SERVICE AIDS

Service Tools:

Universal Torx driver holder	4822 395 91019
Torx bit T10 150mm	4822 395 50456
Torx driver set T6-T20	4822 395 50145
Torx driver T10 extended	4822 395 50423

Compact Disc:

SBC426/426A Test disc 5 + 5A	4822 397 30096
SBC442 Audio Burn-in test disc 1kHz	4822 397 30155
SBC429 Audio Signals disc	4822 397 30184
Dolby Pro-logic Test Disc	4822 395 10216

WARNING

All ICs and many other semi-conductors are susceptible to electrostatic discharges (ESD). Careless handling during repair can reduce life drastically.

When repairing, make sure that you are connected with the same potential as the mass of the set via a wrist wrap with resistance. Keep components and tools also at this potential.

ESD

Safety regulations require that the set be restored to its original condition and that parts which are identical with those specified, be used

Safety components are marked by the symbol Δ .

INFORMATION ABOUT LEAD-FREE SOLDERING

Philips CE is producing lead-free sets from 1.1.2005 onwards.

IDENTIFICATION:

Regardless of special logo (not always indicated) one must treat all sets from 1 Jan 2005 onwards, according next rules:

- On our website www.atyourservice.ce.Philips.com you find more information to:
 - * BGA-de-/soldering (+ baking instructions)
 - * Heating-profiles of BGAs and other ICs used in Philips-sets
 - * Lead free

You will find this and more technical information within the "magazine", chapter "workshop news".

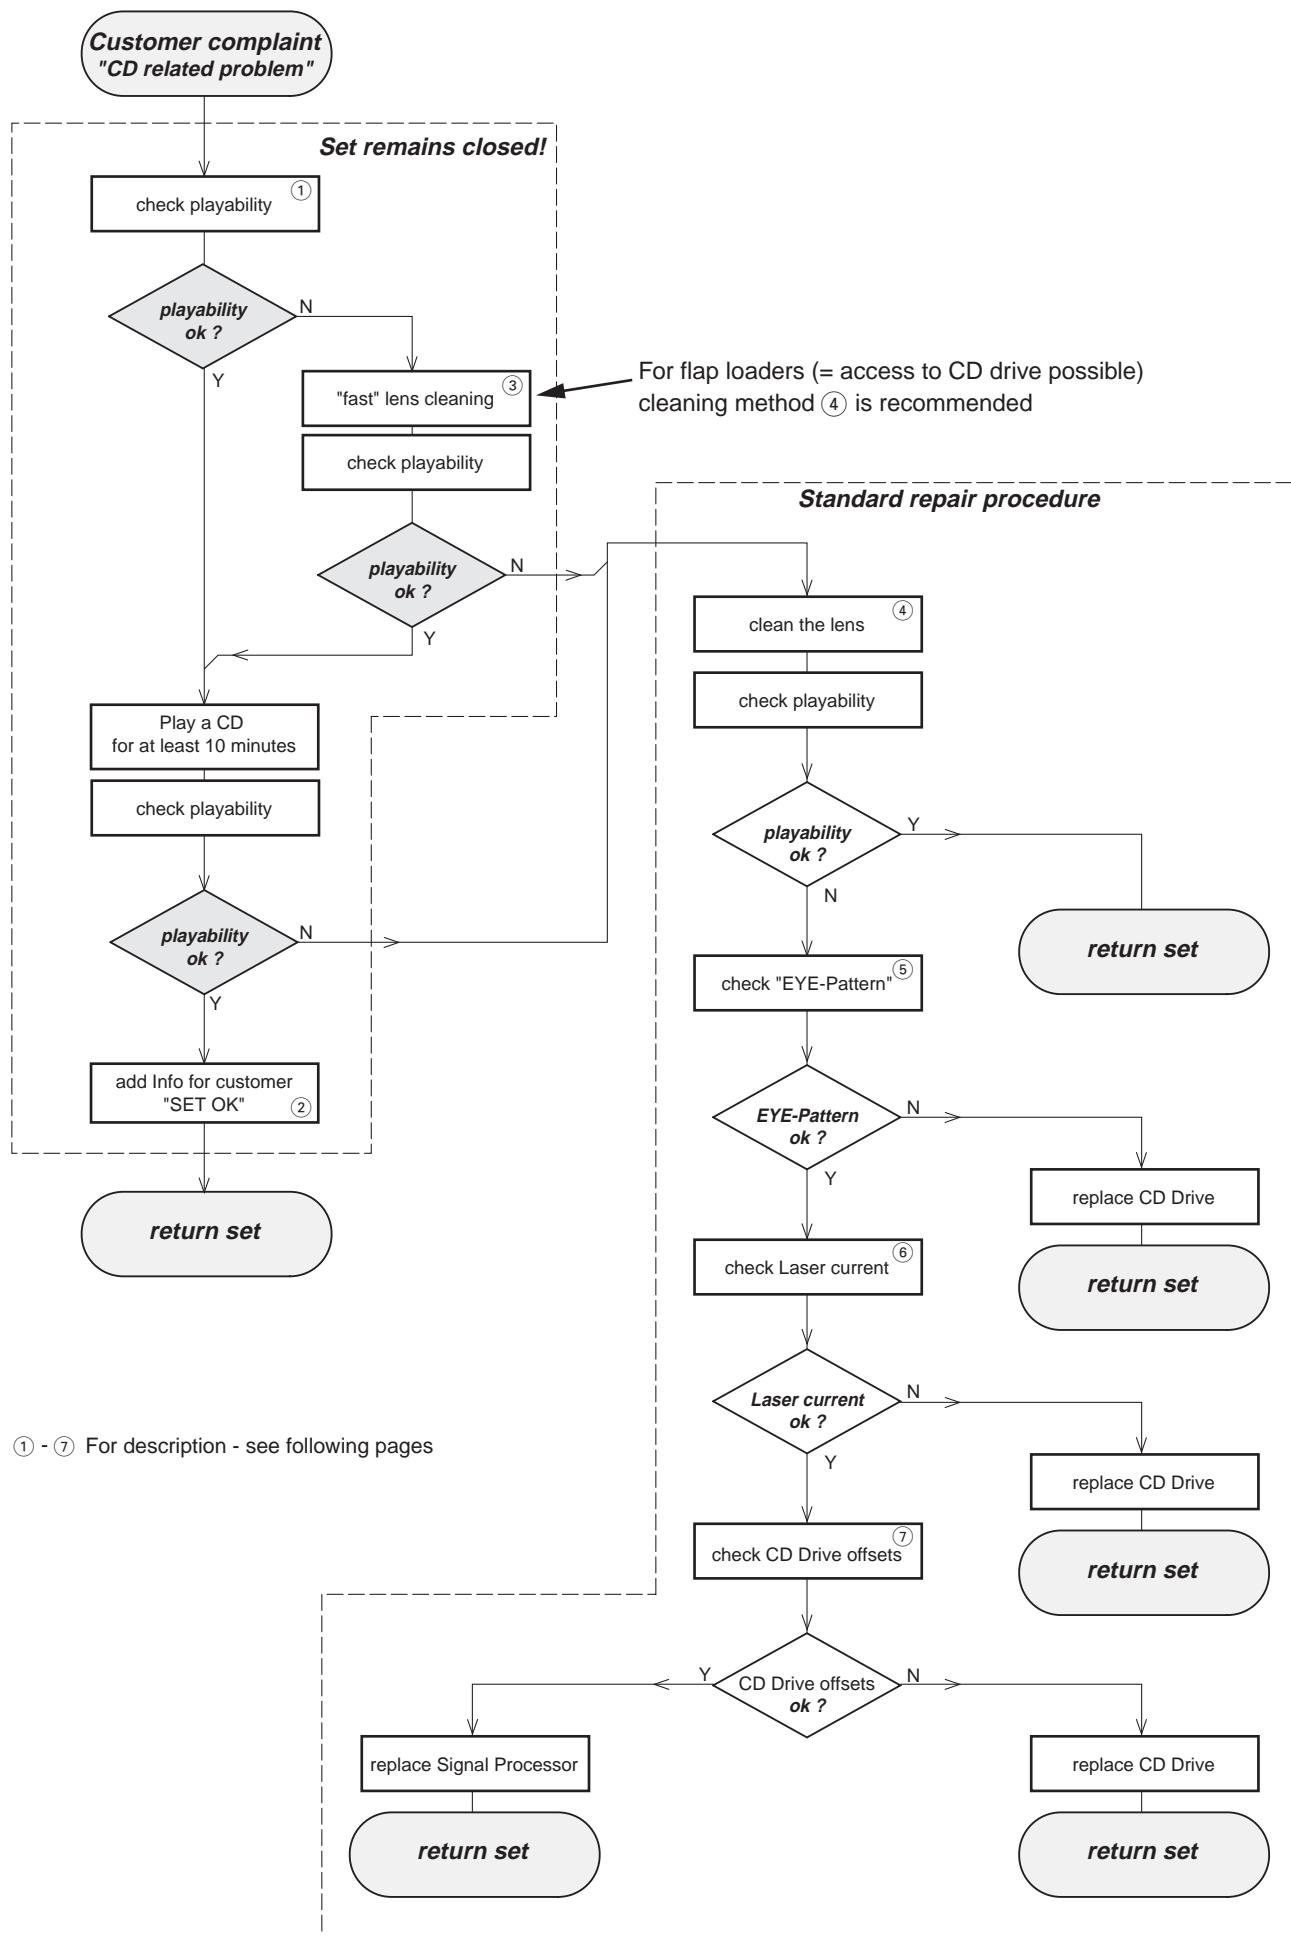

For additional questions please contact your local repair-helpdesk.

SERVICE INSTRUCTION

Safety regulations require that after a repair, the set must be returned in its original condition. Pay in particular attention to the following points:

- Route the wire trees correctly and fix them with the mounted cable clamps.
- Check the insulation of the AC Power lead for external damage.
- Check the strain relief of the AC Power cord for proper function.
- Check the electrical DC resistance between the AC Power Plug and the secondary side (only for sets which have a AC Power isolated power supply):
- 1. Unplug the AC Power cord and connect a wire between the two pins of the AC Power plug.
- 2. Set the AC Power switch to the "on" position (keep the AC Power cord unplugged!).
- 3. Measure the resistance value between the pins of the AC Power plug and the metal shielding of the tuner or the aerial connection on the set. The reading should be larger than 4.5 Mohm (For U.S. it should be between 4.2 Mohm and 12 Mohm).
- 4. Switch "off" the set, and remove the wire between the two pins of the AC Power plug.
- Check the cabinet for defects, to avoid touching of any inner parts by the customer.

CD PLAYABILITY CHECK

CD PLAYABILITY CHECK

(1)

PLAYABILITY CHECK

For sets which are compatible with **CD-RW** discs
use CD-RW Printed Audio Disc 7104 099 96611
TR 3 (Fingerprint)
TR 8 (600 μ Black dot) **maximum at 01:00**

- playback of these two tracks without audible disturbance
playing time for: Fingerprint \geq 10seconds
Black dot from 00:50 to 01:10
- jump forward/backward (search) within a reasonable time

For all other sets
use CD-DA SBC 444A 4822 397 30245
TR 14 (600 μ Black dot) **maximum at 01:15**
TR 19 (Fingerprint)
TR 10 (1000 μ wedge)

- playback of all these tracks without audible disturbance
playing time for: 1000 μ wedge \geq 10seconds
Fingerprint \geq 10seconds
Black dot from 01:05 to 01:25
- jump forward/backward (search) within a reasonable time

(4)

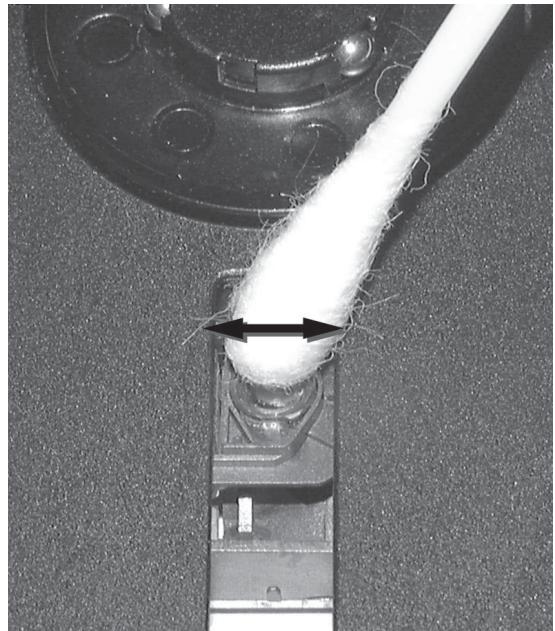

LIQUID LENS CLEANING

Before touching the lens it is advised to clean the surface of the lens by blowing clean air over it.
This to avoid that little particles make scratches on the lens.

Because the material of the lens is synthetic and coated with a special anti-reflectivity layer, cleaning must be done with a non-aggressive cleaning fluid. It is advised to use "Cleaning Solvent B4-No2", available with codenumber 4822 389 10026.

The actuator is a very precise mechanical component and may not be damaged in order to guarantee its full function. Clean the lens gently (don't press too hard) with a soft and clean cotton bud moistened with the special lens cleaner.

The direction of cleaning must be in the way as indicated in the picture below.

(2)

CUSTOMER INFORMATION

It is proposed to add an addendum sheet to the set which informs the customer that the set has been checked carefully - but no fault was found.
The problem was obviously caused by a scratched, dirty or copy-protected CD. In case problems remain, the customer is requested to contact the workshop directly.
The lens cleaning (method ③) should be mentioned in the addendum sheet.

The final wording in national language as well as the printing is under responsibility of the Regional Service Organizations.

(3)

FAST LENS CLEANING (*dry brush*)

Use lens cleaning CD
SBC AC300 9082 100 00043

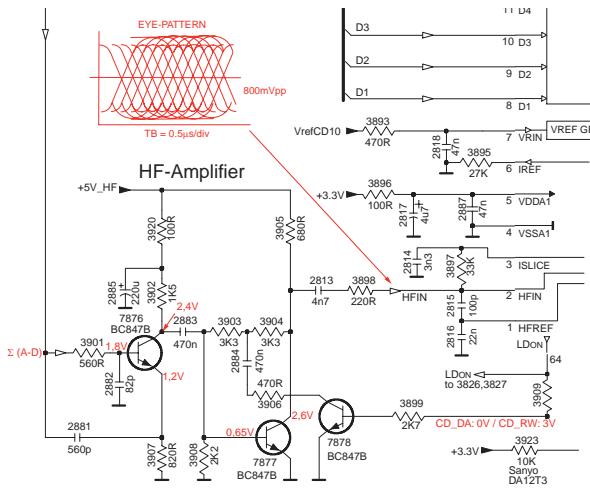

Insert the lens cleaning CD, press PLAY and follow the voice guide's instructions on the CD.

CD PLAYABILITY CHECK

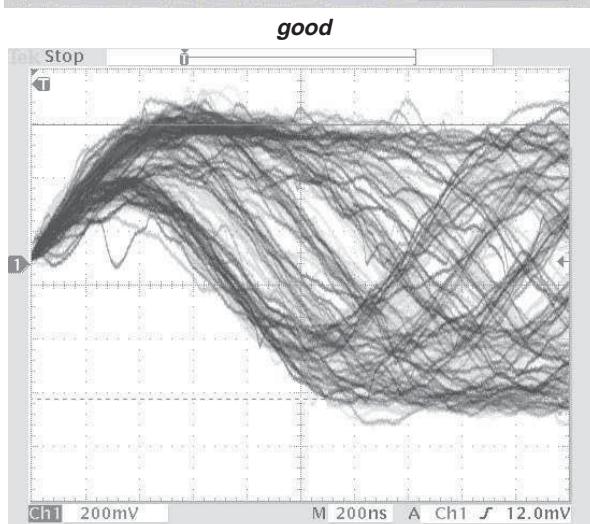

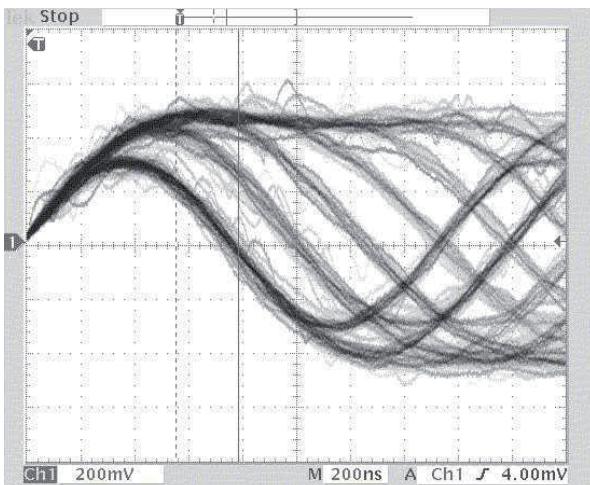

(5)

EYE-PATTERN SIGNAL – JITTER MEASUREMENT

Measure the signal on the input of the Signal processor using an **analog** oscilloscope. Please find the exact measuring point in your Service Manual.

See below examples of the signal. Amplitude should read at least 700mVpp using SBC444A.

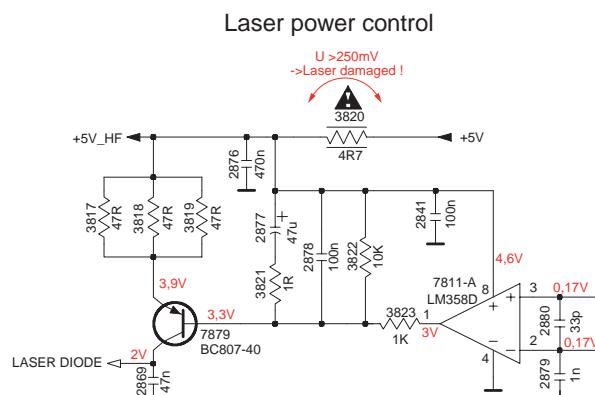

If the oscilloscope shows a signal like the 'bad' one, and/or the amplitude decreases within 1 minute - the CD drive has to be replaced.

(6)

CD DRIVE – LASER CURRENT MEASUREMENT

The laser current can be measured as a voltage drop on a resistor. The resistor is marked in every Service Manual. The value depends on the type of CD drive.

	typical value	most probable defect
VAMxxxx	: 150-230mV	$\geq 350\text{mV}$
MCDxx	: 170-230mV	$\geq 300\text{mV}$
DA1x	: 210-250mV	$\geq 350\text{mV}$
DA2x	: 175-200mV	$\geq 250\text{mV}$
Use SBC444A (CD-DA) for measurement.		

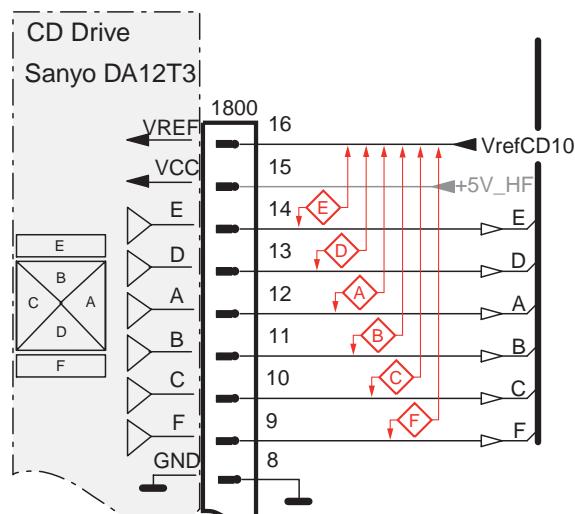

CD DRIVE – OFFSET MEASUREMENT

The photodiodes of the CD-drive may have an offset. These offsets have to be compensated by the signal processor. High offsets can lead to poor playability of some CDs (skipping tracks).

To measure the offset values, start the **Service Test Program** - section "Focus Test" without a CD.

The offsets can be measured with a DC Millivoltmeter directly on the connector (see drawing below). Pin numbering varies from drive to drive.

The values from diode A-D should read $0 \pm 10\text{mV}$. Diodes E and F are less critical.

If one of the offsets is higher than $\pm 10\text{mV}$ the CD drive has to be replaced. Otherwise replace the Signal Processor.

TECHNICAL SPECIFICATIONS

AMPLIFIER

Output power	30 W RMS
Signal-to-noise ratio	≥ 65 dBA
Frequency response	100 – 18kHz, ± 3 dB
Input sensitivity AUX	0.5 V (max. 1 V)
Impedance loudspeakers	≥ 6 Ω
Impedance headphones	32 Ω -1000 Ω
.....	<15mW

CD PLAYER

Frequency range	100 – 18kHz
Signal-to-noise ratio	65 dBA

TUNER

FM wave range	87.5 – 108 MHz
MW wave range	531 – 1602 kHz
Number of presets	40
Antenna	

FM	75 Ω wire
MW	Loop antenna

USB PLAYER

USB	V2.0/V1.1
.....	support MP3 and WMA files
Number of albums/ folders	maximum 99
Number of tracks/titles	maximum 999

SPEAKERS

Bass reflex system	
Dimensions (w x h x d) ..	158 x 250x 185 (mm)

GENERAL INFORMATION

AC Power	110 – 240V, 50 Hz/60Hz
Dimensions (w x h x d, with/without the stand)	211 x 250 x 160/211 x 250 x 126 (mm)
Weight(with/without speakers)	3.7 / 1.33 kg
Standby power consumption	<2 W
Eco power standby	<1 W

Specifications and external appearance are subject to change without notice.

SERVICE TOOLS

Audio signal disc SBC 429.....	4822 397 30184
Playability test disc SBC 444.....	4822 397 30245
Test disc 5 (disc without errors) +	
Test disc 5A (disc with dropout errors, black spots and fingerprints)	
SBC 426/426A	4822 397 30096
Burn in test disc (65 min. 1kHz signal at -30 dB level without "pause")	4822 397 30155

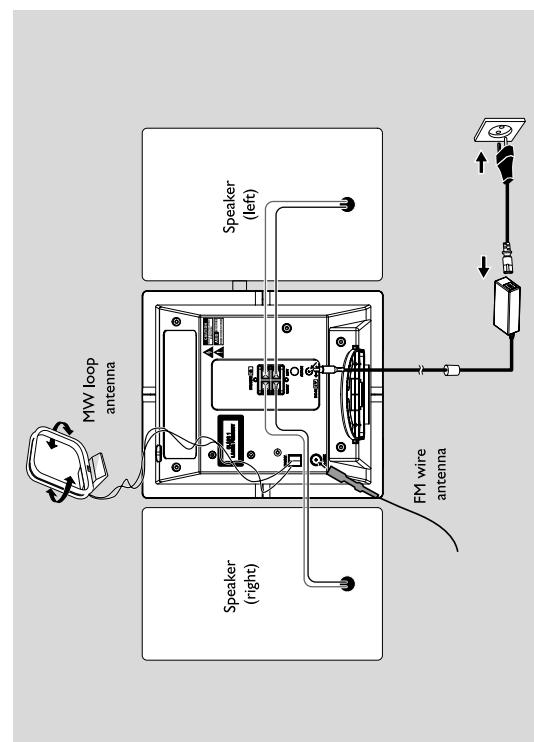

AVAILABLE ESD PROTECTION EQUIPMENT

anti-static table mat	large 1200x650x1.25mm	4822 466 10953
	small 600x650x1.25m	4822 466 10958
anti-static wristband		4822 395 10223
connection box (3 press stud connections, 1MΩ)		4822 320 11307
extendible cable (2m, 2MΩ, to connect wristband to connection box)		4822 320 11305
connecting cable (3m, 2MΩ, to connect table mat to connection box)		4822 320 11306
earth cable (1MΩ, to connect any product to mat or to connection box)		4822 320 11308
KIT ESD3 (combining all 6 prior products - small table mat)		4822 310 10671
wristband tester		4822 344 13999

Connection

Connection

CONNECTION AND CONTROLS

Rear connections

Warning:

- Never make or change connections with the mains supply switched on.
- Install your set near the AC outlet and where the AC power plug can be reached easily.

(A) Speaker connections

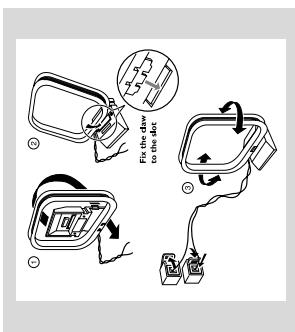

Use the supplied speakers only. Using other speakers can damage the set or the sound quality will be negatively affected.

- Connect the cable of the left speaker to **LEFT** (red and black) and the cable of the right speaker to **RIGHT** (red and black) as follows:
 - a. Press the clip of the red terminal and fully insert the stripped portion of the colored (or marked) speaker cable into the socket, then release the clip
 - b. Press the clip of the black terminal and fully insert the stripped portion of the black (or unmarked) speaker cable into the socket, then release the clip

(B) Antenna connections

MW antenna

Connect the supplied MW loop antenna to the "AM aerial" terminal. Adjust the position of the antenna for optimal reception.

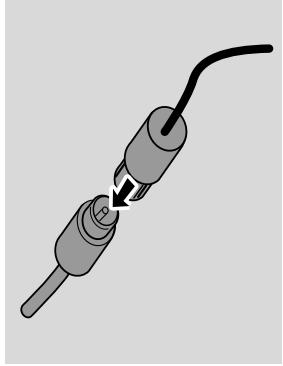

- Position the antenna as far as possible from a TV, VCR or other radiation source.

FM antenna

The wire antenna supplied can only be used to receive nearby stations. For better reception we recommend using a cable antenna system or an outdoor antenna.

- ① Extend the wire antenna and fit it to FM ANTENNA as shown below

Note: If you are using a cable antenna system or an outdoor antenna, fit the antenna plug instead of the wire antenna to FM ANTENNA.

- ② Move the antenna in different positions for optimal reception (as far away as possible from the TV/VCR or other radiation sources)
- ③ Fix the antenna's end to the wall.

Helpful hints:

- To receive optimal radio reception, put the main unit and the antennas as far away as possible from the power adaptor.

Connecting an additional appliance

By connecting a USB mass storage device (including USB flash memory, USB flash players or memory cards) to the Hi-Fi system, you can enjoy the music stored on the external device through the powerful speakers of Hi-Fi system.

- ① Insert the USB device's USB plug into the socket on the front panel of the main set.

Or, for the devices with USB cable:

- a. Insert one plug of the USB cable (not supplied) to the socket on the front panel of the main set.
- b. Insert the other plug of the USB cable to the USB output terminal of the USB device.

Or,

for the memory card:

- a. Insert the memory card into a card reader (not supplied).
- b. Use a USB cable (not supplied) to connect the card reader to the socket on the front panel of the main set.

Connecting a non-USB device

It is possible to use an additional appliance, e.g. TV/VCR or CD recorder with the set. On MCM279, you can playback music from an external source.

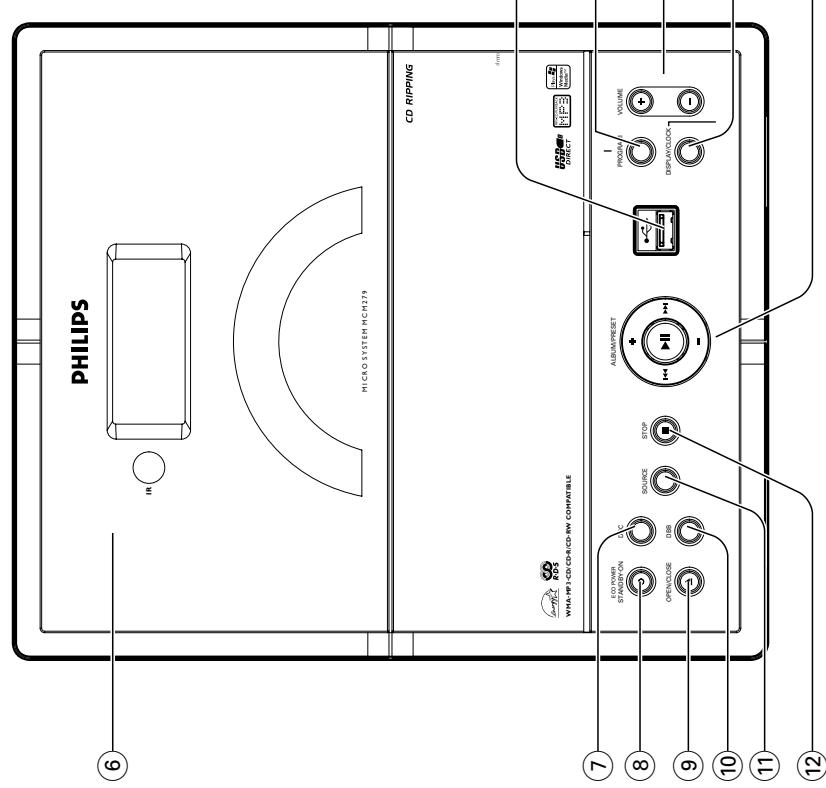

- ① Insert one plug of the audio cable (not supplied) to the socket **AUX IN** at the rear panel of the main set.
- ② Connect the other end of the audio cable to the **AUDIO OUT** terminal of the additional appliance.
- ③ Select **AUX** mode on the set.

Helpful hints:

- Always refer to the owner's manual of other equipment for complete connection.

Controls

Controls

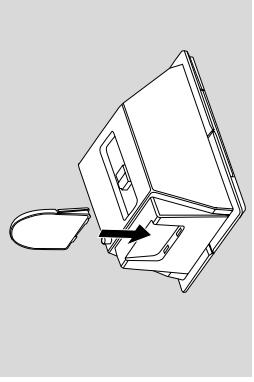

Controls on the set (illustrations) on page 3)

- (1) - jack for the external USB mass storage device
- (2) **PROGRAM**
- **CD/USB:** programs tracks
- **Tuner:** programs preset radio stations
- (3) **VOLUME**
- adjusts the volume level
- (4) **DISPLAY/CLOCK**
- **Clock:**
- displays the set time
- **In standby mode:** enters the clock setting mode (press and hold for more than 2 seconds)
- (5) **ALBUM/PRESET + / -**
- **CD/USB:** selects albums (for MP3/WMA only)
- **TUNER:** selects a preset radio station
- (6) - sensor for the infrared remote control
- (7) **STANDBY-ON/ECO POWER**
- **Standby:** always point the remote control towards this sensor.
- (8) **DYNAMIC BASS BOOST**
- **DBB:** turns the bass enhancement on/off
- (9) **OPEN/CLOSE ▲**
- opens/closes the CD door
- (10) **DYNAMIC BASS BOOST**
- **DBB (Dynamic Bass Boost)**
- (11) **SOURCE**
- selects sound source **CD, USB, TUNER, or AUX**
- (12) **STOP CD/USB:** stops playback; erase a program

CONNECTION AND CONTROLS

CONNECTION AND CONTROLS

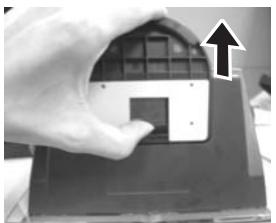

Controls

Remote control	<p>AUX</p> <ul style="list-style-type: none"> - selects the audio input from an additional connected appliance. - In standby/Eco-power mode: switches the set on and selects the audio input from an additional connected appliance <p>(3) SLEEP</p> <ul style="list-style-type: none"> - set the sleep timer <p>(4) MUTE</p> <ul style="list-style-type: none"> - switches the sound off temporarily <p>(5) ◀ / ▶</p> <ul style="list-style-type: none"> - CD/USB: skips or searches CD tracks backwards/forwards - Tuner: tunes to radio stations <p>(6) USB DEL</p> <ul style="list-style-type: none"> - deletes one file or all files stored on the external USB device. <p>(7) VOL + / -</p> <ul style="list-style-type: none"> - adjusts the volume level <p>(8) REPEAT</p> <ul style="list-style-type: none"> - selects continuous playback <p>(9) SHUFFLE</p> <ul style="list-style-type: none"> - selects random playback <p>(10) PROG</p> <ul style="list-style-type: none"> - CD/USB: programs tracks <p>Source buttons</p> <p>USB</p> <ul style="list-style-type: none"> - selects USB source <p>In standby/Eco-power mode: switches the set on and selects USB source.</p> <p>CD</p> <ul style="list-style-type: none"> - selects CD source <p>In standby/Eco-power mode: switches the set on and selects CD source.</p> <p>TUNER</p> <ul style="list-style-type: none"> - selects TUNER source and toggles between the wavebands: FM and MW <p>In standby/Eco-power mode: switches the set on and selects TUNER source</p> <p>Notes for remote control:</p> <ul style="list-style-type: none"> - First select the source you wish to control by pressing one of the source select keys on the remote control (for example CD, TUNER). - Then select the desired function (for example ▶ / II, ▲ / ▼). <p>① press briefly to switch the set on or off (standby ECO POWER);</p> <p>In standby or Eco Power mode: press and hold to toggle between Standby and ECO PCWVER mode (power-saving mode)</p> <p>Source buttons</p> <p>USB</p> <ul style="list-style-type: none"> - selects USB source <p>In standby/Eco-power mode: switches the set on and selects USB source.</p> <p>CD</p> <ul style="list-style-type: none"> - selects CD source <p>In standby/Eco-power mode: switches the set on and selects CD source.</p> <p>TUNER</p> <ul style="list-style-type: none"> - selects TUNER source and toggles between the wavebands: FM and MW <p>In standby/Eco-power mode: switches the set on and selects TUNER source</p>
Placing MCM279	<p>MCM279 is supplied with a stand, you may attach or detach the stand to/from the main set</p> <p>① Locate the bottom of the main unit and find the slot, then slide the stand in the slot until it stops, as indicated in the figure below.</p> 

DISASSEMBLY DIADRAMS

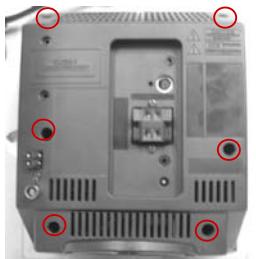

A. Remove stand

Please click and pull it out.

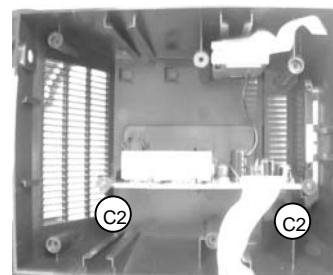

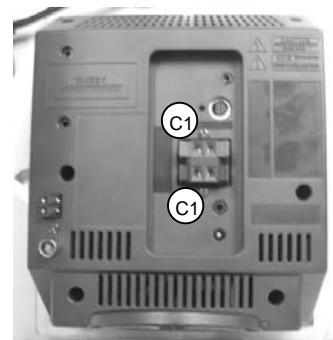

B. Remove Top Cabinet

Remove screws MP 3x10 - 6 pcs.

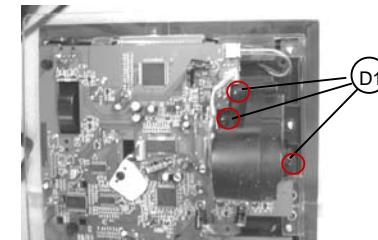

C. Remove Amplifier board

- C1: Remove screws 2 pcs.
- C2: Remove screws 2 pcs.

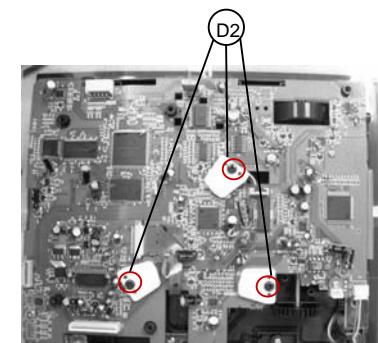

D. Remove Main board

- D1: Remove screws MP 3x10 - 3 pcs.

- D2: Remove screws MP 3x10 - 3 pcs.

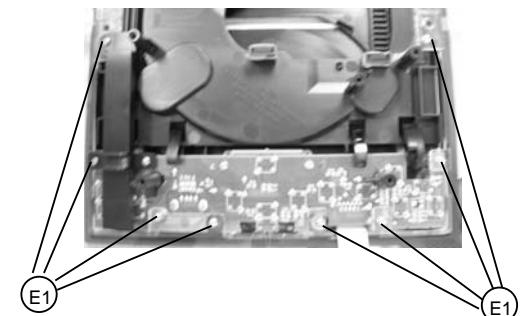

Then remove lens frame cosmetic top_right&left

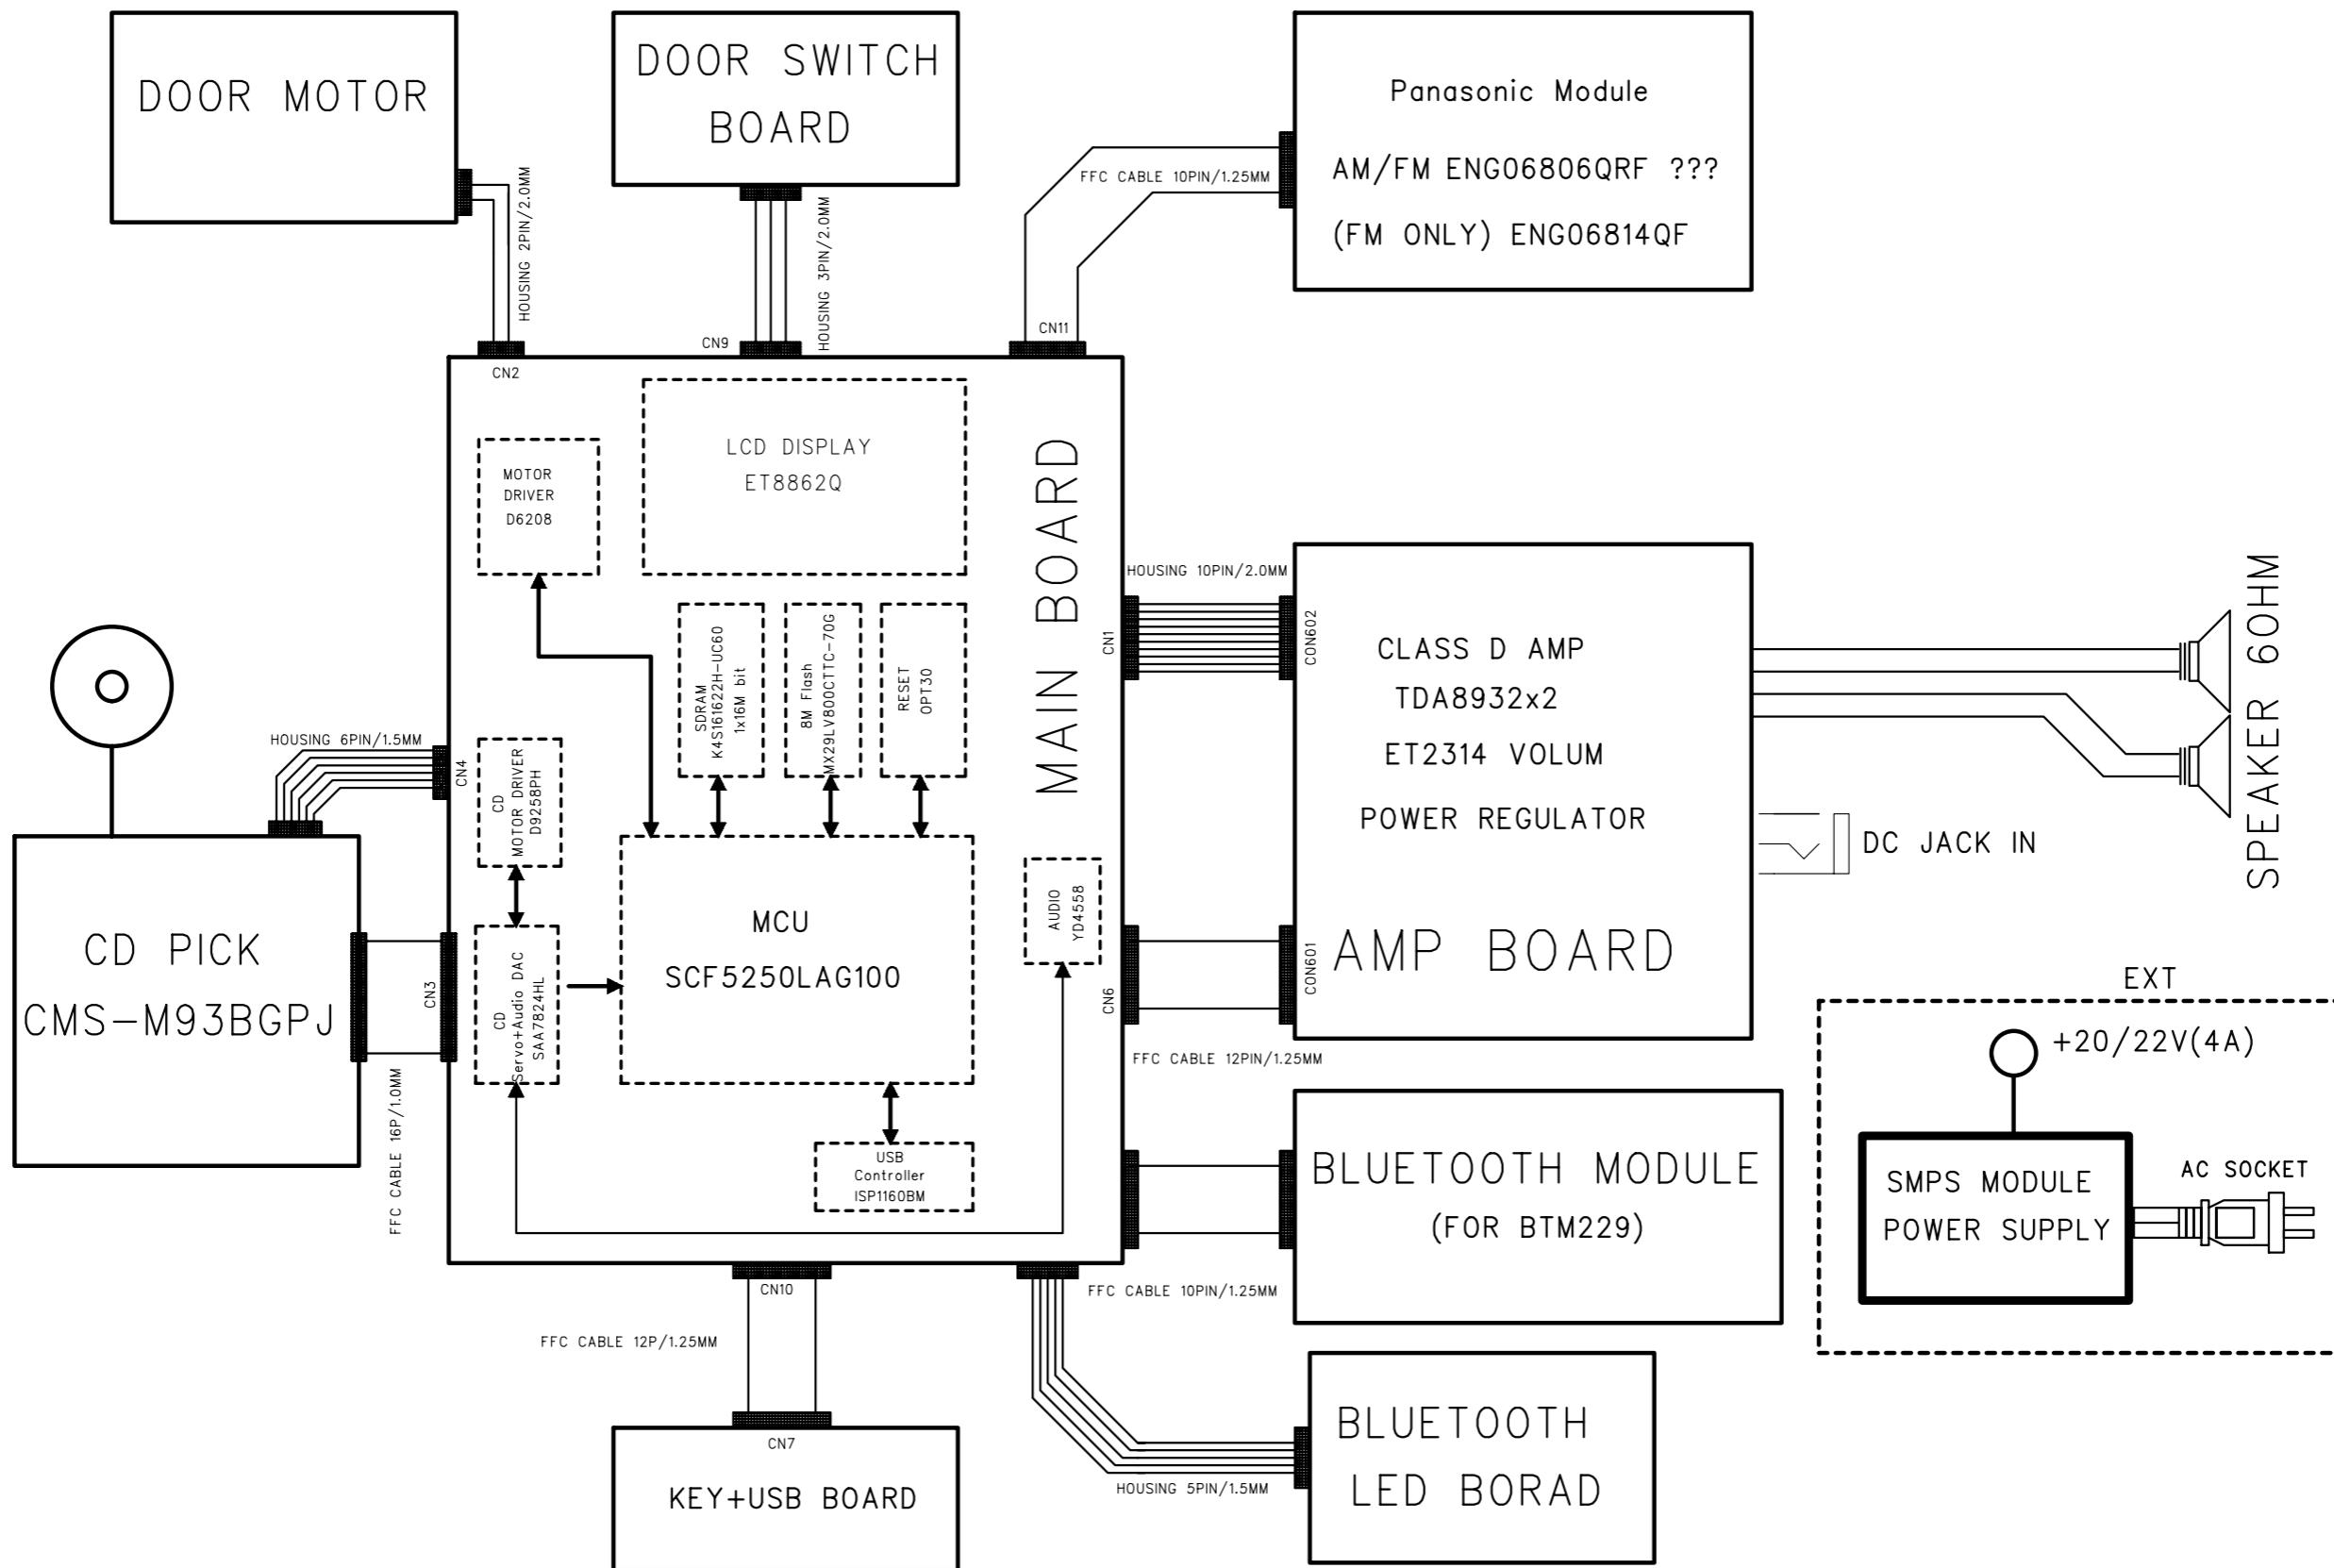

E. Remove Key board

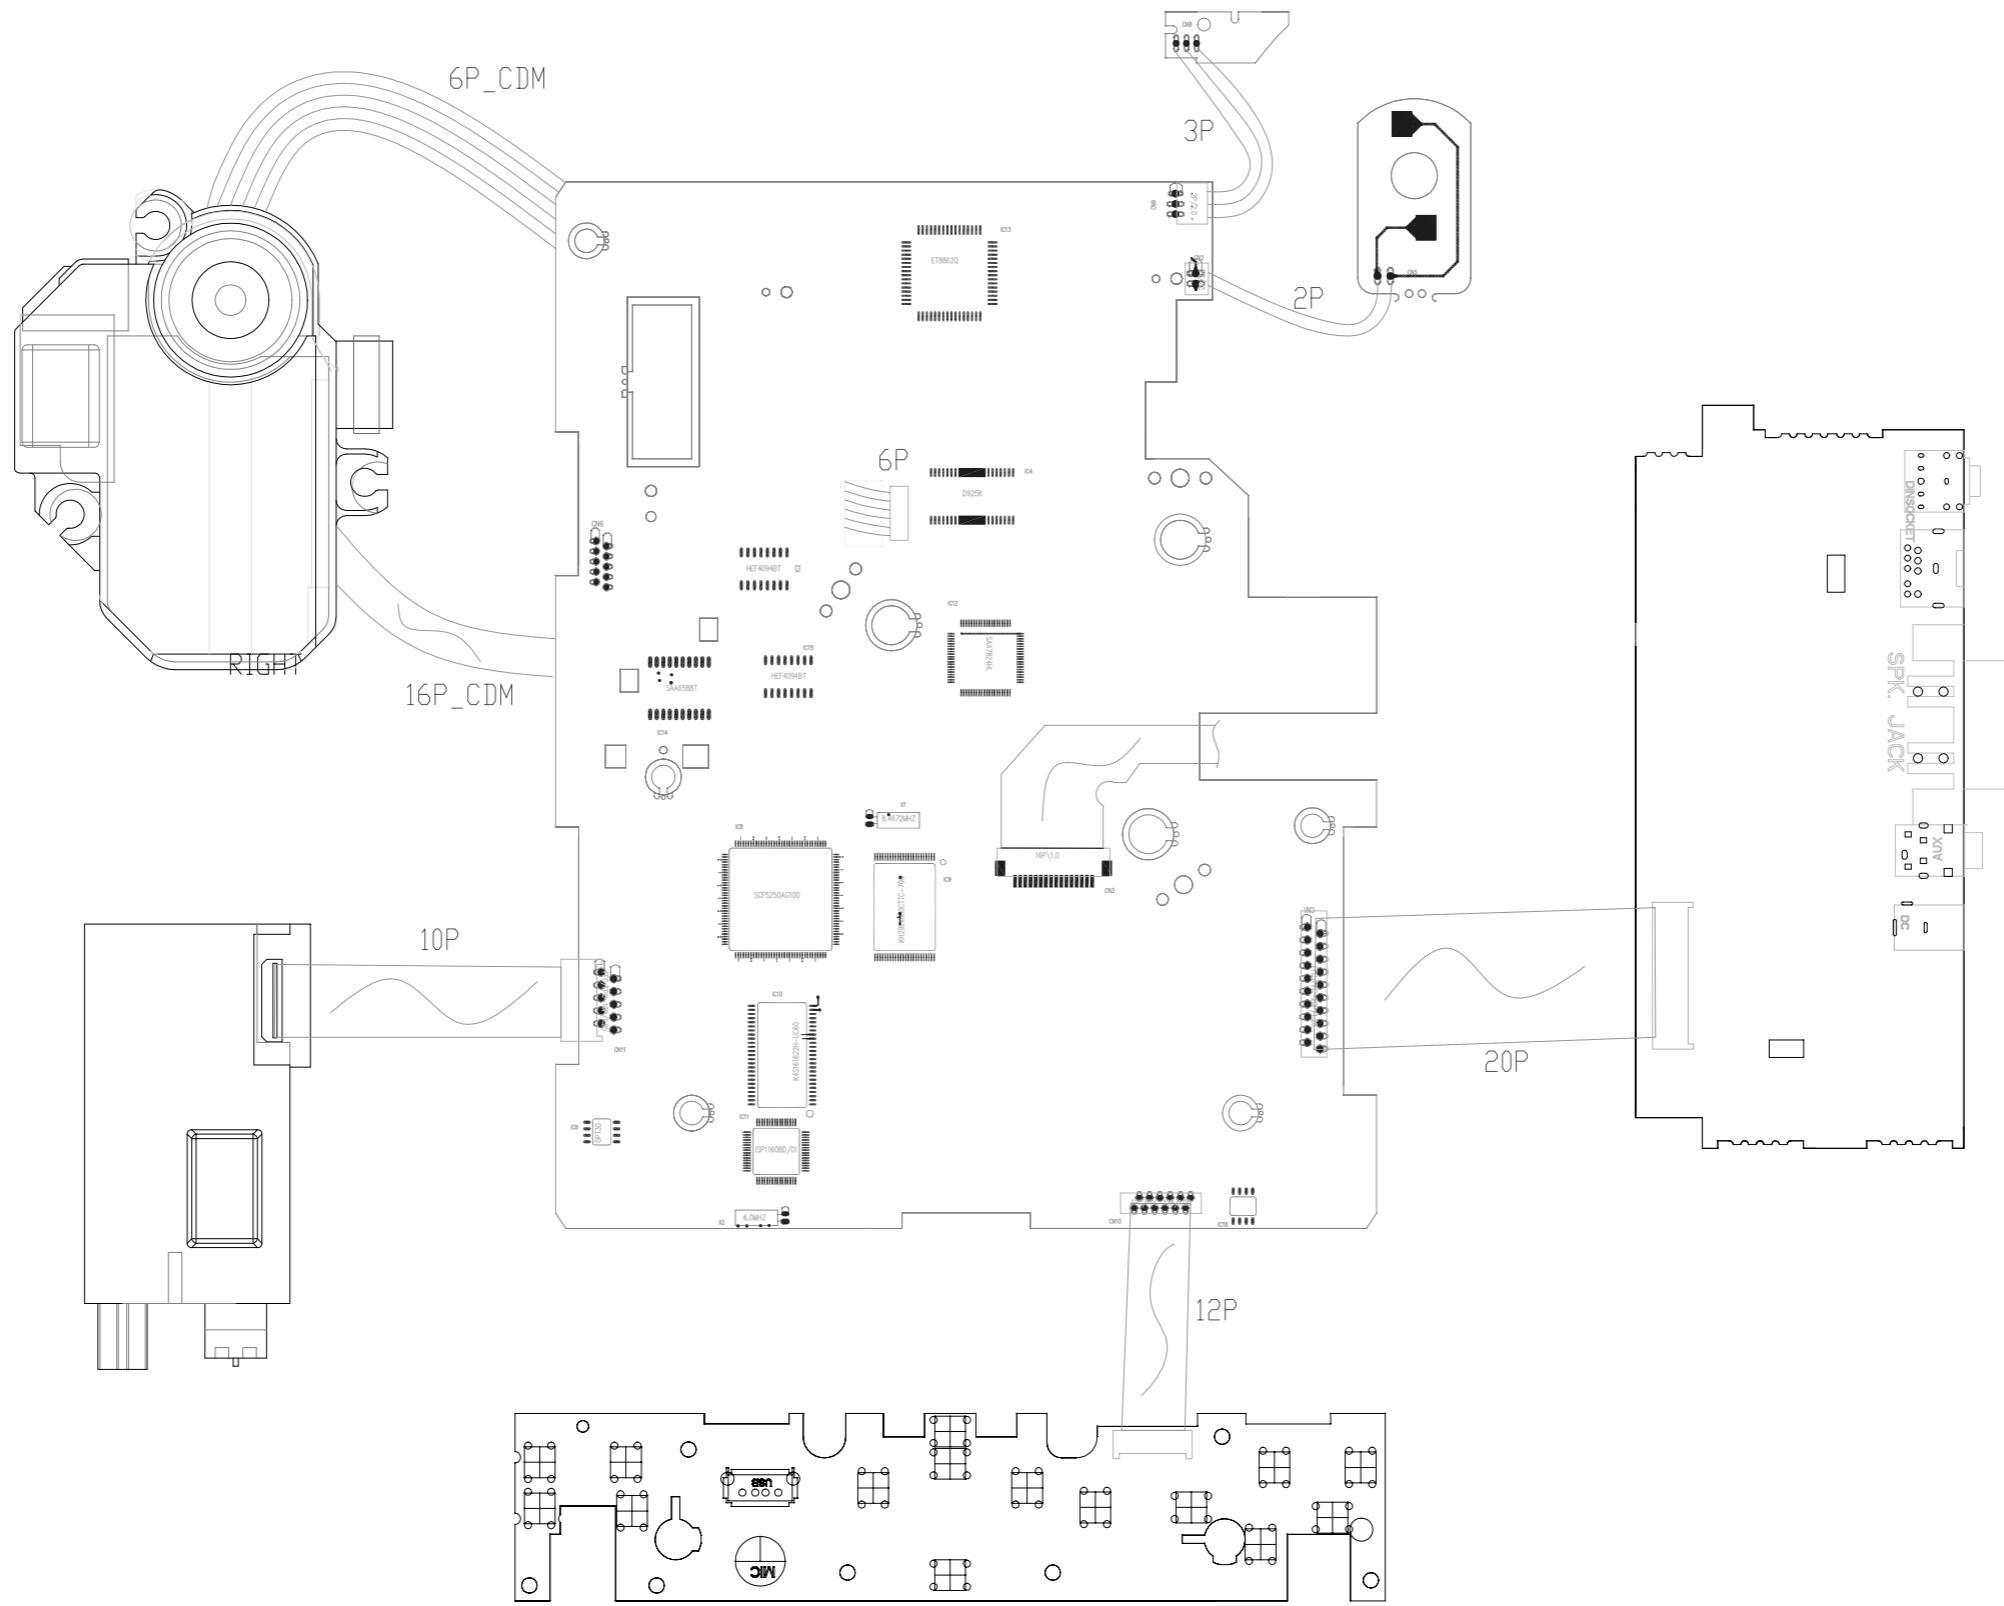

- E1: Remove screws MP 2x8 - 8 pcs.

Then remove lens frame cosmetic bottom_right&left
