

Some speakers sound fantastic on part of the music.

One of today's best speakers is famous for its highs. Another has been said to deliver the best bass, and a third is loved for its mid-range performance.

Each "best" speaker is terrific in its own particular area because it's engineered that way. To please people who are hung up on a particular kind of sound.

The new HPM-100 speaker system is different. It produces superlative sound across the whole spectrum.

That is not an accident.

Originally it was a challenge to our engineers: specialize in perfecting everything. Their response was to create a whole new universe of loudspeaker technology.

For the superhigh frequency range, to begin with, they gave the HPM-100 a

radically new kind of supertweeter: made with a newly developed substance called High Polymer Molecular film. This HPM film is used to convert electrical energy into sound. It does so with a degree of accuracy that was previously only a theory.

That's a lot to claim, but these speakers really are that different from everything that has gone before. They work without any magnets, voice coils or domes. In fact, without any moving parts at all.

The tweeter, mid-range driver and woofer all depart just as radically from conventional speaker technology. The key innovation in all of them is a process that turns out speaker cones heavily impregnated with carbon fibers. They are rigid and tough, but still thin and light. As a result, each of them can move easily, like a well-oiled piston, to produce high and middle and low frequencies that are clearer, more natural and far more transparent than anything you'd expect to hear from a four-way speaker system.

Talk to your high-fidelity dealer about the HPM-100.

Take along a favorite recording and listen to it alternately through HPM-100's and some comparably priced speakers. Especially speakers that sound fantastic on the high frequencies, or the low ones, or the middle range.

If there's something you like about each of today's best speakers, this is the one that can give it all to you.
