## SERVICE MANUAL

US Model  
AEP Model

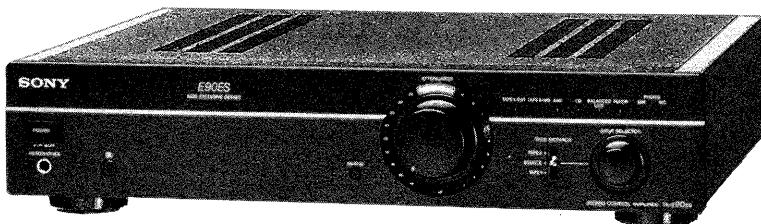

PHOTO : BLACK

### SPECIFICATIONS

#### System

Low-noise FET high gain, NFB type equalizer amplifier  
Low noise FET, single stage differential, MOS FET push-pull output, flat amplifier

Total harmonic distortion at rated 20 Hz - 20 kHz  
0.003%

Intermodulation (IM) distortion at rated output 60 Hz : 7 kHz = 4 : 1  
0.003%

Residual noise at network A  
Less than 9  $\mu$ V

#### Frequency response

PHONO MM: RIAA equalization curve  $\pm 0.2$  dB  
TAPE1/DAT, TAPE2/MD, AUX, CD,  
TUNER: 3 Hz - 300 kHz;  $\pm 3$  dB

#### S/N (network)

PHONO MC (0.5 mV): 78 dB (A)  
MM (5 mV): 95 dB (A)  
TAPE1/DAT, TAPE2/MD, AUX, CD,  
TUNER: 105 dB (A)

#### Muting

-  $\infty$  dB

#### Input

##### Input sensitivity

PHONO MC: 0.25 mV, 100 ohms  
MM: 2.5 mV, 50 kilohms  
TAPE1/DAT, TAPE2/MD, AUX, CD  
TUNER: 150 mV, 20 kilohms  
CD (BALANCED): 150 mV, 20 kilohms

##### Maximum input capability (1 kHz)

PHONO (1 kHz, THD 0.01%) MC: 10 mV  
MM: 200 mV

#### Output

Output voltage impedance  
TAPE1/DAT, TAPE2/MD: 150 mV, 1 kilohms  
PRE OUT: 1.5 V, 300 ohms  
BALANCED OUTPUT: 3 V, 600 ohms  
HEADPHONES: 25 milliwatts (at 8 ohms)

#### General

##### Power requirements

U.S.A. model: 120 V AC, 60 Hz  
European countries model: 220 - 230 V AC,  
50/60 Hz

##### Power consumption

20 W

##### Dimensions (approx.) (w/h/d)

430 x 100 x 360 mm (17 x 4 x 14 1/4 inches)  
incl. projecting parts and controls

##### Mass (approx.)

10.3 kg (22 lb. 11 oz)

#### Supplied accessories

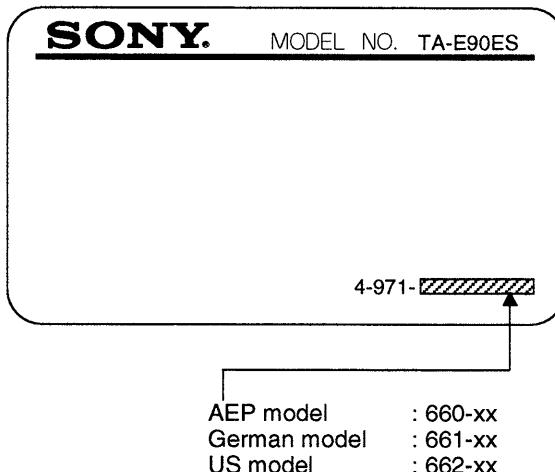

Remote commander (remote) RM-J90(1)  
Sony batteries SUM-3(NS) (2)  
Audio connecting cord (1)

Design and specifications are subject to change without notice.

STEREO PREAMPLIFIER  
**SONY**®

— MODEL IDENTIFICATION —

## SAFETY CHECK-OUT

After correcting the original service problem, perform the following safety checks before releasing the set to the customer:

Check the antenna terminals, metal trim, "metallized" knobs, screws, and all other exposed metal parts for AC leakage. Check leakage as described below.

### LEAKAGE

The AC leakage from any exposed metal part to earth ground and from all exposed metal parts to any exposed metal part having a return to chassis, must not exceed 0.5 mA (500 microamperes). Leakage current can be measured by any one of three methods.

1. A commercial leakage tester, such as the Simpson 229 or RCA WT-540A. Follow the manufacturers' instructions to use these instruments.
2. A battery-operated AC milliammeter. The Data Precision 245 digital multimeter is suitable for this job.
3. Measuring the voltage drop across a resistor by means of a VOM or battery-operated AC voltmeter. The "limit" indication is 0.75 V, so analog meters must have an accurate low-voltage scale. The Simpson 250 and Sawa SH-63Trd are examples of a passive VOM that is suitable. Nearly all battery operated digital multimeters that have a 2V AC range are suitable. (See Fig. A)

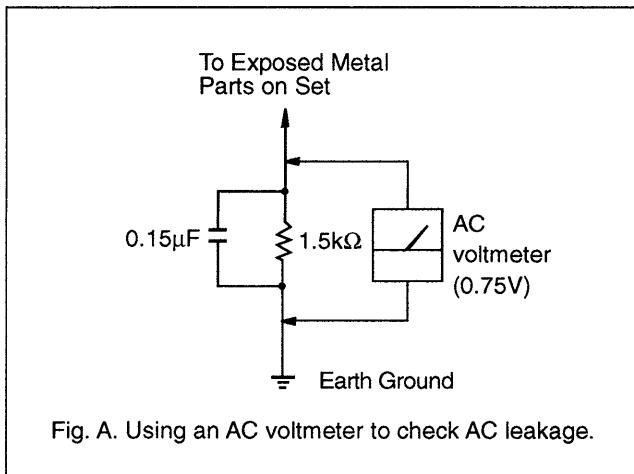

Fig. A. Using an AC voltmeter to check AC leakage.

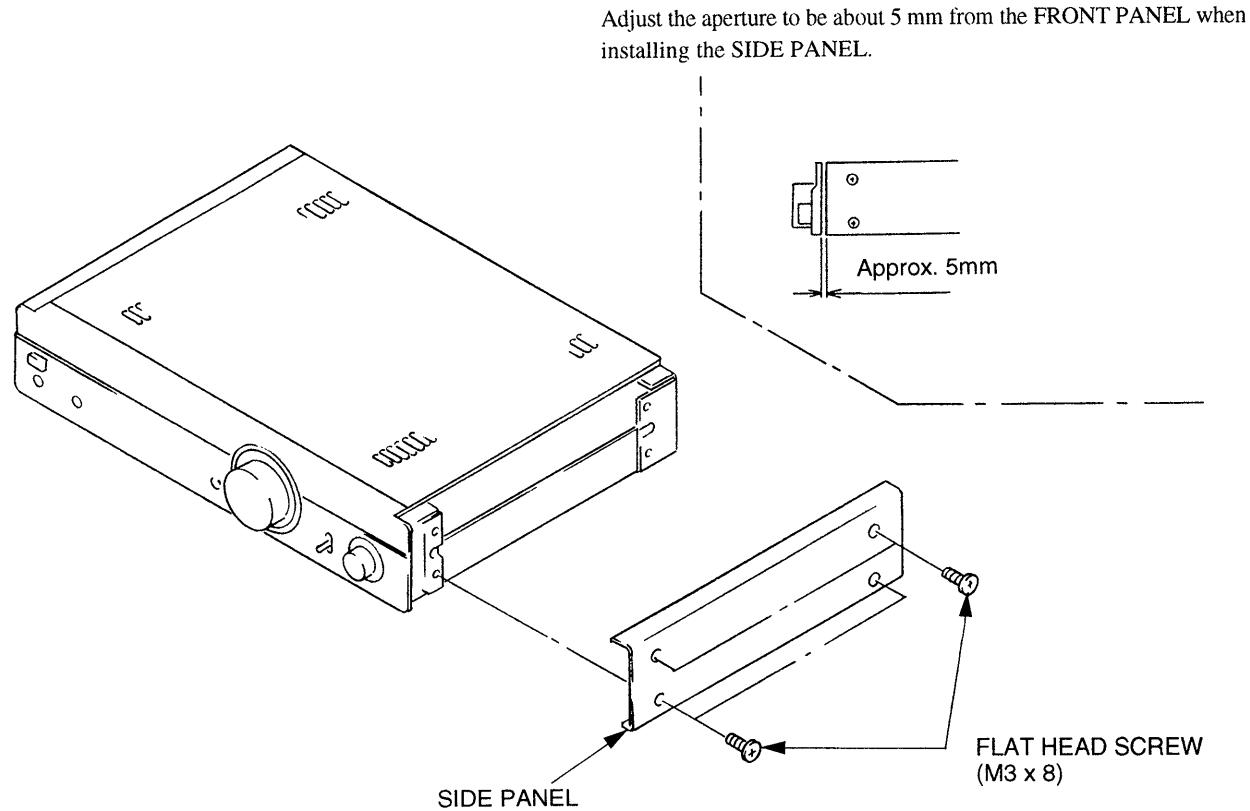

### SAFETY-RELATED COMPONENT WARNING !!

COMPONENTS IDENTIFIED BY MARK  $\Delta$  OR DOTTED LINE WITH MARK  $\Delta$  ON THE SCHEMATIC DIAGRAMS AND IN THE PARTS LIST ARE CRITICAL TO SAFE OPERATION. REPLACE THESE COMPONENTS WITH SONY PARTS WHOSE PART NUMBERS APPEAR AS SHOWN IN THIS MANUAL OR IN SUPPLEMENTS PUBLISHED BY SONY.

## SECTION 1

### SERVICING NOTE

#### NOTE FOR INSTALLATION OF THE SIDE PANEL

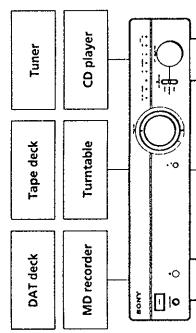

## SECTION 2 GENERAL

This section is extracted from  
instruction manual.

### Hooking Up the System

#### Overview

This section describes how to hook up the preamplifier to a variety of audio components.  
Hook up your audio components according to the connection diagrams that follow.

**What cords will I need?**  
The following audio connecting cord (one) comes with your preamplifier:

Use one audio connecting cord to connect the preamplifier to a power amplifier, a CD player or a turner.

Use two balanced cables (equivalent to Canon XL-R-3), contact your dealer) when connecting a CD player with balanced input connectors or a power amplifier with balanced input connectors.

Use two audio connecting cords to connect the preamplifier to a tape deck, a DAT deck or an MD recorder.

#### Hookup procedure

- Turn off the power to all components before making any connections.
- Do not connect the AC power cords until all connections are completed.
- Be sure to make connections firmly to prevent hum and noise.
- When connecting an audio cord, be sure to connect the Right and Left (left) connectors of the preamplifier to the R and L connectors of the other equipment.

If your turntable has an earth lead  
Connect the earth lead to the earth terminal to prevent hum.

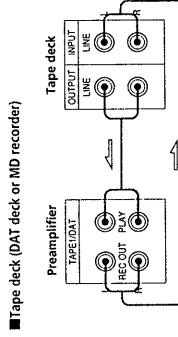

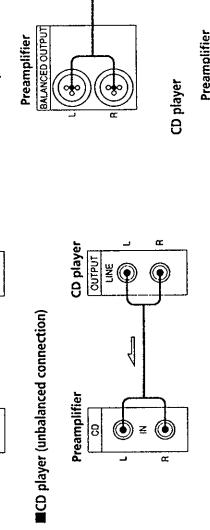

Now you're ready to use your preamplifier.

First, turn on the preamplifier and the audio components you're going to use.

### Listening to a Program Source

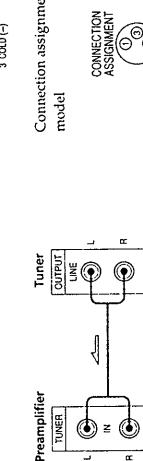

This section describes how to select and listen to a program source.

Before you begin, make sure you have connected the preamplifier to audio components correctly and firmly as indicated on page 5.

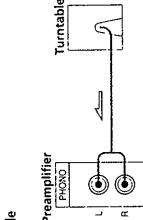

Use the same configurations to connect a tape deck or a MD recorder to the TAPE2/MID connectors.

#### Tuner

#### Turntable

### Connecting the AC power cord

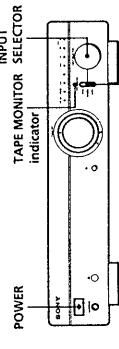

Now you're ready to use your preamplifier.

First, turn on the preamplifier and the audio components you're going to use.

### Recording

This section describes how to record a program source.

Before you begin, make sure you have connected the preamplifier to audio components correctly and firmly as indicated on page 5.

1 Press POWER to turn on the preamplifier.

2 Turn on the power amplifier.

3 Select the program source to be recorded by turning the INPUT SELECTOR control.

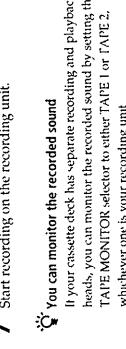

Make sure to set the TAPE MONITOR selector to SOURCE, otherwise you will not be able to hear the selected program source.

4 Place the recording unit into recording pause.

5 Make the recording level adjustments on the recording unit with the program source playing.

6 Restart the program source.

7 Start recording on the recording unit.

You can monitor the recorded sound

If your cassette deck has separate recording and playback heads, you can monitor the recorded sound by setting the TAPE MONITOR selector to either TAPE 1 or TAPE 2. The TAPE MONITOR indicator goes off whenever one is your recording unit. The TAPE MONITOR indicator will light.

When dubbing a tape

When dubbing from TAPE 1 to TAPE 2, select TAPE 1 in step 3 of the recording procedure. When dubbing from TAPE 2 to TAPE 1, select TAPE 2 in step 3 of the recording procedure.

Note

If you change the program source by turning the INPUT SELECTOR control during recording, the newly selected program source will be recorded.

### When you use headphones

Connect the headphones to the HEADPHONE jack. Output from the speakers will be cut off.

## SECTION 3

### ELECTRICAL ADJUSTMENT

#### **DC Bias Adjustment (with no signal input)**

**Note:**

1. Before measuring, desolder the two test lands of the MAIN board and EQ board (four test lands altogether) and then return the boards to their original positions.

Set up:

Volume: minimum

Adjusting method:

1. Connect a DC volt meter to both edges of the R418 and R468 of the MAIN board and turn on the power supply. Adjust RV401 and RV451 so that the DC volt meter reading satisfies the specified value.
2. Adjust the EQ board in the same way.
3. After completing all adjustments, solder all parts desoldered again.

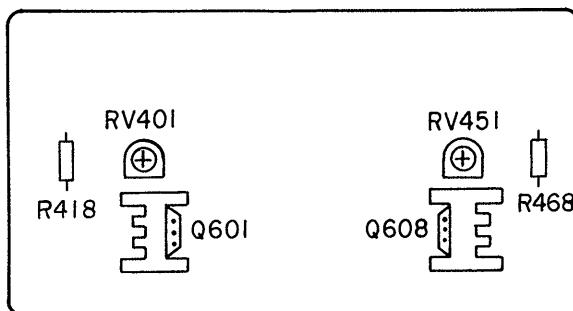

\* Specified Value: 200 mV ± 20 mV

		Measurement Point	Adjustment Point
MAIN BOARD	L-ch	R418	RV401
	R-ch	R468	RV451
EQ BOARD	L-ch	R125	RV101
	R-ch	R175	RV151

## SECTION 6

### ELECTRICAL PARTS LIST

CONTROL

## NOTE:

The components identified by mark  $\triangle$  or dotted line with mark  $\triangle$  are critical for safety.  
Replace only with part number specified.

When indicating parts by reference number, please include the board name.

- Due to standardization, replacements in the parts list may be different from the parts specified in the diagrams or the components used on the set.
- Items marked "\*" are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
- -XX, -X mean standardized parts, so they may have some difference from the original one.
- Hardware (# mark) list and accessories and packing materials are given in the last of this parts list.
- Abbreviation  
G : German model

## • RESISTORS

All resistors are in ohms

METAL: Metal-film resistor

METAL OXIDE: Metal Oxide-film resistor

F : nonflammable

## • SEMICONDUCTORS

In each case, u:  $\mu$ , for example:uA...:  $\mu$ A..., uPA...:  $\mu$ PA..., uPB...:  $\mu$ PB...,  
uPC...:  $\mu$ PC..., uPD...:  $\mu$ PD...

## • CAPACITORS

uF:  $\mu$ F

## • COILS

uH:  $\mu$ H
