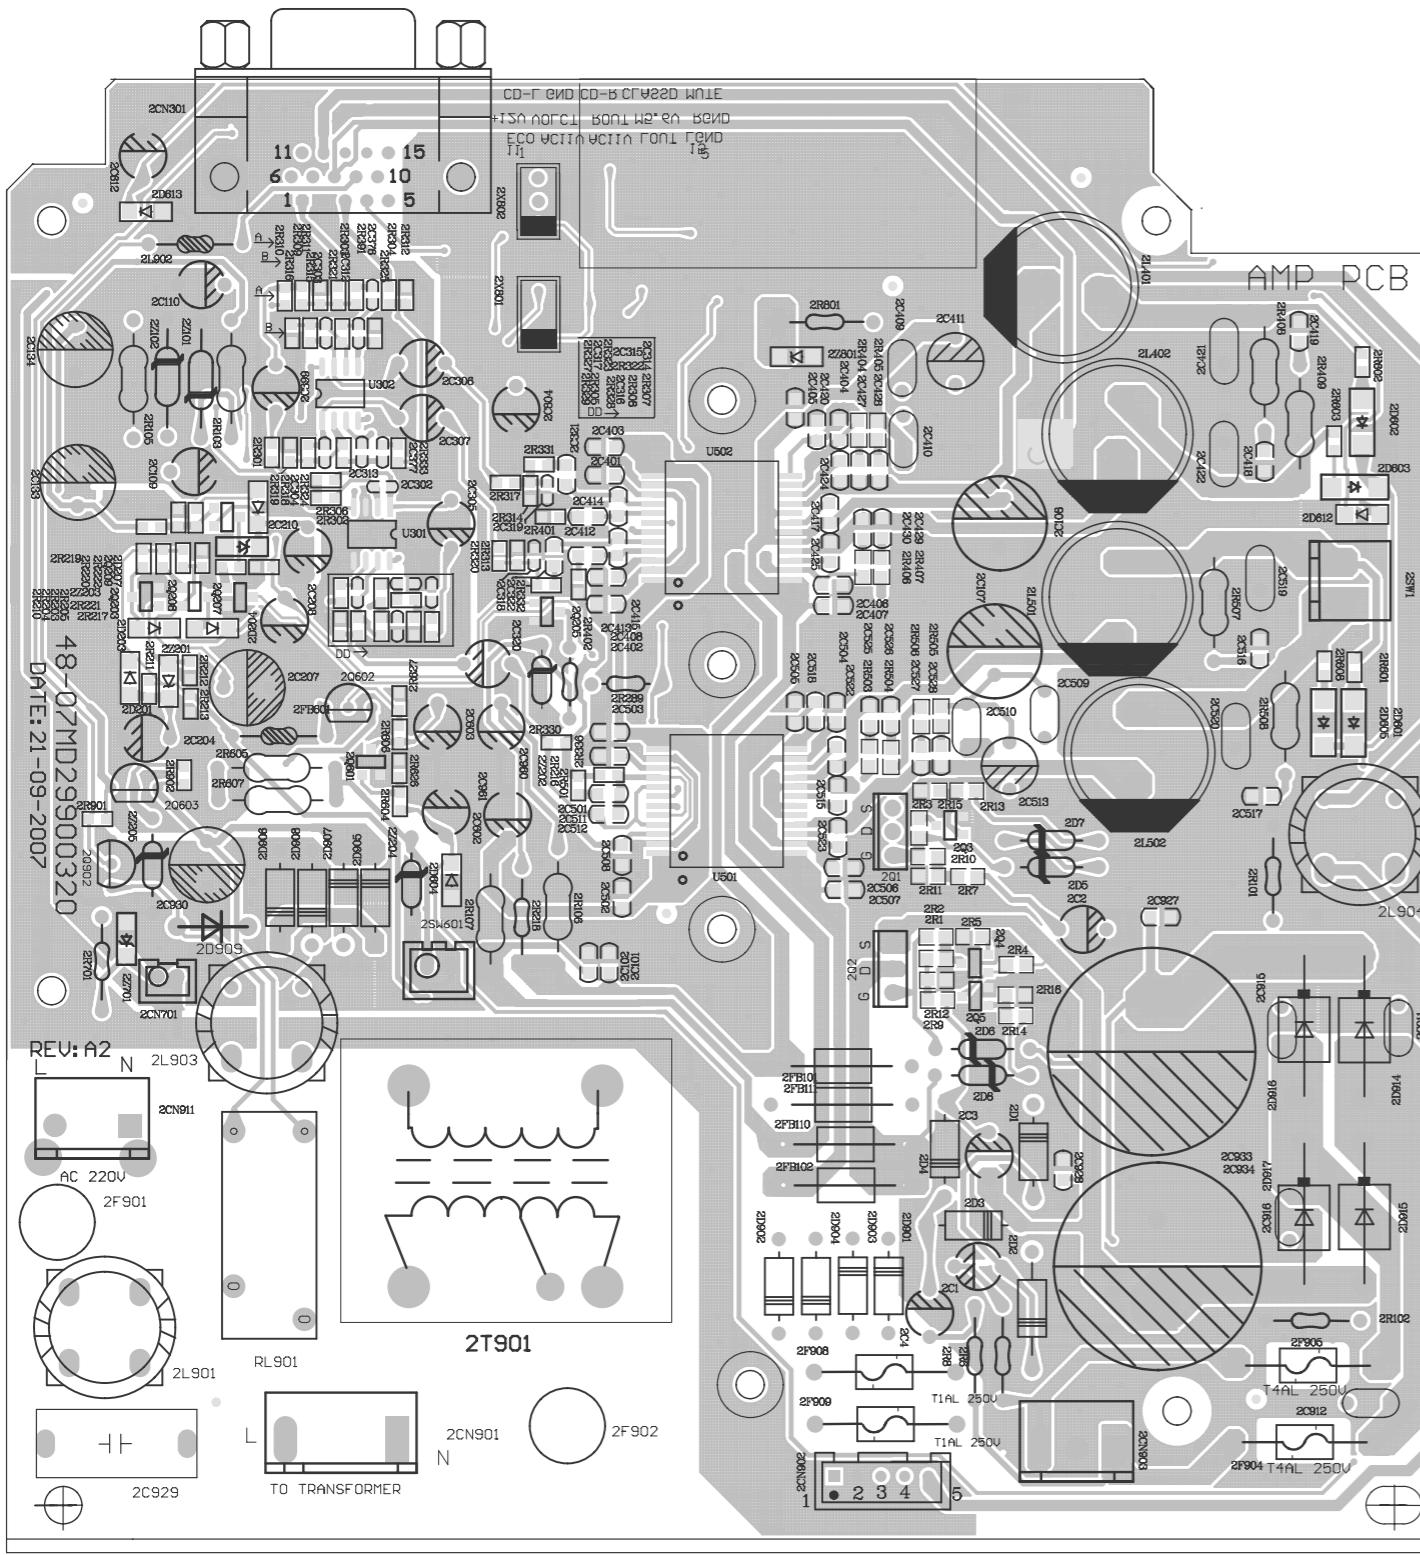

4) MW has to be aligned before LW

Repeat
