## BR-20 Series 2-track Recorders

### **Advanced Analog 2-track for Professional Applications**

Although digital equipment seems to be the main topic of conversation these days, the reality of the situation is that analog equipment will remain the mainstay of many broadcast, production, and related recording studios for a considerable time to come. Analog machines offer compatibility, ease-of-use, cost/performance, and reliability (not forgetting familiarity) that simply cannot be replaced overnight. The TASCAM BR-20 series 2-track recorders have been designed specifically for such applications, implementing the very latest microcomputer-control technology to deliver performance that is fully in tune with the times.

*The BR-20 series includes:*

- |          |                            |
|----------|----------------------------|
| BR-20(N) | NAB 2-track format         |
| BR-20(D) | DIN stereo format          |
| BR-20T   | with center timecode track |

*The BR-20 packs outstanding performance and a wide range of advanced features into a surprisingly small, exceptionally easy-to-use recorder that will prove its worth in any application that requires 2-track analog recording.*
