SPECIFICATIONS

AMPLIFIER

| | |
|------------------------------|----------------|
| Output power | 2 x 4W RMS |
| Signal-to-noise ratio | ≥ 60 dBA (IEC) |
| Frequency response | 125 – 16000 Hz |
| Impedance loudspeakers | 4Ω |

CD PLAYER

| | |
|-----------------------------|----------------|
| Frequency range | 125 – 16000 Hz |
| Signal-to-noise ratio | 65 dBA |

TUNER

| | |
|---------------------------------|----------------|
| FM wave range | 87.5 – 108 MHz |
| MW wave range | 531 – 1602 kHz |
| Sensitivity at 75 Ω | |
| – FM 26 dB sensitivity | 20 µV |
| – MW 26 dB sensitivity | 5 mV/m |
| Total harmonic distortion | ≤ 5% |

TAPE DECK

| | |
|----------------------------|----------------------|
| Frequency response | |
| Normal tape (type I) | 125 – 8000 Hz (8 dB) |
| Signal-to-noise ratio | |
| Normal tape (type I) | 40 dBA |
| Wow and flutter | ≤ 0.4% JIS |

SPEAKERS

| | |
|------------------------------|----------------------|
| Bass reflex system | |
| Dimensions (w x h x d) | 146 x 228 x 160 (mm) |

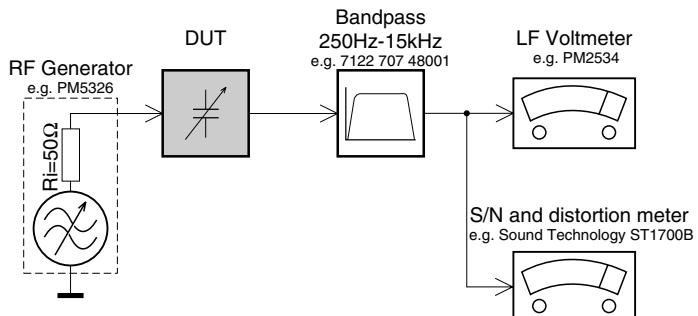

GENERAL INFORMATION

| | |
|--------------------------------------|----------------------|
| AC Power | 220 – 230 V / 50 Hz |
| Dimensions (w x h x d) | 146 x 228 x 216(mm) |
| Weight (with/without speakers) | approx. 4.4 / 2.0 kg |
| Power consumption | |
| Active | 30 W |
| Standby | < 5 W |
| Eco Power Standby | < 1 W |

Specifications and external appearance are subject to change without notice.

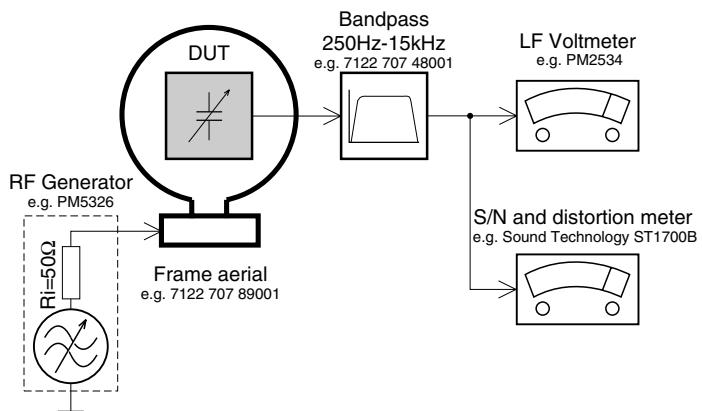

MEASUREMENT SETUP

Tuner FM

Use a bandpass filter to eliminate hum (50Hz, 100Hz) and disturbance from the pilottone (19kHz, 38kHz).

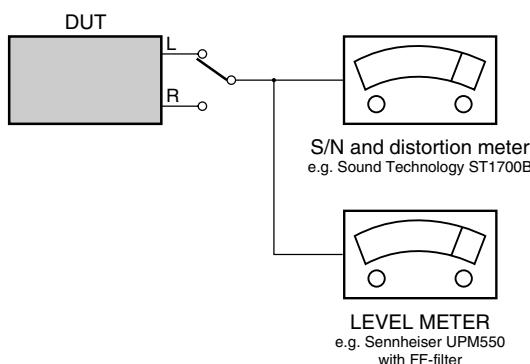

Tuner AM (MW,LW)

To avoid atmospheric interference all AM-measurements have to be carried out in a Faraday's cage.
Use a bandpass filter (or at least a high pass filter with 250Hz) to eliminate hum (50Hz, 100Hz).

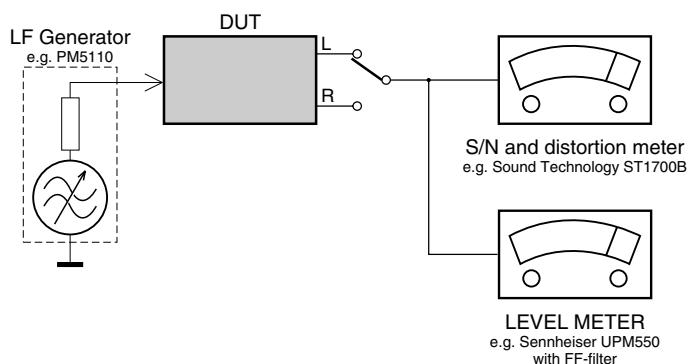

CD

Use Audio Signal Disc SBC429 4822 397 30184
(replaces test disc 3)

Recorder

Use Universal Test Cassette **CrO₂** SBC419 4822 397 30069
or Universal Test Cassette **Fe** SBC420 4822 397 30071

SERVICE AIDS

Service Tools:

| | |
|------------------------------------|----------------|
| Universal Torx driver holder | 4822 395 91019 |
| Torx bit T10 150mm | 4822 395 50456 |
| Torx driver set T6-T20 | 4822 395 50145 |
| Torx driver T10 extended | 4822 395 50423 |

Compact Disc:

| | |
|---|----------------|
| SBC426/426A Test disc 5 + 5A | 4822 397 30096 |
| SBC442 Audio Burn-in test disc 1kHz | 4822 397 30155 |
| SBC429 Audio Signals disc | 4822 397 30184 |
| Dolby Pro-logic Test Disc | 4822 395 10216 |

WARNING

All ICs and many other semi-conductors are susceptible to electrostatic discharges (ESD). Careless handling during repair can reduce life drastically.

When repairing, make sure that you are connected with the same potential as the mass of the set via a wrist wrap with resistance. Keep components and tools also at this potential.

ESD

Safety regulations require that the set be restored to its original condition and that parts which are identical with those specified, be used

Safety components are marked by the symbol Δ .

INFORMATION ABOUT LEAD-FREE SOLDERING

Philips CE is producing lead-free sets from 1.1.2005 onwards.

IDENTIFICATION:

Regardless of special logo (not always indicated) one must treat all sets from **1 Jan 2005** onwards, according next rules:

- On our website www.atyourservice.ce.Philips.com you find more information to:
 - BGA-de-/soldering (+ baking instructions)
 - Heating-profiles of BGAs and other ICs used in Philips-sets
 - Lead free

You will find this and more technical information within the "magazine", chapter "workshop news".

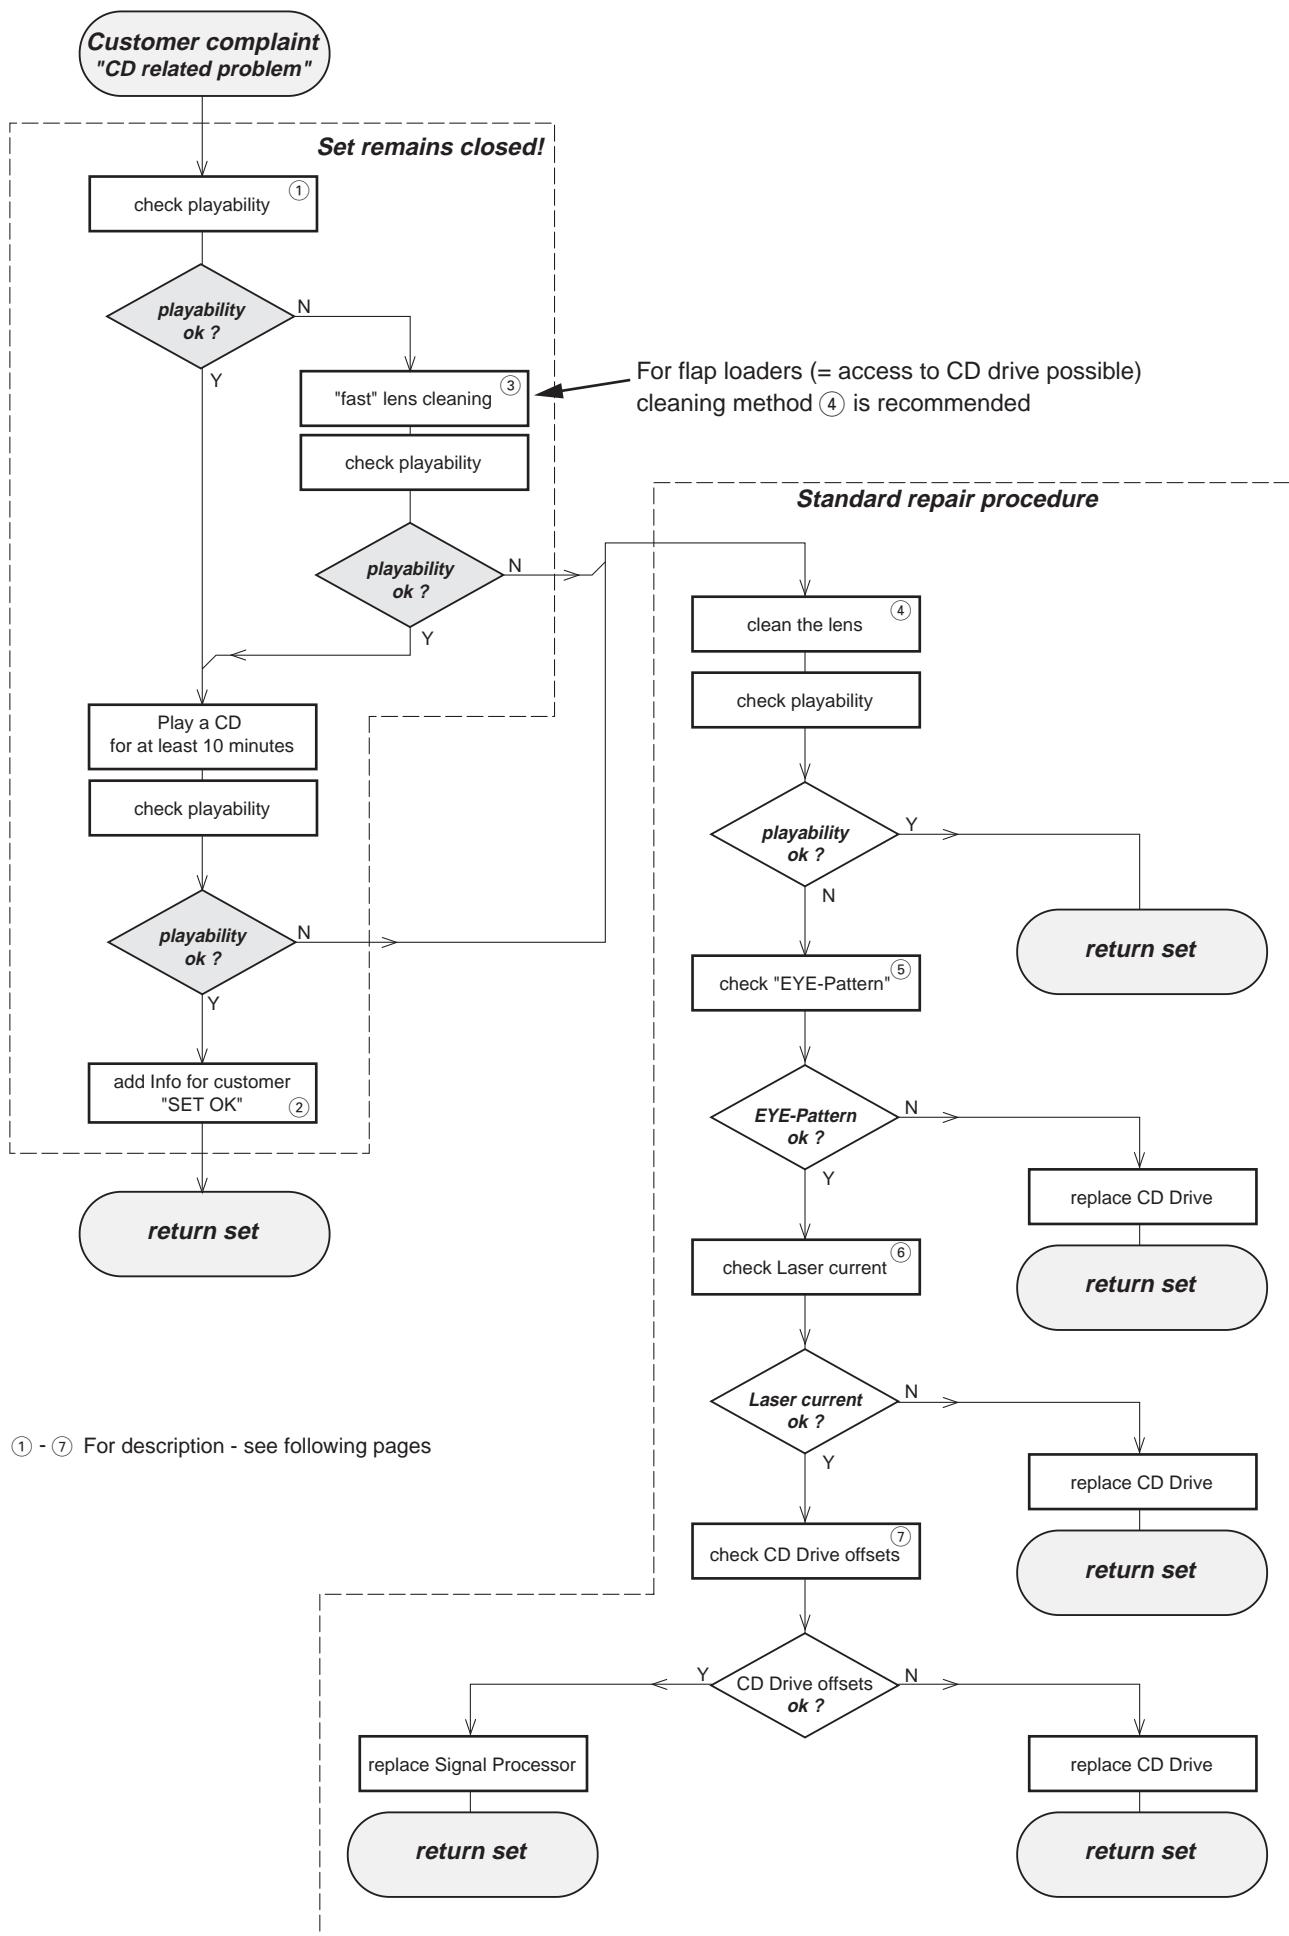

For additional questions please contact your local repair-helpdesk.

SERVICE INSTRUCTION

Safety regulations require that after a repair, the set must be returned in its original condition. Pay in particular attention to the following points:

- Route the wire trees correctly and fix them with the mounted cable clamps.
- Check the insulation of the AC Power lead for external damage.
- Check the strain relief of the AC Power cord for proper function.
- Check the electrical DC resistance between the AC Power Plug and the secondary side (only for sets which have a AC Power isolated power supply):
- Unplug the AC Power cord and connect a wire between the two pins of the AC Power plug.
- Set the AC Power switch to the "on" position (keep the AC Power cord unplugged!).
- Measure the resistance value between the pins of the AC Power plug and the metal shielding of the tuner or the aerial connection on the set. The reading should be larger than 4.5 Mohm (For U.S. it should be between 4.2 Mohm and 12 Mohm).
- Switch "off" the set, and remove the wire between the two pins of the AC Power plug.
- Check the cabinet for defects, to avoid touching of any inner parts by the customer.

INSTRUCTIONS ON CD PLAYABILITY

① - ⑦ For description - see following pages

INSTRUCTIONS ON CD PLAYABILITY

(1)

PLAYABILITY CHECK

For sets which are compatible with **CD-RW** discs
use CD-RW Printed Audio Disc 7104 099 96611
TR 3 (Fingerprint)
TR 8 (600 μ Black dot) **maximum at 01:00**

- playback of these two tracks without audible disturbance
playing time for: Fingerprint \geq 10seconds
Black dot from 00:50 to 01:10
- jump forward/backward (search) within a reasonable time

For all other sets
use CD-DA SBC 444A 4822 397 30245
TR 14 (600 μ Black dot) **maximum at 01:15**
TR 19 (Fingerprint)
TR 10 (1000 μ wedge)

- playback of all these tracks without audible disturbance
playing time for: 1000 μ wedge \geq 10seconds
Fingerprint \geq 10seconds
Black dot from 01:05 to 01:25
- jump forward/backward (search) within a reasonable time

(2)

CUSTOMER INFORMATION

It is proposed to add an addendum sheet to the set which informs the customer that the set has been checked carefully - but no fault was found.
The problem was obviously caused by a scratched, dirty or copy-protected CD. In case problems remain, the customer is requested to contact the workshop directly.
The lens cleaning (method ③) should be mentioned in the addendum sheet.

The final wording in national language as well as the printing is under responsibility of the Regional Service Organizations.

(4)

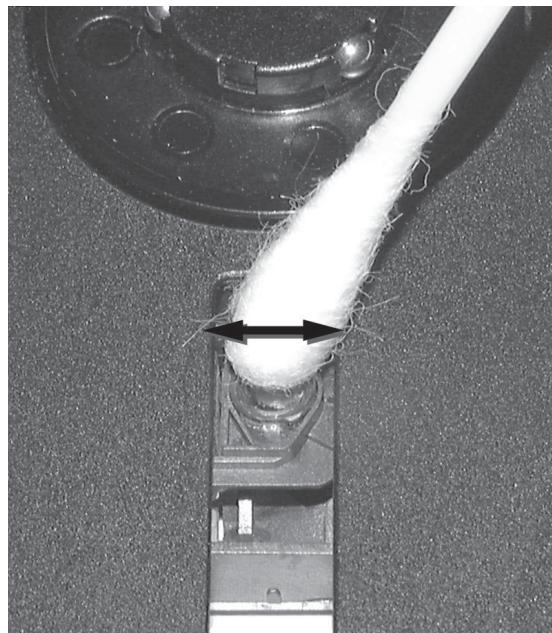

LIQUID LENS CLEANING

Before touching the lens it is advised to clean the surface of the lens by blowing clean air over it.
This to avoid that little particles make scratches on the lens.

Because the material of the lens is synthetic and coated with a special anti-reflectivity layer, cleaning must be done with a non-aggressive cleaning fluid. It is advised to use "Cleaning Solvent B4-No2", available with codenumber 4822 389 10026.

The actuator is a very precise mechanical component and may not be damaged in order to guarantee its full function. Clean the lens gently (don't press too hard) with a soft and clean cotton bud moistened with the special lens cleaner.

The direction of cleaning must be in the way as indicated in the picture below.

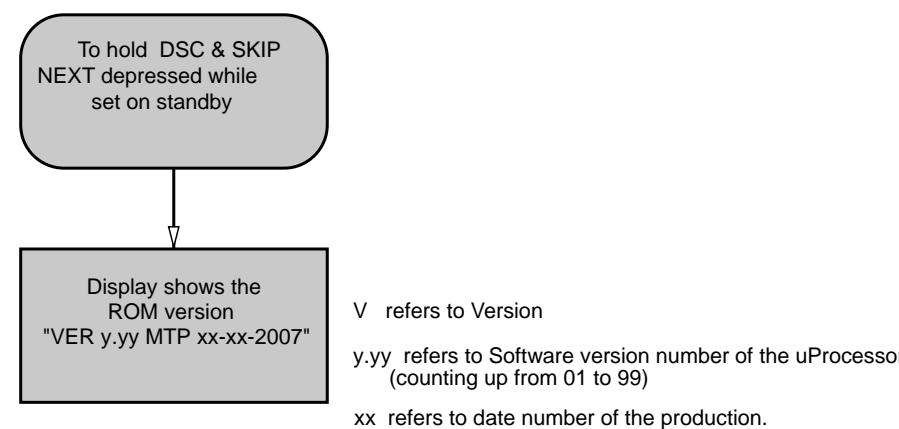

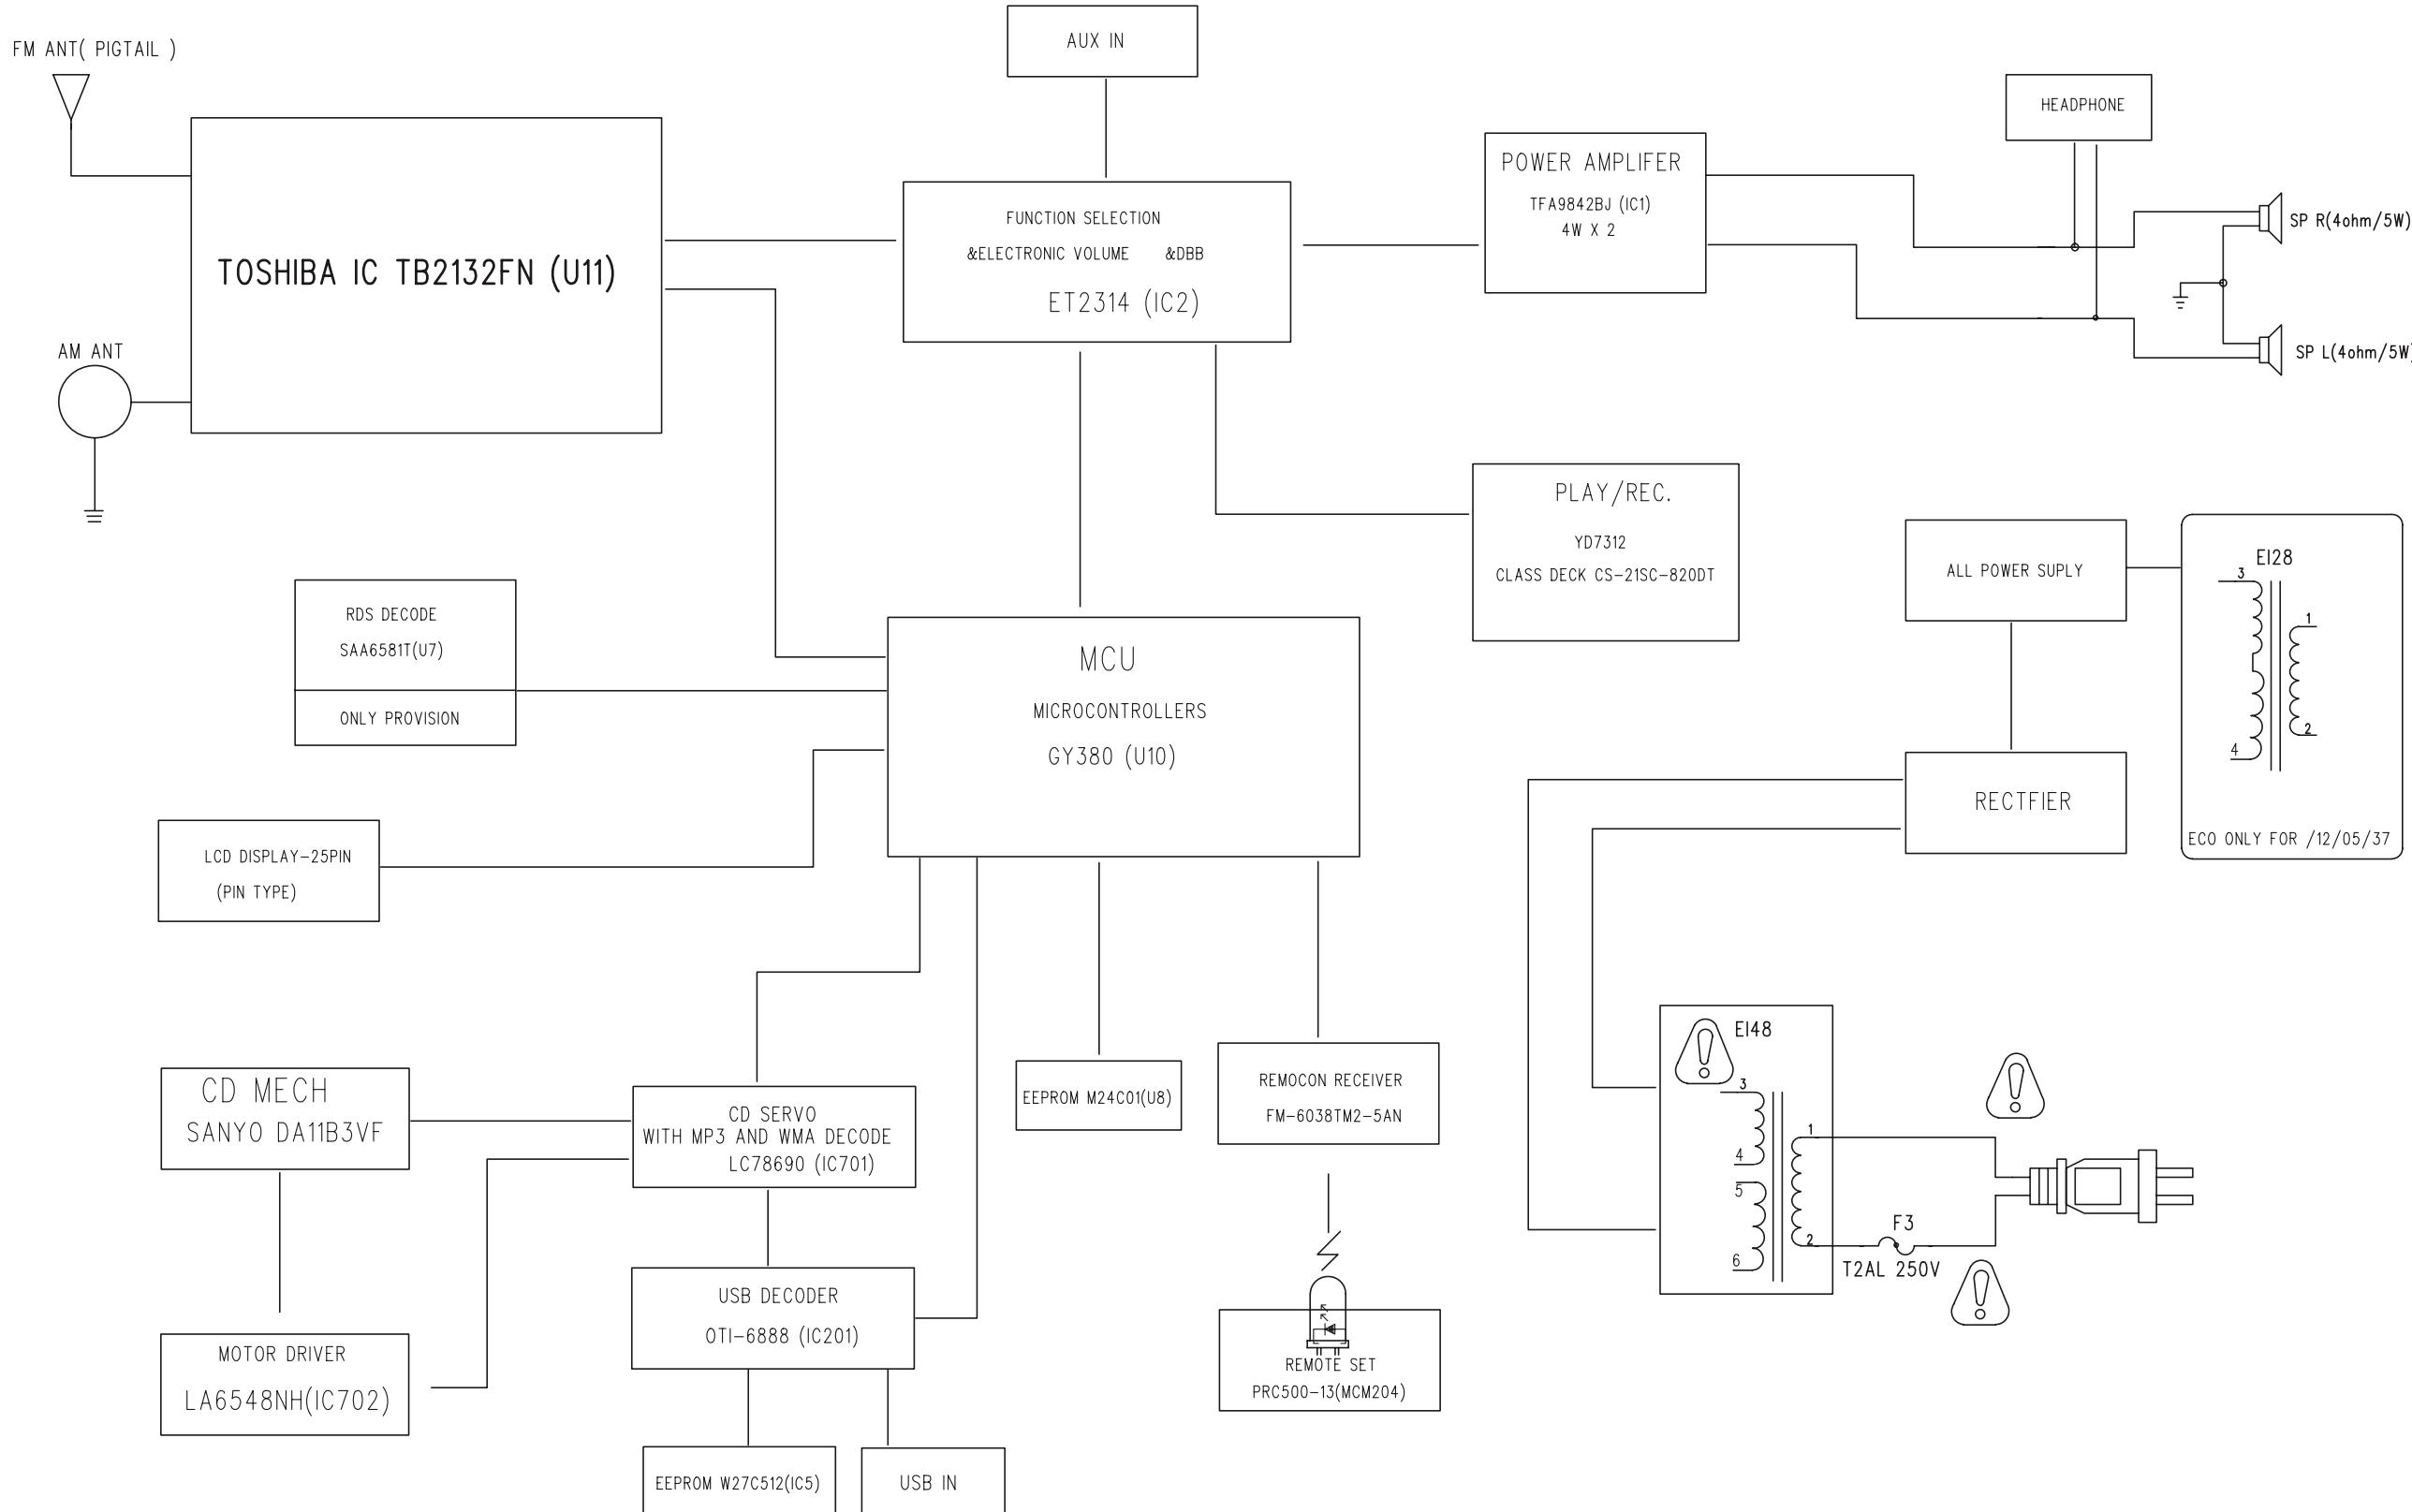

(3)

FAST LENS CLEANING (dry brush)

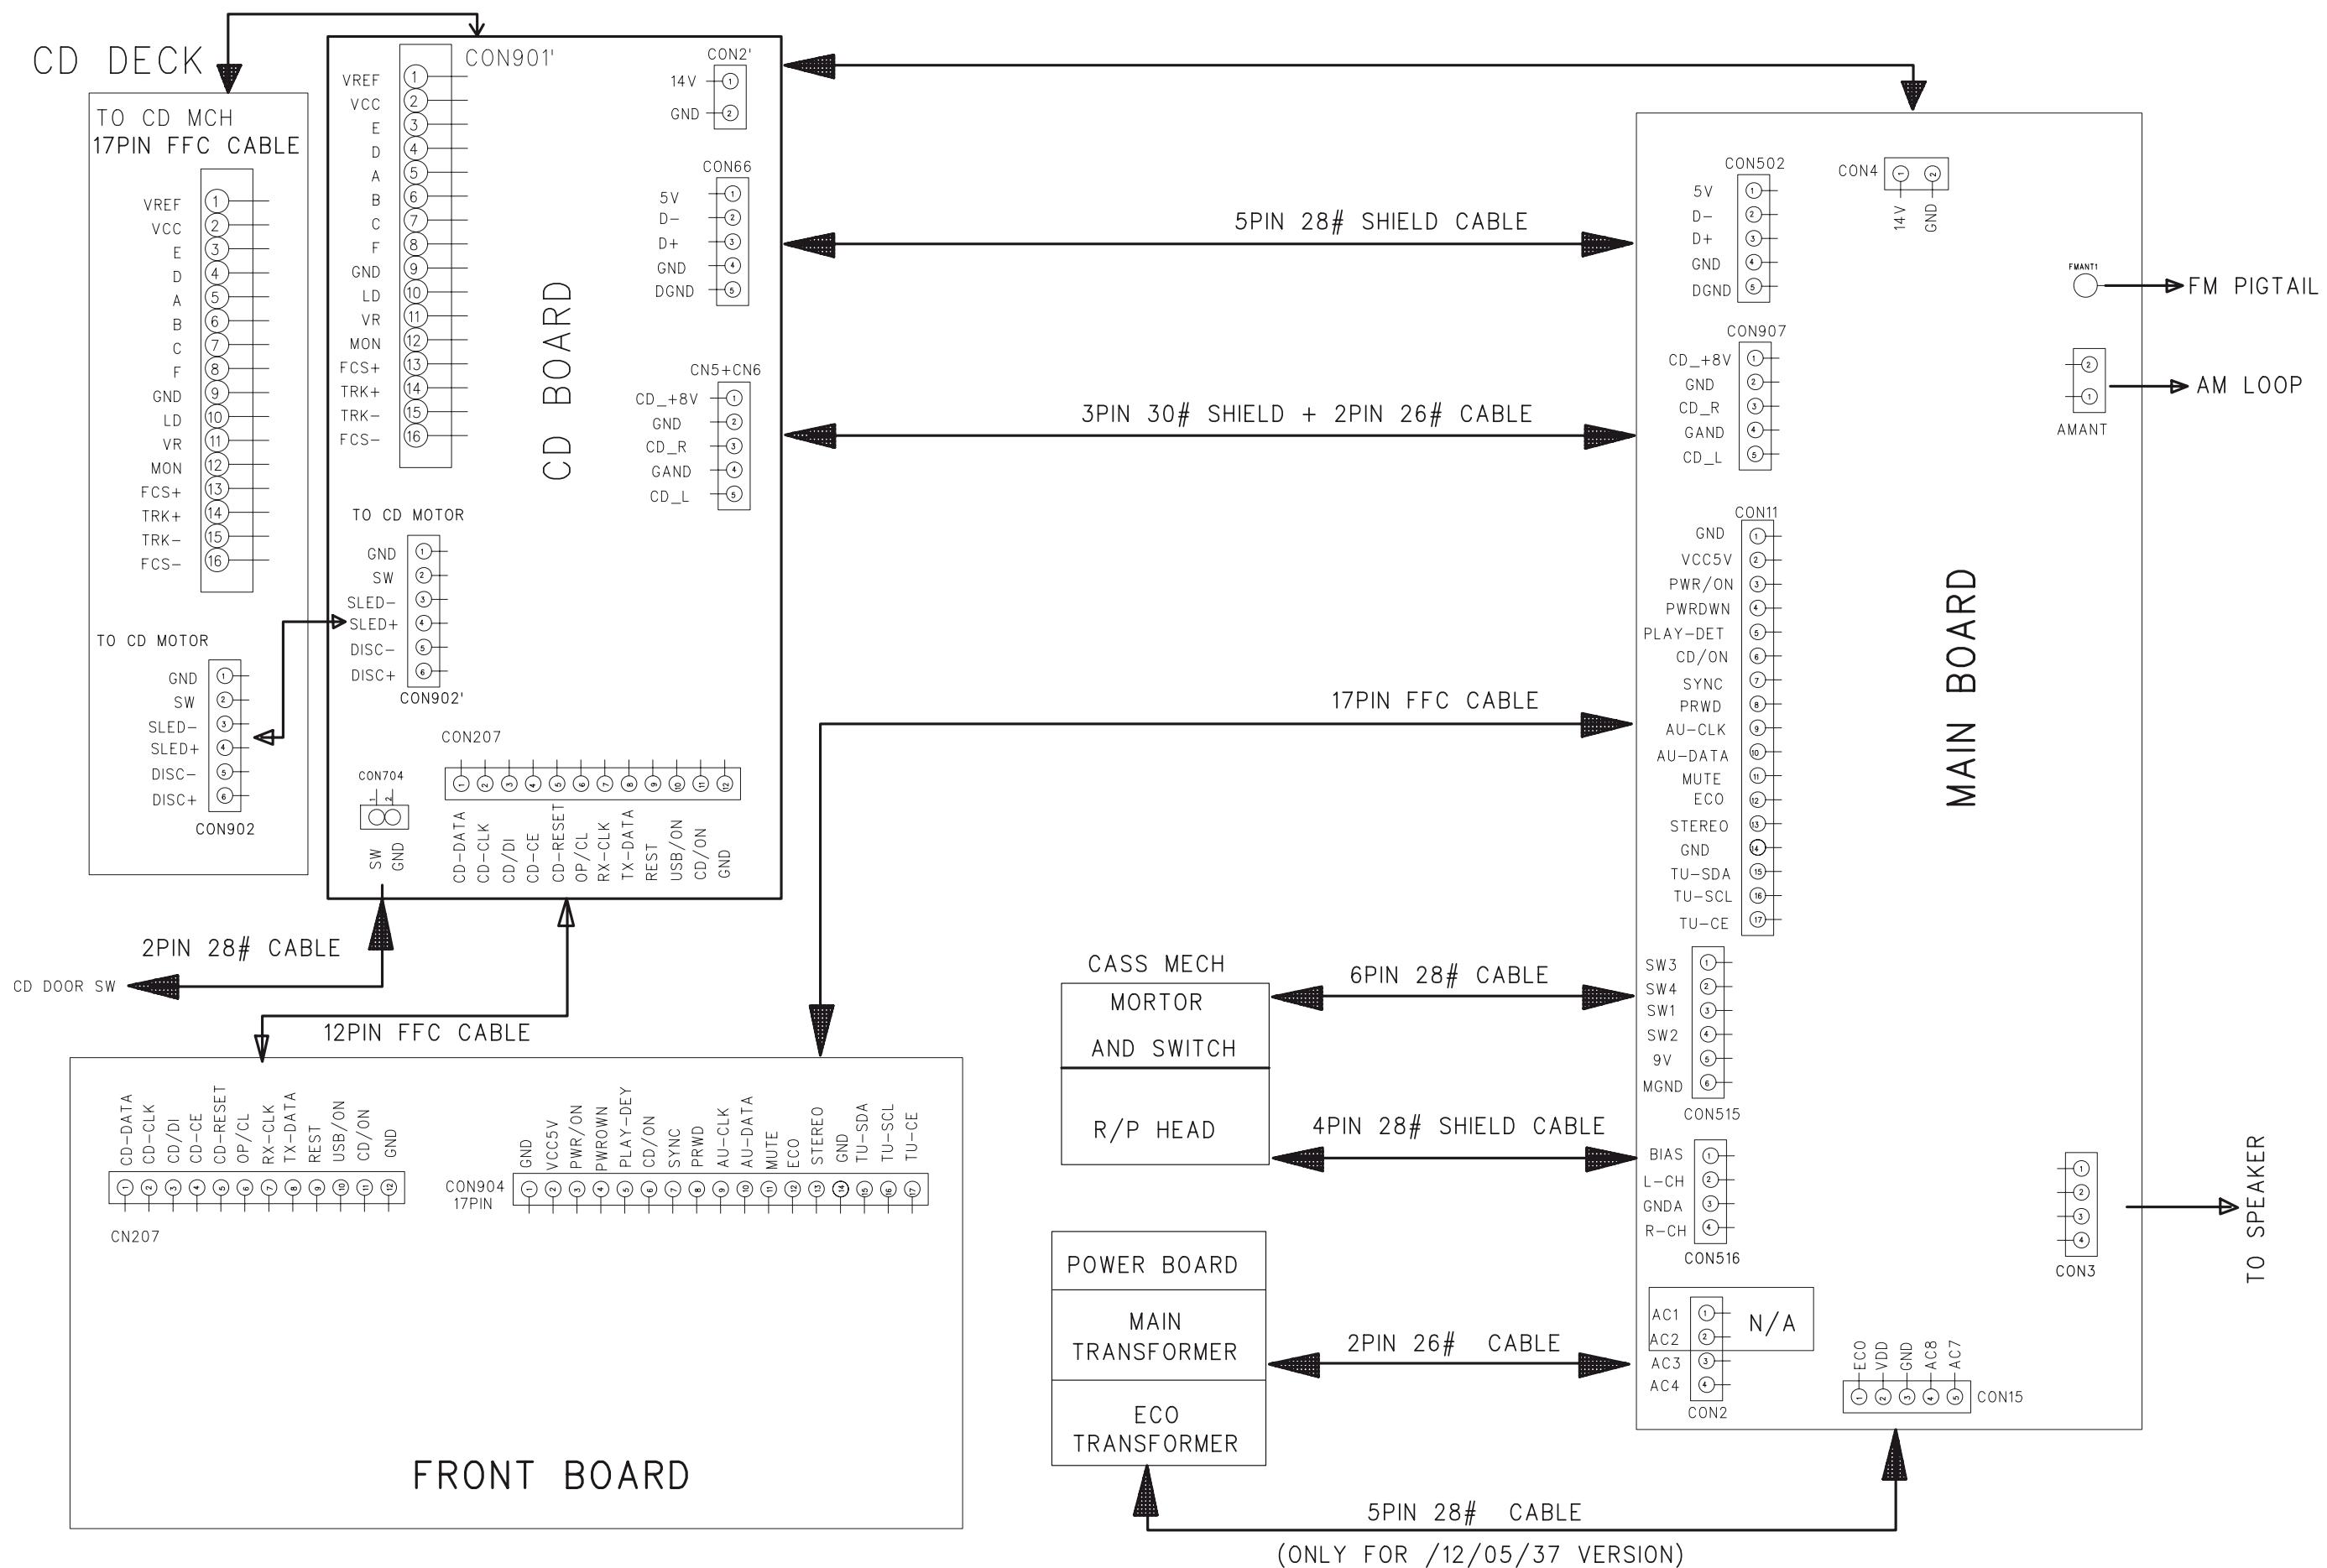

Use lens cleaning CD
SBC AC300 9082 100 00043

Insert the lens cleaning CD, press PLAY and follow the voice guide's instructions on the CD.

REVISION LIST

1.0 Manual 3141 785 31320

Initial Service Manual released.

1.1 Manual 3141 785 31321

In this version,

- 1) the instruction of CD playability check is added.
- 2) Chapter 3 to Chapter 7 have been revised according to latest diagrams.

1.2 Manual 3141 785 31322

In this version, Remote Control has been added.

- 1) P8-2 Mechanical and Accessories Partslist updated.

1.3 Manual 3141 785 31323

In this version, version /61 added.

- 1) P8-2B Mechanical and Accessories Partslist added.

1.4 Manual 3141 785 31324

In this version, version /77 and /96 added.

- 1) P8-2A Mechanical and Accessories Partslist and P8-3 to P8-4 Electrical Partslist updated.

1.5 Manual 3141 785 31325

New version MCM204B/61 added.

- 1) P8-2B Mechanical and Accessories Partslist updated.

1.6 Manual 3141 785 31326

- 1) P8-2A Mechanical and Accessories Partslist updated.

- 2) P8-2B Mechanical and Accessories Partslist updated.

Add:

45 996510001482 CD MP3 BOARD ASS'Y

46 996510001494 MAIN BOARD ASS'Y
