STEREO TURNTABLE SYSTEM

SPECIFICATIONS

Turntable

Platter	29 cm (11½ in.), aluminum-alloy diecast
Motor	Linear torque BSL (brushless and slotless) motor
Drive system	Direct drive
Control system	FG servo control system
Speed	33⅓ rpm, 45 rpm
Wow and flutter	0.03% (WRMS)*, 0.035% (WRMS) ±0.045% (DIN)
Signal-to-noise ratio	75 dB (DIN-B)
Automatic system	Lead-in, return, reject, repeat, record size selection

Tonearm

Type	Electronic tonearm, linear tracking
Pivot-to-stylus length	100 mm (4 in.)
Overall arm length	170 mm (6¾ in.)
Tracking error	±0.1°
Tracking force adjustment range	1.25 ±0.25 g
Cartridge	plug-in type, 6 g

SAFETY-RELATED COMPONENT WARNING!!

COMPONENTS IDENTIFIED BY SHADING AND MARK  ON THE SCHEMATIC DIAGRAMS AND IN THE PARTS LIST ARE CRITICAL TO SAFE OPERATION. REPLACE THESE COMPONENTS WITH SONY PARTS WHOSE PART NUMBERS APPEAR AS SHOWN IN THIS MANUAL OR IN SUPPLEMENTS PUBLISHED BY SONY.

Cartridge XL-250G

Type	Moving magnet type
Frequency response	10 Hz to 20,000 Hz
Channel separation	23 dB at 1 kHz
Output voltage	5 mV at 1 kHz, 5 cm/sec., 45°
Load impedance	50 to 100 kilohms
Tracking force	1.0 to 1.5 g (1.25 g recommended)
Stylus	Sony ND-250G
Weight	6 g

ATTENTION AU COMPOSANT AYANT RAPPORT À LA SÉCURITÉ!

LES COMPOSANTS IDENTIFIÉS PAR UNE TRAME ET UNE MARQUE  SUR LES DIAGRAMMES SCHÉMATIQUES ET LA LISTE DES PIÈCES SONT CRITIQUES POUR LA SÉCURITÉ DE FONCTIONNEMENT. NE REMPLACER CES COMPOSANTS QUE PAR DES PIÈCES SONY DONT LES NUMÉROS SONT DONNÉS DANS CE MANUEL OU DANS LES SUPPLÉMENTS PUBLIÉS PAR SONY.

SONY
SERVICE MANUAL

General

Power requirements AEP model: 220 V ac, 50/60 Hz
 UK model: 240 V ac, 50/60 Hz
 E model: 110 - 120 or 220 - 240 V ac adjustable, 50/60 Hz

Po

Power consumption 13 W

Dimensions

Approx. 355 × 88 × 370 mm (w/h/d)
 (14 × 3½ × 14½ in.)
 including projecting parts and controls
 Approx. 7.0 kg (15 lbs 7 oz), net
 Approx. 8.2 kg (18 lbs 2 oz), in shipping carton

0 dB = 0.775 V

FEATURES**Servo-controlled linear tracking tonearm**

A linear tracking tonearm is designed to duplicate the movement of the head which cuts the record master. Compared with a pivoted tonearm, a linear tracking arm has a very small tracking error (which means greatly reduced harmonic distortion) and almost no pressure on the inside wall of the groove (which means improved tracking ability and channel separation).

Biotracer electronic tonearm

The horizontal and vertical movement of the tonearm is monitored by the Biotracer's own sensors, and this information is transmitted to the tonearm by the tonearm's own linear motors to suppress resonance at low frequencies and to obtain the maximum signal-to-noise ratio.

A microprocessor controls three motors

The movement of the turntable, the tonearm and the turntable module is controlled by a microcomputer. When you press the START/STOP key, the module will close, the turntable will rotate and the tonearm will lower onto the record.

Fully automatic system

With the module closed, automatic record play and stylus up/down are operated by the "feather-touch" function key on the front panel. The record size is automatically set by a photo sensor system. If no record is on the turntable, the tonearm will not descend but will automatically return to the arm rest. A muting system activates when the tonearm is lifted and deactivates after the tonearm lowers onto a record so there is no need to turn the amplifier volume down every time a stylus is placed on a record.

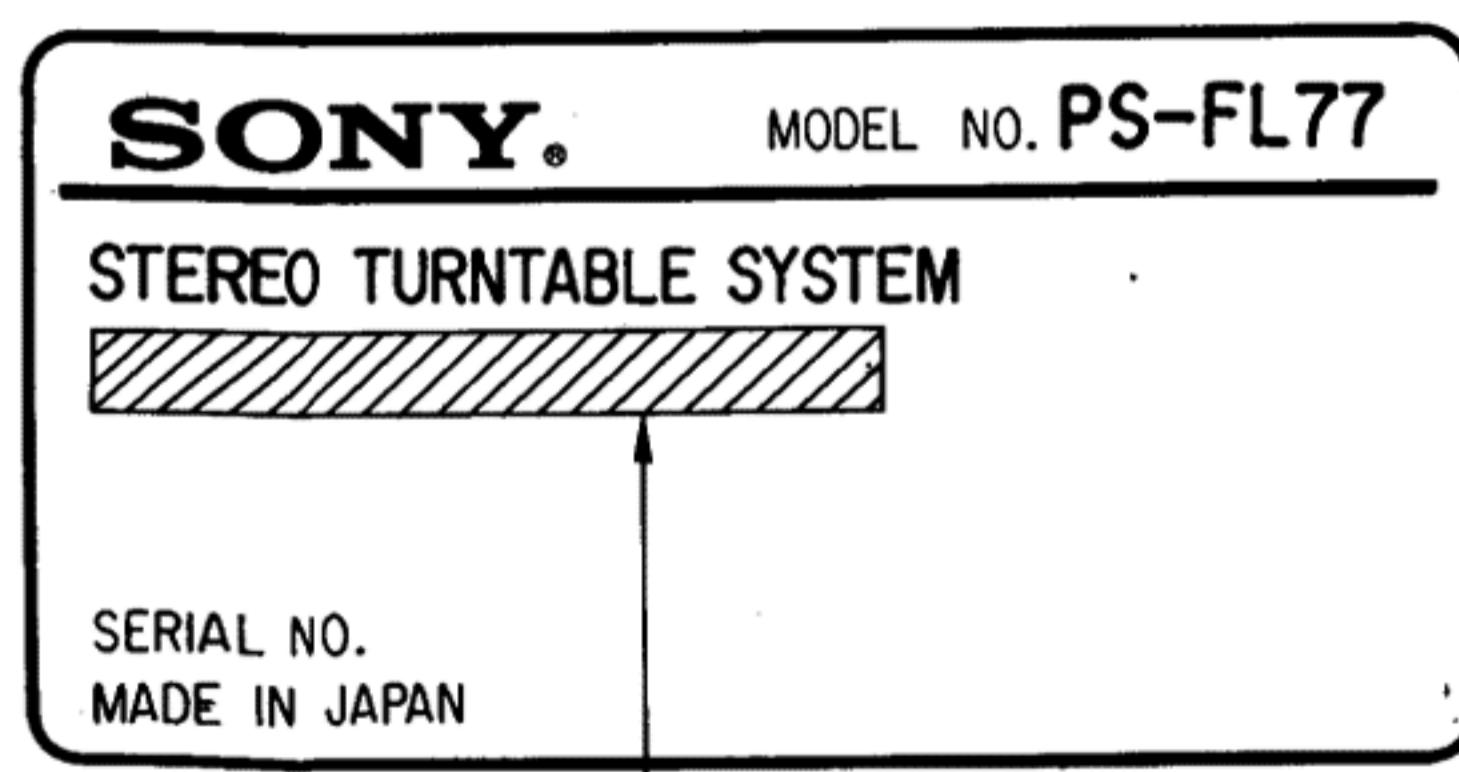

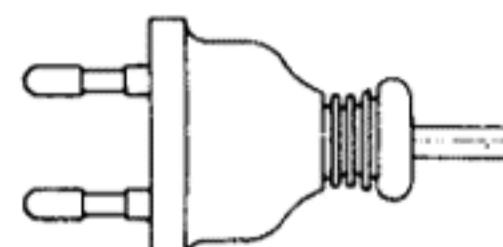

NOTES ON REPAIR

- In this set, the voltage is applied to the power supplying line ($\pm 23V$) even if the POWER switch is turned OFF.
- When removing the bottom plate —
- When POWER switch (S4) turns ON with bottom plate removed, MD motor (M901) and the gear continue to rotate and they do not stop. But, it is not broken.
 1. When CLOSE END switch (S3) on the switch board and POWER switch (S4) turn ON, the motor dose not begin to rotate.
 2. When CLOSE END switch is pressed, the motor stops even if the motor is rotating.
 3. When START switch (S502) is pressed, MD motor starts rotating. But, it stops if the disposition of 1. or 2. is performed.
 4. Release CLOSE END switch (S3) when MD motor stops rotating.

— Power Cord —

E₁ model: euro-plug
1-555-734-00

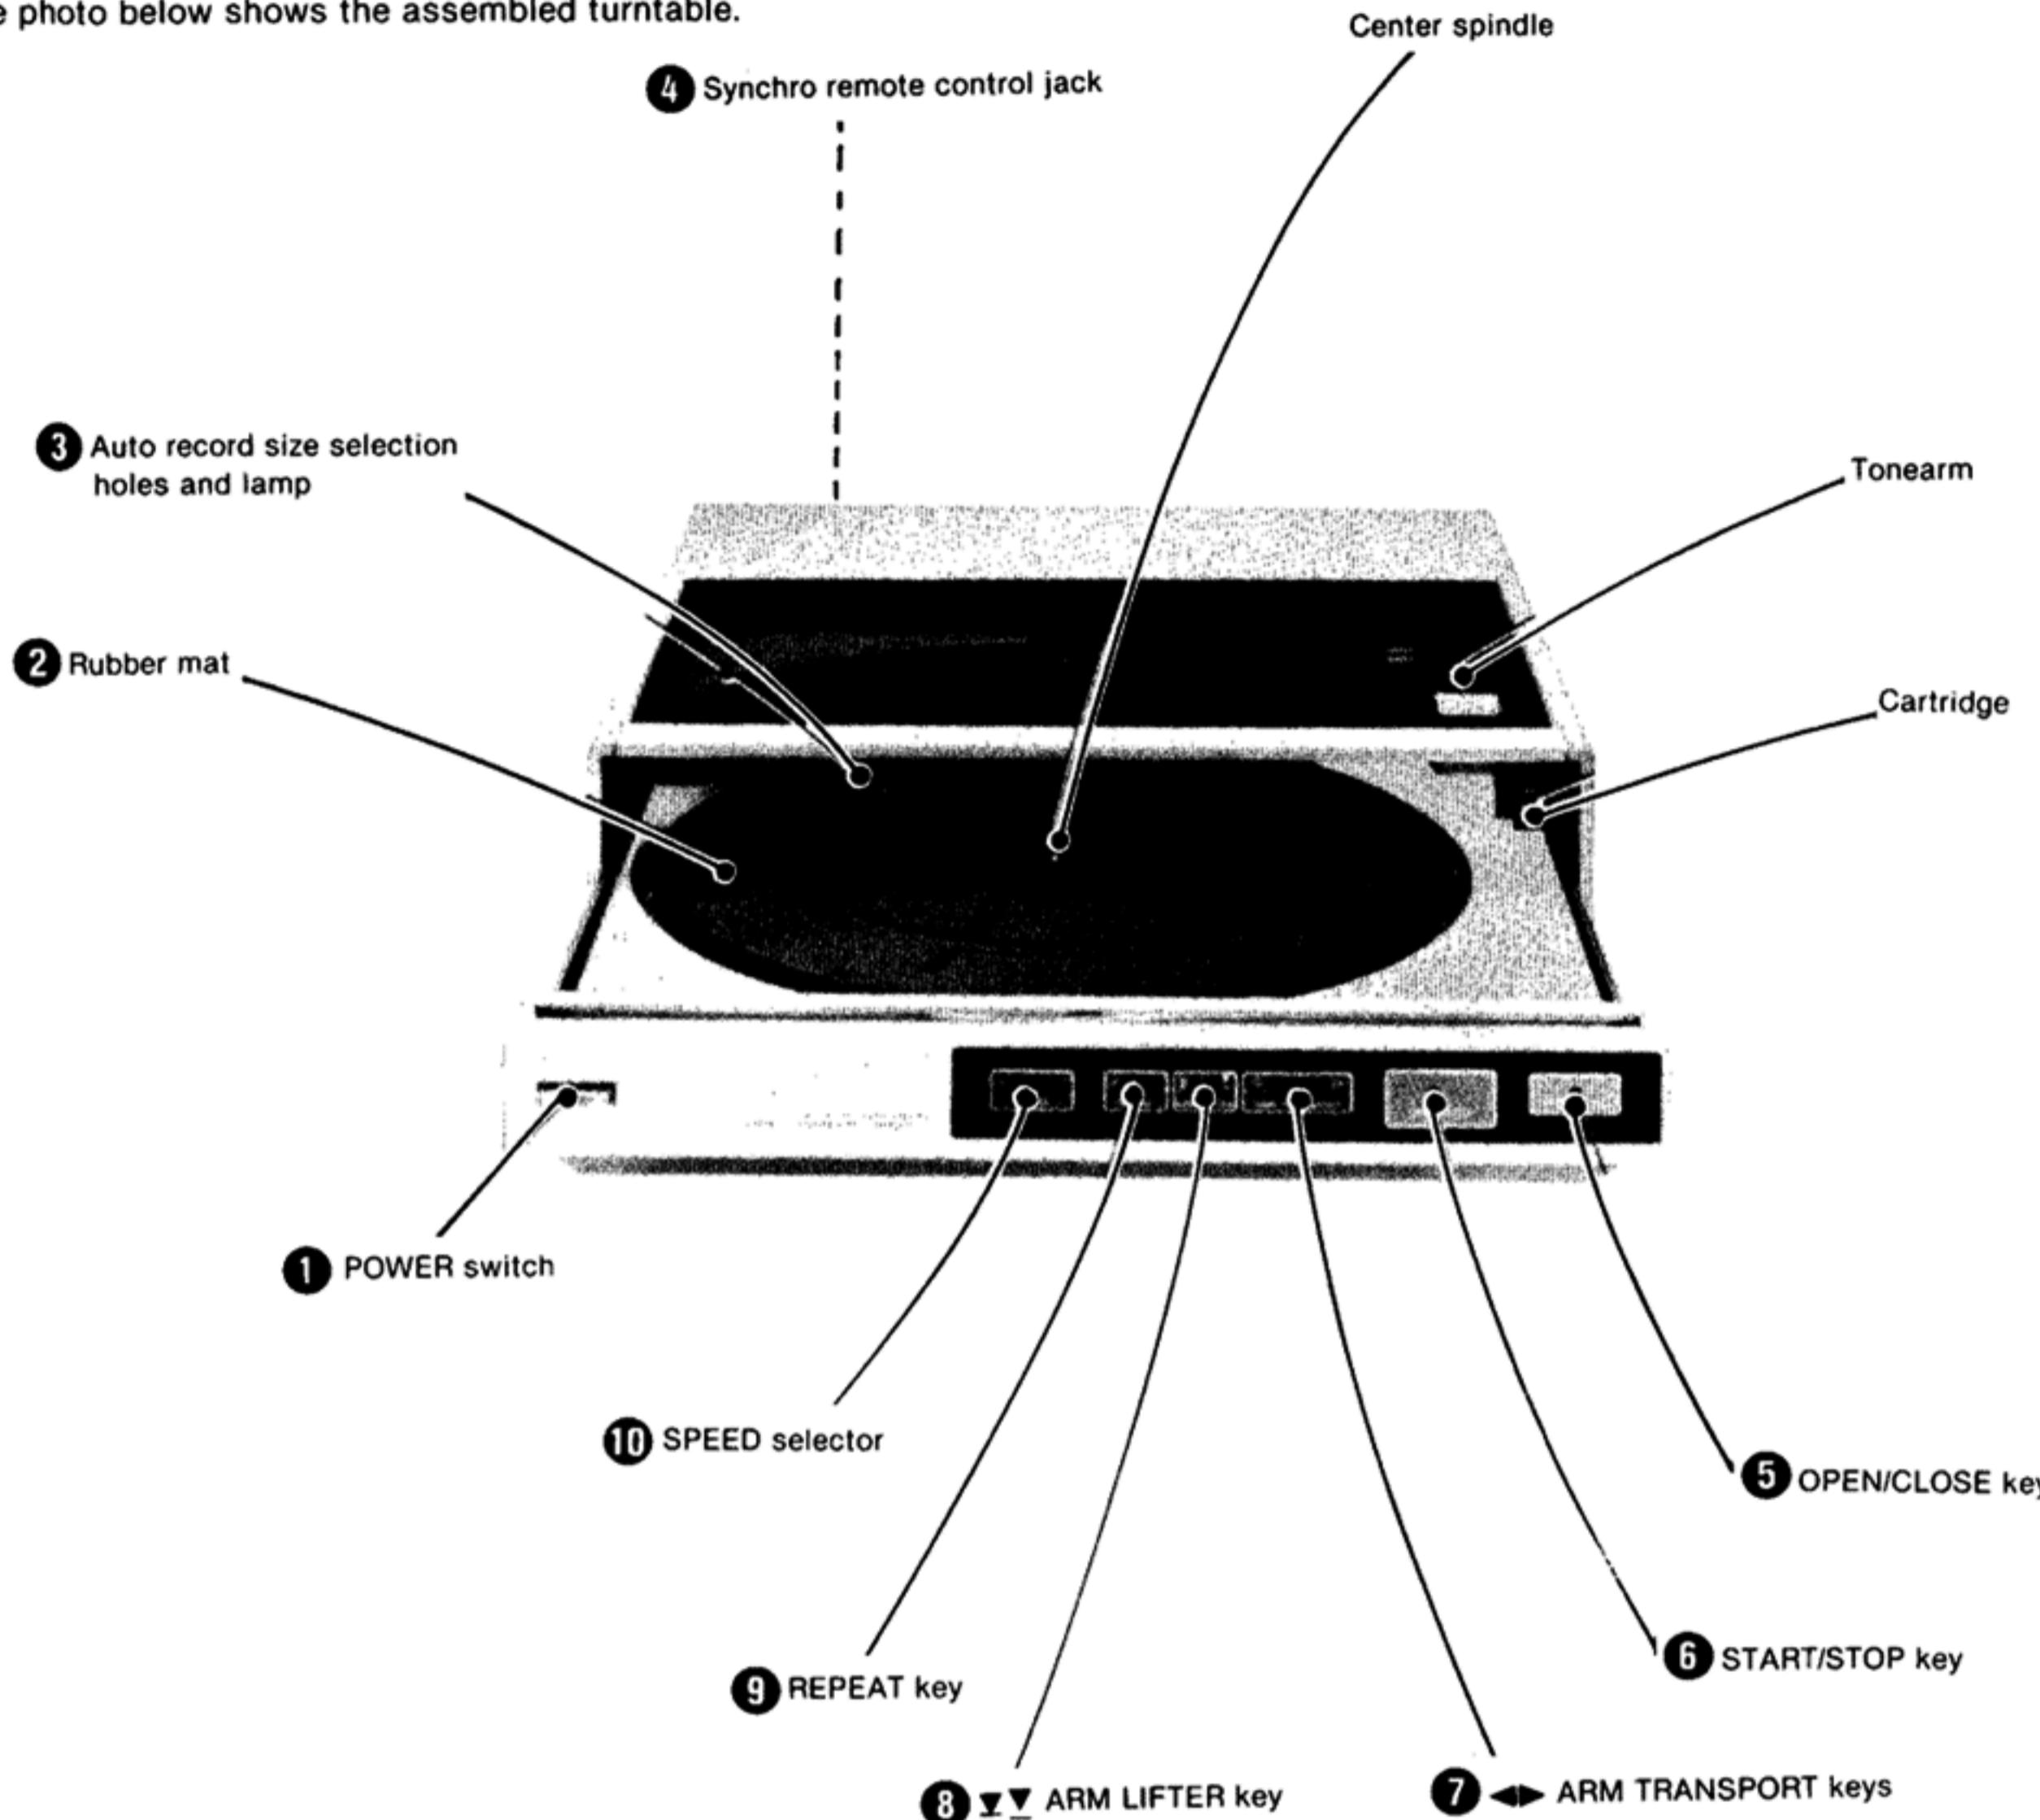

E₂ model: parallel-blade plug
1-551-473-31

US, Canadian model: 120V 60Hz 13W
 AEP model: 220V 50/60Hz 13W
 UK model: 240V 50/60Hz 13W
 E model: 110-120V, 220-240V 50/60Hz 13W

LOCATION OF PARTS AND CONTROLS

The photo below shows the assembled turntable.

① POWER switch

Press to turn on the turntable. To turn the turntable off, press it again.

② Rubber mat

Place the rubber mat so that the holes for auto record size selection on the rubber mat and on the platter are matched correctly.

③ Auto record size selection holes and lamp

Record size is automatically selected by a beam transmitted from a lamp through the holes on the rubber mat and the platter to the photo detectors underneath the platter. When no record is on the platter, the tonearm will not lower onto the turntable.

④ Synchro remote control jack

Synchronized recording from disc to tape is possible on specified Sony cassette decks by using the optional RM-65 synchro remote control unit.

⑤ OPEN/CLOSE key

With one touch of this key the turntable module automatically opens for loading a record. With another touch the module automatically closes.

⑥ START/STOP key

Press to start the record playing. To stop during play, press it again.

⑦ ←→ ARM TRANSPORT keys

To move the tonearm inward, press the **◀** key, and to move outward, the **▶** key. The tonearm is raised and continues to move while the key is pressed. The tonearm will stop when the key is released. For fine adjustments, press and immediately release the appropriate key.

⑧ ▾ ▾ ARM LIFTER key

This key lifts and lowers the tonearm. When the tonearm is lowered, the turntable starts rotating.

⑨ REPEAT key

Press this key to repeat play. Repeat play continues until this key is pressed to release it. If the START/STOP key is pressed during repeat play, the tonearm returns to the arm rest and the turntable stops rotating.

⑩ SPEED selector

Press this key when a 45 rpm record is to be played. Press it again for a 33 $\frac{1}{3}$ rpm record.

SAFETY CHECK-OUT (US Model)

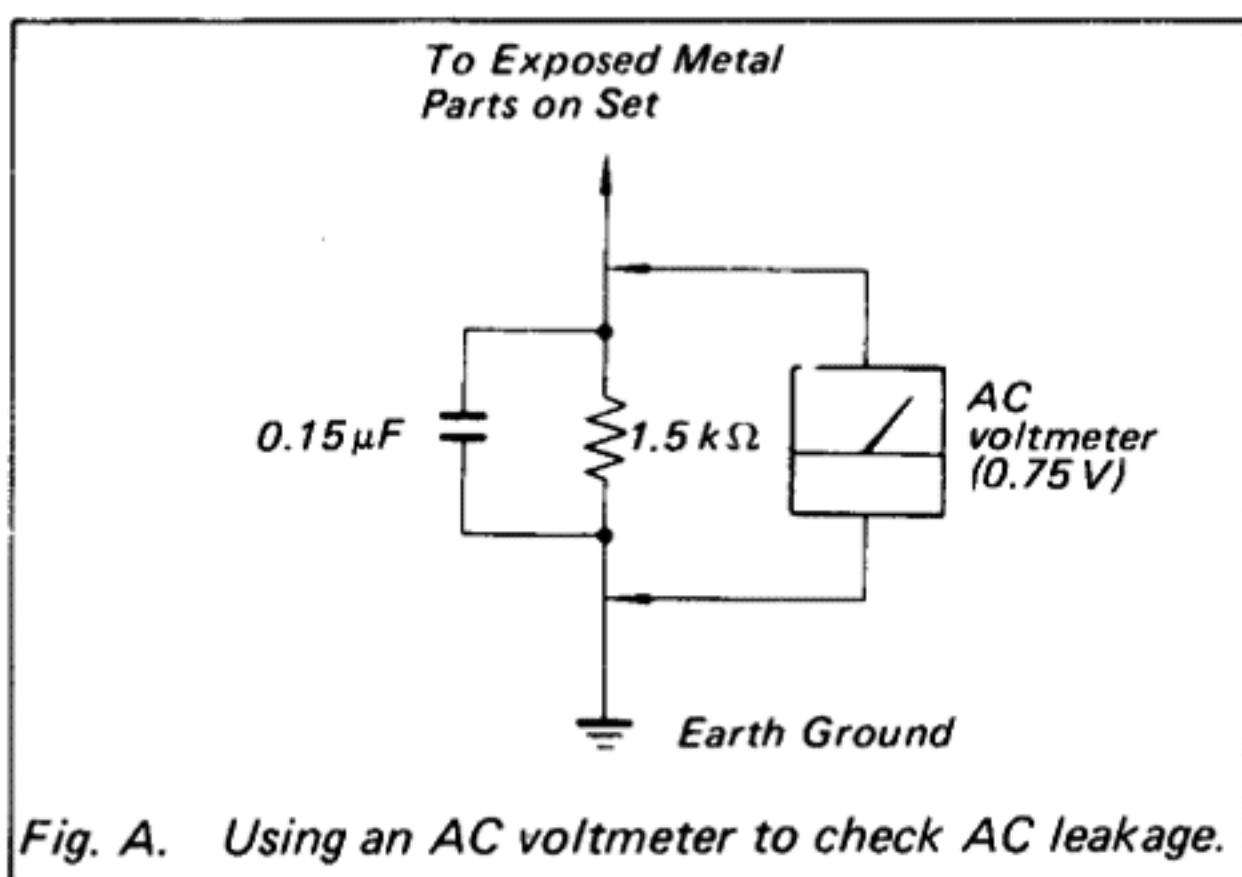

After correcting the original service problem, perform the following safety check before releasing the set to the customer:

Check the antenna terminals, metal trim, "metallized" knobs, screws, and all other exposed metal parts for AC leakage. Check leakage as described below.

LEAKAGE TEST

The AC leakage from any exposed metal part to earth ground and from all exposed metal parts to any exposed metal part having a return to chassis, must not exceed 0.5 mA (500 microamper). Leakage current can be measured by any one of three methods.

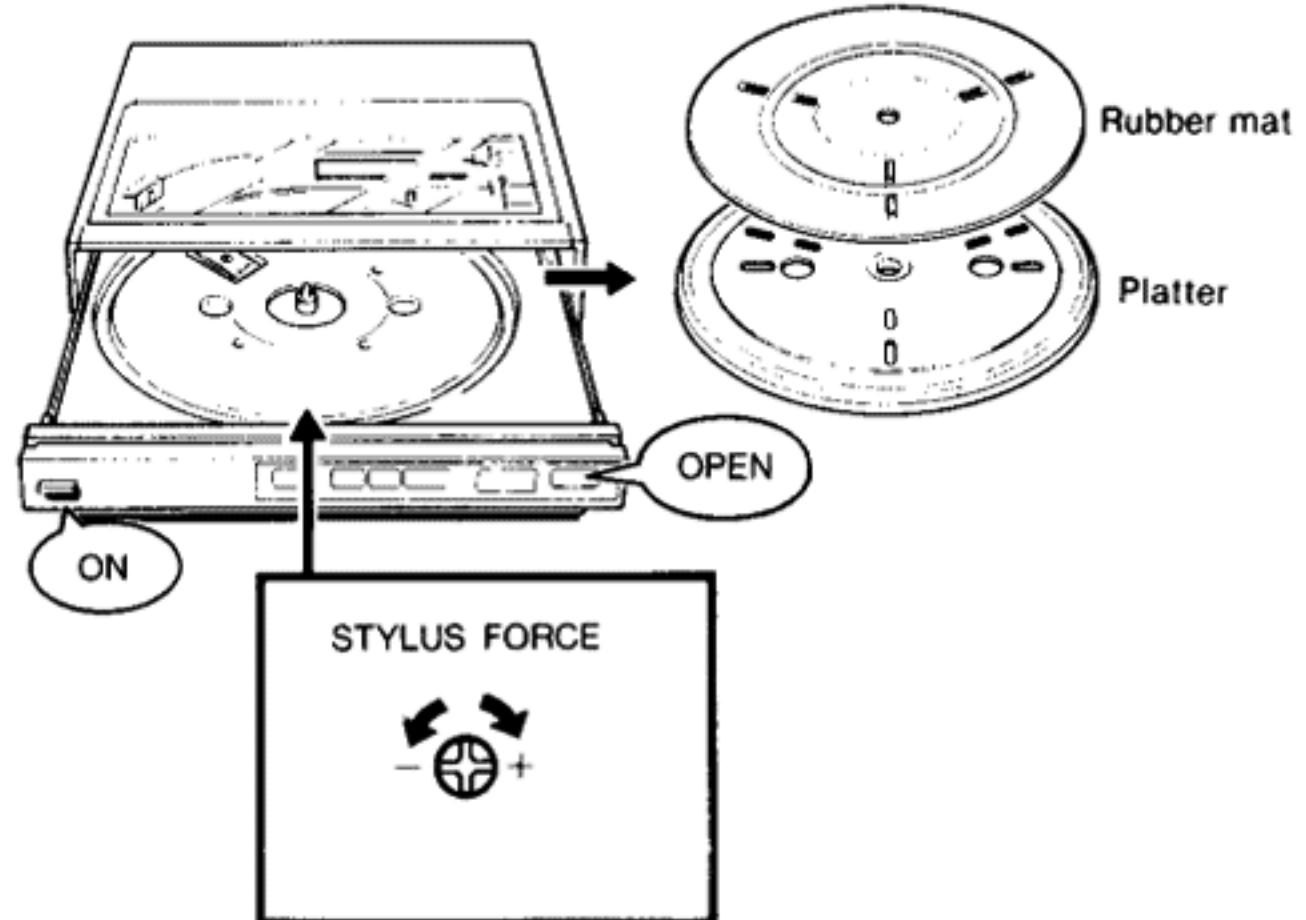

1. A commercial leakage tester, such as the Simpson 229 or RCA WT-540A. Follow the manufacturers' instructions to use these instruments.
2. A battery-operated AC milliammeter. The Data Precision 245 digital multimeter is suitable for this job.
3. Measuring the voltage drop across a resistor by means of a VOM or battery-operated AC voltmeter. The "limit" indication is 0.75 V, so analog meters must have an accurate low-voltage scale. The Simpson 250 and Sanwa SH-63Trd are examples of a passive VOM that is suitable. Nearly all battery operated digital multimeters that have a 2V AC range are suitable. (See Fig. A)

TRACKING FORCE FINE ADJUSTMENT

The tracking force has been correctly adjusted at the factory. Make fine adjustment only when the tracking force is so light that the stylus skips grooves.

The tracking force adjustment opening is located on the motor board. Insert the supplied adjustment key and turn it clockwise (+) for heavier tracking force or counterclockwise (-) for lighter tracking force.

MAINTENANCE

Stylus

Before playing a record, clean the stylus with a soft brush. Brush the stylus from back to front. Never attempt to clean the stylus with your finger tip. If a fluid stylus cleaner is used, make sure not to moisten the stylus too much.

Cabinet

Clean the cabinet periodically with a soft dry cloth. If the stains are difficult to remove, use a cloth moistened with a mild detergent solution. Do not use solvents such as alcohol, benzine or thinner, since they will damage the finish.

Rubber mat

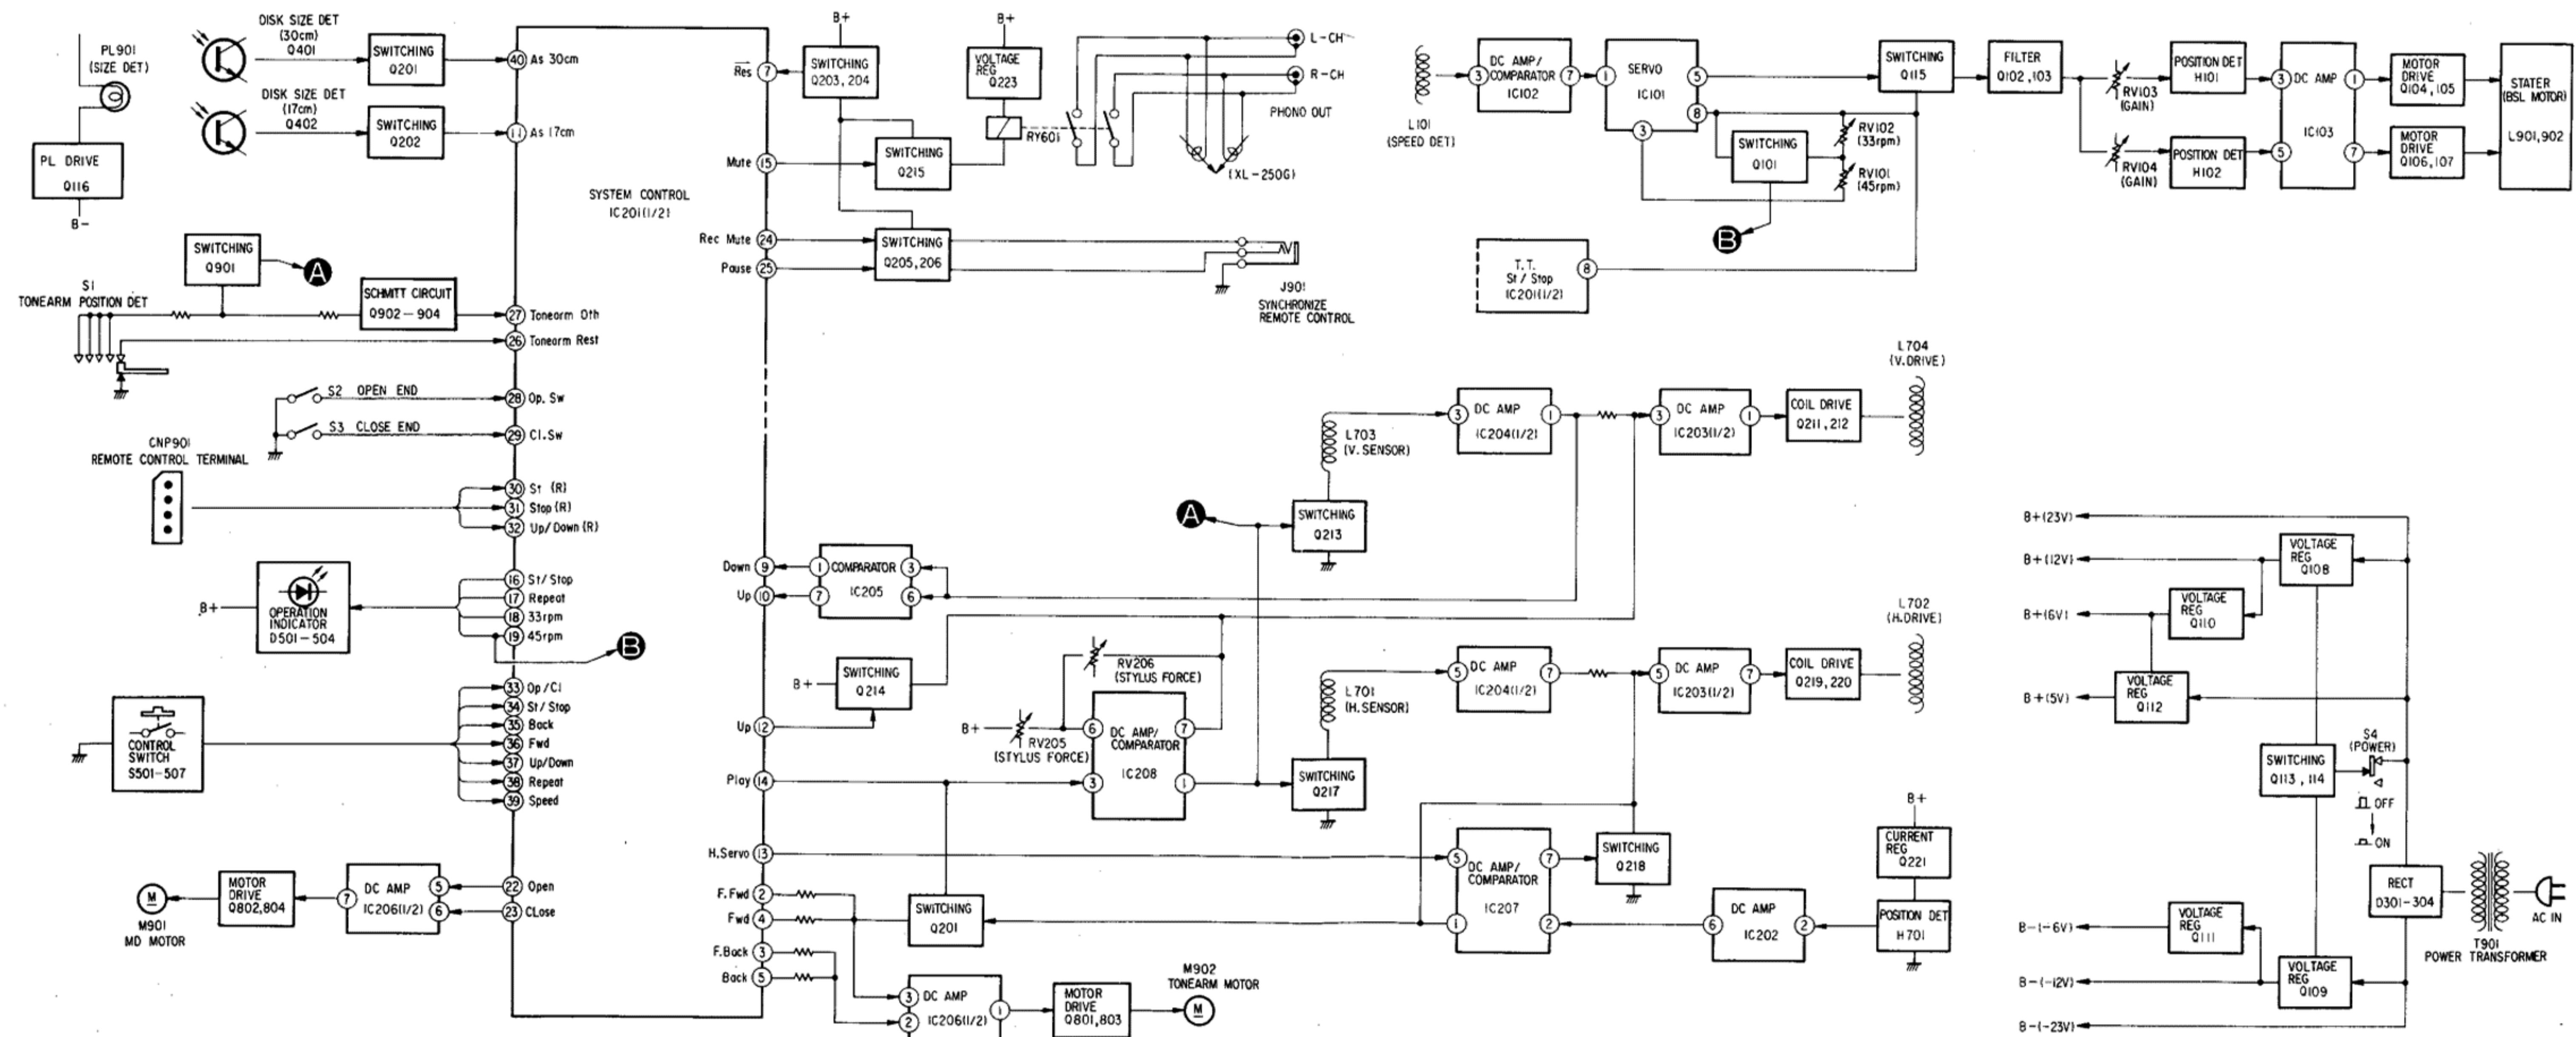

When the rubber mat becomes dirty, wipe it gently with a soft cloth slightly dampened with water.

Lubrication

The turntable requires no periodic lubrication. The motor shaft is lubricated at the factory for the life of the turntable.

**SECTION 1
OUTLINE**

1-1. BLOCK DIAGRAMS

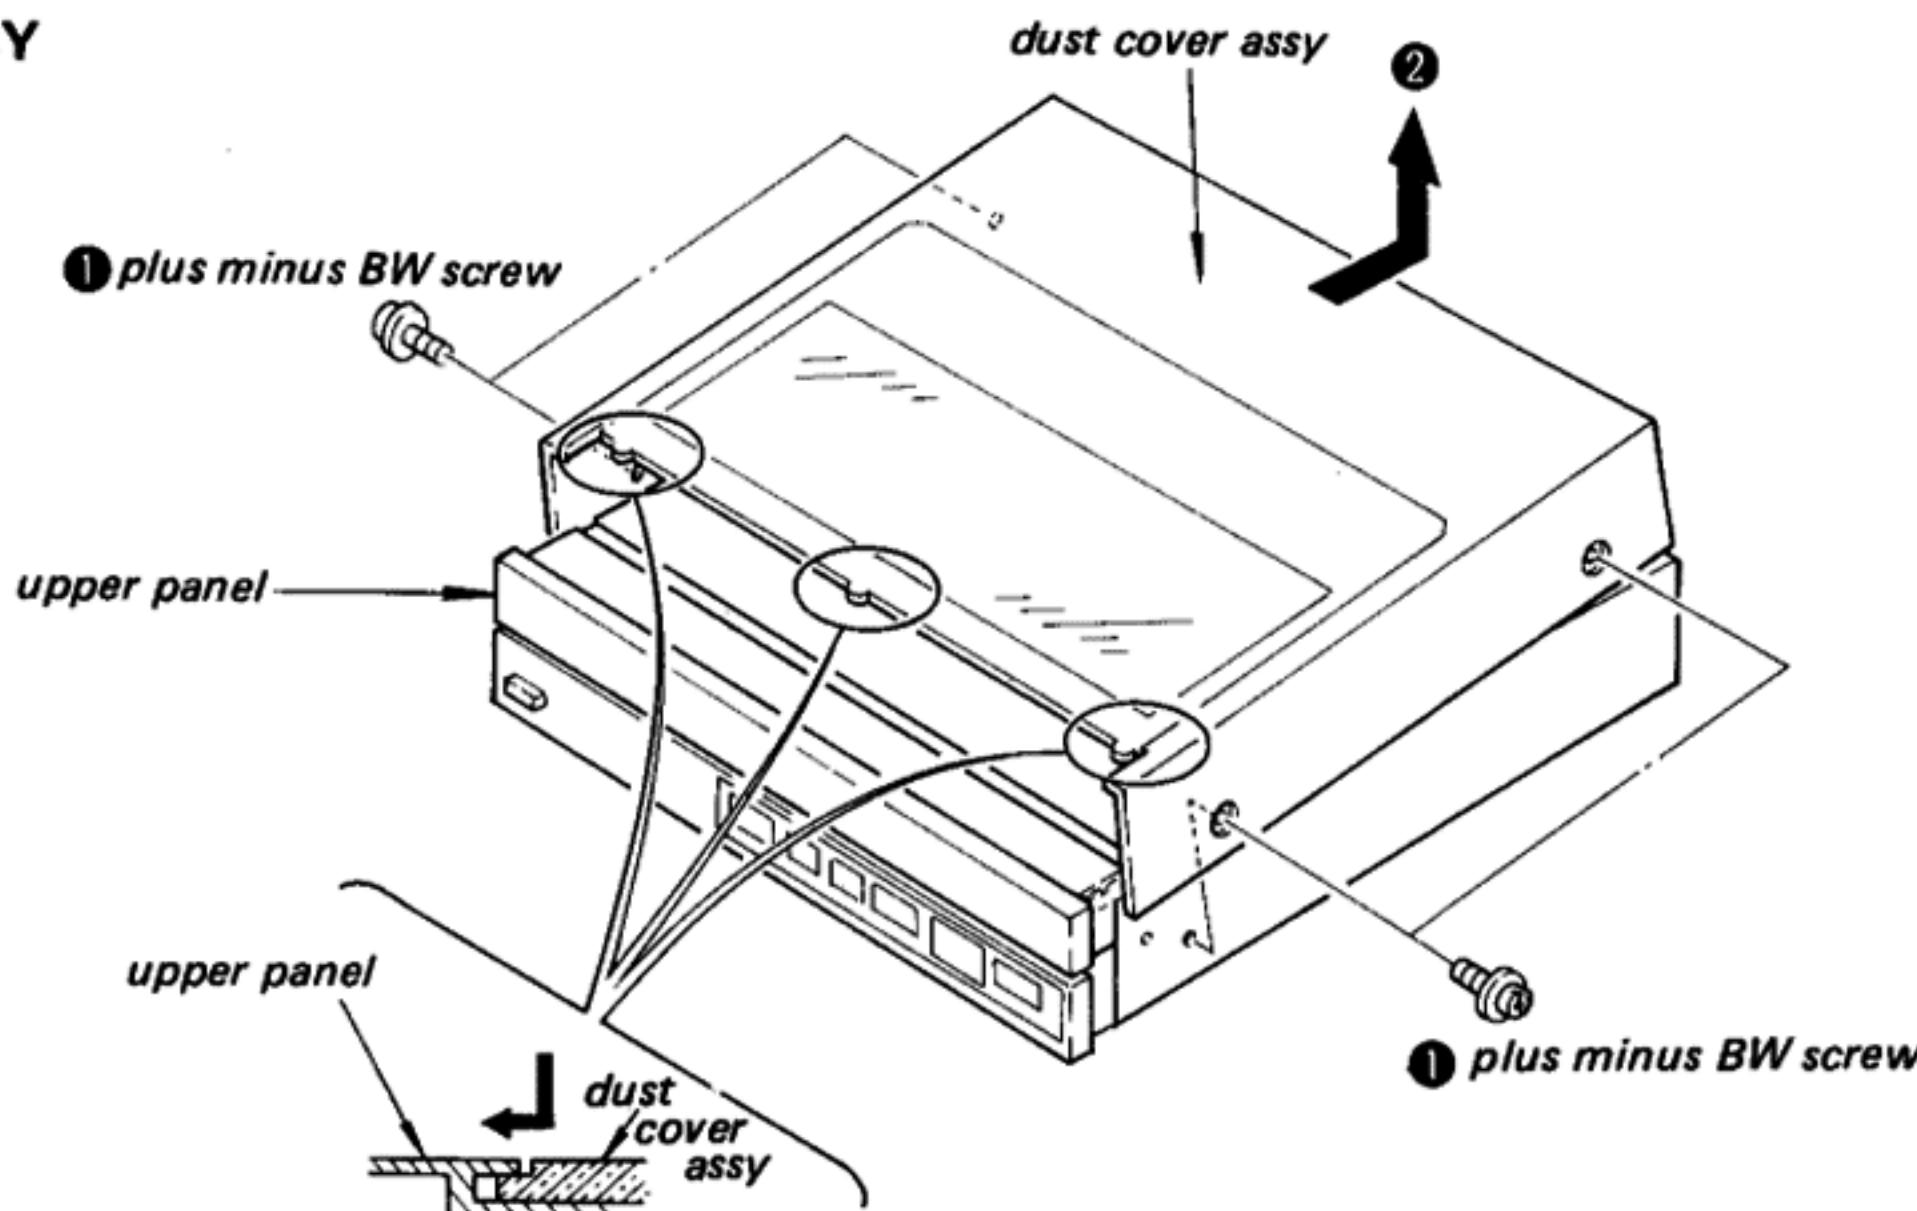

SECTION 2 DISASSEMBLY

2-1. REMOVAL

- Follow the disassembly procedure in the numerical order given.
- In this set, the voltage is applied to the power supplying line ($\pm 23V$) even if the POWER switch is turned OFF.

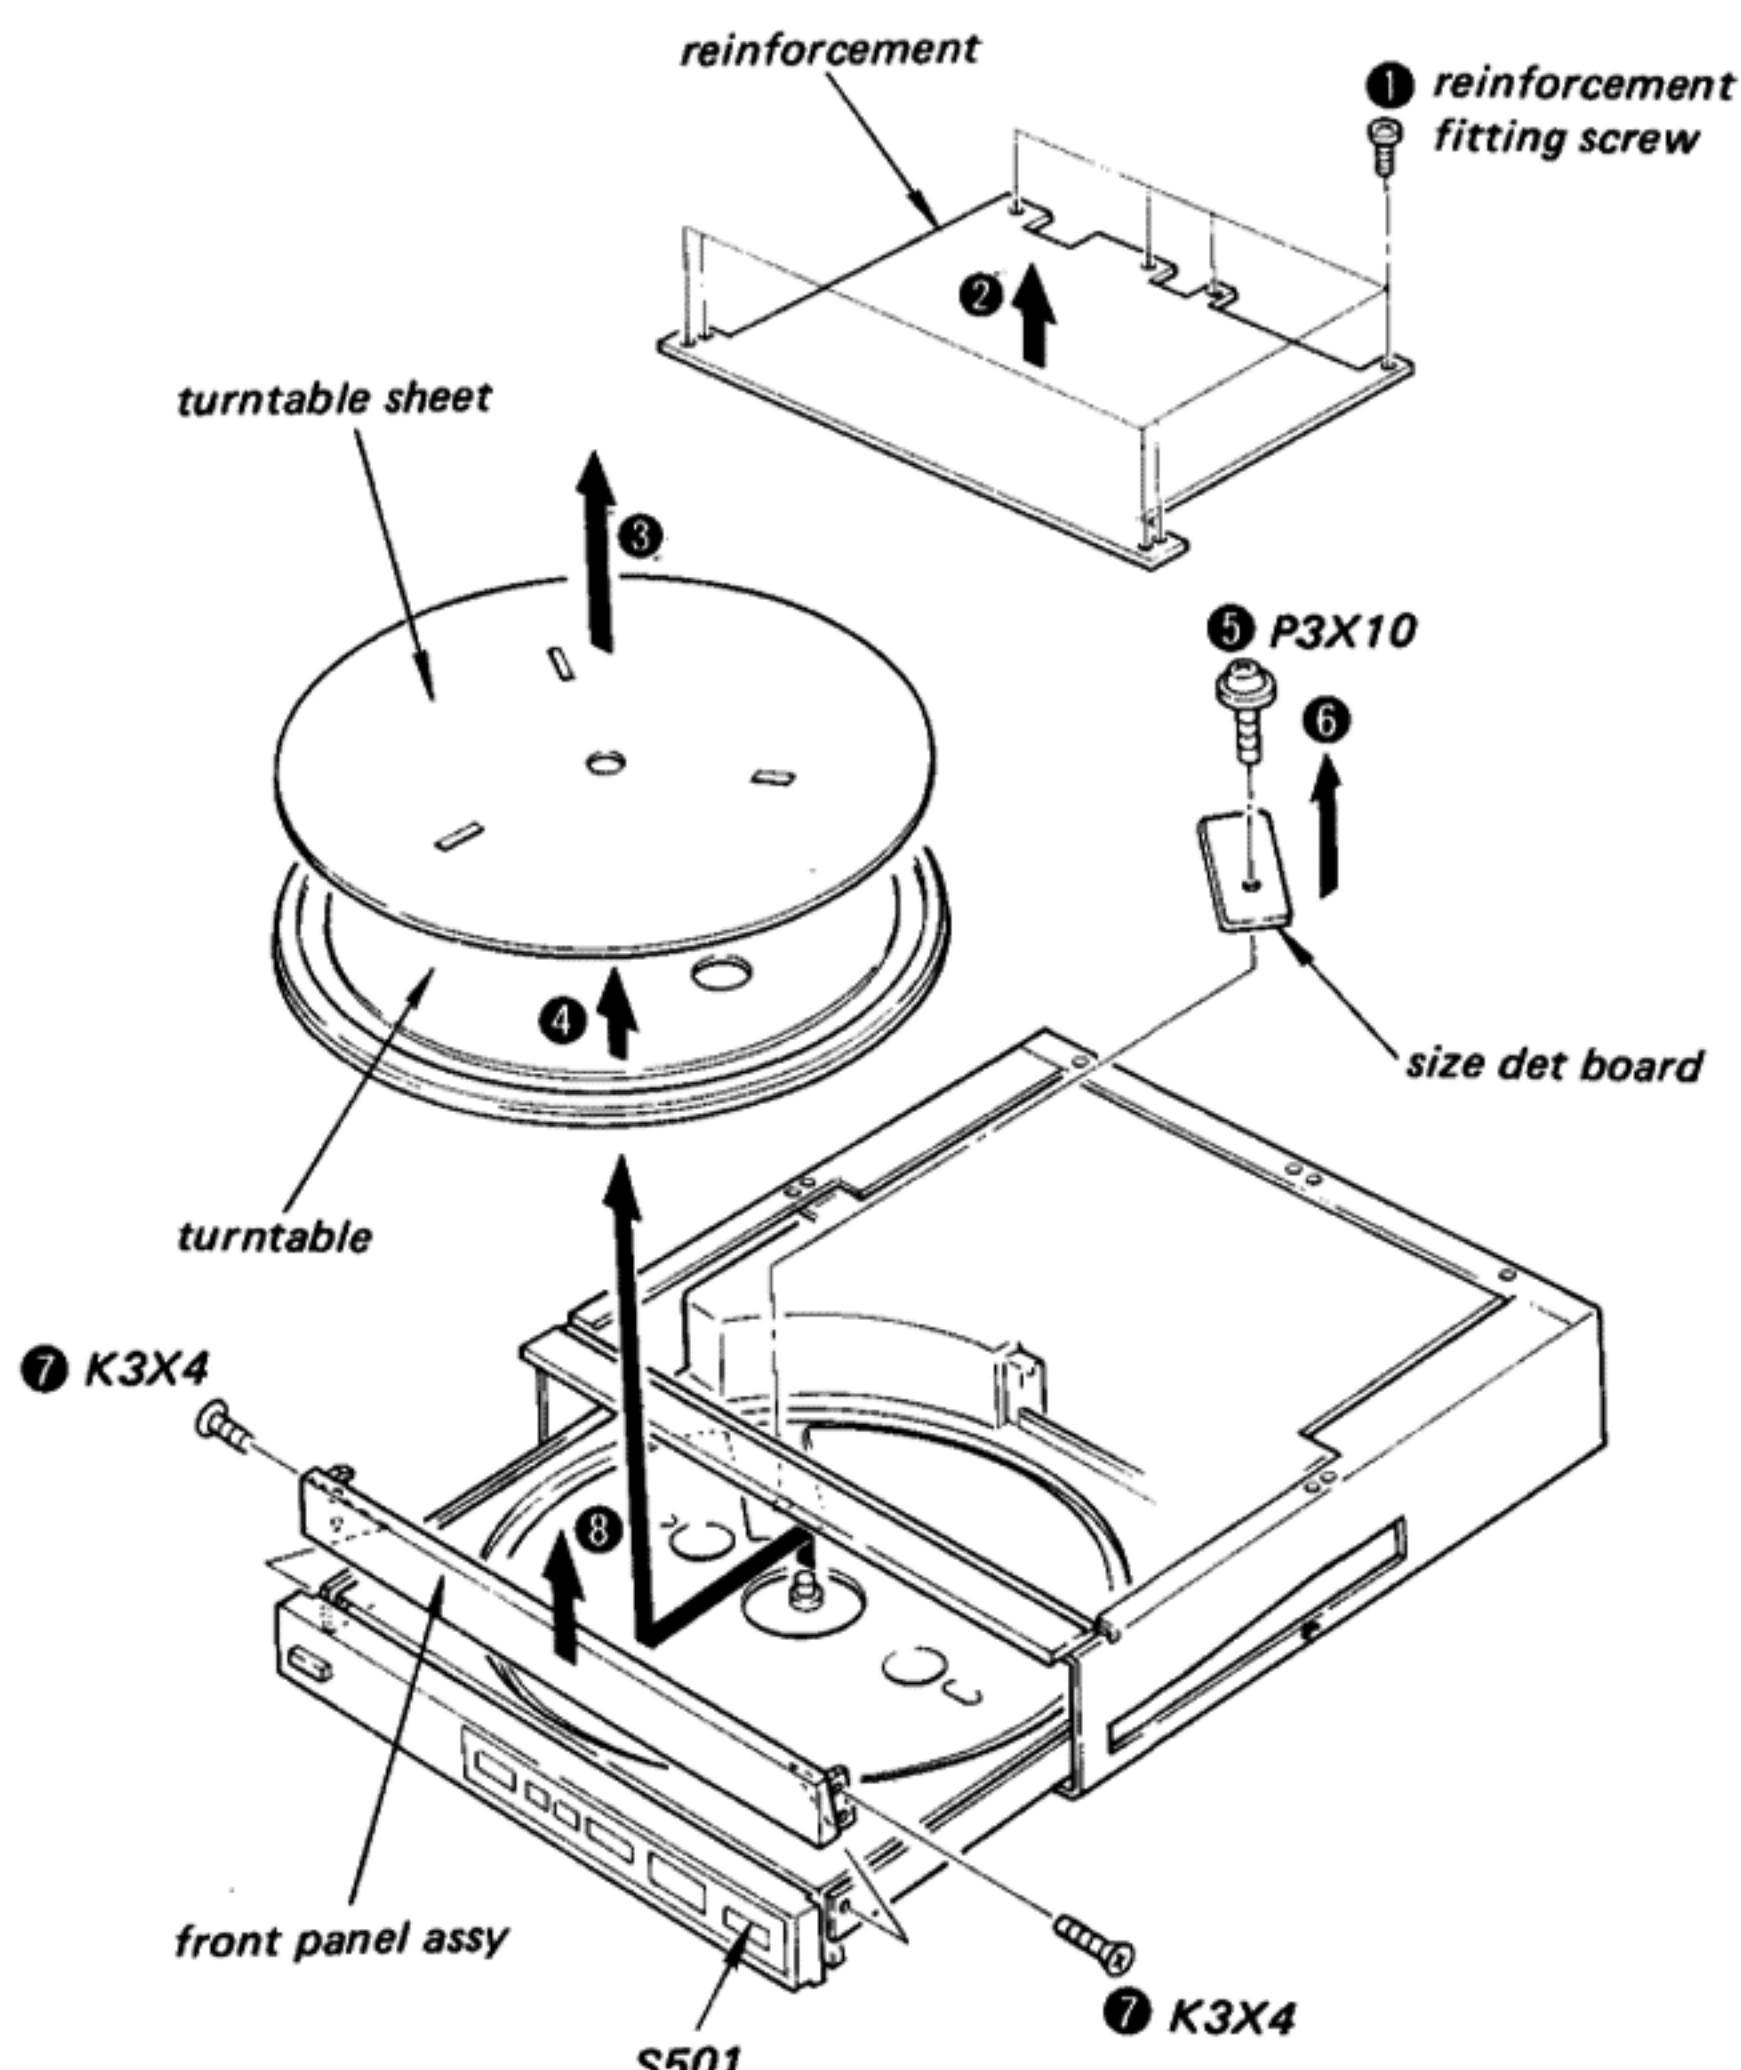

DUST COVER ASSY

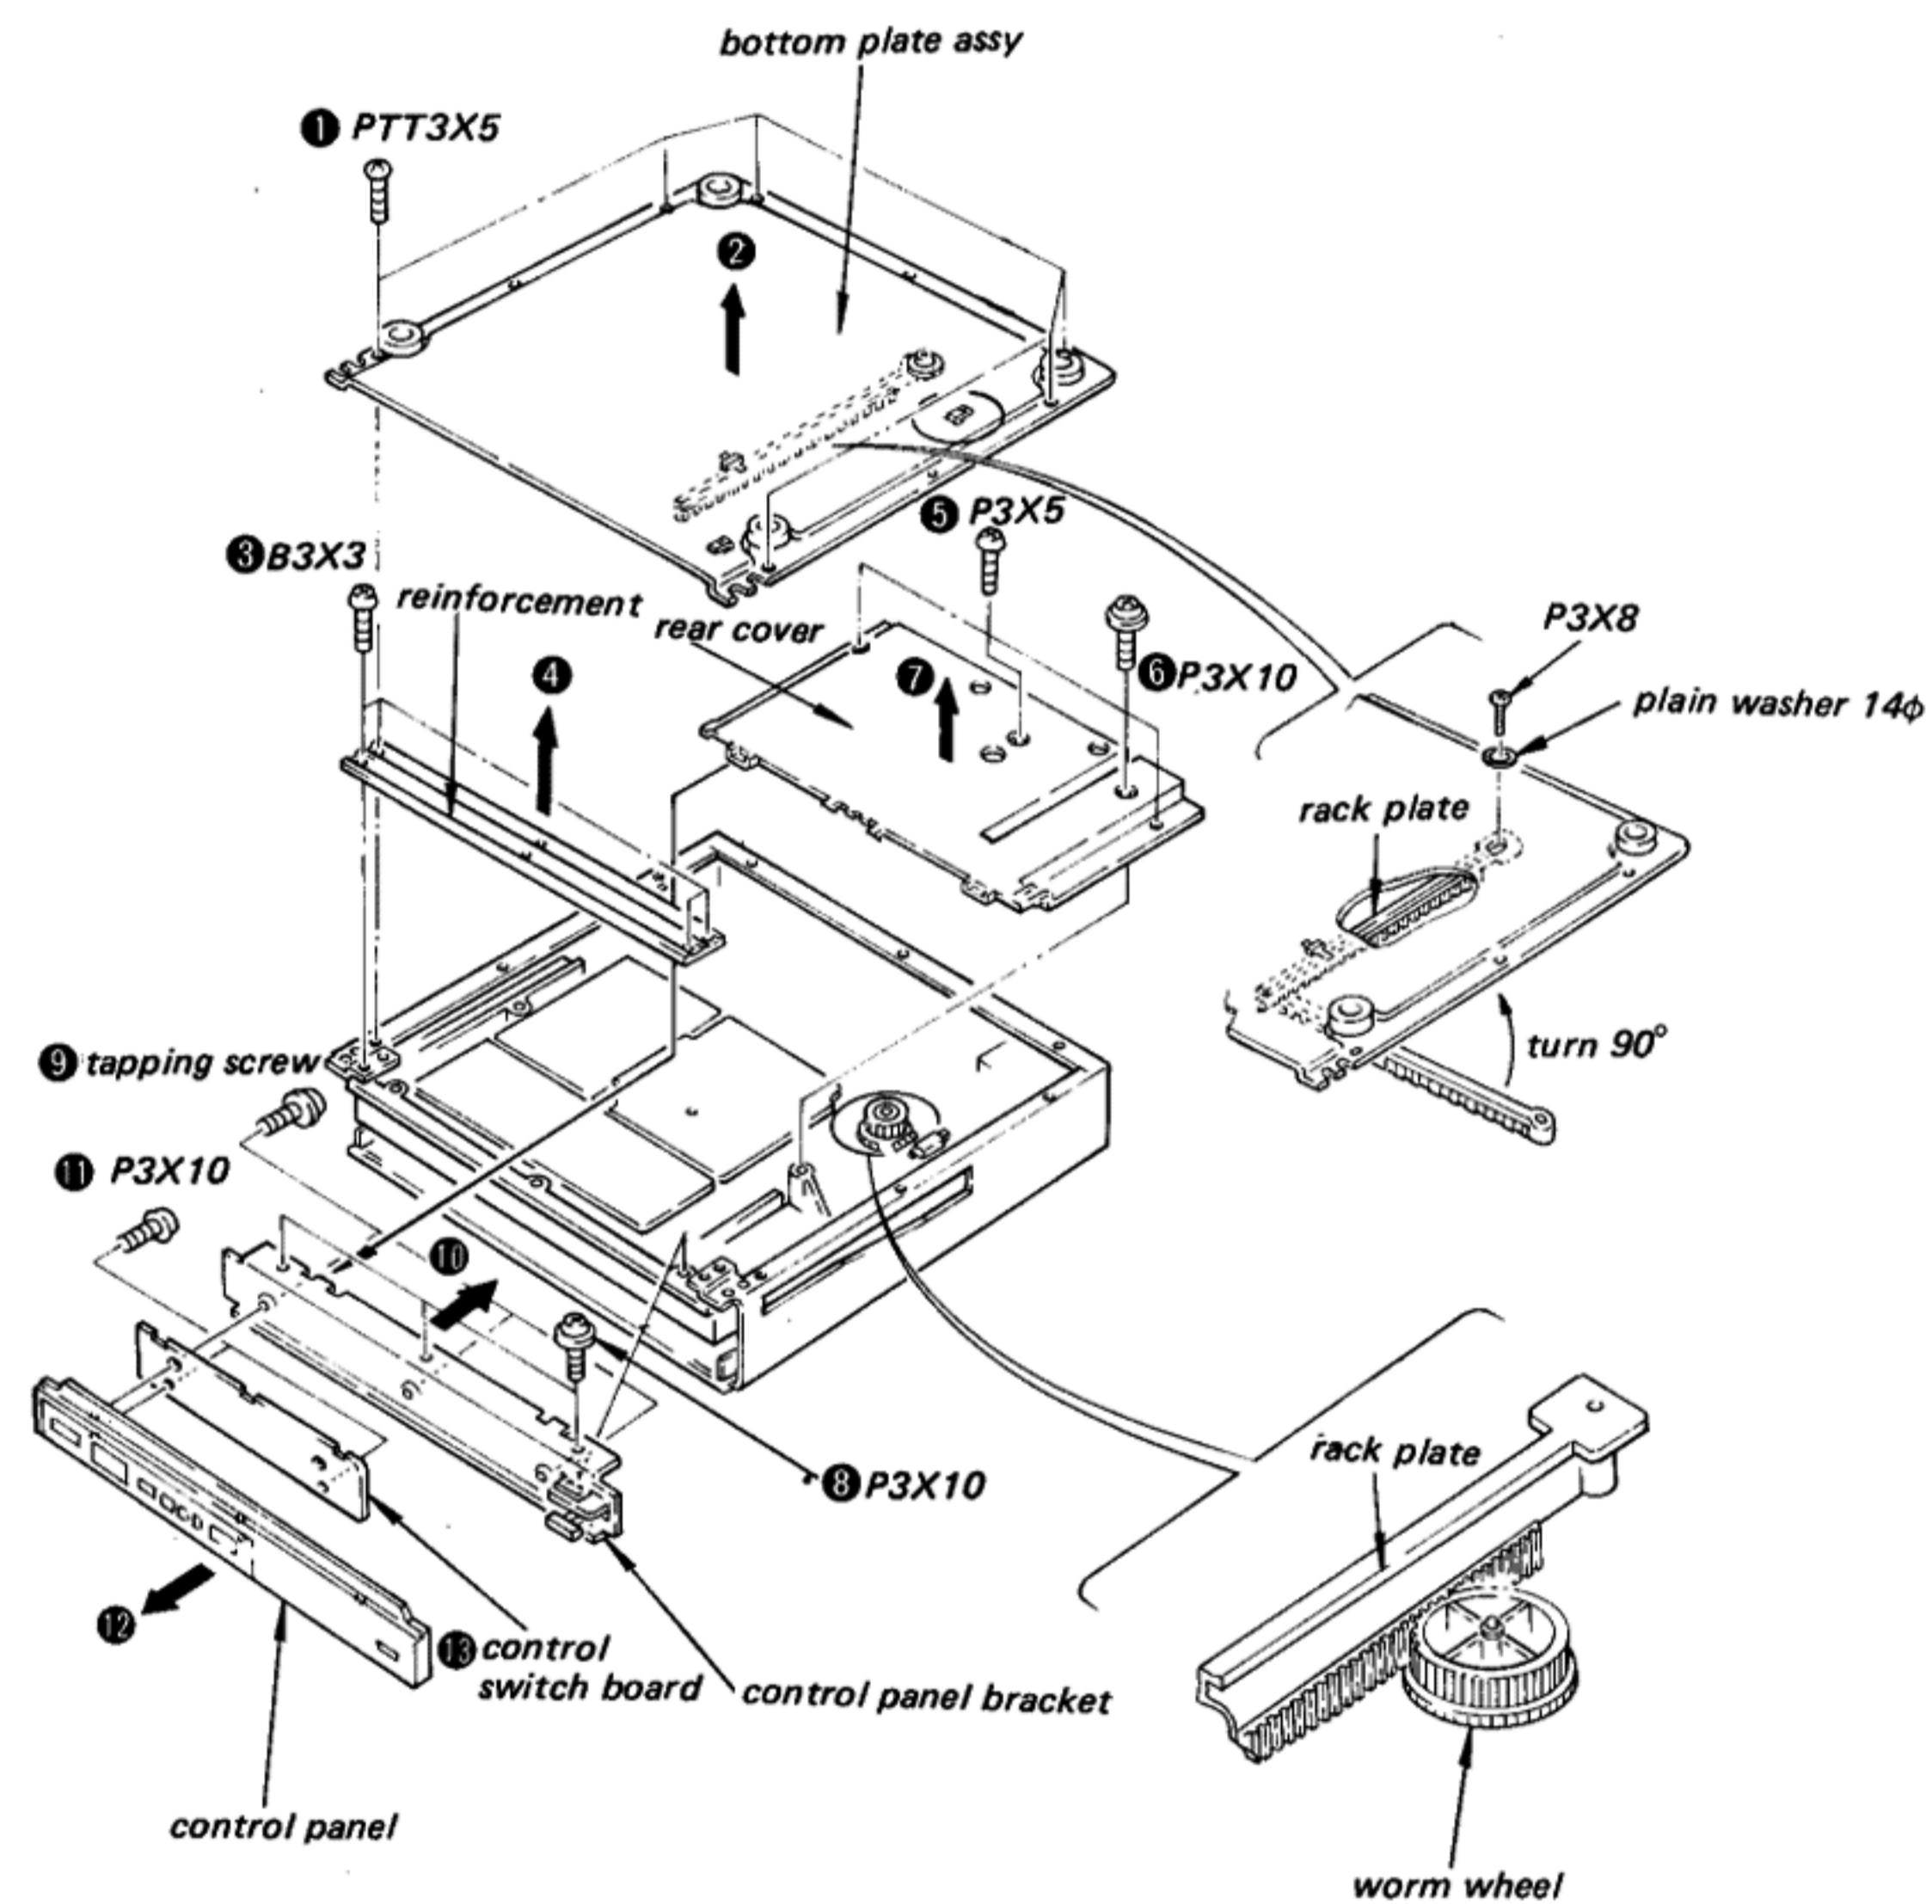

TURNTABLE / SIZE DET BOARD / FRONT PANEL ASSY / REINFORCEMENT

Note: To remove the turntable, touch S501 so that the panel slides out.

BACK PANEL/POWER BOARD/POWER TRANSFORMER

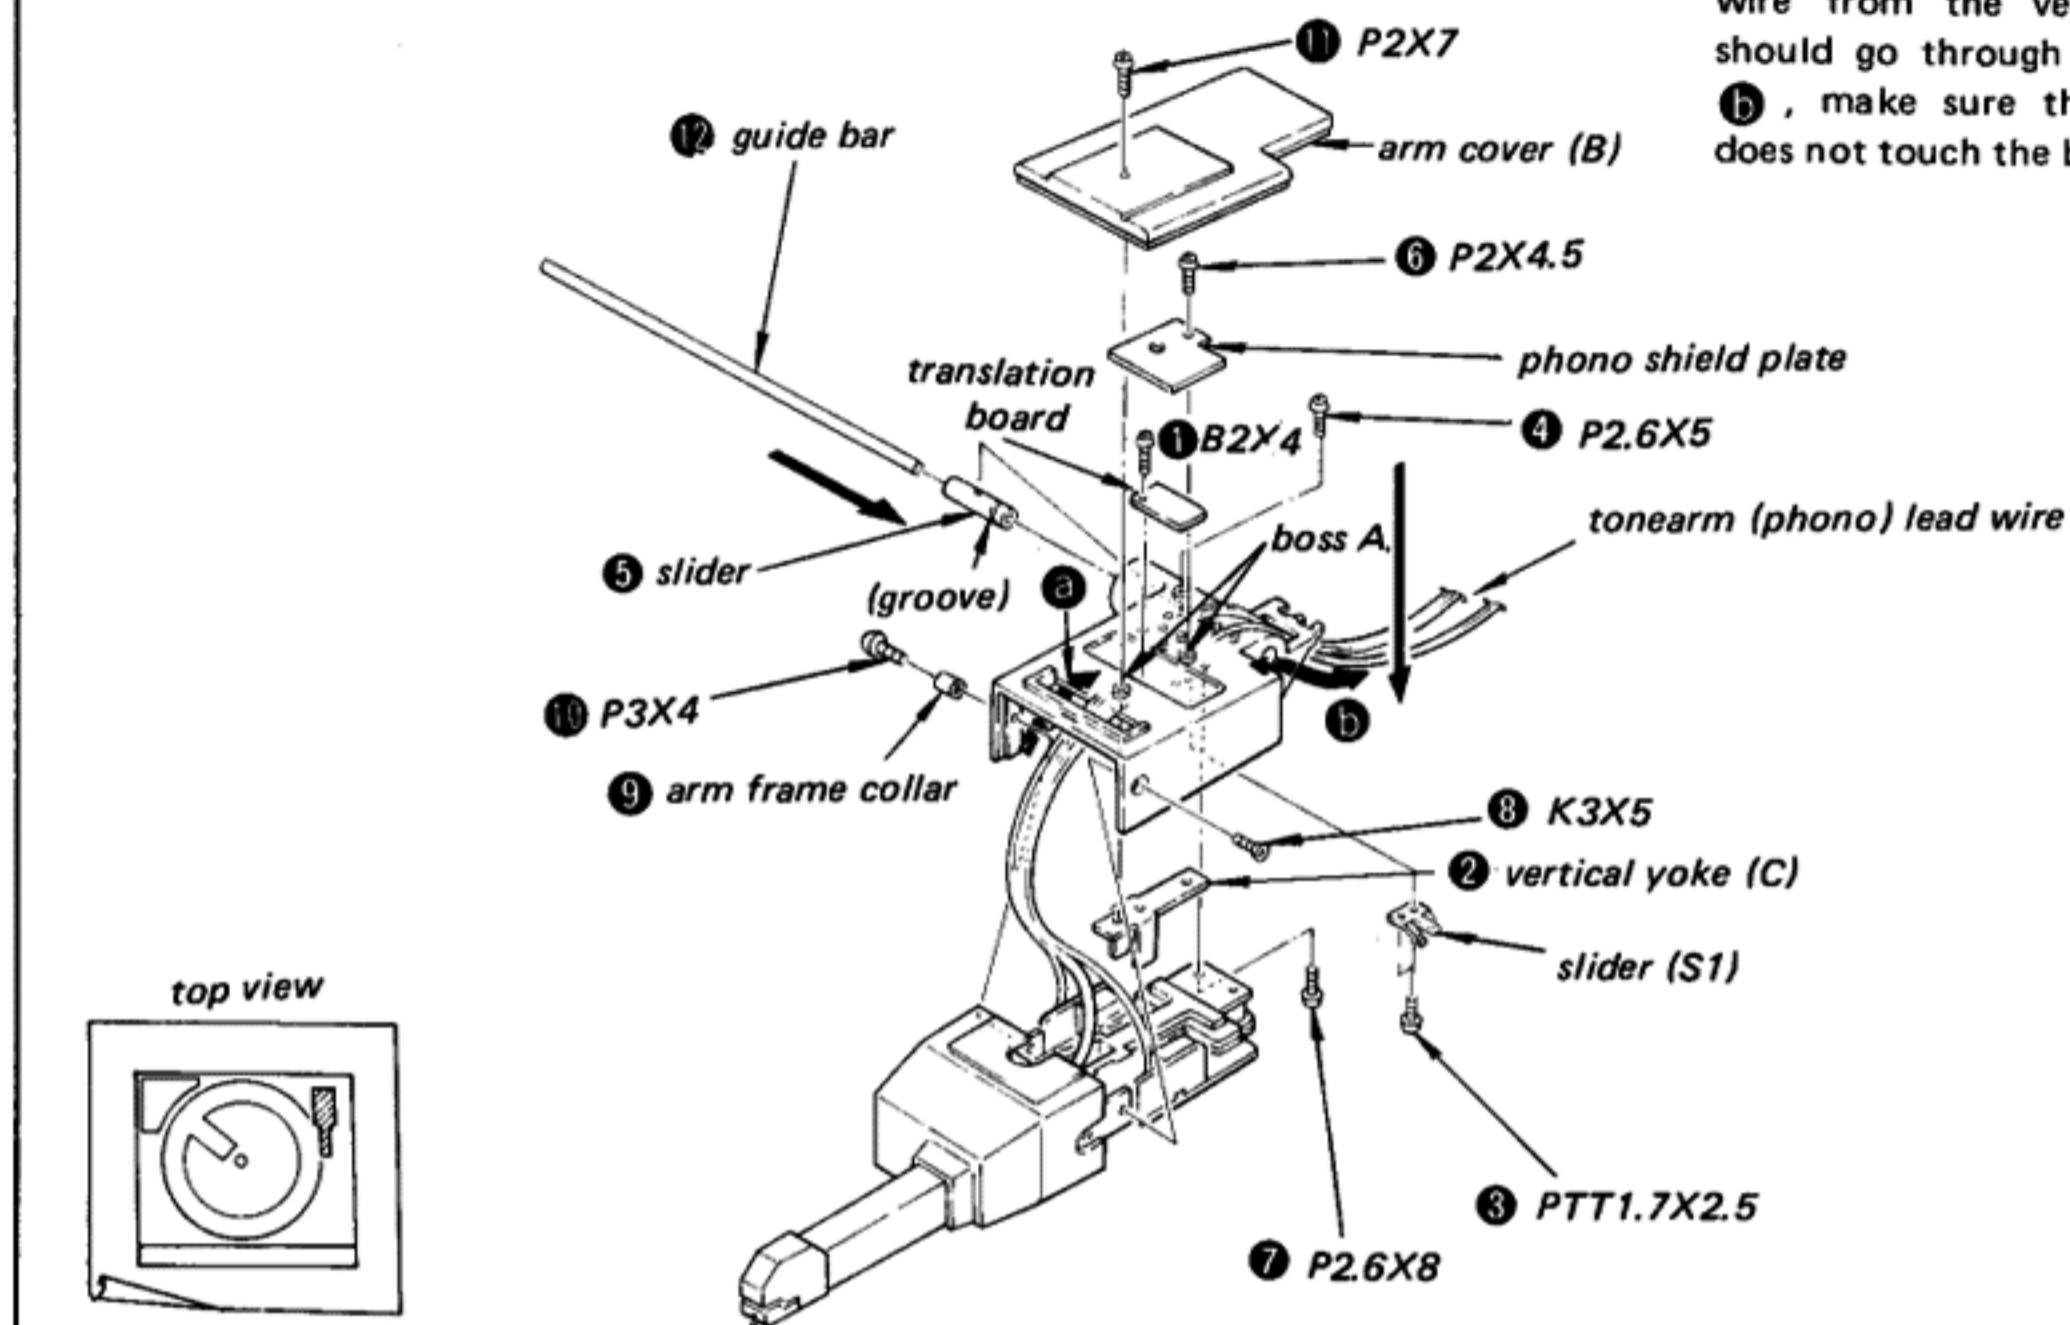

TONEARM ASSY (1)

TONEARM ASSY (2)

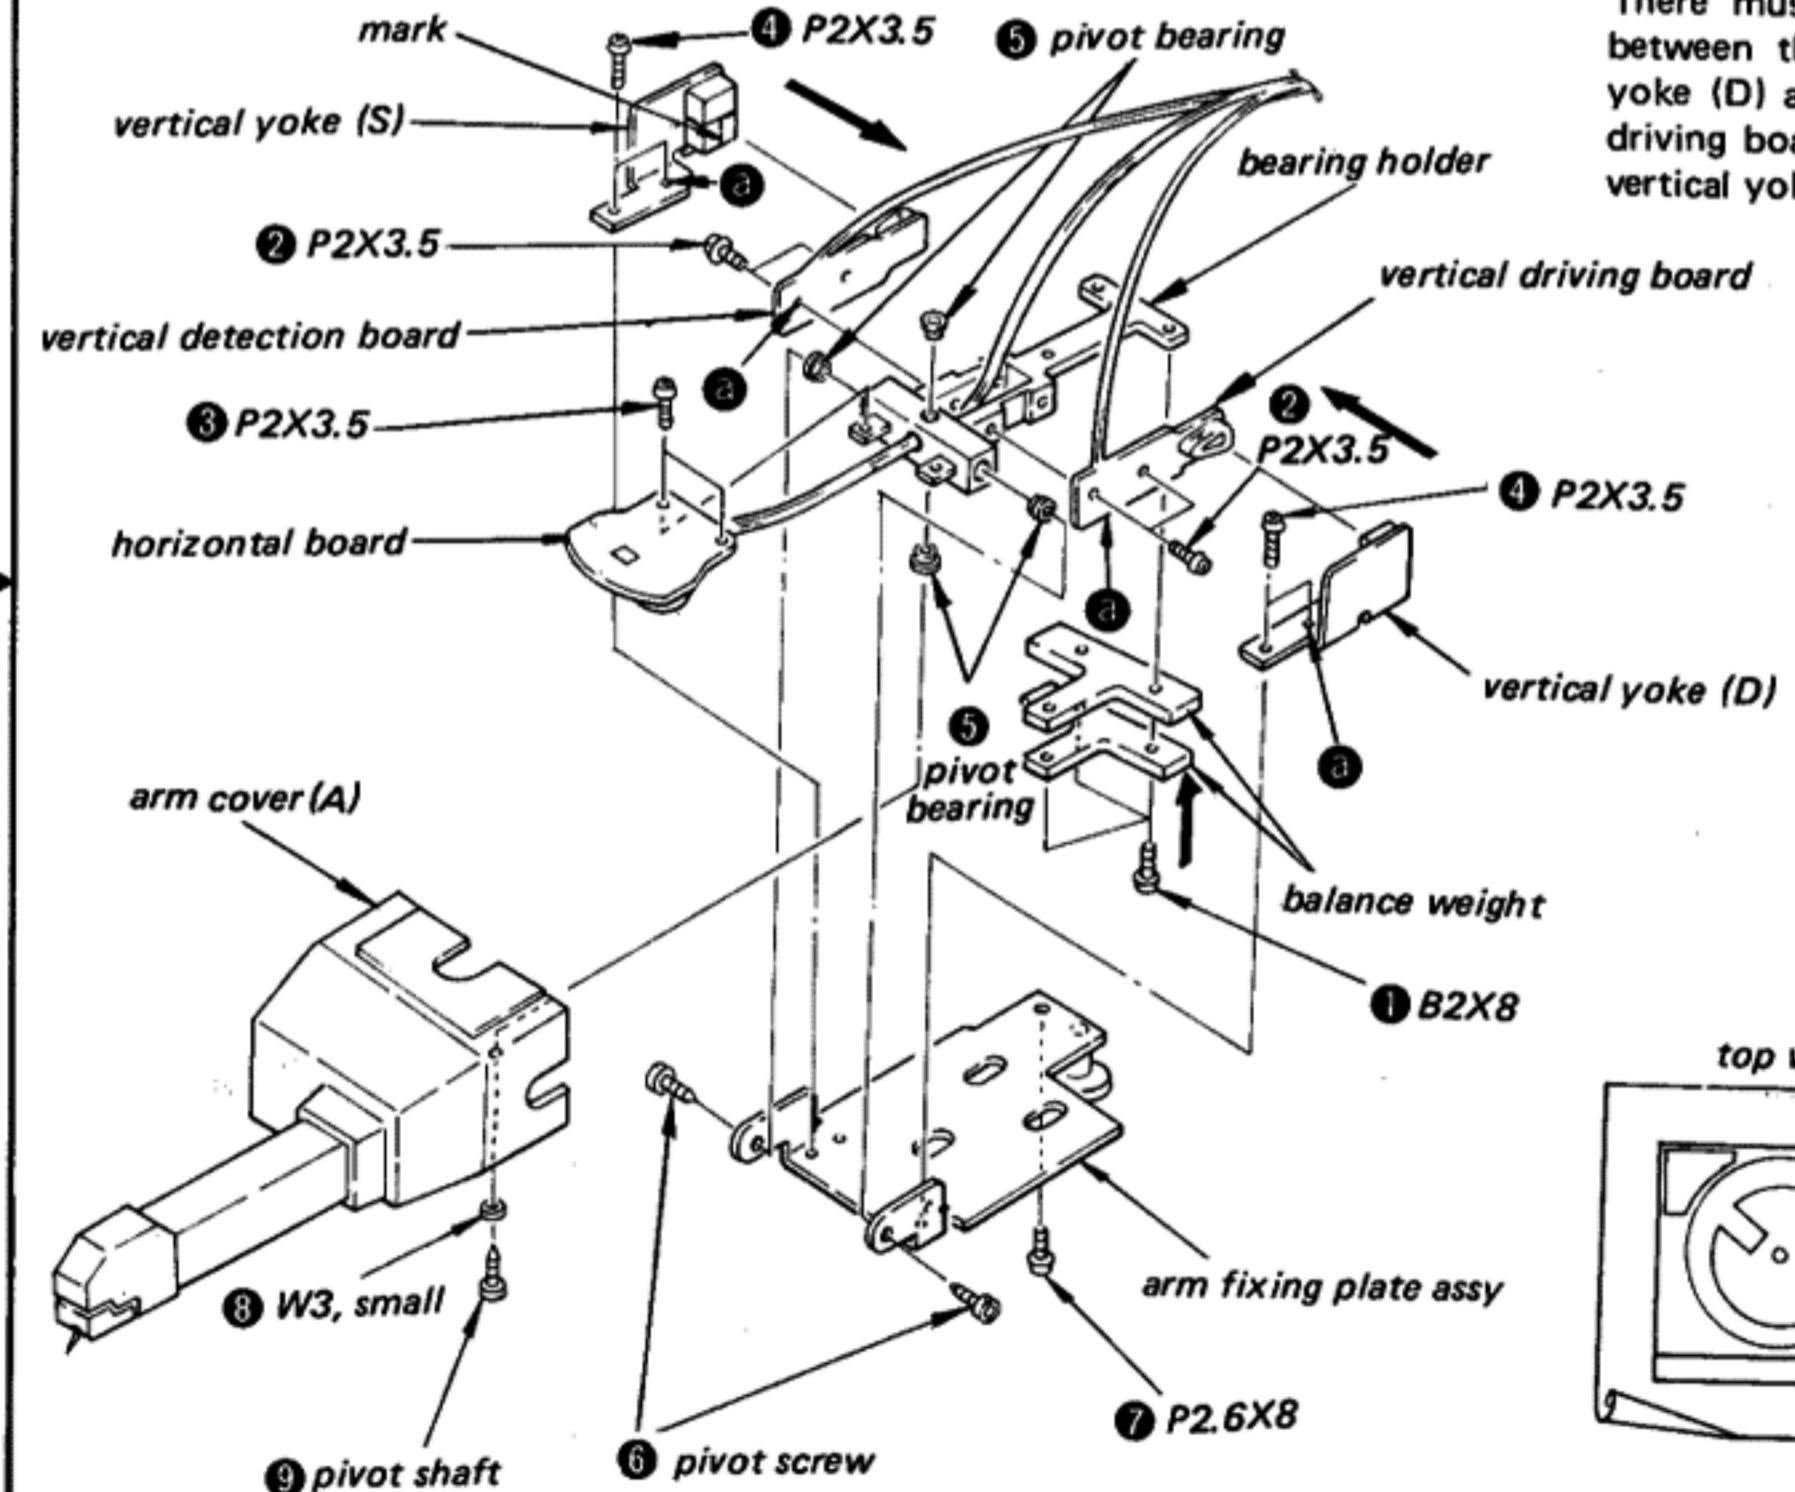

TONEARM ASSY (4)

Note: When assembling the slider (5), make sure the groove is first and the hole is on top as in the fig. The tonearm lead wire and the wire from the vertical board should go through as (a) and (b), make sure the lead wire does not touch the boss A.

TONEARM ASSY (3)

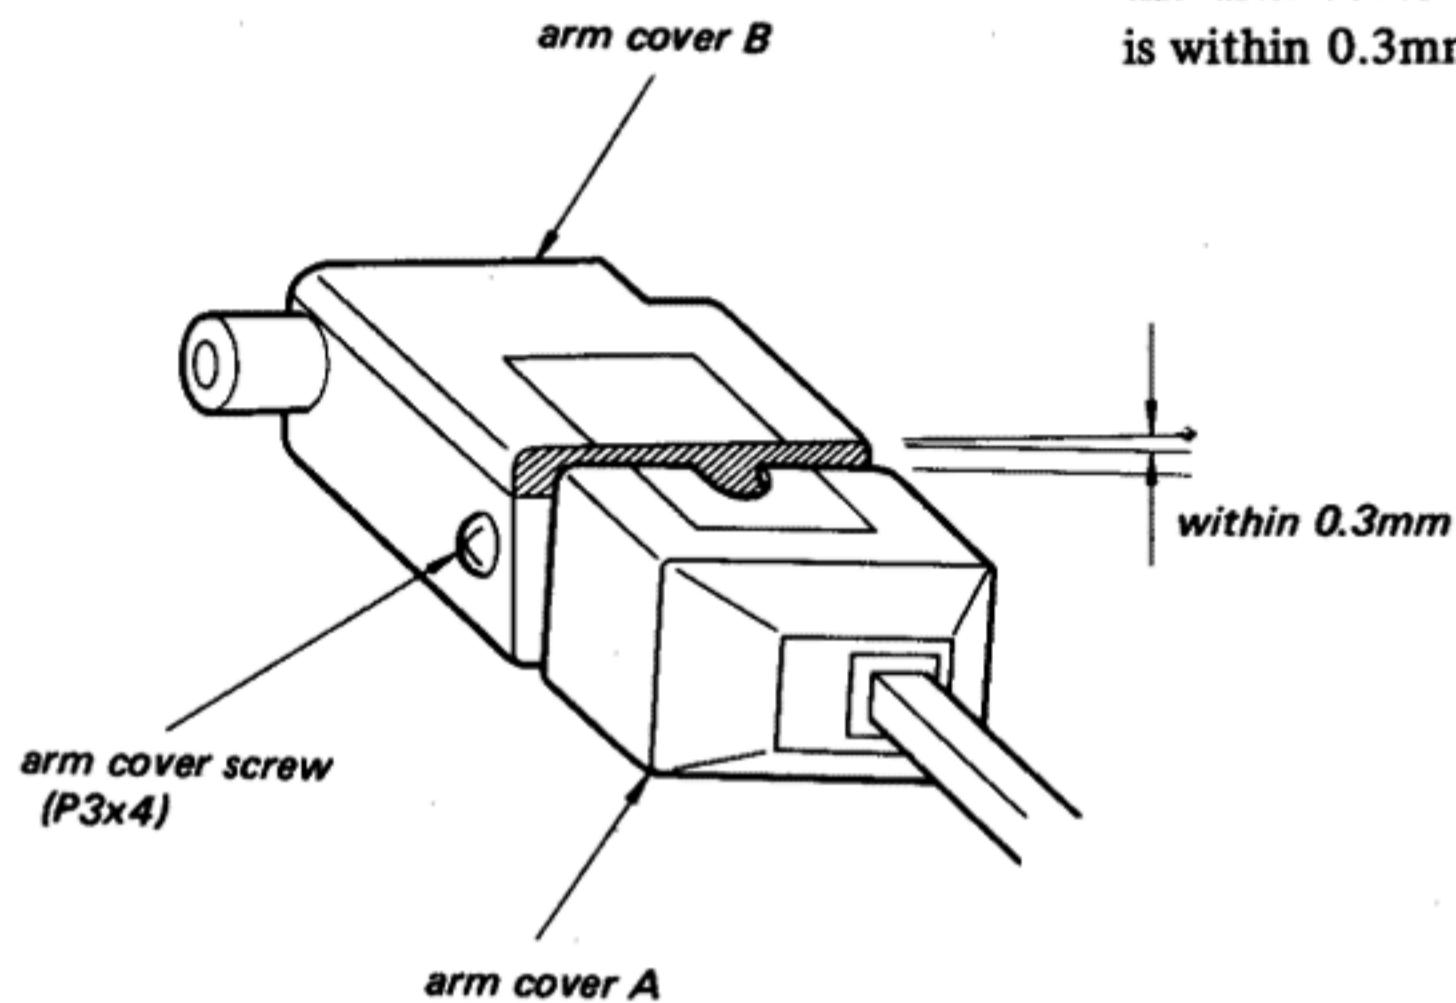

Note: When screwing (1) (2) and (4), screw first where marked (a). There must be at least 0.3mm gap between the magnet on the vertical yoke (D) and the coils on the vertical driving board. As to the side of the vertical yoke (S), do the same.

SECTION 3 ADJUSTMENTS

3-1. MECHANICAL ADJUSTMENTS

Arm Cover Inclination Adjustment

Loosen the arm cover screw. Fix the screw so that the inclination of the arm cover B to the arm cover A is within 0.3mm.

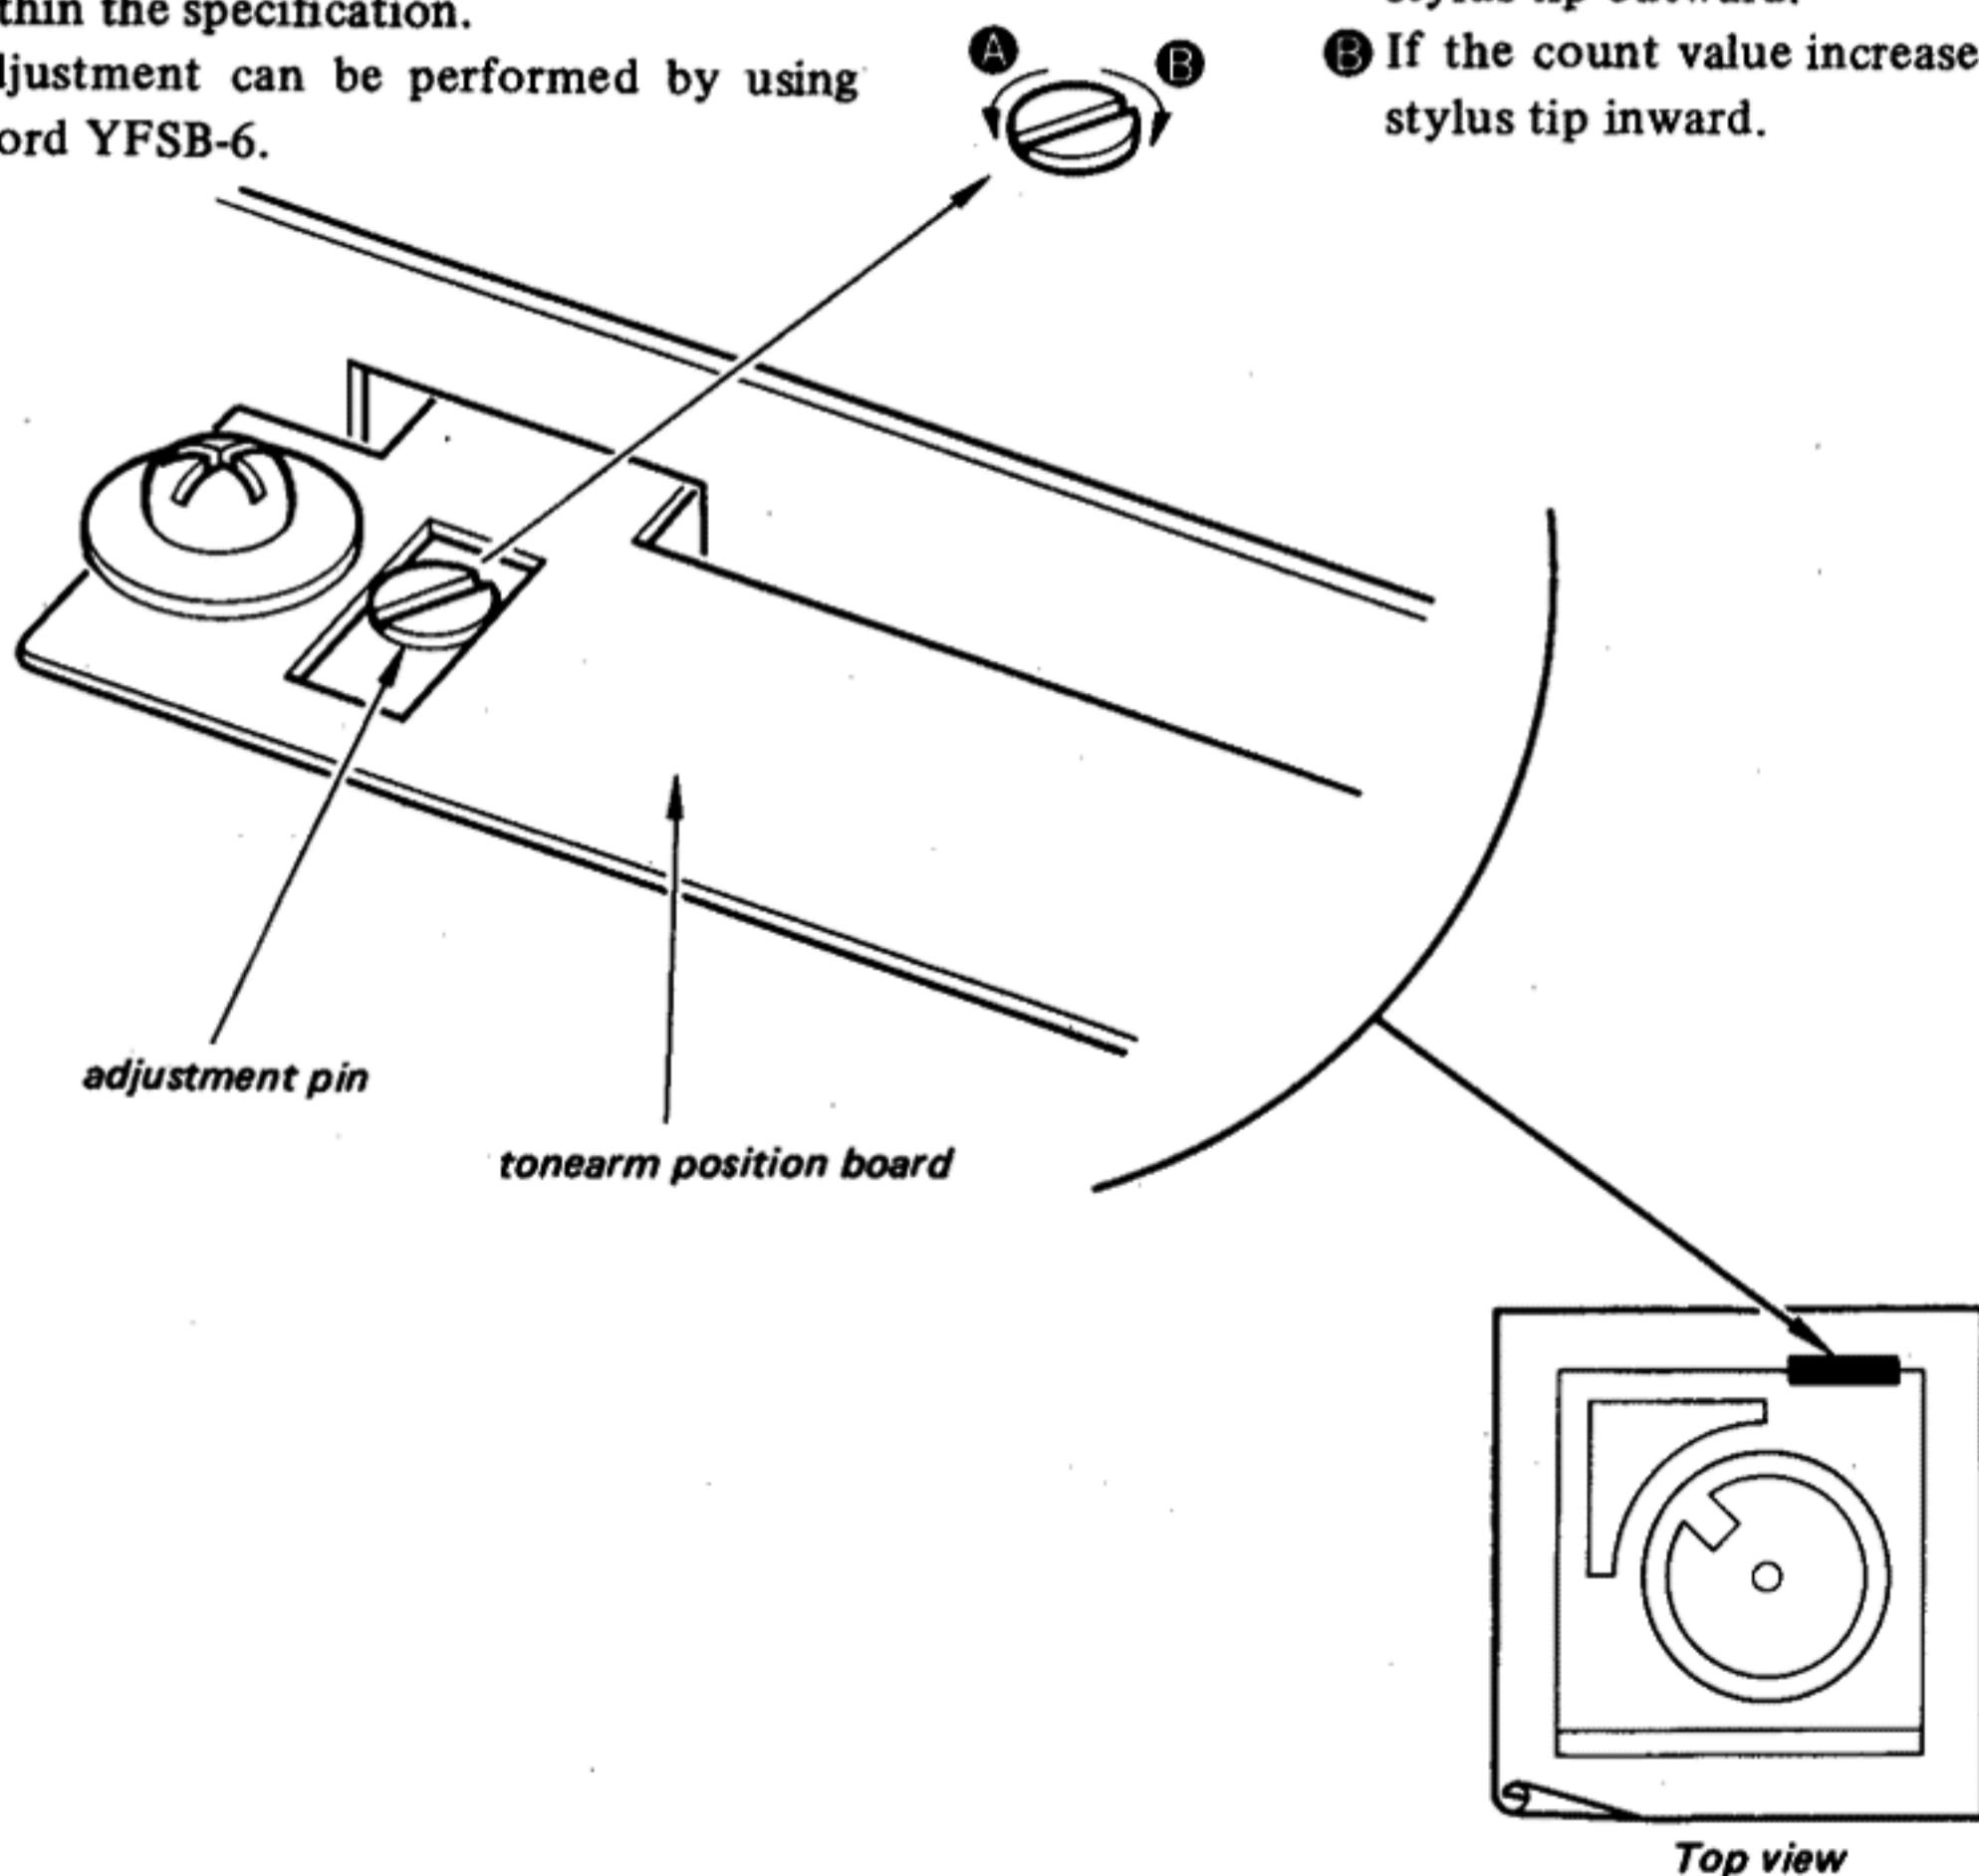

Stylus Drop-point Adjustment

1. Put the test record (YFSC-16).
2. Press START/STOP button.
3. Turn the adjustment screw so that the drop-point obtains within the specification.

Note: This adjustment can be performed by using test record YFSB-6.

Test Record	Specification
YFSC-16 (30cm)	8 – 15 count
YFSB- 6 (17cm)	18 – 29 count

- Ⓐ If the count value decreases, move the stylus tip outward.
- Ⓑ If the count value increases, move the stylus tip inward.

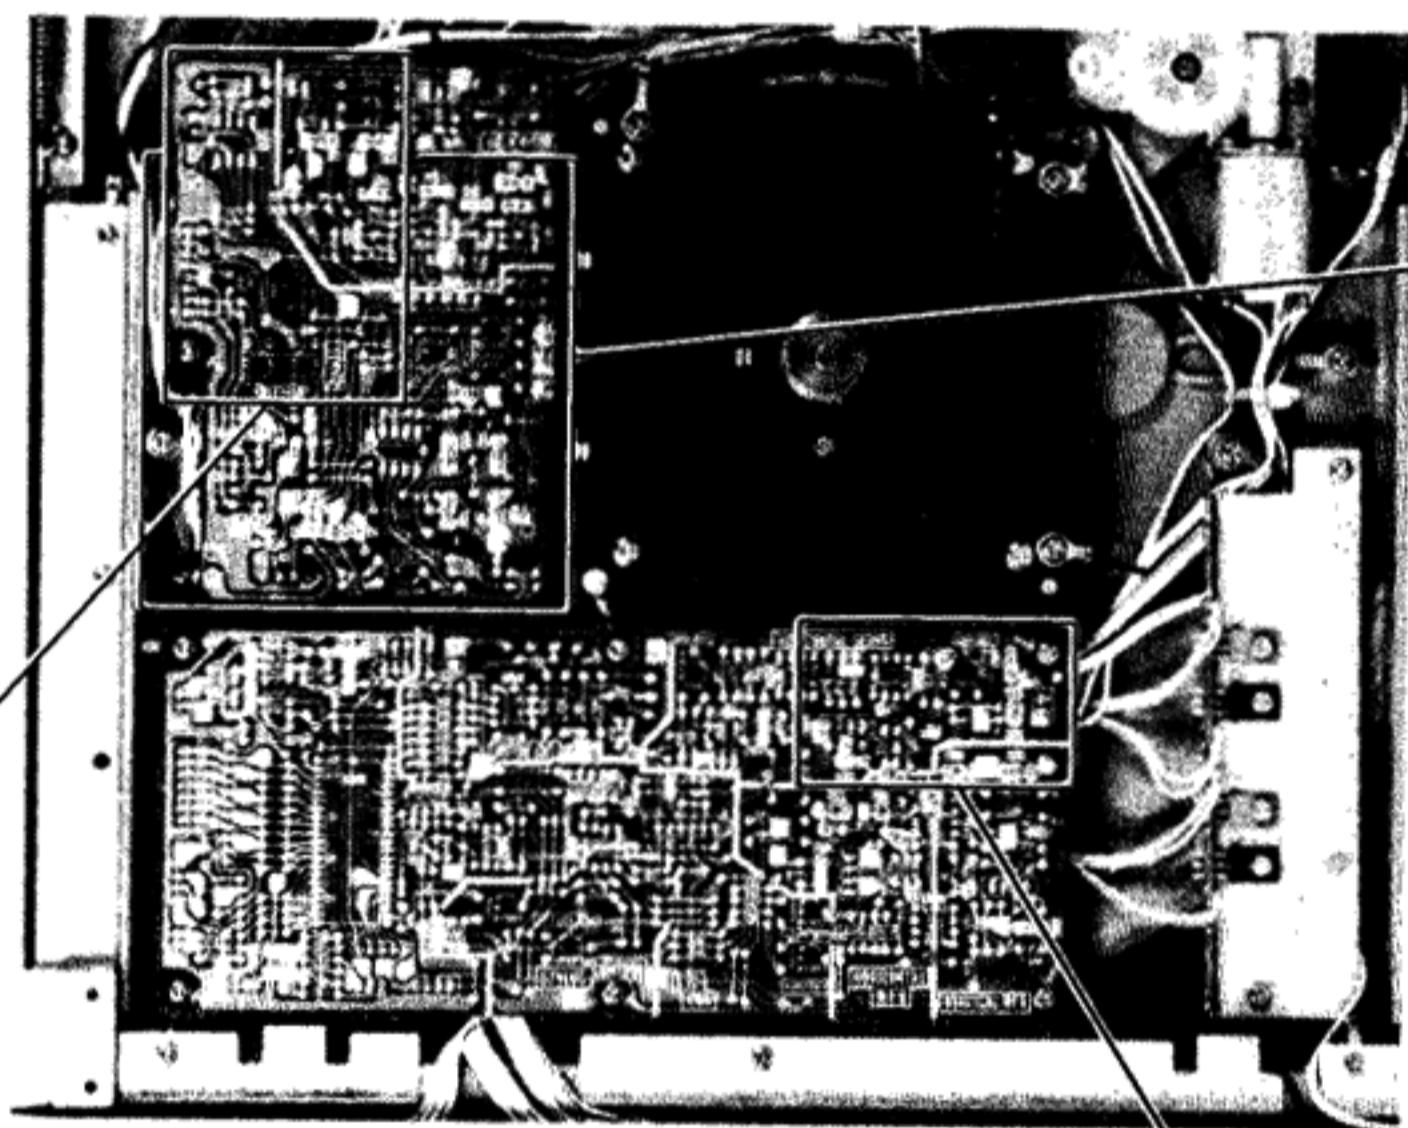

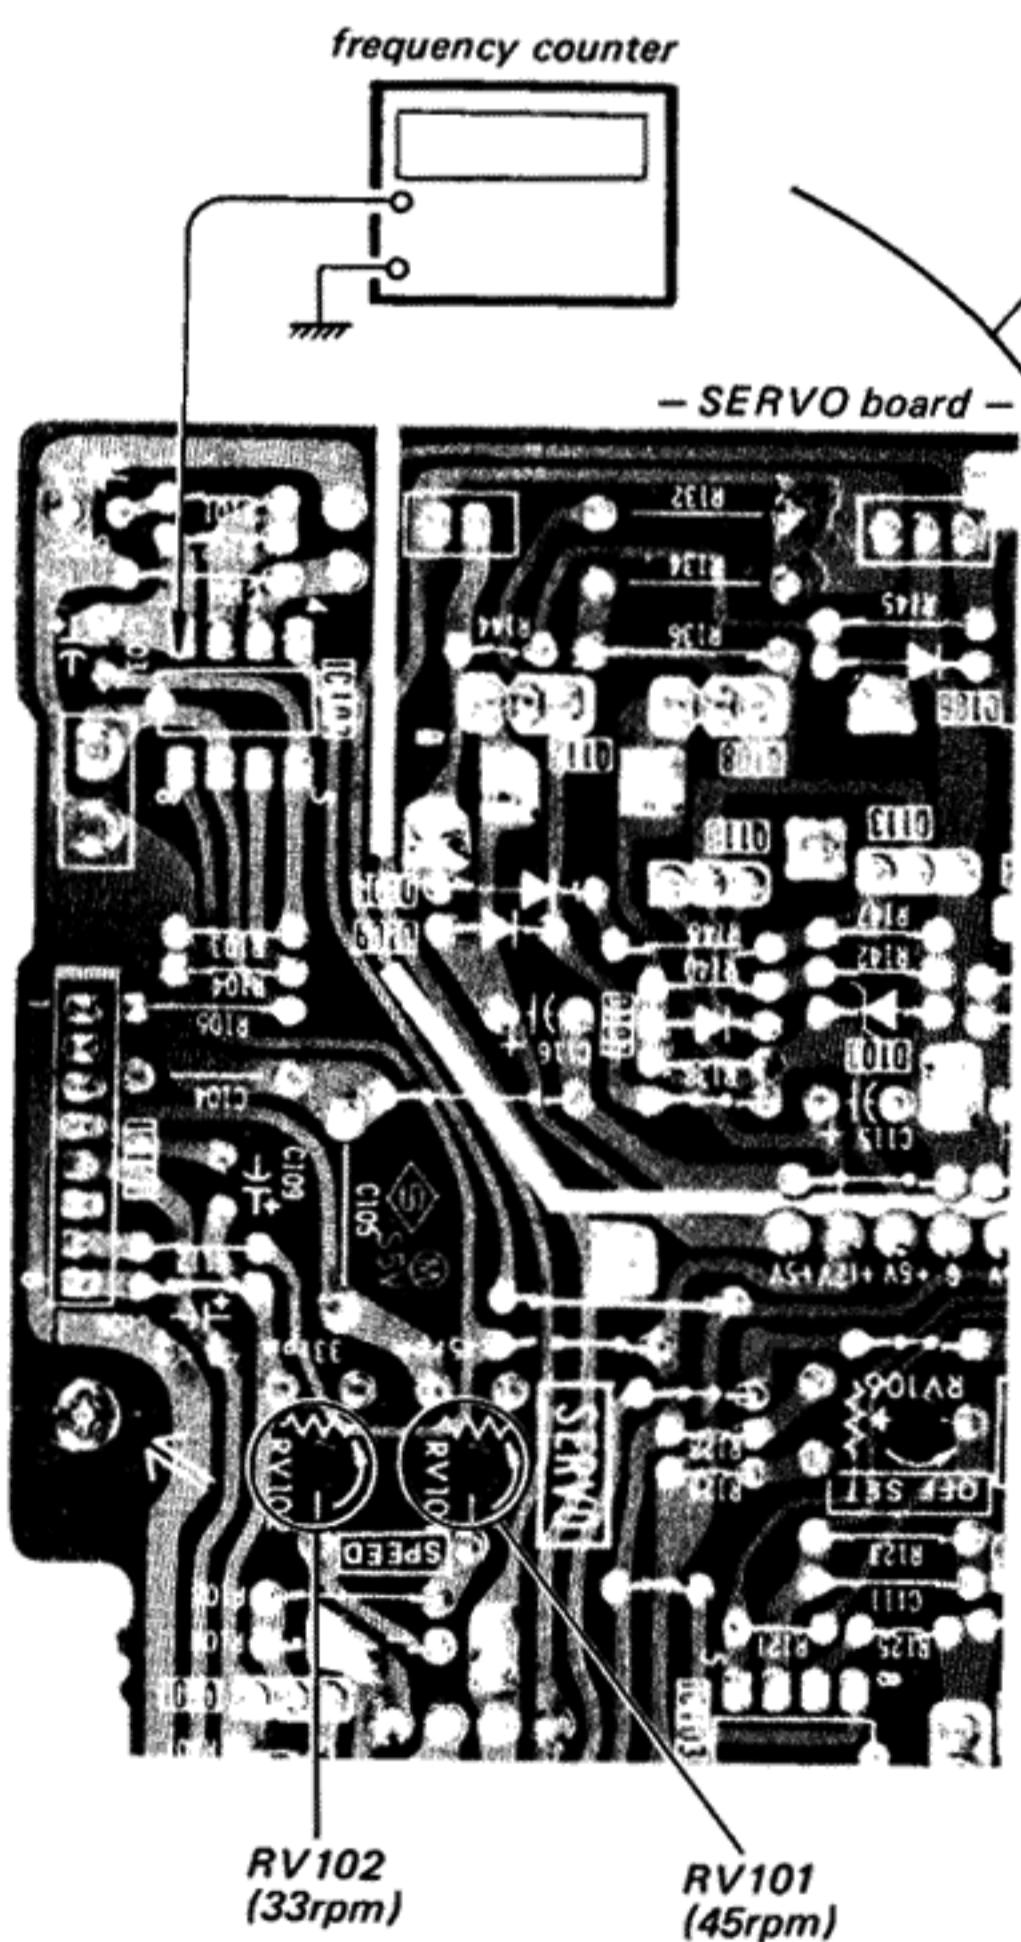

3-2. ELECTRICAL ADJUSTMENTS

- Perform the adjustments with the set operating normally.
- In this set, the voltage is applied to the power supplying line ($\pm 23V$) even if the POWER switch is turned OFF.
- Repeat the procedures 2-3 times.

Turtable Speed Adjustment

1. Connect frequency counter to IC102 pin ①.
2. POWER switch: ON
START switch: ON
SPEED switch: 45 rpm
3. Adjust RV101 so that the frequency counter reading is 95.7–96.3Hz.
4. SPEED switch: 33 rpm
5. Adjust RV102 so that the frequency counter reading is 70.90–71.32Hz.

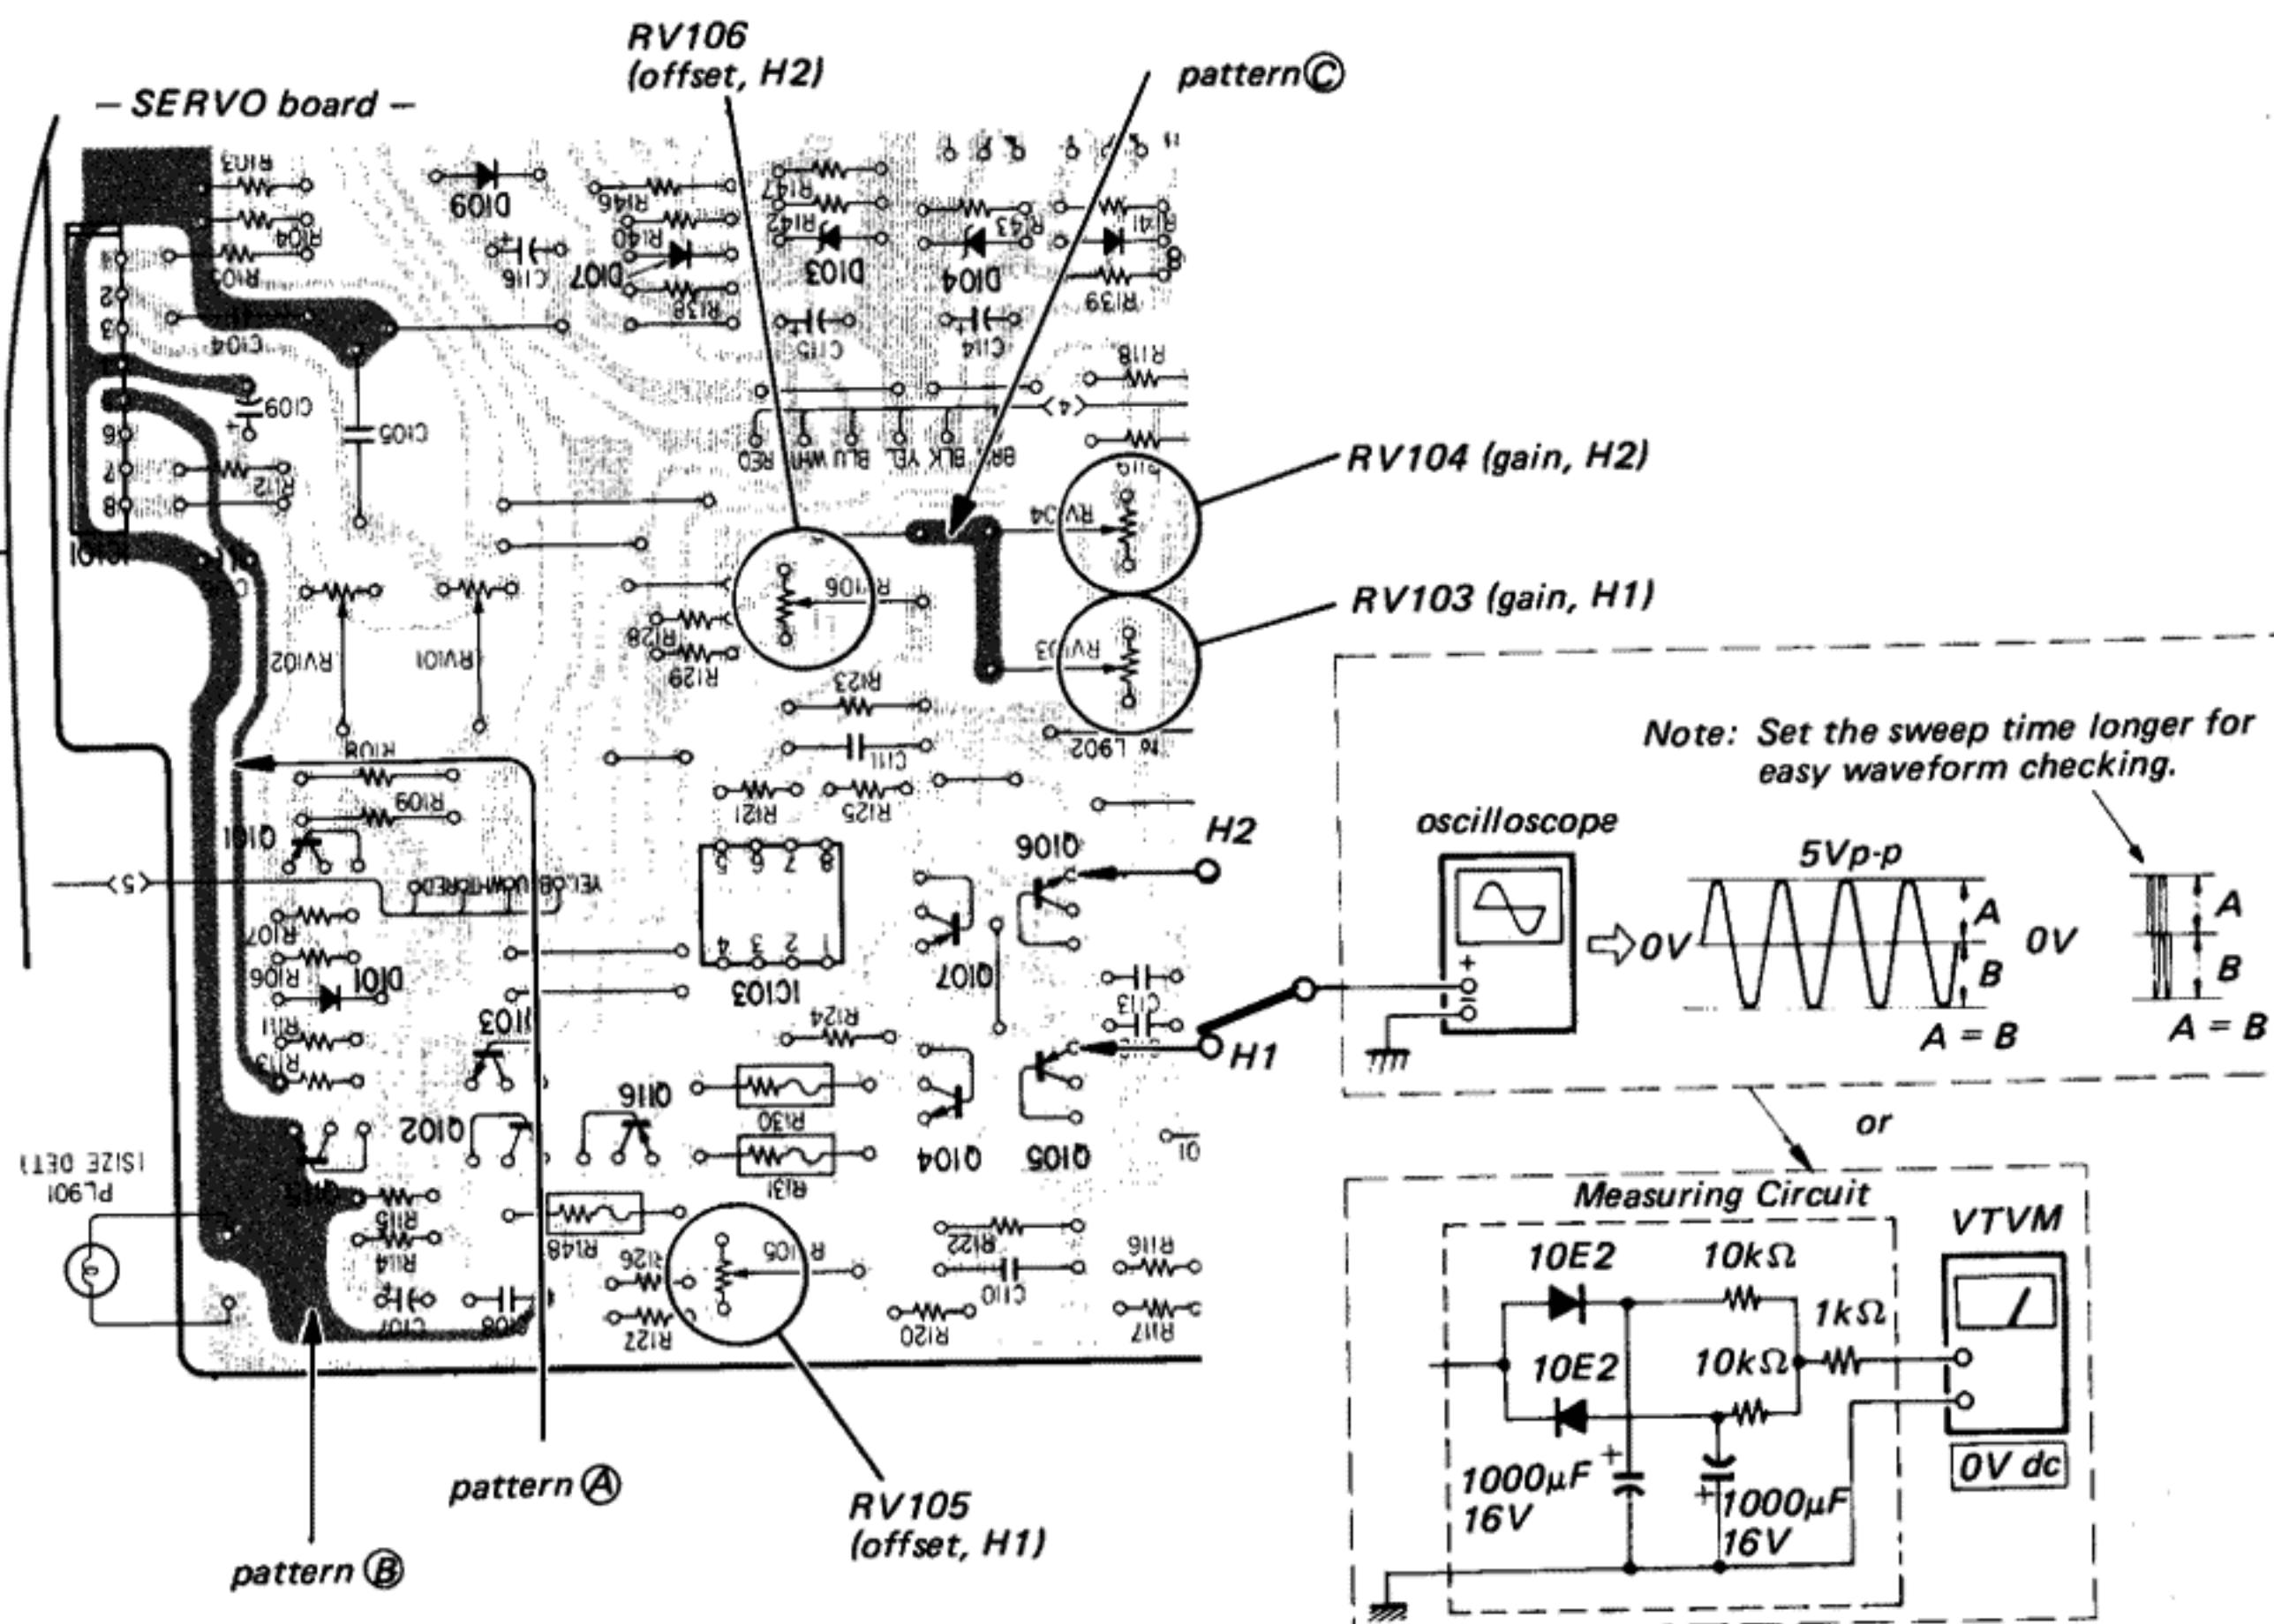

Note: When the adjustment of 45 rpm (RV101) is performed, it makes a difference of adjustment value of 33 rpm. So, the adjustment should be finally done by 33 rpm (RV102).

Gain/Offset Adjustment

1. Connect IC101 pin ⑤ to the ground pattern. (Connect the pattern A to B with a jumper lead.)
2. Apply DC 1.5V to the emitter of Q103 (Pattern C).
3. Adjust RV103(H1) and RV104(H2) so that the emitter voltage of Q104, 105(H1) and Q106, 107(H2) are 5Vp-p.Gain Adjustment

4. Adjust RV105(H1) and RV106(H2) so that the emitter waveforms of Q104, 105(H1) and Q106, 107(H2) are as shown below (or so that DC potential is 0V).Offset Adjustment
5. After adjustment, remove the jumper lead connected in step 1.

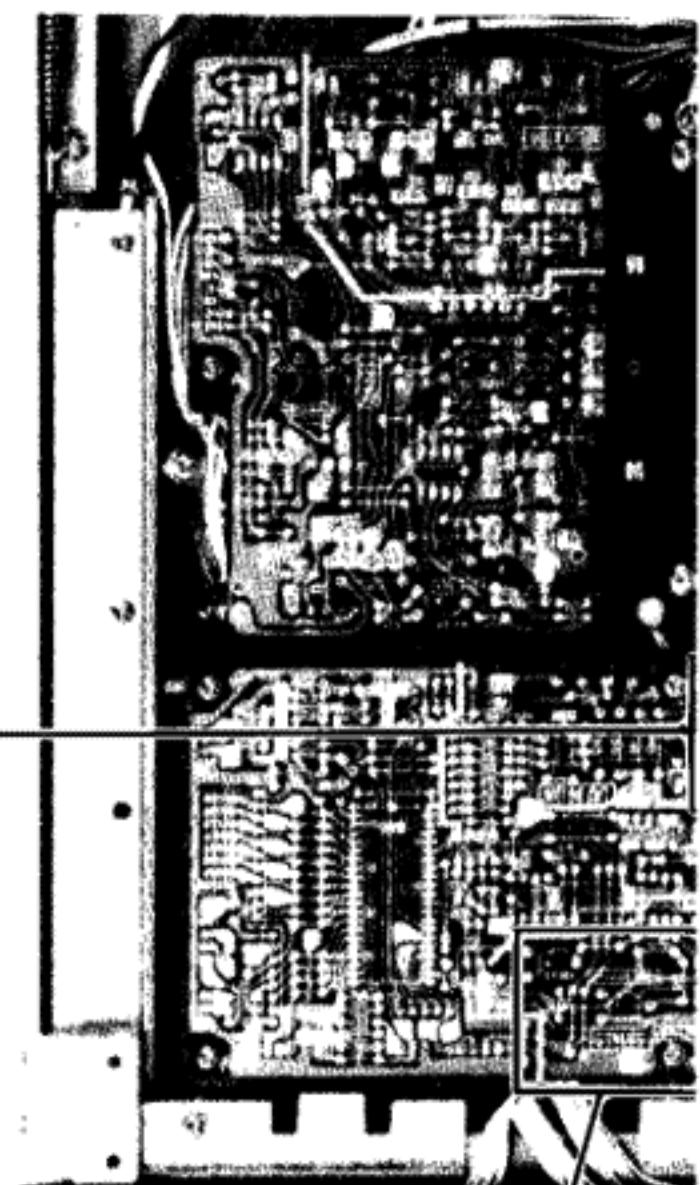

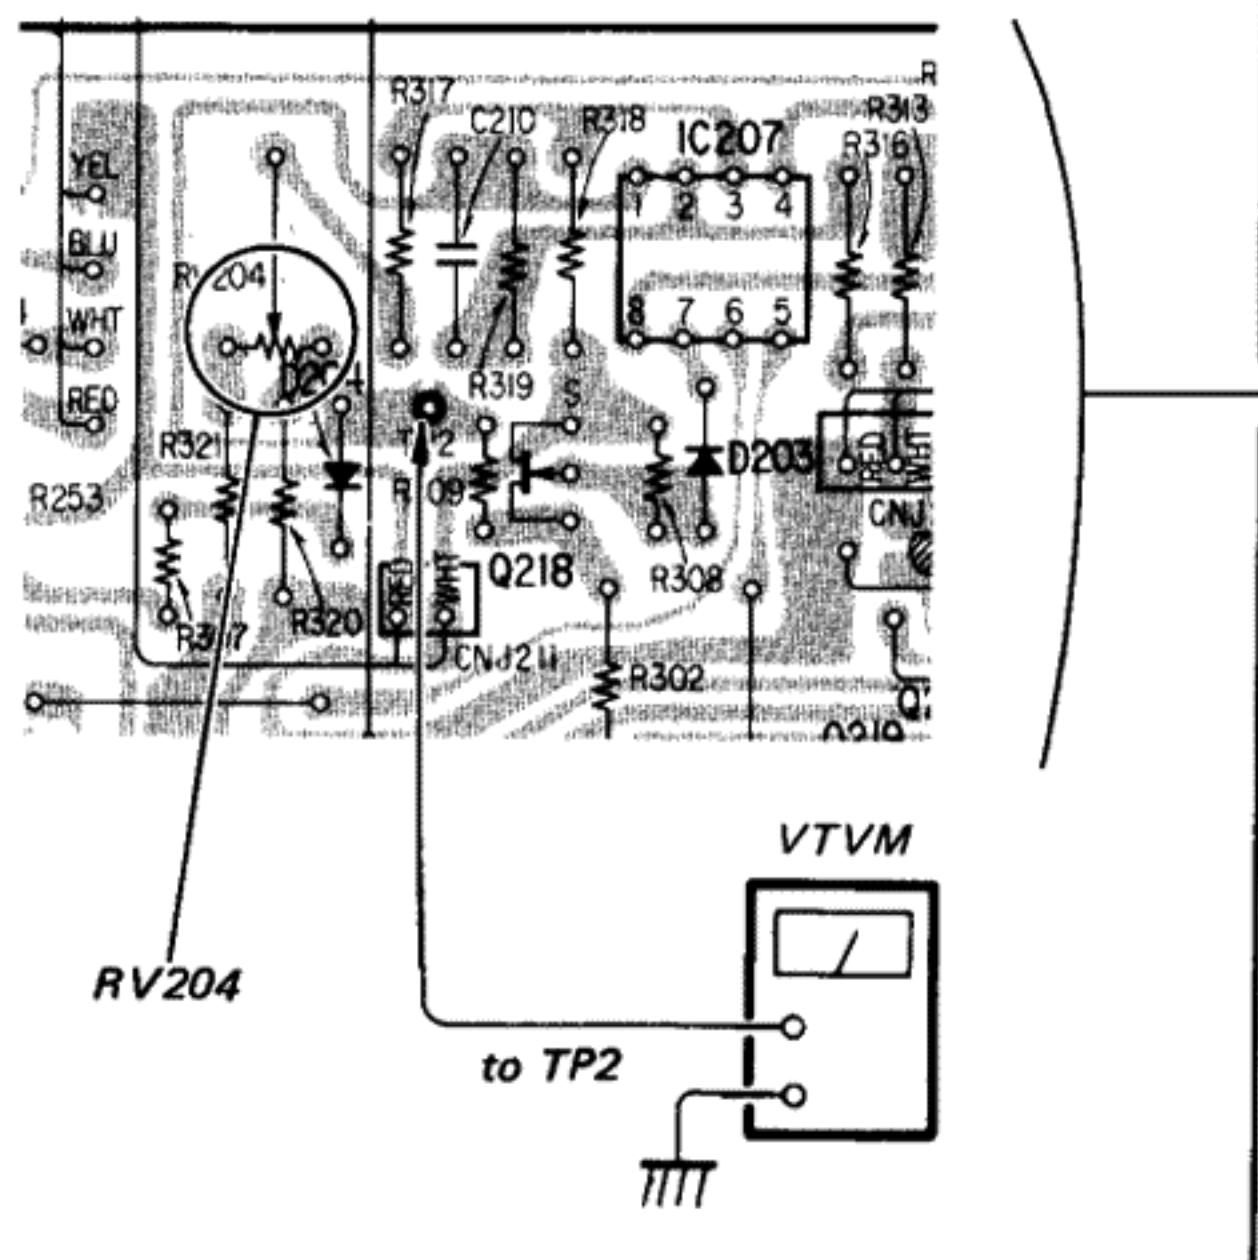

Tonearm Angle Adjustment (1)

1. Fix the turntable with adhesive tapes to prevent it from rotating, put a record on the turntable and lower the tonearm.
 2. Make sure that the tonearm and the arm guide bar are at an angle of 90° (see fig. A page 20)
 3. Adjust RV204 so that the meter reading is -0.1V to 0.1V

Note: Do not prevent the turntable from rotating more than 2 to 3 minutes (otherwise it will damage the rotating parts).

-SYSTEM CONTROL board-

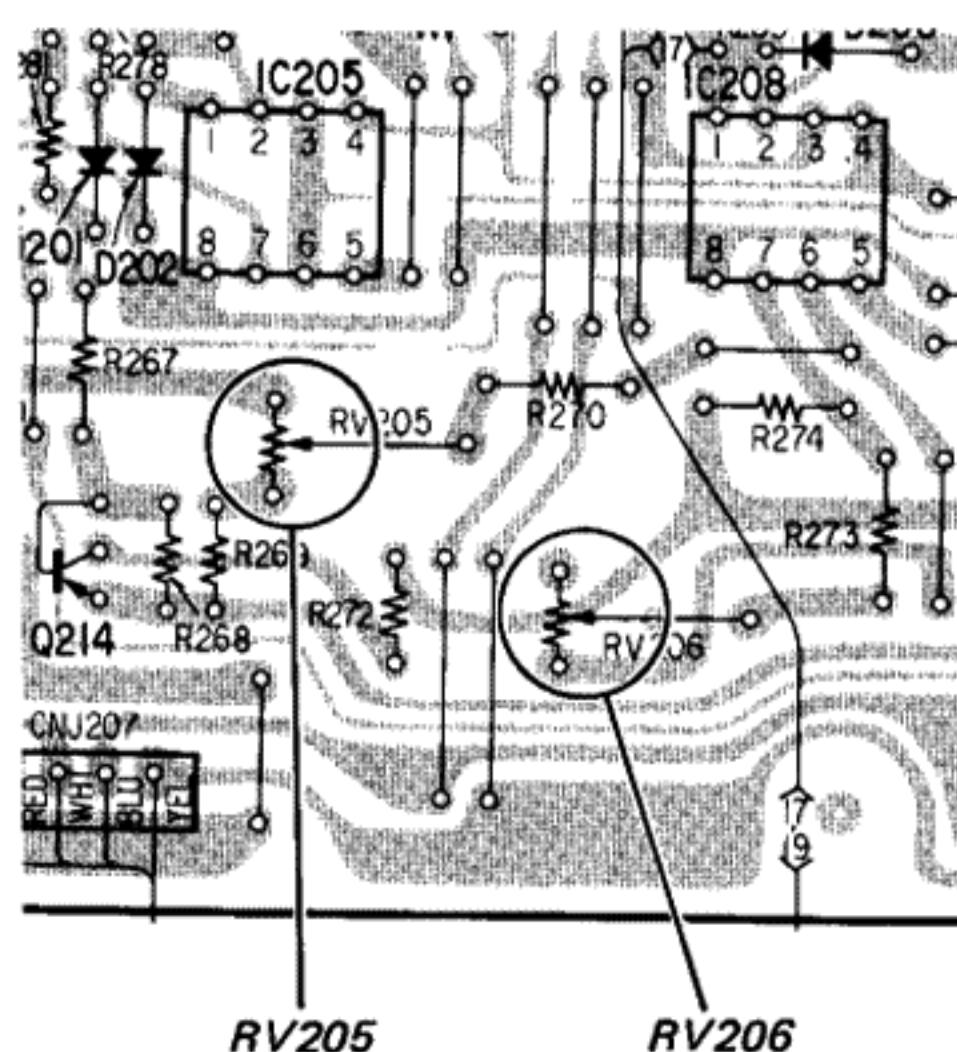

Stylus Force Adjustment

1. Set RV206 in the mechanical center.
 2. Fix the turntable with adhesive tapes to prevent it from rotating, put the stylus force gauge on the turntable and lower the tonearm on the gauge.
 3. Adjust RV205 so that the stylus force becomes 1.2g to 1.3g

Note: If specification is not met by turning RV205,
adjust RV206.

Do not prevent the turntable from rotating more than 2 to 3 minutes (otherwise it will damage the rotating parts.)

-SYSTEM CONTROL board-

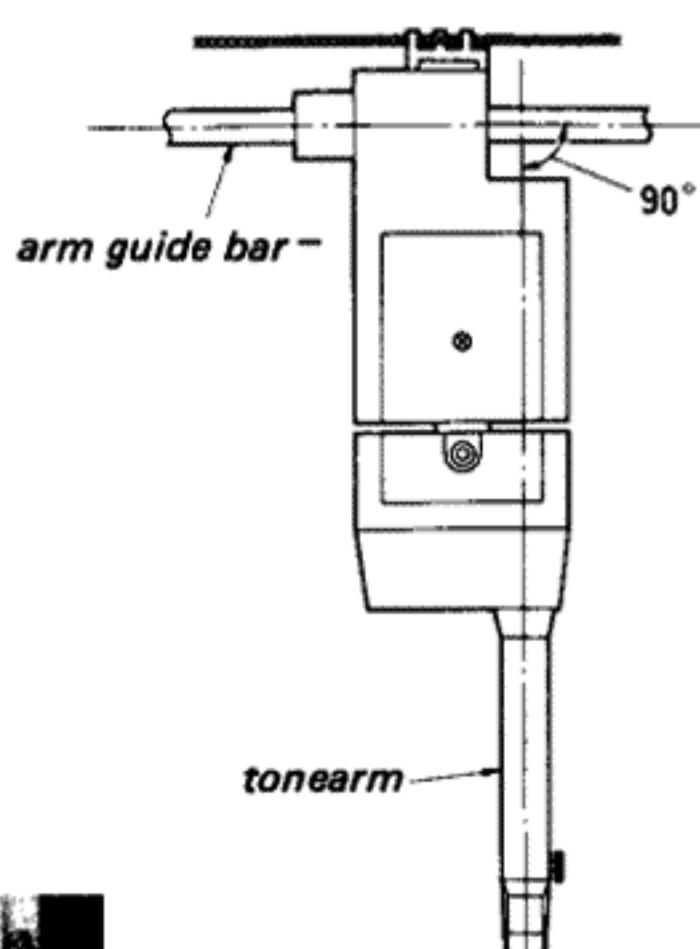

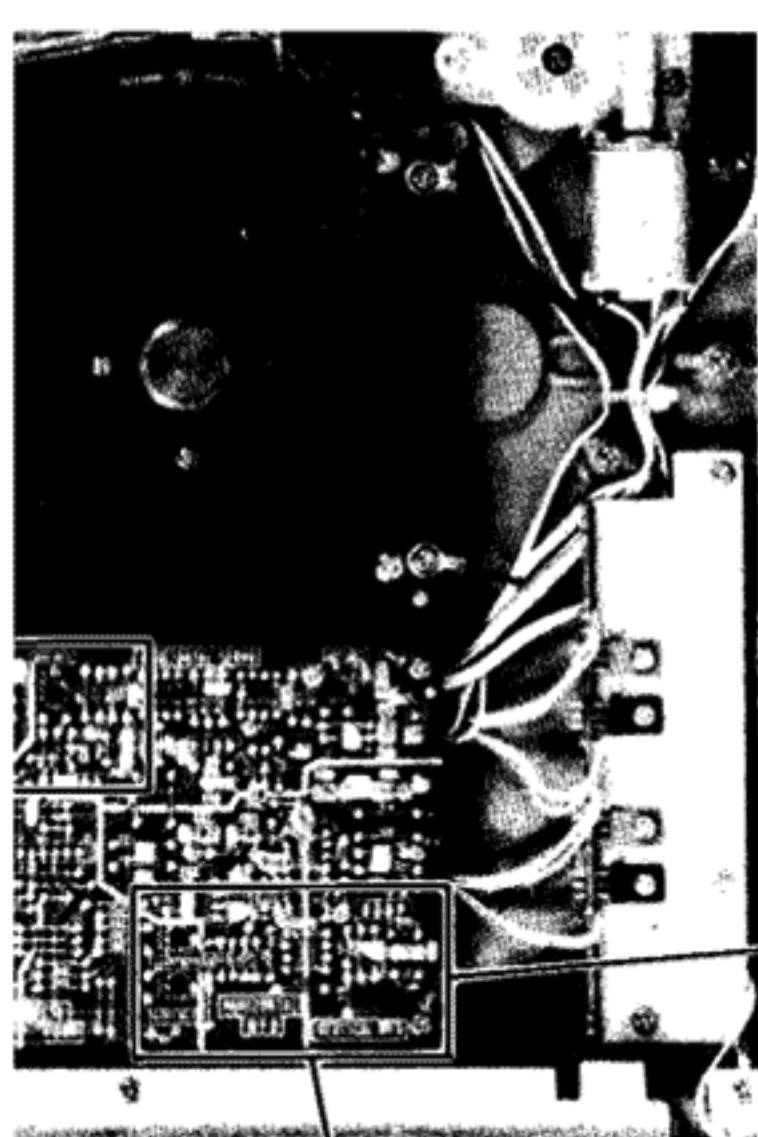

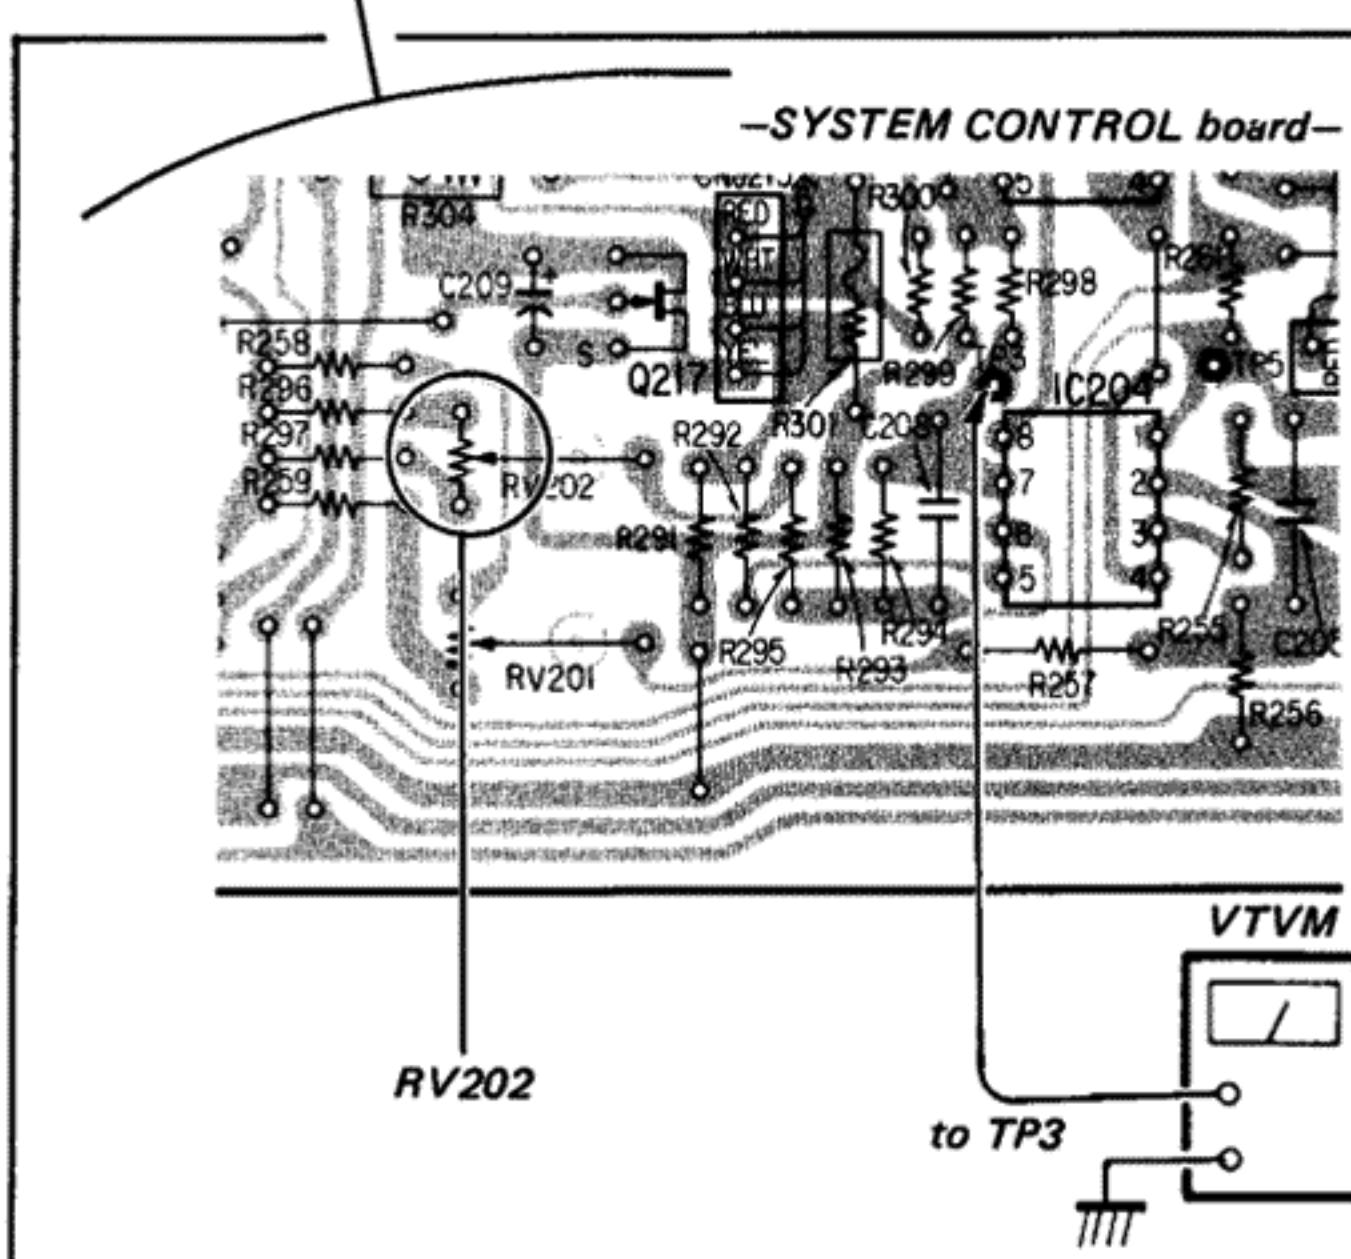

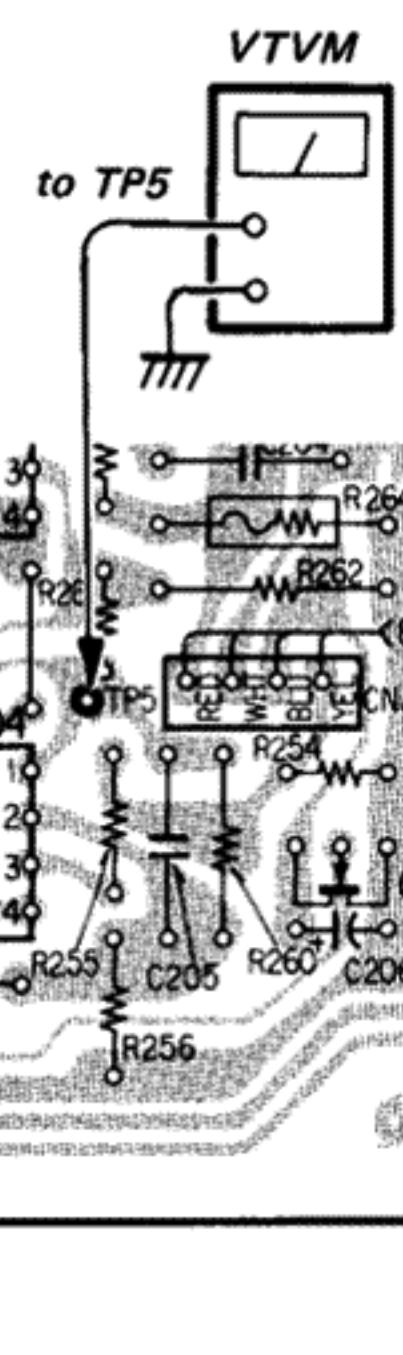

fig. A

Vertical Offset Adjustment

1. Fix the turntable with adhesive tapes to prevent it from rotating, put a record on the turntable and lower the tonearm.
2. Adjust RV201 so that the meter reading is -10mV to 10mV.

Note: Do not prevent the turntable from rotating more than 2 to 3 minutes (otherwise it will damage the rotating parts).

Tonearm Angle Adjustment (2)

1. Fix the turntable with adhesive tapes to prevent it from rotating, put a record on the turntable and lower the tonearm.
2. Make sure that the tonearm and the arm guide bar are at an angle of 90° (see fig. A)
3. Adjust RV202 so that the meter reading is -10mV to 10mV.

Note: Do not prevent the turntable from rotating more than 2 to 3 minutes (otherwise it will damage the rotating parts).

NOTE:

- Items with no part number and no description are not stocked because they are seldom required for routine service.
 - Items marked "♦" are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
 - Due to standardization, parts with part numbers ($\Delta-\Delta\Delta\Delta-\Delta\Delta\Delta-XX$ or $\Delta-\Delta\Delta\Delta\Delta-\Delta\Delta\Delta-X$) may be different from those used in the set.

CAPACITORS:

- All capacitors are in μF . Common capacitors are omitted. Refer to the following lists for their part numbers.
MF: μF , PF: $\mu\mu\text{F}$.

RESISTORS

- All resistors are in ohms. Common 1/4W, 1/8W and 1/16W carbon resistors are omitted. Refer to the following lists for their part numbers.

* F :

- #### COILS

NOTE:

- Items with no part number and no description are not stocked because they are seldom required for routine service.
- Items marked "♦" are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
- Due to standardization, parts with part numbers (Δ-ΔΔΔ-ΔΔΔ-XX or Δ-ΔΔΔΔ-ΔΔΔ-X) may be different from those used in the set.

CAPACITORS:

- All capacitors are in μF . Common capacitors are omitted. Refer to the following lists for their part numbers.
MF: μF , PF: $\mu\mu\text{F}$.

RESISTORS

- All resistors are in ohms. Common 1/4W, 1/8W and 1/16W carbon resistors are omitted. Refer to the following lists for their part numbers.

• F : nonflammable

COILS

• MMH : mH, UH : μH

The components identified by shading and mark Δ are critical for safety. Replace only with part number specified.

Les composants identifiés par une trame et une marque Δ sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

HARDWARE NOMENCLATURE

Screw:

L: Length in mm
D: Diameter in mm
Type of head

Indicated slotted-head only.

Unless otherwise indicated, it means cross-recessed head (Phillips type).

Nut, Washer, Retaining ring:

N 3

Diameter of usable screw or shaft

Reference designation

Reference Designation	Shape	Description	Remarks
SCREWS			
P		pan-head screw	binding-head (B) screw for replacement
PWH		pan-head screw with washer face	binding-head (B) screw and flat washer for replacement
PS PSP		pan-head screw with spring washer	binding-head (B) screw and spring washer for replacement
PSW PSPW		pan-head screw with spring and flat washers	binding-head (B) screw and spring and flat washers for replacement
R		round-head screw	binding-head (B) screw for replacement
K		flat-countersunk-head screw	
RK		oval-countersunk-head screw	
B		binding-head screw	
T		truss-head screw	binding-head (B) screw for replacement
F		flat-fillister-head screw	
RF		fillister-head screw	
BV		braizer-head screw	

Reference Designation	Shape	Description	Remarks
SELF-TAPPING SCREWS			
TA		self-tapping screw	ex: TA, P 3 x 10'
PTP		pan-head self-tapping screw	binding-head self-tapping (TA, B) screw for replacement
PTPWH		pan-head self-tapping screw with washer face	binding-head self-tapping (TA, B) screw and flat washer for replacement
PTTWH		pan-head thread-rolling screw with washer face	binding-head (B) screw and flat washer for replacement
SET SCREWS			
SC		set screw	
SC		hexagon-socket set screw	ex: SC 2.6 x 4, hexagon socket
NUT			
N		nut	
WASHERS			
W		flat washer	
SW		spring washer	
LW		internal-tooth lock washer	ex: LW3, internal
LW		external-tooth lock washer	ex: LW3, external
RETAINING RINGS			
E		retaining ring	
G		grip-type retaining ring
